First, we must understand that we are talking about a benefit under the Government health care plan which accounts for only 0.2 percent of the total 4 billion 200 million dollars outlayed under the Government employee health plan. This is only one-fifth of 1 percent of all of the money that is spent in the health coverage of employees. It is important to note that under the 1982 health benefit contracts, over 100 of the insurance carriers agreed voluntarily to limit abortion coverage precisely in the manner in which the Ashbrook amendment would require if passed. Moreover, the amendment that we are talking about today does not limit, in any way, the right of a Federal employee to have an abortion under current law. The amendment simply states that the Federal employee, like every employee in the private sector, be required to pay for the abortion with her own private funds and not at the partial expense of taxpayers. The elimination of mental health and dental care coverage is a clear sign that the package of benefits offered to Federal employees can, and on occasion, must be reduced in order to cap the constantly spiraling costs of this program.

Another point that I would ask my colleagues to consider is that Federal employees are taxpayers, like everyone else, and like the rest of the taxpaying population, many harbor the same resentments against the use of Federal funds for abortion that will be found in the population at large. There is no reason to believe that the taxpaying public that happens to be employed by the Federal Government is radically different on this issue than the public at large and many people consider this not a medical benefit but a morally reprehensible procedure.

Mr. President, I would also like to address the objection that says that the elimination of funding for abortions under the Federal Employee Health Benefits Plan represents some form of interference in an employer-employee relationship. The objection is simply unfounded.

The Office of Personnel Management does not negotiate wages or benefits with Federal employee unions as unions. In fact, it is prohibited from doing so by the United States Code, title V. OPM does negotiate with the unions as insurance carriers, in the same manner as private sector insurance carriers. Federal employees may well deserve the 60 percent taxpayer contribution as part of their compensation, but to say they are entitled to partially taxpayer funded nonlifesaving abortions is incorrect.

I strongly urge my colleagues to restore current law and oppose the committee amendment.

Thank you, Mr. President.

Mr. ZORINSKY. Mr. President, will the Senator from Alabama yield?

Mr. DENTON. I yield to the Senator from Nebraska.

Mr. ZORINSKY. Mr. President, the continuing appropriations resolution currently pending before the Senate contains a serious flaw which must be corrected. The Senate continuing appropriations resolution deletes the House language prohibiting abortion coverage under Federal health insurance plans. This is not the time to debate the abortion issue. The action of the Senate Appropriations Committee is not consistent with language unchanged in the bill, restricting payments for abortions under medicaid, except when the life of the mother is endangered. This is a blatant inconsistency.

The Federal Government pays at least 60 percent of the cost of the Federal employee health benefits program, which paid for 17,000 abortions in 1981. Like the Helms-Hyde amendment, the amendment proposed, to restore the House language, would permit abortion funding "where the life of the mother would be endangered if the fetus were carried to term." This amendment would not interfere with contracts currently in effect.

When I was the mayor of Omaha, I led the successful effort to eliminate abortion funding from the city's employee health plan.

Mr. President, it seems to me that on the grounds of consistency alone, regardless of the reasons, I and others who supported the Helms-Hyde amendment to prohibit medicaid payment for abortions must support this amendment as well

There were those who argued, "Since abortion is legal, the Helms-Hyde amendment is unjust because it denies to the poor what is available to the wealthy." I, and many of my Senate colleagues rejected this argument because we recognize that every abortion destroys a living human being. Therefore, no consideration no less weighty than the life of the mother itself can justify an abortion. And if there is discrimination involved, it is not against the poor, but against the unborn children whose lives cannot be saved. Congress has ended abortion-onfunding Federal of demand under medicaid. And we are speaking today of another program which is directly funded and administered by the Federal Government. I suggest that we ought not to continue to provide for the relatively well-to-do something we have rightly denied to the poor. I urge the adoption of the amendment.

I thank the Senator from Alabama. Mr. DENTON. I thank the Senator from Nebraska.

Mr. HATFIELD. Mr. President, has the Senator yielded the floor?

Mr. DENTON. I yield.

Mr. HATFIELD. Mr. President, I find myself in a very difficult role because I stand with the Senator from Alabama, the Senator from Nebraska, the Senator from Iowa, and the Senator from North Carolina on the basic issue of abortion. I oppose abortion and Federal funds being used for abortion except in the case of the life of the mother.

But, Mr. President, there is another principle involved in the Ashbrook amendment that causes me to have to stand here this morning and indicate my opposition to having it put back in the continuing resolution, after the committee voted to delete it:

We are dealing with the principle of whether or not we should put the Federal Government in a role of telling an individual citizen how he or she can spend his or her money after the taxes have been paid and other obligations met by law. It is simply this: Under this program the medical benefit plans of the Federal Government constitute compensation. In effect, we are saying to the Federal employees, "You cannot use that compensation to have an abortion."

The principle is simply I did not want the Federal Government to begin sticking its head under the tent and stipulating how individuals can spend their own compensation, as long as it does not violate the law.

I do not believe the Federal Government should be in the business, even in this indirect manner, of telling insurance companies whether or not they can make certain programs available in their plans.

This is a matter of labor-management negotiations. It is not a matter for us to put this kind of prohibition on such compensation. Compensation is what it is. I think that is a very important principle to consider.

We talk about Big Government. We talk about Government intruding in the private lives of people. This is a far different thing than having Federal funds that are appropriated funds being used to perform abortions.

We are now saying to Federal employees, "Your compensation that you have earned, cannot be utilized to obtain an abortion under a negotiated health benefit plan which provides for that coverage."

I just want to put this thing into perspective. We are not dealing here with a simple issue of abortion or antiabortion. I would line up with such a vote on the antiabortion side as I have in every Hyde amendment and every other vote that we have conducted throughout the number of years that this issue has been before us.

I thus reluctantly rise to oppose the Ashbrook amendment. I know the antiabortion lobby is making this a symbolic vote on the question of abortion. I know the pressures that are applied here that if you are antiabortion you are pro-life, you have got to vote for the Ashbrook amendment. I hate to be put in that situation because, frankly, it is oversimplification, I think it is misleading.

There is no one who feels as strongly as I do about abortion. I must also say I have a very strong feeling about the principle of not putting the Government in the role of dictating how people can spend the money which they have earned as long as it does not violate the law of the land. That is the principle I hope we can keep in mind in supporting the committee in its effort. By the way, I might say this item will be in conference with the House, as the House contains the Ashbrook amendment.

Mr. PACKWOOD. Mr. President,

will the Senator yield? Mr. HATFIELD. I yield.

Mr. PACKWOOD. Mr. President, in my young legal career I almost exclusively practiced labor law, and negotiated contract upon contract from the employer's viewpoint. It was always very clear when we negotiated a package—if it included more in fringe benefits, it included less in wages. We always traded off one with the other, but it was always a package for compensation. The senior Senator from Oregon stated it very well.

This is not a proabortion or antiabortion vote. Indeed it really is not even a financial vote. The Senator from Iowa talked about the de minimis amount that is involved. If we are looking to save immense amounts, then you might want to look at eyeglasses or dentures. But this is a de minimis amount. Nothing of any consequence is going to be saved-if you are looking for money to be saved. It is one more effort to make this appear to be an abortion-antiabortion vote. What it really is is a vote to determine whether you are going to take away employees' compensation, call it fringe benefits or wages. Take it away from them when they are entitled to decide how they want to spend it.

If we pass this amendment of the Senator from Alabama we are saying "We are going to take it away from you. It is yours, but we are going to take it away from you because we don't like abortion." That is the wrong

way to phrase this issue.

Mr. DOMENICI. Mr. President, does the Senator have any time?

Mr. DENTON. How much time does the Senator from Alabama have?

The PRESIDING OFFICER. The Senator from Alabama has 2 minutes and 24 seconds.

Mr. DENTON. I will turn the time over to the Senator from New Mexico. Mr. DOMENICI. I just wanted to

ask somebody a question.

Mr. DENTON. If we can help the Senator out, go ahead.

Mr. DOMENICI. Let me ask the Senator from Oregon, the manager of the bill, what is the current law on this?

Mr. HATFIELD. The current law is there is no restriction. The Ashbrook amendment would be prospective in January 1983.

Mr. DOMENICI. It was my understanding that the continuing resolution under which we operated already has the Ashbrook limitation in it as law.

Mr. HATFIELD. Let me further clarify. The first continuing resolution inadvertently made it applicable for the first 3 months of this year. However, the Ashbrook amendment would have practical application in January 1983, when the new plans commence.

Mr. DOMENICI. But right now whatever it is that you have been saying we should not be doing and that the distinguished junior Senator says is not good management-labor law has been done for 3 months by the Federal Government; is that correct?

Mr. HATFIELD. Technically, the matter is in the law at the moment, but it is not being enforced because it does not take effect until new contracts commence in January 1983. So we are not in effect taking away or changing something that is—being done now because, as I said initially, it was to take effect January 1983.

The first continuing resolution inadvertently made it applicable for the first 3 months, in a prospective sense. However, it is not being enforced at the present time.

Mr. DOMENICI. I had understood to the contrary. But in any event, would the continuing resolution to which you allude, which would have rendered the law effective January 1, was that starting on this date to continue for how long, a year?

Mr. HATFIELD. Well, it would have been for the length of the resolution. Mr. DOMENICI. How long was that

with reference to this body of law? It could not have been December 17.

Mr. HATFIELD. No. What I am saying is that the inadvertent action taken by the committee put it into effect for 3 months from October 1 through November, and part of December. That is the period of the last quarter of the year. Then the Ashbrook amendment initially was to take effect January 1983, but it has not been enforced in that period of October, November and December.

Mr. DOMENICI. How could it be put into effect January 1 when it was part of a continuing resolution that expired December 17?

Mr. DENTON. I would have to question the distinguished chairman because the evidence is definitely to the contrary on record in order to clarify his answers to the Senator from New Mexico.

OPM notified carriers of enactment of the Ashbrook amendment and of its possible application in 1983. OPM required the brochures of plans proposing to offer elective abortion coverage in 1983, either to be silent on the point or to state that Congress had imposed restrictions that might exclude elective abortion coverage next year. That was in October 1982.

AFGE sued again. Judge Horan upheld OPM, refusing to issue a temporary restraining order. The court said that this time there was a legislative act which, even though it expires on December 17, 1982, must be given deference. Over 100 carriers of the some 120 or so insurance carriers now involved in this process and have voluntarily enforced the prohibition on Federal funding of abortions. If that is incorrect, I wish to have it corrected.

Mr. HATFIELD. I do not think so. I think what the Senator read is a statement of intent, but the actual application of the law was to be January because the contracts begin in January. It could not take effect on existing contracts. It had to take effect on prospective contracts which begin in January.

Mr. DENTON. The notifications started going out quite some time ago. Mr. HATFIELD. That is correct.

Mr. DOMENICI. Senator, I do not know whose time I am using—

Mr. HATFIELD. The Senator was using the time of the Senator from Alabama. What is the time situation?

The PRESIDING OFFICER. Actually there is 1 minute remaining on the amendment. The Senator from Oregon's time has expired. The Senator from Alabama's time is 1 more minute remaining.

Mr. HATFIELD. I do not think I understood the Chair.

The PRESIDING OFFICER. There is 1 minute remaining equally divided.

Mr. HATFIELD. I did not yield any time. The Senator from Alabama yielded time to the Senator from New Mexico to ask his questions.

The PRESIDING OFFICER. That is correct, and there are 2 minutes remaining to the Senator from Oregon.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Senator from New Mexico have 1 additional minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. I am really confused. I guess I would ask either the Senator from Oregon or the distinguished Senator from Alabama if we do not adopt the amendment the Senator from Alabama has offered, we are we or are we not changing substantive law with reference to this issue? At first it would seem to me it was being said there was no such law in effect, as

if you were proposing something new

in your amendment.

I am led to believe that if we do not adopt the amendment of the Senator from Alabama we will be changing the law from what it is to something different. Could somebody tell me the answer?

Mr. HATFIELD. Yes I would be very happy to respond. It was not substantive law, it was in the continuing resolution as a statement of intent to take effect in January, so it was not a matter of changing substantive law.

Mr. DOMENICI. I thank the Sena-

tor.

• Mr. NICKLE. Mr. President, I rise in support of this amendment which would continue the current ban on the use of tax dollars for abortions in Federal employee health programs. The current continuing resolution contains this ban and it is in the House's version of the pending continuing resolution. The Senate Appropriations Committee has removed the abortion restriction.

There are two issues involved in this policy question. The first is consistancy. Congress has adopted the Hyde amendment prohibiting medicaid coverage of abortions as part of the appropriations process. We have debated this question many times and resolved it. Although opinions regarding the central question of abortion vary, a majority of Senators have come to the conclusion that taxpayer's dollars should not be used to finance abortions, since this has become Congress stance, we need to apply it consistantly. If we are not going to pay for abortions for low-income women, then we have no business financing them for Federal employees.

The second issue that is raised with this amendment is the question of whether Congress has the right to dictate Federal employee fringe benefits. I know that some of my colleagues believe Congress does not have that right. In response to such concerns, I would like to point to a significant factor; 60 percent of every Federal employee's health premium is paid for with tax dollars-over \$2 billion per year. In the dual role of employer and custodian of the tax dollars, we have every right to speak to the amount and nature of health benefits. Not only do we have the right, we have an obligation to do so.

Finally, we are not, as some would allege, denying any Federal employee the right to an abortion. We are simply saying that tax dollars should not be used for such an activity.

I urge my colleagues to affirm a consistant stand on this issue. Regardless of the diverse views of this body on abortion, let us be consistant in our policy on public financing of abortion. In the eyes of many, myself included, this is financing the taking of human life. For others, it is simply an inap-

propriate use of Federal funds. Whatever viewpoint you hold, let us be consistant in our policy and get the Federal Government out of the business of funding abortions.

Mr. HATFIELD. I yield back the remaining time.

Does the Senator wish a rollcall

Mr. DENTON. I do.

Mr. HATFIELD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second?

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 58, lines 4 through 10. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Goldwater) is necessarily absent.

I further announce that the Senator from Utah (Mr. HATCH) is absent due to illness.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is

necessarily absent.

The PRESIDING OFFICER (Mr. Grassley). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 49, nays 48, as follows:

# [Rollcall Vote No. 429 Leg].

#### NOT VOTING-3

enn Goldwater Hatch

So the committee amendment on page 58, lines 4 through 10, was agreed to. Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. METZENBAUM. Mr. President, I move to lay that motion on the table. Mr. DOMENICI. Mr. President, I

suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

Mr. DENTON. I ask for the yeas and navs.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The question is on agreeing to the motion to table the motion to reconsider. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk proceeded to call the

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Goldwater), and the Senator from Maryland (Mr. Mathias), are necessarily absent?

I also announce that the Senator from Utah (Mr. HATCH), the Senator from Minnesota (Mr. DURENBERGER) are absent due to illness.

I further announce that, if present and voting, the Senator from Minnesota (Mr. DURENBERBER) would vote "nay."

On this vote, the Senator from Maryland (Mr. Mathias) is paired with the Senator from Utah (Mr. Hatch).

If present and voting, the Senator from Maryland would vote "yea" and the Senator from Utah would vote "nay."

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 50, nays 45 as follows:

#### NOT VOTING-5

Durenberger Goldwater Mathias Glenn Hatch

So the motion to table the motion to reconsider was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The PRESIDING OFFICER. The motion to reconsider is not in order.

COMMITTEE AMENDMENT ON PAGE 60, LINES 4-25

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The Secretary of the Senate read as follows:

Sec. 152. Notwithstanding any other provisions of law, during the pendency of any appeal or review in any court of competent jurisdiction of the decision or decisions that are the subject of this section, no funds appropriated by this joint resolution or any other Act of Congress which provides funds for the Library of Congress and the Copyright Royalty Tribunal for fiscal year 1983 shall be expended to implement, enforce, award, or collect royalty fees under, and no obligation or liability for copyright royalty fees shall accure pursuant to, the decision announced by the Copyright Royalty Tribunal on October 20, 1982, Docket No. 81-2, and any subsequent decision, order, memorandum, or opinion issued by the Tribunal in such docket or relating to the subject matter of such docket, insofar as such decision and any subsequent decision, order, memorandum, or opinion relate to the establishment of a royalty rate of 3.75 per centum of the gross receipts of certain cable systems for the carriage of certain distant signal equivalents. Nothing in this section shall be construed as barring the Copyright Royalty Tribunal from expending funds decide, and to issue written materials with regard to its Docket No. 81-2, and to defend in court or elsewhere its decision, orders memoranda, or opinions in such docket or relating to the subject matter of such

Mr. HATFIELD. Mr. President, I remind the Senate this is the issue that Senator Mathias and Senator Mathias and Senator Mathias had been discussing earlier and on which Senator Mathias said he would not raise a question at this time.

Consequently, this is not in controversy, at least to my knowledge, and I ask the Chair to put the question on this committee amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the committee amendment was agreed to

Mr. MATTINGLY. Mr. President, I move to lay that motion on the table. The motion to lay on the table was

agreed to.
COMMITTEE AMENDMENT, PAGE 66, LINES 12-21

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The Secretary of the Senate read as follows:

Page 66, lines 12 through 21, strike.

Mr. HATFIELD. Mr. President, I wish now to pose a unanimous-consent request that has been agreed to by the two principals to this amendment, Senator Dopp from Connecticut and Senator Garn from Utah, and that is that a 30-minute time limitation be applied to this amendment, with no amendments in the second degree.

I propound that and so ask unani-

mous consent.

The PRESIDING OFFICER. Is the Senator from Nebraska seeking the

Mr. ZORINSKY. Yes, Mr. President, Could the chairman add to that, provided that no modifications also not be in order?

Mr. HATFIELD. Will the Senator repeat his request?

Mr. ZORINSKY. Provided that no

modification may be in order.

Mr. HATFIELD. That is not necessary. That would be redundant to the request as I have stated it of having no amendments in the second degree in order.

May I inquire of the Chair if I am correct?

The PRESIDING OFFICER. The Senator from Oregon is correct.

Mr. ZORINSKY. I thank the Chair. Mr. HATFIELD. Mr. President, I made that unanimous-consent request as outlined, 30 minutes equally divided, with no amendment in the second degree.

The PRESIDING OFFICER. Is there any objection? The Chair hears none, and it is so ordered.

Who yields time?

Mr. DODD addressed the Chair. The PRESIDING OFFICER. How much time is the Senator yielding?

Mr. DODD. Mr. President, I yield myself so much time as I need pursuant to the agreement.

Mr. President, if the Senate adopts this committee amendment, we will be forfeiting what I believe to be our last chance to do anything at all about what is by overwhelming consensus

what is by overwhelming consensus the single largest problem facing our Nation today: Unemployment. This is our last chance. There will not be another opportunity to enact an effective jobs program.

The House language provides a onetime, \$1 billion expenditure for the community development block grant program, a program that enjoys broadbased support, is recognized by people on both sides of the aisle as being a very effective way of getting a good, meaningful jobs program into our communities and States.

As to other programs, people have raised questions about their effectiveness and whether or not they are make-work or realistic jobs. But everyone, I think, agrees generally that the community block grant program does not fall into that category.

This was something that was recognized in the other body. As I mentioned, its language does provide a one-time \$1 billion expenditure.

Mr. President, I think it is quite clear that while we have addressed many of the problems in this body over the last 24 hours or more, no single issue is as important to the people we represent as the issue of jobs. With 12 million people out of work, with some 3 million people who have given up all hope entirely, in fact, have given up the search and dropped out of the market entirely, with people who have good education and work experience, being told now in the greatest economy on the face of the Earth that we cannot find a place for them, with families who have moved to cities all across this land looking for work, and who have to live in abandoned railroad cars or in their own automobiles because the jobs they thought would exist in certain parts of the country are not there-all of these people believe, and I think they are correct, that this issue just cannot wait. If, in fact, this is the only opportunity, my hope would be that we would not adopt the committee amendment and we would accept this modest-and it is a very modestamount. It is not going to solve unemployment totally, this very modest proposal that was included in the other body's language to provide some jobs. But it will signal our willingness to face up to the issue.

Very briefly, as I mentioned, it is a one-time-only \$1 billion amount for fiscal 1983 for the CDBG program. Those funds would match up an existing pool of American citizens who are able to work and who are actively seeking work with an existing backlog of community projects. This is a key point. We do not have to go out now and create new work programs in our various cities and States. Rather these are projects that have been kicking around for some time now, that are waiting to go, that have been identified by our cities and States as needed programs. We can utilize

projects which I just mentioned are in the backlog.

This program, as I also noted, is not going to eliminate unemployment. You are not going to wipe out unemployment for 12 million people, provide 12 million jobs, by any stretch of the imagination. We are talking about perhaps 150,000 to 200,000 jobs, hardly enough to deal with the serious numbers of almost 12 million. But it is going to provide at least that many with a chance to regain some dignity, do something worthwhile for our communities and, of course, and allow them to become taxpaying citizens. Many of them have none of those things as a result of being out of work.

For those of us in this body, Mr. President, it would mean that we did not turn our backs to the one problem that sent us back for this lameduck session. There are a lot of reasons that may have justified our being here, but none is more important than unemployment. In fact, with regard to the so-called gas tax bill that was described as a jobs bill and the reason for coming back, it is now not quite clear whether we are ever going to see that legislation.

Now we are dealing with a continuing resolution, and it is the only opportunity we are going to have. I know others are going to make an argument we have got \$1.2 billion worth of jobs in this Senate bill-well, do not kid yourselves-a quarter of a billion dollars for building military housing is not a jobs bill; that is, a 5- or 10-year program. It is not going to get you jobs immediately. Neither will the \$100 million for the Economic Development Corporation-that is not a jobs program. Nor is \$250 million for CETA replacement—that is not a jobs program, it is a training bill. Do not be fooled that that \$1.2 billion is jobs money. It is not jobs money.

The community development block grant program adopted by the other body provides jobs quickly. So I would urge my colleagues to oppose the committee amendment that has been proposed by the distinguished chairman of the committee.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. HUMPHREY). The Senator from Utah.

Mr. GARN. Mr. President, the Senator from Connecticut has indicated that the House has included \$1 billion for HUD's community development block grant. Now, it is rather interesting that we are adding in the CR things that have been taken care of in the regular appropriations bill. The majority of the HUD-Independent Appropriations bill Agencies was passed and enacted into law in September. It is law for the full year and it is not part of the continuing resolution.

The ironic thing is that in September the House of Representatives cut CDBG and I had to add back the funds which they took out. Now 3 months later they have added an additional \$1 billion for the program. I think it needs to be noted that there is also \$426 million of unobligated balances that will carry over into fiscal 1983—half of what we are talking about will be carried our from the 1982 budget into 1983.

I am really rather surprised that my friend from Connecticut would talk about this as a proposal which would create jobs. It simply is not a jobs program. They could not have picked anyplace to spend money that would be a poorer choice to provide jobs that the CDBG program. I do not intend to take a lot of time, but we can go back and look at the history of CDBG, and I am a supporter of it. I am a former mayor who was at the other end of CDBG. It is not a jobs program. For every \$1 billion you appropriate you get \$20 million of the money spent in the first year. That is all we are talking about. It is a historical fact that if we appropriate this \$1 billion we will get outyear problems and create more deficits. You will simply get only about \$20 million spent during this next year. How many jobs is that going to create? Do not let anybody in this Senate vote to put in \$1 billion for this tonight or this morning or whatever day or time it is around here, on the basis of jobs. There are not enough jobs in this proposal to spit across the Potomac.

I do not intend to take my 15 minutes. Everybody, if they are listening on their squawkboxes or their staff, can check me out. It is not a jobs bill, and it is coming from a supporter of CDBG and who had to increase funds for the program in September when the House cut it. You will get an average of 2-percent spendout. So if you appropriate \$5 billion you will get \$100 million next year. Out of this amendment we will get only \$20 million during this next year.

I reserve the remainder of my time. Mr. KENNEDY. Mr. President, will the Senator from Connecticut yield?

Mr. DODD. Yes, I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, as I listened to my friend and colleague from Utah describe the Dodd proposal he did not describe the Dodd proposal, and then he indicated that he opposed what he described.

The fact is that the Dodd proposal uses the mechanism of the CDBG in order to minimize the redtape and use a process and a system which are well-known, well-understood by mayors in this country, and targeted to labor-intensive need within those local communities.

That is all spelled out in the amendment. It is very clear. It is very precise.

It is not as described by the Senator from Utah.

The needs which this program will address are compelling for local communities. It is targeted on those individuals whose unemployment compensation has expired. And this, by definition, means that these are individuals who held jobs and now have lost them as a result of the inadequate and misinformed, and I think unfair and unjust, economic policies of this administration.

We cannot resolve all the economic problems in the final hours of this lameduck session, but we can take some modest steps to try and indicate that we are prepared to provide some help and some hope and some opportunity to several hundred thousand Americans who have worked over the period of their lives and to address the needs which exist in local communities and to use a mechanism that has been tried and tested and widely accepted within local communities in this country.

I welcome the opportunity to support the amendment of the Senator from Connecticut.

Mr. DODD. I thank the Senator from Massachusetts very much.

I wish to add one thing. If my good friend from Utah is correct and people are listening on their squawkboxes, I would like to also point out that there is a distinction between what the Senator from Utah has said about how much payout you actually get with this \$1 billion. My good friend from Utah is absolutely correct, with the \$1 billion appropriation you would get around \$20 million in terms of actual dollars if you were talking about an ongoing program. We are not talking about an ongoing program. Here we are talking about a one-time supplemental—a one-time supplemental. The billion dollars is to be spent in fiscal year 1983. There is a vast distinction between a one-time effort such as this and an ongoing program that you stretch out.

The work we are talking about is going to be done in that period of time. It will create jobs in communities throughout the country through the funding of local community development block grant programs and to produce real assets. That is what we are talking about in this bill for the American people, and to remain available until September 30, 1985.

But to talk about this in terms of an ongoing, long-term kind of program is to miss the point entirely. This \$1 billion is likely to be spent in 1 year; not stretched out over a number of years. We are proposing a one-time injection of dollars just as passed in the other body and now being supported on this side of the aisle. I reserve the remainder of my time.

Mr. GARN. Mr. President, I do not know, it is 8 o'clock in the morning and I have been up all night. I realize I am not an attorney, but you can read the language—and I have been chairman of the committee for a few years and I have served on it for more than that, and I am a former mayor-and it simply is not a fact that this language mandates that this additional \$1 billion be spent in the next year. There is no new program created by this language. There are no new guidelines. There are no new procedures.

I will read it.

For an additional amount for "Community development grants," to be made available to metropolitan cities and urban counties in accordance with the provisions of section 106(b) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), to create jobs in communities throughout the country through the funding of local community development programs and to produce real assets for the American people as a result thereof, \$1,000,000,000, to remain available until September 30, 1985.

There is no requirement that this money be spent faster than it is normally spent. That is the language. It is very simple. Attorneys do not usually write legislation that simple and direct so that ordinary, stupid people, untrained in the law like me, can understand it. But that is what is says.

Now, I have spent a little time with community development block grants. I lobbied for them when I was not a Member of Congress. There is no new procedure, no new guidelines, no new anything. In the existing program, if we simply appropriate an additional \$1 billion it will only have a spend out rate of 2 percent. That is all that can be spent. The language does not provide any procedures to spend it any faster during the next year.

This is not a jobs program. We are being conned if we believe that. It simply is not the fact. And because you put words in here that says it will create jobs, that does not necessarily mean it, or that you will spend the funds all over the country. I mean, who is kidding whom. That is not the

result.

Now, if somebody wants an additional \$1 billion more for CDBG let them vote for it. In ordinary times, I would be in favor of that. But let us not be confused with wanting that over a period of time at the spendout rate of \$20 million and some flowery language that says it is going to create jobs.

We have played that game in Congress for years that because we put some language in a piece of legislation it is going to do something. This language does not accomplish that.

Mr. President, I am ready to yield back the remainder of my time if the distinguished Senator from Connecticut is also ready.

Mr. DODD. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Connecticut has 5 minutes remaining and the Senator from Utah has 91/2 minutes remaining.

Mr. DODD. Mr. President, I will not take that 5 minutes, but let me just sum up by saying what we intend to do, if we reject the committee amend-

ment.

If that amendment is rejected, I will offer a proposal that does call for a 1year expenditure of \$1 billion and that was offered earlier this week that goes into the community development block grant program. Our idea is to make those dollars meaningful and not have it dragged out over several years.

Again, I wish to emphasize the point I made at the outset. This is it. There will be no other opportunity. We are going to be leaving here in a few hours. We are going to be going back to our respective States and it appears as though we are going to have done absolutely nothing about unemployment.

We will have been here for 3 weeks, faced with the highest unemployment in 40 years in this country. We are going to have left there having done a lot of things for ourselves and others and we will not have done one thing for 12 million unemployed Americans

prior to December 25.

I do not know if this Congress wants to go back home having totally avoided that issue. But that is precisely what we will have done. Three weeks of work and not one single thing to help 12 million unemployed Americans, the overwhelming majority of whom are in those lines through no fault of their own.

With all the talk and all the rhetoric about putting people back to work, we will have done absolutely nothing. This is it. This is the last opportunity to reject this committee amendment. By doing that, we will at least say we are going to do something or try to do something about 150,000, possibly 200,000 people—what a small drop it is-of the 12 million. There will be no other opportunity.
Mr. President, I yield back the re-

mainder of my time.

Mr. GARN. I yield back the remain-

der of my time. Mr. DODD. Mr. President, I ask for

the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered. The PRESIDING OFFICER. The

question is on agreeing to the committee amendment on page 66, lines 12 through 21. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY), the Senator from Maryland (Mr. Ma-THIAS), and the Senator from Arizona GOLDWATER) are necessarily (Mr. absent.

I also announce that the Senator from Utah (Mr. HATCH) and the Senator from Minnesota (Mr. Duren-BERGER) are absent due to illiness.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 62, nays 32, as follows:

# [Rollcall Vote No. 431 Leg.]

#### YEAS-62

Abdnor	Garn	Nunn
Andrews	Gorton	Packwood
Armstrong	Grassley	Percy
Baker	Hatfield	Pressler
Bentsen	Hawkins	Proxmire
Boren	Hayakawa	Quayle

Cohen	Levin	Sarbanes
Cranston	Long	Sasser
Dixon	Matsunaga	Tsongas
Dodd	Melcher	

#### NOT VOTING-6

Brady	Glenn	Hatch
Durenberger	Goldwater	Mathias

So the committee amendment on page 66, lines 12 to 21, was agreed to. Mr. HATFIELD. Mr. President, I move to reconsider the vote.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HAYAKAWA addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

#### TEACHER TRAINING IN LIBERIA

Mr. HAYAKAWA. Mr. President, I understand that administration plans for USIA programs include appropriations for educational and cultural activities in Liberia. Mr. President, I have had an ongoing interest in education in Liberia ever since my days as President of San Francisco State University. From 1963-73, we conducted

an education project with Liberia which resulted in the establishment of the Monrovia Consolidated School System, modeled on the American community school concept.

I traveled to Liberia last summerthe first Senator to visit the country since the coup of 1980-and was very pleased with the effort being made to improve the lives of the country's citizens in the field of education. The Government's long-range plans include an expansion of the school system throughout the contryside on the model of the Monrovia Consolidated School System. One serious problem they face, however, is a shortage of qualified teachers at the preuniversity level, especially in areas such as math and science. Liberian and American officials are now exploring ways in which the United States can assist in meeting this problem. Several exciting projects involving teacher training and curriculum development are on the drawing board.

Moreover, I understand that the Liberian Government and San Francisco State are eager to resume a long-term working relationship for the purpose improving Liberia's education system. I am enthusiastic about the prospect of San Francisco State being able to put its experience with Liberia and its expertise in the field of education to such constructive use in a country which is so important to our foreign policy interests in Africa. USIA officials have advised me that there are sufficient funds available for this purpose in the appropriations contemplated for Liberia. I hope that also is the understanding of the manager of this bill. The interest and support of this body will be very helpful in making these hopes and plans for Liberia become a reality.

Mr. WEICKER. I thank the Senator from California. I appreciate his interest in this matter and I commend the contribution he has made to our understanding of the importance of Liberia.

I will say in response that it is also my understanding that funds are available to conduct the educational programs the Senator discussed. My own information about Liberia's needs in the field of education support what he has said: The training of qualified teachers needs to be a high priority.

I appreciate the Senator's special knowledge of San Francisco State's expertise in this area, and I hope that the plans now being developed can be implemented in short order.

Furthermore, I think it would be fitting if in the future we refer to these teacher training activities as the Hayakawa program. I am sure that I have the full support of our Senate colleagues in making this suggestion.

Mr. HATFIELD. Mr. President, may I be recognized?

Senator from Oregon. The Senator from California spoke first.

Mr. HATFIELD. I think we usually recognize the manager of the bill.

COMMITTEE AMENDMENT ON PAGE 84, LINE 8, THROUGH PAGE 85, LINE 21

Mr. President, we now have one last committee amendment and the principals in this case are the Senator from Arkansas (Mr. PRYOR) and the Senator from Utah (Mr. GARN). They have agreed to a 20-minute time limitation equally divided without any amendments in the second degree. Therefore, Mr. President, I propound this unanimous-consent request for such a 20minute time limitation, equally divided, without any amendments in the second degree.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will state the amendment. The bill clerk read as follows:

Committee amendment on page 84, strike beginning on line 8 through line 21 on page

Mr. HATFIELD. Before I yield the floor, Mr. President, I would like to state this is the last committee amendment, which means after this, we will have an open season on amendments.

I am very hopeful that we can start with noncontroversial, short, non-rollcall-required amendments, of which I know of a goodly number. If we could handle those in rapid fashion, we might be able to indicate then to the rest of the Members that we possibly could have about an hour window and Senators would have to be here to offer those amendments. If we begin to get into a quorum call situation because of a lack of Members to offer amendments, then we will have to move to some of the other amendments. But that is the plan that we have now and so anyone who wants to indicate to me such a noncontroversial, short, nonrollcall amendment, I

would be very happy to make a list.
The PRESIDING OFFICER. Who yields time?

Is all time yielded back?

Mr. PRYOR. Mr. President, I would inquire as to whether the chairman of Appropriations Committee is ready to begin?

Mr. HATFIELD. Yes.

Mr. PRYOR. Mr. President, I am today opposing the committee amendment and urging the Senate to restore \$50 million to the continuing resolution for the benefit of emergency food and shelter programs serving the needy. I am joined in this effort by my colleagues Senator HATCH, Senator Dodd, Senator Riegle, and Senator MELCHER.

This amount was approved by the House but was not included in the bill reported by the Senate Appropriations Committee. It is my strong opinion that this money must be restored. We

The PRESIDING OFFICER. The are facing today a situation unlike any seen in America since the 1930's. Our economy is weak and our unemployment rate is higher than 10-percent nationwide. Everywhere there is evidence of financially troubled people: Soup kitchens, food and clothing lines, emergency shelters and havens.

> More than 5 million people are currently drawing unemployment, which is an increase of 75 percent over a year ago. About 2 million people have exhausted all entitlement to benefits since the beginning of this year alone.

> In addition, the number of people living below the poverty line has increased during the past 2 years. And because public and voluntary agencies lack the resources to meet growing demands for emergency services, they have had to permit individuals and sometimes entire families to sleep in car and buses. Others less fortunate are spending cold nights on air grates, abandoned buildings, beneath trucks and bridges, and in Salvation Army clothing bins.

> Our most recent figures show that between 250,000 and 1 million people are homeless today. I realize this is a wide margin of estimate, but the fact is that the homeless population is ever-changing and accurate figures are simply unavailable. But those now needing assistance include the elderly, the indigent, battered women, runaways, those affected by recent weather catastrophes, and the "new poor". The "new poor" are those who now find themselves unemployed for the first time, unable to retain their homes, and victims of cutbacks in Federal and State assistance.

> In my own State of Arkansas, the University Medical Center at Little Rock has become the focus of attention in the past few weeks. Many indigent patients in the hospital have been sharing the food provided them as patients with other members of their family. And family members with no place to go are now sleeping in hospital hallways. Others are spending the night in their cars in nearby parking lots.

> A catch 22 factor is at work here. The unemployed cannot find a job. And the welfare laws do not permit able-bodied people to receive assistance. On the other hand, many disabled people cannot hold down a job and yet have had their benefits terminated. More than 158,000 persons have been taken off disability rolls in a stepped-up review process that began last year.

> The problems, Mr. President, feed upon each other: A lack of funds going to emergency services, a lack of jobs, a tragic insufficiency of public housing. Many elderly people are being forced to choose between either food or shelter-because they cannot afford them

I have long been impressed by the dedication of those professionals and volunteers who valiantly work in agencies of relief and assistance. They have performed invaluable services on extremely limited budgets and with increasingly smaller resources.

But they cannot continue to carry this burden on the meager funds now provided them. This proposal would appropriate \$50 million to the Federal Emergency Management Agency and then distribute this amount to the United Way of America. This distribution would not take place at some long-awaited point in the bureaucratic future. These funds would be available within 45 days of enactment of this legislation. And timing is crucial for the coming winter months.

In addition to the United Way, a board would be made up of members from the Salvation Army, the Council of Churches, the National Conference of Catholic Charities, and the Council of Jewish Federations. The money would be spent prior to the end of

fiscal year 1983. The \$50 million is not to be used as a substitute for existing public or private resources. If the voluntary organizations providing emergency food and shelter should find it necessary in some circumstances to provide payment to needy persons to enable them

to secure food or shelter, there should not be any reduction in State, Federal, or local assistance programs for these

people. Mr. President, recently my State and many others across the country have been devastated by floods and tornadoes. We have sought to provide emergency assistance to deal with the catastrophic situation faced by these many homeless. I believe we are facing a daily crisis in our cities and towns that

cannot be ignored. Failure to provide these funds would only indicate an indifference to the plight of America's needy. George Bernard Shaw said this: "The worst sin toward our fellow creatures is not to hate them, but to be indifferent to them. That is the essence of inhumanity."

I ask unanimous consent that a letter on behalf of the United Way of America be printed in the RECORD following my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED WAY OF AMERICA, Alexandria, Va., December 16, 1982. Hon. DAVID H. PRYOR, Russell Senate Office Building,

Washington, D.C.

DEAR SENATOR PRYOR: The House version of a new continuing resolution (H.J. Res. 631) includes a \$50 million grant for emergency food and shelter assistance. United Way of America would be the recipient of the grant and would form a board of national health and welfare organizations (United Way of America, The Salvation Army,

Council of Churches, National Conference of Catholic Charities, Council of Jewish Federations, Inc., and two others to be named by United Way of America) to distribute the funds

Local United Ways and their agencies are keenly aware of the increasing need for emergency services. Demand is growing daily at food banks and temporary shelters. If the proposed emergency assistance provision becomes law, United Way of America is confident that the board of national health and welfare organizations will be able to carry out its mandate from Congress to get food to the needy speedily and efficiently.

Sincerely.

WILLIAM ARAMONY.

Mr. RIEGLE. Would the Senator

Mr. PRYOR. I yield to the Senator

from Michigan.

Mr. RIEGLE. I want to commend the Senator for his initiative here and to emphasize my support for this effort and draw attention to the fact that there was a story in the Washington Post a couple of days ago that indicated in the last week in the District of Columbia, the Nation's Capital, we have had four different individuals die of hypothermia which means that they literally froze to death on the streets of Washington, D.C. That is just within the last 7 days. Now, we are just starting the worst of the winter period in the Nation's Capital, and the problems being faced by people like the four who lost their lives within the last week by freezing to death I think are precisely what lie at the heart of this problem that has been illuminated by the Senator from Arkansas.

Clearly, something needs to be done about it. More and more stories are appearing in the national network, stories of people living under viaducts, people living in abandoned housing, people trying to find shelter wherever they can, and the numbers are growing. Something has to be done about

I think many things have contributed to this, but the failure of an economic recovery to take hold is putting more and more people in this circumstance. There has to be a response. I think it has to be a national response because it is national problem.

I commend the Senator from Arkansas for his leadership, and I very much support the effort that he makes here.

Mr. PRYOR. I thank my friend from Michigan. I yield 1 minute to the distinguished Senator from New York, Senator MOYNTHAN.

Mr. MOYNIHAN. I thank my friend from Arkansas. I rise simply in support of the proposal noting a recent estimate that the number of homeless in New York now exceeds the population of Fargo, N. Dak., and it is not an eastern phenomenon. Many of us will have read the really awful story, those of us who are parents, of an unemployed man who has been living in his automobile with his wife and children. His wife is in a Rocky Mountain State having gotten a job in a diner. He went to see her-

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MOYNIHAN. At the diner, and when he came back, the child, although bundled up, had frozen to death.

Mr. PRYOR. I thank the Senator for making that observation.

I reserve the remainder of my time. Mr. DODD. Mr. President, I rise to join my distinguished colleague from Arkansas in sponsoring this amendment to the continuing resolution to provide \$50 million for emergency shelter and food for the homeless.

The tragedy of homelessness has become all to commonplace in this country. Thousands upon thousands of Americans now lack one of the most basic of human necessities: adequate shelter. As unemployment soars, their numbers grow everyday. They include some of our very youngest citizens, and some of our oldest.

We used to think that scenes of mothers and infants sleeping on sidewalks only occurred in the so-called underdeveloped nations. Today, we can see such scenes in our own backyards.

The skyrocketing incidence of homelessness in this Nation is in good part a result of the administration's misguided notion that you can cure unemployment by allowing to people to "vote with their feet." Children are now without roofs overhead because their parents have journeyed from State to State, seeking jobs where there are none to be had.

Now is not the time, however, for observations which some might term partisan. Congress must respond immediately to prevent children and adults from freezing to death this winter because they have to sleep outdoors. The House has already included \$50 million in the continuing resolution for charities to feed and to house temporarily those without shelter. The Senate must examine its conscience and follow suit.

I do not suggest that this stop-gap effort solves the problem of homelessness among our constituents. Earlier this week I introduced a bill providing for the renovation of abandoned buildings so they can be used as temporary shelter for the homeless. I will reintroduce this legislation and attempt to secure its passage early in the next session of Congress. And, I will work to find long-range solutions to such root causes of homelessness as unemployment.

At is moment, I urge my colleagues to support the amendment at hand. Only immediate action will prevent fellow Americans from sleeping on park benches and hot air grates this

I ask unanimous consent that an article from the New York Times outlining the crisis proportions which homelessness is reaching across the country be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 16, 1982] Congress Is Urged To Help Homeless

#### (By Iver Peterson)

Washington, December 15.—Congress was urged today to help the growing number of homeless Americans, displaced by unemployment and neglect, whose problems of cold, hunger and joblessness were described as a "national disgrace."

In the first Congressional hearing on homelessness in America since the Depression, the House Subcommittee on Housing and Community Development heard of a growing legion of former mental patients pushed out into the streets, of rural families forced out by spreading suburbs, and of jobless, homeless families "voting with their feet" in search of new employment.

"I think we're dealing with nothing less than a national tragedy and a national disgrace," Mayor Ted L. Wilson of Salt Lake City said. "To put it succinctly, we have a hell of a mess on our hands out in our

cities.'

The committee heard witnesses estimate the number of homeless Americans at half a million to two million men, women and children. In some older, urban areas, as many as 30 percent are former mental patients let out of institutions without any permanent system of support.

#### YOUNG MEN FORCED INTO STREETS

Many others are young men who had existed on the edge of poverty and self-reliance in the best of times, and who have been forced into the streets by a persistent economic recession whose impact they were the first to feel.

Carol Bellamy, president of the New York City Council, said the homeless men seeking room in the city's expanding number of shelters no longer fit stereotypes of the Bowery bum. Their average age last year was 36, she said, and most were under 40; half were high school graduates and a fifth

had some college education.

"For too long," Miss Bellamy said, "we have believed that homeless people prefer to live on the streets. In most cases, this is simply not true. Most do not prefer subway cars, doorways and park benches to clean beds. The do not want to rummage in garbage cans instead of having three meals a day. They do not enjoy infrequent washing in train and bus stations rest rooms."

A 1980 New York state ruling held localities in the state constitutionally responsible for sheltering homeless men, a mandate New York City has extended to homeless

women as well.

As a result, New York's expenses in caring for the homeless have grown from \$6.8 million in 1978 to \$38 million for the current fiscal year, and the number of spaces for homeless men to 4,500.

#### THE PROBLEM OF JOBLESSNESS

Although alcoholism and mental problems afflict many of the homeless, witnesses today stressed that unemployment lay beneath the problems of many newly homeless families.

"What do you say to a husband and wife and three children sleeping in an old caron the road, desperately looking for work?" asked Maj. Paul Kelly of Cleveland, head of the northern Ohio Salvation Army.

"This holiday season we reflect on the story of the nativity," he added. "We ponder how an innkeeper could have asked Mary and Joseph to reside in an animal stall. Yet there are thousands of Americans, men, women and children, that would welcome straw for a bed and the warmth of the barest of shelters."

From Cleveland also came Al and Mary Long and two of their three children. Mr. Long had worked in a metal plating shop until the automobile factories it served cut

back its orders.

"Well, I lost my house, I couldn't find another job, my wife had to go to her sister's and for five weeks I lived at the Volunteers of America shelter," Mr. Long said.

The group eventually hired Mr. Long at low wages and the family now has a modest home, but the experience stuck with him:

"There's a lot of people out there who need help," he told the committee. "I heard from some of the other testimonies that people think some of those people out there won't want to work, but there's 80 percent of us that do."

Mrs. Long said, "I try to work and help out but the money just doesn't go far enough, and for the second year in a row we're not going to have any Christmas."

Bob Hayes, lawyer for the National Coalition for the Homeless, said: "If one percent of the homeless people in American were displaced by earthquake or other national calamity, a national emergency would be declared. The National Guard would be mobilized and other steps would be taken. But in the face of this emergency, the nation sleeps."

Witnesses urged Congress to move beyond the \$50 million for emergency shelter and food that was approved by the House Tuesday, as part of a measure to finance the government.

Mr. GARN addressed the Chair. The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Mr. President, amendment is one that is difficult to argue against on the basis of the nature of the problem. I am very well aware of the problem and I do not particularly have any objection to the \$50 million for this purpose, but I do have objection to the procedure and the precedent that it sets. The House included \$50 million to FEMA for emergency food and shelter as my colleague from Arkansas has pointed out; \$50 million would then be given within 45 days of enactment of the resolution to the United Way of America which would constitute a special board to determine how the funds are to be distributed to local, private, and voluntary organizations. I cannot think of a better organization than the United Way to distribute funds of this kind. However, while FEMA is charged with broad responsibilities to plan for and coordinate responses to several emergency conditions, the House's proposal simply goes beyond the scope of FEMA's current authority.

They do not have the authority to do programs of this kind. The House proposal is not within the type of incidents declared as major disasters or emergencies. I recognize that the problems of the people who would receive assistance can be considered major emergencies and disasters. I do not dispute that. I do not want anyone to think I dispute the arguments in favor of this proposal. But it simply is not within the scope of the Disaster Relief Act of 1974, nor is it within the scope of civil emergencies under Executive Order 12148 where imminent threats to public life and public safety are defined.

The precedent bothers me in that private nonprofit organizations have never received Federal funding in the manner proposed by the House of Representatives.

This would present a precedent for providing funding in the future for other organizations and, as you know, we get a lot of requests from many private organizations for Federal funding. Maybe these are procedures that should be established at another time by changing the authorizations and making it possible to provide assistance to these organizations.

But FEMA does not now have that kind of authority.

Based on legislation proposed by the House of Representatives it would be impossible for FEMA to comply with the terms of the resolution concerning the grant award within 45 days of enactment of the resolution.

The Senator from Michigan has pointed out the problems of the winter. We have had one or two die in Salt Lake City this winter due to the extremely harsh weather that has already hit the area.

But to carry out the program in accordance with the law, even if you assume FEMA had the authority, it would be necessary that they follow current law. This means full public rulemaking under the Administrative Procedures Act to be carried out to assure that fairness, equal treatment, and due process are present in the management and administration of the program by the United Way and any other voluntary organizations.

Procedures would have to be spelled out and rulemaking defined if a long series of issues, including rights of assistance, how applications for assistance are to be completed and filed and period of eligibility for such an assistance.

I think this whole process is too complicated for the type of emergencies that FEMA is supposed to handle. It would be a bureaucratic mess.

Again, I am not saying that there is not a problem, but FEMA is not set up to handle the program. I do not know how, unless there were actual changes in the law, that they would be allowed to speed up or change any of these procedures.

It has been estimated that at a minimum, rulemaking in this procedure would consume 120 to 180 days to assure adequate public participation. We have always added the public participation feature in these laws. In fact, when I was mayor of Salt Lake City, I used to hold more hearings because the Government required me to hold them. You can imagine establishing the definitions and restrictions that would be applied to the program.

I suggest that there are existing programs in the Department of Health and Human Services that would be far better able to handle this type of distribution; in addition, the Department of Agriculture has the emergency commodity assistance program, school breakfast and lunch program, the child care feeding program, which are designed to address problems relating to food and shelter.

I do not argue with what my colleague is attempting to accomplish. I understand it and I do not disagree. However, I believe this is the wrong mechanism because it simply would not provide the aid in a short period of time.

I hold the remainder of my time.
The PRESIDING OFFICER. Who

vields time?

Mr. RIEGLE. Mr. President, I ask unanimous consent that I might be able to speak for 3 minutes on this issue without having to use time of the Senator from Arkansas.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. I thank my colleagues. Mr. President, I wish to further point out the development that you may not yet be aware of, and that is that in my State of Michigan in the city of Detroit, the largest cities in the Nation, that city has just declared a state of civil emergency because of a shortage of food and the inability for people to sustain themselves, several thousands of people to sustain themselves in that city.

The Governor of the State of Michigan, who is a Republican Governor, Governor Millikin, has been serving now for I think 14 years, is joined in making an effort to try to respond to what is clearly an enormous problem and while that happens to be the problem of a major city in my State I think it increasingly is a problem across the country but it helps again to illustrate how severe this problem is

The Senator from Utah, my good friend, has said that even though this may well be something that should be done and it is something that Congress may feel needs to be done, somehow or another the bureaucratic inertia, the impossibility of rulemaking and so forth would prevent us from responding in an urgent fashion to an urgent problem.

I cannot accept that. This administration came to town on the notion that it was sort of antibureaucracy and that they could get things done.

I have confidence in this instance with a urgent problem that if this Congress speaks and says look we want a response to this problem they can

get the job done.

I believe if there is a will to get it done it will be done. I do not think it has to take more than 45 days if you have people literally freezing to death on the streets or going hungry or facing the prospect of starvation, and that is the situation we find.

Finally, we had a case the other day in Michigan that just goes beyond anything any of us have seen in our memory in public service, and that is a man was apprehended in our State who was destitute and who had no money to get by on and he was found to have been taking and killing dogs belonging to his neighbors in order to have food to eat, and when this man was apprehended his circumstances were so pathetic and when he was taken into court the judge was so struck by the absolute poverty of this man's circumstances that he had to resort to killing dogs of his neighbors just in order to be able to eat that when he in turn ended up passing a sentence and sending this man to jail he indicated he was doing it so the person would be somewhere where he would have a chance to eat.

The judge expressed in fact his own feelings of shame that we have come to such a situation in this country where people should be so desperate that they should have to turn to those

kinds of circumstances.

Yesterday my colleague from Michigan indicated the fact that unemployed workers in Michigan were selling their blood in order to have money to be able to eat and feed their families.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. RIEGLE. I ask unanimous consent for 30 additional seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. I thank my colleagues. I do not know how on the eve of this Christmas season with all the money that is being spread around in all these different programs we can fail to respond in this modest way to something as urgent as the problem that is before us now when four people in the last 7 days have frozen to death on the streets of Washington alone, it should tell us there is a problem out there, that it is time that we moved to do something about. I hope we will.

The PRESIDING OFFICER. Who yields time?

Mr. MELCHER. Mr. President, I ask unanimous consent that I may have 2 minutes without using the Senator's time. The PRESIDING OFFICER. Is there objection?

Mr. GARN. Mr. President, reserving the right to object, and I will not object, but we agreed to a time limit of 10 minutes on each side.

Rather than do that, I will yield—I do not intend to use the remainder of my time—so we do not prolong it I am happy to yield 2 minutes of my time.

Mr. MELCHER. I thank my colleague from Utah.

Mr. President, this is not a huge amount, but it is an amount that should be included in this appropriation and it should be done now.

The \$50 million involved here is about one-tenth about what we increased in foreign aid to bring foreign

aid up to about \$11 billion.

So I encourage the Senate to accept it. I think the point cannot be missed in here in the language as proposed by the Senate to track with that of the House of Representatives already agreed to. The administrative costs would be held to 2 percent of the total appropriation. It could be less than that but what can we get done in distribution throughout this country of needed food, clothing, and shelther help and heat help that we could implement with that low administrative cost?

I would make a suggestion, as one of the authors of the proposal, that we should add to the groups that would manage this, voluntary groups—there are two slots open, appointments made—filled by United Way, the LDS (Latter Day Saints) whose church organization is very good at distributing needs to people and doing it in the right way.

I would also point out that the Commodity Credit Corporation is involved here, and we have got these huge surpluses of dairy products, for one, and other surpluses that are mounting and should be given out to people who need it, and need it now.

Mr. PRYOR. Mr. President, I know the distinguished Senator from Utah has mentioned that we are going to be establishing a precedent if we funnel funds through FEMA to the United Way of America to be dispersed.

You know, I was just sitting here thinking, I do not know where this country would be if we did not establish a new precedent every now and then. In fact, I think if we ever needed that new precedent, it is now. Hopefully, we are about to do it in agriculture in the PIK program; hopefully we are about to do it again in this particular program. We are trying to circumvent the very bureaucracy the Senator from Utah was discussing and have food going to the needy within 45 days.

I see our friend, Senator Jackson, has just entered the Chamber. I might note that Seattle, Wash., has been

trying to assist its increasing number of homeless persons, but it is difficult. In November, Operation Nightwatch, a group of ministers working on the downtown streets, conducted a census of those sleeping outside in a 20-block area of the central city. They found more than 300 people. In September, the city's shelter network was forced to turn away 2,466 people for lack of resources. Fifty-five percent of those turned away were children, Mr. President.

Senator Melcher mentioned that just today or I guess it was last nightin fact I do not know whether it is 10 minutes until 9 in the morning or 10 minutes until 9 at night, I cannot figure that out-but just a few hours ago the Senate passed a foreign aid bill of \$11.5 billion. Today we are asking for the restoration of \$50 million to go to our own needy people in this country who are desperate and who do not know what Executive Order No. 12148 is and do not understand what the precedent might or might not be.

They are hungry. They are cold. They do not have a roof over their heads. This is a meager amount we have requested, and we have organizations which have volunteered to help. I think we should do this and do it forthwith. I hope our colleagues will

make this decision.

The PRESIDING OFFICER. The

Senator's time has expired. Mr. GARN. Mr. President, I do not intend to prolong this discussion because I only have a minute or two left. I do not want any misunderstanding. I do not like the position that I am being put into because I have listened to the stories which my colleagues have related, and I do not disagree. I do understand the problem. But I am trying to point out as sincerely as I can that it is very easy to say if there is a will there is a way.

I have heard that, and I have seen these administrative procedures, and I have seen some of my colleagues who would fight in some of these processes to make sure that every "i" was dotted and every "t" was crossed. But I am simply trying to point out to my colleagues there could have been some more imagination on the part of the House and Senate to figure out a better way to implement this program

in a better way

There is simply no way, I say to my friend from Arkansas, for this administration or any administration to put through the program and not violate the law. There is no way that the funds would be distributed in 45 days even if you can somehow shortcircuit the process and tell FEMA, "You have got to speed up the process, you have got to shorten the hearing time," and so on.

I am not arguing the substance of what you are trying to do, but simply

saying again that due to the procedures you would be using you are kidding yourselves if you think you can allocate the funds before March or April, if you are lucky. You would be far better off if you spent some time on some other areas, forgetting the precedent whether we get deluged by other people or not.

So I am arguing procedure and I wish you would pull this amendment down and look for some place else while the hours of debate go on. It would certainly facilitate what you are trying to accomplish because regardless of the size of the problem I do not think it is possible to whack through this in a short period of time as you

I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back-

Mr. LEAHY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 84, line 8 through page 85, line 21. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER) and the Senator from Maryland (Mr. Mathias), are necessarily absent.

I further announce that the Senator from Utah (Mr. HATCH) and the Senator from Minnesota (Mr. DUREN-BERGER), are absent due to illness.

I futher announce that, if present and voting, the Senator from Utah (Mr. HATCH), would vote "nay"

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), is necessarily absent.

The PRESIDING OFFICER (Mr. DENTON). Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 43, nays 52, as follows:

## [Rollcall Vote No. 432 Leg.]

#### YEAS-43

#### NOT VOTING-5

Durenberger Goldwater Mathias Glenn Hatch

So the committee amendment on page 84, line 8 was rejected.

Mr. HATFIELD. I move to reconsider the vote by which the amendment was rejected.

Mr. PRYOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, could we have order in the Chamber? I would like to have the attention of the Members.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HATFIELD. Mr. President, would like to just outline hopefully the next hour. I would invite all Senators who have a noncontroversial, simple amendment that would not require a rollcall to let us know as quickly as possible so that we may clear that with both sides of the aisle and handle it in a very expeditious manner. I believe that would give us about a 1-hour window for those who need to take care of other matters. But I would also make a strong underlying caveat. That is, if we run out of amendments and there is no one on the floor to offer amendments, we do not plan to put in a quorum call but. rather, we plan to go to third reading. I just want to make clear that we want to accommodate every Senator and we are trying to do this in an orderly fashion.

So far, we have nine amendments that have cleared both the minority and the majority sides of the aisle. We will proceed in that order. Then, after that hour, or after covering these, we will be ready to go to those amendments that will require a rollcall or will have some element of controversy. We are trying to lay it out here as clearly as possible.

Mr. President, at this point I ask unanimous consent that the two managers who have now begun this list of noncontroversial amendments proceed on the basis of this list of amendments that have been cleared on both sides of the aisle in order to proceed along this outlined fashion.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Reserving the right to object, but not intending to because I am not certain what the request is—

Mr. HATFIELD. I would say again for the benefit of the Senator from Ohio that we are attempting to provide a 1-hour window. We are attempting to try to take care of the noncontroversial amendments that do not require a rollcall. In order to make that determination, these will only be amendments that have cleared the minority side and the majority side in making analyses and checking back with their respective principals, either the ranking minority member of the subcommittee or the chairman of the subcommittee.

Then, in order to maintain that orderly kind of procedure, this roster that the two leaders have developed for this process would be considered as the pecking order of handling and bringing up the amendments.

Mr. METZENBAUM. I may say to the manager of the bill there are nine items listed on that list. I would like to find out what the one having to do with the extension of the legislative veto is before I agree to the other eight. I would like to know what it says. That has been a controversial matter around here. I think we ought to know what the proposal is before we agree.

Mr. HATFIELD. I will be very happy to respond to the Senator and get a copy of it for him.

The PRESIDING OFFICER. Will the Senator provide the Chair with a list also?

Mr. HATFIELD. Yes.

Mr. METZENBAUM. Would the Senator from Oregon want to proceed with the other eight? That would expedite matters.

Mr. HATFIELD. Mr. President, I yield to the Senator from South Carolina at this time in order that he may present an amendment.

The PRESIDING OFFICER. Has the Senator withdrawn his request for unanimous consent?

Mr. HATFIELD. I have withdrawn my request for unanimous consent agreement at this time.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

UP AMENDMENT NO. 1489

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from South Carolina (Mr. Thurmond) proposes an unprinted amendment numbered 1489. At the end of the bill add the following new section:

"Sec. — That authorities contained in Public Law 96-132, 'Department of Justice Appropriation Authorization Act, Fiscal Year 1980,' are in effect for the remainder of the fiscal year."

Mr. THURMOND. Mr. President, as many of my colleagues are probably

aware, the Department of Justice has been without authorization legislation for the past 2 fiscal years. Although most of the activities of the Department are authorized under statutory provisions, some are not.

This amendment that I am offering today would carry forward certain authorities for the Federal Bureau of Investigation to engage in undercover and related law enforcement efforts. The authorization had been given to the FBI in the 1980 authorization legislation for the Department of Justice. My amendment simply carries forward the authorization contained in that

Mr. President, this amendment has been requested by the Department of Justice and has been cleared with both the ranking minority member of the Senate Judiciary Committee, Mr. BIDEN, and the distinguished managers of this bill. I thank the managers for accepting the amendment.

Mr. President, I ask unanimous consent that a letter from Edward C. Schmults, Deputy Attorney General in the Department of Justice, be printed in the Record following my statement.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE OFFICE OF THE DEPUTY ATTORNEY GENERAL,

Washington, D.C., December 13, 1982.

Re: Continuing resolution amendment. Hon. Strom Thurmond,

Chairman, Senate Judiciary Committee,

Washington, D.C.

DEAR MR. CHAIRMAN: As you know, the last Department of Justice Appropriation Authorization Act (Public Law 96-132) was for Fiscal Year 1980. This Act provided certain authorities and exemptions to the Department of Justice which were carried over into Public Law 97-76, which lapsed on February 1, 1982.

The absence of authorizing legislation is causing particular disruption to the Federal Bureau of Investigation (FBI) in two areas,

as follows:

(1) language in the FBI Appropriation which authorizes the FBI to procure policetype vehicles does not contain the authorizing language to purchase these vehicles "without regard to the general price limitation for the current fiscal year." Without this language, the FBI will be prevented from purchasing 531, or 53 percent, of its planned Fiscal year 1983 procurement of 1,007 replacement vehicles.

(2) In the conduct of undercover operations in recent years, the FBI has, until February 1, 1982, relied upon certain authorizing language which exempts such operations from other restrictive legislation. Specifically, the FBI has relied upon authorizing language which (a) permitted the deposit of appropriated funds and/or income from undercover operations in banks and other financial institutions, and (b) permitted the use of income generated by an undercover operation to offset necessary and reasonable expenses of the undercover operation.

With regard to the first identified exemption, there is other existing legislation which generally provides a basis for the FBI

to deposit up to \$100,000 in a single account, which is the limit of FDIC insurance.

The inability to deposit in excess of \$100,000 in a bank account immediately endangers and curtails undercover operations with "show money." Money is used to establish credibility, financial stability and business assets. The FBI cannot open multiple bank accounts where show money exceeds \$100,000 and appear real or "normal." Such actions cause immediate problems and danger for undercover Agents and our "business" activity.

The FBI recently received concurrent jurisdiction in narcotics matters. Failure to use the income offset function or place large amounts of funds in bank accounts means that the FBI will be unable to conduct many long-range undercover operations in narcotics matters, particularly where laundering of illegally obtained money is involved.

With regard to the second identified exemption, the FBI has no authority and, therefore, is not offsetting income against expenses of undercover operations.

Current Organized Crime, White Collar Crimes, Terrorism and General Property Crimes undercover operations are utilizing business fronts which operate as normal business entities. This requires the receipt of income and disbursement of expenditures on a day-to-day basis in a normal fashion to maintain a cover. Cash receipts/income is deposited in a bank account and expenditures are made from the bank account. This cannot be done without the income offset exemption. Without this exemption, exposure of the business cover, informants and/or undercover Agents is risked or the undercover operation cannot be undertaken.

In current Organized Crime undercover operations, the subjects are either "business partners" or have access to the books/bank accounts. Inability to offset income (conduct normal business) immediately raises questions and eventual suspicions of the subjects.

In undercover operations, outside employees of the operation will promptly become suspicious if their salary/expenses are not paid through the business account.

In order to alleviate these critical disruptions to law enforcement functions, and absent any prompt passage of authorizing legislation, I request your consideration toward introducing an amendment to the upcoming Continuing Appropriations Resolution to yield some relief. I request that you consider the following language which would cover all authorities previously available to the Department of Justice in past, although now lapsed, authorizing legislation:

"That authorities contained in Public Law 96-132, 'Department of Justice Appropriation Authorization Act, Fiscal Year 1980,' are in effect for the remainder of the fiscal year."

Very truly yours,

EDWARD C. SCHMULTS, Deputy Attorney General.

Mr. MATHIAS. Mr. President, the amendment which has been proposed by the distinguished chairman of the Judiciary Committee is an important one. It would give the Federal Bureau of Investigation authorities which will be helpful to it in running undercover operations. The FBI has been without these authorities since the expiration of previous legislation on February 1,

1982, and the lack has impeded the efficient management of these operations.

I rise only to remind the Senate that the Select Committee on Undercover Operations, in the final report which it has just issued, addressed the issue of these undercover authorities in great detail. The select committee recommended that the powers granted to the FBI by this amendment ought to be granted on a permanent basis, not as an amendment to an appropriations bill. The select committee also recommended that the powers be granted, not in isolation, but in the context of a more encompassing bill which will establish a framework for the regulation of FBI undercover operations. Until such legislation is enacted, the Congress will not be fully discharging its responsibility to provide oversight to the undercover operations of the FBI. I support the chairman's amendment; and I hope that we can count on his support for the broader undercover operations bill which the select committee has recommended, and which we plan to introduce early in the 98th Congress.

Mr. HUDDLESTON. Mr. President, the amendment offered by the distinguished Senator from South Carolina (Mr. Thurmond) temporarily corrects a problem with current FBI authority that should be resolved by permanent legislation. Today the Select Committee to Study Undercover Activities of Components of the Department of Justice released its final report. As vice chairman of the select committee, I am pleased to support this amendment which will enhance the FBI's ability to conduct undercover operations during the next several months.

The final report of the select committee recommends the enactment of permanent legislation so that it is no longer necessary to give the FBI temporary extensions of the authorities needed to run proprietaries, deposit funds in banks, and enter into contracts and leases for the purpose of carrying out an undercover operation.

The language of this amendment is identical to language that was previously in the Department of Justice Authorization Act and that expired on February 1, 1982. The final report of the select committee recommends some revisions in that language, including additional authorities and greater flexibility in their use.

The final report of the select committee also recommends that these authorities be enacted as part of a larger framework of standards and guidelines. That framework would require the attorney general to issue guidelines for FBI undercover operations, to report changes in those guidelines to the Judiciary Committees in advance, and to submit an annual report to the Judiciary Committees on all closed operations and long-running operations.

An essential part of that framework would be a legislative standard for undercover operations. That standard should require reasonable suspicion of possible criminal activity before an undercover operation is initiated or an individual is targeted, with a higher probable cause standard for activities that may endanger first amendment rights.

There should also be a statutory provision for compensation of persons who suffer damages as a result of illegal or negligent Government conduct in an undercover operation. And consideration should be given to clarifying the law of entrapment.

I plan to work with the chairman of the select committee, the distinguished Senator from Maryland (Mr. Mathias) and other members of the select committee to frame a bill that can be introduced and acted upon promptly in the next Congress. I urge my colleagues to give the final report of the select committee, and the legislation needed to implement its recommendations, the most serious consideration.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1489) was agreed to.

Mr. THURMOND. I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I direct the Chair's attention to the Senator from Oklahoma, who seeks recognition.

#### UP AMENDMENT NO. 1490

(Purpose: To provide certain pay to certain individuals training air traffic controllers)

Mr. BOREN. Mr. President, I send an amendment to the desk and ask for its consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Oklahoma (Mr. Boren) proposes an unprinted amendment numbered 1490.

At an appropriate place in the joint reso-

lution, insert the following:

SEC. . Notwithstanding any other provision of this joint resolution, section 5546a (a) of title 5, United States Code, is amended (1) by deleting the period at the end of paragraph (2) of subsection (a) and inserting in lieu thereof a semicolon and the word "and", and (2) by inserting immediately after paragraph (2) of subsection (a) the following new paragraph:

"(3) any employee of the Federal Aviation Administration who occupies a position at the Federal Aviation Administration Academy, Oklahoma City, Oklahoma, the duties of which are determined by the Administrator to require the individual to be actively engaged in or responsible for training employees to be air traffic controllers, and who, immediately prior to assuming such

position at such Academy, occupied or was assigned to a position referred to in sub-paragraph (A), (B), or (C) of paragraph (1) of this subsection.".

Mr. BOREN. Mr. President, in the continuing resolution that we passed last September, we included a provision that granted a pay raise to those dedicated FAA employees who remained on the job during the PATCO strike in August 1981. I supported that provision because I felt it was necessary to compensate these dedicated employees who performed so admirably during those trying times for our Nation's air transportation industry and insured the safety of the traveling public.

However, in providing this pay increase, I believe we failed to include an equally dedicated and hard-working group. I am referring to those FAA employees at the FAA Academy in Oklahoma City who are involved in training others to be air traffic controllers and other essential jobs in restoring our air control system.

Several categories of FAA employees at the Academy correspond directly to employees in the field who will be receiving the pay increase. But for the fact that these Academy instructors are training students in Oklahoma City, they would also be receiving the pay increase. In fact, the FAA Administrator has stated to me that when these instructors return to the field, they will receive the pay raise.

When the current instructors return to the field they will be replaced by FAA employees who, when they become instructors at the Academy will not be eligible for the pay increase.

Mr. President, it becomes obvious that recruitment of qualified instructors will become very difficult, if not impossible, since they will have to take a substantial pay cut when they move to the Academy in Oklahoma City.

I would like to ask the distinguished Senator from North Dakota, Senator Andrews, if he believes that my amendment is necessary in order to fairly compensate those FAA Academy employees who joined in the efforts to help rebuild our air transportation system and but for the fact of their being instructors would be receiving the same increase as their counterparts in the field?

Mr. ANDREWS. I thank my friend from Oklahoma, Senator Boren, for offering this amendment. I do think his amendment is necessary because I share his concern that all of those FAA employees who have contributed to the strike recovery should be treated fairly and equally. I commend the Senator for his amendment and I am pleased to accept it on behalf of the committee.

Mr. President, this amendment has been cleared on both sides by the chairman of the Subcommittee on Transportation (Mr. Andrews) and by the ranking member on this side (Mr. Chiles). It is an amendment that simply extends to those air traffic controllers, who were temporarily assigned as instructors at the Air Controller Training Academy the same bonus benefits and salary as received by the other air traffic controllers who stayed on the job during the recent emergencies, to make sure all these air traffic controllers who stayed on the job are treated alike.

Mr. HATFIELD. Mr. President, this amendment offered by the Senator from Oklahoma, again, has been reviewed by both minority and majority staffs. It is acceptable to the commit-

tee.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1490) was agreed to.

Mr. BOREN. I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### UP AMENDMENT NO 1491

(Purpose: To restrict the sale by the General Services Administration of certain real property known as the Naval and Marine Corps Reserve Center at Beavertail Point, Jamestown, Rhode Island)

Mr. PELL. Mr. President, I send to the desk an unprinted amendment and ask unanimous consent that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Rhode Island (Mr. Pell) for himself and Mr. Chaffe, proposes an unprinted amendment numbered 1491.

At the appropriate place in the joint resolution insert the following new section.

SEC. — . No funds, including funds provided in this joint resolution or in the account entitled "Expenses, Disposal of Surplus Real and Related Personal Property" (Account No. 47-5254-0-2-804), may be expended by the General Services Administration to proceed with any sale or disposal of real property and improvements known as the Naval and Marine Corps Reserve Center at Beavertail Point, Jamestown, Rhode Island, containing 6.81 acres, more or less, and identified by General Services Administration control number N-RI-482A.

Mr. PELL. Mr. President, the amendment before the Senate pertains to a surplus Federal land problem in Rhode Island involving the General Services Administration. The language which Senator Chafee and I have developed would prohibit GSA from going ahead with its plans to auction for commercial development a former Naval and Marine Corps Reserve Center in Jamestown.

The land in question, Mr. President, is entirely surrounded by existing park land. The town of Jamestown and the

State has been in the process of acquiring the property for park and recreational purposes until GSA-as part of a nationwide plan to auction off surplus Federal lands-stepped in and determined that the property should be sold at fair market value for residential development. This property, Mr. President, surrounded as it is by the beautiful Narragansett Bay Islands Park, should be preserved for the enjoyment of all the taxpayers as park and recreational land. To let this property, which the Park Service has already approved for recreational use, fall into the hands of private developers is about as appropriate as permitting a condominium development in the middle of Yellowstone National Park.

The General Services Administration has set a deadline of January 15 for the State or the town to indicate a willingness to purchase the property at fair market, residential value. After that date, GSA will proceed to put the land on the auction block for private development. We are trying with this amendment to obtain further time for either further negotiations with GSA on the future of the site, or for appropriate legislative remedies to be pursued in the next session. I would stress, Mr. President, that the amendment pertains only to this one piece of surplus property in Rhode Island, and will have absolutely no effect on other pending GSA conveyances.

I very much hope that the managers of the resolution will agree to accept the language Senator Chafee and I are

proposing.

Mr. CHAFEE. Mr. President, I am proposing this amendment for myself and Senator Pell. This amendment deals with a small parcel of land—6.8 acres—in the middle of an existing State park in Rhode Island which the General Services Administration has decided to sell for residential use. The language of this amendment would prevent that sale.

The General Services Administration's new policy of demanding fair market value for property surplused by the Federal Government is a result of Executive Order 12348 which was published on March 1, 1982. While this policy has merit in some circumstances, it does not have merit in this

instance.

The State of Rhode Island applied for this land in December of 1981—3 months before the Executive order was published. The State never received information indicating that the former policy of conveying land appropriate for park use at 100-percent discount had changed until its application was denied in October of this year. Nor was the State informed of the exceptions to the order under which an application for 100 percent public benefit discount would be approved. One of the exceptions to the

Executive order refers to applications submitted before March 1, 1982, the denial of which would create a hard-ship on the State.

As I have mentioned, the parcel of property in question is surrounded by an existing State park. The State park system in the Narrangansett Bay area is unique in that it provides large scale public access to the waterfront for swimming, fishing, scuba diving, boating, and many other recreational activities. If this land is allowed to be placed on the public auction block for developers to purchase, its pristine beauty will be lost forever. Not only Rhode Islanders, but all people who visit Rhode Island to take advantage of its recreational opportunities will be denied the benefit of access to this property's shoreline.

This amendment is specific to this one piece of property and is not intended to have any national signifi-

cance.

It is my sincere hope that the managers of this resolution will accept the language that Senator Pell and I are

proposing.

Mr. PELL. Mr. President, what this amendment does is provide that a piece of land, about 6 acres, that is in the midst of a park area in Rhode Island, in Jamestown, not be released for sale to commercial interests at this time; that for the life of the continuing resolution, this land be held by the GSA. Our desire is that in this period of time, an arrangement be worked out among the State, the community, and GSA, to make sure that this land will remain in the parkland areas by which it is surrounded. It has been cleared by the majority and the minority staff. I hope it will be agreeable.

Mr. HATFIELD. Mr. President, this, again, is one such amendment that I referred to before. We have reviewed this amendment on both the majority and minority side and it is acceptable

to the majority.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island.

The amendment (UP 1491) was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### UP AMENDMENT 1492

(Purpose: To establish limits on payments to the directors and officers of the Legal Services Corporation.)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Arizona (Mr. DeConcini) for himself, Mr. Weicker, Mr. Hollings, Mr. Kennedy, Mr. Proxmire, Mr. Metzenbaum, Mr. Pryor, and Mr. Cranston proposes an unprinted amendment numbered 1492.

On page 14 line 16 strike "Act," and insert "Act: Provided further, That no member of the Board of Directors of the Corporation shall be compensated for his services to the Corporation except for the payment of an attendance fee at meetings of the Board at a rate not-to-exceed the highest daily rate for grade fifteen (15) of the General Schedule and necessary travel expenses to attend Board meetings in accordance with the Standard Government Travel Regulations: Provided further, That no officer or employee of the Corporation or a recipient program shall be reimbursed for membership in a private club, or be paid severance pay in excess of what would be paid a Federal employee for comparable service.'

Mr. DECONCINI. Mr. President, recent oversight hearings by the House Judiciary Committee have uncovered serious abuses by certain members and officers of the Legal Services Corporation. The evidence suggests that the present Chairman of the Board and President of the Corporation, along with some of the recent appointees to the Board, are much more interested in ripping off the program than in improving its administration. Apparently, the individuals involved have no compunction at all when it comes to exploiting their positions for purely personal gain. And exploit them they do.

The disclosures so far tell a sorry tale indeed:

The administrative budget of the Board has more than doubled in 1 year. In fiscal year 1981, administrative expenses came to \$113,721. The comparable sum for this last fiscal year was \$273,731.

Chairman William F. Harvey has collected \$25,028 in consulting fees from the Board through November this year. The previous Chairman, William McCalpin, received \$4,704 in consulting fees last year. Altogether, the Board chalked an heretofore unrivaled \$156,201 through November this year. The previous Board last year collected a total of \$72,029.

A considerable portion of these "consulting fees" are paid for travel. These are not ordinary travel expenses, however. For instance, Mr. Harvey apparently bills the corporation at \$221/day for his driving time. This, of course, is in addition to lodging and meals. This would probably make him the highest paid self-employed chauffer in the history of the world.

Chairman Harvey also believes in sharing the spoils. He took it upon himself to negotiate what can only be called a sweetheart contract with Mr. Bogard, the President of the corporation. Bogard just happens to be one of Harvey's former students. The contract provides, in addition to a \$57,500 salary, a generous severance allowance of a year's pay, and benefits, and expenses, an unlimited expense account until June 15 when his family will presumably move here to join him, plus two round trips per month for trips to Indianapolis to visit his family in the interim. The Board would also pick up the tab for Mr. Bogard's membership in a private club of his choosing.

Now, Mr. President, there is no reason to belabor the obvious. This is an outrageous situation and should not be tolerated another moment.

Our amendment will address the most egregious abuse. It prohibits compensation for Board members except for actual attendance at Board meetings. It also prohibits the practice of providing private club memberships at public expense and restores parity between Legal Services employees and employees of the Federal Government insofar as severance pay is concerned. I urge my colleagues to join me in passing this amendment.

Mr. METZENBAUM. Mr. President, will the Senator add me as a cosponsor?

Mr. PRYOR. Mr. President, will he

add me also?

Mr. DECONCINI. Mr. President, I ask unanimous consent that the Senator from Ohio (Mr. METZENBAUM) and the Senator from Arkansas (Mr. PRYOR) be added as cosponsors to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, this is an amendment that has been cleared by both sides of the aisle and is acceptable to the committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment. The amendment (UP No. 1492) was agreed to.

Mr. DECONCINI. I move to reconsider the vote.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1493

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. Prox-MIRE) proposes an unprinted amendment numbered 1493.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. . None of the funds appropriated under this joint resolution or any other Act to any executive department or agency may be expended for the transportation of any

At the end of the bill add the following.

be expended for the transportation of any officer or employee of such department or agency residing in the United States between his domicile and his place of employment, with the exception of the secretaries of the executive departments enumerated in 5 U.S.C. 101.

Mr. PROXMIRE. Mr. President, some weeks ago this committee approved an amendment to the Treasury-Postal Service appropriations bill

prohibiting the use of Federal funds to chauffeur executive branch employees between home and work unless they happened to be Cabinet Secretaries or principal diplomatic or consular officials.

As we all know, there is very little chance that the Treasury-Postal Service bill will be sent to the White House for the President's signature before the 97th Congress adjourns. Consequently, I am proposing that we add a slightly modified version of this amendment to the continuing resolution.

As reworded, the amendment would not cover Federal officials stationed in foreign countries. Although it originally exempted diplomatic and consular officials, it has been suggested that such an exclusion is not wide-ranging enough to protect all Federal workers who might be exposed to acts of terrorism in politically volatile countries. The redrafted language would eliminate this problem.

Mr. President, current law (31 U.S.C. 638a) makes it quite clear that Federal workers are not to be driven from home to work and back again, but this law is honored more in the breach than in the observance. In fact, the law has been so consistently violated that the Comptroller General could not believe it meant what it said and came out with an opinion to this effect. My proposed language would make it crystal clear that the Congress knew what it was doing when it passed this legislation.

The members of this committee may be surprised to learn that, at the present time, the Under Secretary of State for Management, the Administrator of the St. Lawrence Seaway Development Corporation., who lives in the Metropolitan Washington area, the Deputy Director of the Office of Management and Budget, the Deputy Postmaster General, and the Deputy Director of the International Communications Agency all have the use of chauffeured cars to drive them between home and work. These are a handful of the 122 executive branch officials we know about who are provided with door-to-door limousine service on a regular basis.

It would be nice to think that the use of portal-to-portal limousines by Federal bureaucrats was shrinking. However, it is worth noting that the State Department on June 12 of this year came out with a legal opinion extending this privilege to four Under Secretaries of State and the Counselor of the State Department. The rationale was that these officials, including the Under Secretary for Management, "have substantial responsibilities for the conduct of international negotiations and the performance of numerous other diplomatic functions."

This type of restriction has been applied to the agencies funded through the HUD-Independent Agencies bill for about 5 years now and has had no adverse effect on their operations. In fact, the former head of the Veterans' Administration, Max Cleland, drove himself to and from work although he was a triple amputee. I see no reason for the limitation to be applied to a mere handful of agencies and departments. It makes sense, it will save about \$3 million, and, at a time when we are asking our constituents to make painful sacrifices to hold down Federal spending, I do not know why we should not ask Federal bureaucrats to give up their limousines.

That is what the amendment does. Mr. HATFIELD. Mr. President, this matter has been discussed and debated before. If I am not mistaken, I would say to the Senator from Wisconsin, it

has been part of our continuing reso-

lution in the past.

Mr. PROXMIRE. That is right. Mr. HATFIELD. This is merely an amendment that the Senator has offered on previous occasions. It has been cleared on both sides of the aisle and is acceptable to the committee.

Mr. PROXMIRE. I thank the Sena-

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 1493) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that

motion on the table.

The motion to lay on the table was agreed to.

# UP AMENDMENT NO. 1494

(Purpose: To assure the use of corrected data for computing impact aid for local educational agencies in Montana)

Mr. BAUCUS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read

The Senator from Montana (Mr. Baucus), for himself and Mr. MELCHER, proposes an unprinted amendment numbered 1494.

Mr. BAUCUS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 60, at the end of title I of the joint resolution insert the following new

"SEC. . Notwithstanding any provision of this joint resolution or any other law or regulation payments for local educational agencies under the Act of September 30, 1950 (Public Law 874, 81st Congress) in Montana for fiscal year 1983 shall be computed from corrected 1981 financial data. The provisions of this section shall not apply unless the following conditions are met:

"(1) No such payments shall be made until an audit is conducted.

"(2) No such payments shall be made prior to March 30, 1983.

'(3) The total amount of the increase in payments made by reason of this section shall not exceed \$3,000,000.

(4) No such payments shall be made unless prior approval is obtained from the Committee on Appropriations of the Senate and of the House of Representatives.'

### MONTANA IMPACT AID

Mr. BAUCUS. Mr. President, I am introducing this amendment with Senator Melcher to correct a problem that could affect severely several Montana public schools.

Federal impact aid assistance is distributed according to formula grants, and it is used by the recipient schools for general operating expenses. These funds are critical to Western States and other localities with substantial Federal lands.

Part of the distribution formula is the local contribution rate. Local school officials compute how much they can contribute to the operation of the schools. The more the local contribution, the less Federal impact aid is granted.

For several years, Montana's Office of Public Instruction has computed incorrectly the local contribution rate. The office had included in their calculations the funds received by local governments from other Federal programs. This led to overcalculation of the local contribution rate, and re-

quests for less Federal impact aid money than was justified.

In short, Montana schools that are eligible for impact aid have received less than they are entitled to.

Unless this problem is corrected soon, some 30 schools in Montana will continue to be penalized. Even worse, 5 schools serving 1,300 students will be forced to close, and several others will be operating in the red.

The amendment we introduce today is a technical amendment. It would allow the Department of Education to use Montana's corrected calculations when distributing funds under the Federal impact aid program.

We are not asking for an increase in overall appropriations. We only seek Montana's fair share of the fiscal 1983

appropriation.

This fair share is jeopardized unless this amendment is adopted. This continuing resolution limits the impact aid funding to a percentage of 1981 payments. Therefore, Montana is locked into the incorrect calculations and the mistakenly low impact aid levels of 1981.

This amendment will correct a serious, yet inadvertent, error. It will also insure that several rural Montana

schools do not close.

To the best of my knowledge, Mr. President, this situation has not developed in any other State.

The House managers of H.R. 7205 recognized the serious nature of this problem in a colloquy on the House floor, following passage of the bill.

However, the Department of Education has informed the delegation that they cannot rely on a colloquy to correct this error. The Department insists that only an amendment like this will correct the situation.

Mr. President, this amendment is essential for the continued operation of Montana's heavily impacted schools. It is a fair amendment and it does not increase the appropriation for impact aid. I urge adoption of this amendment.

Mr. MELCHER. Mr. President, I join my colleague from Montana in urging the adoption of this technical amendment.

The situation facing several school districts in Montana is drastic. For example, the Browning public schools, educating about 1,700 Indian children from the Blackfeet Reservation, may not be able to complete the current school year. Heart Butte, which recently completed a \$6 million school building financed by Federal funds, will close next year. So will several other schools whose total enrollment is about 4,000 students.

The problem arises here today because the Department of Educationafter considering the appeal of Montana to be allowed to correct the 1981 miscalculation of entitlement for several months-informed the Montana school officials on December 1 that they would not permit the error to be corrected. They also cited Department regulations which they insist cannot be waived.

In a colloquy on the House floor on December 1, our colleague, Representative Ron Marlenee, was assured that the House Appropriations Committee did not intend "that Montana receive a shortfall—in impact aid—and want to rectify that situation." This does not satisfy the Feds-hence amendment.

Mr. President, contrary to what the bureaucrats in the Department have told some Senators, this amendment does not reduce impact funds for other States this year. It will correct a situation that has been compounded by the practice of operating under continuing resolutions which provide that the base for computing a school's impact funds is the percentage of the payments received in 1981. Montana schools have been the victims of snowballing reductions since 1981 because of wrong figures which the bureaucrats in the Department failed to catch and correct.

As ranking member of the Senate Select Committee on Indian Affairs, I want to point out to the Senators that if the public schools cannot finance the education of Indian children from

the reservations, the cost to the Federal Treasury to build and operate Federal schools for 4,000 Indian children will be far higher than keeping them in the public schools. The law and the various treaties commit the Federal Government to provide education for Indians. It is also, by far, the most educationally sound policy. As in every State, the Montna State government provides a share of the cost of instruction in the public schools. In Montana. this is about 45 percent. In those districts with taxable property, the balance of funding is derived from property tax. Indian reservations are not taxable, as you know, and are eligible for impact aid. In Montana, most Indian impacted districts are "super A" districts, with more than 50 percent Indian children.

If the schools are forced to close for lack of sufficient funds, the cost of constructing and operating Federal or contract schools could be \$50 million initially, at least, plus about \$24 million a year in operating costs for educating these children, providing transportation or boarding facilities, and other services. The State share would not be available for children not in public schools. In addition to this high cost to the Federal Treasury, the children would be denied the high type of public education Montana wants all of its young people to have.

Mr. President, I urge my colleagues to accept this amendment. It will start us in Montana on the road to equity for our heavily impacted schools. It will also force the Department of Education to do what is right, their regulations to the contrary. It will not penalize any district in any other State.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana.

The amendment (UP No. 1494) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the able.

the motion to lay on the table was agreed to.

### ORDER OF PROCEDURE

Mr. HATFIELD. Mr. President, we have had other Senators who have indicated that they wanted to present a noncontroversial amendment and they are not present. We will plan, then, to conclude this session very shortly, and then go to other amendments that may be controversial, may require a rollcall, and I just want to put the Senate on notice that we are coming to the end of this particular list that we have cleared.

There may be others, but this list will then drop down to the bottom because, as I indicated before, if the Senator is not present, we have to move on to other amendments. We are not going to wait for Senators to come back to the floor.

I ask the Senator from New York, does he have an amendment in this category?

Mr. MOYNIHAN. No. sir. It is controversial.

Mr. HATFIELD. We do have one other in this category, if we could complete it.

Mr. President, I yield the floor.

UP AMENDMENT NO. 1495

Mr. CHAFEE. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Rhode Island (Mr. CHAFEE) proposes an unprinted amendment numbered 1495.

Mr. CHAFEE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 20, after the colon, insert the following new language: "Provided, That no funds under this heading shall be used for further study or construction or in any fashion for a federally funded waterway which extends the Tennessee Tombigbee project south from the City of Demopolis, Alabama, and"

On page 17, line 20, after the colon, insert the following new language: "Provided, That no funds under this heading shall be used for further study or construction or in any fashion for a federally funded waterway which extends the Tennessee Tombigbee project south from the City of Demopolis, Alabama, and"

Mr. CHAFEE. Mr. President, what this amendment does is to provide that no funds under the heading which deals with the funds for the Tennessee-Tombigbee can be used for further study or construction in any fashion for a Federal-funded waterway which extends the Tenn-Tom project south from the city of Demopolis. This is similar to an amendment, which provision we had in the act last year. I have cleared this with the junior Senator from Louisiana, the senatorial delegation from Alabama, and the senatorial delegation from Mississippi, and it is acceptable with them. I move its passage.

Mr. PROXMIRE. Will the Senator yield? This is strictly a limitation, is

that right?

Mr. CHAFEE. That is right. In the bill we are considering, there is \$320 thousand for study in this area, and the House is \$750 thousand. It is constantly stated here that nothing is going to be done south of Demopolis, that the Tenn-Tom is north of Demopolis. This would prevent any funds being used south of Demopolis. In all fairness. I want to say that for routine engineering work, which has been done in the past for the waterway which comes up from Mobile to Demopolis, this is not intended to get

Mr. MOYNIHAN. Will the Senator yield?

Mr. CHAFEE. Yes.

Mr. MOYNIHAN. The Senator has just said what I meant to ask him. There will be normal Corps of Engineers work in the waterway, but to the degree that it would take place where there had been no canal from the Pickwick Pool, that is to take place, but not an extension of the waterway?

Mr. CHAFEE. That is right. We in no way want to interfere with what would normally take place in the waterway which is from Mobile up to Tenn-Tom. It is nothing for Tenn-Tom

extension south.

Mr. HEFLIN. Will the Senator yield?

Mr. CHAFEE. Yes, I yield.

Mr. HEFLIN. I appreciate the study that the Senator from Rhode Island has given this. I am agreeable to this amendment.

A similar amendment was adopted known as the Levin amendment last year, on November 4, 1981, and we had a good deal of discussion and a good deal of debate relative to the legislative history pertaining to it, which was designed to show that this is an effort to stop anything below Demopolis as it would apply to the project of the Tennessee-Tombigbee. There are some ongoing things, as the distinguished Senator from New York pointed out, pertaining to other locks and dams in the normal course, because the Warrior River runs into the Tombigbee and the Warrior River connects Birmingham, Tuscaloosa, and other areas. And there are two dams in that area, the Coffeeville Lock and Dam and the Demopolis Lock and Dam where there are some activities that are going on in the normal event.

So I think reference to the debate before would clarify this that occurred on November 4, 1981, and what the distinguished Senator from New York has said I think clarifies it and shows the intention.

I have no objection and, therefore, I agree with him that this should be adopted.

Mr. CHAFEE. I thank the distinguished Senator from Alabama and of course the distinguished colleague who is currently the Presiding Officer for their assistance in this.

Mr. SIMPSON. Mr. President, will the Senator yield 1 minute?

Mr. HEFLIN. I am glad to yield.

Mr. SIMPSON. Let me say I watched the progress of this particular project, and I hope it would be nonprogress. I see others feel as I do.

I do appreciate the feelings of the Senators from Alabama and Mississip-

pi. I want to be on notice that in the procedures I do not want at this time to block the system in what we are doing in this exhaustive fashion. But I want to be on notice. I want to deter-mine why the State of Alabama and the State of Mississippi have not provided participating funds when they both came into revenue in the recent royalty distribution, some \$500 million. It is not the purpose to raise that here in the discussion. I just place it out being on notice because there is not one of us who is involved in a public works that does not believe the States should begin to raise their participation percentages from 5 or 10 or 20 percent.

Senator Moynihan, Senator Domenici, Senator Chafee all are involved in that. Those are things that I want to determine because certainly public works projects in my State we are participating now up to 40 and 45 percent. I think that is a State's obligation in this exercise of public works construc-

tion.

I thank the Chair.

Mr. HEFLIN. Mr. President, will Senator Simpson yield?

Mr. SIMPSON. I do not have the time. But certainly the Senator may proceed.

Mr. HEFLIN. I wish to say that I think when we get into this he will see that the State of Alabama and the State of Mississippi made substantial contributions. Substantial contributions have been made through various things pertaining to the harbor and with regard to getting ready to make Mobile port the location, relocation of bridges, the railroad trestles, highways, other things—there have been substantial amounts.

Rather than getting into detail when the Senator brings it up he will give us an opportunity we think we can show him the participation that has been made.

Mr. SIMPSON. I appreciate that from the Senator from Alabama. We will work with him seeing what the percentages are and what I think they should be.

Mr. CHAFEE. Mr. President, I move passage of the amendment.

Mr. HEFLIN. I wish to hear Senator STENNIS right now. I think he would wish to make a statement.

Mr. STENNIS. Mr. President, will the Senator yield me half-a-minute.

Mr. HATFIELD. I yield.

Mr. STENNIS. Mr. President, on this matter here we have had consultation, and I commend the Senator for the work he has done here. This is entirely agreeable to me for my part. It fits in with the Levin matter that we had up a year ago.

I see the Presiding Officer here. I know he feels the same way.

I gladly join in and endorse the amendment.

Mr. HATFIELD. I thank the Sena-

Mr. HEFLIN. May I make one correction? The distinguished Senator from Alabama, Senator Denton, is in the chair. He is not in a position but I am sure if he were on the floor he would wish to make remarks. Perhaps he can make them now or I ask unanimous consent that time be given for him to add remarks as if they were to appear here, or whatever he would like to do in that regard.

Mr. STENNIS. Mr. President, if the

Mr. STENNIS. Mr. President, if the Senator will yield to me, I ask unanimous consent to have printed in the RECORD certain figures that I have worked out about the contributions of the States to this matter to which reference has been made.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

## TENNESSEE-TOMBIGBEE WATERWAY PROJECT COSTS

	1983 1984		Percentage of total cost	
			1983	1984
Corps of Engineers	\$1,830,000,000 9,600,000 9,400,000	\$1,820,000,000 9,600,000 9,400,000	91 {1} 1}	91 {1}
Total Federal	1,849,000,000 164,000,000	1,839,000,000 159,000,000	92 8	92
Total	2,013,000,000	1,998,000,000	100	100
Non-Federal costs: Highways	740,300 163,122,100 79,100 58,500	670,300 158,184,200 87,100 58,500		
Total	164,000,000	159,000,000	8	

1 Equals 1.

NON-FEDERAL COSTS—BRIDGE RELOCATIONS

Fiscal year 1984 data: Total relocation cost—\$159,000,000.

The many	Alabama	Mississippi	Total
State share	\$27,347,000	\$131,653,000	1 \$159,000,000
dollars)	-19,900,000	-69,600,000	-89,500,000
State funding	7,447,000	62,053,000	² 69,500,000

<sup>&</sup>lt;sup>1</sup> \$159,000,000 = 8% of total project cost. <sup>2</sup> \$69,500,000 = 3.5% of total project cost (Less DOT).

NON-FEDERAL COSTS—BRIDGE RELOCATIONS PLUS RECREATION COST-SHARING

Initial recreation development is 100% Federal.

Remaining recreation costs=\$57,400,000. With Administration cost-sharing (50-50) the non-Federal costs are:

Local sponsors are meeting all obligations on schedule. Section 132 of the Federal Aid Highway Act of 1976 provides a portion of the total non-Federal requirement of \$159 million (\$89.5 million). The states of Alabama and Mississippi are providing \$69.5 million, a sizable commitment.

Generally, navigation project authorized since 1952 provide Federal participation in highway bridge modification costs in accordance with the cost-sharing principles of Section 6 of PL 67-647, as amended, commonly known as the "Truman-Hobbs Act." The Tenn-Tom project was authorized in 1946, with all bridge and highway modification costs as non-Federal costs. The intent of the Section 132 legislation was to provide a measure of equity to the local sponsors by treating the project similarly with those currently being authorized.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1495) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEFLIN. Mr. Preisdent, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

### UP AMENDMENT NO. 1495

(Purpose: To extent the moratorium on the decertification of local economic development districts.)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and I believe it has been cleared on both sides.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes unprinted amendment numbered 1496.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 11, line 1, immediately after "Economic Development Administration:" insert the following: "Provided, That immediately after 'amended' on page 3, line 10 of S. 2956 as reported by the Senate Committee on Appropriations there shall be inserted 'and Public Law 91-304, and such laws that were in effet immediately before September 30, 1982,"

Mr. BUMPERS. Mr. President, this amendment declares a moratorium that has been in effect since Public Law 91-304 was passed on decertification of local economic development areas.

The moratorium expired on September 30, 1982, and has not been extended.

We have language that extends the moratorium in title 2 of the bill which is the jobs section but we cannot have it in title 1 where is is equally important. All this amendment does is simply put it also in title 1.

Mr. HOLLINGS. Mr. President, since we are on EDA I want to make a statement about section 101(d) of House Joint Resolution 631. This section makes provision for the Departments of Commerce, Justice, and State, the Judiciary and the Related

Agencies Appropriations Act of 1983 at the levels reported in S. 2956 on September 24, 1982, with several exceptions to take into account budget requests transmitted to the Congress after the committee reported the bill. The largest addition we recommended to our previous level is \$127,500,000 for the 12 task forces that the Attorney General requested to fight organized criminal drug trafficking. We have also taken into account several other budget amendments submitted by the Department of Justice which will enhance the activities of the Federal Bureau of Investigation and the Drug Enforcement Administration.

On a personal note, I am pleased that our distinguished chairman, Senator Weicker, has accepted two new items that I presented. The first adds \$150,000, which together with \$50,000 from non-Federal sources, will be used for a new combined monthly survey of men's and women's apparel. This will replace the former apparel survey which was dropped from the 1983 budget due to insufficient response by

the apparel industry.

However, a coalition of textile and apparel manufacturers have secured support for this new survey including a financial contribution of 25 percent of the cost of compiling this vital information. As noted in Chairman Hattield's explanatory statement, the committee also emphasizes the importance of the publication of apparel production data for the year 1982 and asks that Census produce the annual apparel survey for 1982 by not later than March 30, 1983.

The other item is of particular importance to South Carolina as we have reestablished the steel loan program of the Economic Development Administration. In 1978 we approved the use of \$100 million from the EDA revolving fund to guarantee \$500 million in loans to steel companies. Approximately \$300 million was ultimately guaranteed in loans to five companies. One of those companies was Korf Industries which operates steel plants in Georgetown, S.C., and Beaumont, Tex., as well as other plants in several other States.

Georgetown Steel, unlike most steel firms, is operating at close to capacity but due to the soft prices because of the economic recession as well as foreign imports they have lost a considerable amount in 1982. The \$20,000,000 loan guarantee authorized in this bill is to be part of a restructuring of Korf's long-term debt that will assure the continuation of some 2,421 jobs nationwide, including 937 in South Carolina, 778 in Texas, 241 in North Carolina, 63 in Tennessee, and 402 in other States.

Mr. HATFIELD. Mr. President, the Senator has shared this amendment with the majority and minority and the staff, and it has been cleared on

both sides and it is acceptable to the committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment (UP No. 1496) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BUMPERS. Mr. President, I move to lay that motion on the table. The motion to lay on the table was agreed to.

BOARD FOR INTERNATIONAL BROADCASTING AND THE VOICE OF AMERICA APPROPRIATIONS

Mr. PERCY. Mr. President, I send to the desk an amendment which I had intended bringing up for immediate consideration.

I ask unanimous consent that the reading of the amendment be dispensed with but that it be printed in the Record at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the amendment was ordered to be printed in the Record, as follows:

On page 14, after line 2, add the following: Board for International Broadcasting: "Grants and expenses," \$111,600,000.

International Communication Agency: "Salaries and expenses," \$519,223,000.

International Communication Agency: "Acquisition and construction of radio facilities." \$27,920,000.

Mr. PERCY. Mr. President, Thomas Jefferson wrote that "A decent respect for the opinions of mankind" was one of the reasons for making public our Declaration of Independence. Today, in a world where mass communication is a commonplace, our respect for the opinions of others is based not only on our decency, but also on our will to survive. The reason is simple. We are engaged with the Soviet Union in a struggle of ideas, a contest for the understanding and support of all mankind. As a result, international information is a vital element of the foreign and national security policy of the United States.

The success of the United States in international affairs depends to a critical degree on how well the actions of the United States are understood by the rest of the world. In making clear our position on the vital issues of our day, by explaining the ideals and hopes that shape our Nation, we can instill in the peoples of the world an understanding of and interest in our democratic experience.

By telling the truth about what is happening in the world today we can provide the perspective necessary for others to make an intelligent judgment. There is no instrument available which is more effective for accomplishing this than the international broadcasting operations supported by the U.S. Government.

Yet, as has been noted time and again, we have not devoted sufficient resources to this valuable instrument. As Professor Samuel Huntington of Harvard University has said:

Over the years, we have not given as much support as we should have to putting our case before the various audiences around the world. We tend to treat that sort of activity as marginal. We spend hundreds of billions of dollars on weapons, but can hardly spare a few million for a task that seems to me to be equally equivalent.

Let me give an example. In 1980 the Voice of America had a budget of \$86 millon dollars. The Soviets by comparison spent an estimated \$800 million dollars on international broadcasting. For the same year, if you add together the VOA budget with the Radio Free Europe/Radio Liberty budget, the United States spent \$176 million dollars on international broadcasting. Again, by comparison, the Eastern bloc as a whole spent a billion dollars on international broadcasting. That means that the Soviet Union together with its satellites spent a total of nearly five time as much on international broadcasting as the United States. An indication of what this mens is that, last year, the Voice of America had a total of six high-powered transmitters. The Eastern bloc and the U.S.S.R., by comparison, had

The \$44 million dollar increase that I am proposing for the VOA/RFE/RL budget will begin to make up for this regrettable difference in capabilities. That money will be used to improve engineering ability, increase the effectiveness of the radios, and begin the modernization of equipment which is essential for international communications.

The President has spoken out strongly in support of this initiative. "It is vital" he said, "That we undertake initiatives now for the modernization and strengthening of our international radio broadcasting operations. The time has come to give these opertions—for too long systematically underfunded and neglected—the attention they deserve." I believe it is essential to proceed with this if we are to succeed in this very serious and important competition.

Recently, when a Polish ship docked in Canada, the sailors wrote a letter to the Voice of America in which they said:

We...wish to convey our great appreciation for your excellent broadcasts. Not only we, but thousands of sailors from other Polish ships, have been listening to your program, because you are the only ones from whom we can learn the truth about Poland and Poles. We tune in your frequencies day and night, sharing information thus received with those who cannot listen because of work schedules. We also appreciate your broadcasting for so many hours. We know from others that your programs are heard throughout most of Poland. You

seem to know more about us than does the Community Party's Central Committee, and you understand us better. . . . Thanks again, and keep up the good work.

President Reagan has urged that we take this action, and adopt this amendment which will provide funds for rapid modernization of the technical infrastructure of the radios and enable us to rebuild personnel levels in essential areas. Having these improved capabilities, as promptly as possible, the President says, is a matter of vital national interest. That is why we are acting now to seek the funds necessary, rather than waiting until next year and delaying the modernization of the radios for many months.

Mr. President, the following organizations have contacted me to express their strong support for the VOA/BIB amendment:

The Joint Baltic American National Committee

The Estonian House of Chicago

The Estonian Society of Los Angeles The Estonian American National Council

The Lithuanian American Council The Polish American Congress

The Polish American Congress, Eastern Pennsylvania District

The Michigan Division of the Polish National Congress

Pomost

Solidarity International

The Committee in Support of Solidarity The World Federation of Hungarian Freedom Fighters

The Ukrainian National Information Sedrvice

The Illinois Division of the Ukrainian Congress Committee of America

The Ukrainian Human Rights Committee in Philadelphia

Americans for Human Rights in Ukraine, based in Newark

The Society of Veterans of Ukrainian Insurgent Army

The Organization for the Rebirth of Ukraine

The Chicago Chapter of American Friends of the Anti-Bolshevik Bloc of Nations, Inc. The Advisory Council for the Defense of

Human Rights in the USSR
The Czechoslovak National Council of

America
The American East European Ethnic Con-

ference, based in Springfield, Va.
The Congress of Russian Americans, Inc.,

Washington Chapter Free Cambodia, Inc.

The Federation of Cambodian Associa-

Cuba Independiente y Democratica

The National Association for Uniformed Services

In essence, Mr. President, the resolution calls for an additional \$44 million increase proposed by the administration, strongly supported by the President and the National Security Council, for consideration by the Senate at this time.

I have engaged in considerable discussion with my distinguished majority leader, Senator Baker, with Paul Laxalt, chairman of the Appropriations Committee, and the distinguished chairman of the subcommittee, Senator Weicker, on this matter.

I would be happy to yield at this time for Senator Weicker's comments.

Mr. WEICKER. Mr. President, I say to my good friend from Illinois, the distinguished Senator Percy, the chairman of the Foreign Relations Committee, that I am not negative toward what it is he is proposing. I had reservations insofar as it being brought in at the last moment not by the Senator but by the administration and requiring a rather large amount of money.

In order to accommodate the distinguished Senator, this would mean unbalancing some other figures that are already in place for other agencies of

Government.

I would hope we could get right to this on a supplemental in the next session of Congress. Senator Laxalt, who will be the new chairman of the State, Justice, Commerce Subcommittee, has assured prompt hearings on this matter, and I would hope the Senator would be good enough to withdraw his amendment at this time with the understanding that the matter will be raised early on in the forthcoming new session.

Mr. PERCY. I have discussed the matter with Judge Clark, the National Security Adviser to the President, and he was disappointed but understanding that unless this continuing resolution is adopted by midnight tonight the Federal Government ceases to operate. So many Senators have had urgent matters they have had to withhold because of the impossibility of handling them on this bill, and this is the problem that we face.

With the assurance that the distinguished Senator from Connecticut, who has indicated he is not out of sympathy at all with the objectives of it, will use his considerable influence and his considerable weight to see that we do have on as expedited a basis as possible action in this matter, I would certainly not wish to take the risk that we would delay this bill and the consideration of it by insisting upon action on this amendment at this time.

The urgency of this matter is high. This is a battle, it is a battle for the minds of people, and I know no better way than to do it through a strong international broadcasting operation. If we would just be tacking \$44 million on the military defense bill, you would hardly be able to find it. But here the impact is tremendous. The hope and encouragement it offers to Americans of ethnic origin is to indicate that we have not forgotten the fact that truth is the most powerful weapon we have, and truth must be gotten behind the Iron Curtain and elsewhere, into those countries that are deprived of the truth. The very fact that the Soviet Union spends more to blot out and blank out and jam our broadcasts than we do to make the broadcasts themselves is an important factor.

But I do take into account that this is a matter that if expedited early in the session I think we can take care of, and I appreciate very much the comments of my distinguished colleague.

Mr. WEICKER. I assure my distinguished colleague that he will receive

an early hearing.

Mr. HATFIELD. May I also thank the Senator from Illinois for raising the issue, and the Senator from Connecticut for working out these arrangements so that we can move ahead and certainly without prejudice we will be able to review this at a future date.

Mr. MOYNIHAN. Mr. President, will you allow me to express my appreciation to the Senator from Connecticut. This is a matter of great concern to the Senator from New York and his remarks are very heartening.

Mr. WEICKER. I thank the Sena-

Mr. PERCY. I want to join with my colleague and also express my deep appreciation to Senator Pell who, in his usual bipartisan sense, has cosponsored this amendment and has been a pillar of strength in this regard.

Mr. PELL. This amendment, which Senator Percy and I are sponsoring is a long overdue effort to upgrade the Voice of America and Radio Free Europe/Radio Liberty. The radios are key assets in the contest of ideas and as such are vital to our national security. It is pennywise and pound foolish to neglect the radios at a time of enormous buildup of our military strength.

This amendment, which is supported strongly by the administration, will enhance the ability of VOA and RFE/RL to be heard by replacing obsolete equipment—some of Radio Free Europe's broadcast equipment, for example, was captured from Germany in 1945—and by increasing the technical means to overcome Soviet bloc jamming. The amendment will also allow the radios the additional bureaus, staff, studios, and travel funds to provide high quality, firsthand coverage of important news stories around the world.

America's radios are competing in a world which has become keenly aware of the demands of the information age, and which is devoting increasing resources to the war of ideas. America's radios have no high-powered transmitters; they lag substantially in hours of broadcast and languages aired; they operate language services sometimes with half the number of personnel employed for the same amount of time by the BBC and other major services. It is past time to redress the balance—in our favor.

This amendment will complement another provision of the continuing resolution in enhancing the impact of American ideals. This provision, which is the result of efforts undertaken over the past Congress by Senator Weicker and myself, increases by \$20 million or more than one-third, the funding for exchange-of-persons programs. The administration has recognized that these programs are another cost-effective way of enhancing American influence and have endorsed this increase. At this juncture, I would like to acknowledge and commend the work of USIA Director Charles Z. Wick in persuading the administration to support the \$20 million increase.

The Voice of America, Radio Free Europe, Radio Liberty, and the exchange-of-persons programs have a vital national security role. It is commonsense that we should increase funding for these programs not only because they are so cost effective but also because they utilize our greatest strength—the vitality of America itself.

Mr. PERCY. I thank my distinguished colleague.

### UP AMENDMENT NO. 1497

(Purpose: To amend the Social Security Act to preclude the cut off of Medicaid funding to States which have incurred longfall expenditures in an effort to comply with the "pass along" provisions of Public Law 94-585, and for other purposes)

Mr. HATFIELD. Mr. President, the Senator from Alabama seeks recognition.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, I send to the desk an amendment on behalf of Senator Denton of which I am a cosponsor. This deals with a penalty which the administrative agency involved does not have authority to waive, but it resulted as a result of long-delayed regulations. It deals with SSI, and the SSI payments were to be paid on the basis of the preceding year or back in 1976.

They later changed the position by regulation. Three years later the State of Alabama was charged with a penalty. They did not have authority. The administrative agency supports it. Senator Denton has been working very diligently and hard on this, and I have been in a supportive role, and I move its adoption.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. Heflin), for himself and Mr. Denton, proposes an unprinted amendment numbered 1497.

Mr. HEFLIN. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the joint resolution add the following new section:

SEC. . Section 1618 of the Social Security Act is amended by adding the following new subsection: "(c) The Secretary shall not find that a State has failed to meet the requirements imposed by paragraph (4) of subsection (a) with respect to the levels of its supplementary payments for any portion of the period of July 1, 1980 through June 30, 1981, if the State's expenditures for such payments in that twelve-month period were not less than its expenditures for such payments for the period July 1, 1976 through June 30, 1977 (or, if the State made no supplementary payments in the period July 1, 1976 through June 30, 1977, the expenditures for the first twelve-month period extending from July 1 through June 30 in which the State made such payments)."

Mr. HATFIELD. The amendment is acceptable to me.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama.

The amendment (UP No. 1497) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

### UP AMENDMENT NO. 1498

(Purpose: To increase the appropriation for low income home energy assistance)

Mr. CHAFEE. Mr. President, on behalf of myself, Mr. MITCHELL, Mr. HEINZ, Mr. PERCY, Mr. COHEN, Mr. BRADLEY, Mr. PELL, Mr. TSONGAS, Mr. PACKWOOD, Mr. DURENBERGER, and Mr. WARNER, I send to the desk an unprinted amendment.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Rhode Island (Mr. Chafee), for himself and others, proposes an unprinted amendment numbered 1498.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title I insert the following new section:

SEC. . There is appropriated \$25,000,000 for carrying out title XXVI of the Omnibus Budget Reconciliation Act of 1981, relating to low income home energy assistance, which is in addition to amounts otherwise available for such title XXVI under this joint resolution.

Mr. CHAFEE. Mr. President, I also ask that Mr. Weicker be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, today I am offering an amendment to House Joint Resolution 631, the continuing resolution, to restore \$25 million for the low-income energy assistance program.

The Appropriations Committee has suggested funding this program at \$1.870 billion for fiscal year 1983, \$25

million below last year's level of \$1.875 billion.

The cost of essential home energy imposes a disproportionate burden on low- and fixed-income households. During the winter of 1978-79, the average direct residential energy expenditure by a poor household was 10.9 percent of disposal income; by 1980-81 this had risen to 13 percent. Under current law, estimates based on energy information administration data indicate that this percentage will rise to 15 percent.

These increases in energy and fuel costs have consistently and dramatically outpaced increases in the Consumer Price Index and various indexed benefit programs, and have caused severe suffering for many Americans. This is an intolerable situation. Now is not the time for the Federal Government to add to the burden of the low-income household by cutting back on its commitment to the energy assistance program.

Since 1978 the average electricity bill has increased by 65 percent, natural gas by 104 percent, and heating oil by 140 percent. This situation will most likely continue. Heating a home is not a luxury; it is a necessity, and an ever-increasing burden for many. For this reason, I urge my colleagues to join with me today in adopting this essential amendment, which merely restores outlays for fiscal year 1983 to the 1982 level. The Federal Government must maintain its commitment to low-income families which are experiencing inceasing difficulty in meeting today's high energy costs.

What this does, Mr. President, is to appropriate \$25 million for carrying out the low-income home energy assistance, and bringing it up to the 1982 level.

This has been cleared on both sides and it is acceptable.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island.

Mr. SCHMITT. Mr. President, I want to compliment the Senator from Rhode Island for his initiative. This will restore the appropriations for low-income energy assistance up to the authorized level, and no further increases would be possible without violating the rules of the Senate. The amendment is acceptable to me and to the minority.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island.

Mr. PROXMIRE. Mr. President, before we proceed we would like a 5-minute delay on it so that we can go over it. We have not seen it before.

Mr. HATFIELD. Mr. President, I ask unanimous consent that this amendment may be temporarily laid aside so that we may proceed to another amendment.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request that a previous amendment be laid aside? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I believe the Senator from New Jersey is seeking recognition.

### UP AMENDMENT NO. 1499

(Purpose: Redesignation of I-95)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. Brab-LEY) proposes an unprinted amendment numbered 1499.

Mr. BRADLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

### H.J. RES. 631

At the end of the bill add the following new section:

SEC. 138. (a) Notwithstanding the first sentence of section 103(e)(4) of title 23, U.S. Code, the Secretary of Transportation shall approve the withdrawal from the Interstate System the route of Interstate Route 95 and Interstate Route 695 from the intersection with Interstate Route 295 in Hopewell Township, Mercer County, New Jersey, to the proposed intersection with Interstate Route 287 in Franklin Township, Somerset County, New Jersey.

(b) Notwithstanding any other provision of law, the Secretary of Transportation is authorized and directed, pursuant to section 103 of such title, to designate as part of the Interstate Highway System the New Jersey Turnpike from Exit 10 to the interchange with the Pennsylvania Turnpike and the Pennsylvania Turnpike from such interchange to and including the proposed interchange with Interstate Route 95 in Bucks County, Pennsylvania.

(c) The Secretary of Transportation is further authorized and directed to designate Interstate Route 95 and assure through proper sign designations the orderly connection of Interstate Route 95 pursuant to this section.

Mr. BRADLEY. Mr. President, this would redesignate or withdraw from the Interstate System certain parts of Interstate 95 and designate the New Jersey Turnpike instead.

It has been approved on both sides, and I ask unanimous consent to adopt it.

Mr. HATFIELD. Mr. President, the Senator is correct. This is one which has already been acted upon on the previous vehicle, and it was cleared at that time, and we are clearing it now at this time and making it acceptable to us.

Mr. BRADLEY. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Jersey.

The amendment (UP No. 1499) was agreed to.

Mr. BRADLEY. This is offered on behalf of Senator Brady and myself. Mr. HATFIELD. Mr. President, I

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. The Senator from Alabama is seeking recognition.

### UP AMENDMENT NO. 1500

(Purpose: To provide for a wider navigation opening on the Warrior River at Franklin Ferry Bridge, Jefferson County, Ala.)

Mr. HEFLIN. Mr. President, I send to the desk an amendment which has been cleared on both sides.

The PRESIDING OFFICER. I believe that the question recurs on the Chaffe amendment.

Mr. HATFIELD. I ask unanimous consent, Mr. President, that we continue to lay that aside momentarily.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. Heflin) proposes an unprinted amendment numbered 1500.

Mr. HEFLIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, line 3, after colon add "Provided, further, That of such amount \$1,000,000 shall be available only to provide for a wider navigation opening at the Franklin Ferry Bridge, Jefferson County, Alabama."

Mr. HEFLIN. Mr. President, this amendment deals with a bridge where boats going in navigable portions are striking it and it needs to have a wider navigation. It has been cleared on both sides and I move that it be adopted.

Mr. HATFIELD. This is an amendment which, as chairman of the Water Resources Subcommittee of the Appropriations Committee, I have been familiar with. I talked to the subcommittee chairman on the House side about it as well as our minority and majority staff on our side, and it is acceptable to the committee. It has been cleared on both sides.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama.

The amendment (UP No. 1500) was agreed to.

Mr. HEFLIN. I move to reconsider the vote by which the amendment was agreed to. Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the Chafee amendment.

Mr. HATFIELD. Mr. President, I believe the Senator from California is seeking recognition.

The PRESIDING OFFICER. Is the Senator from Oregon asking that the Chafee amendment be temporarily laid aside?

Mr. HATFIELD. Mr. President, I ask unanimous consent that we temporarily lay aside the Chafee amendment to take up the Cranston amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from California.

### UP AMENDMENT NO. 1501

(Purpose: To express the sense of the Congress that the United States should maintain programs helping to provide disabled persons with opportunities for full, productive lives and protecting such persons from unfair discrimination and that disabled persons should receive fair treatment in the administration of disability benefits)

Mr. CRANSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from California (Mr. Cranston), for himself, Mr. Baucus, Mr. Cannon, Mr. Chapee, Mr. Chiles, Mr. DeConcint, Mr. Dood, Mr. Heinz, Mr. Inouye, Mr. Kennedy, Mr. Levin, Mr. Matsunaga, Mr. Metzenbaum, Mr. Mitchell, Mr. Moynihan, Mr. Pryor, Mr. Randolph, Mr. Riegle, Mr. Sarbanes, and Mr. Sasser proposes an unprinted amendment numbered 1501.

Mr. CRANSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution, add the following new section:

SEc. —. (a) The Congress finds that:

- (1) During the decade of the Seventies the Congress, with broad bipartisan support and in concert with Republican and Democratic administrations, established and improved programs to help handicapped Americans to become as productive and independent as possible and have the opportunities for participation in our society that should be each citizen's due.
- (2) These programs have made much progress toward ensuring that handicapped children receive free appropriate public education; toward making adequate vocational rehabilitation services available to meet the needs of handicapped persons; toward eliminating architectural and transportation barriers which exclude handicapped persons from many employment, educational, recreational, social, and other opportunities that other Americans enjoy and from full participation in our society's institutions; and

toward protecting handicapped persons from unfair discrimination.

(3) Various proposals have been made to repeal major laws establishing disability programs, to reduce substantially Federal funding for and certain benefits in such programs, and to weaken regulations implementing such laws.

(4) The social security disability insurance benefits of thousands of disabled persons have been precipitously terminated.

(5) These proposals and actions are particularly burdensome for handicapped persons already suffering hardship as a result of cutbacks in major health, nutrition, and social programs.

(b) In view of the findings in subsection
(a), it is the sense of the Congress that:
(1) Federal programs designed to ensure that disabled Americans are provided with the opportunities for the educational and rehabilitation services and the access to public facilities and services they need to achieve their full human potential and live as independently and productively as possible should be maintained and funded at not less than current programmatic levels and should be enhanced where cost-effective restoration, growth, or expansion would be achieved.

(2) Changes in permanent regulations implementing Federal laws relating to the education and civil rights of handicapped individuals should be limited to changes that are necessary to conform to authoritative judicial decisions interpreting those laws and to improve program efficiency and effectiveness without diluting the individual rights and protections provided under cur-

rent regulations.

(3) The reviews of the continued eligibility of disabled recipients of social security disability insurance benefits should be conducted in a manner ensuring that each recipient is apprised of the nature and pur-pose of the review; that determinations of ineligibility do not occur as the result of erroneous interpretations of law or of failures to give full and fair consideration to all pertinent evidence, including the recipient's medical history and evidence available from the treating physician or other licensed practitioner; and that mentally impaired recipients are provided the assistance needed to respond to the administrative requirements of such reviews and to exercise their rights in connection therewith.

(4) The level of veterans' disability compensation benefits for service-connected conditions should be maintained.

Mr. CRANSTON. Mr. President, this amendment would express the sense of the Congress that the Federal Government should maintain effective programs to assist in providing disabled persons with maximum opportunities for fuller, more productive and independent lives.

The time has come, Mr. President, when it is essential for the Congress to assert clearly and forcefully that it stands behind Federal programs that offer handicapped individuals opportunities to overcome or minimize their disabilities and provide the means of subsistence to those who need it. This amendment would make that muchneeded statement.

Mr. President, I want to emphasize at the outset that the preservation of these programs is not a partisan issue. In fact, broad bipartisan support in Congress during Republican and Democratic administrations brought about major advances in these programs during the 1970's to provide disabled persons with the assistance and opportunities they need to participate more fully in our society and to become as productive and self-sufficient as possible.

Moreover, many leaders on both sides of the aisle in both Houses of Congress have worked hard throughout this, the 97th, Congress to preserve programs for handicapped persons and to insure that these individuals receive fair treatment under them.

Nevertheless, the need for this amendment has arisen because the number and range of proposals and resulting actions in the past 2 years to eliminate or reduce these programs have created hardship for many disabled persons and caused deep concern among all those interested in assuring fair treatment for handicapped Americans.

In a November 24, 1982, letter that I sent to each of my colleagues in the Senate, I outlined some of the major causes of concern. They are as follows:

First, proposals have been made by the administration to block-grant programs under the Education for All Handicapped Children Act of 1975; to reduce appropriations for the three major education programs for handicapped children by 30 percent in fiscal year 1983; and to weaken substantially the regulations implementing the 1975 law. These proposals have alarmed the parents of handicapped children and others concerned for the welfare of these children. Fortunately, the Administration, faced with a storm of protest, has withdrawn the most objectionable parts of these regulations. But it is continuing to consider extensive revisions, and the continuing uncertainty and insecurity they created have been enor-

Second, proposals have been made by the administration to block-grant the Federal-State vocational rehabilitation program and independent living services program under the rehabilitation act of 1973 and to reduce appropriations for rehabilitation programs by about one-third in fiscal year 1983. Vocational rehabilitation programs are proven cost-effective means of enabling disabled persons to become productive citizens. The efforts to reduce these programs are shortsighted and ill-advised.

Third, the social security beneficiary rehabilitation programs have been virtually eliminated. Under these programs, State vocational rehabilitation agencies received \$124 million in fiscal year 1981 and only \$3.5 million in fiscal year 1982 for the rehabilitation of disabled social security act benefici-

Fourth, proposals have been made by the administration to repeal the Developmental Disabilities Assistance and Bill of Rights Act and to reduce funding for developmental disabilities services and advocacy by more than one-third in fiscal year 1983.

Fifth, proposals have been made by the administration to eliminate the Architectural and Transportation Barriers Compliance Board; to rescind the minimum guidelines and requirements that the Board had adopted for public building accessibility; and to dilute these guidelines and requirements.

Sixth, the administration prematurely mounted a massive review of the eligibility of disabled persons for social security disability benefits that has resulted in overworked State agencies conducting unfair, inadequate reviews. In assessing this tragic ongoing situation, the Senate Governmental Affairs Subcommittee on Oversight of Government Management concluded that benefits had been terminated "for thousands of severely disabled persons who deserve to remain in the program."

Seventh, proposals have been under consideration in the executive branch to weaken basic Government-wide regulations for implementing section 504 of the Rehabilitation Act. This is the "civil rights charter" for handicapped Americans. It prohibits discrimination against qualified handicapped persons in Federal and federally assisted programs. Regulations are essential for its implementation and the current regulations are, I believe, fair and balanced. They are not in need of a major overhaul.

Eighth, in July 1981 the Department of Transportation adopted an interim rule-replacing its section 504 regulations-regarding transportation for handicapped persons. This 17-month-old "interim rule" provides no assurance of continuing progress toward the provision of adequate, accessible transit services for handicapped persons.

Ninth, proposals have been made by the administration to reduce certain veterans' service-connected disability compensation benefits by more than \$400 million in fiscal vear 1984.

Tenth, the administration proposed to eliminate both the National Institute of Handicapped Research and the Federal Government's Interagency Committee on Handicapped Research. These proposals have come at a time when research offers the best promise for helping handicapped persons to overcome their disabilities. They have come at a time when Federal leadership and coordination are greatly needed to insure that we capitalize—for the benefit of all disabled Americans-on the great scientific advances that are now possible in a number of areas of research.

Eleventh, the suffering, because of their particular vulnerability, of handicapped persons from cutbacks in a wide range of social programs, such as health care, housing, nutrition, and social and legal services is also a major cause of concern.

Mr. President, many handicapped Americans have suffered from these broad, wide-ranging attacks on essential programs. Many more are now very deeply concerned that the next set of regulations and the next budget submissions will mean more hardship, more lost opportunities. This is not what the American people want for these most vulnerable citizens.

I believe that the people of this great Nation are both wise and compassionate. They do not want to sacrifice the well-being of the most vulnerable among us for short-term budget gains. I am convinced that they want cost-effective education, rehabilita-tion, and other programs that lead to independence and productivity. They do not want to throw away those programs and thus create a waste of talent and energy, needless dependence, and unnecessary expenditures to cope with that dependence.

They want us to improve those programs and make them more efficient.

I am also sure that the American people want those who can work to be removed from the disability rolls. But the American sense of fair plan dictates both that there be assurance that any review of those rolls be conducted fairly and that disabled persons be given meaningful opportunities to be rehabilitated.

Mr. President, I say to all of my colleagues: let us open our eyes wide to what has been happening. Let us start again to do what we all know truly reflects the attitude of the American people toward their fellow citizens who have met with such tragedy.

I urge all of my colleagues—on both sides of the aisle—to support this amendment and, by its adoption and subsequent enactment, send a message of hope to those who are despairing—as well as a message, to those who would attempt to erode disability programs, of strong congressional resolve to defeat such efforts.

There is no expenditures involved of any sort. I understand it is cleared on

both sides of the aisle.

Mr. SCHMITT. Mr. President, I think it is very clear that not only is it the sense of the Senate but the sense of the country to maintain assistance for those people who are unable to care for themselves, either temporari-

ly or permanently.

I do not believe that the Senator from California in any way means to imply that the Senate, particularly the subcommittee that I chair and on which Senator Proxmire is the ranking committee member, or the full Appropriations Committee, has been negligent in their duties, at least to the extent authorized with respect to the programs directed specifically at the assistance to the handicapped.

We have tried, with the assistance of Senator Weicker and many others of great concern with these programs, to fund them at the highest levels that are possible and is a priority that really has exceeded priorities in many other very important areas.

Mr. CRANSTON. Mr. President, I concur. As I said in my statement, it is not a partisan issue. Broad bipartisan support in Congress during Republican and Democratic administrations brought about major advances in these programs. Many leaders on both sides of the aisle and both Houses of Congress have worked hard throughout this, the 97th Congress, to preserve programs for handicapped persons and to insure that these individuals receive fair treatment under them.

Mr. HATFIELD. Mr. President, this is a matter again that has been cleared on both sides of the aisle. It is acceptable to the committee.

Mr. HEINZ. I rise in support of the Cranston amendment, I urge support of this resolution, congressional support of programs for handicapped persons, not only because of my personal commitment to these programs, but also because of my own knowledge of how children and adults with disabilities have benefited. Less than 10 years ago a severely disabled child was often denied the right to attend school. Today, excluding these children is against the law.

People with disabilities—and there are over 30 million such persons in our country—have made major gains in the last decade. These gains have ranged from securing the right to an education to better vocational rehabilitation services; from being able to live in a community setting rather than an institution; from being barred from public buildings, to being able to participate in public life. Most of these major gains have one fundamental common denominator—the central and crucial role of Federal programs and services.

Central to the gains persons with disabilities have made in the last decade is the notion that the person with a disability is always a potentially contributing member of our society; that too often our system has fostered dependency and with dependency came the status of second-class citizenship, and often the denial of basic human rights.

The movement to secure equal treatment for persons with a disability did not originate with the Congress; the movement to increase independence and to enable disabled persons to contribute to society did not originate in the Oval Office. This dual movement to secure equal citizenship and social productivity originated with persons with disabilities themselves and their families and friends.

The example of their struggle prompted Members on both sides of the aisle, Republican and Democrat, to promote key legislation during the 1970's, legislation that literally made a major difference to millions of persons with disabilities.

We have a long way to go to help fulfill the aspirations of one of America's largest minority groups, yet in the last 2 years we have witnessed an attempt to reduce these appropriations and indeed to undercut these programs in significant ways. Some of this has already been accomplished. Across the land people with disabilities are viewing these actions as an assault on important gains won over the years. The administration's attempts to deregulate and strip away important provisions of special education and the section 504 regulations can be seen as fundamentally inconsistent with the promotion of independence and self-help.

The time has come for the Congress to reaffirm once again its historical commitment in this area. Most of my colleagues have continually supported cost effective and progressive legislation on behalf of disabled persons. To retreat now from our historic achievements would cost the taxpayers of this country increased dollars for increased dependency. Worse still, a retreat from our commitment will mean a return to second-class citizenship which we cannot afford, neither fiscally nor morally.

Mr. SASSER. Mr. President, during consideration of unprinted amendment 1500 proposed by Senator Cranston, to express the sense of the Congress that the United States should maintain effective programs to assist in providing disabled persons with opportunities for full, productive lives, the text of my remarks in support of the amendment was inadvertently omitted from the proceedings.

I ask unanimous consent that my remarks appear at an appropriate place in today's proceedings, and in an appropriate place accompanying the proceedings of UP 1500 in the permanent edition of the Congressional Record.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I rise in support of the amendment now being offered by my distinguished colleague, Senator Cranston, which "express[es] the sense of the Congress that the United States should maintain effective programs to assist in providing disabled persons with opportunities for full, productive lives and to protect such persons from unfair discrimination in Federal and Federally assisted programs and activities and that disabled persons should receive fair treatment in the administration of disability benefits."

Over the past 2 years, a number of proposals and subsequent actions have threatened to terminate or substantially cut back programs created to provide disabled individuals with the opportunities they need to enter the mainstream of society. The programs threatened with significant cuts or discontinuation include: the Education for Handicapped Children Act: vocational rehabilitation and independent living services; section 504 of the Rehabilitation Act of 1973; social security disability insurance benefits; the Architectural and Transportation Barriers Compliance Board; the National Institute for Handicapped Research; and compensation benefits for servicedisabled veterans.

I am deeply concerned about any actions which dilute the protections currently available to our disabled citizens. There has been tremendous progress in recent years in removing various physical and social barriers. These efforts have dramatically im-

proved the quality of life for thousands of disabled individuals. Access to privileges which many take for granted are available largely because of Government efforts in this area. We must now stand behind these programs which offer disabled individuals opportunities to overcome or minimize their disabilities and live fuller, more productive, self-sufficient lives in our communities and that provide subsistance-level support for those who have no other means of existence.

I urge my fellow Senators to join me in supporting this amendment to dispel the anxiety and hardship which the reductions and proposed eliminations in programs have already created

for our disabled citizens.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California (Mr. CRANSTON).

The amendment (UP No. 1501) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that

motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1498

The PRESIDING OFFICER. The question recurs on the Chafee amend-

Mr. CHAFEE. Mr. President, I move the adoption of my amendment

The PRESIDING OFFICER. question is on agreeing to the amendment numbered 1498 of the Senator from Rhode Island (Mr. CHAFEE)

The amendment (UP No. 1498) was

agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that

motion on the table.

The motion to lay on the table was agreed to.

Mr. CHAFEE. Mr. President, I wish to thank the distinguished chairman and the ranking member.

UP AMENDMENT NO. 1502

Mr. HATFIELD. Mr. President, on behalf of Senator Kasten, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The

clerk will report.

The bill clerk read as follows:

The Senator from Oregon (Mr. HATFIELD), on behalf of the Senator from Wisconsin (Mr. KASTEN), proposes an unprinted amendment numbered 1502.

Mr. HATFIELD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in title I, add the following new section:

. Notwithstanding any other provision of law or this joint resolution, none of the funds provided for "International Orgaand Programs" under section nizations 101(b) of this joint resolution shall be available for the United States' proportionate share for any programs for the Palestine Liberation Organization, the Southwest Africa Peoples Organization, or Cuba.

Mr. HATFIELD. Mr. President, this is a matter which has been carried in the fiscal appropriations bill every year since 1979. It is a restriction that relates to funding provided under the international organizations and programs account and simply prohibits any U.S. proportionate share for any programs funded under that account from being available for the programs for the Palestinian Liberation Organization, the Southwest Africa People's Organization, or Cuba.

This has been the language in all of our bills and it was an oversight that it was not included in this one. So, on behalf of Senator Kasten, who is the chairman of our Subcommittee on Foreign Operations, I offer it at this

Senator Inouye, as the ranking minority member of that subcommittee. has cleared it and we have heard from a number of Senators about this in support of it, including Senator Pres-SLER and Senator GARN. So it is acceptable to the committee and I would move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from

Oregon (Mr. HATFIELD)

The amendment (UP No. 1502) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. QUAYLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to

Mr. HATFIELD. Mr. President, Senator Packwood and Senator Kasten and Senator Percy are on my list at this moment, but they are not present on the floor. I would at this time yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

UP AMENDMENT NO. 1503

(Purpose: To reduce the appropriation for salaries and pay of certain officers and employees of the legislative branch by 10 percent)

Mr. MOYNIHAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from New York (Mr. Moynihan) proposes an unprinted amendment numbered 1503.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that further

reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the joint resolution insert the following:

SEC. . For the purposes of section 101(e) of Public Law 97-276, the amounts specified in Title I of S. 2939, entitled the Legislative Branch Appropriation Act, 1983, as reported September 22, 1982, for-

(1) compensation of officers, employees, clerks to Senators, and others as authorized

by law;

(2) salaries of the Majority Policy Committee and the Minority Policy Committee; (3) salaries in House leadership offices;

(4) compensation of officers and employees of the House of Representatives;

(5) professional and clerical employees of standing committees of the House of Representative, including the Committee on Appropriations and the Committee on the

(6) staff employed by each Member of the House of Representatives in the discharge of his official and representative duties;

(7) salaries of the Joint Economic Committee;

(8) salaries of the Joint Committee on Printing; and

(9) salaries of the Joint Committee on Taxation, are each reduced by 10 percent.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I am happy to

Mr. HATFIELD. Mr. President, at this time, on behalf of the Senator from New York, I ask unanimous consent that there be a 10-minute time limitation, with no amendments in the second degree, to be equally divided, on the amendment of the Senator from New York.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I certainly do not intend to, would the Senator from New York give us one line of what this amendment does?

Mr. MOYNIHAN. It is a 10-percent cut in the budget for the staff of the U.S. Congress.

Mr. METZENBAUM. That is noncontroversial.

Mr. HATFIELD. Did the Chair rule on my request?

The PRESIDING OFFICER. there objection to the request of the

Senator from Oregon? Mr. PROXMIRE. Mr. President, will the Senator repeat the substance of his amendment?

Mr. MOYNIHAN. It is a proposal to reduce expenditures for the staff of the Congress by 10 percent.

Mr. PROXMIRE. No objection. Is there a limitation on second-degree

amendments? Mr. MOYNIHAN. Yes; there is.

The PRESIDING OFFICER. there objection? Without objection, it is so ordered.

Who yields time?

Mr. MOYNIHAN. Mr. President, I yield myself 4 minutes.

Mr. President, I am raising a matter which has been a concern of mine from the first days I came to the Senate, which is simply the phenomenal and continuing growth of the congressional bureaucracy. We find the size of the respective staffs of the House and the Senate and the various joint, special, and select committees steadily growing, and simultaneously we find our capacity to get our work done is steadily diminishing. This is no better demonstrated than by the fact that we are here at 10 minutes after 10 a.m. in the second day of debate on the pending resolution. We have been here almost 30 hours on this floor on this legislation.

The problem with our staff, ironically, is that it is of such high quality that it keeps thinking of more complex, more difficult, and more time-consuming matters for us to address. If it were a staff of less competence or less initiative it would have less of an entropic effect upon our proceedings.

The reason for this development, Mr. President, is not difficult to identify. What we are witnessing is a clear demonstration of the rule that "organizations in conflict become like one another."

The White House had no staff until 1935. The Congress had none until 1945. The Supreme Court, for practical purposes, did not have any until 1955. But as each has acquired staff, so the others have felt that they must do so as well, in order to remain coequal in power and influence. The President presides over his staff, we preside over our staff, and the staffs of the Supreme Court Justices talk to newspapermen.

Mr. President, in a very short number of years from a total of 590 persons employed directly by Senators just after the war, we have today reached 3,600. Including the staff of the committees and leadership, there are 60 staff members per Senator. We have, in consequence, become executives of small enterprises rather than colleagues.

Yet, Mr. President, I put it to you that the size of the staffs of the U.S. Senate and the House has increased beyond the point where they enable us to compete on equal terms with the other two branches of Government. It ought to be reduced. My proposal would reduce by 10 percent the outlays for staff in fiscal year 1983.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point an article to this effect by Mr. James Reston of the New York Times.

There being no objection, the article was ordered to be printed in the Record, as follows:

A Bonus for Congress (By James Reston)

Washington, Dec. 14.—Even at Christmastime, with about 12 million Americans un-

employed and a Federal budget deficit of over \$100 billion, it's hard to imagine that senators and representatives, now making \$60,622.50 a year, should vote themselves a \$17,000 raise.

But they should. For, leaving aside the increasing number of millionaires in the House and Senate, many of the rest of them, no fooling are among "the truly needy" who require a "safety net" to avoid being led into bankruptcy or temptation.

Even a financial delinquent, with the help of a calculator, can figure out their problem. They have to pay income tax on that \$60,000 paycheck, which takes about a third of it, and they have other obligations.

Many of them have spouses, who are the unpaid Federal servants. They even have children, who at best are not inexpensive. They have to maintain houses in their states or be condemned by their opponents in the next election for not even living among the voters.

Meanwhile, they have to provide a pad where their families can eat and sleep in Washington, where the cost of living, and even of dying, is not easy. Put all this in your own calculator, and see how far \$60,000 goes, even when you send the kids to public school. Most congressmen look fairly healthy and even fancy on TV, but most of them are in middle age, caught in the middle between their rebellious children and their aging parents.

OK. Obviously, this is a hard argument to make to the unemployed in Detroit or Peoria, or even to officials of the Treasury, who are now running out of scratch. So is there a way to meet the serious financial plight of many of the people who make the laws of the nation, without adding to the staggering national debt?

I think there is. The present cost of running Congress is not due primarily to the increase in salaries for senators and representatives, but to the startling increase in the numbers and salaries of their staffs.

For example, the total Congressional staff in 1960 was about 7,000 at a cost of \$135 million. Today it is a little over 19,000, costing \$1.2 billion, not counting a little financial comfort and service on the side.

Representatives get \$360,000 a year for staff assistants, to be distributed as they like. Senators from the smaller states have a staff budget of \$650,000 a year, and from the larger states \$1.3 million. So while the pay of senators and representatives has almost tripled from \$22,500 in 1960 to \$60,000 today, the inflation in the Congressional budget has gone mainly to this explosion of the legislative bureaucracy.

Accordingly, eliminating a middle-level assistant or two in any Congressional staff could more than make up for the \$17,000 proposed raise in Congressional salaries, and a solid argument could be made that somewhat smaller Congressional and executive staffs might improve the efficiency of both branches of Government.

The reason for increasing Congressional staffs over the last generation was clear enough. As budgets became larger and more complicated, the executive branch hired more experts and introduced more computers. So the legislative branch, to keep up, insisted on more staff and more computers of its own.

There was clearly a need for additional staff and space on Capitol Hill, but it has gotten out of hand, and the cost may not even be the most important aspect of the problem. For in many cases these Congressional and Cabinet staffs, like the profes-

sional bureaucracy in the executive branch downtown, don't merely assist the senators, representatives and Cabinet officers, but tend to replace them. They tell many of them what to say. They write their speeches and Op-Ed page articles, and sit by their side, suggesting what their questions and their answers should be in Congressional committees.

No doubt all this performs a useful service, and the better congressmen and Cabinet officers keep these aides on tap rather than on top; but there is a danger that this professional bureaucracy could become an anonymous and unelected fifth estate of our democracy.

These staff assistants, or at least many of them, are writing the policy positions of many of the powerful people in the legislature and the Cabinet, and most of the time we don't even know who they are. Unlike Cabinet members, they were merely appointed, never had to be examined or confirmed, and serve at the pleasure and work for the political advantage and success of their masters.

Accordingly, it might not be a national disaster if one or two of them were dismissed in each Congressional office, and the boss added their salary to his own, and had to do a little more work to speak for himself. No doubt it would add to the unemployment problem, but not much, and it wouldn't add a penny to the national deficit.

Mr. MOYNIHAN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.
The PRESIDING OFFICER. Who yields time?

Mr. WEICKER addressed the Chair. The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I rise to oppose the amendment of the distinguished Senator from New York. The fact is that much of the cutting that has been done by this and other administrations has been achieved because of the predominance of staff in sofar as the executive branch of Government is concerned relative to the resources of the legislative branch.

I do not think at this time, if indeed the Senator wants to assist those of no means or impoverished means, that this particularly achieves their end.

I do not intend to get into a long debate on the matter, but it has been this Senator's observation that, if anything, in the legislative branch of Government, both in terms of Senators personal staff, which serves their particular constituency, and those staffs that are on committees in the U.S. Senate, they are undermanned. Indeed, at this time, I think such a move would be counterproductive in terms of the oversight job, which is our responsibility.

I have found that that has been sorely lacking so far as the Congress is concerned, both on the House and the Senate side.

I say to my good friend from New York there is no reason why each Senator cannot, in effect, put into being the amendment of the Senator from New York. Every Senator here can cut his staff 10 percent, 15 percent, 20 percent, and return the money. There is nothing stopping any of us from doing that. I would suggest this is possibly better done on a State-by-State basis rather than engage in a generalization which I think could clearly damage the oversight capacities of this body.

The PRESIDING OFFICER. Who

vields time?

Mr. EXON addressed the Chair. Mr. WEICKER. I am glad to yield a couple of minutes to the Senator.

Mr. EXON. Will the Senator from New York yield for a question?

Mr. MOYNIHAN. I do, but I do not know how much time I have left.

Mr. EXON. As I understand, there would be a reduction in the total amount of moneys appropriated for all of the Senate staff and the numbers of individuals thereon?

Mr. MOYNIHAN. Exactly.

Mr. EXON. I thank the Senator from New York.

The PRESIDING OFFICER. Who

yields time?

Mr. MOYNIHAN. Mr. President, I would take such remaining seconds as I may have. Accepting the good faith of the remarks of the Senator from Connecticut, as I always do, it is simply not in the dynamics of an organization to forgo a staff when others do not. This is true even as between different committees in the Senate, and between different Senators who inevitably feel obliged to match the resources of their rivals and colleagues. If we are going to cut staffs at all, this is something we ought to do together in the appropriation process. This is our opportunity.

I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Connecticut yield back the remainder of his time?

Mr. WEICKER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The

clerk will call the roll. The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. I yield back the re-

mainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from New York. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER), the Senator from Kansas (Mrs. Kassebaum), and the Senator from Maryland (Mr. Mathias) are necessarily absent.

I also announce that the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Utah (Mr. HATCH) are absent due to illness.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Tennessee (Mr. SASSER) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 25, nays 68, as follows:

[Rollcall Vote No. 433 Leg.]

# NOT VOTING-7

Durenberger	Hatch	Sasser
Glenn	Kassebaum	
Goldwater	Mathias	

So Mr. Moynihan's amendment (UP No. 1503) was rejected.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table. The motion to lay on the table was

ORDER OF PROCEDURE

agreed to.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, let me update the situation as it now stands.

We have completed about 17 of the so-called short amendments that have been noncontroversial without the necessity for a rollcall. We have about 30-some amendments left. These now are getting to the place where we will expect rollcalls on at least a major number of them if they are all offered.

We have about three or four more of the brief kind that will take about 30 seconds to a minute each, and they have been cleared by both sides of the aisle

That is the way we have been working on them. If they once get cleared by the staff on both sides, then we take them up and we have been grinding them out.

Let me also say that I will ask for a rollcall vote on the final conference report. So I think it is well to put the Senate on notice that once this is acted upon here by this body, the conferees will expedite the handling of the conference as quickly as possible, but we will ask for a rollcall vote on final passage of the conference report.

I think a bill of this magnitude requires such, but I also want all of our colleagues to stay here also, since I have to stay here.

So I like their company so much, having been with them all night, I could not stand the thought of losing contact during the final moments of this bill.

We are making progress, but I must say I will have to advance my target time of noon today a few hours and indicate we are going to press on and complete this entire report sometime today or later if necessary in order to get to conference as quickly thereafter as possible.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. HATFIELD. Mr. President, I yield to the majority leader.

Mr. BAKER. Mr. President, as much as I know everyone hates to get off the continuing resolution, for a minute I have a matter that has to be taken care of. It has been cleared on both sides. It involves a resolution which the Senate should adopt in the opinion of the joint leadership and of the Senate counsel in respect to a subpena for testimony of Senator LARRY PRESSLER in a case in the district court.

Mr. President, I ask unanimous consent that the pending measure be temporarily laid aside so that we may proceed to the consideration of this resolution, and upon its disposition that we immediately return to the consideration of the continuing resolution and that the total time allocated to this will not be more than 1 minute equally divided following the usual form.

PRESIDING OFFICER. there objection to the request of the Senator from Tennessee.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not object, does majority leader include in that that there be no amendment?

Mr. BAKER. Yes. No amendments will be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR THE TESTIMO-NY OF SENATOR LARRY PRES-SLER

BAKER. Mr. President, Mr. behalf of myself and the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD) I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows: A resolution (S. Res. 520) to authorize the testimony of Senator Larry Pressler and representation by the Senate Legal Counsel in the case of United States of America v. Joseph Silvestri, Cr. No. 80-00291 (S).

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the resolution be dispensed

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there objection to the present consideration of the resolution?

There being no objection, the Senate preeeded to consider the resolution.

Mr. BAKER. Mr. President, Senator LARRY PRESSLER has been served with a subpena to testify in the case of United States of America against Joseph Silvestri, which is being tried in the U.S. District Court for the Eastern District of New York. The subpena was issued on behalf of Mr. Silvestri, who is the last of the Abscam defendants to be tried.

Earlier today the Senate Select Committee to Study Law Enforcement Undercover Activities of Components of the Department of Justice announced its findings. The select committee confirmed the well established fact of Senator Pressler's complete innocence. Senator Pressler's actions have also received the commendation of the judicial branch. As Judge C. George Pratt, who is now a U.S. Circuit judge, noted in an earlier Abscam opinion:

[Senator] PRESSLER, particularly, acted as citizens have a right to expect their elected representatives to act. He showed a clear awareness of the line between proper and improper conduct, and despite his confessed need for campaign money, and despite the additional attractiveness to him of the payment offered, he nevertheless refused to cross into impropriety. United States v. Myers, 527 F. Supp. 1206, 1226 (E.D.N.Y. 1981).

Senator Pressler has had to endure an unfair burden as a result of Abscam. The subpena is a continuation of that burden. It is a further result of the questionable decision to authorize a staged bribe meeting with him although there never was any ground for suspecting any impropriety by the Senator. For this reason, we believe that it is proper for the Senate to provide legal counsel to Senator Pres-SLER with respect to the subpena.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

### S. RES. 520

Whereas, in the case of United States of America v. Joseph Silvestri, Cr. No. 80-00291 (S), pending in the United States District Court for the Eastern District of New York. the defendant has issued a subpoena for the attendance and testimony of Senator Larry Pressler.

Whereas, by Rule VI of the Standing Rules of the Senate, no Senator shall absent himself from the service of the Senate with-

Whereas, Title VII of the Ethics in Government Act of 1978, Public Law 95-521 establishes the Office of Senate Legal Counsel and provides that the Senate may direct its Counsel to represent the Senate, its committees, Members, officers, or employees; Now, therefore be it

Resolved, That Senator Larry Pressler is authorized to testify in the case of United States of America v. Joseph Silvestri, Cr. No. 80-00291(S), except when the Senate is in session.

SEC. 2. That the Senate Legal Counsel is directed to represent Senator Larry Pressler in connection with the subpoena for his testimony in the case of United States of America v. Joseph Silvestri, Cr. No. 80-00291(S).

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## FURTHER CONTINUING APPROPRIATIONS, 1983

The Senate resumed consideration of the joint resolution.

Mr. WEICKER. Mr. President, have we returned to the pending business as of this moment?

The PRESIDING OFFICER. The Senator is correct.

Mr. RANDOLPH. Mr. President, will my colleague yield to me?

Mr. WEICKER. Mr. President, I wonder if my good friend from West Virginia would just forbear for a moment.

Mr. President, there are three small amendments, all of which have been agreed to on both sides and it will take no longer than a few seconds each. I wish to dispense with those and then move immediately to a major amendment by the Senator from New Mexico, Senator Domenici. That is the intention of the managers of the bill.

Mr. BUMPERS. Mr. President, will the Senator yield?

MR. WEICKER. I yield.

Mr. BUMPERS. I have an amendment here which I could not clear with everyone but the principal person cleared with is Senator McClure, the chairman of the Energy Committee. I do not think it will take over 30 sec-

The resolution (S. Res. 520) was onds. It is already in the Interior bill. I just want to put it on this bill.

Mr. WEICKER. I wonder if it would facilitate the passage of all these noncontroversial amendments, and the committee is anxious to do that, if when a Senator has a matter which has been cleared and agreed to, if he would give a copy to staffs, both minority and majority staffs, and then get rid of this in rapid order fashion.

Mr. NUNN. Mr. President, will the Senator use his mike? I cannot hear him.

Mr. WEICKER. I cannot agree to it unless the matter is in the hands of staff. I would appreciate it if Senators who have that type of amendment would bring it to both the minority and majority managers of the bill.

I now yield to the Senator from Oregon.

### UP AMENDMENT NO. 1504

(Purpose: To make amendment with respect to the transportation of crushed glass)

Mr. PACKWOOD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Oregon (Mr. Pack-WOOD), for himself and Mr. HEFLIN, proposes an unprinted amendment numbered 1504

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of House Joint Resolution 631, add the following:

# "TRANSPORTATION OF BROKEN GLASS

. Section 10526(a) of title 49, "SEC. United States Code, is amended—
"(1) by striking 'or' at the end of para-

graph (12);

"(2) by striking the period at the end of paragraph (13), and inserting in lieu thereof ; or'; and

"(3) by adding at the end thereof the following:

"'(14) transportation of broken, crushed, or powdered glass.'.

Mr. PACKWOOD. Mr. President, this amendment deals with the transportation of crushed glass. It has been cleared on both sides of the aisle. It deregulates the transportation. Both shippers and truckers agree with it. We passed it in the Senate before in the Highway Act. It was stripped out in the conference when the entire act fell apart because of jurisdictional problems in the House of Representatives.

There was no objection then, and I know of no objection now.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon.

The amendment (UP No. 1504) was agreed to.

UP AMENDMENT NO. 1505

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes unprinted amendment numbered

Mr. KASTEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert

the following new section:

"Sec. . Notwithstanding any other provision of law the provisions of section 10, 11(b), 18, 20, and 21 of the Federal Trade Commission Improvements Act of 1980 (Public Law 96-252; 94 Stat. 374) are hereby extended until September 30, 1983 notwithstanding subsections 10(e) and 21(i) of such

Mr. KASTEN. Mr. President, on September 22, when the Appropriations Committee considered S. 2956, the State, Justice, Commerce appropriations bill, I offered and the committee accepted, an amendment designed to extend the effectiveness of certain expiring provisions of the Federal Trade Commission Improvements Act of 1980.

These provisions place certain limitations on the FTC's authority with respect to paying public intervenor funding, commercial advertising. trademarks, agricultural cooperatives. and legislative veto procedures.

These limitations were scheduled to expire on September 30, 1982. By reference to S. 2956 however, the continuing resolution extended those limitations to December 17. They must be extended again, however, in order to maintain the status quo while new FTC authorization legislation is being

The amendment I am offering today extends these limitations.

I emphasize to the Senate that my amendment extends current law, maintaining the status quo. We are extending the current law with the recognition that Court is now considering this issue. This amendment does not necessarily indicate the Senate's position on this issue. Indeed, many Members who oppose the legislative veto have ageed to this amendment only as a means of maintaining the status quo.

I understand that the subcommittee chairman is ready to accept this amendment, and I understand it has been cleared with the Democratic side as well. So I hope the Senate will adopt this extension of existing law.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

agreed to.

UP AMENDMENT NO. 1506

(Purpose: Prohibiting planning for or construction of any Senate office buildings after the Hart Senate Office Building)

Mr. PROXMIRE. Mr. President, send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Wisconsin (Mr. Prox-MIRE) proposes an unprinted amendment numbered 1506.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Sec. 153. None of the funds appropriated in this Joint Resolution or Public Law 97-276 shall be used for the development, initiation, or implementation of plans, drawings, architectural engineering work, design work, site preparation or acquisition for, or the construction of, any new Senate office buildings or additions to existing Senate office buildings. This provision does not apply to planning, construction, or completion for the Philip A. Hart Senate Office Building.

Mr. PROXMIRE. Mr. President, the amendment that I am offering today is neither new nor complicated. It is part of one that I offered in full committee markup of the legislative appropriation bill earlier this fall. Perhaps more importantly, it is part of one that passed the Senate on September 24, 1981, as part of last year's continuing resolution, by an overwhelming 76 to 15 vote.

My amendment to House Joint Resolution 631 would do the following: Impose a prohibition on the use of any legislative branch appropriations for fiscal 1983 for the development of plans, design work, or construction of any new Senate office building after the Hart Building is completed.

I understand the Architect of the Capitol has no difficulty with this amendment. It has been cleared with the Legislative Subcommittee, and I understand there may be concern about existing work at the Immigration Building. It is not my intent to affect that work, and I understand that is the only reservation the Legislative Subcommittee has had or the Architect has had.

Mr. President, my amendment would prohibit any startup work or planning for any proposed new Senate office building after the Hart Building is completed. And, believe me, if staff continues to grow unchecked, the Architect will be licking his chops at the prospect of another Senate office building. In fact, contingency plans for a fourth Senate office building complex across from the Russell Senate Office Building have already been

The amendment (UP No. 1505) was published in the Architect's master plan document. The point is simple. There is a direct correlation between the growth of staff and the need for more Senate office buildings. My amendment will address this problem directly.

Mr. President, as Senators and staffs begin to pack up their materials and move into the new Hart Building, all of us should pause and reflect on why that marble palace was built in the first place. It is simple. It was built to house Members and the growing number of staff who have spilled over into the Carrol Arms Hotel across the street from Dirksen, the Immigration

Building, and other facilities.

We should also take a moment to reflect on the sad story of the cost of the Hart Building-a building that was originally supposed to cost \$47 million but has been brought to completion at a cost of \$137 million, not including the furniture to fill it, \$9.5 million. And as we consider my amendment, I urge my colleagues to support the effort to say right now that we will not even begin to think about any more Senate office buildings in this fiscal year.

Mr. President, I urge the adoption of my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 1506) was agreed to.

UP AMDENDMENT NO. 1507

(Purpose: To expedite Office of Surface Mining grants to States for abandoned mine land reclamation projects)

Mr. FORD. Mr. President, I send an amendment to the desk and ask for its immediate consideration...

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from Kentucky (Mr. FORD) proposes an unprinted amendment numbered 1507.

Mr. FORD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed

The PRESIDING OFFICER. Without objection, it so so ordered.

The amendment is as follows:

Insert at the appropriate place: . Within 60 days of receipt of a comabandoned mine reclamation fund grant application from any eligible State under the provisions of the Surface Mining Control and Reclamation Act (91 Stat. 460) the Secretary of Interior shall grant to such State any and all funds available for such purposes in the applicable appropriations

Mr. FORD. Mr. President, I ask unanimous consent that the distinguished minority leader, Senator ROBERT C. BYRD and Senator HUDDLE-STON be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, this is just to expedite the funding of appropriations for the reclamation of orphan lands, abandoned mine sites. It was cleared yesterday, went on the tax

If there is no objection to it, I would like to also add the Senator from Virginia (Mr. WARNER) as a cosponsor, and Senator RANDOLPH.

Mr. METZENBAUM. Mr. President, would the Senator yield for a ques-

tion?

Mr. FORD. I yield.

Mr. METZENBAUM. Is this the identical language before us?

Mr. FORD. Absolutely; there is colloquy that Senator McClure had last night that cleared up any problem I have so far as environment, and so forth.

Mr. METZENBAUM, I thank the Senator.

Mr. FORD. I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kentucky.

The amendment (UP No. 1507) was agreed to.

UP AMENDMENT NO. 1508

Mr. NUNN. Mr. President, I have an amendment I send to the desk and ask that it be reported.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Georgia (Mr. NUNN) proposes an unprinted amendment numbered 1508.

Mr. NUNN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert the follow-

ing:

Notwithstanding Public Law 95-622, funds made available to the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research under Public Law 97-216 shall remain available until March 31, 1983.

Mr. NUNN. Mr. President, I am sending an unprinted amendment to the desk for myself, Mr. KENNEDY, Mr. LEVIN, and Mr. HEINZ.

Mr. President, the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research has been a valuable and productive resource for the Congress and other governmental organizations faced with many difficult ethical questions. This Commission established by Public Law 95-622, has studied a number of important health care and research issues affecting the lives of our citizens. The Commission recommended a definition of death which has been adopted by seven States and the District of Columbia. Its statement on the necessity of pro-

tecting human research subjects from research risks was the basis for the establishment of an ad hoc committee within the Vice President's deregulatory task force to study regulations affecting research. The Commission has also studied the issues of compensating individuals for injuries resulting from research.

Mr. President, under the terms of Public Law 95-622, the Commission is scheduled for termination on December 31, 1982. However, the Chairman of the Commission has requested a 3month extension, without additional appropriations, which would delay the termination date until March 31, 1982. This additional time will enable the Commission to close down its operation and publish the remainder of its

reports.

Mr. President, I offered an identical amendment on September 29 to the first continuing resolution for fiscal year 1983, which was approved by the Senate. That amendment, however, was not accepted by the House conferees. Since that time the House has adopted H.R. 7338 which has the same effect as my earlier amendment. The Senate has not yet acted on that bill. If this amendment is approved by the Senate again today, I feel confident that it will be acceptable to the House. Therefore, Mr. President, I urge my colleagues to adopt this amendment.

There is no money involved, simply a 3-month extension to allow the com-

pletion of reports.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia.

The amendment (UP No. 1508) was

agreed to.

may be more.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. These are all the noncontroversial amendments which have been cleared. I am sure there

Senator Warner has been very patient and was indeed prepared to offer his amendment. I discussed with the Senator the matter on the floor here and he has been gracious enough to stand aside for the distinguished Senator from New Mexico, Senator Domen-

It would be my hope that at the conclusion of that amendment he will have the opportunity to present his amendment.

Mr. DOMENICI. May I say to the distinguished Senator from Connecticut because my cosponsors want to speak, the majority leader and Senator Dole, they have to be at a meeting at 11 o'clock, so I would defer to Senator Warner if you would take me after

Mr. WEICKER. I think the best I can leave it now is to go to Senator WARNER and then accommodate the other Members on the other side of the aisle because we are trying to go back and forth. I will put the Senator from New Mexico in as soon as possible.

Mr. DOMENICI. You will accommodate us when you go to our side.

Mr. WEICKER. I cannot put you there now, so I hope the matter can be taken care of at such time as the majority leader and others are here with you. But I cannot guarantee that.

Mr. SCHMITT. Mr. President, will the Senator yield for just a moment? There are rumors floating around of some 30 amendments. Heaven only knows whether there are 30 or 50 or what. If Senators would please get their amendments to me or to the staff of HHS diligently we will try to clear those amendments or offer a suggestion, as the case may be.

# UP AMENDMENT NO. 1509

(Purpose: To transfer funds collected from settlements involving petroleum pricing violations under the Emergency Petroleum Allocation Act of 1973 to the Governors or Chief Executive Officers of the States for use in providing assistance for energy programs of the States)

Mr. WARNER. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consider-

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Virginia (Mr. WARNER) proposes an unprinted amendment numbered 1509.

Mr. WARNER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title I, insert the following new section:

. (a) From the amounts held in SEC. escrow on the date of the enactment of this Act as a result of alleged petroleum pricing and allocation violations, the Secretary of Energy is directed to exercise his remedial authority under the Emergency Petroleum Allocation Act of 1973 to disburse immediately \$200,000,000 to the Governors or chief executive officers of the States.

(b) The Secretary of Energy shall make disbursements under this section based on the ratio, calculated by the Secretary,

which-

(1) the consumption within each State of price-controlled refined petroleum products (other than refinery feedstocks) during the period from September 1, 1973, until January 28, 1981, bears to

(2) the consumption within all States of such products during that period.

(c) The disbursements made under this section shall be available for energy programs of the States, including, but not limited to, low-income energy assistance and related weatherization activities.

(d) As used in this section, the term "States" means the several States, the District of Columbia, Puerto Rico, and the territories and possessions of the United States.

Mr. WARNER. I propose this amendment on behalf of myself, Senators Chafee, Pell, Levin, Simpson, Percy, Danforth, and Metzenbaum.

Mr. President, I send an amendment to the desk and ask for its immediate

consideration.

The purpose of this amendment is to provide needed financial assistance to the States to provide relief from past energy overcharges and provide energy assistance to the public, especially the low income, the elderly, and

the handicapped.

The State whose people I have the honor to represent had to close their doors to some 25,000 qualified applicants for fuel assistance this past week, due to lack of sufficient funds. When you consider the bulk of the winter season is still to come, and when we all know this is not the best of economic times in our country, indeed the world, the message was driven home that winter had indeed arrived to the Nation and with it ruinous home heating bills.

The Senate Energy and Natural Resources Committee held a 5-hour hearing on Monday to explore rising natural gas costs, and this issue was again debated extensively on the floor on Tuesday. It is apparent that there is no "quick legislative fix" for this prob-

lem.

A lengthy and comprehensive overhaul of the Natural Gas Policy Act, which is at the root of many of these problems, must await the next Congress. But the public's hardship is very real and extremely urgent.

As the temperature drops, the media and the mails are filled with stories and letters of individuals unable to afford the necessity, I repeat necessity, of both eating and staying warm. Some Americans, forced to choose between these life sustaining requirements weigh food over warmth and, unfortunately, pay for their decision with deterioration of health.

Newspaper caricatures showing senior citizens wrapped in icicle clad

blankets are no exaggeration.

Americans with limited incomes are having very difficult times paying heating bills and, under current pricing policies, there appears to be no end in sight to the heating bill increases. Natural gas prices have risen as much as 29 percent this past year in my State alone. Other States have documented increases as high as 60 percent.

In 1977 Congress passed the lowincome energy assistance program to assist low income households with rapid increases in home energy costs.

As the cost of energy has risen dramatically every year, demands on this program have increased proportionately. Congress, to meet these urgent needs, has raised the funding level of this program each year to the point that in fiscal year 1982 \$1,875 billion was appropriated.

For this year, Congress has proposed a similar funding level. But even this enormous sum is not enough to alleviate the public's home heating plight.

Many States are finding that current funding levels are inadequate. Their needy are unable to obtain relief. In fact, many States have run out of money.

Last year in Virginia, 102,000 applicants received fuel assistance moneys within our allocation of \$36.5 million. There has been a 25-percent increase in applicants with no increase in funds for this year. I cannot stand by and watch 25,000 Virginia applicants shiver and risk their very lives because we in Congress did not help.

As energy costs continue to escalate and unemployment remains high, increasing numbers of people require financial relief for their energy needs. If the States are going to be able to respond to this problem, they must be provided increased financial assistance.

Under my amendment, the Secretary of Energy would allocate moneys to Governors, giving them the discretion to direct the funds to the highest priority energy-related projects in their particular States. Priority should be given to the elderly and others with low incomes.

The funds made available under this amendment would supplement existing fuel assistance, weatherization, and other energy-related programs.

The amendment would also resolve an issue within the Department of Energy regarding the distribution of settlement moneys collected as partial payment for petroleum pricing violations. The Department of Energy is seeking to provide secondary remedies to State governments and is currently reviewing a distribution plan which I understand is consistent with this amendment.

The amendment would direct States to send out these funds now, when the real crunch will hit during the frigid months of January and February.

Unlike other plans which have been suggested for spending these funds, I believe this amendment would satisfy the legal requirements that the moneys be spent in a manner which bears some resemblance to the harm incurred. Each State's allocation would be its percentage of nationwide petroleum products consumed during the period that the pricing violations occurred.

In contrast to other options, my amendment would send the money directly to States instead of taking the unnecessary sidestep of going through

the Department of Health and Human Services.

I have contacted the Secretary of Energy and the National Governors Association to inquire how quickly these funds could be distributed to the States and then to consumers. I have been assured that payments to the States could be made very quickly.

The National Governors Association endorses this proposal and told me that many States have been anticipating receipt of these funds and already have plans to spend the money now when it is really needed. I ask unanimous consent that the letter of support which I have received from the National Governors Association be printed at this point in the Record.

There being no objection, the letter was orderd to be printed in the RECORD, as follows:

National Governors' Association, December 16, 1982.

Hon. John W. Warner, U.S. Senate, Washington, D.C.

DEAR SENATOR WARNER: On behalf of the National Governors' Association, I am writing to indicate our strong support for your proposed amendment to the FY 83 Continuing Resolution directing the Department of Energy to refund to consumers \$200 million in petroleum overcharge funds through the states. As you know, the Governors supported overwhelmingly a resolution at Annual Meeting calling for restitution through the states to petroleum consumers overcharged during the period when allocation and price controls were in effect. The resolution (a copy of which is enclosed) calls for earmarking of these funds for energy-related efforts and a strict minimization of administrative costs.

It is our view that earmarking the funds for energy-related purposes should insure that the monies can be obligated within the next six months.

Your concern with this issue is appreciated.

Sincerely,

Gov. Joseph E. Brennan, Chairman, NGA Energy Conservation and Renewable Resources Subcommittee.

### RESOLUTION

States are the appropriate agencies for the restitution to the public of overcharge refunds resulting from alleged or actual violations of price and allocation controls, once clearly identified injured parties have been compensated. The States are best able to direct the refunds to the benefit of those who may have been injured by the overcharges. The Federal Government should direct such refunds to the States for further distribution in accordance with the following guidelines: All settlement money must go to specific energy-related programs in such manner that funds are redistributed in line with the way they were collected; funds should be redistributed on an equitable or random basis to provide direct benefit to end-users; a limited amount may be used to cover State administrative expenses.

Mr. WARNER. I want to thank Virginia's former attorneys general Andrew Miller for his help in notifying the Nation's State attorneys gener-

al on behalf of this amendment. I am told that many attorneys general have filed petitions for these dollars to be transferred to States in a similar manner as my amendment will accomplish. I appreciate knowing of this support.

I am convinced that this amendment is the best way to get these funds into the hands of Americans suffering from rapidly escalating energy price increases during this frigid winter

season

This amendment would not mean an additional drain on the Federal Treasury and would not increase appropriations. Instead, this amendment would utilize \$200 million that has accrued to the Federal Government since 1978. The amendment would not take the place of any current program providing energy assistance to the States but would be a one-time supplement to existing programs.

This amendment would not set up a new Government bureaucracy or a new program. It is a one-time Federal payment to States which will break the logjam over these funds which have been gathering dust at the De-

partment of Energy.

Mr. President, in an ideal world, these funds would be returned directly to consumers who were overcharged by oil companies. But this is not an ideal world, and all the parties injured by this illegal practice cannot be identified. Those that can be identified are being paid.

My plan would distribute the \$200 million in line with the damage which has been suffered. The \$200 million represents only a portion of the funds collected. Moneys will be retained in the fund to make future refunds if le-

gitimate demands arise.

Mr. President, this Congress should not go home for the Christmas holidays without showing the American people that we are sympathetic to their economic woes and the hardship that skyrocketing energy bills are causing them this winter. This amendment will demonstrate that concern. I

urge its adoption.

Mr. DOLE. Mr. President, I rise today as a cosponsor of the amendment to provide an additional \$200 million for Federal energy assistance. The Senator from Kansas is as concerned about the Federal budget deficit and the need to hold the line on spending as any Member of this body. But this Senator also believes that we have an obligation to prevent the less fortunate members of our society from freezing this winter because they can not pay their utility bills. Without an increase in the level of Federal funds available for State use in the lowincome energy assistance program, we face that prospect. The amendment before the Senate will provide much needed assistance from available funds.

Mr. President, last Tuesday night the Senate engaged in a lengthy discussion of the failures of the Natural Gas Policy Act. That discussion emphasized three important facts which I commend to the attention of all Senators.

First, natural gas prices across the country are escalating at an unacceptably rapid rate—a rate much faster than anticipated when the NGPA was enacted. In the past year alone the consumer price of natural gas has increased an average of 35 percent.

Second, these rate increases have become an intolerable burden on many households, particularly low-income families and those suffering from unemployment. Over 53 percent of American families rely on natural gas to heat their homes. For many the inability to pay their natural gas bill has meant termination of service.

Finally, well-meaning attempts of many of my colleagues to address flaws in our current natual gas regulatory system are unlikely to have a significant impact on price this winter. As I mentioned Tuesday night, there is only one way to help those most severely harmed by cold weather and fuel prices beyond their budgets. That is to increase funding for the low-income energy assistance program.

Congress has already authorized \$1.875 billion and the continuing resolution now funds the program at that level, equal to last year. Unfortunately, natual gas prices have increased an average of 35 percent in the past year. The amendment before the Senate will help keep pace with rising fuel bills.

Mr. President, the low-income energy assistance program does not provide big payments to beneficiaries. Last year in Kansas the average payment was \$133. In some cases that money meant the difference between life and death. This year, by eliminating two of four programs, Kansas hopes to raise the average payment to \$186. But that will be done by serving fewer people at a time when more people are in need.

Earlier this week I met with our new Secretary of Energy and several mayors from communities in the Greater Kansas City area. The message from home was clear—hundreds of people in the Kansas City area are facing a winter without heat because they cannot pay their natural gas bill. Mr. President, these are not impoverished communities. Several of the cities represented are located in one of the most affluent counties in the country. Nevertheless, in Overland Park, Olathe, Lenexa, and Merriam, hundreds of people are without heat. Those people need this amendment.

The practical effect of funding the low-income energy assistance program at the same level as last year is to reduce assistance by 35 percent. The

Senator from Kansas does not believe that is the intent of the Senate; \$200 million seems like a lot of money—it is a lot of money. But, Mr. President, estimates of the amount needed to adequately fund the LIEAP program run as high as \$5 billion. If we adopt this amendment we will only reach slightly more than 40 percent of that amount.

In the fact of a projected severe winter and with knowledge of a failed policy with respect to natural gas, it is the least we can do.

Mr. PERRY. Mr. President, I support the amendment by the Senator from Virginia. This amendment will provide badly needed funds to help consumers across this country cope with rising fuel costs. Consumers in my own State of Illinois are facing gas hikes this winter in the range of 17 to 60 percent. At the same time, many are experiencing unemployment. It is unfair to ask the man or woman who has just lost his job to pay double to heat his home. We have discussed on the Senate floor over the past few days what can be done to curtail this rise in gas prices-and something must be done, but as this debate continues we must do something to help people cope with these rising costs over the next few months. This amendment would do just that. It would return money to the States for energy programs including, but not limited to, low-income energy assistance and related weatherization programs.

This money would come from \$200 million now in escrow which has been collected from oil company overcharges to consumers during the seventies. This money rightfully belongs to the consumers who were actually overcharged during this period. But because it is impossible to identify each individual consumer, we should at least attempt to place this money where consumers in general will benefit. Distribution to the States provides the quickest means to get this money out.

The States under this amendment are provided a great deal of flexibility in order to design programs which will meet the special needs of consumers in the States in the quickest manner possible. I am hopeful that States will be both wise and creative in getting these funds out. It is particularly important that States utilize or devise programs which can help not only those individuals which have been eligible for lowincome energy assistance in the past, but the many consumers who are facing unemployment for the first time and at the same time experiencing large utility increases.

I agree with my colleague from Virginia that it is unconscionable to have these funds gathering dust at the Department of Energy, while many Americans go cold, unable to pay their

fuel bills this winter. I urge adoption of this amendment.

Several Senators addressed the Chair.

Mr. WARNER. I still have the floor. The PRESIDING OFFICER. The Senator from Virginia has the floor.

Mr. WARNER. I ask unanimous consent to add the Senator from Kansas (Mr. Dole), the Senator from New Mexico (Mr. DeConcini), and the Senator from Indiana (Mr. Lugar) as cosponsors.

Mr. President, I also ask unanimous consent that the distinguished Senator from Massachusetts (Mr. Kennedy) be added as a cosponsor.

The PRESIDING OFFICER. With-

out objection.

Mr. WARNER. The gist of this amendment is that there is a fund in the Department of Energy now in excess of one-half billion dollars which is in an escrow account. We have consulted extensively with the officials of the Department of Energy, and while they may not bless this action it is clear that this money is there and it could be available next week for distribution to the Governors of the States, and that is precisely what my amendment calls for.

I urge that my colleagues support this amendment. We have checked it out technically, and it is our judgment that if enacted into law the Secretary of Energy can administer these funds by distributing them to the Governors, and it will be a very successful help.

I offer a perfecting amendment on behalf of the distinguished Senator

from Ohio (Mr. METZENBAUM).

The PRESIDING OFFICER. The Senator may modify his amendment if he so desires. Does the Senator desire to modify his amendment?

Mr. WARNER. I offer a modifying amendment on behalf of my distinguished colleague from Ohio (Mr. METENBAUM).

Mr. JOHNSTON. Mr. President, I

object.

The PRESIDING OFFICER. The Senator has a right to modify his amendment. He does not have a right to amend it. This is a modification, is that correct?

Mr. WARNER. That is correct. I offer it on behalf of the distinguished Senator from Ohio.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

At the end of Title I, insert the following new section:

SEC. . (a) From the amounts held in escrow on the date of the enactment of this Act as a result of alleged petroleum pricing and allocation violations, the Secretary of Energy is directed to exercise his remedial authority under the Emergency Petroleum Allocation Act of 1973 to disburse immediately \$200,000,000 to the Governors or Chief Executive Officers of the States.

(b) The Secretary of Energy shall make disbursements under this section based on the ratio, calculated by the Secretary, which-

(1) the consumption within each State of price-controlled refined petroleum products (other than refinery feedstocks) during the period from September 1, 1973 until January 28, 1981 bears to

(2) the consumption within all States of

such products during that period.

(c) The disbursements made under this section shall be available for energy programs of the States, including, but now limited to, low-income energy assistance and related weatherization activities.

(d) As used in this section, the term "States" means the several States, the District of Columbia, Puerto Rico, and the territories and possessions of the United

States.

(e) In addition, the Secretary of Energy shall distribute to the Governors or Chief Executive Officers of the States as promptly as is practicably feasible, all other amounts collected or hereafter collected as a result of alleged petroleum pricing and allocation violations which are attributable to direct or indirect injuries to ultimate consumers or to otherwise unidentifiable parties, and which are not necessary to satisfy the claims of identifiable injured claimants who can demonstrate specific injury.

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

UP AMENDMENT NO. 1510

Mr. JOHNSTON. Mr. President, I send an amendment to the desk in the second degree and ask for its immediate consideration.

The PRESIDING OFFICER. The

clerk report.

The bill clerk read as follows:

The Senator from Louisiana (Mr. Johnston) proposes an unprinted amendment numbered 1510 to the Warner amendment numbered 1509.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. SYMMS). Without objection, it is so or-

dered

The amendment is as follows:

Delete subsections (b) through (d) of the amendment and substitute the following:

(b) The Secretary of Energy shall make disbursements under this section based on the ratio, calculated by the Secretary, which—

(1) the consumption within each State of refined petroleum products (other than refinery feedstocks) and natural gas during the 8-year period ending January 28, 1981, bears to

(2) the consumption within all States of

such products during the period.

(c) The disbursements made under this section shall be available for energy programs of the States, including, but not limited to, low income energy assistance and related weatherization activities.

(d) As used in this section, the term "States" means the several States, the District of Columbia, Puerto Rico, and the territories and possessions of the United States

(e) After disbursing the funds as provided in subsection (a), the Secretary of Energy

(1) periodically identify those remaining funds held in escrow, as described in subsection (a), for which no claims are pending and for which it is impossible or impracticable to determine the rightful individual recipients for restitution, and

(2) disburse in the manner specified in subsection (b), as soon as possible, those funds identified under paragraph (1).

Mr. JOHNSTON. Mr. President, this is a very serious problem. I congratulate the Senator from Virginia for addressing the problem, but it has a very basic flaw. And I ask my colleagues to lend me their ears for just a couple of minutes.

What this amendment does is take the fund of overcharges, which is now available and can be transferred, and gives it to States for low-income energy assistance, but it gives it to States based upon petroleum consumption.

Now, the problem with that, obviously, if you live in a State that relies upon natural gas as opposed to home heating oil, it is not fair. So what this amendment does, Mr. President, first and primarily, is to base the formula for distribution to the States on the consumption within each State of refined petroleum products, other than refinery feedstocks, and natural gas during the 8-year period pending January 28, 1981; the percentage that bears to the consumption within all States of such products during the period. So what this does, Mr. President, is make it fair to those who consume natural gas as well as those who use home heating oil.

Now, Mr. President, I do not know what the effect of the amendment is in terms of what it does to each State. It, frankly, does not matter because it would be fair to each State no matter what they use.

Now the second thing this would do, Mr. President, would be to grant this money to the States to use in their programs, including low-income energy assistance, as well as weatherizations.

It ought to be up to a State to determine whether the money can best be used directly in low-income energy assistance or whether a greater payoff can be achieved by using it for low-income weatherization. I hope my colleague from the State of Virginia will accept the fairness of this amendment and that it can be adopted.

Mr. WARNER. Mr. President, I have to respectfully oppose the perfecting amendment offered by the distinguished Senator from Louisiana. I do so for the following reasons. I have placed at each of the desks the allocation of funds as they will be made under the amendment that I offered, as modified by the amendment of the distinguished Senator from Ohio.

Now this is predicated on information that we received from the Department of Energy. It is a known formula and the amounts each State will receive are stated herein. The Department of Energy informs us that if we were to accept the amendment offered by the distinguished Senator from Louisiana, it would immediately throw this entire transaction into question and subject the first transfer of funds from the Department of Energy to a single Governor to a court suit and, in all probability, this effort on behalf, hopefully, of the Senate and the Congress to help people who are needy, will come to an absolute halt with an injunction in court.

Mr. JOHNSTON. Will the Senator

yield for a question? Mr. WARNER. Yes.

Mr. JOHNSTON. Will the Senator tell me how possibly this amendment would subject it to a court suit, whereas otherwise it would not be subjected

to a court suit?

Mr. WARNER. The amendment offered by the Senator from Virginia is predicated on a formula based on a distribution of petroleum. This fund has been accumulative from the overcharges on petroleum. No natural gas is involved in terms of the overcharges that go in this fund. So, if we are now going to distribute the fund, it has to be distributed on the basis of the use of petroleum, not natural gas.

Mr. JOHNSTON. Mr. President I suggest to the distinguished Senator from Virginia that these are funds that are available for whatever Congress wishes to do with them. If you are going to use it for low-income energy assistance, that is for people who are cold, and they are cold whether they use natural gas or whether they use petroleum. I say to the Senator that his formula is fatally flawed. If it is constitutionally required that it be distributed to users of petroleum, then I say do not use it for energy assistance. Let them use it according to the present law.

If the present law needs changing, then let us change it in a fair way and make it available to people who are cold and who need both natural gas and home heating oil, because it is just not fair to give it to the users, in effect, of home heating oil and not to the users of natural gas, as well.

Mr. WARNER. The amendment offered by the Senator from Virginia allows the Governors a wide margin of flexibiltiy as to the uses of the moneys received. It can be used for low-income assistance, for heating, weatherization, and other energy assistance projects.

Mr. JOHNSTON. That is right. They can use it, but they do not get as much. The Governor does not receive it if his citizens have been using natural gas as opposed to using home heat-

ing oil.

Mr. WARNER. I can appreciate the desire of the Senator from Louisiana perhaps to reallocate this along the lines of the users of natural gas. I

might, in that context, ask a question. When we earlier discussed this issue, the subject of feedstocks arose. Could the Senator acquaint the Senator from Virginia as to how his amendment is drawn with respect to use of natural gas for feedstocks?

Mr. JOHNSTON. I read the full statement into the Record. It is not intended to use natural gas feedstocks. If that is any problem and if that is not clear from the amendment, if that would satisfy the distinguished Senator from Virginia, that can be easily cleared up.

Mr. METZENBAUM. Will the Senator from Louisiana yield for a ques-

tion?

Mr. JOHNSTON. Yes.

Mr. METZENBAUM. Is it a fact that, if the Johnston amendment were adopted, the amount of gas which is used by the petroleum plants would be considered in making the allocation back to the States?

Mr. JOHNSTON. If that is a problem in this amendment, that can be

corrected.

Mr. METZENBAUM. It was originally drafted one way and, I am trying to say to my friend from Louisiana, then we understood it was drafted a different way.

Mr. JOHNSTON. I have received only one draft, and I believe I received that from the Senator from Ohio, or from staff. If the Senator has another draft that corrects the problem, I will

be glad to accept that.

Mr. METZENBAUM. I say to the Senator from Virginia—and I think we may all be trying to move in the same direction—that if the Senator from Louisiana would eliminate the use of gas for petrochemical plants in the formula allocation, then I think that there might be far more equity, because it is well known that tremendous amounts of gas are consumed for industrial purposes in Texas, Louisiana, and Oklahoma.

Mr. JOHNSTON. If I may interrupt the Senator to say it was not my intention to do so, and I would be glad to do

that.

Mr. WARNER. Mr. President, I would continue to express my objections for two reasons. First, I have been working on this amendment for some 48 hours with the assistance of the Secretary of the Department of Energy and his staff. It is an unusual amendment.

You may recall that this fund was the subject of a distribution by President Carter at one time when he endeavored to try to give it away to several charities. While my memory does not serve me as to exactly what happened, I know that was terminated.

Nevertheless, a lot of people have looked at this fund for varying uses. I have followed very carefully the advice given me by the Secretary and his staff as to the best means possible of meeting the emergency, particularly for low-income assistance people and the elderly and the handicapped. That is the first reason I object.

The second is that the Secretary of Energy has provided the Senator from Virginia with a formula allocation of exactly how much money each State will receive.

So in support of my amendment, we know exactly, presumably to the dollar, what another State will receive.

The Senator from Louisiana is not able to provide that information.

Third, I think it might well be that this whole thing would collapse as a result of a lawsuit since these funds were put in the escrow account because of an overcharge on petroleum. If we gerrymander this formula based on something produced from natural gas, not knowing how the various States would be allocated the fund, we would be doing irreparable damage to the cause that the Senator from Virginia and many others are endeavoring to achieve.

Mr. McCLURE. Will the Senator yield?

Mr. WARNER. I yield.

Mr. PELL. Mr. President, I am very pleased to join with my colleague from Virginia (Mr. Warner) as a cosponsor of legislation to return \$200 million of the oil overcharge funds collected by the Department of Energy to Governors for use in energy-related programs, particularly home heating assistance and weatherization.

As my colleagues may be aware, in June 1981, I introduced similar legislation along with 17 cosponsors (S. 1439) to provide for the distribution of oil overcharge funds collected by the Department of Energy to States for weatherization and low-income energy assistance. At that time, I was especially concerned by reports that the Department of Energy was planning to return unclaimed overcharge funds collected from the oil companies to the U.S. Treasury instead of consumers.

I emphasize, Mr. President, that my legislation would not have prevented individual consumers, businesses, or utilities from seeking relief and restitution through the Department of Energy if they were the victims of oil price violations. S. 1439 provided only a mechanism for the distribution of the oil overcharge funds collected by the Department of Energy. These funds, under my bill, were to be distributed equitably to the States if the individuals overcharged could not be identified.

Mr. President, since June, 1981. I have been working vigorously to seek a resolution of the matter of oil overcharges and specifically, the funds collected by the Department of Energy which currently are held in escrow accounts in the Treasury. I believe these

funds should be returned to consumers as soon as possible for energy programs where the needs today are the greatest-low-income energy assist-

ance and weatherization.

Immediately prior to the October recess, I, along with two of my colleagues, Senator Charge and Senator LEAHY, met with then-Secretary of Energy Edwards and Raymond Hanzlik. Administrator of the Economic Regulatory Administration, to urge a timely resolution of this matter-that the Department of Energy return the unidentifiable oil overcharge funds held in escrow to Governors for distribution to consumers. At that time, Secretary Edwards advised me that a decision on the issue was pending and he was sympathetic to the return of the escrow funds to Governors for energy conservation uses and home heating assistance.

I am, therefore, especially delighted, Mr. President, that my colleague, the Senator from Virginia (Mr. WARNER), and so many others agree that the Department of Energy overcharge funds held in escrow should be returned to consumers as soon as possible this winter. I commend Senator WARNER for this extremely timely initiative. It is especially important for consumers who need energy assistance now. I strongly urge my colleagues to support this amendment and hope that Secretary of Energy Hodel will move quickly to return these funds to the States.

Mr. EAGLETON. Mr. President, I ask unanimous consent that I may be added as a cosponsor to the Warner amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I understand what the Senator from Louisiana is trying to do because in some States there is very little natural gas consumption and very little to measure by. Yet the emergency we are trying to get to is caused by the escalation in the price of natural gas, the escalation in the price of oil having already occurred.

But there is a difficulty, as I see it, in the formulation that the Senator from Louisiana has mentioned. That is that all we are dealing with in the formula is volume. One of the essential

elements to consider is price.

It seems to me if we can add to what the Senator from Louisiana has suggested, that the allocation formula reflect the ratio, including the volumes of oil and gas product, and also the price in those States, we might then have the mix that allows the allocation of this money in an appropriate way to the States that are really affected by it

Mr. JOHNSTON. Will the Senator yield for a question? I have some lan-

guage that might solve that.

Mr. McCLURE. Let me just, before yielding, indicate that if we do not include natural gas at all, you might have a large quantity of additional money being allocated to States that have heavy oil consumption, where the problem is in States that have heavy natural gas consumption.

If you can modify the formula so that it had both volume and price, we might get around that question.

Mr. WARNER. I note from the allocation under the formula provided by the Senator from Virginia that Louisiana gets \$5 million and Virginia gets but \$4 million. I think Louisiana gets a very fair share compared to what is received by my State.

I recognize the problem raised by the distinguished Senator from Idaho, the chairman of the Senate Energy Committee. But, again, I can only express hard work for 48 continuous hours, seeking the best advice, presumably from those who have the primary responsibility. They said steadfastly, "Do not let the natural gas be used in this formula or it may well jeopardize the entire distribution."

Mr. McCLURE. It would seem to me that it would jeopardize the entire distribution if, as a matter of fact, it is volumetric only. But I do not see how it really does if you include price as part of that formula. You will find some States where natural gas is priced at or above the equivalent oil. You will find some other States in which natural gas, even in spite of the recent increases, is substantially less

If it is that escalation in pricing of natural gas that we seek to reach, why would we want to allocate heavily out of this fund to the States that have relatively low natural gas consumption but have high oil consumption?

I recognize that is going to impose an administrative burden upon those who have to come up with the ratio, but, as the fellow said, that is what they are paid for.

Mr. WARNER. It was described to me as an administrative nightmare.

I wonder if I might gain the attention of the distinguished Senator from Ohio. He offered a compromise by which language might say that if, in fact, the proposal of the Senator from Louisiana did jeopardize the distribution of this fund, the Secretary of Energy could disregard that amendment and proceed under the formula devised by the Senator from Virginia.

Mr. METZENBAUM. Responding to the Senator from Virginia, I think if we had a few minutes we could draft such language. I do not think the Senator from Louisiana has indicated a willingness to be cooperative with respect to his language. It occurs to me that the time of the Senate might be well used if, by unanimous consent, this amendment were temporarily laid aside without the Senator from Virginia or the Senator from Louisiana losing their place on the calendar.

Mr. KENNEDY. Will the Senator from Virginia yield for one point?

Mr. WARNER. Yes.

Mr. KENNEDY. I am a cosponsor of the Senator's amendment, and I think it is enormously compelling. It is fair, it is right, it is just. As I understand the Senator's amendment, it is a recognition that the U.S. Government has accumulated these funds on the basis of overcharges, and the Senator wants to distribute those resources which are in the Treasury with a formula based upon the consumption of refined petroleum product. Am I cor-

Mr. WARNER. That is correct.

Mr. KENNEDY. The Senator wants to develop a system or a process where the fund would go back to the States and the States themselves would develop some kind of way to distribute them in as fair and as equitable way as a State can devise, to the people who have been most adversely affected.

It seems to me that this is the way it should work.

If the companies themselves have overcharged and violated the law, if the consumers have been adversely impacted in the various States that consume that product, the Senator from Virginia has offered a reasonable, sensible, responsible, and fair way in which those injuries can be redressed. I would just hope that the Senator would continue to fight for what I consider to be an extremely fair and equitable approach, and one which moves us beyond the current impasse. The Senator from Virginia should be commended.

I would say, finally, I think the Senator from Virginia is wise to try and not get into the whole question of natural gas prices, as I understand he has not up to this time.

Finally, I want to say I welcome the interest of the Senator from Louisiana in trying to get additional resources for low-income people. I think all of us understand that we have never fulfilled our obligations to those people, obligations which were spelled out at the time we adopted the windfall profit tax. At that time we indicated we would provide up to one-quarter of the windfall profit tax to low-income individuals. We have seen that program assaulted time in and time out.

I hope that we can find ways, particularly when we are going to be facing one of the coldest winters, to try and deal with their particular needs, but I must say I do not believe this is the vehicle with which to do it.

I respect the efforts of the Senator from Virginia in protecting the interests of consumers all over this coun-

Mr. WARNER. I thank the Senator. Mr. President, the parliamentary situation, as I understand it, is a request by the Senator from Ohio to see if they can develop more satisfactory language.

Mr. WEICKER. I wonder if we can lay this amendment aside temporarily so we could proceed to other amendments.

Mr. WARNER. The Senator from Virginia is perfectly willing to cooperate in this regard. I am willing to temporarily lay the amendment aside.

Mr. DANFORTH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DANFORTH. Has the amendment been laid aside?

The PRESIDING OFFICER. Not vet.

Mr. QUAYLE. Mr. President.

The PRESIDING OFFICER. Will the Senator withhold for one moment, please?

Is there objection to laying aside the Warner-Johnston amendment?

Mr. QUAYLE. Reserving the right to object, Mr. President, I shall not object, but I understood that we were going to go back and forth here. Senator Cranston and I have an amendment we have been trying to get up for a long time. I thought I had worked it out with the chairman of the Appropriations Committee and later the subcommittee chairman. May I ask the subcommittee chairman, will we try to go to that side next? Otherwise, I shall start seeking recognition in my own right, because we do have—

Mr. CRANSTON. May I seek recog-

nition, Mr. President?

Mr. WEICKER. Mr. President, it is true, not as a matter of any formal agreement, that we have been trying to go from side to side. While this amendment is being laid aside, it would be the fair thing to do to recognize somebody from the other side of the aisle. That is what we have been doing without any formal agreement to that effect.

The PRESIDING OFFICER. Is there objection to laying aside the

Johnston amendment?

Mr. QUAYLE. Still reserving the right to object, I will not object, but I do hope this informal arrangement can be accommodated, because we have worked hard and I talked with the Chair about it, I have talked to other people about it, and I am not going to object, but I do hope that this can be accommodated.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered. The amendment (UP No.

1510) is laid aside.

The Senator from California.

Mr. DANFORTH. Mr. President, a parlimentary inquiry.

The PRESIDING OFFICER. The

Senator will state it.

Mr. DANFORTH. Mr. President, I have sent an amendment to the desk. What is the status of that amendment?

The PRESIDING OFFICER. The Senator has sent his amendment before the other amendment had been set aside. It was the intention of the Chair to alternate sides. I thought the amendment was the Johnston amendment. Technically, I think it would be proper to recognize the Senator from California and then the Senator from Missouri.

The Senator from California.

UP AMENDMENT NO. 1511

(Purpose: To provide that the Armed Forces shall pay benefits to surviving spouses and dependent children of certain members of the Armed Forces who died on active duty or who died later from service-connected disabilities in the amounts that would have been provided under the Social Security Act but for amendment made by the Omnibus Budget Reconciliation Act of 1981)

Mr. CRANSTON. I thank the Chair. If there is no objection, I am going to yield to the Senator from Indiana to

present our amendment.

Mr. QUAYLE. Mr. President, I send an amendment to the desk on behalf of myself and Senator Cranston and others and ask that it be stated.

The PRESIDING OFFICER. The

amendment will be stated.

The legislative clerk read as follows:
The Senator from Indiana (Mr. QUAYLE),
for himself and Mr. Cranston, Mr. Chiles,
Mr. DeConcini, Mr. Hollings, Mr. Nickles,
Mr. Simpson, Mr. Thurmond, Mr. Warner,
Mr. Jepsen, Mr. Moynhan, and Mrs. Hawkins, proposes an unprinted amendment
numbered 1511.

Mr. QUAYLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of Title I add the following new section:

SURVIVING SPOUSES' AND CHILDREN'S BENEFITS PAYMENTS TO REPLACE CERTAIN TERMINATED SOCIAL SECURITY BENEFIT.

SEC. . (a)(1) The head of the agency shall pay each month an amount determined under paragraph (2) to a person—

(A) who is the surviving spouse of a

(A) who is the surviving spouse of a member or former member of the Armed

Forces described in subsection (c);

(B) who has in such person's care a child of such member or former member who has attained sixteen years of age but not eighteen years of age and is entitled to a child's insurance benefit under section 202(d) of the Social Security Act (42 U.S.C. 402(d)) for such month; and

(C) who is not entitled for such month to a mother's insurance benefit under section 202(g) of the Social Security Act (42 U.S.C. 402(g)) by reason of having such child (or any other child of such member or former

member) in her care.

(2) A payment under paragraph (1) for any month shall be in the amount of the mother's insurance benefit, if any, that such person would receive for such month under section 202(g) of the Social Security Act if such child were under sixteen years of age, disregarding any adjustments made under section 215(i) of the Social Security Act after August 1981. However, if such person

is entitled for such month to a mother's insurance benefit under section 202(g) of such Act by reason of having the child of a person other than such member or former member of the Armed Forces in such person's care, the amount of the payment under the preceding sentence for such month shall be reduced (but not below zero) by the amount of the benefit payable by reason of having such child in such person's care.

(b)(1) The head of the agency shall pay each month an amount determined under paragraph (2) to a person—

(A) who is the child of a member or former member of the Armed Forces described in subsection (c);

(B) who has attained eighteen years of age but not twenty-two years of age and is not under a disability as defined in section 223(d) of the Social Security Act (42 U.S.C. 423(d)):

(C) who is a full-time student at a postsecondary school, college, or university that is an educational institution (as such terms were defined in section 202(d)(7) (A) and (C) of the Social Security Act as in effect before the amendments made by section 2210(a) of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35; 95 Stat. 841)); and

(D) who is not entitled for such month to a child's insurance benefit under section 202(d) of the Social Security Act (42 U.S.C. 402(d)) or is entitled for such month to such benefit only by reason of section 2210(c) of the Omnibus Budget Reconciliation Act of

1981 (95 Stat. 842).

(2) A payment under paragraph (1) for any month shall be in the amount that the person concerned would have been entitled to receive for such month as a child's insurance benefit under section 202(d) of the Social Security Act (as in effect before the amendments made by section 2210(a) of the Omnibus Budget Reconciliation Act of 1981 (95 Stat. 841)), disregarding any adjustments made under section 215(i) of the Social Security Act after August 1981, but reduced for any month by any amount payable to such person for such month under section 2210(c) of the Omnibus Budget Reconciliation Act of 1981 (95 Stat. 842).

(c) A member or former member of the Armed Forces referred to in subsection (a) or (b) as described in this subsection is a member or former member of the Armed Forces who died on active duty before August 13, 1981, or died from a service-connected disability incurred or aggravated

before such date.
(d)(1) The Secretary of Health and Human Services shall provide to the head of the agency such information as the head of the agency may require to carry out this section.

(2) The head of the agency shall carry out this section under regulations which the head of the agency shall prescribe. Such regulations shall be prescribed not later than ninety days after the date of the enactment of this section.

(e)(1) Unless otherwise provided by law—
(A) each time after December 31, 1981, that an increase is made by law in the dependency and indemnity compensation paid under section 411 of title 38, United States Code, the head of the agency shall, at the same time and effective as of the same date on which such increase takes effect, increase the benefits paid under subsection (a) by a percentage that is equal to the overall average (rounded to the nearest one-tenth of 1 per centum) of the percentages by which each of the dependency and inden-

mity compensation rates under section 411 of such title are increased above the rates as in effect immediately before such increase; and

(B) each time after December 31, 1981, that an increase is made by law in the rates of educational assistance allowances provided for under section 1731(b) of title 38, United States Code, the head of the agency shall, at the same time and effective as of the same date on which such increase takes effect, increase the benefits paid under subsection (b) by a percentage that is equal to the overall average (rounded to the nearest one-tenth of 1 per centum) of the percentages by which each of the educational assistance allowance rates provided for under section 1731(b) of such title as increased above the rates as in effect immediately before such increase.

(2) The amount of the benefit payable to any person under subsection (a) or (b) and the amount of any increase in any such benefit made pursuant to clause (1) or (2) of this subsection, if not a multiple of \$1, shall be rounded to the next lower multiple of \$1.

(f) Payments under subsections (a) and (b) shall be made only for months after the month in which this section is enacted.

(g)(1) During fiscal year 1983 the Secretary of Defense shall transfer from time to time from the "Retired Pay, Defense" account of the Department of Defense to the head of the agency such amounts as the head of the agency determines to be necessary to pay the benefits provided for under subsections (a) and (b) during such fiscal year and to pay the administrative expenses incurred in paying such benefits during such fiscal year. The Secretary of Defense may transfer funds under this subsection in advance of the payment of benefits and expenses by the head of the agency.

(2) The head of the agency shall establish on the books of the agency over which he exercises jurisdiction a new account to be used for the payment of benefits under subsections (a) and (b) and shall credit to such account all funds transferred to him for such purpose by the Secretary of Defense.

(h) The head of the agency and the Secretary of Health and Human Services may enter into an agreement to provide for the payment by the Secretary or the head of the agency of benefits provided for under subsection (a) and benefits provided for under section 202(g) of the Social Security Act (42 U.S.C. 402(g)) in a single monthly payment and for the payment by the Secretary or the head of the agency of benefits provided for under subsection (b) and benefits provided for under section 202(d) of the Social Security Act (42 U.S.C. 402(d)) in a single monthly payment, if the head of the agency and the Secretary agree that such action would be practicable and cost effective to the Government.

(i) For the purposes of this section:

(1) The term "head of the agency" means the head of such department or agency of the Government as the President shall designate to administer the provisions of this section.

(2) The terms "active military, naval, or air service" and "service-connected" have the meanings given those terms in paragraphs (24) and (16), respectively, of section 101 of title 38, United States Code, except that for the purposes of this section such terms do not apply to any service in the commissioned corps of the Public Health Service or the National Oceanic and Atmospheric Administration.

Mr. QUAYLE. Mr. President, this amendment is an amendment that has come out of the Committee on Armed Services. I pay my special appreciation to the Senator from California (Mr. CRANSTON) who originated the idea of the survivors' sacrifice legislation in S. 2585. As a matter of fact, there are 52 or 53 cosponsors of that legislation. There were a number of changes made in the Manpower Subcommittee of Armed Services. We worked them out with OMB and the administration. I have a letter from President Reagan, that I shall ask later on to have printed in the RECORD, supporting the legislation.

As a matter of fact, the legislation has come out as part of the pay bill, but with the uncertainty of the pay bill, it is imperative, critical, that we pass this pay bill now on this continuing resolution. It simply corrects a mistake that Congress made nearly a year and a half ago. Believe me, that

correction is long overdue.

On August 13, 1981, with the enactment of the Omnibus Budget Reconciliation Act of 1981, certain social security benefits to military widows and surviving children of military personnel were abruptly cut off. These benefits had been available for many years and had been widely used by the military services to recruit people and to induce them to remain in the military. Relying in part on that commitment, our military men and women kept their part of the bargain—some of them making the ultimate sacrifice and dying in the service of their coun-

Even after the death of our military personnel, the commitment that these benefits would be available was reaffirmed to the surviving spouses and children by the military casualty assistance personnel. By our action on the Omnibus Reconciliation Act of 1981, our Nation has reneged on its commitment. This is an injustice which we cannot allow to continue.

Believe me, Mr. President, having visited personally with a number of these spouses who testified before our committee and in meetings in my office and others, this is something that we must do and we must do it now.

It is to rectify this inequity that I offer this amendment. The language of the amendment is lifted in whole from title VI of S. 2936, the proposed "Uniformed Services Pay Act of 1982" as reported by the Committee on Armed Services. The language has been agreed to not only by the Armed Services Committee, but I understand it is agreeable to the Veterans' Affairs Committee and to the administration. This language is a successor to S. 2585, a bill which I introduced along with Senator Cranston and which has been cosponsored by 52 other Senators. The evolution of the language has resulted

from hearings in the Armed Services Committee, discussions at the staff level with the Veterans' Affairs Committee, and discussions within the administration. What has resulted is a good piece of legislation which deserves support.

The amendment will provide benefits to certain widows and surviving children of deceased military personnel—benefits that would serve to replace the social security benefits terminated by section 2205 and 2210 of the Ominibus Budget Reconciliation Act of 1981. The benefits would not be retroactive for the period from August 13, 1981, to the present, but would take effect in the month following the month this amendment is enacted.

Therein, Mr. President, is the predicament, that we must act now. We cannot wait 1 day longer, we cannot wait 1 week longer. This is something that certainly should not have happened. Because of our military personnel retention, recruitment, and, as I said in many cases, the ultimate sacrifice of dying for our Nation, to cut off these benefits is something that any compassionate government with understanding would not want to do. It was a mistake, and I am happy to report and to read a letter from the President addressed to me. It says:

THE WHITE HOUSE, Washington, October 29, 1982.

Hon. DAN QUAYLE, U.S. Senate, Washington, D.C.

DEAR DAN: I want to thank you for introducing the amendment to the Uniformed Service Pay bill which restores social security survivors benefits to certain veterans' widows. The Administration supports this restoration fully, and will work with you to insure its enactment.

Thank you also for the support you have given to the Administration's efforts to restore the Nation's vitality.

With best wishes, Sincerely,

RONALD REAGAN.

The application of benefits is limited to survivors of those who died on active duty prior to August 13, 1981, or who died later as a result of a service-connected disability which was incurred or aggravated before August 3, 1981. The amendment is carefully written to keep commitments which were made, not to extend these benefits to those whose death occurred after they were put on notice of the changed legislative policy.

In order to have a more complete explanation of the details and purpose of this amendment, I ask unanimous consent that excerpts from the report of the Committee on Armed Services on title VI of S. 2936 (S. Rep. No. 97-565) be placed in the Record following my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. QUAYLE. Mr. President, the cutoff of these social security benefits for the survivors of those who made the supreme sacrifice for our country is a rejection of the obligation we undertook as a nation and a rejection of the commitment we made to provide for those who were left behind. It is essential that the Congress take the necessary step to restore these benefits to the estimated 26,500 surviving spouses and 70,000 surviving children of the individuals who died while on active duty in the military or died later as a result of service-connected disabilities.

It is essential that we correct this inequity now. Already the hardships on these military survivors has been felt. Under the 1981 Reconciliation Act, those children not receiving the student benefit by May 1982 lost the assistance the military had promised would be available. Furthermore, those whom the Reconciliation Act grandfathered into the benefit suffered a 25-percent reduction in the level of assistance. Surviving spouses with children under the age of 16 on August 13, 1981, have been denied the mother's benefit this Nation promised it would provide during the child's 16th and 17th years.

For survivors of military personnel who died before August 13, 1981, this amendment will prospectively restore the mother's benefit for parents of 16-and 17-year-old children and the student's benefit for 18-to-21 year-old children who are full-time students in certain defined postsecondary schools,

colleges, or universities.

The language of the amendment avoids the cycle of automatic cost of living increases for inflation. The benefits would be restored at the level being paid prior to August 13, 1981, with certain adjustments to account for inflation since that time. These adjustments to the mother's benefit would be equal to the average percentage increase by which dependency and indemnity compensation rates are increased under section 411 of title 38. The adjustments to the student's benefit would be equal to the average percentage increase by which educational assistance allowance rates are increased under section 1731(b) of title 38, adjusted at the same time educational assistance is increased. The advantage of this method of determining increases is that it is not tied to an automatic index, but is under the control of the Congress since it will be tied to increases which Congress must

All in all, this is a carefully thought out amendment which has broad support in Congress and in the administration. These benefits have been cut off for nearly a year and a half. I think it is unconscionable to delay further in correcting this inequity. I am confident that some time next year

the military pay bill will be reintroduced and be considered. However, I do not think we should wait 1 more day. I have been waiting for the pay bill to be considered and I understand the reasons why it has not. Had it been considered I would never have taken this step of proposing this amendment to the continuing appropriations resolution. But that is not the situation. Thus I strongly urge my colleagues to adopt this amendment and I also urge those Senators who will be conferees on this bill to strongly urge its acceptance by the House conferees.

Mr. President, this is an amendment we can all vote for with not just a clear conscience but rather a clearing of our conscience. A commitment was made and has been broken. That is not the American way—and is certainly not the way we should treat the survivors of sacrifice. A yea vote now will be a major step in correcting this inequity

### EXHIBIT 1

Uniformed Services Pay Act of 1982
September 21 (legislative day, September

8), 1982.—Ordered to be printed.
Mr. Jepsen, from the Committee on
Armed Services, submitted the following:

Report to accompany S. 2936—The Committee on Armed Services, having had under consideration the question of military pay and allowances for fiscal year 1983, reports the following bill (S. 2936) to authorize military pay and allowances, and for other purposes and recommends that the bill do pass.

### SUMMARY OF THE BILL

# PAYMENTS TO REPLACE CERTAIN TERMINATED SOCIAL SECURITY BENEFITS

Until 1981, the surviving spouses and children of deceased workers with Social Security coverage were eligible for the so-called mother's benefit and the student benefit. The mother's benefit was paid to the surviving parent of a child or children until the youngest child reached age 18. The children of retired, disabled or deceased workers were eligible for the student benefit if they were between the ages of 18 and 22 and attending school on a full-time basis. Since January 1, 1957, when military personnel began to participate in the Social Security system, their survivors have been eligible for the same mother's benefit and student benefit paid to the survivors of covered civilian workers.

Enacted into law on August 13, 1981, the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) made significant changes in these two benefits. Section 2205 discontinued payment of the mother's benefit at the point at which the youngest child reached age 16, instead of age 18. Payments to parents eligible for the mother's benefit for the month of enactment of the 1981 Reconciliation Act are not to be ended until September 1983.

Section 2210 of the 1981 Reconciliation Act provided that the student benefit would not be paid to new beneficiaries after August 1982. However, students 18 or older who were entitled to Social Security child's benefits in August 1981 and who began post-secondary school before May 1982 are eligi-

ble to continue receiving student benefits. The amounts of their benefits are not to be adjusted for changes in the cost-of-living after August 1981. In addition, beginning in August 1982, their benefit levels are to be reduced each year by 25 percent of the August 1981 level. Finally, no benefits are to be paid to these post-secondary students during the four summer months, beginning in 1982

Among the many Social Security beneficiaries affected by these changes are the surviving spouses and children of servicemen who died on active duty or later as a result of service-connected disabilities. On August 10, 1982, the Manpower and Personnel Subcommittee received testimony from Mrs. Madeline Van Wagenen, a representative of a group of such military survivors. Mrs. Van Wagenen testified that Social Security benefits formed an important part of the package of pay and benefits which were offered to servicemen to encourage them to join and remain in the military. Various Defense Department publications distributed to recruits and new officers describe the protection afforded their families by the Social Security system if they should die on active duty or later as a result of a service-connected disability. Mrs. Van Wagenen explained that the use of Social Security benefits by the military services to recruit and retain personnel constituted a commitment upon which military families relied in their estate planning.

The committee believes that the federal government should restore the Social Security benefits which were initially promised but then later denied the survivors of servicemen. Therefore, the committee recommends a provision which would authorize funds for the restoration of benefits comparable to the Social Security mother's benefit and the student benefit. Payment of these benefits would be renewed to the surviving spouses and children of military personnel who died on active duty before August 13, 1981, or who died later as a result of a service-connected disability incurred or aggravated before August 13, 1981.

The provision restores the mother's benefit to the surviving parent of a child between the ages of 16 and 18 at the level paid prior to the enactment of the 1981 Reconciliation Act. Future adjustments of this benefit after December 31, 1981, would be the average of the adjustments made by legislation in the Dependency and Indemnity Compensation paid by the Veterans Administration.

Like the mother's benefit, the student benefit would be restored to eligible post-secondary students between the ages of 18 and 22 at the level paid prior to the enactment of the 1981 Reconciliation Act. This benefit would be adjusted after December 31, 1981, by the average of the adjustments provided by legislation in the Veterans Administration educational assistance program of title 38, United States Code.

The provision recommended by the committee requires the Department of Defense to fund the restoration of these two benefits. The authority to designate the appropriate federal agency to administer the benefits is left entirely to the President.

The committee believes that the commitment made to the men and women who endured the unique hardships of military service justifies the restoration of these benefits. The families of servicemen who died or

were disabled in the line of duty should be afforded the protection they were promised.

SECTION-BY-SECTION ANALYSIS OF S. 2936

Section 601 of the bill is a free standing provision of law which provides benefits to certain surviving spouses and children of deceased military personnel as a replacement for certain Social Security benefits which were terminated by the enactment of sections 2205 and 2210 of the Omnibus Reconciliation Act of 1981 (Public Law 97-35; 95

Subsection (a)(1) provides for the head of the agency (defined in subsection (i) as the head of the department or agency designated by the President to administer this section) to pay a monthly amount to the surviving spouse of a member or former member of the Armed Forces (described in subsection (c)). This amount will be paid each month if the surviving spouse has in his or her care a child of the member or former member who is 16 years of age, but not yet 18, and is entitled to a child's insurance benefit under section 202(d) of the Social Security Act, and if the surviving spouse is not entitled for that month to a mother's insurance benefit under section 202(g) of the Social Security Act because she has that child or any other child of the member or former member in her care.

Subsection (a)(2) describes how to determine the amount of the payment under subsection (a)(1). It will be the amount of the mother's benefit that she would receive under section 202(g) of the Social Security Act if the child were under 16, disregarding any cost of living adjustments made after August 1981 under section 215(i) of the Social Security Act. However if the surviving spouse is entitled to a mother's insurance benefit because she has in her care the child of a person other than the member or former member of the Armed Forces, the amount of the payment for the child of the member or former member shall be reduced (but not below zero) by the amount she receives for the child who is the child of a person other than the member or former

Subsection (b)(1) provides for the head of the agency to pay a monthly amount to a surviving child of a member or former member of the Armed Forces who is 18 years of age but not yet 22 and is not under a disability as defined in section 223(d) of the Social Security Act. This amount will be paid each month if the child is a full-time student at certain defined post-secondary schools, colleges, or universities and if the child is not entitled for that month to a child's insurance benefit under section 202(d) of the Social Security Act or is entitled to that benefit only by reason of section 2210(c) of the Omnibus Reconciliation Act of 1981.

Subsection (b)(2) describes how to determine the payment under subsection (a)(1). It will be in the amount that a child would have been entitled to receive for that month as a child's insurance benefit under section 202(d) of the Social Security Act (as in effect before August 13, 1981), disregarding any cost of living adjustments made after August 1981 under section 215(i) of the Social Security Act, but reduced by any amount payable to such child under section 2210(c) of the Omnibus Budget Reconciliation Act of 1981.

Subsection (c) limits the applicability of this section by stating that a member or a former member of the Armed Forces (referred to in subsections (a) and (b)) is one who died on active duty before August 13, 1981 or who died from a service-connected disability incurred or aggravated before the date.

Subsection (d)(1) requires the Secretary of Health and Human Services to provide to the head of the agency that administers this section all necessary information. Subsection (d)(2) provides for implementing regulations to be prescribed by the head of the agency not later than 90 days after the date of enactment of section 601.

Subsection (e)(1)(A) provides that each time after December 31, 1981, there is an increase in dependency and indemnity compensation paid under 38 U.S.C. 411, the head of the agency shall increase the benefit paid to a surviving spouse under subsection (a). This increase shall be effective the same date and shall be the same overall average percentage increase by which dependency and indemnity compensation rates under 38 U.S.C. 1731(b) are increased.

Subsection (e)(1)(B) provides that each time after December 31, 1981, there is an increase in the rates of educational assistance allowances under 38 U.S.C. 1731(b), the head of the agency shall increase the benfits paid to a surviving child under subsection (b). This increase shall be effective the same date and shall be the same overall average percentage increase by which educational assistance allowance rates under 38 U.S.C. 1731(b) are increased.

Subsection (e)(2) provides that payments, if not in multiples of \$1, will be rounded down to the next lowest multiple of \$1.

Subsection (f) provides that payments under subsections (a) and (b) shall be made only for months beginning after the month in which this section is enacted.

Subsection (g)(1) requires the Secretary of Defense to transfer from the "Retired Pay, Defense" account of the Department of Defense to the head of the agency administering this section such amounts as the head of the agency determines to be required to make payments provided for under subsections (a) and (b) and to pay administrative expenses incurred in paying such benefits. Provision is also made for transfer of funds in advance of the payment of benefits.

Subsection (g)(2) requires the head of the agency to establish on the books of his agency a new account from which benefits will be paid and into which funds transferred by the Secretary of Defense shall be credited.

Subsection (h) permits the head of the agency and the Secretary of Health and Human Services to enter into an agreement which would allow for use of a single monthly payment to a person who was a beneficiary under either subsection (a) or (b) and was also a beneficiary under section 202(d) or (g) of the Social Security Act. This single monthly payment would be made only if it was agreed that this would be practicable and cost effective to the Government.

Subsection (i) defines "head of the agency" and gives certain other terms the same meaning they have in 38 U.S.C. 101.

Mr. CRANSTON. Mr. President, I am delighted to join with my distinguished colleague from Indiana (Mr. Quayle), in urging the Senate to approve our amendment to the pending continuing resolution. The purpose of this amendment is to restore to certain surviving spouses and children of deceased military personnel those benefits that were terminated by the enactment of sections 2205 and 2210 of the Omnibus Budget Reconciliation Act of 1981.

The provisions of the amendment we are offering today-and in which we are joined by Senators CHILES, DECON-CINI, HOLLINGS, NICKLES, SIMPSON, THURMOND, WARNER, JEPSEN, MOYNI-HAN, RANDOLPH, PACKWOOD, HAWKINS, and INOUYE-are drawn from the provisions of title VI of S. 2936, the proposed Uniformed Services Pay Act of 1982, as reported by the Committee on Armed Services. Those provisions were offered in committee by the distinguished Senator from Indiana (Mr. QUAYLE), on September 14, during the committee's markup, and were derived from the provisions of a measure-S. 2585, the proposed Military Widows and Surviving Children Benefits Restoration Act—that I introduced earlier this year with Senator QUAYLE. As of today, S. 2585 has 51 cosponsors: Senators Mitchell, Matsunaga, Riegle, Hart, Hatfield, Chiles, Biden, Ford, HAWKINS, CANNON, THURMOND, PRESS-LER, BURDICK, DECONCINI, HATCH, MEL-SASSER, TSONGAS, SARBANES, LEAHY, HUDDLESTON, INOUYE, BENTSEN, SPECTER, SIMPSON, STAFFORD, RUDMAN, GLENN, COCHRAN, HEFLIN, MURKOWSKI, Boren, Jackson, Baucus, Kasten, Lugar, Heinz, Mattingly, Weicker, KENNEDY, RANDOLPH, BRADLEY, HOL-LINGS, MOYNIHAN, METZENBAUM, BUMP-ERS, PERCY, EAGLETON, WARNER, PRYOR, and DENTON.

I am especially pleased that all eleven of my colleagues on the Veterans' Affairs Committee have joined as sponsors.

Our measure would restore, through the Department of Defense, most of the benefits that would, but for the enactment of last year's reconciliation measure, have been under the Social Security Act paid to these surviving spouses and children. These benefits will not be made retroactive but will begin in the month following the month of enactment. They will apply to survivors of those who died on active duty prior to August 13, 1981, the date on which the Reconciliation Act of 1981 was signed into law or who died later as a result of a service-con-

nected disability incurred or aggravated before that date.

# BACKGROUND

Mr. President, title XXII of the Omnibus Budget Reconciliation Act of 1981 contained provisions terminating or phasing out a number of social security survivors' benefits, payable when a worker with social security coverage dies, including the so-called mother's benefit and the student benefit.

Section 2205 of the Reconciliation Act amended the Social Security Act to end entitlement to the mother's benefit—the benefit payable to the surviving parent caring for a child or children—when the youngest child reaches age 16, instead of when the child reaches age 18 as under prior law. This provision took effect in September 1981, but allowed those who were receiving the benefit as of August 1981, to continue receiving it for 2 years, until September 1, 1983.

Section 2210 of the Reconciliation Act eliminated effective August 1, 1982—with a 4-year phaseout, using 25-percent reduction factors, for students receiving benefits as of May 1, 1982—the benefit paid to a deceased worker's child, from age 18 through 22, who is enrolled in a program of

postsecondary education.

Together, in fiscal year 1983, these two provisions will affect more than 200,000 surviving spouses and between 700,000 and 800,000 student-beneficiaries. The provisions were estimated to save a total of \$597 million in fiscal year 1983, rising to about \$2.5 billion annually in fiscal year 1986 when the phaseout in student benefits is completed.

SURVIVORS OF MILITARY PERSONNEL

Mr. President, since 1957, service in the military has been considered as "covered" social security employment. Based on data from the Veterans' Administration, those affected by the reductions imposed by the Reconcilia-tion Act include an estimated 26,500 surviving spouses and 70,000 children of individuals who died while in service or later as a result of service-connected disabilities, including 20,000 spouses and more than 50,000 children of individuals who served during the Vietnam war. These individuals, who lost their husbands and fathers in service to this country, are, in my opinion, one of our very highest national responsibilities.

Mr. President, it would be misleading to suggest that this Nation has not made provision, largely through programs administered by the Veterans' Administration, for assistance to these survivors. For example, the VA's program of dependency and indemnity compensation—DIC—provides for monthly payments to these individuals, and the program under chapter 35 of title 38 provides for a program of educational assistance to surviving

spouses and children. There are other forms of assistance as well, including health care, available from the VA. In many respects, it could be said that these benefits are quite generous, and I must admit that, when I became aware of this problem, my first response was that these individuals had been provided for in an appropriate fashion by the Federal Government.

Nonetheless, Mr. President, after reviewing the case made by those who contacted me, particularly a dedicated group of military widows who have taken the name "Survivors of Sacrifice," it became clear-as it has also become clear to the 52 of my colleagues who have cosponsored S. 2585—that the benefits provided through the Veterans' Administration were only part of a larger package of benefits that were, in effect, "sold" to members of the military. They were told by the Armed Forces that the social security benefits-those eliminated by the 1981 Reconciliation Actwould be there to help provide for their families in the event that they could not. They were instructed, in the course of orientation and training classes run by the Armed Forces, that these social security benefits would insure that in the event of their deaths their survivors would be taken care of. They were thus assured that this Nation would, in recognition of the ultimate sacrifice that any individual can make for the country, see that the needs of their widows and children would be met through a combination of VA, Defense Department, and social security benefits.

Yet, Mr. President, in August 1981, long after many of these individuals were laid to rest in graves with great honor in Arlington National Cemetery and elsewhere, these benefits were swept away in the tidal wave of recon-

ciliation legislation.

# NEED FOR ACTION NOW

Mr. President, the elimination of these benefits for the survivors of those who made the ultimate sacrifices for our country is a rejection of the obligation we have and the commitment we made to care for those who were left behind. I believe, as does Senator Quayle, that it is essential that the Congress take the necessary steps to restore these benefits this year to the estimated 26,500 surviving spouses and 70,000 children of individuals who died while on active duty in the military or later as a result of service-connected disabilities.

Already, the hardships on these military survivors are being felt. Under the Reconciliation Act, those children not in receipt of the student benefit as of May 1982 have lost the assistance the military promised would be available to them, and those grandfathered into the benefit by the act have suffered a 25-percent reduction in the amount of promised assistance. Like-

wise, surviving spouses with young children under the age of 16 as of August 31, 1981, have been denied the assistance this Nation committed itself to when it sent their husbands offf to war.

I do not believe these commitments should continue unmet into the next Congress. It is likely, indeed probable, that if not enacted this year, remedial legislation would not be enacted until late 1983.

Thus, Mr. President, Senator QUAYLE and I have joined together along with others, in offering the provisions of title VI of S. 2936 at this time so that enactment of the benefits restoration legislation may be accomplished this year.

### CONCLUSION

Mr. President, there are a number of individuals who are due considerable thanks for their efforts in connection with this legislation. First, of course, I want to thank the distinguished coauthor of the amendment, Mr. QUAYLE, for his efforts throughout the the development of this legislation and his instrumental support and initiatives in the Armed Services Committee. His staff, Hank Streenstra and Judy Buckalew, have also contributed greatly to these efforts. Second, I would like to extend my appreciation to the staff of the Senate Armed Services Committee, particularly to Rick Finn and David Lyles, for their help and cooperation throughout the committee's consideration of this effort.

I would also be remiss if I did not note the contributions of my own staff on the Veterans' Affairs Committee, Babette Polzer, Ed Scott, Jon Steinberg, and Ingrid Post, who assisted greatly on this legislation.

Finally, and most importantly, I want to note the enormous contributions of one particular individual, Mrs. Madeline Van Wagenen of Laguna Nigel, Calif. Her tireless efforts, unfailing enthusiasm, and sheer dogged determination is more than any other factor responsible for this legislation being put before the Senate today.

In my 14 years in the Senate, I have rarely encountered any individual as determined and persuasive as Mrs. Van Wagenen. As a complete novice to the legislative process, she came to town and took it by storm—trooping through the Halls of Congress with her determined band of other military widows; talking to aides, Congressmen, Senators; and convincing the White House that this legislation should be supported. She has learned the legislative process better than many professional lobbyists. Her stamina and perseverance are remarkable. I understand that when this issue is resolved, Madeline intends to "retire" to California. I will certainly be proud to have her back there as a constituent. Madeline, thank you for all you have

Mr. Presient, I urge my colleagues to join with us and support the pending amendment.

Mr. CHILES. Mr. President. strongly support the pending amendment which corrects an unfortunate situation affecting many survivors of military servicemen who lost their lives in service to this Nation.

The amendment would restore certain social security benefits to widows and children of servicemen who died during active duty. These benefits were eliminated as a result of the Omnibus Budget Reconciliation Act of 1981. It is time for the Congress to focus on this situation and take the necessary steps to insure the income securities of individuals affected by

the 1981 budget action.

Soon after the enactment of the Omnibus Budget Reconciliation Act, I began hearing from many widows of military personnel who were under standably concerned about how the budget action would affect their lives. The men who died in active duty had all been given assurances that, in the event of their deaths, their families would be taken care of. The Federal Government must fulfill this commitment and continue to honor the promises made to active duty servicemen and their families. In May of this year, I joined in sponsoring legislation, S. 2585, to restore the benefits eliminated by the budget action in 1981.

Now, Mr. President, I am pleased that the objective of S. 2585, that of correcting the unfair circumstances of some 26,500 surviving spouses and 70,000 children of deceased military personnel, can be achieved by adopting the pending amendment. This amendment restores, through the Department of Defense, the benefits that would, but for the enactment of the Omnibus Budget Reconciliation Act of 1981, have been paid to these surviving

spouses and children.

The spouses and children of those who gave their lives in service to their country are among our Government's most important responsibilities.

I hope the Senate will adopt this amendment and reverse the action taken by Congress which has affected so unfairly the survivors of active duty servicemen who lost their lives in service to their country.

The PRESIDING OFFICER. The

Senator from Connecticut.

Mr. WEICKER. Mr. President, this amendment raises matters that extend beyond the jurisdiction of this committee. It very well might be that those Senators that are affected would approve it. What I would like to do at this point is to return to the amendment of the Senator from Virginia in order that we might effect consultation before the committee takes a stand against, which I do not want to do. I think it would be wise to return to the pending matter that we left while the determination is made with Armed Services as to their attitude on this amendment.

Mr. QUAYLE. Will the Senator

yield?

Mr. WEICKER. And Senator STEvens, who asked to be consulted and is in a leadership meeting if anything of this nature came up.
Mr. QUAYLE. Will the Senator

Mr. WEICKER. Yes, of course.

Mr. QUAYLE. I can assure the Senator that we have contacted the staff of Senator STEVENS. They have the amendment. We gave it to them last night. I do not have an answer back from them.

Obviously, Armed Services is fully apprised of this since it originated there. I would have no objection, if in fact we would have immediate consideration, once we dispose of the Warner amendment, to come back to the Quayle-Cranston amendment.

Mr. WEICKER. The Senator may have immediate consideration. I have no objection to that. The problem is, as the Senator well knows, this is lengthy legislation on an appropriations bill. We are not prepared to take a stance on the substance, since it is not within our jurisdiction, of what has been presented here. I am trying to give the Senator the fairest possible chance to work this out. We have a convenient situation anyway which is going to take a few minutes while we alert those Senators that would be involved.

Mr. QUAYLE. Again, may I— Mr. WEICKER. As soon as we dispose of the amendment of Senator WARNER, I would ask unanimous consent that we then return to the amendment of the distinguished Senator from Indiana and the distinguished Senator from California.

The PRESIDING OFFICER. Chair would announce that if the amendment is laid aside, it would be automatic that the Senate would come back to the Cranston amendment.

Mr. WEICKER. Fine.

Mr. QUAYLE. I ask for the yeas and nays on the Cranston amendment.

The PRESIDING OFFICER. there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Without objection, the Cranston-Quayle amendment is laid aside. The question recurs on the Johnston amendment to the Warner amend-

UP AMENDMENT NO. 1510, AS MODIFIED

Mr. JOHNSTON. Mr. President, I send to the desk a modification of my amendment.

The PRESIDING OFFICER. The amendment is modified.

Mr. JOHNSTON. Mr. President, I yield to the Senator from California.

Mr. CRANSTON. Mr. President, I ask unanimous consent that Senator Packwood and Senator MITCHELL be added as a cosponsor to the Quayle-Cranston amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, these modifications are made at the suggestion of the distinguished Senator from Ohio to be sure that commercial and industrial feedstocks uses for natural gas will not be included in the formula. It also uses the term that he suggested, "notwithstanding any other

Mr. President, as drawn, this amendment will make it very clear that the use of this money will be for those who are cold, whether they use home heating oil or whether they use natu-

Under the present law, Mr. President, the Department of Energy can do three things with these overcharges. First, they can return it to those who were overcharged if they can identify them. In these cases, they did not identify the parties, so therefore that option is not open to them. Second, they can use it for strategic petroleum reserve purchases, or, third, they can return it to the Treasury.

In my judgment, either one of the latter two would be better than to skew this result by pretending that we are treating fairly the low-income people in this country who are in need

What we would do with the Warner amendment is to help disproportionately those States which have consumers of home heating oil as opposed to those States which have principally consumption of natural gas.

The Johnston amendment as presently drawn will take into consideration consumption of fuel, whether that fuel be home heating oil or natural gas. Other than that, it is making no change, and I can assure my colleagues there is no legal question involved in this matter.

There may be a question of whether you are a home heating oil State, and you want to help your State disproportionately. But if you are a natural gas State or if you use both, then in the interest of fairness you ought to go with a formula that recognized fuel as fuel and poor people as poor people and does not disproportionately help those States that use home heating

Mr. KENNEDY. Will the Senator vield?

Mr. JOHNSTON. Mr. President, if I may say, I should like a vote on the Johnston amendment. If I am voted down, I will not require a vote on the Warner amendment. I will accept, in other words, the results of the Johnston amendment later to be voted by

voice vote if that is the desire of the Senator from Virginia.

Mr. WARNER. Mr. President, first, was the Senator asking for the yeas and navs on his amendment?

Mr. JOHNSTON. Yes. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The yeas and nays were ordered.

Mr. WARNER. Mr. President, I also ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Will the Senator be good enough to yield?

Mr. WARNER. I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, may we have order in the Senate, please?

The PRESIDING OFFICER. The Senate will be in order. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, if I may have the attention of the Members of this particular measure, it is not as described by the Senator from Louisiana. I think it is important to understand what we are talking about. Under the Emergency Petroleum Allocation Act of 1973, a mechanism was set up so that if consumers were overcharged, they were going to be able to get a recovery.

Now there were overcharges. We all read about them in the newspapers, and the consumers and the Government brought actions about the overcharges by the major oil companies, and in many cases there have been some orders or settlements. As a result of that, money was set aside for the payment of these overcharges.

There has not been a process that has been worked out in the past about how the money would be distributed. The Senator from Virginia has come on up with a way to distribute that, what I consider to be a very fair way, a formula that will give basically back to the States in relationship to the amount of product that was used by those States.

The fact remains, Mr. President, that there are settlements on this

The Senator from Louisiana says all right. Now let us change the rules. Instead of just using the formula on the basis of the use of oil, we will use it now in terms of natural gas.

These funds do not involve allegations or findings about overcharging on natural gas. But the Senator from Louisiana says we want the distribution of the formula on the use of natural gas as well as oil.

Anyone in here who does not believe that if you accept the Johnston formula that all those consumers who might benefit from final settlements and think they are going to benefit from final settlement according to the DOE formula and find out that the Senate here on the continuing resolution has changed the rules of the game and expects that we are going to distribute that money in the manner suggested by the Senator does not understand the resolve of those affected.

So, Mr. President, I certainly hope that the efforts of the Senator from Virginia to let the States make the decision of how most favorably and equitably that money can be distributed would be the position that will be ac-

cepted by the Senate.

I think what his interest is, as I understand it, is to get these funds out. Let the States make the determination about how to get them out to the people who have been affected. Let the States make the judgment about the distribution and get the money out to these States.

I dare say if we accept the formula of the Senator from Louisiana, there will not be any distribution of moneys just this year, next year, or future years because this formula will be challenged vigorously by those who

will lose out.

So I hope, Mr. President, that the position of the Senator from Virginia, which I think is fair and equitable, would be maintained. I hope that in the future I would have the good opportunity of working with the Senator from Louisiana in finding ways that we can help meet the needs of needy people who use energy, whether it is natural gas or whether it is fuel oil.

There is a great need, a desperate need, and I welcome the opportunity

to do it.

We have basically abdicated that responsibility ever since we passed the windfall profit tax. Read the report. It says 25 percent of the windfall profit tax should go to help needy people, and we have not even allocated 20 percent of that windfall profit tax to those particular needs.

I yield to no one in my concern about those individuals and particularly in areas of the country this year which are facing high rates of unem-

ployment.

But I think the Senate deludes itself to think that under the Johnston formula you are going to get the money

think the Warner proposal as modified is fair and equitable and will achieve what the Senator from Virginia hopes to achieve, and I hope that his position will be sustained.

Mr. JOHNSTON. Mr. President, I do not want to drag this out, but the Senator from Massachusetts said I misstated this argument, and that is decidedly not true. It is the Senator from Massachusetts who is confused as to the facts, and let me tell you exactly what they are.

The Senator from Massachusetts said that we have a fund here that involves final settlement where consumers are designated. That is decidedly not so in this amendment, and I invite my colleagues to read the Warner amendment and the Johnston amend-

The Senator from Virginia will tell you that that is not so.

What we have involved here is a fund collected from those who overcharged but where the consumers cannot be identified, and that is the fund involved, and no other money.

If it were involved with those who could be identified then indeed they should receive the money and they would have a vested right to receive that money.

That money is not involved here but rather money from consumers who cannot be identified.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yield for a question.

Mr. KENNEDY. All I want to do is say I would agree with the Senator from Louisiana on what that fund is? It is orders, judgments, and settlements for the benefit of consumers on the basis of crude oil and product overcharges. Some of those are difficult to identify but that does not mean there should be no remedy.

Mr. JOHNSTON. The Senator would agree then that these are consumers who cannot be identified and if the consumers cannot be identified then this money is not distributed to them or to the States. As to the consumers who can be identified their money is distributed according to court order.

Are we in agreement on that?

Mr. KENNEDY. The Senator is correct, where specifically identified parties can sufficiently prove injury they have been able to receive a settlement or favorable finding in a court of law. But we are talking about classes of consumers.

Mr. WARNER. Mr. President, if the Senator from Louisiana will yield, he has touched on the very point of this issue. The classes of consumers who were injured have been identified on a statewide basis, and they can be repaid according to the formula in this amendment.

Mr. JOHNSTON. The Senator is dead wrong. That formula is a formula of how much total petroleum products were consumed in those States. It has nothing to do with overcharges from the Department of Energy.

Mr. WARNER. You can assume that there is some relevance between those overcharges and the amount of petroleum in the States, but you cannot make the assumption that there is any relationship between use of natural gas and the overcharges that have been paid into the escrow account.

Mr. JOHNSTON. I did not try to make that assumption, but to say there is a necessary correlation between the percentage of refined petroleum products consumed and overcharges that may occur at random across the Nation is just not correct. I mean it is an assumption supported by nothing and built out of an air castle.

I am not trying to say there is any connection between natural gas consumption and these overcharges either. There may or may not be.

I do know that the program you are seeking to fund, low income energy assistance, there is a connection between those who use natural gas and those poor people who cannot pay for it.

Indeed we spent the better part of an evening here talking about people whose natural gas prices have gone up—I do not know how much. Senator Eagleton was in on that debate. But it was by a great deal.

I just think if we are going to protect poor people they should be protected.

Two more short comments: The Senator from Massachusetts says we are changing the rules of the game. Decidedly not. There are no rules of the game that would say this money would be distributed either to the users of petroleum products or to the State wherein that is used. Rather, it can be distributed to the consumer when they can be identified and these cannot be identified and to the strategic petroleum reserve or to the Treasury.

So, Mr. President, I think the case is

Mr. LONG. Mr. President, will the Senator yield on that point? Mr. JOHNSTON. I yield.

Mr. LONG. Let me ask the Senator do both amendments provide that in any case the people who are going to receive the money would be poor, or does one amendment provide that you take care of poor people who need it and the other amendment provides that you take care of all people who need it?

Mr. JOHNSTON. Both of them give it directly to the States to use in their low-income energy assistance program of weatherization program.

Mr. LONG. So in either case the money would go to the—

Mr. JOHNSTON. To poor people.

Mr. LONG. To poor people. Mr. METZENBAUM. Not necessari-

Mr. WARNER. Mr. President, if the Senator will yield, the Senator from Virginia broadened it to include not only low-income energy assistance but also weatherizaiton and other energy-related projects. The Governors are encouraged to make at least some of the funds available for low incomes, elderly, and handicapped, but the discretion rests with the Governors.

Mr. JOHNSTON. That is correct. The same is true in my amendment.

Mr. WEICKER. Mr. President, I hope that we can get to a vote on this matter. I remind my colleagues that I know that I have in hand right now 30 controversial amendments.

Given a half-hour for each, plus voting time, if we go through the night we are talking about ending this at noon tomorrow.

Mr. JOHNSTON. I am through.

Mr. WEICKER. I would hope that all amendments we could as best as possible—everybody will have their rights—move them along.

I will stay here with the chairman and the rest of the Senators as long as everybody wants, but I do not think that is what everybody wants.

Mr. WARNER. Mr. President, I am happy to summarize in 3 minutes and then yield to the Senator from Ohio to make his comments, and then I will

Mr. METZENBAUM. Mr. President, in this instance not everybody is right and not everybody is wrong. It is a rather simple fact that these funds came about by reason of overcharges pertaining to oil, and the money accumulated for that reason, and now there is a question of not being able to find appropriate recipients in order to give the money back.

The dispute between the Senator from Virginia and the Senator from Louisiana has to do with who is now going to get that money. The Senator from Virginia comes in with a formulation that says you get it based upon the amount of petroleum products that you use.

The Senator from Louisiana says you get it based upon the amount of petroleum as well as natural gas that

The Senator from Louisiana is willing to eliminate the industrial usage of both petroleum and natural gas.

On the basis of where the money came from you have to say that the Senator from Virginia is 100 percent right because he makes his allocation based upon oil. On the basis of where the money is needed most, the Senator form Louisiana certainly makes a strong argument that gas should also be taken into account. The chips have to fall where they may, and people have to decide which is the right way to go.

I will say that there is an additional amendment. We are taking about \$250 million, an additional amendment for all additional funds which may be made available.

The Senator from Virginia accepted my amendment in that respect. I think it is a question now of an up or down vote on the Johnston amendment. I intend to vote for it, but I cannot say that somebody who decides to vote against it is wrong because they voted in the opposite way.

Mr. HATFIELD. Mr. President, I rise in support of the amendment of-

fered by my colleague from Virginia, Senator Warner.

The need for providing energy assistance to the poor has been demonstrated on several levels, particularly in natural gas consuming States where prices have escalated substantially during these early winter months.

As well, Mr. President, the amendment offered by my colleague will resolve a 4-year-old stalemate over how to equitably and expeditiously compensate individuals who were injured by petroleum pricing violations during the period of price controls.

Mr. President, for those like myself who have monitored DOE's progress in resolving these settlement cases, few can argue with the merits of the proposal offered by the Senator from Virginia. I urge my colleague to support this worthy amendment.

Mr. WARNER. Mr. President, in quick summary the difference between the Senator from Louisiana and the Senator from Virginia is simply a means of how to distribute the funds. I received my formula after consultation over the past 48 hours with the Secretary of Energy, who will have the direct responsibility to draw the checks and make them payable to the Governors. He assured me if Congress acts in accordance with this bill, that those checks will be forthcoming very quickly.

Likewise he assured me if we followed the substitute formula as recommended by the Senator from Louisiana, he had severe doubts as to whether or not he could at any time effect the transfer of these funds. We, I think, are unanimous that people need help. This particular fund has been burning a hole in the Department of Energy's pocket for some many years. Let us put it to use to heat homes during this winter season.

So I urge my colleagues to accept my amendment and reject that of the Senator from Louisiana.

Mr. WEICKER. Mr. President, I move to table the amendment of the Senator from Virginia, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Connecticut to lay on the table the amendment of the Senator from Virginia. The clerk will call the roll.

The legislative clerk called the roll.
Mr. STEVENS. I announce that the
Senator from Arizona (Mr. Goldwater) and the Senator from Maryland (Mr. Mathias), are necessarily
absent.

I also announce that the Senator from Utah (Mr. HATCH), is absent due to illness.

and voting, the Senator from Utah prayer. (Mr. HATCH), would vote "nay."

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), and the Senator from New York (Mr. MOYNIHAN), are necessarily absent.

The PRESIDING OFFICER (Mr. GORTON). Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 38, nays 57, as follows:

### [Rollcall Vote No. 434 Leg.]

### YEAS-38

Andrews	Hatfield	Mitchell

## NOT VOTING-5

Glenn Movnihan Goldwater Mathias

So the motion to lay on the table UP Amendment No. 1509, as modified, was

rejected. Mr. WARNER. Mr. President, move to reconsider the vote by which the motion to lay on the table was re-

Mr. STEVENS. Mr. President, I move to lay that motion on the table. The motion to lay on the table was agreed to.

#### SUSPENSION OF CONTINUOUS FOR SESSION CHAPLAIN'S PRAYER

(The following proceedings occurred at 12 noon on Friday, December 17, 1982, the Senate having been in continuous session since convening at 9:45 a.m., on Thursday, December 16, 1982, all under the legislative day of Tuesday, November 30, 1982:)

The PRESIDING OFFICER. The hour of 12 o'clock noon having arrived, and the Senate having been in continuous session since yesterday, pursuant to the order of the Senate of February 29, 1960, the Senate will sus-

I further announce that, if present pend while the Chaplain offers a

### PRAVER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, the Senators are very weary in body and mind. The committee, office, and supporting staffs are weary. The responsibilities of Government weigh heavily upon them all, while the promise of a joyful family Christmas languishes. In such circumstances heat tends to transcend light, minds function with less discern-

ment and precision.

Thy Word declares, "God is our refuge and strength, a very present help in the time of trouble." (Psalm 46: 1) "My flesh and my heart may fail, but God is the strength of my heart \* \* \*." (Psalm 73: 26) "The heart \* way of the Lord is strength to the upright \* \* . (Proverbs 10: 29) "He giveth power to the faint, and to them that have no might He increases strength." (Isaiah 40: 29).

Gracious Father, I pray for Thy direct intervention in the lives of the Senators today in a way that all may know we have been visited by Almighty God. And let us take seriously our Lord's generous invitation, "Come unto me all ye who labor and are heavy laden and I will give you rest." (Matthew 11: 28) In His name we pray. Amen.

## FURTHER CONTINUING APPROPRIATIONS, 1983

The Senate continued with the consideration of the joint resolution (H.J. Res. 631)

The PRESIDING OFFICER. The Senate will be in order so that we can hear the Senator from Oregon.

Mr. HATFIELD. Mr. President, let me continue the next few steps here

along this tortuous journey.

We have temporarily laid aside an amendment that has been offered by Senator QUAYLE and others. As soon as we dispose of this particular issue that brings us back to, I believe, the Johnston amendment. We will move back to the Quayle amendment and dispose of it in a very fast order. I think it is about ready to go to a record vote. After that, it is hoped that we can move to the Baker-Dole-Domenici amendment, which has to do with striking the jobs program in title II of this continuing resolution.

There is an agreement amongst the principals that there be a half-hour

equally divided.

Therefore, at this time I would like to propound the unanimous-consent request of one-half hour on the Baker-Dole-Domenici amendment to be equally divided, without any secondary amendments.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President. what I would like to suggest next is that we would like to get a listing of all the defense amendments that will be offered on the defense issue or on the defense part of this continuing resolution. If we can get a list of those at this time, what I would propose to do is then informally, while continuing debate on the current issue, to go around and try to find a time agreement on each one of those and try to take them up in some kind of sequential order to get that subject and that material out of our way as sort of an experiment to see if we can expedite this whole thing by keeping the subject of these amendments on one issue or on one title.

At this point, Mr. President, I should like to inquire of the Senators, those who expect to raise an amendment on the titles, if we could get a show of hands at this time. The Senator from Colorado.

Mr. HART. It would be my intention to have possibly two amendments, one having to do with nuclear aircraft carriers and the other having to do with MX.

Mr. HATFIELD. The Senator from Arkansas.

Mr. PRYOR. My amendment will be relative to the Maverick missile, attempting to take the production fund out and leave the R&D in-that is one.

Mr. HATFIELD. The Senator from Wisconsin has one on a carrier that I know of

Any others on the defense side-the Senator from Maine, the Senator from Washington.

Mr. SIMPSON. Mr. President, I may have one, I am not certain.

Mr. HATFIELD. On what part of the bill?

Mr. SIMPSON. On the MX.

Mr. PROXMIRE. If the chairman will yield, I had one of the aircraft carrier, but I shall merge it with Senator HART'S.

Mr. CANNON. I have one of the F-16, Mr. President. I may have another one. I am not sure.

Mr. HATFIELD. I believe the Senator from Maine (Mr. Cohen) has four. Would the Senator list those subjects in the four?

Mr. COHEN. One has to do with the authorization of the third battleship Missouri; one has to do with taking the fence off the language, at least, dealing with the rapid deployment force; there is a third dealing with LSD-28. And there is one other, I believe on the T-17. Senator Tower has the T-17.

Mr. BUMPERS. Will the Senator from Maine yield for a question?

Mr. COHEN. Yes, Mr. President.

Mr. BUMPERS. Is the one on the battleship a long lead item?

Mr. COHEN. Yes; it is. Mr. BUMPERS. I approve.

Mr. NUNN. Will the Senator yield for a question?

Mr. HATFIELD. Certainly.

Mr. NUNN. The Senator is asking about military amendments?

Mr. HATFIELD. We are trying to get a listing of all pending amendments that will be offered on the defense part of this bill.

Mr. NUNN. I have one amendment that will be offered. It is costations support and repositioning equipment.

Mr. HATFIELD. And a pay bill by Senator from Iowa. Senator Tower has two amendments. Would he give us a title or a subject of each of those?

Mr. TOWER. One is to reduce defense spending.

Mr. HATFIELD. The Senator from Texas, I think-

Mr. TOWER. May I take this opportunity to lobby just a little bit? I want to delete \$827 million from defense spending.

Mr. HATFIELD. Billion?

Mr. TOWER. Million. And one on

specialty metals.

Mr. HATFIELD. Mr. President, I believe we can proceed in an orderly fashion if the Senators would please stay on the floor so we can get an idea of the time factors required so we can put them in a package and get them in sequence, get that subject behind us. and get on to another subject.

Mr. President, what is the pending

question?

VOTE ON UP AMENDMENT 1510

The PRESIDING OFFICER. The pending question is the amendment by the Senator from Louisiana (Mr. JOHNSTON) to the amendment by the Senator from Virginia (Mr. WARNER).

Mr. HATFIELD. May we move this to a vote now?

Mr. WARNER. I am agreeable if my colleague is.

Mr. JOHNSTON. Yes.

Mr. HATFIELD. Are the yeas and nays called for?

Mr. JOHNSTON. Mr. President, if the Senator will yield, the Johnston amendment has the yeas and navs ordered. I am willing to take the result of that. After all, we voted on a motion to table and vitiate the yeas and nays on the Warner amendment.

Mr. WARNER. I indicated quite clearly to my colleague that there are Members who desire the yeas and nays on my amendment. It has been offered. I wish to let it stand.

Mr. HATFIELD. Would a unanimous-consent request be in order to vitiate the yeas and nays at this time?

Mr. WARNER. No, no, Mr. President. The yeas and nays have been ordered on the amendment.

Mr. HATFIELD. Mr. President, may we move to a vote?

Mr. GORTON. Is there further debate on the amendment of the Senator from Louisiana? If not, the yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER), and the Senator from Maryland (Mr. Mathias) are necessarily absent.

I further announce that the Senator from Utah (Mr. HATCH), is absent due to illness.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH), would vote "nay."

Mr. CRANSTON. I announce that the Senator from Ohio (MR. GLENN) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 40. nays 56, as follows:

[Rollcall Vote No. 435 Leg.]

### NOT VOTING-4

Glenn Hatch Mathias

So the amendment (UP No. 1510) as modified was rejected.

WARNER UP AMENDMENT NO. 1509, AS MODIFIED The PRESIDING OFFICER. The question recurs on the amendment by

the Senator from Virginia

Mr. HATFIELD. Since we are ready to go to an immediate vote I ask unanimous consent

Mr. FORD. Mr. President, a parliamentary inquiry

The PRESIDING OFFICER. The Senator will state it.

Mr. FORD. How are we ready to go to an immediate vote?

Mr. HATFIELD. My understanding was that debate had occurred and we were voting then first on the Johnston amendment, and that has been tabled, and then go directly to the Warner amendment because the Warner amendment is pending.

Mr. FORD. The Warner amendment is pending now. Does it have a time agreement?

Mr. HATFIELD. It has the yeas and nays ordered.

Mr. FORD. It does not have any time agreement?

Mr. HATFIELD. No time agreement. Mr. FORD. I wish to make a statement.

Mr. HATFIELD. Mr. President, I wonder if the Senator will yield for the purpose of asking for a 10-minute rollcall vote on the Warner amendment when we do get to a vote.

Mr. FORD. That suits me fine.

Mr. HATFIELD. Mr. President, I ask unanimous consent that on the Warner amendment, that will follow soon we have a 10-minute rollcall vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I have another one.

I ask unanimous consent that we set aside the Quayle amendment temporarily to go to this pending issue. The yeas and nays have been ordered on the Quayle amendment. The authors of the amendment indicate we will go to an immediate vote as far as they understand. I, therefore, ask unanimous consent to have a 10-minute rollcall vote on the Quayle amendment

The PRESIDING OFFICER. there objection to the request of the

Senator from Oregon?

Mr. METZENBAUM. Mr. President, reserving the right to object, and I shall not, will the Senator be good enough to ask that there be no debate?

Mr. ROBERT C. BYRD. This is not adequate notice for a 10-minute rollcall vote. I have no objection to the second one but I certainly do to the first one.

Mr. HATFIELD. I did not hear the Senator.

Mr. ROBERT C. BYRD. I said we did not receive adequate notice for a 10-minute rollcall vote. I have no objection to the 10-minute rollcall vote on the second one.

Mr. QUAYLE. Let us have back-toback votes.

Mr. HATFIELD. Does the Senator raise objection to a 10-minute vote on the Warner amendment, the first amendment?

Mr. ROBERT C. BYRD. On the first one only; yes.

Mr. HATFIELD. I now then propound the unanimous-consent request for a 10-minute rollcall vote on the Quayle amendment.

Mr. QUAYLE. Back-to-back votes.

Mr. METZENBAUM. With n debate in between.

Mr. HATFIELD. Back to back with the Warner amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I thank the Chair. The PRESIDING OFFICER. The Senator from Kentucky is recognized.

Mr. FORD. Mr. President, I wish to ask the distinguished floor manager of the amendment, the Senator from Virginia (Mr. Warner), how is the fine and the funds assessed and what does it go on, just domestic crude? The money that you are applying here, where does it come from? How do you arrive at it?

Mr. WARNER. The fund-

The PRESIDING OFFICER. The Senator will suspend. The Senate will be in order, in order to hear the query, so that in order that the query and the answer may be heard.

The Senator from Kentucky has the floor.

Mr. FORD. I am asking the distinguished Senator from Virginia a question. He is about to answer it.

Mr. WARNER. Mr. President, this fund was established pursuant to legislation passed in 1973. It is a fund that is accumulated from overcharges on refined petroleum products.

Mr. FORD. Domestic? Mr. WARNER. Yes.

Mr. FORD. Only domestic?

Mr. WARNER. I would have to check that.

Mr. FORD. The reason I ask the question is many of the consuming States have been paying the entitlements for the Northeastern States and now we are being shut out on the basis that we asked for a little help as it relates to natural gas. Now we have been paying the entitlements. The oil-consuming States are going to get all the payments and you leave the natural gas consumer States out again. It just does not make sense that you move into that arena and make those consuming States, of which mine is one, that we foot the bill and get nothing in return.

My State gets 1.303 I think or something like that.

Our State has been paying for a long time, and then when it comes down to share and share alike you do not let us share.

So I hope that you give me some information where the oil-consuming States in the Northeast are entitled to all of it, and the other States are not entitled to any of it, because we had to use natural gas in order to let you use oil over the years.

Mr. WARNER. Mr. President, I wish to advise the Senator from Kentucky that this is the most equitable distribution that could be devised based on the legal justification for the collection of the funds in the first place. My staff and I have been working diligent-

ly for a period of 48 hours to develop a formula which we believe could sustain a court challenge.

My distinguished colleague from Louisiana was not able to tell us how the States would be allocated the funds under his formula. Some States obviously would get more, others less, but there is nothing before the Senate today to indicate the specific allocation under his plan.

Mr. FORD. Would the Senator then be willing to set his amendment aside so that we can develop a formula and give it to you later this afternoon before we go to final passage?

Mr. WARNER. The yeas and nays have been ordered.

Mr. FORD. You can vitiate those. Mr. WARNER. The Senator from

Virginia would object. Mr. FORD. You can do it.

Mr. WARNER. I do not intend to do

Mr. FORD. But there is something definitely unfair about this, and the consuming States are not being treated properly, and my State happens to be one of them.

That happens all the time. You do not win them all, but I do not intend to be playing dead, because the Eastern States get the bulk of this.

Mr. WARNER. I wish to advise the Senator from Kentucky that I have been working on this for 12 hours, and I have been on the floor for 8 hours.

Mr. FORD. You did not ask me when I was here. In fact, this might just be legislation on an appropriation bill when you get right down to it.

Mr. WARNER. I circulated a "Dear Colleague" letter outlining the entire program. It has been in your office for some 24 hours.

Mr. FORD. Mail goes about as fast here as it does back home.

Mr. President, I do not want to take up any more time. I know what people are wanting here. But it seems to me if you want to be fair, and you have worked 48 hours with the Department of Energy, and so has your staff and all that, you might give us 5 more hours to see if we can come up with a formula that would fit the legal aspects. We have done a lot of things here and let staff work it out after we pass it. Now you want staff to work it out before, and you will not give us an opportunity to finish it. You are being unfair to those consuming States and I think those States who lose in the particular way ought to vote against it and say "no" to you.

Mr. WARNER. I can assure the Senator from Kentucky that the representations made to me by the Secretary of Energy's as well as his principal advisers are that in their judgment this is the only formula that will work and be able to be sustained in a court chal-

Mr. FORD. If the Senator will yield, did the Senator ask about natural gas?

Mr. WARNER. The Senator did inquire with respect to adjusting this formula along the lines of the amendment offered by the Senator from Louisiana.

The reply from the Department of Energy would be it would pose serious problems. It would be doubtful if the program could stand up in court.

Mr. FORD. When did the Senator advise the Department of Energy of

this request?

Mr. WARNER. I talked to the Secretary of Energy yesterday morning at about 9:35. I remember it precisely because he was on his way to a Cabinet meeting, whereupon his staff worked with my staff throughout the day.

I met later with some of his staff people. We then again this morning at 6 a.m. made contact with various persons on the Secretary of Energy's staff regarding the Senator from Louisiana's amendment, and we were advised that the proposed formula as submitted by the Senator from Louisiana would present serious legal challenges.

Mr. FORD. Then did the distinguished Senator work from 9:35 yesterday morning until this time on natural gas also to try to put a formula together or was it based on crude?

Mr. WARNER. What was the time, what was the day? We are running into—

Mr. FORD. You said yesterday you talked to the Secretary of Energy at 9:35 precisely.

Mr. WARNER. That is right.

Mr. FORD. Then you worked all day yesterday with the Department of Energy and your staff up until this time to put the formula together?

Mr. WARNER. I cannot say that, Senator. I have to tell him I worked at great length on the MX missile program and other issues that are my responsibility also.

Mr. FORD. The only thing I say is once they told you you could not put a formula together for natural gas you did not even try.

Mr. WARNER. The first I knew about a formula for natural gas was when the Senator from Louisiana approached me and said that he had in mind a perfecting amendment. I am afraid I cannot recall precisely when that was done. But immediately upon receiving that we contacted the Department of Energy and were advised that in their best judgment the amendment offered by the Senator from Virginia stood the best opportunity of effecting a program and of checks flowing during the cold winter months.

Mr. FORD. As the Senator knows, a lot of things come up and so many things come up we cannot check them all.

I again ask him in his good offices to set aside his amendment to allow us to see if we can work out a formula. I see him shaking his head, and I thank him for his courtesy.

Mr. WARNER. I thank the Senator

from Kentucky.

Mr. EXON. Mr. President, may I ask a couple of questions of my friend from Virginia? It seems to me to start out that obviously this has degenerated into a disposition of money eventually depending on which State is located where you burn oil or natural gas for the heating of homes.

As I understood from the conversation that I had with the Senator from Virginia a few days ago where I complimented him on his initiative in this area, it is to take the \$200 million that is not doing anyone any good there now and put that to some good use, and what better use could there be today than to have the States help the poorest people who cannot pay their heating bills.

Is this the basic trust of the situation as you understand it, Senator

WARNER?

Mr. WARNER. The Senator is correct. The amendment is drawn is such a way as to provide the greatest measure of flexibility, but the legislative history places emphasis on the lowincome, the elderly, and the handi-

Mr. EXON. That being the case, what portion of your formula for distribution between the States is based upon how many of the poorest people reside in the State? Let us say, for example, there were no poor people entitled to benefit from the program in Nebraska or they were born in Nebraska and they were then living in Rhode Island. Is there anything in your formula that makes any distinction as to where it is most needed to help the poor people which your formula provides?

Mr. WARNER. No; there is not. The formula is not based on need, but I am confident that the funds will flow to

many needy persons.

Mr. EXON. I would suggest to my friend from Virginia that having conceded that there is possibly much more wrong with the formula that you have devised, and I think you tried to make it fair, but it seems to me in this particular instance we should have at least some portion of the distribution based upon where the most need is, and I am wondering if, under those circumstances, the Senator from Virginia would agree to set aside his amendment for a couple of hours to give us some time to look into that?

Mr. WARNER. Mr. President, again this fund is the result of legislation passed in 1973 and the moneys represent overcharges with respect to the use of petroleum. It is the best judgment of those under the proposed act who are going to manage the distribution of the funds for the Government that this is the formula to be used. I know we could come up with a number of formulas, but I would not be able to give my colleagues the assurance that that formula could withstand the like-

lihood of a court challenge.

Mr. EXON. Along that line I would simply say to my friend from Virginia if the thrust of the legislation you are proposing is designed to help the poor people pay their bills and if you are concerned about a court challenge as to the fairness, I am not a lawyer, I have never been a judge, but if the thrust of the legislation is to help the poor and you have no part of that formula distributing this money to where most of the poor are, I would think you would be in pretty poor shape in front of the court is the point I am trying to make.

Mr. HATFIELD. Will the Senator

yield?

Mr. WARNER. Yes.

Mr. HATFIELD. I wonder if I could make a suggestion. We have been on this issue now for a number of hours. I wonder, if there is no desire to move this to an immediate vote, if the Senators would be willing to set it aside temporarily and those who are concerned about this get together in a little corner back here and resolve these problems. I think we are now really at a point where we are imposing upon the entire body this extended conversation or these remarks and concerns of three or four, I know it represents more than just three or four.

Can we not then move on with other amendments while these matters are discussed in private and by that time try to get some kind of an agreement? Otherwise, I would like to urge the Senators to let us move to a vote.

Mr. WARNER. Mr. President, I respect the chairman's efforts on behalf of those who feel that more time is needed. But I wish to point out again that I have worked on this and notified my colleagues for some 36 hours. I have been in here on the floor since 4 or 5 o'clock this morning. And while I might be of a mind to try and help, there are a number of Senators who have been associated with me who are pushing this effort forward.

This is the first instance, 1 minute before the final vote, before this particular issue was challenged. In fairness to the majority of our colleagues who have voted twice on this already, I think the vote should go forward.

Mr. FORD. Mr. President, will the chairman yield to me?

Mr. HATFIELD. Yes.

Mr. FORD. I have no intent to hold up. You get hurt here with good intentions and your constituency gets hurt with good intentions and you just cannot dot every "i" and cross every "t" and watch every amendment on this floor. We already had 20-some amendments. And I guarantee you the Senator from Virginia has not read every amendment that has been raised

today. I will say I have not read every one of them

I just wanted to have an opportunity to bring some points up that I think are relevant.

The domestic-producing crude oil paid the entitlements and States under this formula they are getting hurt a double whammy. I represent a consuming State and they are getting hurt: it is not fair.

If this body wants to vote for something that is unfair, a formula that does not help the majority of the needy, then this body has a right to do it and I will not stand in the way of

asking for a vote.

Mr. WARNER. Mr. President, there are needy people in every State and this is a relatively small amount going to every State. I dare say there are recipients in each State well qualified to take this money and more than likely far more recipients than there is money to be allocated.

SEVERAL SENATORS. Vote.
The PRESIDING OFFICER (Mr. ARMSTRONG). The question is on agreeing to the amendment of the Senator from Virginia (Mr. WARNER). The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER), the Senator from Maryland (Mr. Mathias), and the Senator from New Mexico (Mr. Schmitt), are necessarily absent.

I further announce that the Senator from Utah (Mr. HATCH), is absent due

to illness.

I futher announce that, if present and voting, the Senator from Utah (Mr. HATCH), would vote year.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), is

necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wisning to vote?

The result was announced-yeas 76,

nays 19, as follows:

[Rollcall Vote No. 436 Leg.]

Glenn Hatch Schmitt Goldwater Mathias

So the amendment (UP No. 1509), as modified, was agreed to.

Mr. WARNER. I move to reconsider the vote by which the amendment was agreed to.

Mr. RIEGLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WARNER. Mr. President, I ask unanimous consent that the Senators from New York (Mr. D'AMATO) and my partner (Mr. Kennedy) be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I ask unanimous consent that the Senator from Idaho (Mr. McClure) be added as a cosponsor of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I ask the Chair that I be added as a cosponsor of the Quayle-Cranston amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

(By request of Mr. QUAYLE the name of Mr. D'Amato was added as a cosponsor.)

## VOTE ON UP AMENDMENT 1511

The PRESIDING OFFICER. The pending question is the amendment of the Senator from Indiana. Under the previous order, it will be a 10-minute rollcall vote. The clerk will call the roll.

Mr. SIMPSON. Mr. President, this amendment is one of the most deserving pieces of legislation to be offered for consideration during these last few days of the 97th Congress. The Nation must honor its commitments to those who gave their lives in its defense; the Congress must assure that such promises are not perceived to be in question-surely no one intended them to

I wish to emphasize that I fully support the amendment. I was a cosponsor of this legislation earlier in its history, and I was instrumental in advising my colleagues of my strong support so that many of them joined me in cosponsorship. I am pleased that over 50 Senators have lent their backing to it. Certainly, it has my heartiest support.

There are some who might question my speaking in favor of an amendment to the continuing resolution which might not be considered germane. However, this amendment is dif-

ferent. It has been through the committee hearing process in the Armed Services Committee: that committee supports its passage and included a proposal for it as part of the military pay bill. It is only being offered as an amendment to the continuing resolution now that it seems as if the military pay bill will not be brought up this year. As we all know, the President has lent his support to the restoration of these lost benefits. To reverse this true miscarriage of justice, it is appropriate that this former benefit to the survivors of our Nation's service-connected deceased veterans be restored now, in the continuing resolution.

Mr. THURMOND, Mr. President, I am pleased to be a cosponsor of this amendment which would restore social security benefits to the surviving spouses and children of certain members of the Armed Forces who died as a result of service-connected disabilities

These are benefits which were promised to service members upon their induction into the Armed Forces, and we can not abandon the responsibility which we have to fulfill our promise.

Mr. President, the restoration of these benefits would be a demonstration, not only to the affected beneficiaries, but to all those who may serve in the future, that the Federal Government keeps its commitments. We can never expect our citizens to serve this country and to lay their lives on the line, if we do not honor our commitments to those who have already done so, and with great honor.

I urge my colleagues to support this important amendment.

The PRESIDING OFFICER. The question now recurs on agreeing to the amendment of the Senator from Indiana (Mr. QUAYLE). The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER), the Senator from Maryland (Mr. Mathias) and the Senator from New Mexico (Mr. Schmitt) are necessarily absent.

I further announce that the Senator from Utah (Mr. HATCH), is absent due to illness.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH) would vote "yea."

Mr CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 94, nays 1, as follows:

[Rollcall Vote No. 437 Leg.]

# NOT VOTING-5

Glenn Hatch Schmitt Goldwater Mathias

So the amendment (UP No. 1511) was agreed to.

Mr. QUAYLE. Mr. President, I move to reconsider the vote on the Quayle-Cranston amendment.

Mr. DeCONCINI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. QUAYLE. Mr. President, I ask unanimous consent that Senators SIMPSON and D'AMATO be added as cosponsors of that amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

# IIP AMENDMENT No. 1512

(Purpose: To strike title II from the bill.)

Mr. DOMENICI. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from New Mexico (Mr. Do-MENICI) for himself, Mr. Baker, Mr. Laxalt, Mr. Dole, Mr. Garn, and Mr. Stafford, proposes an unprinted amendment numbered

Beginning on page 61, line 1, strike everything through page 89, line 4.

Mr. DOMENICI. Mr. President, this amendment that I sent to the desk is cosponsored by Senators BAKER. LAXALT, DOLE, GARN, and Senator STAFFORD.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Do we have a time agreement on this amendment?

The PRESIDING OFFICER. time agreement on this amendment is 30 minutes equally divided.

Mr. DOMENICI. I yield myself 4 minutes.

Mr. President, this amendment is a rather simple amendment. Basically what it does is strike in its entirety title II of the continuing resolution.

Basically that title is a \$1.2 billion public works so-called jobs bill.

Now, Mr. President, we all know that there is not real approach here or in the House of Representatives for public works type jobs. At best we have in the House of Representatives a multibillion-dollar ad hoc mixture consisting of tree planting in a brandnew program to 687 specific projects including all of the bridges on Amtrak between here and Boston. I do not think there is any doubt that when you look at it that it is anything other than pork barrel personified.

Now, I give the Senate just a little glimpse of the House bill because it seems that what has happened to us is that we got into a bidding war. Since they have their multibillion dollar so-called jobs bill, it appears that what we now have before us would send the signal that the U.S. Senate wants to

compete in some way.

Let me say this Senator understands that we have got a big problem in our country with employment. As a matter of fact, I am committed to get an extension of unemployment exception before we leave here in this lameduck session because I think that is imperative.

But Mr. President, what we are really trying to do is to come up with a plan as I see it that will reduce interest permanently, let America start to grow, and if we are going to talk about jobs creation that will do more than anything. But if we want to do some constructive things, then we ought to pass bills like the gas tax bill which will create about 300,000 jobs and will build things that are needed and well planned and ready to go.

I want to give you just a notion that there is nothing new about the House bill and there is nothing new about the Senate bill in terms of public works via new programs or projects.

I do not think there is any more glaring test of failure than for the House bill to have budget authority of \$5.4 billion and to the best of our ability to determine with all the experts around at the absolute most \$2.8 billion of that will spend in the year of 1983.

It would appear to me that patent on its face that is not the kind of jobs bill we ought to have.

I cannot even tell you when the rest of those billions that are in there would be spent. I tried to get some fiscal experts to say that the remainder of the \$2 billion—I yield myself 2 additional minutes—that it would spend out quickly but I cannot even tell you that.

I have done my best with the socalled jobs bill that we have before us in our bill; the one that apparently we want to compete with the House on so that when we go to conference we are sure we get some things we want.

My best figuring is that the budget authority there is about 1.189 so I round it to 1.2, and less than 400 million of that will spend in the year of 1983

I assume that is the year we want to affect underemployment that we want to put some people to work. When is the rest of it going to spend? Maybe 1984 or 1985 as the House bill and that might be precisely when we do not need it, just exactly the same kind of an approach that we have used recession after recession only to find that most of the money comes on well after the recovery.

I am not going to go into details on my first 6 minutes. I know the chairman of the full committee, the distinguished Senator from Oregon, knows that I hold him in the highest respect. know that he is concerned about jobs, that he wants to be compassionate and I hope he thinks the same about the Senator from New Mexico. But, frankly, I think it is a mistake to send any signal to the House now other than an extension of unemployment and a signal that we do not really think that their \$5.4 billion alleged productive jobs bill, everything from a new tree planting program, to funding the United Fund in some way that requires three organizations getting together and agree on how they are going to spend it to 687 public works projects, and I think that a few of them have already been paid for and completed and are in there by mistake.

But in any event, it appears to the Senator from New Mexico that we should not do this at this time.

I reserve the remainder of my time. The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I say to my good colleague and close friend, the Senator from New Mexico, that I could not agree with him more in his analysis of the House bill as it relates to those programs that he enumerated.

But he will note that in the Senate version we excise those programs. They are not in the Senate version for the very reasons that the Senator from New Mexico found fault with them. When I created this or crafted this particular proposal, we deleted them.

As I said in the committee, it is very obvious that this does not carry the support of the leadership on my side of the aisle nor does it carry any support from the White House at this point. But, I would like to say very clearly that, regardless of the fact that it does not carry the support of my Republican leadership either in the Senate or at the White House, jobs are needed now.

The infrastructure of this country is crumbling, and we need to improve it and improve it now.

The very arguments the administration has used for the gas tax precisely applies to the proposal that I have carried here in the committee and here on the floor here today.

I am puzzled when I hear my colleagues say that extending unemployment benefits and telling folks to wait for innovative and creative solutions is a solution at all. That is pie in the sky.

That is the same tired old programs we have heard about for too long of how to relieve unemployment—give them more unemployment benefits, more unemployment compensation.

I say put them to work. Let them be productive citizens of this country. Why wait until we know these things must be done. We know now the people need work.

Let me say that in the Senate bill we are putting these people to work now. We are stengthening the infrastructure. These are not leaf-raking jobs. They are not WPA-type jobs. The Senate version of \$1.1 billion includes rural water and waste disposal grants. These are engineered projects ready to go. All they need is funding—jobs now.

No waiting to get together and create some kind of a job project and then find some kind of a grant from the Federal Government. These are projects already in place and ready to go, such as watershed and flood prevention, and economic development administration grants. We excise the natural resource development grants that he refers to.

We have other programs that are listed here, including housing on military bases, which need upgrading.

The Senator said that CBO says that we are only going to be able to spend out a certain amount of this \$1.1 billion in calendar 1983; that is true. And that is true because when you obligate for construction project you do not spend the money all instantaneously but you obligate by contract for the project and you are committed thereby to have that money ready to pay out over a period of time in which that project is being constructed.

There is no plan that has been presented that has more immediate job impact than this proposal here. Now that is on the substance of the bill.

Let me just lay it out very frankly and forthrightly about the tactics and the strategy. I think any of us who have ever been to conference with the House of Representatives knows that you go to conference and you try to compromise between the two House positions. Let us assume, for example, a scenario where the Senator from New Mexico is successful in excising this and brings the Senate to a position of zero jobs bill, zero. We go to conference with the House of Representatives, and they come to that conference table, sit on the opposite side of the table from the Senators, and they have a \$5.4 billion project for jobs. Does anybody really believe that we are going to be able to sit there in that conference and come out with a zero figure with the House of Representatives, \$5.4 billion down to zero? Of course not.

No one can stand here and say they actually believe we can sit there and compromise from zero on one side of the table and \$5.4 billion on the other side of the table and come out with zero. We are going to come out somewhere between zero and \$5.4 billion, and do not put the Senate in a situation of going over there in that conference, sitting down with the House of Representatives Members and saying, "Let us sort of craft a plan now, let us sort of create a plan, that we can compromise and agree upon."

That is not where you do the business. That is not where you do the best job that you should be doing rep-

resenting the Senate.

I think this is a sound program. It is defendable on the merits of the program. I think we also have to recognize that we are put in a position of having to go to conference as well. I would ask the Senate to give us some opportunity to have some input as a body of the Senate and not put upon the shoulders of just a few Senators the responsibility of going over there after 2 nights up-and I say 2 nights because there is a possibility we will be up tonight as well-and go to conference after 2 nights of no sleep and sit there and try to create a compromise from zero to \$5.4 billion. It does not make logic or good sense.

So I urge the Senate to turn this amendment down and stand by the committee and indicate that by the bipartisan support of this project that at least we go in some kind of bargaining position, and we can go with a defensible package and a highly job-oriented and job-immediate-impact type of proposal.

Several Senators addressed the Chair.

Mr. DOMENICI. Mr. President, I yield 2 minutes to the distinguished Senator from Kansas.

The PRESIDING OFFICER (Mr. Kasten). The Senator from Kansas.

Mr. DOLE. Mr. President, the Senator from Kansas, if he thought he could have the Senator from Oregon's package he would be tempted to vote for it. I think it is a very good package. He has explained it to us at the policy luncheon.

There is no doubt about it, if you could have that package it would probably make a great deal of sense if we add the \$1.1 billion. But it would seem to this Senator that knowing the House's proclivity to add, I do not quite understand the logic of starting at \$1.1 billion rather than zero. I think the House will get you up there fast enough without giving a \$1.1 billion push and then, of course, there is no doubt we are going to be challenged on this side of the aisle to come up with the creative, innovative, jobs programs if we can come up with innovative and creative jobs programs that will have a real impact.

But I am constrained, as much as I dislike disagreeing with the chairman of the Appropriations Committee, to permit us to ask him to work on this, yes, as a Republican approach to the jobs programs under the leadership of the majority leader, the chairman of the Appropriations Committee, the chairman of the Budget Committee, the chairman of the Banking Committee, the chairman of the Finance Committee, and others who might have some jurisdiction.

Right now in the Finance Committee we are looking at all of the Tax Code to see if we can create jobs through targeted jobs credit.

It would seem to me if we can have an overall approach, if we can find a program, that is better, it ought to be a comprehensive program introduced

next year.

Finally, the Senator from Kansas is still optimistic about the gas tax bill. We are going to create some jobs in the gas tax bill. We are coming back to the gas tax bill as soon as this bill has been passed and gone to conference, and I think I can say with some assurance the majority leader and others are determined, in fact about all the Republican Senators, with the exception of five, have indicated in a letter to the majority leader that we want to pass the gas tax bill this year. So there is another opportunity for jobs creation.

I thank the distinguished Senator from New Mexico.

The PRESIDING OFFICER. Who yields time?

Mr. MATSUNAGA. Mr. President, will the distinguished chairman yield some time?

Mr. HATFIELD. I will be happy to yield 2 minutes.

Mr. MATSUNAGA. Mr. President, I wish to commend the floor manager, the chairman of the Appropriations Committee, for the statement he made. I fully subscribe to his statement.

Mr. President, why are we meeting here in the lameduck session? The answer is, Because there are two pressing matters we must attend to. One, of course, is to have a continuing appropriations resolution so that the Government can operate after midnight tonight. The other is to address an emergency which has been recognized not only at the congressional level but at the White House, in the business community, and, of course, by the 12 million Americans who are now unemployed. I strongly urge my colleagues to take affirmative action now and vote to maintain the provisions which will provide relief to millions of hardworking Americans who are currently unemployed. The Appropriations Committee has proposed a reasonable program to put these people to work and to strengthen the infrastructure of our country. We can delay no longer in meeting this emergency head

Mr. President, it now appears unlikely that we will pass the Highway Revenue Act of 1982—it has been set aside and we do not know whether the Congress will complete action on this matter or not. We might be here until New Year's and still adjourn without coming to any resolution of the Highway Revenue Act. Let us not continue this pattern of inaction. Here is an opportunity to come to the aid of the 12 million unemployed and an additional million or more persons who are not listed among the 12 million unemployed because they have given up looking for a job.

Let us show our constituents that we can respond to this crisis and act on this continuing resolution, inasmuch as the House has already provided \$5.4 billion for a jobs program, and go to conference so that we can come out with something concrete for the 12 million unemployed Americans. This is an emergency which we have the responsibility to meet in this lameduck session.

I thank the chairman for yielding. Several Senators addressed the Chair.

The PRESIDING OFFICER. Who vields time?

Mr. DOMENICI. I yield 3 minutes to the distinguished majority leader.

Mr. BAKER. Mr. President, it gives me no particular pleasure to stand up and say I oppose any measure which will create jobs for Americans. But I do not think this is so in this case. I do not think the \$1.2 billion is going to create any new jobs, and I do not think the \$5.5 billion the House has put in its bill is going to create any jobs for use good reasons, and that is I think if this stays the way it is it is highly likely it will invite a Presidential veto.

I am not empowered or authorized to tell you he will veto that, I do not have that authority. But I do have some insight based on conferences with the President over a period of time, conversations with him as late as yesterday. I do not rule out the possibility that something can be worked

out in some formulation that would have the effect of creating new jobs. But I do not believe the President will sign a bill, a continuing resolution, even in this lameduck session at the end, even on Christmas Eve, I do not believe he is going to sign one that has a job package of this type of \$5.4 billion or even \$1.2 billion.

It never gives me pleasure to be in opposition to my friend, the distinguished chairman of the Appropriations Committee. He is the most dedicated and diligent Senator I have ever known. With the exception of one or two of his colleagues who serve in this body at this time I doubt that there is any chairman in the history of the Senate who has worked as hard as he has, and I commend him for his extraordinary efforts in bringing this bill to the floor in the shape he has.

I have told him that I do not support this \$1.2 billion and that indeed I will join in an effort to try to delete it, because, Mr. President, finally, I find after only a little more than 2 years on this job as majority leader that one of the major responsibilities of this job is to face reality, and the reality of the thing is if we are going to get this continuing resolution through we are going to have to adjust this ambition of ours in terms of a jobs program or funds that are available for the creation of jobs.

Mr. President, I hope that the Congress will go ahead and pass the highway bill. I would like to say for the record that I am as dedicated to that today as I was a week ago. I will try to move that bill as soon as we finish this.

I urge, Mr. President, that we support this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I

yield myself 2 minutes.

Mr. President, the chairman of the Finance Committee (Mr. Dole) has indicated that if he felt we could come out of the conference with this particular proposal, he would be a little less opposed to it. But he was concerned about our ability to prevail in conference with the House.

I have no way to predict what would happen if we held this and what we

would come out with.

I must say in all probability it would be somewhat higher than what I have proposed. But I do believe that it is very clear that the House of Representatives by a vote on the floor demonstrated a little ambivalence about the House version by the closeness of the vote they had on that question of, I believe, a rereferral. I think, therefore, that there is some indication that we have had that the House would be prone to be more moderate.

I would only say merely because if we, the Senate, go to the conference with a proposal, it does not mean that we are going to have to come home, back to the Senate, with a drastically altered proposal.

Let me remind the Senate that when we had the urgent supplemental bill before us, the House sent us a skinny package and a fat package. If you will recall, I offered a substitute for the skinny package on behalf of the Senate. We went back to conference with the House and we prevailed in that. We had a good package. We could defend it. The House and Senate came to terms.

I would say, without any way of guaranteeing that we are going to come back with the same package, I have a feeling that we can come to terms with the House and we can keep it on a type of job-producing activity and schedule that will have an immediate impact upon jobs today; will be creative in our infrastructure; will be restorative in our infrastructure, and will not be the kind of make-work jobs that turn off most of us on the Senate side and have been incorporated in many places in this House bill.

All I can say is let us go with some kind of a proposal, one that will really do the thing of getting people to work now and having an impact on unemployment. We just cannot delay and say, "Wait until next year." These people are unemployed now and we

need some symbol of hope.

This is not going to correct the unemployment problem. Neither will the House bill and neither will combined bills. But it will indicate a commitment to the Nation that we have a commitment to the unemployed and that kind of confidence can become a multiplier in the employment field. If the Government is standing by and just saying, "We are going to give you more in unemployment compensation," and wait for the private sector to create the jobs, this is not the role of Government.

Mr. DOMENICI. How much time does the Senator from New Mexico

The PRESIDING OFFICER. Two minutes and 40 seconds.

Mr. DOMENICI. I yield myself 2 minutes.

Mr. President, I repeat that I wish I could be here supporting a jobs bill. I do not think this is a jobs bill. I think in a very real sense it is a spending bill.

We are here talking about another \$1.2 billion of Federal expenditure added to a \$750 billion budget, with \$185 billion in deficit, with billions being spent in all kinds of public works, highways, bridges, roads, waterways, all of which create jobs. In fact, it is stimulative to the extent of \$185 billion in deficits, more or less.

Now we come and say we ought to add \$1.2 billion to that, and that somehow is different, in response to the

need for jobs in America.

Frankly, I do not think that is the case. I commend my distinguished chairman, the chairman of the Appropriations Committee, for the objective, which I understand is to go to conference with the House and if we are going to get taken by the House, to get taken by something that might be a little better because we have put some money here that is spending out the way our Appropriations Committee devised it.

I repeat, less than half of it will spend in the year 1983. I think there is a way to devise a jobs bill where almost every penny that you spend and appropriate will go right to jobs.

I do not think we did that here and neither will the House.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HATFIELD. Mr. President, I respect the majority leader's commitment to the gas tax bill but I think at this hour and the fact we have not been able to clear this, there is little hope for any action on the gas tax bill, which I support and will vote for if I have that opportunity.

What I am going to say is simply this: This is the only opportunity that the Senate will have to demonstrate its concern for job development in this particular time of crisis. Frankly, if I were putting my money on the table, I would say that there is little likelihood that we are going to get that gas tax bill, but I am not in a position to make that prediction. I predicted Thomas Dewey's election in 1948. Take my predictions with a grain of salt.

I would predict that we will not get the gas tax. So the Senate has had a session without any positive action to relieve unemployment problems. This is our only opportunity to do that. I would urge the Senate to indicate to the American public that the Senate, as well as the House, is willing and concerned to put the Federal Government into this legitimate role to stimulate employment.

Mr. DOMENICI. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second. There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. I yield back the remainder of my time.

Mr. HATFIELD. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from New Mexico. The yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Goldwater), the Senator from Maryland (Mr. Mathias), and the Senator from

Wyoming (Mr. WALLOP) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. Glenn) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 46, nays 50, as follows:

[Rollcall Vote No. 438 Leg.]

## NOT VOTING-4

Glenn Mathias Goldwater Wallop

So the amendment (UP No. 1512) was rejected.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, we are about ready to embark upon a series of amendments relating to defense items, and we do not have any time agreements. We have some estimates on time but we are hoping that we can expedite it and try a few before we really set the time. There is a tendency now to utilize all the time and hopefully we can get more time utilized by this system for a while. I am urging Senators to demonstrate restraint as much as we can because we still are far from completing our list of proposed amendments, and we have

and get back here with a report.

Now, this whole matter expires at midnight tonight, so we are trying to work against that time target as well.

yet to go to conference with the House

So with that brief statement, I am going to ask the chairman of the Defense Subcommittee (Mr. STEVENS) to

become the wagonmaster on these for a while. We have a number of items upon which we will now move.

Mr. STEVENS. Mr. President, it is my understanding the Senator from Georgia has an amendment.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

#### UP AMENDMENT NO. 1513

(Purpose: To permit use of funds to fulfill certain European defense agreements)

Mr. NUNN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Georgia (Mr. Nunn) proposes an unprinted amendment numbered 1513.

Mr. NUNN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title I add the following new section:

SEC. . Notwithstanding any other provision of this joint resolution, section 775 of the Department of Defense Appropriation Bill, 1983 (S. 2951) shall be deemed to read as follows:

"SEC. 773. Such amounts as may be necessary, but not to exceed \$49,300,000 shall be available out of funds appropriated in this Act for Operations and Maintenance, Army, Operations and Maintenance, Air Force, Other Procurement, Army, and Other Pro-Force, curement, Air Force (1) to fulfill the obligations of the United States under the executive agreement of April 15, 1982, between the United States and the Federal Republic Germany concerning Wartime Host Nation Support, and (2) to fulfill the international obligations incurred by the United States under that part of the Long-Term Defense Program of the North Atlantic Treaty Organization that provides for the rapid reinforcement of Europe by the prepositioning in Belgium and the Netherlands of United States Army Division Sets 5 and

Mr. NUNN. Mr. President, I rise to support the action of the Appropriations Committee in the continuing resolution in placing a ceiling at current levels on the number of U.S. military personnel stationed ashore in Europe for the remainder of fiscal year 1983. I believe the distinguished chairman of the Defense Appropriation Subcommittee examined this issue in detail in hearings this year and in discussions in NATO and has adopted a prudent and balanced approach. This signal that the United States is not backing away from our NATO commitment is important given the current military and political situation there. However, by freezing the level, the committee also serves notice, and by adopting the approach the Senate will serve notice on our European allies that the United States is not willing to proceed unilat-

erally in NATO unless there is a fair sharing of the burden.

The provision in the continuing resolution is consistent with an amendment to the fiscal year 1983 defense appropriations bill that I planned to introduce with numerous bipartisan cosponsors. It would have held European troop deployments to the end of fiscal year 1982 levels, essentially the number on the ground today.

Mr. President, I ask unanimous consent that an amendment that was sponsored by myself, Senators Tower, Percy, Cohen, Thurmond, Exon, Quayle, Warner, Lugar, Biden, Humphrey, Leahy, and Mathias be printed in the Record to clearly show the aim we were going for in presenting this amendment to our colleagues before the Appropriations Committee took their recent action on agreeing to the troop ceiling.

There being no objection, the amendment was ordered to be printed in the Record, as follows:

On page 59, strike out lines 3 through 10 and insert in lieu thereof the following:

SEC. 147. (a) Subject to the provisions of subsections (b) and (c), none of the funds appropriated by this joint resolution may be obligated or expended for the purpose of supporting or maintaining, as of September 30, 1983, an end strength level of members of the Armed Forces of the United States assigned to permanent duty ashore in European member nations of the North Atlantic Treaty Organization (NATO) at any level in excess of 315,600, the end strength level planned by the Department of Defense to be assigned to permanent duty ashore in such nations as of September 30, 1982.

(b) The President may waive the restriction contained in subsection (a) if he (1) determines that the end strength level of 315,600 must be exceeded because of overriding national security interests of the United States, (2) notifies the Congress in writing at least fifteen days before making any personnel changes during fiscal year 1983 that will likely result in an end strength level as of September 30, 1983, greater than 315,600, (3) notifies the Congress in writing within five days after making a determination that the end strength level of 315,600 will likely be exceeded as of September 30, 1983, in any case in which the President did not anticipate that personnel changes previously made during the fiscal year would likely result in an end strength level as of such date greater than 315,600, but in no event may any such notice be given later than September 15, 1983, and (4) promptly notifies the Congress in writing that he is exercising his waiver authority under this subsection and includes in such notification the following in-

(A) A list identifying those military units assigned to permanent duty ashore in European member nations of NATO whose personnel strength has been increased during the current fiscal year or whose personnel strength is proposed to be increased by the end of the current fiscal year.

(B) The size of the increase made or proposed to be made, as the case may be, in the case of each such unit.

(C) A description of the mission of each such unit.

(D) A statement of the reasons for the increase or proposed increase in the case of each such unit.

(E) An estimate of the length of time the increase or proposed increase will be required.

(c) In computing the numerical limitation specified in subsection (a), there may be excluded not more than 1,200 military personnel assigned to the Ground Launched Cruise Missile program and the Pershing II Missile program to the extent that such personnel are in excess of the number of military personnel assigned to such programs on September 30, 1982.

(d) Subject to the numerical limitation contained in subsection (a), funds appropriated in this Act for the maintenance and support of military personnel assigned to permanent duty ashore in European member nations of NATO may be used during fiscal year 1983 for the maintenance and support of all units of the Armed Forces of the United States assigned to permanent duty ashore in such nations on the date of the enactment of this joint resolution.

Mr. NUNN. Mr. President, this amendment was originally drawn up in response to the provision in the Defense appropriations bill that would have resulted in a drawdown in U.S. troop levels in NATO in excess of 18,900. I agreed that many problems exist with the transatlantic relationship and there is no doubt that our allies must do more in meeting the common defense burdens. I, however, felt that a negative action on the part of the United States would be unlikely to produce a positive reaction on the part of the Europeans.

I believe there is a real opportunity to improve the conventional defense capabilties in NATO and at the same time decrease overreliance on the early use of nuclear weapons. This opportunity has the maximum chance of success when it is met in a true spirit of cooperation and coordination.

By taking this approach, we clearly signal to the Europeans that the United States will meet our NATO commitments, but we will also serve notice that we must move forward together to improving NATO's defenses.

I do believe, however, that some clarifications for the legislative intent may be in order. Specifically, my impression of the ceiling would be that it applies to all permanently assigned U.S. military personnel ashore in European NATO countries and it would preclude any increases in these personnel above the planned number as of September 30, 1982. Further, my information is that number is approximately 315,600 personnel. I ask the chairman if that interpretation is correct?

Mr. STEVENS. I beg the pardon of the Senator and ask if he will repeat the question.

Mr. NUNN. I ask the Senator from Alaska if the number 315,600 personnel as a freeze of the level of permanent U.S. military personnel stationed

onshore in European NATO countries is the correct number?

Mr. STEVENS. That will be the number when we modify it in accordance with the agreement we have made to the number which was the planned end strength for the end of fiscal year 1982.

Mr. NUNN. I thank the Senator from Alaska.

I understand there will be a modification to that effect.

In addition, I ask the Senator from Alaska if he will give us his understanding of the agreement with respect to the 4th Infantry Brigade of the 4th Infantry Division now stationed in Wiesbaden, West Germany.

I am asking the Senator from Alaska to clarify his understanding of the continuing resolution and the Senate Appropriations Committee defense bill with respect to the Army's 4th Brigade of the 4th Infantry Division now stationed in Wiesbaden, West Germany. Under the original Senate report and the supplemental appropriations conference, the Army was directed to deactivate this important combat unit.

The distinguished chairman of the Defense Appropriations Subcommittee is correct in his statement that the Army has itself wavered on the future of the "Fourth of the Four" Brigade. However, recently General Meyer, The Chief of Staff of the Army, and Gen. Bernie Rogers, the Commander-in-Chief of our forces in NATO. Both stated that the current withdrawal of the "Wiesbaden Bridage" would greatly reduce our conventional capabilities in Europe and should not be done at this time. General Rogers indicated that withdrawal of this unit would necessitate the relocation of just about every United States and German military unit in the central sector.

Mr. President, I believe that any deactivation or reduction of the "Fourth of the Four" Brigade would be counter productive. I hope the Senator from Alaska will join me in confirming that the continuing resolution permits the continued presence of the "Fourth of the Four" Brigade at least for the remainder of this fiscal year. I certainly agree with the distinguished chairman that the Army must decide once and for all what their plans are, and I will support him in his efforts to get the Army to clarify its position on this matter.

Is it the Senator from Alaska's intent that the continuing resolution permits the Army to retain the 4/4 in Germany at least during fiscal year 1983?

Mr. STEVENS. Mr. President, the 4th Brigade was a reduction that was taken by the Department of Defense for the fiscal year 1982. It was not withdrawn.

Last month when we were in Europe visiting the Commander of the U.S. Armed Forces in Europe, General

Rosen told me the brigade is an essential part of the forces deployed in Germany and will be retained.

My response to him and to the Senator from Georgia is simply the Army considered it less essential when it had to take the cut for 1982. If the Army now feels that it is essential and is willing to locate the cut for us of the same amount the brigade was not what we sought. We sought the reduction in dollars. I believe that it is up to the Pentagon to respond to us as to where they are going to take that cut, but I point out to the Senator from Georgia that cut was not just a cut of \$72 million for 1 year. It was \$72 million for a period of years because it was to bring home the brigade and to deactivate it which, as the Senator knows, has an increase in savings over a period of time, not forever, but there was a projected savings beyond 1 year.

I believe it was at least a 3-year savings they projected at the time.

Mr. NUNN. If my understanding is correct, the Senator is saying there was nothing on the part of the Appropriations Committee to say that the 4th Brigade has to be terminated or phased out, but it will be up to the Army and Department of Defense to find the funds to continue that 4th Brigade if that is one of their priorities.

Mr. STEVENS. Our committee said that the Department of Defense should keep its commitment and deactivate that brigade. We have said to them before and, as I have said, I said to the Commander of U.S. Forces Europe if that is not their decision they should then tell us where they are going to take the cut.

We did not initiate the cut of the 4th Brigade. The Department of Defense did. If they want to change that plan it would have our approval so long as they did absorb the cut that they agreed to absorb for 1982, 1983, and 1984. It is a savings we are talking about

Mr. NUNN. It is the money the Senator is trying to get at, not the deactivation of the brigade. If they can find a way to accommodate those savings without deactivating the brigade that would not breach the Appropriations Committee directive.

Mr. STEVENS. That is correct, if they find the ongoing savings and tell us where they are we would accept that. I hope they do not shoot me in the foot and take out money that we put into the Army program that they did not request. But that is why we would like to have it subject to the normal reprograming authority, but if they want to reprogram and keep the 4th Brigade, particularly after what we heard in Germany, we agree with that. They must take their ongoing savings and identify it for us.

Mr. NUNN. I thank the Senator from Alaska.

Mr. President, the amendment that is at the desk is sponsored by Senators Tower, Percy, Cohen, Thurmond, Exon, Quayle, Warner, Lugar, Biden, Humphrey, Leahy, and Mathias.

I will take very brief time to explain the amendment and if there is any more need for further explanation or if the Senator from Alaska wishes me to elaborate, I could go into more detail. This amendment permit-without increasing appropriated dollar amounts-the Department of Defense to spend up to \$49.3 million for two important initiatives: the United States-West German Wartime Host Nation Support program and the prepositioning program—known POMCUS-for U.S. Army Division Sets 5 and 6. This amendment will enable the United States to follow through on formal commitments that we first made in 1978. The fiscal year 1983 Defense Appropriations bill, S. prevents implementation these important programs by denying or blocking necessary funds.

I recognize that the military and the Department of Defense are going to have to decide that this is a priority. They are going to have to decide that something else is not as high a priority. We are not putting the additional money here so the saving that has been adopted by the Appropriation

Committee will continue.

This amendment does not change this, but this would eliminate the absolute mandate that these very important programs be terminated. It would permit the Department of Defense to go forward with these programs providing they find money in other lesser priorities.

Mr. President, I hope this amendment could be accepted by both the Senator from Alaska and the Senator

from Wisconsin.

Mr. STEVENS. Mr. President, we have discussed the Senator's amendment.

Mr. NUNN. Yes, it is the amendment the Senator has.

Mr. STEVENS. What it does is tells the Department of Army to find the funds within its existing program here, that we will approve to carry out the host nation program and the next set of POMCUS pre-positioning equipment.

One of the cuts as made by the House of Representatives would still

be in conference anyway.

I have indicated to the Senator from Georgia that we are willing to take this amendment in the conference and it would be my expectation that we would agree with the Senator from Georgia provided the Army again goes through the normal reprograming to identify the area of the funding from which they will take the money for

This is not just European host nation support. It is not just a 1-year commitment. I point out this is an ongoing commitment over the next 5 years. This will cost over \$200 million, and we estimate that the host nation program will cost a quarter of a billion dollars before it is through.

We took the position in committee and the House of Representatives has taken the position that this just simply is not justified right now to increase this amount to fund it through an increase.

Again, when we were in Europe the point was made to us to our subcomittee when we were there that this is a very high priority for the Armed Forces in Europe and for the Commander of NATO.

Under those circumstances, if the Department of Defense and the Department of Army want to realine their priorities and take this money out of existing funds and tell us where it is going to come from so we have the normal control over that reprogram we would do so. We would agree and for that reason I am going to recommend that we accept the amendment.

I say to my good friend from Georgia, however, that we have repeatedly stated our concern for the level of support coming from our allies. We view it to be disproportionately low.

Through this program of funding the cost of the host nation in terms of readiness we are taking on some of their costs in terms of their reserves and equipping their reserves. The cost of the NATO commitment to the United States has gone up from \$78 billion in 1981 to \$133 billion in this bill, and that does not include the funding of this program, as I have indicated, but, as I have said to the Senator from Georgia and the last comment that we made about the brigade, if in fact this is a higher priority than we thought it was, then we believe that the Department of Army, the Department of Defense must realine its priorities and tell us where it will take the reduction.

It did not do that, I will say, and this amendment of the Senator from Georgia will force them to do that.

On that basis I recommend to the ranking Democratic member of the committee that we accept the amendment.

Mr. PROXMIRE. Mr. President, I think both the author of the amendment, the Senator from Georgia, and the manager of the bill, the Senator from Alaska, has made it abundantly clear that this will not add any money to the bill and it would simply require the military to provide this purpose as a top priority and find the money elsewhere.

I know of no objection on our side, and I support the amendment.

Mr. NUNN. Mr. President, one final word. I thank my friend from Alaska and my friend from Wisconsin.

I do believe this is an important program. This is a program that will provide—and the Federal Republic of Germany has agreed to supply—93,000 reserve forces if there is any kind of war or confrontation and who would provide the support for American combat divisions that will be falling in on the POMCUS equipment in Europe.

If the United States provided this support with our Reserve Forces, it would cost the United States 10 times as much. And if we provided this support with our Active Duty Forces it would have cost us 40 times as much.

I do believe this is a high priority and I am hopeful, and reasonably confident, that the Department of Defense and the Army will find the money because I do believe this is a priority. This is an agreement that has been negotiated with the Federal Republic of Germany for a number of years.

Mr. President, there is a general agreement that our NATO allies need to assume a greater share of the conventional defense burden in Europe. But we cannot achieve that objective if we unilaterally withdraw from formal international commitments that were negotiated for the benefit and at the behest of the United States.

The United States-West German wartime host nation support program and the POMCUS program are integral parts of a trans-Atlantic bargain—NATO's long-term defense program—whereby the United States agreed to provide a 10-division D-Day force in exchange for increased allied support for U.S. forward-employed and reinforcing troops. We cannot expect to improve overall allied burdensharing if we fail to fund our share of key programs designed for that purpose.

# WARTIME HOST NATION SUPPORT

Mr. President, regarding the wartime host nation support program, almost 3 years ago we entered into negotiations with the Federal Republic of Germany to seek a solution to critical shortages in the U.S. combat support units. This support is necesary to give our forward deployed and early reinforcing combat units their real and sustained combat capability. In April of this year, we reached agreement with the Germans on a program under which they will completely dedicate approximately 93,000 Reservists, in time of crisis or war, to perform support functions for U.S. Army and Air Force combat forces. Without these German personnel, U.S. troops would be required for these missions.

The support that these German reservists will provide includes:

Security of U.S. Air Force facilities; support of U.S. Air Force elements at

collocated operating bases; security of U.S. Army facilities: transport, transshipment, and resupply services; evacuation of casualties; prisoner of war handling; and decontamination of personnel and equipment. Currently, U.S. forces in Europe do not have support units to provide these services.

Our agreement with the Germans provides that we will share, approximately equally, the total direct costs of this program. Actually, over the next 5 years, the Germans will pay slightly more than 50 percent of the costs; after this initial implementation period, the Germans will pay about 60 percent of the steady state annual recurring costs. In addition, much of the equipment to be used by these German reservists will be mobilized from the German economy at no cost to the United States. If this is not burden sharing, Mr. President, then I do not know what is.

I believe that this agreement represents a breakthrough in our efforts to persuade our allies to assume a larger and more equitable share of the common defense burden. As you know, one of NATO's basic principles has been that "logistics is a national responsibility." Our discussions on host nation support have successfully forced a reexamination of that principle. We now can expect that our European allies, with Germany in the lead, will become increasingly receptive to the concept of providing essential intheater logistics support to U.S. forces in wartime.

But this will only happen, Mr. President, if the United States keeps its end of the bargain. The Germans have already set aside \$18 million to pay their share of the implementation costs in 1983. I know of no one who questions the soundness of this program although a few have argued that the Germans should pay the entire bill.

As background, when the program was first proposed, the West Germans were to provide only the personnel and the United States would pay all of the costs. We have moved that initial arrangement to one that is much more favorable to the United States. However, it is clear to me that, if after the hard and lengthy negotiations that produced this cost-sharing formula, we now ask the Germans to pay the entire costs, the program is dead-a program that we urgently need in order to be able to support our combat forces in wartime.

The basic issue for the Senate to decide is: Do we want this wartime host nation support program or not? The Germans have made a substantial burdensharing offer:

They have agreed to provide support for U.S. forces which, by NATO's standards, is to be a U.S. responsibility; they have dedicated 93,000 reservists to this mission; they will provide

much of the needed equipment from

the German economy; and they have agreed to share equally the direct costs of the program.

We cannot afford to turn down this most advantageous offer. If we fail to fund our share of this program in fiscal year 1983-a total of \$44.3 million-I fear that the program will be terminated by the Germans.

#### POMCUS

When the NATO heads of state approved the long-term defense program in 1978, they also agreed to the pre-positioning of heavy equipment for three additional U.S. divisions in the central region, for a total of six division sets of POMCUS. Our allies agreed to acquire the land and buildings necessary to prestock U.S. military equipment for those units.

It is critically important that the United States follow through with our POMCUS plans. Both General Rogers, Supreme Allied Commander, Europe, and General Kroesen, Commander in Chief of the U.S. Army in Europe, have repeatedly insisted that the full six-division set POMCUS program is necessary-both militarily and politically—for the support of U.S. interests in Europe. The forward stationing of four division plus the pre-positioning of equipment for an additional six divisions is, by far, the least expensive way to insure a 10-division D-Day force-in line with our long-term defense program commitment-and the only way to do it in the near term

Mr. President, our allies have kept their part of the POMCUS bargain as well. The Belgians and Dutch have spent more than \$60 million to acquire the real estate for storage warehouses for division sets 5 and 6. The NATO infrastructure program has allocated more than \$180 million for construction at these sites. The failure of the United States to fulfill its POMCUS commitments could have serious political repercussions, especially in Belgium and the Netherlands where the planned ground-launched cruise missile deployments remain an important, yet controversial, program. Failure to meet our commitment to fill the sites when completed late in 1983 could also affect other negctiations with the allies on burden-sharing issues of great concern to the United States, such as the master restationing plan currently being negotiated with West Germany.

Mr. President, I understand the frustration that my colleagues have expressed about getting our NATO allies to assume a greater share of the conventional defense burden. At the same time, I am convinced that if the U.S. withdraws from commitments we have already made to our allies-when they have fulfilled their part of the bargain-we will only cause the allies to do less, not more, and harm vital United States security interests in the process. Thus, I urge the support of my colleagues for this amendment

that will permit the United States to fulfill these critical international orga-

Mr. PERCY. Mr. President, on December 2, the NATO defense ministers met in Brussels for their semiannual discussions on the state of NATO's defenses. During the session, the Ministers gave formal approval to the new NATO rapid reinforcement plan for Europe. The central feature of this plan is the requirement for the United States to be able to field 10 divisions on the central front within 10 days of the start of an Alliance mobilization. Four American divisions are presently stationed in Europe; six others would speed to Europe from bases in the United States were the orders to be given.

The recent action of the Appropriations Committee deleting needed to proceed with the establishment of pre-positioned equipment, known as POMCUS, for the fifth and sixth reinforcing U.S. divisions and striking funding for the wartime host nation support program with the Federal Republic of Germany are in direct conflict with the commitments of the United States under the rapid reinforcement plan adopted by the Alliance just 2 week ago. In addition, they are inconsistent with previous U.S. commitments under the NATO long term defense program.

In written testimony submitted to the Foreign Relations Committee on November 30, Gen. Bernard Rogers, the highly respected Supreme Allied Commander in Europe, warned that unless the fifth and sixth reinforcing U.S. divisions arrive in place on time and fully equipped, "the relative capability of the Warsaw Pact in the North German plain would be so overwhelming that we could not defend successfully without early use of nuclear weapons." Mr. President, we should be making every effort to raise the nuclear threshold, not lower it.

A failure to restore these funds would also pull the rug out from under our allies, who, trusting that the United States would make good on its commitment, have already-I repeat, already-spent tens of millions of dollars on these POMCUS facilities. Belgium and the Netherlands have gone to great effort to find suitable sites in their densely populated countries and have spent more than \$50 million to acquire the necessary real estate. Through the NATO Infrastructure Program, the Alliance acting as a whole has allocated more than \$180 million for construction at these sites.

Failure to fund POMCUS sets five and six would not only cripple this much-needed improvement in NATO's conventional defense capabilities, but would also endanger related programs. such as the Wartime Host Nation Support agreement under which Germany

will provide a 93,000-man reserve contingent to support U.S. reinforcements.

Mr. President, when the United States and West Germany signed this agreement on April 15, they achieved a historic breakthrough in NATO defense cooperation. For the first time, a NATO ally has agreed to pay a portion of the support costs of U.S. combat units. Before now, logistics has been considered a national responsibility, with each nation funding on its own support programs. Under the new agreement, though, the United States and the Federal Republic will share the total costs of the program equally. I should also emphasize that the program is designed to minimize the costs to the United States. Using the 93,000 German reservists for this purpose costs about one-tenth of what it would cost to provide the same capability with U.S. reservists and less than onefortieth of what it would cost using U.S. active duty personnel.

In a letter dated December 9, Secreof Defense Weinberger and tarv Acting Secretary of State Dam warned that a failure to restore the Host Nation Support and POMCUS funding "would have negative effects on our military capabilities and could seriousundermine allied confidence in making agreements with the United States for many years to come." I urge approval of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia.

The amendment (UP No. 1513) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was

agreed to. Mr. PERCY. Mr. President. I particularly wish to express my great admiration once again and deep appreciation and commendation to my distinguished colleague from Alaska (Senator STEVENS) for the statesmanship he displayed on the NATO troop issue during the Appropriations Committee markup of this bill, and on the

floor of the Senate today.

As one who led the fight against the various troop withdrawal amendments offered by Senator Mansfield in the 1970's, Senator Stevens has consistently championed the Atlantic Alliance and the vital role it plays in defending Western democracy. Although Senator Stevens and I have had some lively debates in the last few months over what constitutes an appropriate level of U.S. troop strength in Europe, I recognize that Senator Stevens has never wavered in his support for the U.S. commitment to NATO. I am very pleased that we were able to reach agreement on a provision that will stabilize the recent growth in U.S. troop levels while not requiring the unilateral withdrawal of any American troops.

Mr. STEVENS. I want to thank the chairman of the Committee on Foreign Relations for his statement. The statement he made concerning the modification position on NATO forces is correct. We have changed from 1981 to 1982 to the planned troop strength levels, and I want to thank the Senator from Georgia and his staff for working with us and with the Committee on Foreign Relations on this.

From time to time we get criticized for our trips to Europe. But I think the result of that trip showed us conclusively that the problem was that we were using numbers that no one really understood. For instance, we found that the Department of Defense answers to our questions about how many troops were in Europe included the people onboard naval vessels who are not assigned to NATO but were in the Mediterranean, inside the Gibraltar line, I guess, and they were temporarily there, temporarily afloat, and

they had counted.

They led us to the conclusion that the increase was more rapid than we had anticipated in March and, therefore, we put on a limitation to stop that increase. But I want to make sure that the Senate realizes that we have set now a ceiling and the ceiling has a bipartisan genuine support, I believe, in the Senate and it should be an indication to the Department of Defense that we are trying to put a limit on the growth of our commitment to NATO in terms of dollars. It is not manpower. It is, as I said to the Senator from Georgia concerning the brigade, it is dollars we are concerned with, and we must, I think, establish a manpower ceiling and maintain it.

So it will be our intent in the future to enforce this concept of the planned level for the end of fiscal year 1982 unless the President does, in fact, exercise his authority which is contained, which we put into this amendment, which is on page 29, which provides that the limitation may be waived by the President upon a declaration of Congress or overriding national security requirements. That is a unilateral determination by the Commander in Chief and we are prepared

to accept that.

COMMITTEE AMENDMENT ON PAGE 59. LINE 6

Mr. President, I now ask unanimous consent that the committee amendment on page 59, line 6, to strike the word "actual" at the end of line 6, and insert in lieu thereof the word "plan" to conform with the commitment I made to the Senator from Georgia; and then on line 8 of the same page, after the date "1982" insert therein "315.600"

The PRESIDING OFFICER. The Senator will send those amendments to the desk.

Mr. STEVENS. We will do that. The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that a response from the Secretary of Defense to my Subcommittee on Defense, dated December 1, 1982, concerning this subject be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE. Washington, D.C., December 1, 1982. Hon. TED STEVENS,

Chairman, Subcommittee on Defense, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR TED: This responds to your request for third and fourth quarter data on actual troop strength levels in Europe. We recently completed an audit of data on strength levels by country as of September 30, 1982 which allows us to address your question. The data for Western and Southern Europe are shown below.

Three cautions about these data: First, the apparent growth between the planned actual end-fiscal year 1982 strengths levels is more happenstance than real. The actual strengths for September 1982 are 9,100 higher than the planned strengths for end-fiscal year 1982 largely because the original end-fiscal year 1982 projections did not include the 6,200 soldiers temporarily in Europe for the REFORGER exercise, nor the 4,200 Marines temporarily afloat in the North Atlantic for a training exercise. Second, afloat forces vary considerably from quarter to quarter based on short-term fluctuations in world conditions as well as longer-term commitments. An example of this variance is between the March and June 1982 figures shown below. These first two explarations highlight again both the volatility of manpower strengths and the legitimate and required activities we might have to curtail to remain within a manpower ceiling. Third, the data the subcommittee has been using are for "Western and Southern Europe" and not just "NATO." The former includes some European countries outside NATO. In addition, "NATO" might erroneously be thought of as just the Central European region countries, whereas European NATO also includes Turkey, Greece, Iceland, Greenland (as a Danish possession). and the Azores (as part of Portugal).

# U.S. MILITARY STRENGTH (ASHORE AND AFLOAT) 1

100	Actual		Planned end	
	March 1982	June 1982	September 1982	(fiscal year) 1982 <sup>2</sup>
Army	219.8 81.0 33.1 (12.9) (20.2) 3.1 (1.3) (1.9) 337.1 (315.0) (22.1)	220.4 80.4 49.9 (13.3) (36.7) 4.3 (1.2) (3.0) 355.0 (315.3) (39.7)	227.3 81.6 39.6 (12.9) (26.6) 7.2 (1.3) (5.9) 355.6 (323.1) (32.6)	217.1 83.5 40.4 (13.8) (26.5) 5.5 (1.2) (4.2) 346.5 (315.7) (30.7)

<sup>1</sup> Totals may not add due to rounding. <sup>2</sup> As submitted in the fiscal year 1983 President's Budget.

I want to reiterate my conviction, Ted. that restrictions on troop strengths in Europe are not helpful to anyone con-cerned. With restrictions, we lose the flexibility we need to manage the department and respond to worldwide situations. As important, these restrictions undercut the commitments we have already made to our NATO partners and could provide them a ready-made excuse to cut back on their commitments because we did on ours. For my part, I assure you that I will carefully review the European strength levels we will submit in the FY 1984 President's Budget and only include those that are vital to our national interests and our troops' well-being

Frank C. Carlucci, Deputy Secretary of Defense.

Mr. STEVENS. I again thank all concerned for helping us set a new standard. I think it eliminates the confusion. We never intended to require a unilateral control. We wanted to establish a ceiling on our commitment to Europe.

Mr. NUNN. I thank the Senator from Alaska and pledge him we will work together in the next not 1 year, but in the future to see that both goals, that is strengtening the overall NATO lines but also the second goal making sure that the burden is shared in an equitable way with our allies will be improved on, and that we make progress in that respect.

Mr. STEVENS. Mr. President, was the Senator from Georgia's amend-

ment reconsidered?

Mr. NUNN. The two amendments were in one, and they have been reconsidered and a motion made to lay them on the table. They were on POMCUS.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

gest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, the Senator from Montana and I have discussed the Army scraper procurement, and he would like to raise that at this time, at least raise the subject.

UP AMENDMENT NO. 1514

Mr. BAUCUS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Montana (Mr. Baucus) proposes an unprinted amendment numbered 1514:

At the end of title I, add the following new section:

Sec. None of the funds appropriated by this joint resolution may be used for the purpose of procuring any scrapers under RFP DAAE07-82-R-5388.

Mr. President, this amendment has at its heart fair play in Government contracting, pure and simple. There will be no revenue loss as a result of its adoption. In fact, it may result in savings of more than \$200 million.

The amendment relates to a solicitation for bids which was issued by the Department of the Army in August of this year. The solicitation or request for proposals was a five-year program to procure more than a thousand scapers for the Army. Depending on the bids received, the equipment will cost the Government about \$250 million.

Let me make it clear that I do not oppose the purchase of this equipment by the Army. My opposition is only to the needlessly restrictive specifications that were placed on the RFP by the Army. In fact, the solicitation was so narrowly drawn that it appears that only one equipment company qualifies.

My amendment would simply prohibit spending funds until the Army complies with the President's directive to executive agencies to enhance competition for Government contracts by eliminating unnecessary specifications and by simplifying those specifications that must be retained. The language of section 1(d) of Executive Order 12352 reads as follows:

"\* \* Executive agencies engaged in the procurement of products and services from the private sector shall:

\* \* \* \* \* \* \* (d) Establish criteria for enhancing effe

(d) Establish criteria for enhancing effective competition and limiting noncompetitive actions. These criteria shall seek to improve competition by such actions as eliminating unnecessary Government specifications and simplifying those that must be retained, expanding the purchase of available commercial goods and services and, where practical, using functionally oriented specifications or otherwise describing Government needs so as to permit greater latitude for private sector response.

This solicitation flies directly in the face of the President's order. For example, the drawings appearing in the solicitation's technical information package, together with the written requirements make it clear that the proposal is based on a single manufacturer's two-axle scraper design. The exclusion of three-axle models, however, is in no way related to performance of the vehicle's mission to load and transport earth nor its functional and performance requirements. It simply expedites the so-called competitive bidding process by eliminating potential bidders.

Congressman Ron Marlenee of Montana raised concerns about the anticompetitive nature of the solicitation this fall.

On November 3, John R. Ambrose, Under Secretary of the Army, replied to Congressman Marlenee, stating that the Army's specifications—

Reflect validated requirements for a two axle piece of equipment to allow it to fit on our military, standard trailer which must transport the equipment. Also, the turning radius of a two-axle scraper allows working in smaller areas . . .

Mr. Ambrose added that the Army declined to evaluate "life cycle costs."

The Army has, however, presented no convincing rationale for restricting equipment to two-axle scraper vehicles. Further, by refusing to disclose the dimensions of the Army's military, standard trailer the Army retains the ability to announce arbitrarily, after the fact, a limit on trailer dimensions to exclude other scrapers.

Finally, the absence of any specified turning radius requirement in the specification indicates that the Army places no importance on that characteristic. Again, the Army seeks to reserve the opportunity to announce a turning radius requirement after the fact.

A related deficiency in the RFP is the Army's refusal to consider the life cycle costs of the equipment. Initial acquisition costs cannot be considered in a vacuum. Given an anticipated life of 15 years for this equipment, all costs must be considered in determining which proposal is the most cost effective.

Frankly, the Army has suggested no features of this procurement that make it any more difficult to consider life cycle costs than in any major system procurement. Indeed, procuring agencies routinely consider these costs in other systems procurements and encounter no difficulty in verifying life cycle cost data submitted by offerors. The Government has precedents for evaluating tractors' life cycle costs, and should put this experience to work.

The result of such an analysis could be substantial savings to the Army. One potential bidder, Big Bud Tractor Co., contends that life cycle costs of its scraper could save \$215 million over the Army's preferred vehicle.

Finally, the solicitation is fatally flawed by its failure to set forth the relative importance of technical and cost elements in the proposals being considered. The General Accounting Office time and time again has ruled that procuring agencies must establish the relative weight of the factors used evaluating bids.

Given these serious problems with this solicitation, I believe that Congress must take responsibility to insure fair play and meaningful competition. My amendment would in no way bias the bidding process toward any one company. The result would be just the opposite. Once the RFP is rewritten to allow all interested state-of-the-art companies to participate, the decision process can go forward and the Army can begin to replace outdated equipment with modern, efficient machinery.

Mr. President, I have discussed this amendment with the Senator from Alaska as well as with the Senator from Oregon, the chairman of the committee. Based on those conversations, this time we will not proceed

with the amendment but instead agree to hold hearings on this subject very early in the next Congress.

I am withdrawing this amendment simply because of the short time frame that is involved here. The Senator from Alaska informs me that he is not in a position to agree. His objection is not because of the merits of the question, but because it would be bad policy to set a precedent on procurement policies where we do not have the opportunity to fully review the issues at an open hearing.

Mr. President, I see the Senator from Alaska seeks recognition and I yield to him.

Mr. STEVENS. Mr. President, we have discussed the amendment of the Senator from Montana. I understand that we do have allegations from time to time concerning the specifications for contracts and those allegations tend to have some people reach the conclusion that the preparation of the specifications were such as to eliminate some of the competitors.

I have no knowledge of the problem of scrapers under this amendment, but we have committed, with the consent of our good friend from Mississippi, to hold a hearing next year, the end of January or the first of February, to pursue this matter. It will be within the timeframe, as I understand, before the matter is finalized.

It has been the consistent policy of our subcommittee not to interfere with procurement on a line item for the expenditure of funds until we have had a contract hearing. Normally, the hearing will straighten out the problem to the satisfaction of all concerned.

I do make that commitment to the Senator and would urge him not to pursue this because we would have no alternative but to oppose it at this time, whereas we might support it if we had a record to support the feelings that the Senator has expressed to

Mr. BAUCUS. Mr. President, based upon the representation of the Senator from Alaska, and I thank him very much for it, and particularly for the fact that we will hold a hearing on this subject in January or February of next year, I withdraw the amendment.

The PRESIDING OFFICER. The Senator has the right to withdraw his amendment.

Mr. STEVENS. Mr. President, would urge Senators who are not present on the floor, who have indicated to us that they have amendments they wish to offer to the defense portion of the continuing resolution, to offer the amendments. We have a series of them. The names have been listed in the RECORD already.

Pending the arrival of any of those Senators, I would suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I understand that the Senator from Washington has an amendment. We have reviewed it. It is a very straightforward amendment concerning a reduction in the amount authorized under this bill. He is prepared, as I understand it, to agree to a time limit of 20 minutes on each side. On behalf of the committee, I would be prepared to agree to such a limit of 20 minutes on each side provided there be an agreement that the amendment of the Senator from Washington not be subject to an amendment.

The PRESIDING OFFICER (Mr. ARMSTRONG). Does the Senator from Alaska propose that as a unanimous-

consent agreement?

Mr. STEVENS. I do. With the agreement of the Senator from Washington I propose that as an agreement for this amendment, that there be a time limit of 40 minutes equally divided, with the proviso that there be no amendments allowed to the Senator's amendment.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

UP AMENDMENT NO. 1515

(Purpose: To reduce the rate of funding for the Department of Defense by 3.3 percent except for the Operations and Maintenance account)

Mr. GORTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Washington (Mr. GORTON), for himself, Mrs. Kassebaum, Mr. DURENBERGER, Mr. CHAFEE, and Mr. DAN-FORTH, proposes and unprinted amendment numbered 1515.

Mr. GORTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 9, line 8, insert "(1)" after "(c)". On page 9, line 17, insert "other than title

III of that bill," after "(S. 2951),".
On page 9, line 20, insert ": That appropriations made available pursuant to this paragraph shall be reduced by 3.3 percent" after "law".

On page 10, between lines 2 and 3, insert

the following new paragraph:

"(2) Such amounts as may be necessary for programs, projects or activities provided for in title III of the Department of Defense Appropriation Bill, 1983 (S. 2951), at a rate of operations, and to the extent and in the manner and under the authority provided for in such bill as reported to the Senate on September 23, 1982, as if such bill had been enacted into law.

Mr. GORTON. Mr. President, this is an important and significant amendment which deals with the entire attitude of the Congress and the Nation toward the budget for national de-

The amendment would cause 3.3 percent to be taken from all elements in the defense budget included in the continuing resolution, except for those dealing with regard to readiness. The reduction would amount to \$5.6 billion, without specification except for the fact that readiness would be exempted. I would like to emphasize that the 3.3 percent applies to the balance of defense programs and not to the entire \$233 billion included in the budget at the present time.

The precise nature of those cuts would be left entirely to the Department, with consultation from the Armed Services Committee and reductions from Senator Stevens' Defense Appropriations Subcommittee. The specific details of these would not be dictated by this amendment.

The amendment arises out of a number of facts which are undisputed. The first and most important of these facts is that the United States now is experiencing a rate of inflation markedly lower than the rate of inflation which was anticipated when both the 1981 budget resolution and the budget resolution passed in May of this year were passed. In each of those cases, the budget resolution for the national defense function was based on assumed inflation rates markedly higher than the rates which we have in fact experienced.

A second and regrettable difference between the present and the time at which we passed each of those budget resolutions is that the growth rate of the U.S. economy-that is, the growth rate of the gross national producthas been sharply lower than projected.

The consequence of these two facts-one, the rate of inflation, which is encouraging; and the other, the gross national product figures, which are exceedingly discouraging-is that the real dollar appropriations contained in this continuing resolution are higher than was projected or anticipated by this body and by the Congress of the United States at the time we passed the last two budget resolutions.

As a consequence, spending for national defense as a percentage of the gross national product is also higher than projected.

As Members doubtless recall last year we enacted legislation to remedy the phenomenon known as bracket creep-the increase in the tax burden borne by taxpayers which results from inflation. Similarly, the amendment I offer today will remedy an effect I shall call—that is, the unexpected defense creep increase in spending for defense in real terms caused by the unanticipated low rates of inflation and growth in the economy which we

are now experiencing.

My amendment recognizes and compensates for this defense creep. It also recognizes the weakening national consensus for massive increases in the national defense budget. I do not mean to suggest that a significant strengthening of our defense is both in order and necessary. But I do believe that we should need the public's attitude toward these increases. It is partly in order to recreate not only the perception but the actuality of fairness in the way in which this administration and this Congress deal with the budget problems facing the United States today that this amendment is proposed.

We face annual budget deficits this year and in the next few years of between \$150 and \$190 billion. We face extraordinarily difficult during the course of next year in the passage of a budget resolution. We must, somehow or other, create a consensus which, at the same time that it reduces the rate of growth in entitlement spending, provides severe controls over discretionary nondefense spending. At the same time, we must see to it that the budget for national defense is not exempted from the same kind of scrutiny which has already been applied to most other spending areas which are the subject of this Congress' work.

Mr. TOWER, Will the Senator yield

for a question?

Mr. GORTON. This Senator will not yield until he completes his remarks.

Mr. TOWER. I wanted to question him on the assertion he made. I believed him to say that the Armed Services Appropriations Committee, in effect, had not subjected defense to the same kind of scrutiny that other programs have been subjected to.

Mr. GORTON. The Speaker would like to compliment the Senator from Alaska, most particularly, and the Appropriations Committee for forcing the administration to live within the budget resolution which this body and the House of Representatives passed earlier this year. Members will note, however, that the Department of Defense and, at one point, the President of the United States, felt quite free to ignore even that budget resolution.

The fact, however, of that significant triumph on the part of the Appropriations Committee does not avoid the fact that we have an economy which is in worse shape today than we projected when we passed that resoltion. We also have a rate of inflation which is lower today by a considerable amount than was the case when we pased that budget resolution.

Mr. TOWER. May I further ask a clarifying question of the Senator?

Mr. GORTON. No, Mr. President, this Senator will not yield until he has completed his remarks, at which time he will be happy to yield.

Mr. TOWER. I just want to be certain that I understood the Senator, that what he said was the Armed Services Committee has been derelict in scrutinizing the defense budget.

Mr. GORTON. What I was saying is that the national defense budget at this point represents a greater share of the gross national product than we anticipated when we passed either the defense authorization bill or the budget resolution this year, and that it represents a greater number of real dollars because of the lower rate of inflation than this body anticipated when it passed the budget resolution earlier this year,

Mr. TOWER. I am just trying to understand the Senator's statement about scrutiny. I could not hear it over

Mr. GORTON. Mr. President, the Senator from Washington would like to complete his remarks without interruption, if he may be permitted to do so.

The PRESIDING OFFICER. The Senator from Washington has the floor.

Mr. GORTON. The amendment which is before us reduces the defense budget by an amount necessary to reverse the defense creep which has occurred in 1982 alone, and does not address the effects of lower inflation during the course of 1981.

Because of the fact that this continuing resolution includes the defense budget for all of fiscal year 1983, which I think is a very good idea, we shall not have another opportunity to deal with that fiscal year 1983 national defense budget. I want to emphasize most strongly that when we have passed the continuing resolution, we shall have entered into a course of conduct-entered into a set of spending decisions-which will be exceedingly difficult to deflect or defer for next year. It will make it very, very difficult for the Senate and for the House of Representatives, in the course of passing a budget resolution for 1984 and succeeding years, to undo any of the decisions which are being made here and now. Even though it may be more evident then that there has been a significant amount of defense creep due to weakness of the economy and an unexpectedly low rate of inflationthat we have spent considerably more than we intended to spend—we will be locked into a higher real level of defense spending. This will set a higher base on which to build the fiscal year 1984 budget resolution, even though a moderation in defense spending increases may be required.

In other words, Mr. President, if we are to begin to re-create the consensus which is necessary for an appropriate increase in our spending on national defense-which is to last through the next several years-we need to begin now. I repeat that I do not believe that the budget for national defense has been subjected to the same degree of scrutiny, to the same type of discipline, as has the budget in almost every area of nondefense discretionary expenditures. That scrutiny of defense programs will very clearly be required now if we are ever to begin to start on the road toward a balanced budget and make the necessary reexamination of entitlement spending during the course of the next year.

At the same time, I must say very bluntly, we will not exercise the political willingness to control entitlement programs unless and until we persuade the people of the United States that we are willing to engage in the same kind of scrutiny and discipline in connection with the budget for national defense.

It is because of the difficulty of those outside of the administration or outside of the Armed Services Committee or the Defense Subcommittee of the Appropriations Committee to set specific priorities—to make determinations between weapons systems on a highly sophisticated and intelligent basis—that this amendment is across-the-board or, rather unspecified with respect to everything except for readiness.

I readily admit that I prefer the advice of the administration, of the distinguished Senator from Texas, and of the Senator from Alaska in making those determinations. I despair, however, of getting the administration to exercise any such prioritization without being forced to do so by this body.

Less than 12 hours ago, I voted with the Senator from Alaska and the Senator from Texas in connection with the MX missile. I have the relatively strong feeling that, if priorities are set as are required by this amendment, strategic weapons will survive and that it will be in other areas that most of these cuts can be made. But I cannot be certain of what the administration would recommend under those circumstances or, for that matter, what the Senators from Alaska or Texas would recommend under those circumstances. This amendment is designed to force that setting of priorities.

Very, very bluntly, we are not going to be able to continue on the road on which we are going at the present time—we have seen that in what has happened in the House recently—unless we recognize this fundamental and profound shift in the views of the American people toward national defense budgets. Unless we take steps such as those which are contained in

this amendment, we shall find that the steps we will be taking in 2 or 3 years will require much greater cuts in readiness and in weapons systems themselves.

Mr. President, I urge my colleagues to consider very, very carefully whether we should not begin today with the process we know we must follow in 1983 with the new Congress, which will examine without prejudice every area of the budget-entitlements, discretionary nondefense spending, and defense spending itself, as well as revenues. If we do not, we will not reach conclusions of an appropriate nature next year. We will not work this country out of the recession in which it finds itself at the present time; we will not work ourselves back into the prosperity for which we all long so greatly. It is very, very important that we begin to take steps like this right now, in December of 1982, and not defer them until some vague future dates.

Mr. TOWER. Will the Senator yield

for a question?

Mr. GORTON. The Senator will vield on the time of the Senator from Alaska, but I believe there are other people who wish to speak on this subject.

Mr. STEVENS. I yield to the Senator from Texas 5 minutes.

Mr. TOWER. I understood the-Mr. STEVENS. Mr. President, I yield

the Senator from Texas 5 minutes. Mr. TOWER. I understood the Senator from Washington to say that defense does not receive the same scrutiny that other Federal spending programs receive, which I think is a rather severe indictment of the Armed Services Committee and the Appropriations Committee. Would the Senator care to elaborate on that and note

in which arfeas we have been derelict? Mr. GORTON. The Senator would answer the distinguished Senator from Texas in precisely this fashion. It is obvious to the Senator from Texas, as it is to the people of the United States, that the tests placed on the defense budget by this administration have been totally and completely different from those to which nondefense discretionary spending has been subjected; that that case has existed for 2 years; that on every occasion in which the Congress has asked for a set of priorities on the part of the national administration, it has failed to get them and has simply been told by the Secretary of Defense and by others that it is absolutely necessary that we follow their instructions to the letter.

Now, the Senator will not only admit-he has already admitted in the course of his remarks-that when it finally dawned on the administration that we were serious about the numbers which were included in the first budget resolution this year, when the Senator from Alaska went so far as to tell the Department of Defense he would not report a bill until they set priorities which brought them within that number, they did in fact do so.

The Senator from Alaska and his committee are to be greatly commended for that, but that action has not resulted in any different approach toward this entire problem by the administration. The passage of this amendment would require the administration to do exactly what I think is necessary. It would put us on record saying that we are in fact going to see to it that every element of spending in this budget is submitted to the same degree of scrutiny and that there are no sacred cows. That is what it is designed to do.

Mr. TOWER. Mr. President, what has been recommended here is a meat ax slash; it is an abrogation of congressional responsibility. As a matter of fact, it tends to make the authorization/appropriation process less relevant when we suggest meat ax cuts. I have never voted for meat ax cuts in this body, be it on welfare programs, social spending, or any other kind of spending. I think that we in the Congress ought to face up to our responsibility and define where we think these cuts should come.

To begin with, the distinguished Senator from Washington errs if he thinks that defense inflation is the same as inflation in the private sector. Let me read this memorandum of the Congressional Budget Office.

There has been much interest recently from the press and several congressional committees in the possible reduction in the fiscal 1983 budget due to lower than anticipated inflation rates. The CBO's most recent analysis shows that price increases for defense purchases have slowed but not below rates anticipated in earlier administration and CBO forecasts. Our projection, based on September 1982 CBO economic and budget outlook, points to a potential net reduction in the 1983 Defense budget of about \$0.7 billion in budget authority, not a significant amount given the uncertainty inherent in such estimates.

I suggest both in the authorization bill and in the appropriation bill reductions were made in substantially greater amounts than that.

Let me further note that if defense has such an adverse impact on the economy, why is it that no Member of this body will step forward and recommend defense establishments in their States be reduced in spending? I wish they would do it, but they will not.

And some of the greatest advocates of reducing defense spending in the Congress of the United States are the most vigorous guardians of defense spending in their respective States or districts. We can cite many examples of that but we do not like to mention

I wonder if the Senator from Washington would step forward and tell us where the Department of Defense is wasting money in his State, where are the low priority items that can be cut out?

Now, in fact, we have made reductions, and I can tell the Senator where they come from, because defense spending has already been prioritized.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. TOWER. The priorities are readiness and sustainability.

The PRESIDING OFFICER. Does the Senator from Alaska yield fur-

Mr. STEVENS. Does the Senator wish further time?

Mr. TOWER. One minute.

Mr. STEVENS. I yield 1 minute.

The PRESIDING OFFICER. the Senator from Alaska yields 1 minute.

Mr. TOWER. Readiness and sustainability and systems modernization; force structure comes third. And if the amendment of the Senator from Washington is adoped, we will have to make drastic reductions in force structure because we really do not have that much discretionary spending left in defense. I think if we do so, we ought to authorize a process whereby we repeal the current restraints put on the Department of Defense for base closures and permit them to close them, lock them up in 30 days and move them out without any reference to congressional restraint, and every-body better be prepared to identify things in his own State or district that should be reduced. It is generally regarded that defense spending is an economic asset to a State or district, and I challenge anyone to prove otherwise

Mr. STEVENS addressed the Chair. The PRESIDING OFFICER (Mr.

HAYAKAWA). The Senator from Alaska. Mr. STEVENS. I understand the frustration of the Senator from Washington.

Mr. STENNIS. Mr. President, may we have quiet. This is an important matter.

Mr. STEVENS. We see signs that there may be a lessening of support for defense spending, but I think that is not a real image now. I think there have been some of these items that have had so much attention that they have been handled in a way to put into question some of the credibility that the figures have had in the past. We are doing our best to straighten that out, and I thank the Senator for his comments concerning our action.

But, Mr. President, the impact of the amendment of the Senator, a 3.3percent reduction across the board with the exception of O&M, would be a cut of \$5.4 billion, almost \$5.5 billion.

We have already made a cut of \$16 billion. The House has made a cut, Mr. President, of \$19 billion. We are talking about budget authority now. Worse than that, we made a cut of \$8.7 billion in terms of outlays for this year alone, and we have adjusted the inflation item in this bill. It is much lower than it was the year before. As the Senator from Texas said, there is a lag of money in this bill behind the overall average of inflation. The average inflation in the country is about 5; the inflation in the defense bill in the area that the amendment of the Senator touches, because of the way it is done, excepting O&M, is in the high part of the average for the Department of Defense.

Now, I say to my friend—and he is my southern neighbor, Mr. President—that I understand where he is going. I want him to know we have gone through this bill and we have insisted that it is an honest bill as far as the reductions are concerned.

Senators are going to hear some amendments soon to put money back in where we have taken so much out. I do think that it ought not to be approached from the point of view of a cut like this. It is an across-the-board cut. We could allocate it, but it would take us a long time to do that. We had a tough enough time getting the cut we have already imposed on the Department of Defense prioritized.

I always like to remember the story of my friend in the State legislature when they wanted to cut 5 percent of the money that was necessary to build a bridge across the river in his district. That is the problem with cuts of this type. You just cannot get there from here if you apply a cut across the board. We have been specific, Mr. President, my good friend from Mississippi and his staff, and I want to acknowledge the distinguished Senator from New Hampshire (Mr. RUDMAN). I am sure that Senator STENNIS would join me in commending him as being probably the member of the subcommittee that paid more attention to cost and the specific items than any other member of our committee, and the Senate will see some of that this afternoon as we address specific items. But we have paid attention to this money. I think it is indicative of the situation, and I want the Senate to realize none of this money is spent in my State except in terms of general military expenditures. I have no production, no defense contractors, no suppliers. There is nothing here that affects my State. I do not have any parochial interest except one who believes in a strong defense.

I am not saying that makes me lily pure, but I do believe that we have been very objective in this bill and it is not the kind of bill that we can afford to have an across-the-board cut on. We will come out of the conference committee at a lower figure than we have got by definition and that will place the total cut for this year somewhere in the vicinity of \$9.5 billion, somewhere around \$19 billion in budget au-

thority. That is a substantial cut in the budget presented by the President of the United States.

I would like to yield to my good

friend from Mississippi.

Mr. BOSCHWITZ. Would the Senator yield? The Senator from Minnesota has to preside, has to assume the Chair in just a few minutes, and I would like to ask a question or two or three of the Senator from Washington.

Mr. STEVENS. With the consent of the Senator from Mississippi and with the request of the Chair to notify me when we have 5 minutes left, I will be happy to yield to my good friend.

Mr. BOSCHWITZ. And it will be on

the time of-

Mr. STEVENS. You are going to take the time of the Senator from Washington? I am happy to yield.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. I would like to ask the Senator from Washington how

he arrived at the 3.3 percent.

Mr. GORTON. We took the difference between the predicted rate of inflation for the gross national product deflator, which was 7.3 percent at the time of the debate over the 1983 budget resolution, and subtracted the amount now predicted by the most recent consensus of economic forecasters, which is 5.3 percent or a little bit The difference is 2.1 percent. We applied that number to the outlays figure in S. 2951 and determined that a savings of \$3.25 billion in addition to the amount already saved by the committee was needed. When this figure was converted into budget authority, which was accomplished by applying the spendout rates in S. 2951, it came to a savings of \$5.6 billion in budget authority being needed to bring the budget into line with the budget resolution in real terms.

Mr. BOSCHWITZ. I have been concerned about the rapidity of growth of the Defense budget, and perhaps the Senator from Alaska will talk about that and the figures in each one of the

vears.

I have supported, by and large, defense spending and most of the increases, though I have been distressed with the rapidity of the increase. I agree with the Senator that we will not be able to control entitlements until we are able to show the American people that we are more able to control defense than we seem to have been.

I wonder if the Senator would expand on that point, and I yield the floor.

Mr. GORTON. The Senator would be happy to do so, but would now wish to defer to the Senator from Mississippi and address the point raised by the Senator from Minnesota in the balance of his remarks, for which only a few moments remain. Mr. STEVENS. Mr. President, I yield 3 minutes to my friend from Mississippi.

Mr. STENNIS. Mr. President, I thank the Senator from Alaska and I commend the Senator from Washington. I want him to hear this. I want him to hear it. I commend him for his sharp eye and his good analysis here with reference to this money matter.

But it has been my experience over the years now, even though it looks good on paper, these across-the-board percentage reductions just do not work out. They are almost impossible to handle in conference. We get into the biggest kind of arguments in conference with stalemates with the conference from the House of Representatives on how it is going to be applied and where.

It gives too much authority, too much power, too much power to the Department of Defense.

We are the ones to set this money figure. We are to specify where it is going with very few exceptions.

I think we find rather rapidly that the figures we set and worked out are better and really save money better.

So I think as to these figures that were adopted here by those who put them in the bill it was after a rather mature consideration and measurement and comparison with the other needs and really save more money by far to stick to the system of itemized reductions, and I am impressed with what has already been done here with reference to these figures.

I am sure my time is up. I thank the membership for listening to my remarks. I am glad to support the committee on these figures.

The PRESIDING OFFICER (Mr. Boschwitz). Who yields time?

The Senator from Washington.

Mr. GORTON. Mr. President, I ask unanimous consent that the Senator from Maryland (Mr. Mathias) be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, I yield such time as she wishes to the Senator from Kansas.

Mrs. KASSEBAUM. I thank the Senator from Washington.

Mr. President, as a cosponsor of this amendment, I feel it is not a meathatchet approach. I wish to say I think it has been a debate that has been thoroughly aired here.

Mr. President, I hope that the Senate will clearly understand the nature of the amendment that Senator Gorton and myself and others are offering to the continuing resolution. This amendment is not an across-theboard cut at the Defense budget; it is not the type of blind cutting amendment that the Senate has voted on many times in the past.

In discussing this amendment, we should keep in mind the following points:

The 3.4-percent reduction contained in this amendment will apply only during the course of the continuing resolution; that is until September or whenever we enact a DOD appropriation bill, whichever comes first.

Title III of the Defense appropriations bill, the operation and readiness account, is specifically exempted from the reductions that would be enacted if this amendment is signed into law. Thus, the area where we are being told that we are most deficient—training, spare parts, maintenance, overhauls; in short, the nuts and bolts of the Defense budget—shall receive increased funding beyond other portion of the Defense budget;

Our amendment refers itself to budget authority. We have not specified or mandated any necessary amount of outlays to be reduced. Thus, there is no requirement to select reductions laden in outlays. This aspect of our amendment should guard against finding the necessary reductions in manpower issues.

If some of my colleagues suspect that this amendment allows a certain amount of freedom on the part of the Department of Defense to secure the saving we seek but at the same time strongly hints that the amendment is geared for finding those savings in the procurement part of the budget, they are not incorrect. The sponsors of this amendment have made this choice consciously. The procurement budget that we are selecting this year predetermines the size of the budgets that we will be facing in the next few years. To procure now the amount of hardware in this year's defense budget will predetermine the amount of spares, maintenance, training, manpower, and much more in next year's budget, and the year after that, and the year after that, and the year after that. We cannot allow ourselves to gloss over this issue. If we endorse this defense budget as it now stands, we will be creating support requirements for later years that today appear well beyond our fiscal ability-and perhaps willingness-to provide. If we do not enact these cuts now, we will be either predetermining budgets for several years to come or we will be creating a structure that we will be undermining in later years should we think that defense savings can be enacted next year rather than now.

This problem may even now be worse than we fear. Last week several news articles appeared that pointed to the existence of an internal Department of Defense study that indicates that the 5-year defense plan is seriously underfunded and that what we are buying now for our defenses will cost considerably more than what we expect. History would seem to bear

this out. If this study is, indeed, correct, the hole we are digging ourselves into is large, far larger than we would like to think. I would hope that this issue will receive our most serious attention in the coming months.

Mr. PERCY. Mr. President, throughout my Senate career I have opposed across-the-board cuts. Across-the-board cuts inevitably penalize the most efficient operations and lead to budget padding when agencies submit their requests. Once agencies begin to anticipate across-the-board cuts, the greatest reward goes to the agency or department that pads its request the most.

The President's original budget request for fiscal year 1983 has already been cut by the Appropriations Committee by \$16 billion in budget authority. The House has cut it by \$19 billion. This level, if sustained in conference, would reduce the real rate of defense spending increase from 1982 to 1983 from over 13 percent to less than 6 percent, which represents the biggest defense budget reduction by Congress in 22 years. I support the defeat of the amendment.

Mr. GORTON. Mr. President, I yield 1 minute to the Senator from Minnesota

Mr. DURENBERGER. Mr. President, the past few years have seen the growth of a remarkable consensus in favor of restoring our national security. I expect more than a few raised eyebrows at that statement, for we hear much about the collapse rather than the cohesion of our consensus.

But I remember a time, not long ago, when the American public and its Representatives in Congress sought to cut defense spending to lower and lower levels each year; a time when we often chose to overlook the often harsh realities of the world we live in; a time when our attitude toward fiscal responsibility was altogether irresponsible.

We have come a long way since that time. The harshest critics of our current defense policy nonetheless support regular increases in at least some categories of defense spending. There is widespread understanding of the nature of the threats we face and the challenges we must overcome. There is a strong recognition of the need to reduce deficits, balance the budget, and restrain wasteful Government spending. In short, we disagree over the margins; we agree to an extraordinary amount about the central thrust of our policy. There is, in other words, a remarkable consensus in favor of restoring our national security.

Mr. President, the amendment we offer tonight is offered in that spirit. It implicitly recognizes the need to continue our renewed and long-overdue emphasis on readiness: training, spare parts, fuel, maintenance, and so forth.

It implicitly recognizes that we neglected our defense budget for too long, and therefore provides for a generous increase over last year's levels.

It implicitly recognizes, finally, tha our economic helath is a vital element of our national security. The reductions proposed in their amendment will not balance the budget or retire the debt. But they will help. Just as important, they will signal to Americans that we in Congress are serious when we say that no area of Government spending is or can be above scrutiny. That signal is needed if we are to restore the fundamental confidence which must underwrite a policy of national security.

Some may object that we seek savings without specifying reductions on a line-item basis. That is a valid concern. But we must remember that we are debating a continuing resolution here, not a defense bill, and our opportunity for such finely tuned reduction is therefor limited. That is why the proposed reductions are prorated over the term of the continuing resolution only, and not directly tied to an annual appropriations group. If we get a bill, we will have the chance we lack tonight.

I shall make only one aditional comment and that is as to the remarks of the Senator from Mississippi about the objection that we seek savings without specifying reductions on a line item basis, and I think that is a valid concern. But I think we also msut remember we are debating here a continuing resolution, not a defense bill, and our opportuntly for finding reductions is therefor limited.

That is why the proposed reductions are prorated over the term of the continuing resolution only and not directly tied to annual appropriations.

If we get a ill which I expect we will then I think we will have a chance at that detail.

I congratulate the Senator from Washington, the Senator from Kansas, and others for proposing this very thoughtful amendment.

Mr. GORTON. I thank the Senator from Minnesota.

Mr. President, I ask unanimous consent that the Senator from Minnesota (Mr. Boschwitz) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I yield myself 2 minutes.

As soon as the time has expired I am going to make a motion to table the Senator's amendment.

I am going to urge Members on my side of the aisle to consider what they are doing.

We worked our guts out to get this thing down to where they told us to get it. I had to adjourn four meetings. I had to have two meetings at the White House and a series of meetings with the Secretary of Defense to get the discipline that was required to live up to the level the Senate said.

What Senators are doing is revising the Budget Act. We cannot run the Defense Department in this fashion, particularly when we are not passing a bill until December.

The delay has already cost the Department of Defense \$1 billion a month in terms of the money that can be expended in terms of these programs because we are still operating in 1982 levels.

This is not the way to treat a committee that has given absolute attention to the instructions of the Senate. We have done exactly what the Senate told us and at severe strain of relationships with the Defense Department with which we must work daily.

This is \$8.7 billion below the President's budget in outlays and it is \$16 billion below the budget in authority.

The effect of the Senator's amendment is to cut another 3.3 percent from procurement.

And he tells us, "You allocate it."

That is almost impossible and to go to conference tonight it will take me a day or two to get the numbers in order to tell the House of Representatives what our numbers are.

Do not treat me like this or my committee like this.

I think there is a system here we have agreed to live up to and no chairman who has come before the Senate has done what we have done. We have lived up to the Budget Act to the extent of even taking \$200 million more than would have been required under the Budget Committee's allocation because our committee gave us \$200 million more and we did it.

The PRESIDING OFFICER. The Senator has used his 2 minutes.

Mr. EXON addressed the Chair. The PRESIDING OFFICER. Who yields time?

Mr. EXON. Mr. President, could I have 2 minutes?

Mr. STEVENS. I ask the Senator is he for or against the amendment?

Mr. EXON. It will be somewhat of a surprise to the Senator from Alaska, but I am taking his position on this.

Does he have 2 minutes?

Mr. STEVENS. I am happy to share the time I have remaining which I think is 2 minutes.

The PRESIDING OFFICER. The Senator from Alaska has a total of 4 minutes remaining.

Mr. STEVENS. I am happy to share with my cosponsor of my position 2 minutes.

Mr. EXON. Mr. President, will wonders never cease? I am going to be very brief.

While I feel that the Senator from Washington and his associates are very sincere, I hope that we will turn this down for the simple reason that

this is one more case where we will delay putting off the hard decisions that someday we are going to have to make on the defense budget, and I say that as a member of the Armed Services Committee. We are not going to be able to go on forever making a few cuts here and a few cuts there without jeopardizing our real defense needs. Sometimes we are going to say we are going to have to make some choices between all of these expensive programs that we are moving forward on and I am afraid although it is well intentioned and as much as I would like to make the reductions that are being suggested here, I think this is the wrong way to make them, the wrong time to make them, and I hope that we can support the Senator from Alaska in this case.

Mr. STEVENS. Mr. President, I know the Senator from Washington deserves the right to close on his amendment, and I would want to allow him that.

I wish to show the Senate. This is procurement alone. We have eight titles—this is procurement alone—single spaced printout, 58 pages. There are 22,000 items in this bill that we have gone over. This is 3.3 percent that between now and whenever we go to conference we have to allocate.

That is the intent of the Senator's amendment, and he is my great friend and good neighbor, but I say this is an impossible task. You cannot assign a committee that has done its work that kind of task.

Mr. STENNIS. It is not asking too much to give us a chance here for this Senator's speech to be heard. This is a highly important matter. This amend-

ment might pass.

Mr. STEVENS. It might indeed, and it worries me. How much, for instance, should we take from the attack helicopter, how much should we take from the wide body allocations for Boeing, how much should we take from Mississippi, how much should we take from Brooklyn Naval Yard?

We are going to get those issues here in a minute, but we have been fair.

No one has come to me and said, "What you have done is unfair."

We allocated between the services. We allocated geographically, and we met your test.

I plead with you, you can cut across the board somewhere else, but you cannot here unless you give me the numbers before 6 o'clock tonight.

Mr. GORTON. Mr. President, I thank especially the Senator from Nebraska who it seems, though he spoke on the other side, in fact made our case for us. We cannot delay any longer these hard decisions. But if we do delay these hard decisions for what amounts to another fiscal year, they will be all that more difficult and all that more inefficient.

I am second to no one in my admiration for the Senator from Alaska and for what he has done. But essentially, the Senator from Alaska is telling us that the technical problem is so difficult that we cannot do what the United States of America and our citizens want us to do, that we cannot set the preconditions for the budget decisions which we meet next year.

I submit, Mr. President, that this simply is not the case. If we are unwilling to make these decisions now, we will find ourselves making much more difficult decisions and probably worse ones in another year.

It is exactly because the Senator from Texas knows perfectly well that we consistently turned down specific cuts and it is exactly because the Senator from Alaska and the Senator from Texas are so wise in this field that this amendment says that it is they who are most expert who should make these decisions. You should not come and say, well, how much of it is going to be in your State, how much is going to be in another State. You should make these decisions, and you should make them on an objective defense policy basis.

It is nevertheless well past the time that we began to subject the Department of Defense to a discipline which every other Department of this Government already knows very, very well, and which every other committee already knows very, very well. It is time that we began to rebuild a consensus for the spending increases necessary to maintain a strong national defense which the attitudes of the last 10 years have gone so far to destroy.

Mr. STEVENS. Mr. President, like other people who get in this spot sometimes the truth is restricted. I thought I had more time than I have.

I want to tell my good friend it is a time problem, and to tell you if the Senate had told us to cut what would amount to another almost \$6 billion and the Senate had sent that correction to us we would have cut it. We have followed the budget process.

You are not amending my bill, our bill. You are amending the budget process and I believe if there is to be a change you ought to consider that we will have supplementals next year and maybe we should face the question of whether there should be more cuts in the defense budget. I do not think so.

Let me tell you that we have already absorbed in this reductions in civilian manpower levels. Under the House bill we have got a series of other items. We have got \$900 million that is fenced because of the action we took this morning. There are any number of amounts in this bill that are not spendable, and we do not have time to address this right now.

The PRESIDING OFFICER. The time of the Senator from Alaska has expired.

Mr. STEVENS. I move to table the Senator's amendment, and I ask for the yeas and nays. Does the Senator have any time left?

The PRESIDING OFFICER. The Senator from Washington has 48 seconds left.

Mr. GORTON. The Senator from Alaska just told us that, if we had made this decision 2 or 3 months ago, he could have and would have carried it out. But because we come 60 days late, we should spend an extra \$5.6 billion this year and considerably more the next year. In my view the Senator from Alaska has made my case.

Mr. STEVENS. That is not true. I said I lived up to the Senate rules and live by the budget process.

I move to table the Senator's amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska to lay on the table the amendment of the Senator from Washington. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER), and the Senator from Maryland (Mr. Mathias) are necessarily absent.

I further announce that, if present and voting, the Senator from Maryland (Mr. Mathias) would vote "nay."
Mr. CRANSTON. I announce that

the Senator from Kentucky (Mr. Hup-DLESTON) is necessarily absent.

The PRESIDING OFFICER. there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 52, nays 45, as follows:

# [Rollcall Vote No. 439 Leg.]

#### NOT VOTING-3

Huddleston Mathias

So the motion to lay on the table UP amendment No. 1515 was agreed to.

Mr. STEVENS. I move to reconsider the vote.

Mr. STENNIS. I move to lay that motion on the table.

The motion to lay on the table was

agreed to.

Mr. STEVENS. Mr. President, there are other amendments. The Senator from Colorado indicated he has two amendments which he is willing to proceed with. Can he tell us which one he is ready to proceed with now?

Mr. President, first, I want to thank the Senator for that bipartisan response. It will enable us to get a bill, I think, by Monday.

I yield to the Senator from Colorado. I yield the floor if he wants me to

#### UP AMENDMENT NO. 1516

(Purpose: To increase Navy combat readiness by adding funds for operation and maintenance, Navy, for aircraft depot maintenance activities and to provide for those funds by eliminating appropriations for one nuclear-powered aircraft carrier)

Mr. HART. Mr. President, I vield to my colleague from Michigan (Mr. LEVIN), who is a cosponsor of the amendment which has to do with nuclear aircraft carriers and operation and maintenance spending. The Senator will offer the amendment.

Mr. STEVENS. I thank the Senator for telling us this is a carrier amend-

The Senator from Michigan has the floor. May we have a copy of the amendment?

Mr. LEVIN. I send the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Michigan (Mr. Levin), for himself and Mr. HART, proposes an unprinted amendment numbered 1516.

On Page 10, Line 2, strike out the period. and insert in lieu thereof a colon and the following:

"Provided further, That with respect to shipbuilding and conversion, Navy, the amount appropriated shall \$13,451,150,000;

'Provided further, That with respect to Operation and Maintenance, Navy, the amount appropriated shall \$21,119,400,000, of which \$1,675,599,000 shall be available for aircraft rework and

Mr. LEVIN. Mr. President, I, along with the Senator from Colorado, am proposing that we eliminate one of the two nuclear aircraft carriers in the defense budget that is contained in this continuing resolution. Our amend-

ment would reduce the budget authority by \$3.4 billion for one of two aircraft carriers. The outlay savings in this first year are very, very slight, as they always are in these big-ticket items. There are only \$76 million in outlays that are saved in this first year and we would use those outlays to increase the Navy aircraft depot maintenance program. That is an item that has been underfunded. It is a readiness item.

What has happened in these defense budgets is that we build these bigticket items like the nuclear aircraft carriers and we are underfunding some important combat readiness areas. That is an example of one of the things that is wrong with the defense budget.

Mr. STEVENS. Will the Senator yield for a moment so I may ask if he is interested in a time agreement?

Mr. LEVIN. I shall be happy to yield

for this purpose.

Mr. STEVENS. This is the amendment, as I understand it, in which you take the money from carriers and put it into O&M. There is no contemplated amendment to this, is there. Mr. President?

Mr. LEVIN. I have none.

Mr. STEVENS. I do not contemplate an amendment to the amendment. If no other Senator does, I wonder if Senators would consider a time agreement and that the amendment would not be subject to an amendment.

Mr. LEVIN. That would be fine.

Mr. STEVENS. What time would the Senators suggest?

Mr. HART. Mr. President, I would suggest 40 minutes equally divided and we may not use all of that.

Mr. STEVENS. Very well.

# TIME LIMITATION AGREEMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that there be a time agreement on the Senators' amendment of 40 minutes equally divided and that the amendment not be subject to an amendment.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I would like to designate the Senator from New Hampshire to handle this side's time.

Mr. LEVIN. Mr. President. I yield myself 5 minutes.

The upfront obligation of huge sums for big-ticket items like the nuclear aircraft carrier means that Congress will be forced to slack off the combat readiness accounts in the future to make the spending economies that we know will be required.

I asked the Pentagon why they are building two nuclear aircraft carriers this year. Just a few years ago, they told us that we would only need 13 carriers to protect our national security. Now the tune has changed and they say 15 carriers. I said, "Why two carriers in 1 year?"

The answer I got back from the Pentagon is that we save money when we buy in quantity.

The next question is, Well why not buy five and balance the Federal budget?

Mr. President, we cannot afford two nuclear aircraft carriers in 1 year. We simply cannot afford to do that.

There also is a severe question as to the military value of these huge nuclear aircraft carriers. Adm. Hyman Rickover, the "father of the nuclear Navy" and of the nuclear aircraft carrier, himself testified to Congress that the nuclear aircraft carriers proposed in this bill would last about 2 days against Soviet submarines. Those are his words—about 2 days.

The head of Pentagon research and development, Dr. Richard DeLauer, called a 600-ship Navy built around large aircraft carriers a "target-rich" environment. Translate that to mean sitting ducks.

The Washington Post this morning had an editorial entitled "Preserving Defense Options." I would like to share some paragraphs in this article with my colleagues, because it reflects the problems we are creating for ourselves when we make these tiny downpayments in outlays, these huge authorizations, and in the outyears, soak up billions of dollars which we know is going to come from readiness.

The Washington Post editorial of the morning reads:

## PRESERVING DEFENSE OPTIONS

The Defense appropriations voted by the lame-duck Congress will severely restrict Congress' ability to change its mind about force structures in the future. People at the Pentagon know that well. Do members of Congress?

Congressional unease about uncontrollable future growth in the defense budget has been mounting. Yet both the House and Senate versions of the continuing resolution—which will control defense spending for at least the next several months—include, with the notable and perhaps temporary exclusion of the MX missile, all the many weapon starts and continuations sought by the administration. If people in Congress think they can easily reconsider the wisdom of those purchases at a later date, they should think again.

Each new weapon start—no matter how small the initial down payment—attracts a powerful constituency in Congress ready to oppose any curtailment on grounds that money will be wasted and jobs lost. As the production lines get rolling, additional claims on future budgets will be made not only to pay for the weapons but also for the often equally huge—and usually underestimated—costs of equipping, maintaining and manning them.

Budget pressures in future years are likely to be so great that Congress will have to take actions that are harmful to national security. It could stretch out or terminate new weapons production. More likely it would ignore new developments in weaponry, skimp on essential maintenance and personnel or prematurely phase out still usable ships, planes and other weapons.

The only way to avoid this start-and-stop type of buildup is to proceed carefully, leaving some room in future budgets to adjust to changing circumstances. That means getting specific about where each major weapons system fits into urgent defense needs. What gap, for example, do the two additional nuclear carrier task forces fill? Will the planes they carry have the range and flexibility needed for likely missions? Could the \$30 billion or so needed to build and support them be spent better on other unmet needs. such as sealift and airlift? The Army is ranidly changing its doctrine for the defense of Europe. What does that imply about future needs for various ground weapons and air support?

These sorts of questions are being asked by many supporters of a strong national defense. They question whether the administration's budget plans are not too heavily conditioned by the historic buying preferences of the military services—the Navy favoring big surface ships, the Air Force its bombers and the Army its tanks—and too little attuned to how rapidly changing weapons technology is forcing changes in military strategy.

Congress has now missed its chance to force a more reasoned distribution of funds, or at least a clearer justification of the administration's defense investments. That makes the discussions of next year's budget, now going on within the administration, all the more crucial. The MX missile debate is important, but it is essentially a debate about strategic doctrine, not about budgets. The administration should also take time to consider how its current spending decisions may limit its future choices with respect to conventional forces.

That, I am afraid, represents the critical problem that we are facing when we make these investments in these huge, shiny weapons systems which are going to soak up billions from readiness.

As it was stated in this most recent edition of Newsweek magazine, December 20, 1982:

Also, by producing shipping lists chockfull of big-ticket items, the services are forced to balance their budgets on the back of the less glamorous supply inventories and maintenance money that are the real components of "military readiness."

Mr. President, the outlay savings that we can achieve in 1983 by canceling one nuclear aircraft carrier are relatively small, \$76 million, in comparison to the budget authority savings of \$3.4 billion. However, much more significant outlay savings will be realized in fiscal year 1984-\$494 million-and in fiscal year 1985-\$646 million-by this cancellation. Half a billion dollars in each of those fiscal years, when we will be feeling the worst of the budget crunch and searching desparately for savings, are savings we should seize eagerly. But outlay savings in fiscal year 1983-modest as they are-can help reduce an important readiness shortfall in another area of the Senate Appropriations Committee's bill: the Navy's aircraft depot maintenance

Aircraft depot maintenance is an essential element in the overall readiness of the Navy's aircraft. This program is divided into five major categories:

Airframe rework includes depot level maintenance of fleet aircraft, including both the aircraft structure and selected airframe system.

Engine rework includes the repair, modification, and overhaul of aircraft engines installed in Navy aircraft;

Component rework accomplished the repair, modification, and overhaul of aeronautical components such as avionic, navigational, hydraulic and mechanical components, as well as aircraft armament systems and support equipment:

Modification installations improve the combat effectiveness of naval aircraft systems by incorporating operational and safety oriented modifications in existing aircraft; and

Aircraft support services involve support such as aircraft preservation and salvage operations which depot maintenance activities provide to the fleet.

Mr. President, the Navy's aircraft depot maintenance program is critical to fleet readiness. Increases in flyinghours for training commitments, improvement in the number of Navy aircraft certified as mission capable, or meeting new or expanded operational commitments all depend on adequate funding of the aircraft depot maintenance program. Anything less than adequate funding will result in the degradation of our Navy's fleet readiness. This is the last thing we need when our Navy has increased burdens imposed by our commitments in Southwest Asia and the Persian Gulf.

When the fiscal year 1983 budget was released, the administration made a big point of its commitment to improving depot maintenance. "Significant improvements in national readiness are expected," claimed the Defense Department, "as a result of the high priority given to fully funding \* \* \* the elimination of depot maintenance backlogs."

Unfortunately, Mr. President, as the Preparedness Subcommittee of the Armed Services Committee began reviewing the Navy's fiscal year 1983 operations and maintenance request, we found that in reality the aircraft depot maintenance backlog was a long way from being eliminated. Testifying last March before the Preparedness Subcommittee, Rear Adm. Richard Martini. director of the Navy's aviation depot level maintenance program, testified that the Navy's fiscal year 1983 aircraft depot maintenance program was underfunded by almost \$191 million.

In other words, there is a backlog of \$191 million in unfulfilled requirements. We have, in other words, a budget need to meet requirements of \$191 million in depot maintenance.

What Admiral Martini pointed out is that the improvement in various readiness indicators in fiscal year 1983 were based on the assumption that the Navy's aircraft depot maintenance requirement would be fully funded in fiscal year 1983.

Now, what this means, Mr. Presi-

dent--

The PRESIDING OFFICER (Mr. Brady). The time the Senator yielded to himself has expired.

Mr. LEVIN. I thank the Chair. How much time is remaining to the propo-

nents?

The PRESIDING OFFICER. Approximately 12 minutes.

Mr. LEVIN. I yield myself 2 additional minutes.

What this means, Mr. President, is that without additional funds in fiscal year 1983, trend lines in readiness indicators such as the number of airframes not overhauled at the end of their normal operating period, or the number of empty aircraft engine compartments due to a shortage of readyfor-issue engines, or even the percent of Navy aircraft termed "mission capable" will not show improvements as projected in the budget. Instead, in many cases, the trend lines will go the other way and the readiness improvement forecast in the fiscal year 1983 budget simply will not take place.

The Appropriations Committee recognized this problem. Since the budget was submitted," the committee says in its report, "the Navy has discovered that the aircraft repair, overhaul, and modification program exceeds the budgeted level. The announced objective of eliminating the depot maintenance backlog is no longer achievable." Unfortunately, the Appropriations Committee used this problem to create another. Since the Navy's aircraft depot maintenance program was underfunded. the Appropriations Committee reduced the Navy's flying hour program on the grounds, as the committee report states, that "An enhanced flying hour program would be difficult because more aircraft will require maintenance attention \* \* \* and will aggravate depot maintenance planning objectives." Mr. President, if that does not leave the Navy's aircraft depot maintenance and flying hour program in a no-win, catch-22, doublewhammy situation, I do not know what does.

The fiscal year 1983 Defense Authorization Act included a net increase of \$51 million for the Navy's aircraft depot maintenance program. This net increase was the result of the combination of an increase of \$101 million proposed by the Senate specifically to reduce the aircraft depot maintenance backlog, and a general reduction of \$50 million to the aircraft depot maintenance program proposed by the

House as an incentive to improve management.

Mr. President, the Senate Appropriations Committee bill has a net decrease of \$50 million from the budget request for a decreased loan authorization of \$101 million.

My amendment would add three-quarters—\$76 million—of the increase proposed in the fiscal year 1983 Defense Authorization Act to bring down the aircraft depot maintenance backlog in the Navy. This is not the full authorization level, nor the full amount necessary to hold the aircraft depot maintenance backlog in the Navy at zero during fiscal year 1983. But this increase should allow the Navy to hold down their aircraft depot maintenance backlog in fiscal year 1983 to more manageable levels.

With the progress we have made in reducing depot maintenance backlogs in the services in the last few years, it would be a mistake to allow these backlogs to begin building up again. We cannot lose sight of the fact that adequately funding operation and maintenance programs is an essential ingredient in our overall readiness and

deterrent capability.

The fiscal year 1983 defense budget bill now before us contains \$7 billion to purchase new aircraft for the Navy. It makes little sense to buy shiny new aircraft while we allow our present aircraft to fall apart on the runways and aircraft carriers of the fleet.

We will do more to rebuild and maintain this Nation's defenses by fixing what now exists than by buying new assets which will not be delivered

for years.

Two years ago, Congress raised a hue and cry when the newspapers began reporting about reduced combat readiness brought about by insufficient training hours, spare parts, and depot maintenance.

Congress told itself it would not let this happen again—that it would fund adequately the operation and maintenance accounts—those parts of the defense budget most directly connected to daily combat readiness.

We are reneging on this promise already, and we seem to have forgotten the lessons of only 2 short years ago.

We still must strike a better balance between the readiness and procurement parts of the defense budget. Procurement still robs readiness, with the end result very soon being "hollow" Armed Forces equipped with new weapons but unable to train, maintain, and operate them effectively.

My amendment is a small but needed step to help strike this better

balance. I urge its adoption.

Mr. President, several other troubling readiness reductions in the Senate Appropriations Committee's Defense appropriations bill should be restored. Unfortunately, we cannot restore them in this amendment because

only a modest amount of outlay savings are available in fiscal year 1983 from canceling the second aircraft carrier.

I want to highlight these reductions, however, because they demonstrate that this bill sacrifices essential combat readiness on the altar of glamorous weapons procurement.

There is a \$25 million reduction to the Navy's flyuing hour budget request. This reduction comes at a time when the Fiscal year 1983 budget request still does not provide Navy and Marine Corps pilots with sufficient flying hours to meet their own primary mission readiness goal of 88 percent. The flying hour reduction recommended by the Senate Approprations Committee compounds the problem in the fiscal year 1983 budget request where flying hours for the Navy's premier combat aircraft-A-6 adn A-7 attack planes, F-4 adn F-14 fighers, and P-3 antisubmarine warfare patrol aircraft-are lower than they were in fiscal year 1981.

Another readiness improvement sacrificed by the Senate Appropriations Committee was the \$203 million increase for Army real property maintenance included in the fiscal year 1983 Defense Authorization Act.

As originally submitted, the fiscal year 1983 budget made only a small \$45 million reduction in the Army's \$1.7 million real property maintenance backlog from fiscal year 1982 to fiscal year 1983. If we do not provide some increase in funding over the level contained in the Army's fiscal year 1983 request, we are not going to be able to continue the progress that we began in fiscal year 1981.

Mr. President, Army field commanders are unanimous in pointing out that nothing undermines the morale and readiness of Army units more than inadequate, antiquated, and even sometimes unsafe, living and working conditions. Unfortunately, although the House added \$100 million in this area, the Senate Appropriations Committee's recommendation did not include any increase above the budget for this readiness activity.

Finally, the Senate Appropriations Committee made a very serious and unwise reduction to the Army's request for 105mm tank training ammunition.

The Army's annual training requirement for this training round is 455,000 rounds. Due to budget constraints, however, the Army requested only \$154.8 million for 397,000 rounds. The \$54.5 million reduction to this request by the Senate Appropriations Committee would reduce the requested quantity to only 144,000 rounds, only 32 percent of the Army's annual training requirement. The Army's annual training with this round will have to be curtailed drastically if the reduction rec-

ommended by the Appropriations Committee is allowed to stand.

Our armored divisions are the backbone of the Army's combat capabilities and offensive power, Mr. President. We should not be degrading these capabilities, as this continuing resolution unfortunately does.

Mr. President, the Senate Appropriations Committee bill has a net decrease of \$50 million from the budget request. We need that money for depot maintenance, for readiness.

I urge that we finally make a decision in this Senate that we are not simply going to plow billions and billions of dollars into these huge new systems when our readiness is suffering and when we know these systems are going to drain readiness of billions of dollars more in the outyears.

This is an amendment which makes sense. I hope that the Senate will agree to it.

Mr. PROXMIRE. Will the Senator

Mr. LEVIN. If I may, I yield the remainder of our time to the control of the Senator from Colorado.

Mr. HART. I will yield shortly to the Senator from Wisconsin, who I know also has a concern about this issue.

Mr. President, this is at least the fifth year in which this Senator has tried to engage the attention of the Senate and Congress on the question of carriers. At the outset, I should like to stipulate certain things so we can eliminate, hopefully, from the debate the red herrings and focus the attention of the Senate on the real issue.

The first red herring and an argument that is often made that surrounds the carrier is that those who are trying to defer these two ships are anticarrier.

Speaking for myself and I think also for my cosponsor, we are not against aircraft carriers. As far as the Senator from Colorado is concerned, I think we need more, not less.

The issue is affordability and numbers, and that is central to this debate.

A second red herring that is often raised by spokesmen for the very large nuclear aircraft carrier types contained in this bill is that big carriers are clearly superior to small carriers.

Stipulated. A *Nimitz* class nuclearpowered aircraft carrier fully loaded and at sea is clearly more capable than a smaller carrier, no question about it. That is not the issue.

The issue, Mr. President, is numbers. We have a Navy today that is built around 13 ships. The policy of this administration as pursued in this resolution is to expand that Navy by the number 2, so the Navy that this President contemplates will be a Navy built not around 13 ships but around 15 ships.

That is not enough. It is not enough, and we will not be able to afford the number of ships that are enough so

long as we are putting the dollars we are into each of them individually.

What is the debate today? The debate, it seems to me, Mr. President, is about two things: First of all, relevance, and second, vulnerability.

Mr. President, the question that has to be asked about the nuclear aircraft carrier is not how big it is, how powerful it is, how glamorous it is, how capable it is. The issue and the only issue that matters from a military point of view is how does it relate to the main task of the U.S. Navy and the overall security strategy of this Nation?

That means, is it prepared to fight and defeat the principal threat to our Forces both at sea and on land? And that is the Soviets.

The answer to that is that it is prepared to do so very poorly. That is so primarily because of the type of navy the Soviets built.

The Soviet navy is, first, a submarine navy. It is, second, a land-based air navy, and only thirdly a surface navy. The Soviets have only about 30 major surface warships armed with antiship missiles. With the proliferation of our Harpoons and Tomahawks, we will soon have more than they do, if we do not already.

But big carriers loaded with attack aircraft and fighters are suited to fight surface ships best, land-based aircraft second, and submarines only a poor third, a very poor third.

We have testimony before the Senate Armed Services Committee from the Chief of Naval Operations and other major figures that the last thing you would want to do with a Nimitz class aircraft carrier and carrier battle group is to go into a high threat submarine environment, and that is exactly the kind of navy the Soviets have built.

The best ships for fighting submarines are other submarines, not aircraft carriers. The fact of the matter is that we are not building enough submarines in part because of the type of aircraft carriers we are building and the expense of each of them, as well as the attack submarine force.

The result of all of this, of focusing so much on the carriers in the Navy is the increasing irrelevance to its main task, and that is be prepared to combat what is the Russian naval threat. I think this potentially fatal error to this country's maritime forces was stated by Secretary Lehman's article in the Washington Post of the last day or so. He told us how we would not use the carrier to fight the Soviets. He said that we would not use them in a death run against the Soviet bastion around Romanuck. We would use them in a sea-controlled role, but he never said how we would use them. Why is that? Because there is very little use for this type carrier in a war with the Soviet Union. Yet, it is the threat of the Soviet Navy which Secretary Lehman and others wave when they want more money and want more of these carriers.

And what have we heard in recent weeks? Not the capability of this aircraft carrier against the Soviets but the capability of this aircraft carrier against a third world threat such as Argentina. Well, does anyone seriously think that the threat to this Nation's security is coming from Argentina? I do not think so.

I have listened for 8 years to my colleagues instruct me and others in the Nation about the Soviet threat. The Nimitz class nuclear aircraft carrier is not responding to the Soviet naval threat and that is the principal argument against it. We need more carriers, not fewer. We need carriers that will disperse our capability rather than concentrate it. And these two carriers concentrate our capability rather than disperse it.

The other main issue, Mr. President, is the vulnerability of this carrier. The Navy tells us that big carriers are less vulnerable than other surface warships.

That may be true, but does it mean anything? We built our surface fleet around a small number of big carriers. Does it matter that it is easier to sink a frigate than a carrier or is the real question, is the carrier so invulnerable that we can save half our whole fleet and depend on just a few of them? I think that is the question. In fact, Mr. President, all sorts of evidence suggests that the big carrier is extremely vulnerable. It is vulnerable, obviously, to tactical weapons, a vulnerability that has never really been addressed by the Navy.

One response to that threat is to build, as I have suggested, more carriers rather than fewer so that if they are attacked by this type of weapon more of them will survive.

Eventually antiship missiles may not sink the carrier unless they hit the right spot, but they can set the ship on fire. And we all know that carriers are extremely flammable. You do not have to sink a carrier to make it useless. You only have to put it out of commission by destroying the action of its catapult or its steering gear or setting it on fire. It has to withdraw from the conflict at that point.

The Navy seldom talks about its vulnerability to torpedoes, and yet it is extremely vulnerable in a whole variety of ways, including its steering mechanism, its propellers, and so on, to the torpedo threat.

Finally, Mr. President, there are all sorts of evidence which I would like to include in the Record as to how the tests and sea battle exercises that are carried out are tilted in favor of this carrier.

There is no suggestion on the part of the Navy that the exercises that are conducted are in any way fair.

In fact, those who have in the past served as umpires in our war games suggest that the equations that are used are tilted heavily against any fair assessment of the vulnerability of the carrier, and there is written testimony to that effect in recent articles and books.

I think that if the Senate looks very carefully at what it is doing we are in fact, as my colleague from Michigan suggests, robbing the very fundamental backbone of our military Forces to buy increasingly vulnerable and ineffective weapons systems. That is the issue before the Senate today. It is not the relative strength of this carrier against others. Of course, it is better. It is not whether the opponents of this carrier are anticarrier. We are not. It is not whether 15 carriers are better than 13. It is a question of whether 15 are better than 30.

That is the issue. The issue is the preparedness and the operation and maintenance of our forces, and the Senator from Michigan has extremely well identified that issue.

Mr. President, I resere the remainder of our time.

The PRESIDING OFFICER. Who yields time?

Mr. RUDMAN. Mr. President, I yield 2 minutes to the distinguished chairman of the armed Services Committee, the Senator from Texas.

the Senator from Texas.
Mr. TOWER. Mr. Presient, this seems like days of old. We have had this carrier battle so often.

The point man for the Armed Services Committee will be Senator COHEN.

EPA Comment: He and Senator HART EPA Comment: are regular antagonists on the carrier issue, and I must say they both perform their function very well.

But I just want to say that the suggestion that the carriers cannot operate in a high-density threat environment is bunk. I have seen carriers operate in a high density threat environment. I have seen carriers on fire and still launching and recovering missions. I have seen them damaged severely and still functioning.

The modern carrier does carry within it the means of its own protection. But I think it is wrong to ridicule the role of the carrier outside of the major war because, in virtually every major crisis that has occurred a long way from our shores, we have used the carrier to respond.

It is indeed a precision instrument of diplomacy and helps us keep the peace, and for that reason alone if for no other it earns its keep.

Mr. RUDMAN. Mr. President, I yield

myself 5 minutes.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. RUDMAN. Mr. President, I wish to just very briefly respond to a number of the figures cited by my friend, the Senator from Michigan, because when we are dealing here and talking about billions and billions of dollars it tends to boggle one's mind.

It would probably be more useful to see what we are talking about the next several years and also to see whether the Navy had any rationale in proposing to Congress we acquire two CBN's rather than one or follow the advice of the Senator from Colorado to purchase more of the smaller carriers and increase, in his words, their vulnerability.

Let me point out that, first, the GAO has evaluated, and we seem to have little argument, that purchasing of two CBN's will, in fact, have a net savings of about three-quarters of a billion dollars through a procurement plan that is now under consideration contained in the authorization and the appropriations bill.

In addition, it is interesting that the total life cycle cost for two nuclear carriers is roughly about \$7.65 billion over their entire life cycle. That is about \$60 million more expensive than the corresponding costs for two conventionally powered carriers.

Finally, in terms of numbers, it might be pointed out that the outlays in this appropriation are about \$200 million over the next fiscal year, working up gradually to about \$100 billion annually in fiscal years 1984 and 1985.

So when we are talking about these large numbers, we tend to be talking about the acquisition costs totally. It is important to probably study this across the entire procurement life of the ships.

The Senator from Michigan points out that the Navy aircraft depot maintenance program has problems. I expect he is quite correct. He has heard that before in his committee. We have heard it before in ours.

This amendment would add funds for Navy aircraft rework and depot maintenance.

The authorization, in fact, deleted \$50 million from the budget, and the Appropriations Committee, in fact, conformed with that.

Let me point out that the committee recommends that the fiscal year 1983 flying hours hold to the fiscal year 1982 rate in order to increase the consumption of spares and repair parts. We recommend that the savings accrued from holding flying hours to the fiscal year 1982 rate should be applied to the aircraft maintenance program.

So I think that the committee, both Authorizing and Appropriations Committee, has attempted to address the concerns of the Senator from Michigan.

Let me say something to the Senator from Colorado. If he wants to look at naval history—and we can go back to the time of Nelson through today—there has never been a force deployed at sea that was not vulnerable. There is no navy in the world, no ship, no battle group that if the right application of force is applied against it will not be sunk.

We can agree on that.

The question then is what the force projection is of the 15-carrier battle group proposed by the Department of Defense.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. RUDMAN. I yield myself an additional 1 minute.

The Department of Defense has never contended that the carriers are invulnerable under all circumstances. But it seems to me that the Senator from Colorado kind of puts up a strawman and knocks him down. The fact is that studies through World War II and through exercises since then indicate that with antisubmarine warfare at the level and sophistication that it now exists, it makes the screening of these carriers a practical proposition, not invulnerable, but practical and for the protection of force as the Navy plans it for these 15 groups around the world. It is reasonable to assume that they will have a survival rate better than their counterparts of World War

Let me point out to the Senator from Colorado that the concentration of Japanese naval submarines in the area of Hawaii, through the Philippines, the Japanese coast, and the inland sea was probably three times what any Soviet deployment of submarines will do. We did not have ASW of the class we have today. And only one carrier was sunk after 1942.

Let me point out that the people of the Navy probably know what they are doing. That is their job. We pay them for that. It seems to me we should give them what they need to protect the force around the world.

The PRESIDING OFFICER. The time yielded by the Senator has expired.

Mr. RUDMAN. Mr. President, I now yield 15 minutes to my friend from Maine.

Mr. COHEN. Mr. President, I shall not take 5 minutes.

I think the Senator adequately covered the points which I would have made in rebuttal to the amendment offered by the Senator from Michigan.

Let me just address myself to the point made by the Senator from Michigan, who said that this is a shopping list of big ticket items that we have to put an end to. The Senator from Michigan would like to allocate whatever money would be saved from cutting the aircraft carriers out and put that money into O&M. Let me move on to the Senator from Colorado. He would like to take the savings

from the deletion of one aircraft carrier and use that to produce two aircraft carriers, smaller, more vulnerable in size or as an alternative to take the money and build more submarines.

So we seem to have covered all the bases. The Senator from Michigan is going to take the money and spend it on O&M. The Senator from Colorado is going to take the money and spend it on two ships instead of one or, as an alternative, start building more submarines.

We cannot have it both ways or all ways. It seems to me that these are the arguments which are being presented by both Senators who are in support of this amendment.

The fact of the matter is, as the Senator from New Hampshire has pointed out, the large ships do have greater survivability. They also have greater force projection capability. We have been over this argument time and time again; that a smaller ship which costs less has less capability, less power projection capability.

And let me digress here for a moment. Many of the aircraft which would be on board are planes that the Senator from Colorado has fought for over the years, AV-8B Harriers. Ironically, the AV-8B Harrier is one of the items that Newsweek magazine recommends we delete because we do not need it.

It seems to me that you could go down the list and say that we do not need this item, that we do not need the F-15 as it is too hot, or that we do not need the AV-8B Harrier. We can use land bases. We do not need the big decks. We can get two small ones, or submarines.

You can, consequently, rationalize away the ability you have to project power.

This notion, however, that we are going to disperse the assets, that we are going to build 30 aircraft carriers, instead of 15, or 2 for 1, seems to me ignores another argument.

The other argument is that you are going to have more assets to protect; that is, more smaller carriers. You are not going to send them out to a low-threat, medium-threat, or high-threat area without protection. So that means a carrier battlegroup all of its own, or that you are going to put two smaller carriers together. In that case, I do not see how we achieve any greater survivability, or how we complicate the Soviet submarine strategies, by having two ships together, instead of one large one, or by having greater escorts around it.

So without belaboring the point, it seems to me that we have a successful Navy today. We have been in the position of projecting power. We do need power projection. We do not have access to bases overseas as much as we would like.

We are now talking about doing some building in Egypt, and that is sort of tentative because it depends on good relations with Egypt. We are looking at relations with Oman and Bahrain for our land deployment force. But we cannot put troops onshore. We have to maintain a presence and the best way to maintain that presence is with the aircraft carrier, and the power it represents, and the power it is capable of projecting.

So for all of these reasons, I think we ought to reject the amendment which has been offered and debated several times before; it has been defeated several times before, and we ought to rededicate ourselves to building a successful Navy.

Mr. RUDMAN. Mr. President, I yield 4 minutes to the distinguished Senator from Mississippi.

Mr. STENNIS. Mr. President, I will be quite brief. Let me refer to the Cuban missile crisis. Soon thereafter this Russian seagoing navy was born and was started to be built, steadily climbing in that direction ever since.

Another change: If we had not already had very fine, superior naval forces in the Middle East, in that area over there at the time of the oil crisis, 1972, 1973, perhaps already we would have been a highly different nation living in a highly different world.

It is one of the miracles of history to me that we already had that fine naval power there that was able to move in and have made most of the difference since that time.

Those oil lanes, sealanes, continue to be open and be protected, and various shooting wars they have had over there have been directly affected by just the presence of our carriers.

They have not fired a single shot in anger there. North Yemen, South Yemen, all those countries in there, as soon as our carriers got there they quieted down. There was a big, big difference, I think, since those carriers there of 1960's, the late 1960's, and early 1970's were there.

Now, I have been strong for carriers because of those reasons. But last year when they proposed two carriers I was skeptical and doubtful, and thought perhaps it ought to be one. But they proved their case very strongly; \$750 million-plus would be the savings. We turned that over to the General Accounting Office, and it was confirmed in every major particular. So we are not buying chickenfeed here, we are getting the hard steel and we are making the savings in those dollars.

Now, further, what is going to be the situation at least for a few years? This is going to be the big power there, the floating power, the changing power, the switching from area to area, carriers served by these cruisers and destroyers taking, as we all remember, the planes, the missiles, offense, de-

fense, weaponry, all the way through. That is the big thing in the world.

Now, the Soviets are still building, though in the direction of the seagoing power of their own, a seagoing navy, and this will make a margin of difference that seems to me that we must have.

I have favored some of the smaller carriers, too. I think we have got to have them in many places. I just did not go all out to try to put great forces everywhere, with tremendous bases of all kinds.

Now the way there it has been proven over and over is the carriers and the carrier force.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STENNIS. So we will have what is needed here for many years.

Mr. RUDMAN. Mr. President, I yield 2 minutes to the Senator from Alabama.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. DENTON. I thank the Senator. The case already made by the excellent presentations of the Senators from Texas, Mississippi, Maine, and New Hampshire requires very little elaboration. I would like to make some observations that, perhaps, complement theirs.

As the chairman of the Armed Services Committee indicated, this body has repeatedly reaffirmed its support for the second CVN as an essential part of our rebuilt Navy, and that speaks for itself.

It seems almost impossible that repeatedly the Senator from Colorado and the Senator from Michigan flog us around this pointless track. I am sure they are sincere, but it does seem almost monotonous.

The British Navy and the Soviet Navy recognize the aircraft carrier as the most effective, most efficient, most flexible, and most useful component of modern naval forces. American carriers happen to be the best in the world, and they will allow us to project power to protect our interests, especially if we build them in the manner that we have projected.

The second CVN is not only an essential part of our program to build a navy that can once again insure the security of the seas and assure the security of our lifelines, but it is also a symbol that this Nation has faced up to a sense of responsibility and reality in the case of economic survival. I believe that is a bipartisan facing up, and we have also faced up to reality and a sense of responsibility with respect to survival in the security sense.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. RUDMAN. Mr. President, how much time do we have remaining?

The PRESIDING OFFICER. About 3½ minutes.

1½ minutes to the distinguished Senator from Virginia.

Mr. WARNER. Mr. President, I thank the distinguished manager of the bill.

In the case of the U.S. carrier, it is driven by two factors: One, the threat there indicates no diminution. In that respect, President Carter, to his everlasting credit, extended the commitment of this Nation to the Persian Gulf, the Arabian Sea, and the Indian Ocean, which required augmentation of our carrier presence there.

The second thing, which has not been mentioned here, is the management of personnel in the U.S. Navy. During the period of the Vietnam war the greatest turbulence experienced in personnel management was the extension of carrier deployments. In some instances it was so severe it resulted in riots aboard the ships when the men were contained aboard those ships for periods of 6, 7, and 8 months.

So I encourage Members of the Senate to support the judgment of the Department of Defense that it is time we do go ahead at a bargain price, I might say, and buy two additional car-

Mr. RUDMAN. Mr. President, I believe we have about 2 minutes, 21/2 minutes remaining, and if I might, I would like to yield 2 minutes to the Senator from Ohio.

Mr. GLENN. I thank the floor manager of the bill.

I would like to comment once again on the large carrier versus the small carrier difference of opinion we have here. The case for the carrier aircraft being at sea I think has been adequately made.

What I would like to address very briefly in the time we have is making the best use of our money. What is most cost effective? I have exact figures on the way over to the floor, but the figures I recall from our last debate were with the large carrier; you still have to have that whole carrier task force available. With the small carrier you still have to have that whole carrier task force available. But with the big carrier you get 98 airplanes, and the only reason you have a task force at sea is to project aircraft power out away from that fleet.

So when you have 98 aircraft versus 38 aircraft with the small carrier it just makes common cost-effective sense that we use the big carrier because it comes out for aircraft out there on a ship ready to project power at sea. The figure, as I recall, for the large carrier was around \$146 million per aircraft, including the cost of the whole task force.

With a small carrier it goes up to \$247 million for aircraft at sea ready to operate, and with an augmented task force which probably would be necessary to give better air protection

Mr. RUDMAN. Mr. President, I yield for the small carrier, and it goes up to about \$289 million.

So, Mr. President, just from a plain cost-effectiveness standpoint the large carrier makes much better sense.

I thank the floor manager for yielding time.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. HART. Mr. President, I yield myself 30 seconds. Various arguments have been made in opposition to this amendment. Some can be boiled down to the presence and use of carriers as diplomatic tools; the presence of the United States around the world, and so on. I think it is extremely important for the American taxpayers to understand that even if these 2 carriers are bought at the cost of over \$30 billion, perhaps as much as \$40 billion, that will add 2 more ships for presence at sea, and those 15 ships are not going to be present at sea at any one time. It is going to be more like six or seven, and we are not fulfilling our role in the world because we have too few carriers.

Mr. PROXMIRE. Mr. President, I rise to support the motion by Senators LEVIN and HART to delete one Nimitzclass nuclear aircraft carrier from the defense portion of the continuing reso-

Mr. President, the nuclear aircraft carrier is a magnificent thing to behold. It has a full load displacement of 91,700 tons. It is 1,040 feet long or more than three football fields; 134 feet wide, with two nuclear reactors, a speed in excess of 30 knots, an unlimited cruising range curtailed only by the 13-year core life of the reactor and a crew of 6,300 men-a small city by any standards.

Its power is awesome. A typical Navy carrier air wing operates with about 89 aircraft including 24 F-14 or F-4 fighters, 24 A-7E light attack bombers, 10 medium attack A-6E's, 10 fixed wing ASW aircraft called the S-3A; 6 rotary wing SH-3 ASW helicopters, 4 EA-6B electronic warfare aircraft; 4 early warning E-2's: 4 tankers (KA-6) and 3 reconnaissance aircraft either FA-5 or FR-8's. The firepower carried by these aircraft probably exceeds that of most of the world's developing countries.

But is all this firepower the most cost-effective and least vulnerable system we can produce? Unfortunately the answer is a definite no. And what does the continuing procurement of nuclear carriers mean for increasing the number of vessels in our surface fleet. And what of the mission of the carrier in this world of nuclear weapons and accurate stand-off cruise missiles. These are the questions that need to be addressed.

First, the issue of mission. The mission of the modern carrier is caught in a paralyzing contradiction. It is outfitted for an intense battlefield environment but because of geography and concentration of forces, it cannot effectively carry out its mission close to overwhelming enemy forces.

In congressional testimony the Navy has indicated that our carriers would not be able to operate against Soviet targets in Soviet home waters until our antisubmarine warfare aircraft and ships had reduced the Soviet submarine capability to a very low level. The naval force planning study confirmed that our carriers will venture into high-risk areas only at great peril and that Soviet home waters cannot be cleared for carrier activity for a considerable period of time. What this means in effect is that a line can be drawn around the periphery of the U.S.S.R. measuring several hundred miles. Inside this barrier, our carriers fear to steam lest they be put out of action immediately.

Suppose the carrier were faced with the threat of 100-land based aircraft with torpedoes, bombs, and missiles? The answer from Admiral Hayward is simple: "You wouldn't go into an area which had the potential described without assembling the right amount of force to counter that threat.'

So much for its mission of attacking the periphery of the Soviet Union or any of its nearby allies.

Now, how about vulnerability? A modern carrier task force faces many difficult threats. Start with the Backfire bomber in their Naval Air Force in great numbers. Add the AS-6 missile with an operational range of 150 miles on board the Backfire. Then consider the Styx missile of four types of Soviet vessels with a 25 nm range; the Sepal and Shaddock on five types with a range of 250 nautical miles; the extremely dangerous SS-N-7 on Charlie class submarines with a range of 30 miles; the Siren on the Nanuchka with a 60 mile range; and the SS-N-12 on the Kiev carrier with a 300 mile range. Soviet cruise missiles also can be launched from aircraft notably the Badger with the long range AS-2 Kipper; the Bear with the long range AS-3 Kangaroo; the Blinder and Backfire with the modern AS-4 Kitchen with a 250- to 300-mile range: the Badger with the AS-5 Kelt short range cruise missile and the Badger also with the AS-6 long range cruise missile. Quite a formidable array of cruise missiles for an aircraft carrier to ward off.

Specifically, how vulnerable is the large carrier to the cruise missile? Well, this issue has been studied and answers are available. Unfortunately, they are classified for the most part. Several years ago a Member of the House quoted the Sea-Based Air Platform Study conducted by the Center for Naval Analysis to the effect that two to five cruise missile hits would put the carrier out of action-meaning "unable to launch or recover aircraft

for at least 1 hour after the attack. The ship is inoperable at least for a short time and may also be inoperable for a much longer time or indefinite-ly." Considering the hundreds of cruise missile launchers available to the U.S.S.R. and taking into account the reload factor of these units, it is likely that any carrier would sustain multiple hits during heavy fighting. A carrier with multiple hits probably would have to retire. A carrier hit by the new Soviet torpedo in the vulnerable magazine probably would blow up. A carrier hit with several torpedoes in other less vulnerable sectors could have a series of problems ranging from propulsion reductions to secondary fires and ammunition explosions.

Up to this point I have dealt exclusively with conventional cruise missile and torpedo warheads. Obviously the carrier would be extremely vulnerable to a nuclear warhead. And the Soviets do have nuclear warheads on some of their cruise missiles, according to official testimony.

#### NO PLACE TO HIDE

You can run but you cannot hide is a favorite line from the boxing community. And so it is in the modern world of ocean surveillance. The most striking lapse of logic occurs when carrier advocates continually point out that their vessel is maneuverable, fast, evasive-a phantom of the seas. So it was with the German pocket battleships that raided the Atlantic. Today technology would provide a few surprises for those raiders just as British and radar—and a judicious American amount of code breaking-turned the battle of the Atlantic into a Western victory.

We all know the fast pace of scientific progress. The U.S.S.R. has a system of radar satellites, for example, which can identify and track our aircraft carriers 24 hours a day. Our carriers cannot hide from these satellites and other technical collection systems available to the Soviets such as ground-based radars, intelligence trawlers, and such.

So they know where these ships are. And they have the weapons to destroy

## COSTS

What about the costs of the carrier and its escorts?

The aircraft carrier may be the glamour girl of the fleet but if we continue committing all our resources to this policy, there will be no fleet to treign over, The reason is simple economics. We are pricing ourselves out of a Navy by building these new vulnerable aircraft carrier task forces. Instead we should be building more, smaller, less vulnerable vessels that can be at more than one place at one time.

Congress approved the nuclear carrier U.S.S. Carl Vinson (CVN-70) in fiscal year 1974. The cost of that

vessel is now \$1.36 billion—\$1.32 billion for the ship and \$41.2 million for post delivery additions.

Another nuclear carrier the CVN-71 was approved by the Congress in fiscal year 1980. It will cost \$2.6 billion—\$2.54 billion for the ship and \$58 million for post delivery charges. And the CVN-72, will cost \$3.5 billion when it is fully funded.

Thus the cost of typical aircraft carrier has gone from \$1.36 billion to \$3.5 billion since fiscal year 1974. But that is only the beginning of the costs associated with a carrier task force.

The carrier must have aircraft. Usually there will be two air wings over the life of the carrier. At current prices and given the current mix of carrier aircraft, two wings for a new carrier will cost \$9.3 billion in constant fiscal year 1982 dollars. This probably will increase as new, more sophisticated aircraft are introduced to the fleet in future years.

Thus the total to purchase the new carrier and its aircraft then will be \$12.6 billion.

Both the carrier and its aircraft must be operated, and that takes money. The 20-year operating costs of the CVN-72 will be \$2.4 billion in fiscal year 1982 constant dollars. And the 20-year operating costs of the air wing will be \$4.1 billion in constant 1982 dollars. The total operating costs for the carrier and air wing, therefore, are \$6.5 billion and this gives a total procurement and operating cost of this single vessel of \$19.1 billion.

Now the CVN-72 will not steam the oceans by itself. That would be far too risky for such a large investment. It needs escorts to provide air defense and antisubmarine warfare capabilities

The typical number of escorts expected to be associated with the CVN-72 in a carrier battle group will be two Aegis class CGN-42 cruisers and four DDGX or DD-963 class destroyers. In addition two or three attack submarines will support the carrier battle group under certain conditions.

At the present time a CGN-42 Aegis cruiser costs \$1.56 billion or \$3.1 billion for the two required for the battle group. A DD-963 destroyer costs \$520 million or \$2.1 billion for the four necessary for protecting the carrier. The 20-year operating costs for these escorts is \$2.84 billion and an additional \$460 million will be required for the LAMPS III helicopters assigned to the escorts. Thus the cost of purchasing and running the escorts will be \$7.5 billion in fiscal year 1982 constant dollars

Manpower costs also must be taken into consideration. Using average personnel costs for officers and enlisted members of \$34,181 and \$14,917 respectively and assuming there are 3,216 sailors in the carriers's crew plus 2,356 for the air wing; 1,026 on the two

cruisers, 868 for the four destroyers and 80 for eight LAMPS III helicopters, the manpower costs amount to \$125 million a year or \$2.5 billion over 20 years.

Adding everything together, procurement, operation, and manpower costs of the carrier, the aircraft, and the escorts gives a grand total of \$30.1 billion.

And what do we get? A large floating target for advanced Soviet missiles. As former Senator and Secretary of the Air Force Stuart Symington used to say "You can't miss—knocking out a carrier is like hitting a bull in the butt with a bass fiddle."

Given radar satellites and longrange, stand-off cruise missiles launched from the air, the ground, and from submarines, the \$19 billion carrier and the \$30 billion fleet is an expensive luxury with little military utility.

If we want a 600-ship Navy, we have to build more ships of smaller size and maneuverability. Concentrating on carrier task forces will consume funds desperately needed for a larger Navy.

At the appropriate place in the bill insert the following:

"Notwithstanding any other provision of this joint resolution, no funds made available by this Act shall be used to procure or construct more than one CVN Nimitz class nuclear aircraft carrier."

Mr. LEVIN. Mr. President, the most ironic argument is that we save three-quarters of a billion dollars by buying two; by the same token, we would save \$1 billion if we bought three; \$1.5 billion if we bought four; \$2 billion if we bought 5. We could balance the budget if we bought 10 under this analysis. This is a quantity discount. We cannot afford it. Let us get one in the out-years and put some money into operation and maintenance and readiness which we are draining dry by these kinds of immense investments in two carriers in 1 year.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. RUDMAN. How much time remains to this side?

The PRESIDING OFFICER.
Twenty seconds.

Mr. RUDMAN. Let me say to my friend from Michigan you know we could carry his conclusions out in a number of decimal points. We have decided as a matter of policy in the last several Congresses that we need 15. Not 19, not 27, but 15 of these groups, and that is where the figure comes from, of course.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. RUDMAN. Mr. President, I move that the amendment offered by the Senator from Michigan and the Senator from Colorado be tabled, and I ask for the yeas and nays.

there a sufficient second? These is a sufficient second.

The yeas and nays were ordered.
The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Hampshire to lay on the table the amendment of the Senator from Colorado. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER) and the Senator from Maryland (Mr. Mathias) are necessarily absent.

The PRESIDING OFFICER (Mr. QUAYLE). Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 67, nays 31, as follows:

# [Rollcall Vote No. 440 Leg.]

## YEAS-67

Abdnor East Murkowski Garn Nickles Andrews Armstrong Glenn Nunn Packwood Baker Grassley Bentsen Hatch Percy Hawkins (Mrs.) Pressler Boren Boschwitz Hayakawa Quayle Brady Heflin Roth Byrd, Heinz Rudman Harry F., Jr. Byrd, Robert C. Helms Sasser Schmitt Hollings Cannon Huddleston Simpson Chiles Humphrey Specter Inouye Jackson Cochran Stennis Cohen Stevens Jepsen Johnston D'Amato Symms Thurmond Danforth DeConcini Kasten Tower Wallop Denton Laxalt Long Dixon Dole Lugar Weicker Mattingly Domenici Zorinsky Durenberger Mitchell

Gorton Bancus Metzenbaum Biden Hart Moynihan Hatfield Bradley Pell Bumpers Kassebaum Proxmire Burdick (Mrs.) Pryor Randolph Kennedy Chafee Leahy Cranston Riegle Dodd Levin Sarbanes Eagleton Matsunaga Exon McClure Tsongas Melcher

## NOT VOTING-2

Goldwater Mathias

So the motion to lay on the table UP amendment No. 1516 was agreed to.

Mr. STENNIS. I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

The PRESIDING OFFICER (Mr. QUAYLE). The majority leader is recognized.

Mr. BAKER. Mr. President, it is now 5:20 in the evening. The manager of the bill on our side indicates that there are a number of amendments that he is aware of that still must be dealt with, but there is another deadline, as a practical matter, that we have to deal with. That is, the present

The PRESIDING OFFICER. Is resolution expires at midnight today. The bill still has to go to conference, it has to go to the President, and we are already in trouble. I think it is time, Mr. President, to explore the possibility of a unanimous-consent agreement for a time certain for passage.

Mr. President. I do not know how many amendments there are and I gather from conversations that I have had with some Senators that we are going to have to try to ascertain that. Let me say what I would like to do, then I shall propound a unanimousconsent request.

Mr. President, may we have order?

The PRESIDING OFFICER. Those Senators in the back of the Chamber. please leave. Staff members will please cease conversation.

The majority leader.

Mr. BAKER. Mr. President, let me say what I would like to do and what I would like to urge the Senate to do. First, I would like to see us establish a time certain for passage tonight. The hour I have in mind is 9 o'clock, but I will say that is flexible.

Next, Mr. President, I would like to see us identify the amendments that must be dealt with and negotiate item by item as short a time agreement as we possibly can. I would be bold enough to suggest that except in extraordinary circumstances, we ought to keep those time eliminations down to 20 minutes or less.

Mr. President, I also hope the Senate will consider unanimous consent that no second degree amend-

ments will be in order.

Mr. President, that is the only way I know of to get this bill passed and get it to conference tomorrow. I am told by the distinguished chairman of the Committee on Appropriations that already it is probably too late, as a practical matter, to do the paperwork that will be necessary to meet the House in conference tonight. So it is already going to run over the midnight tonight deadline and run into Saturday. What we need to do, in my view, is avoid being here on Monday or Tuesday. So I think this is an urgent next step that must be taken.

I would like to ask the distinguished manager of the bill on this side, the chairman of the Committee on Appropriations, if he would make a list of amendments that we know of on this side of the aisle. I urge Senators to forgo any amendment that they do not think is absolutely necessary.

Mr. STEVENS. This is the whole bill, now

Mr. BAKER. Mr. President, I shall ask the chairman now to do that and try to establish what amendments are in order and we shall attempt to negotiate the briefest possible time limitation. I ask the minority leader if he might be inclined to do so on his side?

Mr. ROBERT C. BYRD. Would the Senator from Oregon care to go first?

Mr. BAKER. The minority leader has a list already. Will the Senator from Oregon permit me to yield to him?

Mr. HATFIELD. I will, Mr. President

Mr. ROBERT C. BYRD. Mr. President, we have a list, as far as we know, of amendments on this side of the aisle and they number as far as we know, 13.

May I say to the distinguished majority leader that I met with my colleagues on this side of the aisle today, and we are prepared to give the majority leader a time agreement but the details will have to be worked out.

It was my suggestion to my colleagues that they be on the floor so that they could speak for themselves and be prepared to protect themselves in any way they wished.

I think an agreement can be worked out so far as this side of the aisle is concerned. Senator Long and others would like to know the identity of the amendments, and I think we all would like to know that. There are certain Senators who want to be protected against certain amendments coming on as amendments in the second degree or as modifications of amendments in the first degree.

I encourage the majority leader to proceed in the direction he is going. I think it can be done. Now, whether we can finish by midnight tonight or 10 o'clock remains to be seen, but I will endeavor to do everything I can on this side of the aisle, and I think he should, if I may be so presumptious to

I will call out the names of the Members who have amendments on this side, and they can speak for themselves as to time, the majority leader will be fully aware of what we have on our side.

Mr. SARBANES. Will the majority leader yield for a question?

Mr. BAKER. Yes.

Mr. SARBANES. If we reach a time agreement for a vote certain on this bill-for the sake of discussion, let us say 9 o'clock this evening, 10 o'clock, whatever it is-what then is the majority leader's plan with respect to the activities of the Senate?

Mr. BAKER. Mr. President, if we reach conclusion of this measure tonight, the highway bill will recur as the pending business before the Senate. It may be that some action would be contemplated this evening on that bill, but I do not anticipate that the Senate will be asked to remain much longer than the time required to take care of a possible procedural matter in connection with the highway bill.

In any event, I do not intend to ask the Senate to remain in all night tonight, as we did last night.

Mr. SARBANES. So the majority leader would expect within a fairly short period after the final vote on this bill for the Senate to go out for the evening and over until sometime tomorrow morning?

Mr. BAKER. Yes, I would hope so.

Mr. ROBERT C. BYRD. Mr. President, pursuing that line of questioning, would it be the majority leader's intention to be on the highway/gas bill tomorrow?

Mr. BAKER. Yes, Mr. President, it would be. My fear is that we are still going to be on this bill tomorrow. But if we could finish this bill, it would be my intention to be on the highway bill tomorrow.

Mr. HATFIELD. Will the leader yield for a question?

Mr. BAKER. Yes.

Mr. HATFIELD. Will the leader expect to make a window somewhere if we are in session tomorrow on other than this measure for the D.C. conference report, which is expected momentarily from the House, and the Interior appropriation conference report?

Mr. BAKER. Yes. Mr. President, I would hope that we could arrange that without any difficulty. I think most Senators would agree that whatever conference report, especially appropriations conference reports, that we can reach we ought to take care of. That would be my wish.

Mr. LONG. Will the Senator yield?

Mr. BAKER. Yes, I yield.

Mr. LONG. Let me express the concern of the Senator from Louisiana. I want to cooperate with the majority leader.

Mr. President, it is the fear of this Senator that there may be legislation attached to this bill, perhaps bad legislation, which is beyond the jurisdiction of the Appropriations Committee. It may be approved even over the objection of the chairman of the committee and some of his members that does not belong on the bill, that is not relevant to it, that it should not be permitted to be added to the bill.

I have seen this Senate repeatedly overrule the Chair on a point of order when the point of order was clearly correct that the amendment was not germane or the amendment amounted to legislation on an appropriations bill.

The President of the United States should not be forced to sign into law legislation that he thinks is bad legislation. It ought to go to him on something that he is privileged to veto without bringing the whole Government to a halt. And if there is nobody on the other side of the aisle who is going to protect the President of the United States, I guess it is my duty to protect the President of the United States, because to me it is outrageous for us to try to send legislation to the President when he would not have the privilege of vetoing it, and when it does not belong on this bill, is not rele-

vant to it, and should be resisted by those who are on the appropriate committees.

I want to know what these amendments are when they are offered.

Mr. BAKER. I am convinced, but I do not know what the Senator has in mind.

Mr. LONG. I would just like to know what the amendments are before I will agree to a time limit.

Mr. BAKER. I agree with the Senator in that respect. Could I try to implement that. That is a reasonable request, I think a prudent one on both sides of the aisle. Could I ask the minority leader if he would share with us his list of amendments that we know of at this time?

Mr. ROBERT C. BYRD. Yes. An amendment by Mr. Pryor involving the Maverick missile, one amendment by Mr. Cannon—

Mr. BAKER. Mr. President, could the Senator give us any idea of a time limitation on those as we go along?

Mr. ROBERT C. BYRD. Mr. PRYOR is here.

Mr. PRYOR. Mr. President, I would prefer 15 minutes on a side. I would be glad to have 10 on a side, 20 minutes altogether.

Mr. BAKER. Ten minutes on a side,

20 minutes equally divided.

Mr. ROBERT C. BYRD. Does the Senator wish to grab that while he can get it? [Laughter.]

Mr. BAKER. I ask unanimous consent, Mr. President—1Mr. DAN-FORTH. Reserving the right to object—

Mr. STEVENS. Reserving the right to object—

The PRESIDING OFFICER. Is there objection?

Mr. DANFORTH. Reserving the right to object—

The PRESIDING OFFICER. Reserving the right to object, the Senator from Missouri.

Mr. DANFORTH. The problem with taking these up one at a time is that there are 13 amendments on the other side. Twenty minutes of debate per amendment, 15 minutes to a vote, that is about 7 hours. So I am concerned that before we get to this side we will be well after 9 o'clock.

Mr. BAKER. Mr. President, we are sequencing the amendments at this time, and I would make that clear. The request, though, was for a time agreement as stated to apply when this amendment comes up. Maybe it will not come up at all.

Mr. STEVENS. Reserving the right to object, Mr. President—

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. I will object unless there is an agreement that any amendment that deals with the defense portion will be submitted to us for examination to make certain it covers only one subject, because of the problem we have of trying to keep track of these items.

Mr. BUMPERS. Will the Senator use his microphone, please?

Mr. STEVENS. I said I would object unless we are certain it covers only one subject and unless there will be no amendments in the second degree, because we are finding that some of these amendments actually cover two different areas and they are just impossible to handle in that kind of time to convince the Senate of the impact of the actions proposed.

Mr. BAKER. Mr. President, let me make a suggestion. I do not think we are going to get very far this way. We are going to take up too much time wondering about each other's motives and sequence and time.

Let me suggest, if I may, to my friend, the minority leader, that we ask our staff or the chairman of the Appropriations Committee and the ranking member and others to compile this list and let us look at it. We will submit it to Members on both sides and we will see if we can put together a unanimous-consent agreement.

I do not think the Senate is ready for it at this point.

Mr. TOWER. In the meantime, I am prepared to take up an amendment that Senator Heinz and I have an interest in, and we are prepared to agree to 20 minutes on a side.

Mr. STEVENS. We are prepared to accept it.

Mr. BAKER. Mr. President, that is not my domain.

Let me say to the minority leader I appreciate his efforts. We will get up a similar list and with his kind concurrence we will go over that list together and see where we go. I will try to make a request again in 30 minutes.

Mr. ROBERT C. BYRD. May I say to the distinguished majority leader that I asked each Member on my side of the aisle to be present following the vote, be prepared to respond to the inquires of the majority leader, and we are ready. The majority leader was not trying to sequence amendments. He was not trying to place all amendments on this side of the aisle over amendments over there.

It would seem to me that he could get an agreement with Members on my side of the aisle and his as to amendments on my side of the aisle, with the understanding there will be no second-degree amendments and with the understanding there will be no modifications of those amendments. He would be way ahead as far as the Members on my side of the aisle and we are prepared to do that.

Mr. BAKER. I understand that, and I am grateful for it. I think there is probably more to be gained by assembling a similar list on this side before we proceed. I would say to my friend, the minority leader, then, that I think

it would not be productive to go for-

ward at this moment.
Mr. ROBERT C. BYRD. Second, while the subject matter has come up with respect to the highway tax bill, I think Members ought to know where we are going on this. The distinguished majority leader has indicated that if and when we finish action on the continuing resolution-I guess I am not misstating him; that would automatically come back before the Senate anyhow-that he would pursue action on that measure. Am I correct in saying that?

Mr. BAKER. Yes; Mr. President, I have not fully decided what I will do on that, but I wish to put the Senate on notice of that possibility; that is to say, it is not my present plan simply to let the highway bill recur this evening, assuming we finish and go out. There may very well be a procedural motion of some sort in connection with that

Mr. ROBERT C. BYRD. I should like to say to the distinguished majority leader that-well, perhaps I had better wait until such time as he prefers to discuss that matter. We will then be prepared to discuss it on this side. But I think that insofar as voting cloture on the matter is concerned, a goodly number of our Members on our side of the aisle have discussed that and are prepared to vote for cloture on the motion to deal with the highway

Mr. BAKER. Mr. President, I do not think the minority leader would be taken by surprise-

Mr. ROBERT C. BYRD. And we have discussed this.

Mr. BAKER. And we have discussed this before, and I think you would be fully aware of any procedural motion or other effort that I might make in that respect.

I am especially pleased to hear him make his observation that there might be a significant strength for a cloture vote on his part of the aisle. That certainly is one matter that I would consider and as we both know, there are ways to reach that.

I would not expect to try to skin the whole cat tonight, but I want everyone to know there is the possibility that we would be more than simply lay down a highway bill if we finish the continuing resolution today.

Mr. ROBERT C. BYRD. All Members are alerted to the possibility of further debate on that bill at such time as action on the continuing resolution is completed.

I stand ready to help the majority leader to get the agreement on the continuing resolution.

Mr. BAKER. I thank the minority leader.

Mr. BUMPERS. Mr. President, will the Senator vield?

Mr. BAKER. I yield to the Senator from Arkansas.

Mr. BUMPERS. Mr. President, we can probably save at least an hour if the majority leader would get a unanimous-consent agreement for 10-minute rollcall votes on all future rollcall

All Senators are here and they will be put on notice. Surely no one is going out partying tonight. I do not see why we could not do that.

Mr. BAKER. Let me explore that on my side.

The fear I have is a lot of Senators will retire and it may take a little longer than usual to get them to the floor. Let me explore that and I will look into it further.

Mr. METZENBAUM. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. METZENBAUM. Mr. President, is the Senator from Ohio correct on the assumption that before the majority leader will ask unanimous consent for a time certain in connection with this measure the majority leader will tell us what his program is with respect to the gas tax, what motion he intends to make in order that we may know whether we will indeed be here for a short period or a lengthy period.

Mr. BAKER. Mr. President, I am not going to stand here and try to outline every contingency and choose among options at this moment.

Mr. METZENBAUM. I did not mean

Mr. BAKER. I want the Senator from Ohio to know that I am not trying to pull the wool over his eyes. If I were I would not have said that we were going to perhaps lay this down.

I discussed this extensively with the minority leader. I have gone out of my way to make sure that the minority side was aware of the opportunities and the options that I think are available to me.

But surely the Senator will bear with me in saying that I have not yet chosen those and I am not prepared to say how I will proceed in that respect.

Mr. METZENBAUM. I was not pressing the majority leader to say. I was only hoping when he does ask for unanimous consent, at that time he will be willing to apprise us of what the future plans are.

Mr. BAKER. I thank the Senator.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. HATFIELD. Mr. President, I thank the leadership for this effort to try to bring this to a conclusion.

I shall ask on our Republican side of the aisle two members of our Appropriations Committee staff are in the cloakroom ready to take down a listing of proposed amendments. If Senators will go into the cloakroom to give that to the two staff people we can then proceed here on the floor and not waste longer time on this.

I also wish to indicate again to the Senate that we received the continuing resolution from the House of Representatives on Tuesday of this week. Appropriations Committee marked it up on Wednesday. It began consideration on the floor on Thurs-

So I would think that everyone should be reminded that we have expedited this beyond really the normal human capability of expediting it from the time we first received it until the time that it first appeared on the floor.

I think the Senator from Louisiana has made a very excellent point, and I wish to say to the Senator from Louisiana I think we probably have been a little bit too unobservant of the points of order that will lie against these amendments and should be raised.

I think in order to try to expedite the conclusion of this we will take a closer look at some of these, and I at least will be willing to raise points of order or other matters that will show to the Senator from Louisiana and others that we are not in the business of trying to take over the jurisdiction of other committees as far as the Appropriations Committee is concerned.

Mr. LONG. Mr. President, if the Senator will yield, let me assure the Senator I know the chairman of the Appropriations Committee is not trying to invade the jurisdiction of other committees, and I am trying to help him do his job.

Mr. HATFIELD. That is right.

Mr. LONG. But the point I have in mind is that if we want to get out of here and we want to serve the Nation, we should quit playing politics with this bill. We should quit offering amendments that Senators know have no chance of becoming law or that they know are subject to a point of order. They should not try to get the Senate to stultify itself and say that an amendment is germane when it is clearly not germane, or try to say it is not legislation on an appropriations bill when it clearly is. We could be here forever if we do that. We could be here this time next year if we are going to let Senators just continue to bring in amendment after amendment and try to offer them on an appropriations bill where that is not in order at all, and then try to overrule the Chair and engage in fine points and other maneuvers to try to consider a measure that should be on a bill from some other committee.

Mr. HATFIELD. I thank the Senator for his remarks and I join him in the same sentiment.

I again repeat my invitation to Members of this side to make known to the staff persons in the cloakroom the amendments that they have and the times that they would be willing to try to restrict the amendment's consideration.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader indulge me further for a question?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. This is perhaps a clarification. There is no question that the Senate will be in tomorrow.

Mr. BAKER. Mr. President, there is some question. I will try. There is a 90percent chance the Senate will be in tomorrow but if we stall down on this. I have to say we need to consider whether we are going to be in tomorrow or Monday. It is my intention to be in tomorrow, but that is based on consent that we could finish this bill

Now, I suppose that there is a high likelihood we will be in tomorrow, and I would advise Senators to assume

that.

Mr. ROBERT C. BYRD. I hope I am not being obtuse, but if we do not finish this bill tonight, why should the Senate not be in session tomorrow in an attempt to finish it? I think we will finish it tomorrow certainly if not tonight.

Mr. BAKER. Frankly, the only reason would be if we stay in all night tonight.

Mr. ROBERT C. BYRD. I hope we do not stay in all night tonight.

Mr. BAKER. I do not feel inclined to ask the Senate to be in again all day tomorrow.

Mr. President, let me try to put that in perspective. It is my intention to ask the Senate to remain in session tonight until we finish this bill. I hope that does not mean all night. I think we are getting to the place where we are running into dangerous waters from a physical and health standpoint. It may be possible that we can conclude at an earlier hour tonight and finish tomorrow. If we finish tonight we will certainly have to be in session for the purpose of taking up the highway bill and for Members to go to conference with the House of Representa-

So I do not know that there is any uncertainty about that, I think, except for a late all-night session tonight in which case I will not ask the Senate to be in session all day tomorrow and Senators certainly will be in session Monday.

Mr. ROBERT C. BYRD. I have two additional questions.

One, if the Senate were to complete action on this measure tonight what is the earliest moment that the distinguished majority leader or the manager of the bill feels based on their conversations with the House of Representatives that they might be able to go to conference on this amendment.

Mr. BAKER. I yield to the Senator from Alaska who may have a better view of that.

Mr. STEVENS. Mr. President, it was my understanding that the earliest time we could do that would be 10 a.m. in the morning if we were ready. It is also my understanding that it will take a period of hours to get this document ready so that we may translate the action of the Senate into a conference document that we can work with, with the House of Representatives.

So we would have to have this bill at the very latest by midnight to be able to go to conference at 10 keeping in mind that our staffs and the rest of us would be working late.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader entertain one further suggestion?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. That is that both sides do our best to be prepared at the end of the next rollcall vote to present our list for possible unanimous consent. We can work strictly on our side, and we will be glad to present that to the majority leader.

I say this only that Senators may be on notice that when we have another rollcall vote they should stick around and hear the request and be prepared to protect themselves.

Mr. BAKER. I agree with that.

Mr. President, I may say that the staff of the Appropriations Committee confirms what the Senator from Alaska said. If we finish no later than midnight tonight they estimate it will be 10 o'clock tomorrow before they can go to conference. So if we finish much after midnight it is going to be very late on Saturday before we are able to go to conference.

Mr. STEVENS. Assuming the House of Representatives will appoint confer-

ees by that time.

Mr. BAKER. Yes; Mr. President, we are going to try to canvass amendments on this side and as the chairman of the Appropriations Committee indicated those who have amendments should identify them and suggest the minimum time that they are willing to accept to the clerk in the cloakroom on this side of the aisle, as the minority leader has done on his side of the

After the next rollcall vote, I will renew a request and will try to establish time limitations.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. BAKER. I yield to the Senator from North Carolina.

Mr. HELMS. Mr. President, the able majority leader will recall that I called him about the PIK bill. Would he be willing to propound a unanimous consent now or later on that?

Mr. BAKER. Yes.

Mr. President, indeed, the distinguished Senator from North Carolina, who is chairman of the Agriculture Committee, gave me a unanimous-consent request.

Mr. HELMS. I believe I gave the Senator the wrong one.

Mr. BAKER. And I cannot find it. Has he a copy?

Mr. HELMS. We will get the majority leader another copy.

Mr. BAKER. All right.

Shortly, Mr. President, I shall put another request with respect to the Agriculture PIK bill supplied by the Senator from North Carolina.

Mr. HELMS. I thank the Senator. Mr. BAKER. I yield the floor.

Up Amendment 1517

(Purpose: To modify the provisions that would otherwise be applicable to the procurement of foreign produced specialty metals and chemical warfare protective clothing produced outside the United States)

Mr. TOWER. Mr. President, on behalf of myself and Senator Heinz, in addition to Senator Percy, Senator ROBERT C. BYRD, Senator WARNER, Senator Thurmond, Senator Hum-PHREY, Senator COHEN, Senator Spec-TER, and Senator Nunn, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. Tower) for himself and Mr. Heinz, Mr. Percy, Mr. ROBERT C. BYRD, Mr. WARNER, Mr. MOND, Mr. HUMPHREY, Mr. COHEN, Mr. SPEC-TER, and Mr. NUNN proposes an unprinted amendment numbered 1517.

Mr. TOWER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, line 2, strike out the period and insert in lieu thereof a colon and the following: "Provided further, That the first proviso in section 723 of such Act (S. 2951) shall be deemed to read as follows:

"Provided, That to the extent necessary to comply with agreements with foreign governments, except in the case of specialty metals containing nickel from Cuba, nothing in this section shall preclude the procurement of (1) foreign produced specialty metals used in the production of defense items, or parts or components of defense items, which items, parts or components are manufactured outside the United States, or (2) chemical warfare protective clothing produced outside the United States:'

Mr. TOWER addressed the Chair.

The PRESIDING OFFICER. Before the Senator proceeds may we have order. The Senate must come to order. Those Members in the rear of the Chamber who are talking, please leave.

Mr. DOMENICI. Mr. President, will the Senator from Texas yield for a parliamentary inquiry?

The PRESIDING OFFICER. The Senate will be in order.

Mr. TOWER. I yield.

Mr. DOMENICI. Mr. President, parliamentary inquiry. Is there a time agreement on this amendment?

Mr. TOWER. I am about to ask for it. I am prepared to agree to 10 minutes to a side. I have discussed this with Senator Heinz and it is agreeable to him and we might even be able to yield the time back.

addressed the Several Senators Chair.

The PRESIDING OFFICER. Is the Senator from Texas offering a unanimous-consent request for time of 10 minutes on each side?

Mr. TOWER. I further ask unanimous consent, Mr. President, that the amendment not be subject to further amendment.

The PRESIDING OFFICER. Is

there objection?

Mr. STEVENS. Mr. President, we would support this amendment. The time will be handled by the Senator from Wisconsin and I will sak him whether he has objection to a time limit.

The PRESIDING OFFICER. there objection to the unanimous-consent request?

Mr. ZORINSKY. Objection.

The PRESIDING OFFICER. The

Senate must be in order.

Mr. STEVENS. Mr. President, will the Senator reserve the right to object? I think I know what he wants to do.

Mr. ZORINSKY. Yes; I will reserve my objection, with a unanimous-consent request negating any modification or having any other amendment.

Mr. TOWER. I am prepared to agree to that, as will the Senator from Pennsylvania.

Mr. RANDOLPH. Mr. President, may I be added as a cosponsor?

Mr. TOWER. I would be delighted to add the Senator as a cosponsor.

The PRESIDING OFFICER. there objection to the unanimous-consent agreement propounded by the Senator from Texas? If not, it is so ordered.

Mr. HEINZ. Mr. President, the Senate is not in order.

The PRESIDING OFFICER. The Senator from Pennsylvania is absolutely correct. The Senate is not in order. It will come to order. Those Senators to my right please cease conversation. Senators please cease conversations. Those Senators who require to converse please retire from the Chamber. We will not proceed until we have order.

Will the Senators to the left please retire.

Mr. TOWER. I yield 1 minute to the Senator from Alaska, and ask unanimous consent that the Senator from Texas retain the floor.

Mr. STEVENS. Mr. President, want to say that we are looking for a room for members of the staffs who amendment. I am not saying the staff is causing all the noise, because I think we are all tired enough not to know who is causing the noise, but there are too many bodies out here and having too much confusion. So as soon as we locate that room I will make that request that the Chair instruct members of the staff to leave the floor if they are not directly involved in the amendment pending before the Senate.

UP AMENDMENT NO. 1517

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows: The Senator from Texas (Mr. Tower) proposes an unprinted amendment numbered 1517.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, line 2, strike out the period and insert in lieu thereof a colon and the following: "Provided further, That the first proviso in section 723 of such Act (S. 2951) shall be deemed to read as follows: 'Provided, That to the extent necessary to comply with agreements with foreign governments, except in the case of specialty metals containing nickel from Cuba, nothing in this section shall preclude the procurment of (1) foreign produced specialty metals used in the production of defense items, or parts or components of defense items, which items, parts or components are manufactured outside the United States, or (2) chemical warfare protective clothing produced outside the United States:"

Mr. TOWER. Mr. President, I yield myself 3 minutes.

Mr. President, this amendment is proposed in behalf of myself, Mr. HEINZ, Mr. ROBERT C. BYRD of West Virginia, Mr. PERCY, Mr. SPECTER, Mr. WARNER, Mr. THURMOND, Mr. HUM-PHREY, Mr. COHEN, Mr. NUNN, and Mr. RANDOLPH.

Mr. President, I rise on behalf of an amendment to House Joint Resolution 631. The amendment is to the specialty metals "Buy-America" provision of S. 2951, the fiscal year 1983 Department of Defense appropriations bill.

I understand that this amendment is acceptable to the floor managers of the bill.

The specialty metals provision of S. 2951 will seriously trouble U.S. relations and defense cooperation with numerous allies and friends, particularly NATO member nations, Israel, Australia, and Switzerland.

It would also adversely affect U.S. trade relations and put at risk substantial economic benefits for the United States.

The language in S. 2951 allows DOD to purchase only "weapons or weapons systems" manufactured outside the United States and containing specialty are not involved in the pending metals of non-U.S. origin. However,

the United States does not buy weapons or weapons systems from overseas. For the most part, we purchase foreign made components, subassemblies, and defense equipment from our European allies. Under the provision of S. 2951 DOD would be prohibited from buying such items.

The amendment we propose will allow DOD to purchase defense items, and parts and components of defense items which are manufactured outside the United States.

This amendment attempts to strike a balance between preserving the viability of the U.S specialty metals industry and protecting U.S. relations with European member nations of NATO and other friends and allies. I am hopeful that it will strike such a balance.

In addition, of course, and this is very important, Mr. President, when you consider that the Europeans buy nine times as much military hardware from us as we do from them, we are also acting in our own economic selfinterest.

This amendment will insure that the market for defense materiel in Europe will remain open to U.S. contractors.

I yield such time-

The PRESIDING OFFICER. The Chair must inform the Senator from Texas that his amendment amends an amendment already agreed to and, therefore, without unanimous consent his amendment is not in order.

Mr. TOWER. Mr. President, I ask unanimous consent that the amendment be in order.

The PRESIDING OFFICER. there objection? Hearing no objection, it is so ordered.

Mr. TOWER. Mr. President, I yield such time as may be required to the Senator from Pennsylvania.

Mr. HEINZ. First, Mr. President, I want to thank a number of Senators who participated in fashioning this change in the specialty metals clause that is in the Appropriations Committee bill. Senator STEVENS, in my judgment, quite correctly put into that bill, in an effort to try to preserve a vital defense industry, namely the specialty steel industry, without which it would not be possible for us to have the capability of having a strong national defense, this provision.

Senator Tower and I, Senator Byrd of West Virginia, Senator RANDOLPH, Senator Percy, Senator Specter, have been looking for a formulation that will accommodate the most pressing problems of sheltering the U.S. specialty steel industry from what are largely a series of unfair trade practices involving subsidized imports and dumping on specialty steel itself, and yet permit the United States to obtain the kind of defense relationships with our NATO allies that are important to military cooperation.

The amendment pending before us, I believe, strikes such a balance, and will not only preserve workers' jobs in this country but will allow us to stay on good terms with our NATO allies.

Finally, it is my hope that now that this issue has been resolved with members of the Armed Services Committee that we, having established a policy that we believe is balanced and fair, will not be in the future called upon to constantly revisit the issue and take the time of the Senate to do so.

So I want to thank Senator Tower and all the colleagues who have engaged in helping us fashion this amendment, which is good policy, and I hope our colleagues join us in adopting it.

Mr. TOWER. I want to thank my colleague from Pennsylvania for his splendid effort. It is my understanding that the managers of the bill are prepared to accept it. I had given consideration, because of the widespread support for this amendment, of asking for a rollcall vote to reinforce our conferees in the conference with the House. In the interests of time I will not do so, with an assurance from the managers of the bill that they will make every effort to insist that the Senate position prevail in the conference with the House.

Mr. PROXMIRE. Mr. President, will the Senator from Texas yield?

Mr. TOWER. I yield.

Mr. PROXMIRE. Mr. President, I know of no objection to this amendment on this side. I inquired to the extent I could, and I do not know anybody on our side who has any objection, and I think we can do our very best to insist on the amendment.

Mr. STEVENS. I want to assure the Senator from Texas, this was my amendment, which was deleted on the floor. We have rewritten it, and I am grateful to have the help of the Senator from Texas and the Senator from Pennsylvania in perfecting it. We will defend it to the best of our ability. I know of no objection to it and I am prepared to accept it.

Mr. PROXMIRE. I yield back our

Mr. TOWER. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment (UP No. 1517) was agreed to.

Mr. HEINZ. I move to reconsider the vote by which the amendment was agreed to.

Mr. TOWER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1518

(Purpose: To limit the use of appropriated funds for full flight testing of the MX missile)

Mr. HART. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read

The Senator from Colorado (Mr. HART) proposes an unprinted amendment numbered 1518.

Mr. HART. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of Title I of the joint resolution insert the following:

. In addition to the limitation set forth in section 101(c) of this Act, none of the funds appropriated in the joint resolution may be obligated or expended for full flight testing of the MX missile until a basing mode is approved by both Houses of Congress in a concurrent resolution, as specified in such section 101 (c); Provided further, that none of the funds made available by this joint resolution may be obligated or expended for any site-specific facilities for the MX missile until all terms, conditions and requirements of the National Environmental Policy Act (42 U.S.C. 4332) are met.

Mr. HART. Mr. President, if I might have the attention of the floor managers of the bill as well as the distinguished chairman of the Armed Services Committee, to whom I have made copies of this amendment available, I think it might be possible to reach agreement on it fairly quickly, I would hope, if I might just summarize what the amendment does.

Mr. TOWER. Mr. President, will the Senator from Colorado yield?

Mr. HART. I yield.

Mr. TOWER. We are still looking at the possibility perhaps of offering some language or a slight modification and see if the Senator will accept it.

I wonder if he would mind withholding that amendment for a moment, perhaps let Senator Cohen proceed with an amendment he has which should not take much time, and we will try to get back to the Senator from Colorado.

Mr. HART. Mr. President, I ask unanimous consent that the amendment be temporarily set aside but following the Senator from Maine.

Mr. STEVENS. Mr. President, serving the right to object, I think the Senator from Maine has two amendments. I do not have objection if it is on the basis of RDF.

The PRESIDING OFFICER. Hear-

ing no objection-

Mr. ZORINSKY. Mr. President, reserving the right to object, would that unanimous-consent agreement also state a provision that no amendment

to the amendment and no modifications will occur? Does the Senator-

Mr. HART. I so modify the request. The PRESIDING OFFICER. Is there objection to the request of the

Senator from Colorado?

Mr. STEVENS. May we assure the Senator from Nebraska, so that he will not be this nervous and with the attention of the lady from Florida that an amendment that he is worried about will not be offered without notice to him, and I give him that personal commitment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Colorado? The Chair hears none, and it is so ordered.

Mr. METZENBAUM. Reserving the right to object. Will the Chair state

the request?

The PRESIDING OFFICER. The request is the Senator from Colorado wants to temporarily set aside his amendment with no amendment in the second-degree being in order or modification and that it will be automatically the pending business after the amendment of Senator COHEN.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER, Hearing no objection, it is so ordered.

UP AMENDMENT NO. 1519

(Purpose: To permit the use of Department of Defense funds to be used to establish or operate the Rapid Deployment Joint Task Force as a unified comand)

Mr. COHEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. WALLOP). The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. Cohen), for himself and Mr. Tower, Mr. Percy, Mr. Thurmond, Mr. Warner, Mr. Quayle, Mr. LUGAR, Mr. HUMPHREY, Mr. LEVIN, and Mr. Exon, proposes an unprinted amendment numbered 1519.

At the end of title I insert the following new section:

"Sec. . Notwithstanding the restriction contained in section 792 of the Department of Defense Appropriation Act, 1983 (S. 2951), funds appropriated by this joint resolution for use by the Department of defense may be used to estalish or operate the Rapid Deployment Joint Task Force as a unified command.".

Mr. COHEN. Mr. President, I rise to offer an amendment on behalf of myself and Mr. Tower, Mr. Percy, Mr. THURMOND, Mr. WARNER, Mr. LEVIN, Mr. Exon, Mr. Quayle, Mr. Lugar, and HUMPHREY. Our amendment would allow the use of funds, without increasing any appropriated dollar amounts, to establish and operate a new unified command for the Persian Gulf region. There is language currently in the fiscal year 1983 Senate defense appropriation bill that would prohibit this key initiative.

Mr. President, the real issue is how the United States can best protect her interests in the region. The President, the Secretary of state, the Secretary of Defense, and all the cosponsors of this particular amendment believe that our interests would be best advanced by activating a new command, to be entitled the U.S. Central Command

Frankly, this is not a new idea. The concept of a separate unified command for that area has been debated for the past several years. In fact, Secretary Weinberger responded to an initiative from the Senate Armed Services Committee, developed during the course of its deliberations about the Rapid Deployment Joint Task Force, requesting the Pentagon to develop a separate unified command. You may recall that the Rapid Deployment Force was a concept offered by Secretary Brown under President Carter in response to the volatility of the Persian Gulf are, following a number of events such as the chaos that took place in Iran, the invasion of Afghanistan by the Soviets, the identification of the Persian Gulf area being within our interests, and because of the distinct structure of the European Command and Pacific Command, with overlapping jurisdiction.

The effort was to develop a Rapid Deployment Force that could help protect our interests in that region. It was the Senate Armed Services Committee that recommended having the straight line of communication, having someone in charge with as clean a line of communication as possible within

that region.

The most fundamental reason is simply the area demands the full attention of a senior military commander and not the existing arrangement as it now stands between the European Command and Pacific Command, the commanders of which both have their hands full with areas outside the Persian Gulf region. It was through this process of the 18-month examination that the President recently approved activating a new Persian Gulf Command as of January 1, 1983.

This is not a layering of military bureaucracy or a depository for head-quarters personnel. It is the most rational approach toward the effective management and control of our military forces which might have to be used in that vital region of the world. No additional personnel are requested to man the new command.

It really kind of boils down to an assessment, Mr. President. Do we have a vital interest in the Persian Gulf region? Do we have an interest in seeing to it that oil continues to flow through the Persian Gulf? Do we have an interest in seeing to it that small nations like Oman, Bahrain, the so-

called moderate nations, are able to

have a stable society with the aid at

least of the United States in time of crisis being available to them. If you believe we have a vital interest in that region of the world, it seems to me we want to develop the most comprehensive and straight line command setup that we can offer.

That is basically the reason why a seperate unified command was recommended by the Armed Services Committee, why it was adopted by the Secretary of State, the Secretary of Defense, and ultimately the President.

I might say it does not go far enough, as far as I am concerned. This is not the configuration upon which I would insist. I would like to see more of a forward command element. Because we do not have anything available on land in that part or region of the world, at least not yet, I would even recommend that we go to some sort of sea-based forward command structure. That, however, is not the proposal before the Senate. I would think evolving into a separate unified command is in the best interest of this country and I urge that this proposal be adopted.

Mr. STEVENS. Mr. President, the Defense Appropriations Subcommittee held 2 days of hearings on the proposal to change the Rapid Deployment Force into a new unified command limited to Southwest Asia. I hope that those people who are concerned about the increasing costs of the Defense Establishment will listen, whether they are here or in their offices, wherever they may be. This is one of the recommendations of the committee.

I want you to know that this year we probably held more hearings, more days of hearings, than the subcommittee has held in many years. When we heard that the Rapid Deployment Force, which is a worldwide concept, is planned to be changed to a new command, the U.S. Central Command, to be limited to Southwest Asia. The committee reported a recommendation that the unified command not be established, and that we be given further opportunity to examine it.

Notwithstanding that request and the restriction that is in the report, the Department announced on December 7 that this new command would be created on January 1, 1983. It will add another 1,000-man bureaucracy to the Department of Defense.

This action is an abandonment of the concept of the Rapid Deployment Force as a global strike force, and a refocusing to a specific theater of the world. It will be a new theater of commitment of defense by the United States as a unilateral assumption of responsibility for the world in the Southwest Asia area.

Additional headquarters personnel are planned to handle a more limited mission. The increase in the headquarters staff alone will be from 263 people to 1,000 people in this fiscal year.

When we were in Europe, we asked the NATO Commander what he thought, and he told us, "Give us 80 people and we will handle the same planning that will be involved in that same concept."

The Joint Chiefs of Staff were not entirely in agreement that the RDF should become a new command. If Congress endorses the change from the Rapid Deployment Force to the new U.S. Central Command, it is, in effect, making the same commitment that we made to NATO years ago which has led to an annual expenditure of \$133 billion to meet the NATO commitment.

This is a geographical sector important to other nations of the world. Only 8 percent of the U.S. oil needs come from this region. By contrast, 50 to 70 percent of the European and Japanese imports come from the Persian Gulf. The United States has not gone forward with a request that other nations assume a portion of this military and financial burden.

We are not opposed to the concept that we should announce to the world that we are ready to assist in the defense of the Southwest Asia region. But we should at this time, in my opinion, and in the opinion of our committee, reinforced by the full committee, not permit the unilateral assumption of the responsibility for the defense of this area at the expense of rescoping the Rapid Deployment Force, which was created by the Congress to meet the global defense of this Nation's needs.

I would urge the Senate to think about what this means if we make this commitment. I understand the attitude of the authorizing committee. We are not saying that ultimately we would not see fit to fund increased responsibilities in Southeast Asia. But I plead with the Senate, do not permit this change to take place without asking our allies for their support to begin with.

We have already been literally sucked into the position where we are paying substantially all of the cost for the NATO defense. If you really look at the total cost of that defense, we are assuming most of the costs.

I am not saying that other nations are not doing most of what they said they would do, but our increases in technology, in weapons systems, in the modernization of sealift, of airlift, and of our strategic missile force, have been so fast and so great that we are increasing, Mr. President, at the rate of \$55 billion in 2 years for the NATO commitment.

If we unilaterally assume this commitment in the most volatile area in the world today, I think the United States has stepped off the bridge. This is not the time to do it.

I understand what the Senator is saying. I ask only that we be given the time to fully contemplate what is being suggested. We see no reason why we should abandon the RDF.

You should understand that this restructures the RDF and changes it into a theater command called the

U.S. Central Command.

The readiness command is still there, but its defined role is still uncertain. We think Congress needs more time and the people of the United States need more time to think about the commitments that are being made here.

Furthermore, Mr. President, until we complete our modernization and have a new airlift capability, and a sealift capability, I would state that we do not have the ability to meet the commitment we are announcing to the world

It is not something we should undertake unilaterally, because it will severely strain our NATO forces should we have to pull them down in order to meet this commitment. It would strain our worldwide forces to do that.

I admit there are other people in this body who have served on the Armed Services Committee much longer than I have been chairman of this subcommittee, but I state that to my knowledge, no one who has been on this subcommittee disagreed with our position. No one had any advance knowledge that this change was to be made. I think we should not allow this additional command to be created.

During our hearing, the defense witnesses were in disarray. They were unable to answer basic, fundamental questions about the proposed bureaucracy. There was no satisfactory explanation as to why the RDF had been converted into this Persian Gulf theater command force and why there was no clear definition of the future role of the readiness command.

I understand the Senator's amendment, and the time is late. I only say to the Senator again that there was no dissent among those of us who sat through the hearings on this issue that the Department of Defense had not justified the abandonment of the RDF and the creation of a new central command which would unilaterally assume the defense obligation in terms of the Persian Gulf region.

Mr. SCHMITT. Will the Senator yield?

Mr. STEVENS. I do yield to my friend.

Mr. SCHMITT. I merely want to say the Senator's characterization of the hearing and the unanimity about those hearings, the discord and the disarray shown by Defense Department witnesses were not what one would have liked or even chose. It is clear that what was once, I think, recognized as a modern concept of strategic mobility that came out of the later

stages of the Carter administration—that is, a rapid deployment force that was deployable, was rapid, and was a force—was being abandoned in favor of concentration on one theater. And they used the word.

The Senator recalls that, under questioning, it became very clear what the Department of Defense—particularly the Department of the Army and the Department of the Air Force—had clearly had in mind for this new command was a theater force in absentia.

As an aside, I think that is one of the reasons why we are seeing so much emphasis on purchasing the C-5. But we shall leave that aside.

The original concept of a strategically mobile force that can move anywhere on this globe where our national interests are threatened with the appropriate response to that threat has apparently been abandoned—at least at the higher levels of the Defense Department.

I do not think this should be done without much more careful scrutiny of the consequences of such an act. It does not make good sense to me, nor do I think it made sense to the rest of

the subcommittee.

Mr. TOWER. Mr. President, I support the amendment offered by the Senator from Maine. I simply want to note two points: That is, another military bureaucracy is not being created. The existing military organization, the Rapid Deployment Joint Task Force, will simply transition to a more effective, regionally oriented unified command, the U.S. Central Command. There will be no increase in military manpower end strength to create this new command.

Mr. President, this amendment will enable the Department of Defense to create—with existing manpower—the most efficient and effective organizational arrangement for protecting U.S. interests in the vital Persian Gulf region.

The President of the United States made the decision to establish this command and I believe we should support him. I urge my colleagues to do so.

I might note further that we are not alone in the Indian Ocean-Persian Gulf area. British ships are very regularly deployed there and the French have occasionally maintained a large number of ships there than we do; so two of our Western friends and counterparts are making their presence known in that area.

Mr. COHEN. Mr. President, the Senator indicated that this was without any notice whatsoever. I point out that for the past 2 years, the Committee on Armed Services has endorsed the concept.

In this year's report, the committee stated:

The focus of U.S. force projection plans and programs has centered on the Rapid

Deployment Joint Task Force which will transition on January 1, 1983 to a separate unified command for the Southwest Asia region. The committee fully supports the creation of this new command.

Second, it is my understanding the RDF has been conducting joint exercises with the troops in Egypt, and also with those in Oman. We have already been trying to create a rapid deployable force to work in conjunction with those countries who feel most threatened.

Let me deal with this issue about the Joint Chiefs of Staff. There was, of course, discord among the Joint Chiefs. That is the reason we had hearings in our subcommittee, to deal with the problem of what should the Rapid Deployment Force do? You had the traditional conflict and competition between the services that we see sometimes, time and time again. That, by the way, was one of the reasons I did not want to get into this initially.

When we had that rescue mission in Iran to get our hostages back, one of the things we found out was an overlapping command and control structure, confusion, chaos, and ultimately

tragedy.

That is one of the reasons we are trying to eliminate that competition between the Joint Chiefs—not to say it has to be Army-Air Force, or Navy-Marine Corps, but let the President, the Commander in Chief, decide what is the most effective, cleanest, simplest line of command so we do not have another Iran rescue mission failure.

That is the reason we recommended going to a unified command, because it is in our vital interest and we recognize it. Those who want to oppose this right now say we do not have a vital interest. If there is conflict tomorrow, if there is internal subversion tomorrow and the Omanis or the Bahrainis call on us for assistance, we might find the overlapping jurisdiction we found in the past between Pacom and Eucom.

I suggest to the Senator from Alaska that this was carefully thought through by the Commander in Chief, and the President adopted this to end the conflict between the Joint Chiefs, to end the interservice rivalry, and to produce something that makes military sense.

Mr. ANDREWS. Mr. President. The PRESIDING OFFICER. The

Senator from North Dakota.

Mr. ANDREWS. Mr. President, I think we all want the same thing; that is probably the most efficient use of our military manpower in time of increasing budgetary restraint. The thing that amazes me is how my good friend from Texas and my good friend from Maine, my good friend from Alaska and myself, sit on two separate committees dealing with the military and seem to get two entirely different concepts.

The goals that the Senator from Maine has pointed out and the Senator from Texas has pointed out are goals we all share, Mr. President. But the facts that we have been given show that this is, again, may I restate, a whole new bureaucracy.

Let me add one other thing to have our colleagues think over for a minute.

Mr. President.

The cost in the military is not the MX system, it is not the B-1 bomber, it is not the weaponry with the M-1 tank, the weaponry that we hope always will give the American fighting man and woman the edge over whatever the enemy might throw against us. That is the way you preserve freedom.

The cost is in the duplication of forces that we have in personnel and particularly in high staff cadres that set up a group for this and a group for that and a group for something else.

One of the things that concerns those of us on the Defense Appropriations Subcommittee is the fact that the RDF that is being set up is now being tied down to one area and solidified into a chain of command right there, with these extra people.

The other thing that bothers me— Mr. COHEN. Right where, Mr. Presi-

dent?

Mr. ANDREWS. In the centralcom, as they call it.

Mr. COHEN. Mr. President, where are they situated? Right at MacDill Air Force Base in Florida.

Mr. ANDREWS. In the United

States, right at MacDill. Mr. COHEN. That is right.

Mr. ANDREWS. The point I would like to make, Mr. President, to my colleague and good friend from Maine, is that we are going to have to take a darn close look at the active strength commitments we have in Europe. We are going to have to take a realistic look at the fact that if we are going to have a RDF, let us have an RDF. Let us not assign it to one portion of the world and one portion of the world alone. If we could take 30,000 troops out of Europe and assign that troop strength to an RDF and get credit for it in Europe, everybody in this troubled world would know if there is conflagration in Europe, that the RDF would go there; if there is conflagration someplace else, they would go there. But we should not have a group that is responsible to this area, and another group that is responsible to yet another area. It is not good defense practice, and it certainly is something we cannot afford. Had the Department made an offer to truly strengthen our combat readiness and get away from these extraneous costs, it would have been allowed to stay in the bill.

Mr. STEVENS. Mr. President, I call the attention of the Senate to the fact that there was a request for a 37,600 increase in the end strength of the Armed Forces from the Department of Defense. The Armed Services Committee's authorization bill reduced that by 17,600. The increase in strength, then was 20,000.

In other words, there will be 22,400 fewer troops available to the Department of Defense than originally con-

templated.

Let me point out to the Senate that the Japanese are almost totally dependent on this region as a source of oil. They contribute only 1 percent of their gross national product for defense. We will be committing our taxpayers' money to a total defense support of an area to protect their oil routes.

Mr. President, they are our allies, but they should come forward and find a way to support this defense if they want to defend that area, too.

Mr. COHEN. Is the Senator suggesting that we just ignore the area?

Mr. STEVENS. No, Mr. President, I am saying we should keep the Rapid Deployment Force, we should use it if it is in our national interest to do so in the Persian Gulf region, but we should not change the RDF so it is limited to one theater, so that it has only one role. That is what this does. This eliminates the Rapid Deployment Force.

If you approve this amendment, there will no longer be a rapid deployment force in the United States. We will have a force committed to defense of the Persian Gulf only, an increasing

commitment year by year.

Incidentally, no forces would be stationed in that theater. Everything, including an asphalt plant, is planned to move in there by air to defend this area for the purpose of protecting 9 percent of our supply and 99 percent of the Japanese supply of oil, with not a dime being committed by the Japanese.

Mr. LEVIN addressed the Chair. The PRESIDING OFFICER. The

Senator from Michigan.

Mr. LEVIN. Mr. President, I could not agree more with my friend from Alaska that the Japanese could do more, and there is a number of efforts going on in this body to get them to do more. But the question is not whether or not taxpayers dollars are going to be out there in the Middle East, in the Strait of Hormuz and the Persian Gulf. They are there. Our taxpayers dollars are out there. The problem is that they are completely uncoordinated.

I stood on the Strait of Hormuz and on my right were ships coordinated by the Pacific Command to the east, and on my left were ships which were coordinated by the European Command. That does not make any sense. It is one coordinated, unified area, and we have to have one coordinated, unified command. It does not make any sense for our AWACS planes in Saudi

Arabia to be part of the European Command and the ships which they coordinate a few hundred miles away to be part of the Pacific Command.

The question is not whether we are going to have taxpayers dollars out there. They are out there, my friends. The question is whether they are going to be coordinated, cohesive, unified, in one logical, sensible command.

Having taken a trip for that purpose, among others, to look at that command, having landed on the aircraft carrier outside the Strait of Hormuz, knowing that it was being coordinated by something inside the Strait, I absolutely came to the conviction it made no sense whatsoever.

We need a central command in that area, and the Joint Chiefs have to be given this kind of product.

We heard testimony on this issue I think probably longer in the Appropriations Committee. I hope that finally we would just cut this knot and have a new unified, central command with one Commander in Chief instead of two. We have two chiefs right now. We have a European chief and we have a Pacific chief, and the darned line goes right doen the most critical jugular in the world, the Strait of Hormuz. That is the dividing line.

Mr. SCHMITT addressed the Chair. The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, I think the Senator from Michigan and the Senator from Main: have pointed out the very real problem in joint operations. There is no question that if we are to have a rapid deployment force, wherever it is deployed, there are many examples of lessons, not just those in Iran, that show you have to have a unified command structure and it has to be inception to termination. There has to be a unified command structure.

But that does not mean that there has to be a centralized bureaucratic command in the United States dedicated to having the theater force placed under certain circumstances in the Middle East.

The rapid deployment structure of this country has been in the past, and I think is still today, based on the existence of our Naval, Marine, and our airborne forces.

It does not take much imagination to see that we can have a truly rapid deployment force built on that foundation with each operation under a unified command, but that does not mean the entire force is under unified command or that it is dedicated to one part of the globe. Strategic mobility is going to be the name of the game in the future, and it is going to be the name of the game eventually even embracing Europe. We have to move away from the idea of a centralized theater command in Europe. It is

going to take a long time, but we are going to tie up too much money and manpower when one looks at the kind of threat to our national interests that exists in this world, and I hope that the Senate will not agree to the amendment before it.

Mr. COHEN. Mr. President, there are several Senators who wish to offer some remarks on this particular measure, Senator Percy and Senator Lugar, and they are in a Foreign Relations Committee meeting right now and have asked for the opportunity to speak on this.

I make a recommendation that we hold this matter over because I believe we represented to Senator Harr that his matter, which was going to be resolved quickly, would be considered in a few moments. We have been going on some time now.

I propose, under unanimous consent, that we defer continuation of this debate until such time as Senator Harr concludes his amendment, which I am told will not be long and will take only a few minutes, and then we will go back to the next order of business.

Mr. STEVENS. Mr. President, we are ready to vote.

Mr. COHEN. Senators Percy and Lugar would like to speak on this matter.

Mr. PRYOR. Mr. President, if the Senator will yield, I think also Senator HART and myself yielded to the Senator.

Mr. EXON. Mr. President, I was about to object to what I thought was a unanimous-consent request, but that has been withdrawn.

Mr. PRYOR. I wish to ask the manager of this bill. I thought about 45 minutes ago we had some sort of an arrangement or agreement that we were going to attempt to limit debate on all these amendments. I understand that there was no time limitation. I have an amendment that I wish to talk on for a very long time but I agreed to 10 minutes on the side.

We have been 45 minutes on this amendment.

Mr. STEVENS. That is correct. But we took care of another amendment in the Senator's absence and time was yielded back before that time was all used. So we got two amendments in 45 minutes.

Mr. PRYOR. Mr. President, is there any idea when we might vote on this and dispose of this measure?

Mr. EXON. Mr. President, will the Senator from Arkansas yield?

Mr. PRYOR. I am delighted to yield. Mr. EXON. Mr. President, the point of my question and the reason I am about ready to offer an objection is that I totally share the sentiments of the Senator from Arkansas. I have an amendment that I have agreed to table that can be 10 minutes equally divided.

I will tell the Democratic staff that I have now decided I want to up that to an hour equally divided.

It seems to me that we are seeing a great deal of selfish actions on the part of this body, not recognizing that we have been here for so many hours that I do not understand.

Mr. STEVENS. Is the Senator ready to vote? This Senator is ready to vote when the Senator wishes.

Mr. EXON. Traditionally each and every time those of us who wait patiently to the end have 1 minute equally divided before we vote. It seems to me it is about time that the leaders of this body get out here on this floor and get some time arrangements so we can orderly hopefully conduct the business of the Senate.

I have been here almost all day long and I object to the amount of time that is taken on some amendments and the minimum amount of time which is going to be taken on others.

Mr. STEVENS. Mr. President, we accept the criticism. However, in the course of working these out we eliminated three other amendments that the Senator will learn about in a few minutes. We have not been idle. We did stay here this afternoon for 40 minutes waiting for someone to come over to offer an amendment to this section.

We are ready to vote. I am ready to vote. Is the Senator ready to vote?

Mr. COHEN. Mr. President, I say to the Senator from Nebraska that I sat here last night. I did not offer any comment. I wanted to hear what he had to say during an important debate. I could have arisen and made my speech as well. I let my remarks go unsaid last night.

I do not particularly appreciate the fact I am going to be cut off at this point. I am through on this issue. But there are two Senators who wish to say, perhaps 2 or 3 minutes each, remarks about the subject matter.

In the meantime, I am trying to accommodate Senator Harr whom I think we misled into thinking we would come immediately back to his amendment. He has been sitting here the last 40 minutes himself.

Mr. STEVENS. Mr. President, I ask unanimous consent again that this amendment be temporary set aside and we return to the Hart amendment and then complete the debate on the Hart amendment which will be accepted for the information of the Senate, and we will have made progress.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1518

Mr. HART. Mr. President, the pending amendment was set aside under a unanimous-consent agreement which precluded its modification.

If I could have the attention of the Senator from Nebraska, I could ask unanimous consent that it would be in order to modify that amendment with language pending at the desk that applies to the subject matter only of that amendment and nothing else.

The PRESIDING OFFICER. Is there objection?

Mr. ZORINSKY. No.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is so modified.

The modified amendment follows:

At the end of title 1 add the following new section:

SEC. ( ). Notwithstanding any other provision of this joint resolution, no initial flight test of the MX missile may be conducted until after both Houses of the Congress have agreed, in accordance with the provisions of section 101(o), to a concurrent resolution approving the obligation and expenditure of funds for the procurement and full-scale engineering development of a basing mode for such missile.

Mr. HART. Mr. President, this amendment seeks to expand in one degree the so-called fence that was established with relation to the production of the MX missile last night in the debate over the committee amendment as amended by the Jackson amendment. That degree is to include in the defense operations the conduct of a full flight test of the MX missile prior to the time when Congress approved the basing mode as established in the committee amendment as modified by the Jackson amendment.

I have discussed this matter with the distinguished chairman of the Armed Services Committee. I believe we are in substantial agreement over the effect of this amendment, and I will be prepared to respond to any question or comments the Senator from Texas might have.

Mr. TOWER. Mr. President, I suggest to my colleagues that they accept the amendment offered by the Senator from Colorado. I have discussed it with others who were involved in the formulation of the Jackson-Tower-Nunn-Warner-Stevens, et al, amendment, and I think that everyone is satisfied that it is consistent with the spirit of the amendment.

Therefore, for my part I am prepared to support it and I yield to my good friend from Alaska for any comment he has on it.

THE SALT II TREATY AS UNRATIFIED

Mr. SYMMS. Mr. President, I rise to oppose the Hart-Tower amendment which would in effect defer MX ICBM flight-testing in order to comply with the unratified SALT II Treaty. The United States has already constrained our strategic forces unilaterally in compliance with the unratified SALT II Treaty in at least eight significant cases. The Hart-Tower amendment would be case No. 9.

Mr. President, it is correct that under the second agreed statement to paragraph 9 of article IV of the unratified SALT II Treaty the United States should not flight test a new ICBM type that has a different number of stages than that of the first new ICBM type to be flight tested. In other words, once the United States launches the first MX—with its four stages—in February, we could not under SALT II then test launch a second new ICBM type with, say, three stages, which would probably be the number of stages on a small mobile ICBM. But the United States has not ratified the SALT II Treaty.

In sum, I oppose the Hart-Tower amendment because it would defer MX flight testing in compliance with the unratified SALT II Treaty. This is case No. 9 of U.S. unilateral SALT II compliance. The evidence is growing ever greater that the constitutional treatymaking power and prerogatives of the Senate are being circumvented. Someday soon, Senators may begin to challenge U.S. SALT II compliance directly.

Beyond the above constitutional legal, and political problems, the Hart-Tower amendment would also have the following deleterious programatic effects:

First, It will delay MX R&D, which the Congress, administration, and Joint Chiefs of Staff all agree should go forward as soon as possible on top priority.

Second. It will increase the cost of

the MX program.

Third. Delay of MX testing and deployment will reduce U.S. leverage at the START talks.

The specific results of the Hart-Tower amendment will be that the first MX flight-test will probably now be delayed from January 1983 to at least March 1983, a 2-month slippage at least. The Senate has thus agreed to another serious delay in the MX program.

Mr. STEVENS. Mr. President, it is my understanding that this amendment will prevent the full testing of the missile prior to the decision on the basing mode, while it does not delay the continued R&D short of the full testing. Is that correct?

Mr. HART. That understanding is

correct.

Mr. STEVENS. Then I have no objection and am prepared to accept the amendment.

Mr. TOWER. I might add that the time for the test has slid now to mid-March so we are not looking at really much of a delay.

Mr. HART. The Senator is correct.
Mr. SYMMS. Mr. President, reserving the right to object for a question, I just wish to make it clear. Is the purpose for this amendment in any way dealing with the fact to make us in compliance with SALT II?

Mr. TOWER. The primary thing is to enable us to preserve our options.

Mr. STEVENS. Yes. In view of what the Senator from Texas said it really

has the impact the Senator from Colorado wishes. At the same time, it really does not limit our options because that flight test will be delayed at most 30 to 45 days and it should not complicate the decision on the basing mode. So we are literally moving that issue beyond the basing mode decision.

Mr. TOWER. Nor would it delay the IOC.

Mr. SYMMS. I appreciate the concern. I would just say it would be this Senator's concern that we should not be concerned about treaties that have to be ratified.

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. STEVENS. I would be happy to yield to the Senator from New Mexico.

Mr. SCHMITT. I might say that it would be proper to say that in the context of the MX, keeping this new system purely as a weapons delivery system, I say to my colleagues that it has far more than that, and I hope in the manipulations to deal with it as a weapons system we do not forget it is a new large solid propellant booster system that provides rapid access to Earth orbits of several thousand pound payloads. It is something that we need in our inventory whether or not it ever has a warhead on it.

I just hope as you proceed through this kind of a brain dance on trying to defense this or that that you keep in the back of your mind a little bit that there are other kinds of purposes for this kind of booster system besides weapons delivery, and it is in our national interest in many different ways to have additional options that are provided by boosters of this kind as we deal with problems we know about and problems we do not know about.

So I presume this amendment is going to be accepted under the assuances we heard. But I do detect a tendecy here to forget that MX as a booster has values well beyond those that would be served as a weapons system.

Mr. STEVENS. I merely state to the Senator from Colorado that the executive branch, the President's advisers, state this is consistent with the compromise we reached. We are grateful to the Senator for keeping that consistency, and we are ready to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado.

The amendment (UP No. 1518) was agreed to.

Mr. HART. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. It is my understanding that we now revert to the amendment of Senator Cohen.

EIS ENVIRONMENT IMPACT STATEMENT

Mr. HART. If I may just have one additional moment, concern has been expressed about the last paragraph of the so-called Jackson amendment of modification having to do with the environmental protection process, so-called EIS environmental impact stastement in the Jackson amendment.

I just wonder, may I ask the distinguished chairman of the Armed Services Committee, whether in his judgment that language we adopted last night in any way restricts or limits the effects of the so-called NEPA process of the environmental study process on actual deployment?

Mr. TOWER. In the view of the Senator from Texas it does not, and once a site is selected the provisions of NEPA would be fully complied with.

Mr. HART. Given that understanding in a common interpretation of that language, and given the fact that the Senate seems to be in agreement that is its interpretation, I will not seek to clarify it further.

Mr. STEVENS. I would say that the intent, as I understand it, was to make certain that the President's recommendation to Congress is not under the NEPA requirement, but we did not attempt to remove anything else but for that language.

Mr. HART. Well, that is my understanding and in the process of looking at alternative basing modes that each of those does not have to comply with

Mr. STEVENS. That is right.

Mr. TOWER. Obviously, any mode recommended to Congress which it authorized would be subject to NEPA.

Mr. HART. Unless Congress dictated otherwise.

Mr. TOWER. Unless Congress made an exception.

Mr. HART. Which we are not doing in the amendment.

Mr. TOWER. That is correct.

Mr. STEVENS. It is my understanding that the Senate automatically reverted to the amendment of the Senator from Maine.

Mr. DANFORTH. Mr. President, I ask unanimous consent that I might address a question to the assistant majority leader.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The question is in order.

Mr. DANFORTH. Mr. President, it seems to me on these defense matters we are proceeding at a reasonably leisurely pace. Many of us have amendments to offer to the bill in which we would be prepared to accept time agreements, which would be very, very short.

In my case it would be 5 minutes. I wonder if it would be possible to get into some of these other matters and take up some very brief questions?

Mine may or may not require a rollcall vote, depending on the disposition of the committee, but the debate itself

would be very, very brief.
Mr. STEVENS. Mr. President, I will state to the Senator there is no commitment as to the order of recognition. This Senator tried yesterday, as the Senator will recall, to establish a priority so that we could get the defense matters out of the way early, and that we would try to get to the others second in line and were unable to do so. We have just now come back to defense matters after having not been involved with them. I now yield the floor to the Senator from Maine, if I have answered the questions, so that we can get on with it.

Mr. TOWER. Mr. President, will the Senator yield to me? While we have been at this leisurely pace we have been disposing of amendments and doing it by voice vote, and we only

have two or three more.

It appears most of the amendments addressed to the bill were defense amendments, and we were trying to

get them behind us.

Mr. COHEN. Mr. President, I can terminate this debate rather quickly. Senator Percy has indicated that he and Senator LUGAR cannot come to the floor because of pressing business before the Foreign Relations Committee.

Let me just say, in conclusion, Mr. President, what has taken place with this recommedation coming from the President and Secretary of Defense is they have taken the decision out of the hands of the Joint Chiefs of Staff.

it is as simple as that.

They have taken the decision away from the JCS. Is that good or bad? Well, you have the former chairman of the Joint Chiefs who, upon his retirement, said that it was a mess, it needs reform, too much interservice rivalry preventing any kind of coordination, cohesion, coherency. The Secretary of Defense took the bold step to say, "Let us put an end to this fighting. Let us do what is right for this country. Let us recognize that we have a national interest, and let us have a decision that makes rational sense.

They did that. That is what we have before us, an affirmation by the President of the United States of a decision made by the Secretary of Defense, and upon the prompting of the members of the Armed Services Committee.

I see the distinguished Senator from Illinois is here, and I yield to him.

Mr. PERCY. Mr. President, I thank

my colleague.

Mr. President, I fully accept the military rationale for establishing the new U.S. Central Command. I was concerned, though, that in setting up this new command arrangement we be sensitive to the adverse political reactions that could be raised were a large, permanent U.S. military presence to be

deployed on land in this region. For this reason, I was gratified to receive a letter from Secretary of Defense Weinberger assuring me that the Departments of Defense and State would give special attention to this consideration and consult with the Congress, and the Foreign Relations Committee in particular, prior to establishing a forward headquarters element in the region for the U.S. Central Command.

With this assurance, I support the

adoption of the amendment.

Mr. President, I ask unanimous consent that the text of Secretary Weinberger's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE, Washington, D.C., December 9, 1982. Hon, CHARLES H. PERCY.

Chairman, Committee on Foreign Relations,

U.S. Senate, Washington, D.C. DEAR MR. CHAIRMAN: I want to follow up on a point regarding our efforts to activate a new unified command for Southwest Asia

as of January 1, 1983.

Although the headquarters for U.S. Central Command will be at MacDill Air Force Base in Tampa, Florida, in the future we would like to locate a forward element of the headquarters somewhere in Southwest Asia. We understand the sensitivities of this. Accordingly, the Department of Defense will work closely with the Department of State on this matter and I assure you that we will consult with the Congress, and your committee in particular, prior to establishing a forward headquarters element for U.S. Central Command.

I believe initiatives such as the new unified command are crucial for the protection of U.S. interests in Southwest Asia. I thank

you for your support.

Sincerely.

CASPAR WEINBERGER.

Mr. President, I would also like to indicate that it is my belief that the U.S. Naval Task Force which is now in the Arabian Sea should eventually be incorporated into this new Central Com-

This would further enhance the effectiveness of this new command. I hope that the Armed Services Committee will consider this suggestion next year.

UP AMENDMENT NO. 1519

Mr. COHEN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Senator Pryor has one more defense amendment and Senator Cohen has one more, and to my knowledge-

Mr. COHEN. Two more.

Mr. STEVENS. The Senator from Maine has two more.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maine. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER) and the Senator from California (Mr. HAYAKAWA) are absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 73, nays 25, as follows:

[Rollcall Vote No. 441 Leg.]

NOT VOTING-2

Havakawa Goldwater

So Mr. Cohen's amendment (UP No. 1519) was agreed to.

Mr. STEVENS. Mr. President, I yield to the Senator from Maine to make a motion to reconsider the vote.

Mr. COHEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. Mr. President, I move to lay that motion on the table. The motion to lay on the table was

The PRESIDING OFFICER (Mr. ABDNOR). The Senator from Alaska.

# FEDERAL ANTI-TAMPERING ACT

Mr. STEVENS. Mr. President, in order to clear the Tylenol bill, I ask that the Chair now lay before the Senate Calendar No. 981, S. 3048.

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (S. 3048) to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drugs, cosmetics, and other products with intent to cause personal injury, death, or other harm.

there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

#### UP AMENDMENT NO. 1520

(Purpose: To amend S. 3048 to alter the penalty for willfully and maliciously imparting false information)

Mr. STEVENS. Mr. President, I send an amendment to the desk on behalf of Senator LEAHY and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for Mr. LEAHY, proposes an unprinted amendment numbered 1520.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. 2 of the bill is amended by striking Section 1211(b) thereof and substituting therefor the following text:

"(b) Whoever, with willful and malicious intent, imparts or conveys or causes to be imparted or conveyed false information, knowing the information to be false, concerning an attempt or alleged attempt being made or to be made, to do any act which would constitute a violation of subsection (a) shall be punished-

"(i) if personal injury or death results to another, by imprisonment for any terms of

years or for life;

'(ii) if such conduct causes any person to be in sustained fear for his or another person's safety, causes any government agency or authority to direct a sale prohibition against, or recall of, any food, drug, device, or cosmetic, or causes any individual, partnership, corporation, or association to implement such prohibition or recall in response to such conduct, or causes other serious disruption to the public, by imprisonment for not more than 20 years or by a fine of not more than \$20,000, or both."

Mr. THURMOND. Mr. President. the legislation which is before us now, S. 3048, the Federal Anti-Tampering Act, is a response to recent events which have brought fear and disgust into the hearts and minds of us all. I am referring, of course, to the numerous cases of tampering with products intended for human consumption. The vulnerability of the public was dramatically and tragically brought home to us recently in Chicago, where cyanide was inserted into Tylenol capusules, placed on drug store shelves, and purchased by innocent consumers. This incident resulted in the death of several persons, including three from the same family.

The Chicago poisonings were rapidly followed by a series of "copycat" tamperings involving such things as acid in eyedrops and razor blades in packaged foods. The most recent serious incident reportedly occurred around Thanksgiving and involved serious

The PRESIDING OFFICER. Is injury from cyanide-laced Anacin capsules. There have also been reports of individuals fraudulently alleging that products have been adulterated in order to bring harm upon the manufacturers or sellers of the products who are forced to recall the merchandise and remove it from store shelves.

Mr. President, the heinous conduct which we have witnessed demands prompt action by the Federal Government. In order to deter this conduct and bring the full resources of the Federal Government to bear in apprehending and prosecuting the individuals who perpetrate these despicable crimes, I, along with the distinguished Senator from Delaware (Mr. BIDEN) introduced S. 3048, and 50 other Senators to date have cosponsored this measure.

This legislation invokes the broad commerce jurisdiction of the United States to make it a serious Federal crime to tamper with or adulterate foods, drugs, cosmetics, hazardous substances, or any other commodity designed for personal use, with the intent to harm individuals or businesses. Currently, adulteration is punishable by a maximum prison sentence of only 1 year or by a fine of \$1,000, or both, for a first offense and only by a maximum sentence of 3 years or by a fine of \$10,000, or both, for any subsequent offense. By making this crime a felony and by increasing the maximum penalties significantly, we hopefully will be able to deter those who contemplate such conduct.

The amendment of the able Senator from Vermont (Mr. LEAHY) is an improving amendment that is acceptable. It provides a more rational penalty structure for the crime of making malicious false statements concerning acts of tampering prohibited by other

parts of the bill.

By expanding the scope of Federal law in these areas, we will be better able to address the full range of product tampering conduct which the recent cases have demonstrated. In particular, we will be able to reach those situations where the tampering is undertaken or alleged in order to do harm to the public health and safety or to the reputation and goodwill of businesses.

Further, this legislation establishes severe penalties for violators. Those who engage in actual or attempted malicious product tampering or those who willfully convey false information about such tampering will face imprisonment of up to 20 years, or a fine of up to \$20,000, or both, and even a life sentence if death or injury results from the prohibited conduct.

By expanding the Federal antitampering laws and increasing the penalties for violations, we will be providing maximum protection to consumers throughout this country. The reprehensible poisonings which have occurred must be prevented if possible, but certainly punished severely. Only by increasing the deterrence factor can we hope to succeed in realizing this objective.

This legislation also is important in that it encourages the use of Federal resources in appropriate cases to capture and prosecute tampering criminals. Almost all of the products which are subject to possible tampering are manufactured for and shipped in interstate commerce. Because of this, it might be extremely difficult for one State to adequately investigate and prosecute a course of conduct carried out in one or more State, prior to the product being shipped to another State for distribution or final sale to consumers. Therefore, by assuring that the investigatory and prosecutorial resources of the Federal Government are available in all tampering cases, we will improve our ability to bring product tampering criminals to justice expeditiously.

Mr. President, surely all of my colleagues will agree that the product tampering activity which has occurred in recent weeks is a very serious problem. It can and has led to death, serious personal injury, and huge financial and intangible losses to the makers and sellers of the victimized products. It has brought fear and uncertainty to almost all of us who, up until recently, had great faith that the products we purchasd were fit for consumption. Because of the devastating impact that these events have had on consumers and businesses alike, it is imperative that the Congress take whatever action is necessary to protect consumers and restore their confidence in the safety of the products they purchase. S. 3048 will help achieve these results. I therefore urge my colleagues to join me and the distinguished cosponsors in voting for passage of this legislation with the Leahy amendment so that we may fulfill our responsibility to the Nation's consumers before this session of Congress expires.

Mr. President, although this legislation has previously passed the Senate and has been sent to the House as an amendment to H.R. 4481, the urgency of the need for this legislation prompts me to ask the Senate to pass S. 3048, as amended, by itself. In this fashion we can be assured that the House has every opportunity to join with us in enacting this badly needed legislation in this Congress.

Mr. President, the urgency of this matter was the subject of an editorial appearing in the December 14, 1982, issue of the Washington Times. I ask unanimous consent that a copy of the article be reprinted in the Congres-SIONAL RECORD following these remarks.

was ordered to be printed in the RECORD, as follows:

PASS THE THURMOND ANTITAMPERING BILL

The lame duck session will have turned out to be a stupid bird indeed if Congress doesn't pass Sen. Strom Thurmond's product-tampering bill. It comes in the wake of the Tylenol poisonings and the ensuing rash of copycat tampering with drugs. But this isn't the most important reason for the bill.

In fact, we generally oppose cluttering the books with new laws when old laws, if properly enforced, will do the job. True, it's only a misdemeanor under federal law to tamper with products. But this and other laws are enough to let the feds, with their vast resources, get involved in such cases. Which can then be turned over to the state authorities for prosecution under state laws against murder, attempted murder, intent to do serious injury, and so on.

But the Tylenol poisonings have sparked a nationwide wave of other serious acts that are costly to manufacturers (and therefore to consumers) and to everyone's peace of mind: People who do such things as stick razor blades in hot dogs and then sue the sausage maker for injury. Or who tamper with the eyewash or orange juice in order to give the maker a bad name. Or who falsely claim tampering or threaten to tamper with products for the "joy" of spreading panic.

Federal law doesn't touch such people. The Thurmond bill would let federal judges throw such convicted frauds into jail for 20 years and fine them \$20,000. The only problem we have with this is it isn't stiff enough. But it'll do for now.

. Mr. LEAHY. Mr. President, the antitampering bill before the Senate fills a large gap in the protection of consumers against purposely adulterated food, drugs, and cosmetics. The crimes that have prompted our immediate attention to this problem do more than threaten and harm individuals. They eat away at the trust between members of our society. They threaten our sense of community.

I commend Senators Thurmond and BIDEN for their fast and thorough work on this bill. I am proposing an amendment that would create separate and appropriate penalties for those who disseminate false information leading to personal injury or death and those whose false information causes product recalls and disruption, but no death or injury.

An earlier draft of my amendment had created a third category for those whose lies did not result in direct and palpable harm, with a smaller penalty to accompany such offenses. While I still believe that maliciously inspired false information about tampering should be penalized, even if the perpetrator is lucky enough not to be believed, I have struck this language from my amendment, because of concern on the House side about limiting the false information offense. Under my present amendment language, only maliciously inspired information that causes death, injury, or property loss criminalized. The reasoning is almost exactly the same as the reason

There being no objection, the article turning in a false fire alarm is illegal everywhere in the country.

> This amendment should answer potential critics of the bill in the House or the Senate who might have regarded the penalties in the original text as excessively harsh where false information is transparently false and results in no harm.

> I believe that Senators of both parties concerned with this bill have cleared this amendment, as have the industry groups supporting its pas-

> I hope that the Senate and the House take prompt action on this legislation. Our lives and peace of mind are at stake.

> Mr. BRADLEY. Mr. President, earlier this year, this Nation was terrorized by a series of incidents involving tampering with various over-the-counter drug products. What began as one bizarre series of deaths in Chicago sadly spread throughout the country. Such tampering is reprehensible. Alteration of a drug product obviously threatens the health and safety of anyone using that product. In addition, such tam-pering creates widespread fear and undermines public confidence in all overthe-counter drugs. The wave of drug tampering that swept the country threatened an important part of our health care system. We must try to prevent any recurrence.

> The industry has done its part. Manufacturers have redesigned their drug packages to insure that they cannot be easily opened or opened. The Food and Drug Administration has also done its part by establishing Federal for requirements tamper-resistant packaging of most over-the-counter drug products. Now we must do our part by approving the Federal Anti-Tampering Act so that drug adulteration becomes a Federal crime carrying strict penalties.

> The freedoms of our open society require all individuals to act in a responsible manner. Those who would abuse these freedoms should have no doubt that such abuse will be punished and punished severely.

> Mr. STEVENS. Mr. President, I move the adoption of the Leahy amendment.

> Mr. LONG. Mr. President, may we have an explanation of this matter?

> Mr. STEVENS. This is the Tylenol bill, a Federal antitampering act, in order to deal with the situation that resulted concerning Tylenol. It has been cleared on a unanimous-consent basis.

> Mr. President, I ask for consideration of the Leahy amendment.

> The PRESIDING OFFICER. The question is on agreeing to the Leahy amendment.

> The amendment (UP No. 1520) was agreed to.

Mr. STEVENS. Mr. President, I ask for immediate consideration of the bill, as amended.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3048

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Anti-Tampering Act.'

"SEC. 2. Title 18, United States Code, is amended by adding the following new chap-

#### "Chapter 56-ADULTERATION

# "8 211. Malicious injury by adulterating a product

"(a) Whoever, with intent to injure, kill, or endanger the health or safety of any person, or with intent to cause damage or injury to the business reputation of an individual, partnership, corporation, association, or other business entity (1) does any act which results in a food, drug, device, or cosmetic being adulterated or attempts to do any such act or (2) tampers or attempts to tamper with any hazardous substance or any other article, product, or commodity of any kind or class which is produced or distributed for consumption by individuals or use by individuals for purposes of personal care or in the performance of services rendered within the household, if such act of adulteration or tampering occurs before the food, drug, device, cosmetic, hazardous substance or other article, product or commodity is introduced or delivered for introduction into interstate commerce, while such item is in interstate commerce, while such item is held for sale (whether or not the first sale) after shipment in interstate commerce or if such act of adulteration or tampering otherwise affects interstate com-merce, shall be punished by imprisonment for not more than twenty years or fined not more than \$20,000, or both, or, if personal injury or death results to another, by imprisonment for any term of years or for life.

'(b) Whoever, with willful and malicious intent, imparts or conveys or causes to be imparted or conveyed false information, knowing the information to be false, concerning an attempt or alleged attempt being made or to be made, to do any act which would constitute a violation of subsection (a) shall be punished-

'(i) if personal injury or death results to another, by imprisonment for any terms of

years or for life;

'(ii) if such conduct causes any person to be in sustained fear for his or another person's safety, causes any government agency or authority to direct a sale prohibition against, or recall of, any food, drug, device, or cosmetic, or causes any individual, partnership, corporation, or association to implement such prohibition or recall in response to such conduct, or causes other serious disruption to the public, by imprisonment for not more than 20 years or by a fine of not more than \$20,000, or both.

"(c) As used in subsection (a), 'food,' 'device,' 'cosmetic,' and 'adulterated' shall have the meanings ascribed to those terms in the Federal Food, Drug, and Cosmetic

Act, as amended (21 U.S.C. 301-392); 'hazardous substance' shall have the meaning ascribed to the term in the Federal Hazardous Substances Act (15 U.S.C. 1261(f)).

SEC. 3. If any provision of this Act is held invalid, all valid provisions that are severable shall remain in effect. If a provision of this Act is held invalid in one or more of its applications, the provision shall remain in effect in all of its valid applications that are severable.

SEC. 4. The analysis of part I of title 18, United States Code, is amended by adding the following:

'56. Adulteration ...... 1211".

Mr. STEVENS. Mr. President, move to reconsider the vote by which the bill passed.

Mr. JEPSEN. I move to lay that

motion on the table.

The motion to lay on the table was agreed to.

# FURTHER CONTINUING APPROPRIATIONS, 1983

The Senate resumed consideration of the bill.

Mr. STEVENS, Mr. President, to my knowledge, there are two amendments left in the defense area.

The PRESIDING OFFICER. Will the Senator suspend for one moment? The Senate will be in order so every-

one can hear

Mr. STEVENS. Mr. President, to my knowledge, there are but two amendments in the defense area. We have two of them that have been combined and worked out. I would like to yield to the Senator from Texas for the purpose of his amendment, which we will accept, and then yield to the Senator from Arkansas for his amendment, which, to my knowledge, will be the last one in the area, unless the Senator from Maine wished to raise the battleship amendment.

Mr. COHEN. Will the Senator with-

hold that just for a moment?

Mr. STEVENS. The Senator reserves that right.

CANNON. Will the Senator yield?

The Senator is bypassing me now. I certainly have an amendment in the defense area

Mr. STEVENS. I say to the Senator, I made a list and his name was not on the list. I apologize. We have been dealing with this list we made some time ago and-we have incorporated, I understand, the F-16 matter that the Senator was going to raise in the amendment that we will accept.

Mr. CANNON. That is fine. If the

Senator is willing to incorporate it and accept it, I am all for it. Otherwise, I

want to be protected.

Mr. STEVENS. I say to the Senator and to the Senate that by virtue of a series of reductions in the bill and a series of increases, which the Senator from Texas will explain, we are prepared to take this amendment as one that does not alter the balance of the bill budgetwise.

But again, Mr. President, I yield to the Senator from Texas for the purpose of offering an amendment.

Mr. TOWER addressed the Chair. The PRESIDING OFFICER. The Senator from Texas.

UP AMENDMENT NO. 1521

(Purpose: To modify amounts available for Department of Defense activities)

Mr. TOWER. Mr. President, this should not take long. As I indicated earlier. I intended to offer an amendment that would delete from the bill all of the funds and programs not authorized or in every instance where the appropriation was greater than what was authorized by the Senate in the defense procurement bill.

I have had some discussions with the distinguished Chairman of the Defense Appropriations Subcommittee, and I understand his problem very clearly in having to maintain some negotiating position and some negotiating leverage with the committee in the House. Therefore, I am offering an amendment that will result in total net savings of \$356 million, because this money will come from items for which there was no authorization or in which the appropriation was in excess of the authorization.

I think that represents a substantial savings. I hope the Senate will accept it. We have added two items that some Senators are interested in-leadtime for the F-16 and money for the HARM missile, which is the only antiradiation missile that both the Air Force and the Navy have. It is the only thing they can use to defeat enemy radar. We feel it was an oversight that that money was not includ-

ed.

The net savings will be \$356.6 million. As I say I intended earlier to address my amendment to all matters where appropriation was in excess of authorization because I believe that the authorization process should be the principal guide for the Appropriations Committee. I think this is a matter that the Senate is going to have to address itself to, not just from the standpoint of defense appropriations but other appropriations as well.

But I do not think on the floor tonight is the appropriate time or place to get into a discussion of this issue.

Mr. STEVENS. Will the Senator

yield at that point?

Mr. TOWER. I yield. Mr. STEVENS. Mr. President, I want to thank the Senator for that attitude. We have tried to work out a dispute between the two committees. Essentially, what we have done is we have deleted from the Senate bill the items that were in the House bill and maintained the items that were in the Senate bill so they will be in conference with a couple of exceptions, one of which we have changed \$100 million on the C-17. We had \$200 million for the C-17. We are advised that \$100 million is the maximum rate that they could spend, and we have taken the amendment of Senator Cannon and folded it into this so that we in effect use up the money that has been deleted by the amendment of the Senator and shifted it to the amendment of Senator Cannon, which we were prepared to accept anyway. So I endorse this amendment.

Mr. BUMPERS. Will the Senator from Texas yield?

Mr. TOWER. I yield.

Mr. BUMPERS. The Senator alluded to a missile which is a radar-destroying missile. I did not get the name of it.

Mr. TOWER. HARM. It is called HARM. It is an anachronym that stands for high-speed antiradiation missile. It is a missile that hones in on the anti air defense area.

Mr. BUMPERS. Is that missile now deployed?

Mr. TOWER. That missile is not deployed

Mr. BUMPERS. It is still in the research and development stage?

Mr. TOWER. It is still in the R&D stage. The only deployment is for test and evaluation purposes.

Mr. BUMPERS. I thank the Senator.

Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas has the floor.

Mr. LONG. Will the Senator yield? Mr. TOWER. I yield.

Mr. LONG. Mr. President, I should like to know what the amendment is. I have inquired at the desk. There is no copy of it. Could I see a copy of it?

Mr. TOWER. The amendment was sent to the desk.

Mr. LONG. I would like to see it.

Mr. TOWER. I will hand it to the Senator from Louisiana.

Let me tell the Senator what it does. It deletes some \$64.2 million for C-2, some \$328.3 million for A-10, some \$100 million for C-17. It adds \$82 million for the F-16 and then adds \$53.9 million for the HARM missile. And what it does is to add in some items for which there is no appropriation, but for which there is an authorization and takes out some items for which there is an appropriation, but no authorization.

Mr. LONG. I will take it on faith. I thank the Senator.

Mr. TOWER. I appreciate that, and I know that the Senator from Louisiana is a man of deep faith. Indeed, most people living in Louisiana do have very great faith in a number of things.

The PRESIDING OFFICER. The amendment will be stated by title.

The bill clerk read as follows:

The Senator from Texas (Mr. Tower) proposes an unprinted amendment numbered 1521.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with. It has been explained.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 9, line 20, after the word "law", insert the following:

"Provided, That, expenditure for the following program for the fiscal year 1983 shall not exceed the amounts specified for such programs below:

Aircraft procurement, Navy-funds for C-2 aircraft, \$203,600,000.

Aircraft procurement, Air Force-funds

for A-10 aircraft, \$29,000,000.

Aircraft procurement, Air Force-funds for F-16 aircraft, \$2,016,900,000.

Missile procurement, Air Force—funds for AGM-88A HARM missile, \$112,500,000. Weapons procurement, Navy—funds for AGM-88A HARM missile, \$127,000,000.

Research, development, test and evaluation, Air Force—funds for C-17 aircraft, \$100,000,000.

Provided further, That the amounts available for obligation and expenditure for the following accounts in the Department of Defense Appropriations Act, 1983 (S. 2951) shall not exceed the amounts specified for such accounts below:

Aircraft procurement, Navy, \$10,585,900,000.

Aircraft procurement, Air Force, \$17,329,200,000.

Missile procurement, Air Force, \$5,926,500,000.

Weapons procurement, Navy,

\$3,537,500,000. Research development, test and evalua-

tion, Air Force, \$10,735,468,000.

Provided further, That funds made available by this joint resolution for operation and maintenance, Navy, shall be available in such amount as may be necessary, not in excess of \$29,000,000 for the operation of five additional naval vessels of the Landing Ship Dock (LSD)-28 class of ships."

Mr. CANNON addressed the Chair. The PRESIDING OFFICER. The Senator from Nevada.

Mr. CANNON. Mr. President, Senator Goldwater and I were cosponsoring the amendment as a part of this proposal to increase advance procurement funding for the Air Force's F-16 fighter aircraft. That amendment was directed to what we both perceived to be a central problem with the fiscal year 1983 defense program.

Even though spending overall for defense will show substantial real growth in 1983—and much of this real growth is in the procurement accounts—the actual number of Air Force fighter and attack aircraft bought will be less than that bought in every year since fiscal year 1974.

Mr. President, our tactical air forces do not fight with budget authority. They fight with hardware. But, unless something is done, they will continue to receive fewer airplanes than they need to replace losses from accidents and to retire obsolete aircraft. The Air Force needs to procure about 250 fighter and attack aircraft each year just to maintain its current force level

at an acceptable level of moderniza-

Mr. President, the Air Force has not procured that number in many years, and for next year, fiscal year 1984, they forecast a procurement level of only 180 such aircraft. This is simply not acceptable if the United States is to maintain the position of world leadership it enjoys with its tactical air forces.

Mr. President, I propose that \$82 million be added to the bill now before us for advance procurement funding for the F-16 fighter aircraft to allow the Air Force to change direction in its procurement of fighter aircraft in fiscal year 1984. This investment makes sense. It is directed toward the Air Force's low-cost fighter so that more aircraft can be obtained for the dollars spent—to increase the projected fiscal year 1984 procurement level for the F-16 to 150 aircraft rather than 120.

Mr. President, the House and Senate conferees on the fiscal year 1983 Defense Authorization Act specifically endorsed higher production rates for the F-16 through increased funding for advance procurement for fiscal year 1983. Further, the leadership of the Air Force, recognizing the adverse implications of current procurement levels of fighter aircraft for the future well-being of its tactical forces, fully supports this investment.

Mr. President, I ask my colleagues to support this initiative simply because it is a sensible way to attack a problem that threatens an area where the United States now enjoys a clear military advantage. We should not lose this advantage before we act.

# THE HARM MISSILE PROGRAM

I may say, Mr. President, that I also support the proposals that the distinguished Senator made insofar as the Harm missile is concerned. I think it is a very key asset to provide our tactical air forces a modern weapon to engage hostile surface-to-air defenses.

Mr. President, Gen. Kelly Burke, former Deputy Chief of Staff of the Air Force for Research, Development and Acquisition, writing in the December issue of the Armed Forces Journal, stated:

The central theme—the very core—of the decisive air battle in Lebanon was electronic combat. The destruction of the Syrian SAM sites in the Bekaa Valley, followed by the wholesale devastation of the Syrian Air Force, was accomplished with minimal loss of Israeli aircraft—surely, an air battle that will be a textbook example for years to come.

Mr. President, electronic combat is the combat of the future, and I want to insure that our tactical air forces are equipped to prevail against the surface-to-air missile defenses that today are the most serious threat an enemy can pose to our fighter and attack aircraft. To that end, we propose a partial restoration of appropriations for the high-speed antiradiation (HARM) missile that will provide our tactical air forces a modern weapon to engage hostile surface-to-air defenses.

The Navy and the Air Force jointly requested \$336.6 million to procure 414 of these missiles and to establish a second source of production to control production costs. The Armed Services Committees supported the requested level because of the importance of this program.

Mr. President, I recognize that the Appropriations Committee has had the difficult and unenviable task of having to make cuts to authorized levels in the fiscal year 1983 defense program in light of budget ceilings, but I believe that this is the wrong place to make cuts. The Appropriations Committee cut \$150 millionover 40 percent of the \$337 million requested and authorized-from Harm procurement for fiscal year 1983. I propose that \$52.9 million-about onethird of the cut-be restored to allow this missile to be procured at an efficient rate of 20 per month. Specifically, \$31.2 million would be added to Weapons procurement, Navy" and \$21.7 million would be added to "Missile procurement, Air Force."

In urging the adoption of this amendment, I would like to close by quoting once more from General Burke's article:

A successful battle is the product of many parts, and it is easy to be misled by focusing narrowly on any single factor. Nevertheless, it is instructive to contrast the overwhelming success of the Israeli Air Force in 1982 with the enormous difficulties that same Air Force experienced in the Yom Kippur war of 1973—a war in which the Israelis lost 150 aircraft in the first 3 days alone. \* \* It's clear that the major improvement to the Israeli Air Force in the intervening years was in its ability to wage electronic combet.

I support my chairman and I hope the Senate will approve this proposal.

-Mr. TOWER. Mr. President, I think this would be the appropriate time for me to express my deep gratitude to the distinguished Senator from Nevada for the splendid work that he has accomplished on the Armed Services Committee.

As the ranking member, at one time chairman of the Tactical Air Systems Subcommittee, he was the person who organized these systems. He has been one of the most knowledgeable men we have had on the committee, not just in tactical air systems but other systems as well. He has been enormously helpful to me. I appreciate his letting me steal his amendment and offer it tonight as mine.

Mr. CANNON. I thank my chairman.

Mr. STEVENS. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP amendment

No. 1521) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote.

Mr. TOWER. I move to lay it on the table.

The motion to lay on the table was agreed to

Mr. STEVENS. Mr. President, there is one other amendment that I know of, one by Senator PRYOR.

#### UP AMENDMENT NO. 1522

(Purpose: To delete funds appropriated to Air Force for procurement of the AGM-65D Maverick missile)

Mr. PRYOR. Mr. President, I have an amendment that has just been sent to the desk. I ask for its consideration.
The PRESIDING OFFICER. The

amendment will be stated. Mr. STEVENS. Mr. President, we would be glad to have a time agree-

ment on this.

The PRESIDING OFFICER. The amendment attempts to amend an amendment that was already agreed to, so it will take unanimous-consent to consider it.

Mr. RUDMAN. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The

Senator will state it.

Mr. STEVENS. Mr. President, if that happened, it has happened in error. We did give assurance to the Senator from Arkansas when he stood aside before that his amendment would be considered, I ask unanimous consent that it be in order.

The PRESIDING OFFICER. Is

there objection?

Mr. LONG. Mr. President, reserving the right to object, could I know what the amendment is, please?

Mr. STEVENS. It is a Maverick mis-

Mr. LONG. Then I shall not object, Mr. President.

The PRESIDING OFFICER. Without objection, the amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an unprinted amendment numbered 1522.

On page 10, line 2, strike out the period. and insert in lieu thereof a colon and the following: Provided further,

(1) the sum appropriated for Missile Procurement, Air Force is \$5,659,500,000;

(2) none of the funds appropriated in this joint resolution may be obligated or expended for the procurement of any AGM-65DD Maverick missile.

Mr. RUDMAN. Mr. President, may I inquire of my friend from Arkansas if we may have a time agreement?

Mr. PRYOR. I suggest we have 10 minutes on a side, a total of 20 minutes. I also suggest, though, that may be a leadership suggestion, that we have a 10-minute rollcall. Maybe that can come later.

Mr. PROXMIRE. Would the Senator also add that there be no secondary amendment in order?

Mr. PRYOR. I also ask that there be no secondary amendment allowed.

The PRESIDING OFFICER. there objection?

Mr. CANNON. Reserving the right to object, may we know something about what the amendment is before we make a decision as to whether or not we will object to it?

Mr. PRYOR. I am getting ready to

explain it, Mr. President. Mr. CANNON. The Senator can make the request after he explains it.

Mr. PRYOR. I say to my friend this is an amendment to leave \$5 million in the program for research and testing for the Maverick missile and to take out \$245 million for the actual production of that missile. That is the gist of this amendment that I am now pro-

PRESIDING OFFICER. Is The there objection to the time limitation

agreement?

Without objection, it is so ordered. Mr. RUDMAN. A parliamentary inquiry.

The PRESIDING OFFICER. Is there objection to the time agreement? If not, it is so ordered to that also.

Mr. PRYOR. Mr. President, I do ask unanimous consent that the time just preceding not be deducted from either

Mr. ZORINSKY. Mr. President, reserving the right to object-

CANNON. Mr. President, should have to object to that request right now. All I want is some fair opportunity to respond to that proposal.

Mr. PRYOR. Mr. President, I would be pleased for the Senator to respond, but I do think I have to explain the amendment first. I am prepared to do that now. I just did not want all this preliminary discussion to be charged to my side.

Mr. CANNON, I just want to be sure I have some opportunity to respond.

Mr. PRYOR. I certainly-

ZORINSKY. Reserving the right to object. Mr. President, could the Senator include that there be no amendments in the first or second degree?

Mr. PRYOR. I ask unanimous consent that there be no amendments in

the first degree.

The PRESIDING OFFICER. That would be part of the agreement. It has been agreed to.

Who yields time?

Mr. PRYOR. Mr. President, I hope you can bear with me one more time on the continuing resolution. I shall be very brief, and I shall entertain any questions that any of my colleagues have.

We have heard a great deal about the MX missile. But there is one missile we do not hear a great deal about.

This is because it has been in the planning and research stage for a number of years. I am referring the Maverick missile. It is a missile whose purpose is to serve as an air to ground antitank missile. Its early development came during the latter stages of the Vietnam war. At the conclusion of that war or nearing the end of that war, there was testimony, if I am not mistaken, before one of the committees of the Congress, which urged this country not to go forward with production of the early Maverick missile.

That was what they called the Maverick TV missile. The one under question today is the one called the IR missile, missile with an infared seeker.

I say to my colleagues I am not on the Armed Services Committee nor on the Appropriations Subcommittee on Defense, and I am not an expert. But I have seen the General Accounting Office report on this missile. It attracted my attention, and I have tried to do some study on my own. In fact, I became so interested in the Maverick missile that on November 15, I took the opportunity of going to Eglin Air Force Base in Florida. I met the test pilots, had lunch with them, met the manufacturer of this missile, the company with the contract. I must say that after a very enjoyable day at Eglin, looking at the development of this missile, I came away from there concluding nonetheless that I did agree with the General Accounting Office report that this missile is not ready for production.

Mr. President, for some time, I have been concerned about the Defense Department's failure to adequately test, under realistic conditions, its expensive new weapons systems. I have also been concerned that when weapons fail even the limited and often unrealistic tests that are performed, there are efforts, usually successful efforts, to go ahead and produce the weapons system anyway.

As many of my colleagues know, I introduced legislation earlier this year to establish a new operational testing office at the Pentagon to improve weapons testing activities and assure greater accountability for procurement decisions and weapons performance.

My concern is not an abstract philosophical principle-I am concerned about the lives of Armed Forces personnel who rely on our exotic new weapons. I am concerned about pilots, soldiers, sailors, and marines whose lives are jeopardized when unreliable weapons are sent into combat.

One clear example of a weapon system that is too flawed for production is the IR Maverick.

If we had unlimited funds, then perhaps it would be worth the time and dollars necessary to fix this troubled weapon. But time and money are limited—as is the patience of taxpayers and the only responsible step now is to do as the House has done in cutting out production funds.

I am introducing an amendment to delete the production funding for the IR Maverick, not because I don't think that we have a need for such a weapon system, but rather because I am not satisfied that this system works well enough to meet the need. I am not the only one who is not satisfied. The GAO in a report that was issued earlier this year stated that the Maverick had many operational problems that have not been answered. Evidently the GAO concerns convinced the House of Representatives of the flaws in this system because the negative House Appropriations Committee report specifically cited the GAO report.

I regret that this issue must be raised in the context of a continuing resolution. Unfortunately, since this resolution continues for the entire 1983 fiscal year, I have no alternative. Otherwise, Congress may go ahead and fund production activity that has been deleted by the House and never considered by the full Senate. And this is a \$6 billion program. I wonder how many other programs like the Maverick are "slipping through the cracks" with this continuing resolution.

In its report the House Appropriations Committee said:

IR Maverick has been in development since 1974. In June 1982, GAO issued a report with the self-explanatory title: "Critical IR Maverick Issues Remain Unresolved after Five Years of Operational Testing." Committee is aware that technical problems are being addressed, and that attempts are being made to effect cost reductions. Nevertheless, the Committee notes that it was a series of test failures which led to program restructuring and to postponement of a production decision. It notes further that the 200 pilot production missiles will be used for follow-on test and evaluation under operational conditions, and for an operational utility evaluation. Results of these efforts will not be available until 1984. Under these circumstances, the Committee concludes that additional procurement of IR Maverick at this time is unjustified, and recommends that no funds be provided.

Last May I asked the General Accounting Office to conduct a study of Department of Defense operational testing. The GAO separated the inquiry, and released a report dealing solely with the Maverick. The report entitled "Critical IR Maverick Issues Remain Unresolved After Five Years of Operational Testing," was released June 25, 1982. The GAO Conclusions and Recommendations are quoted here in full:

# CONCLUSIONS AND RECOMMENDATIONS

Evidence is lacking that the IR Maverick missile system can be successful in missions it is proposed for—namely, situations of close-air support and preplanned interdiction. In particular, the operational tests of the IR Maverick have revealed a number of deficiencies that should be corrected. The

following questions must be answered if we are to be assured that the IR Maverick program is worth the more than \$4.9 billion it is estimated to cost:

Can the IR Maverick pilots navigate to an initial point over enemy territory at low altitude, at night, and in poor weather?

Is the IR Maverick pilot workload in

Is the IR Maverick pilot workload in single-seat aircraft flown in poor weather a problem?

Can pilots find valid targets in unfamiliar

Can pilots find targets in the absence of unique visual cues, as happens in poor weather?

Does the IR Maverick's long employment range seriously handicap the differentiation of enemy tanks from friendly tanks given the differences in their thermal signatures?

Can the problems of breaklock known to be caused by inadvertent and intentional countermeasures under test conditions be corrected?

We believe that the results of the operational testing of the IR Maverick do not yet show sufficient success to warrant moving from development to even limited procurement of the missile. It is by no means clear that this weapon is ready for effective use by U.S. military personnel in combat. We recommend that more testing be done to solve the problems that our questions raise regarding deficiencies in the operational capabilities of the IR Maverick. Even limited procurement requires more evidence of success in testing and evaluation than is currently available with respect to this missile.

The Department of Defense's written response 4 months later acknowledged that "several operational issues remain unresolved." In the meantime, on September 29, DOD approved spending \$160 million to produce 200 missiles.

The GAO report contained several criticisms of testing procedures. At one particular test the pilots were briefed in advance and knew what to look for. At many tests the pilots flew in a small, familiar target area. At other testing areas the same pilots flew repetitive training and testing missions. again in small and unique target areas. Often there were unique visual and thermal cues. The same pilots often participated in different tests. Most test scenarios included no friendly tanks, only enemy tanks, despite the fact that the Maverick may be used in proximity to friendly forces.

The GAO report also contains many questions about use of the missile itself. It is not clear, for example, that pilots relying on the missile can find the target area at night or in adverse weather. The tests had not shown that the missile could not be deceived and defeated by objects such as sunwarmed rocks or burning battlefield wreckage. It is not clear that pilots can distinguish a friendly tank from an enemy tank. Test results do not show the effect of deliberate countermeasures on the plane or the missile. The workload involved in operating the systems might be too great for a single pilot. The ability of pilots to navigate to a launch point over enemy territory at low altitude, at night, and in poor weather had not been tested. The recognition system had not been finetuned for problems. In general, some potentially serious handicaps to the pilots' ability to successfully deploy the missile under realistic battlefield conditions exist. These unanswered questions mean that further testing is necessary before the Maverick can be considered operational.

After the release of the GAO report, other potentially serious concerns relating to engineering design changes have been raised. I understand that as the program enters production, some major design changes are being introduced. Several serious questions related to these proposed changes should be addressed before any full-scale procurement decisions are made.

Satisfactory answers to these questions may be possible and I have asked GAO to do a followup study to see whether new tests or corrections have adequately responded to the weaknesses. Until these questions are answered, the full-scale production decision scheduled for February 1, 1982, should be postponed.

The cost growth of Maverick presents another strong reason to dolay further production decisions. In May the Air Force was planning to pay \$2.97 billion for 42,275 Maverick antitank missiles in fiscal years 1984-88. Revising the plan in September, the Air Force foresaw paying the same \$2.97 billion but for 12,025 fewer Mavericks. This makes the cost of the entire program rise from \$4.9 billion to \$6.2 billion, a cost increase greater than any other major weapon system.

The Maverick has not shown the ability to be a reliable, cost-efficient addition to our weapons arsenal. We need to be sure that the Maverick will be operationally suitable and effective before producing significant quantities. Today, we have no such guarantee. Therefore the production must be delayed pending further test results and production funds deleted.

We should concur in the position stated by the House Appropriations Committee:

When documented test and analysis results are available which prove the utility of IR Maverick as a cost-effective tactical weapon system, the Air Force may wish to restate a request for production funds.

Somewhere between here and Albuquerque, N. Mex., is the most recent Air Force Test and Evaluation Center—AFTEC—report on the Maverick missile. I am told that this report contains the same information that Dr. DeLauer used to make his decision to go ahead with limited production the Maverick. That report was due to be made available before the expiration, December 15, 1982, of the current continuing resolution. Unfortunately, it has not yet arrived.

I recently made a trip to Eglin Air Force Base to take a first-hand look at a TV Maverick and a GBU-15, a glide bomb that has the same kind of seeker that a Maverick missile has. I can not tell you how impressed I was with the officers and the technicians that I met there. They are a group of totally dedicated people, real professionals who believe in their job and believe in their country. That trip left me with a renewed feeling of security about the men and women who make up our Armed Forces.

But I want to tell you a little story about what happened with the equipment during this trip. A special demonstration of a TV Maverick and a GBU-15 glide bomb had been set up for me. When we got out to the two F-4 aircraft we discovered that the TV Maverick was not functioning correctly. At least I was able to get in the back seat of an F-4 and take a look at how the IR seeker on the glide bomb worked. However, the actual flight test had to be scrubbed because of an hydraulic failure on one of the F-4's. When things like this happen, I get concerned that we are so willing to fund enormous sums of money for untested and unproven weapons systems, and yet, at the same time, we ignore fundamental operational and maintenance funding to keep our forces and equipment in proper operating condition.

Again, I'm not questioning the need for an antitank system. All I want to be sure is that we end up with one that works. And if there are questions about a weapons system that need to be answered, then why are we going ahead with the production of this system? Why are we all so willing to put into the field a system that may not work and may in fact endanger

the lives of our men?

Why can we not get some solid answers out of the Department of Defense to the concerns that the GAO has raised about this particular weapons system?

The first and last responsibility that we owe is to the men and women who will use this system; the human factor is this equation, the factor that you cannot put a dollar figure on.

I urge you to give my amendment your most careful consideration.

The other body, the House of Representatives, took this report and the reports of some of the test pilots who actually flew and deployed this particular missile and in their wisdom decided that, yes, they would include \$5 million for research, but they would delete \$244.9 million for its production.

So, Mr. President, here is what we have. We have a missile that is, I think, inferior, that has been operationally tested to the dissatisfaction of some of the pilots, and a missile which I do not think meets the test of a good operational test situation. We have very substantial evidence to back up this whole concern.

We also are concerned today about another aspect of this missile, that we are looking not at just the \$250 million program that we see in the fiscal 1983 budget.

Mr. President, could I please have order?

The PRESIDING OFFICER. The Senate is not in order.

The Senate will be in order so everyone can hear.

Mr. PRYOR. I thank the President. We are not just looking at a \$250 million program. We are looking at a \$6.1 billion program over a period of 5 years, representing the research and the production of this particular missile.

We are also looking at a missile which attracts itself to heat but cannot distinguish between an American tank on the ground and a Russian tank on the ground. Oftentimes, in these tests the missile was attracted to a heat source that could have been a burnt object which could have been one of our own tanks, or a bonfire, or a rock still warm from the afternoon

We are now awaiting a report which was due to Congress by December 15 from the Air Force Test and Evaluation Center.

So on this particular evening, one of the last evenings of our session of Congress, I hope, we are about to commit ourselves in this production money to a \$6.2 billion program, knowing full well that the evidence supports the concern evidenced by the operational tests that this missile is not ready for production.

Mr. President, I do have other facts and a few more thoughts that I will add at a later time. I have consumed, I think, around 5 or 6 minutes.

I am glad to yield at this time to the manager of the bill.

The PRESIDING OFFICER. The Senator has used 61/2 minutes.

Mr. RUDMAN. Mr. President, I yield myself 5 minutes.

Mr. President, I think in order to discuss the matter within the time that we have agreed we have to cover a few salient points so we understand what we are all talking about because the Maverick missile to those people in this Chamber not involved in defense appropriations or armed services probably is only a name. The Maverick missile is an antitank weapon carried by tactical fighter aircraft designed to penetrate well into enemy lines and fire conventionally. That is the way it is operated now.

Obviously land war is conducted at night. It is conducted in bad weather. It is conducted in fog.

So the idea was set forth with the improvement in infrared cursors to incorporate some of those devices into this missile and to see whether or not it in fact could work.

I agree with the Senator from Arkansas that the test results had been spotty over some period of time. As a matter of fact, the chart of those test results is very interesting, and I wish we had an overhead projector, but it essentially shows what most test results show and that is a great number of failures and a new system which was under R&D at the beginning of that system. Unfortunately, here in Congress we quite often go after these weapon systems based on information that is stale.

I submit that although the Senator from Arkansas raises some interesting points, the points to some extent are contradicted by current information.

Mr. President, let me give you an example of what I am speaking to.

In August 1982 the Air Force ran tactical tests with 26 launchers, under all adverse night and day conditions at extreme altitudes and extreme ranges. Twenty direct hits were scored. Four hundred and fifty hours of operational and development flight testing against many high valued targets were conducted. The misses were identified as those misses were caused by hardware and software problems which have been corrected and verified in flight tests.

Now, the fact of the matter is that there is nothing particularly high tech about hooking an infrared sensor on the front of a projectile and directing it to a target. That is technology which is 20 years old. To mate it with this particular missile had other technical problems.

I am satisfied from the information that our committee has received that this missile is now ready for limited production and all we are talking about is moving out on a production rate of somewhere, I believe, correct me if I am incorrect, somewhere about 200 missiles under pilot production and if, in fact, those problems have been ironed out, then we will move to 150 per month.

Why do we feel it is important not to delay further? The first line of attack against Soviet armor is tactical air. Tank to tank is the second line of defense. And the last line of defense is the small light antitank weapon such as a Viper which this Senate and we hope the House of Representatives has now zeroed because it, in fact, is a

This particular weapon, it seems, is moving along nicely, and it is the position of the Defense Appropriations Subcommittee that we should go forward and obviously I would say to the Senator from Arkansas if after the production of the 200 over the next 6 to 8 or 9 months we continue to have problems, I would be the first to say let us put a halt to the program. But I really believe and I say this in all sincerity that the test results on which the Senator from Arkansas—

The PRESIDING OFFICER. The Senator's time has expired.

Mr. RUDMAN. Mr. President, I yield

myself 1 additional minute.

That the test results that the Senator from Arkansas is directing his comments to, although very valid, have been superseded in recent months, and it seems to me that we should give them a chance to prove that it works.

One further point: the Senator from Arkansas is absolutely correct. An infrared missile cannot tell an American tank from a Soviet tank. It never will be able to. However, the way they are employed, if they are in that proximity to each other the weapon that will be used will be tank against tank, not IR missile against tank. These planes will fly into the rear areas, into the main fly routes and attack vehicles coming on those routes. They will never be used unless by pure accident in the vicinity of American armor or other heat-giving vehicles.

Mr. President, I reserve the remain-

der of my time.

The PRESIDING OFFICER. Let me say to the Senator that the Senator from New Hampshire used 6 minutes. Mr. PRYOR. Mr. President, I wish to respond for a moment if I might.

First, apparently I do not have the same information that the distinguished manager of the bill has, and I would only say that if there is information that we have not been able to acquire at this point, that this measure or at least this production money should be moved to a later supplemental appropriation bill so that we can see where these contradictions might

Second, I wish to say that we are about to advance ourselves into a procurement project and buy a faulty system that we are going to be unable to correct. There is no way back. We are going to start spending a half billion or maybe a billion dollars in production and then stop in midstream and come back. What we have, I am afraid, I say to my friend, is another M-1 tank situation where we get in so deeply and cannot find our way back.

Third, we have seen in 4 months a 23-percent rise in the cost of the production of this missile. This is one of the highest cost escalations of any weapons system this country is now at-

tempting to purchase.

Finally, Mr. President, we are saying that this particular missile, because it has not been tested or has not met the standards of the proper testing procedure may end up killing not the Soviets, but our own men. I say to my good friend, the manager of the bill, I would like to quote from another section of the General Accounting Office report in response to the Senator's comments about the successful tests:

The results would have been worse if the tests had not been structured to ensure favorable results:

The pilots were briefed in advance and knew what to look for.

The pilots flew in small, familiar target areas.

The pilots flew repetitive training and testing missions.

There were unique visual and thermal clues at test sites.

The same pilots often participated in different tests.

I ask unanimous consent to insert further elaboration on these points about the Maverick missile.

There being no objection, the points were ordered to be printed in the RECORD, as follows:

POINTS FOR MAVERICK MISSILE AMENDMENT

1. The newspaper articles criticizing the Maverick are inaccurate.

The GAO report says it has not performed adequately.

Five years of operational testing of missile has failed to show that it can be used effectively by the U.S. military personnel in combat.

DOD must have considered the GAO comments.

DOD made the \$160 million procurement decision before even responding to the striking revelations of the GAO report.

The DOD response was 2 months late and acknowledged that "several operational issues remain unresolved."

3. Why did DOD not make a timely response?

We do not know. That is one of the reasons I have asked GAO to conduct a follow-up study to examine the reasons DOD disregarded the GAO comments.

4. But the Maverick test results are not terribly bad.

The results would have been worse if the tests had not been structured to ensure favorable results.

The pilots briefed in advance and knew what to look for.

The pilots flew in small, similar target areas

The pilots flew repetitive training and testing missions.

There were unique visual and thermal clues at test sites.

The same pilots often participated in different tests.

Most test scenarios included no friendly tanks, only enemy tanks.

5. The missile has not been proven unreliable.

Neither has it been proven reliable.

There are many concerns that testing has not resolved.

It is not clear that pilots relying on the missile can find the target area at night or in adverse weather.

The missile can be deceived by objects such as sun-warmed rocks or burning battle-field wreckage.

It is not clear that pilots can distinguish a friendly tank from an enemy tank.

Test results do not show the effect of deliberate counter-measures on the plane or missile.

The workload may be too great for a single pilot.

The ability of pilot to navigate to a launch point has not been tested.

The recognition system has not been fine tuned for problems.

The Air Force has been trying to develop an alternative recognition system to help the missile.

6. Isn't the Air Force making some design changes to help the system?

Yes, but these major engineering design changes are being made as the program enters production, before they have been tested.

Several questions relating to the changes should be addressed before production.

Will the changes effect the missile's opertional capability?

Will the changes effect the maintainability or reliability of the missile?

How will the changes improve the producibility of the missile?

7. We have no other weapon in our arsenal which can do what this weapon can.

There are about a dozen anti-tank weapons in the Administration defense budget.

The M-1 tank is supposed to be a formidable threat to Soviet tanks.

The LAW is an effective weapon with a range of 100 yards which does not cost much.

The Viper is an effective anti-tank weapon.

The Dragon carried by one man with a range of 1,000 yards.

The Rattler is a newer version of the Dragon with a greater range.

TOW perhaps the best anti-tank weapon. It can be lethal to tanks from 1000 to 3500 yards and can be mounted on several vehicles.

A laser-guided anti-tank weapons system, the Hellfire missile.

The anti-armor cluster munition (ACM).

8. Are there cost overruns?

Yes, in May the Air Force was going to buy 42,275 of the missiles at a cost of \$2.97 billion.

By September the cost estimates were such that the Air Force was planning to buy only 30,000 Mavericks for the same amount.

The cost per missile had risen 23 percent over 4 months.

The Maverick is far superior to other weapons systems because it can operate at night and during adverse weather.

That is supposed to be its main advantage over other weapons.

But in a 1982 Systems Acquisition Report, the wording "adverse weather" was changed to "limited adverse weather" without explanation or definition.

 Undersecretary DeLauer must have good reasons to have confidence in this program.

In a Washington Post article February 25, 1982 he was asked to identify the person who instilled in him this confidence.

He said he was referring to Malcolm Currie, a vice-president for missile at Hughes Aircraft Co., a Maverick's manufacturer.

Currie was also a promoter of the Maverick when he held DeLauer's job at the Pentagon from 1973 to 1977.

Mr. PRYOR. So what we see is a faulty testing program, and we are committing ourselves to a \$6 billion or \$7 billion project, when we believe that these missiles are going to be inferior.

I reserve any time I have left.

Mr. RUDMAN. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 4 minutes.

Mr. RUDMAN. Mr. President, I yield myself 2 minutes, and I would like to yield 2 minutes to the Senator from Nevada if he is still interested in speaking.

Mr. President, let me say to my friend from Arkansas I apolgize for not originally giving him this additional information which I had in front of

me and did not use.

The AVTEC report, of which you speak, is due tomorrow. That is no coincidence. It is not here today, if is due tomorrow. We do know the following: That it will reiterate the findings of last September which I just cited, that it is now operationally suitable.

Let me further point out to my friend from Arkasas that the laser Maverick is an operational missile used by the Navy. The TV Maverick is an operational missile used by the Air Force, and the IR Maverick has simply been a problem of marrying the IR sensor to the missile itself, and I will assure the Senator from Arkansas, because he knows my feelings on weapons, weapons that do not work-we have talked about it-that if, in fact, this report proves to be untrue I will be in the forefront of freezing those funds and finding a way to make sure they are not spent.

I yield 2 minutes to the Senator

from Nevada.

Mr. CANNON. I thank the distinguished Senator for yielding to me.

Mr. President, despite a reliability of only 64 percent against a goal of 90 percent, the Air Force believes that the Maverick remains the most effective weapon available in the near term for attack of armored vehicles at night and in adverse weather.

The Senator made the point that this missile cannot distinguish between Russian and U.S. tanks. I served as a fighter pilot for many years in the Air Force, and I cannot distinguish between them in most cases. You have got to know where they are and what the battle position is rather than try to distinguish between a particular tank on the ground when you are trying to attack it and one of your own tanks on the ground. So I do not think that is a very significant point.

The position of the Air Force's Tactical Air Command, which represents the pilots who would have to use this weapon in combat, is that the capabilities provided by the Maverick completely overshadow its limitations. Let me say that again, completely over-

shadow its limitations.

It is true that the General Accounting Office released a report on the Maverick in June of 1982 which stated the performance of the Maverick in operational testing does not warrant its entering production.

The House, of course, the House Appropriations Committee, noted the findings of that GAO report and eliminated all procurement funding for the

Maverick for fiscal year 1983. But funds were appropriated for fiscal year 1982 to procure a limited production run of 200 missiles.

As the Senator pointed out, it was only a 200-missile limitation there. Yet this year the request is for 1,335. It think this is an improvement in our capability, and I think we need to do everything we can to try to move ahead in these areas and find out areas that we can progress in rather than say, "Well, this doesn't do as much as we anticipated it would do and, therefore, we ought to wash it out."

I thank the Senator for yielding.
Mr. PRYOR. Mr. President, do I have any time remaining?

The PRESIDING OFFICER. The Senator from Arkansas has 1 minute.

Mr. RUDMAN. Mr. President, how much time do I have?

The PRESIDING OFFICER. One minute, thirty seconds.

Mr. RUDMAN. I will not use all of

One other bit of information which might in some way allay the fears of the Senator from Arkansas and other Members of the body who are concerned about what has been an ongoing problem with the Department of Defense, and that is putting units into production at full production rate before they are ready, and we have seen all kinds of problems, and the Senator from Arkansas is precisely correct.

In this particular case, the Secretary of Defense has written to the Secretary of the Air Force, and I would read you this from it:

The Secretary of Defense,
Washington, D.C., September 29, 1982.
Memorandum for Secretary of the Air
Force.

SUBJECT: Imaging infrared (I 2 R) Maverick.

Based on the review of the I <sup>2</sup> R MAVER-ICK on 21 September 1982 by the DSARC Principals, I approve the release of the balance of FY 82 funds in the amount of \$160.2M to begin the low rate pilot production of 200 missiles and to continue the reliability and maintainability validation program (RMVP) and ECP 604, for improving the producibility of the missile.

An additional review of the program will be held by the DSARC Principals after com-pletion of the RMVP. This follow-on review is tentatively scheduled for 1 February 1983 and will review the results of the RMVP, the acquisition strategy for the Segment II buy (including support equipment) and the progress toward second source and Followon Test and Evaluation/Operational Utility Evaluation (FOT&E/OUE) planning. In preparation for the 1 February 1983 review, the Air Force, within 60 days, will provide a plan for conduct of FOT&E/OUE using test missiles which incorporate RMVP, IOT&E and ECP 604 changes. The acquisition strategy for the Segment II buy will limit the production rate to the 43 missiles per month achieved in the first year buy with flexibility to increase the production rate. The production rate decision to ramp up will be based on a subsequent review by the

DSARC of the reliability and support test data and of FOT&E data. The February 1983 review will also address the status of the integration of producibility engineering changes into the Segment II buy.

The second source program plan should be provided to OUSDR&E for review as soon as available but not later than 1 February 1983. This program should be based on the options discussed in ASAF (RD&L) memorandums of 14 September 1982 and 9 September 1982. The plan should also enable placing a second source contract immediately following approval of the Segment II procurement and should include a contractor incentive approach to improve storage reliability.

CAP WEINBERGER.

So it seems to me the Defense Department has maybe learned its lesson and they are walking before they run, and I would hope we might have a successful program here and allay the fears of the Senator from Arkansas

I yield back the remainder of my time.

Mr. PRYOR. Mr. President, in conclusion in the last 60 seconds, I will say to my distinguished colleague from New Hampshire I am not trying to kill the Maverick program. I am trying to prevent a massive blunder that I am afraid we are about to commit. We have not seen this report. It is ironic that this report would be coming into this Congress a day after we make this very vital decision. We are talking about \$6 billion or \$7 billion here, and we are talking about actually going forward with a program that has not worked and that can find very, very little enthusiasm for. It seems we are not learning the lessons of the past. We are not going to make a good decision, I think, regarding this particular missile until we are sure that this missile is going to accomplish its mission and its goal.

Mr. President, that is all I have. If the Senator needs some extra time I have 10 seconds and he may have it.

Mr. RUDMAN. I believe I yielded back all my time.

The PRESIDING OFFICER. All time has expired.

Mr. RUDMAN. Mr. President, I move to table the amendment offered by the Senator from Arkansas and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Hampshire to lay on the table the amendment of the Senator from Arkansas. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Goldwater) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. Bentsen)

and the Senator from Massachusetts (Mr. Kennedy) are necessarily absent.

The PRESIDING OFFICER (Mr. Heinz). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 70, nays 27, as follows:

[Rollcall Vote No. 442 Leg.]

#### YEAS-70

Abdnor	East	McClure

#### NOT VOTING-3

Bentsen Goldwater Kennedy

So the motion to lay on the table,
UP amendment No. 1522, was agreed

to.
Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. RUDMAN. Mr. President, I move to lay that motion on the table.
The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Florida is recognized.

#### UP AMENDMENT NO. 1523

(Purpose: To set aside funds already authorized for the International Communications Acts for a currently authorized purpose)

Mrs. HAWKINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Florida (Mrs. Haw-KINS), for herself and Mr. CHILES, proposes an unprinted amendment numbered 1523.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President-

The PRESIDING OFFICER. The Senator will withhold while the Cham-

ber comes to order. The Senate is not in order. Senators will take their seats or retire to the cloakroom.

Mr. LONG. Mr. President-

The PRESIDING OFFICER. I am sorry, the Senator will withhold. The Senate is not in order. We will not continue until Members take their seats and Senators who are conversing, and others who are conversing, remove themselves to the appropriate place.

Does the Senator from Louisiana reserve the right to object?

Mr. LONG. Mr. President, I reserve the right to object. Let me say that amendments we have been voting on all evening have not been available to me. They have not been available to others. On some amendments, I have gone to the desk and even the desk did not have a copy of the amendments.

Mr. President, who is supposed to know, other than the author, what the amendment is? I would like to agree to all these unanimous-consent requests, but I do not want to agree unless I know what the amendment is. Someone ought to be responsible enough to be able to let us see a copy of it. That should be before we receive a unanimous-consent request.

The PRESIDING OFFICER. There is no unanimous-consent request.

Mr. LONG. Then I withhold.

Mr. HAWKINS. Mr. President, I ask unanimous consent that the amendment be read.

The PRESIDING OFFICER. Without objection, it is so ordered.

The legislative clerk read as follows: On page 10, after line 20, insert the following: International Communications Agency: \$7,000,000 for operation of Radio Marti".

Mr. LONG. Thank you very much.

Mrs. HAWKINS. Mr. President, the amendment at the desk provides for a set-aside of \$7 million of funds appropriated for the Board of International Broadcasting for a radio station known as Radio Marti.

The PRESIDING OFFICER. The Senator will withhold. The Senate is not in order. Senators will please take their seats.

The Senator from Florida.

Mrs. HAWKINS. Mr. President, the Senate has already debated this issue earlier in this lameduck session. I do not lightly take up valuable floor time now. However, both the administration and many Senators consider it essential that this idea be put into effect as soon as possible because we feel keenly about the welfare of the Cuban people. Except for a brief interlude, from the late sixties to the early seventies, the Cuban people have been denied reliable information about events that have occurrred in their own country for over 20 years.

I believe that Radio Marti like Radio Free Europe and Radio Liberty, represent the very highest of American ideals. Of all people, we Americans, who pride ourselves on our freedom and liberty, should understand that freedom and liberty are hollow words if a people do not have the necessary information to make the choices that freedom affords. Broadcasting accurate information to the people of Cuba is in keeping with the finest ideals espoused by our Founding Fathers and embodied in the U.S. Constitution. When we enact this legislation into law, for the first time in a long time, the Cuban people will be able to turn on their radios and listen to an alternative to government-censored news and programs. The people of Cuba will finally hear the truth. Access to accurate news reports and varied opinions is something that, I fear, we in the United States take for granted. We forget sometimes that the truth is a precious and rare commodity in countries where the government censors every broadcast and every news report.

What the people of Cuba need is a Spanish-language broadcast with a clear signal to alert them to events involving Cuba internationally or domestically. They do not get such information now. For instance, shortly before President Reagan's inauguration, Jamaica's Prime Minister, Edward Seaga, closed his country's Embassy in Cuba. This was but one of many recent actions taken by Castro's neighbors in response to hostile activities directed at other nations. The people of Cuba deserve to know about this.

Local disinformation is also a problem. For example, the Cuban Government claims an increase in the number of physicians in Cuba as one of its successes. In fact, though, the number of physicians as a percentage of the population has not increased appreciably under the Castro regime. More importantly, infant mortality—a function of illiteracy, poor nutrition, and a rising birth rate—has increased since Castro's revolution.

I believe that the people of Cuba need to know the actual outcome of Castro's programs. Radio Marti will accomplish this. It will encourage the Cubans to draw their own conclusions about Castro's regime.

Since the fifties, the United States has provided the peoples of East Europe and the Soviet Union with radio broadcasts that have kept them informed of events that affect them. These broadcasts have developed a reputation for reliability and accuracy. They have become an important source of information in countries whose governments systematically attempt to limit the information available to their citizens. For three decades, the United States has been able to point proudly at the service these radio stations have provided for the deprived peoples of East Europe and the Soviet Union. These totalitarian governments have sought to suppress

their citizenry by restricting their access to information at odds with that provided by the government. In so doing, these governments have tried to put their people in mental strait-jackets. Since restricting the thoughts of their people is impossible, they instead strive to limit them by keeping their people ignorant. I for one am proud that the United States has had the courage and the moral strength to provide an alternative for the peoples of Eastern Europe and the Soviet Union to government propaganda.

I would like to remind my colleagues here tonight that Cuba is exactly 90 miles away from the shores of Florida. It is my hope that the Senate will today show the same courage and moral strength with regard to the broadcasting of accurate news to the people of Cuba.

Some may have heard about threatened radio interference from Cuba in retaliation for the establishment of Radio Marti. However, the people of south Florida have lived with such interference for the past 13 years. Therefore, it is a mistake to suppose that this is related to Radio Marti. Long before Radio Marti was announced, Cuba declared its intention to construct two one-half million-watt transmitters and later announced plans to massively expand its radio broadcasts. Cuba began this aggressive buildup of its radio broadcasting power before Radio Marti was announced. Radio Marti is not the cause of Castro's interference. Radio Marti is only an excuse for Castro to try and blackmail the United States.

I believe we have a right, even an obligation, as a Nation to decide our foreign policy independently, regardless of the threats of a foreign dictator. We also have the right to expand international radio broadcasts in conformity with international law. It appears to me that some critics of radio broadcasting to Cuba believe that, somehow, Castro might be justified by interfering with U.S. domestic radio broadcasts in retaliation for U.S. broadcasts to Cuba.

However, Radio Marti is a peaceful foreign policy alternative for the United States. In fact, the broadcast plans for Radio Marti have been made in keeping with all international agreements to which the United States is a party. Furthermore, the United States has obtained approval to establish Radio Marti from all appropriate regional international communications organizations. In other words, our plans to establish Radio Marti are in full accord with both domestic and international law. There is absolutely no justification for any retaliation by the Cuban Government for broadcasts from Radio Marti. Any such steps would be in clear violation of international law, and further erode

the standing of the Cuban Government in the international community.

I believe that the people of Cuba will soon learn to rely on Radio Marti for information about the world-and especially about their own country-in the same way that the people of Eastern Europe and the Soviet Union rely on Radio Free Europe and Radio Liberty. As it stands now, the Cuban people learn the news from either the government-controlled media or by word of mouth. Both of these sources are inadequate and unreliable. True, there are broadcasts that reach Cuba from Florida, but these are for the most part in English and are designed for an American, not a Cuban, audience.

This new station gets its name from Jose Marti, the leading figure in the Cuban independence movement. He is Cuba's greatest hero and a man held in high regard throughout the Caribbean. By adopting the name "Marti" we have set a high performance. We have set a high performance standard for ourselves for truthfulness and integrity. I am sure we can meet this standard

Radio Marti is an important foreign policy initiative for this great country. I believe this is clearly reflected by the almost 2-to-1 margin by which this legislation was passed in the House of Representatives and by the support that is accorded it by the President of these United States and by the AFL-CIO. I urge my colleagues to echo the resounding vote of the House and to give their full support to this legislation.

Mr. President, I yield to my senior colleague from Florida (Mr. CHILES).

Mr. CHILES. Mr. President, I thank my distinguished colleague. I wish to associate myself with her remarks.

Mr. President, I support this important and necessary amendment.

In the past few weeks the Senate has heard a great deal about Radio Marti. I do not believe that we need more discussion of this issue, we need to take action. The Senate needs to express itself on whether it wants the truth broadcast to the people of Cuba who live under Communist domination. I believe the Senate will declare itself on the side of truth and support the funding of this vital initiative.

We all know the current situation in Cuba. It is a nation with severe economic problems and a declining standard of living for its citizens. It is a nation which is completely dominated by the Soviet Union. It is a nation that has been a pawn to the Communists in their efforts to sow discord around the world.

The Cuban people lack much in their lives. They lack an economy in which they can make a living. They lack control over their political destiny. And they lack the truth about their country and about the world.

This lack of truth is one problem that we can address and in essence that is the purpose of Radio Marti.

Radio Marti is intended to supply what the Cuban public is missing: Reliable news about Cuban life and the world at large. It is to provide an alternative to the present state monopoly on all communication to the Cuban people.

Radio Marti is a proposal that seeks to give Cubans the means to know what their society is; To find out what really happens in their country; to give them some basis on which to judge why their sons are sent to fight in foreign lands and why their nation's meager resources are wasted on foreign adventures. It is not a platform for propaganda but a chance for these people to have the information to form their own opinions.

We have only to look at the experience of Radio Free Europe and Radio Liberty to know that this is an effort that is worthwhile and which has served a very important purpose. Radio Free Europe has expanded to the point that approximately 70 percent of the Polish radio audience listens. Can there be doubt that the fresh wind that has swept that nation is related to the news and information that the Polish people received from Radio Free Europe?

Some might say that we should not provoke Castro, that somehow Castro has moderated his policies. I vehemently disagree. Castro continues to work hand in glove with the Soviet Union. To consistently oppose the policies and efforts of the United States. The Castro government has remained in the forefront of the world's troublemakers and has indeed caused a great deal of trouble. The Castro regime has played a leading role around the world in fomenting armed conflict and terrorism.

I am convinced that Castro is not moderating or curtailing his violent destructive action in any way. Rather the evidence becomes clearer and clearer that Castro is intensifying his efforts and enlarging his role as the stalking horse of the Soviet Union. Cuba's reckless and provacative behavior, which appears to know no limit, mandates that addressing the Cuba problem be brought to the forefront of our foreign policy agenda. We must be firm in our policy toward Cuba. Radio Marti is one opportunity to show that we are going to be firm.

Many are concerned that Cuba will retaliate against Radio Marti by interference against U.S. broadcasters. This is a very legitimate concern which must be addressed. However, our response cannot and should not be to knuckle under to Castro's threat. That can only serve to encourage Castro.

Mr. President, since 1959 the Cuban people, under Castro, have been

denied a basic human need-access to information on the events and actions that shape their lives. Perhaps at this time we cannot resolve some of the other deprivations the Cuban people experience. However, we can do something about freedom of information. That something is Radio Marti. The truth is a powerful weapon. It is also an essential ingredient to our ability to function as complete human beings. If we can insure that the truth is available to the Cuban people we do them a great service. If we fail to provide that opportunity we will do a grave injustice.

Jose Marti was known to his people as the "apostle." An apostle is a witness to the truth. Through Radio Marti, the name Marti will once again serve to open the path to freedom

through the truth.

I urge the adoption of this amendment.

I know the hour is late. I know that many of us have many things on our minds, but I do want to raise a couple of points. I hear two principal objections by those who have objected to the establishment of Radio Marti.

The first objection seems to be that by this bill we might antagonize Castro and we should be careful. It is suggested we do not want to do something to antagonize Castro since maybe he is going to be a good citizen. How many times have we talked about that? How many times have we heard that since 1959? Did we antagonize Castro? Is that why he committed troops to Angola? Was it our antagonism toward Castro that put his advisers into Yemen? Was it our antagonism toward Castro that put his advisers into Ethiopia and caused most of the problems in Somalia? What have we done to Castro that caused Cuba to send arms to Nicaragua and terrorists into Guatemala and Honduras?

We now see Costa Rica raising alarm. The President of Costa Rica came to this country and talked about terrorists coming into his country.

We now see that a grand jury in south Florida has indicted two high officials of the Castro government on the basis of a conspiracy to bring drugs into the United States. How

were they doing that?

Drug boats would go into safe harbor in Cuba where they could be replenished, where the Cubans were giving them the signals that they could put out and fly the Cuban flag. where they would give them radar for use against our Coast Guard, where they would give them money, where they would deliver the drugs, this poison, into our country, with what it does to our children, and on the return trip they would carry guns. They would purchase guns, and they would carry those back to Colombia, to Venezuela, and Honduras. They went to cause death and destruction. It is a grand jury of the United States that has indicted those high Cuban officials, members of the Cuban government.

So how in the world is a radio station that is going to speak the truth going to antagonize Castro? No way in the world. The question is, Are we going to sit back forever and not be a

Castro has a radio station now in Grenada sending out propaganda into all of the Caribbean. And you can imagine what that propaganda says about the United States. You can imagine the content of that propagan-

They have set up a station in Nicaragua, and that station again is causing problems in Costa Rica and throughout the hemisphere.

We are talking about a station in Radio Marti that is going to submit the truth to the Cuban people. It is also going to be able to submit the

truth to all the Caribbean.

Is this a harebrained idea? This is an idea that is sponsored by the President of the United States. It has passed through the House after due consideration by its committees. It passed by a 2 to 1 vote in the House. It has been before the Foreign Relations Committee of the Senate. It has been reported out of that committee. It has received a Budget Committee waiver. So we see that the idea certainly has merit.

Now, the other argument that I have heard is a fear on the part of some of radio stations that there might be retaliatory jamming.

Some Senators that I have heard make that argument are the same people I hear standing on the Senate floor saying we are not going to be cowed by the Russians. They say we are going to tell the Russians that we will match them missile for missile, plane for plane. Whatever they want to spend, we are also going to spend because we are not afraid of them. But, do not jam our radio station. It is where our farmers get their news, and we are worried that Castro might be able to jam that radio station.

What in the world is the power of the United States if we do not have the ability to protect ourselves against this dictator? Are we worried that he is going to be able to seriously disrupt the United States? Our State Department has told us that we are not without means, if Castro wants to get into some kind of a jamming war. Certainly he has done that before, as has been brought out by my colleague. He has been in the jamming business for a long time.

I can tell Senators our radio stations in Florida have had Cuban interference for years. In the bill that we are working on, in order to try to quell those fears, provisions were put in that there would actually be compensation. And when that happened, we heard there would not be any problem with the bill.

Of course, that item went in, and then starts the calls going to Senators, "Hey, look out, watch that bill. Do something about it. There might be some problem."

How in the world can we expect to be the leader of freedom for the rest of the world? How are we going to stand against the Soviets and their might when we will not stand against the pawn of the Soviets who carries arms into Angola, carries the poison of illegal narcotics into this country, carries weapons and terrorism into Central America?

Are we afraid to put in a radio station that is going to tell the truth because we are worried about what Castro is going to do?

The hardest thing that I have to do. I really want to tell Senators, is to explain to some of the Cuban-Americans what is going on up here in Washington. These are people who voted with their feet that they wanted freedom. They left Cuba and they came to this country. They have worked and hewn their way in this country. Every one of them is fervently anti-Communist. Of course, they are anti-Castro because they see him as the person who has taken over their island, subjugated their people, held their countrymen in

They say to me, "We don't understand this, Senator. You have a proposition that the Democratic House has passed 2 to 1, the Republican President sponsors, it has gone through all of your committees, and yet we hear that there is a Senator or two Senators or three Senators who have kept this from becoming law."

How do I explain to them that we have a proposition that we cannot even get up for a vote in the Senate?

These are people who studied for their freedom, took their citizenship test, spoke for this country every place and every time they could, and now what they want is a glimmer of hope that we are going to say something to their brothers that are still in Cuba, to their kinfolk that are still in Cuba, to the people, to the land that they still have an affection for, to try to tell them something about what is going on in Cuba. But I have to tell them that we probably cannot get it up this time because somebody is going to filibuster and not let the Senate vote on

I can tell Senators it is very difficult to explain.

I think we have an opportunity tonight, without taking a great deal of time, to have the majority of the Senate, that I think feels very strongly on this matter-over 60 Senators have expressed themselves that they are for this-to say that we should establish Radio Marti, we should beam

the truth to Cuba, we should beam the that it is a good approach. It may be truth to the rest of the Caribbean.

I think we have the opportunity to do that.

We are not afraid of Mr. Castro. We are not afraid of what he will do in regard to retaliation. We are not a country that is without means to take care of ourselves and to protect ourselves in that regard.

We mention that this is named after Jose Marti. Jose Marti was called the Apostle by his people. An apostle is a witness of truth. I think that is what this station could be. It could be a wit-

ness for the truth.

I thank my distinguished colleague for yielding.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, shall speak very briefly on this

Radio Marti is something these

people understand.

We know how to go to another nation and spend millions and sometimes hundreds of millions of dollars to try to buy their loyalty. Sometimes in this Nation's history we have gone into other nations and we have done more than spend our money. We have used our military manpower and sometimes at the cost of thousands of American young boys.

Radio Marti is a different kind of an approach. Radio Marti says that if you tell the people the truth, maybe you are going to be able to cause them to react in a manner that maybe they will be able to solve their own prob-

lems.

Here we have a little neighboring island of Cuba, unquestionably subjugated by Castro, with no free elections, no free newspapers, no free information. And Radio Marti for a few million dollars provides an opportunity for the people of Cuba to learn more about what is happening in this country and throughout the world.

Some people are saying, "Oh, no, we cannot do that. If we do that Castro

may react."

I could not agree more with the Senators from Florida, the senior Senator as well as the junior Senator, when they talk about the fact that what kind of a backing down. If we have Radio Marti, Castro may jam some of our radio stations. So what?

Many times in our international policy we have seen fit to take a step and it has caused a counterstep to be taken. But the great United States of America does not want to have a radio station beamed into Cuba because Castro may react and beam his radio

waves into our country.

I think it is time we passed on this legislation. I am not at all certain it will solve the problem. In fact, I have doubts that it will. But it seems to me an effective approach.

I think we have a tremendous amount to win and very little to lose.

I think the sooner we move on about our business and enact this legislation the better off it will be for the people of Cuba, probably the better off it will be for the people of this Nation.

Mr. SYMMS. Mr. President, will the Senator yield on that point?

Mr. METZENBAUM. I yield.

Mr. SYMMS. I thank the Senator for yielding.

I wish to associate myself with his remarks. I could not agree with him more.

I would hope, I say to my dear colleague, that we will recognize that the truth and the ideas that we can project to the people of Cuba through Radio Marti will have consequences that Fidel Castro and his dictatorship will not be able to withstand.

It will be a peaceful way for us to increase the cost of Cuban adventurism.

I praise my colleagues for offering this amendment and their persistence. I hope that we have deliberated on this for days and days in the Senate. that, Mr. President, we could bring this to a rapid vote and decide this once and for all.

On that, Mr. President, I ask for the

yeas and nays.

Mr. HATFIELD. Mr. President, will the Senator withhold just for a few moments until the chairman of the Foreign Relations Committee has had an opportunity to make a comment?

Mr. PERCY. Mr. President, I think we should move to a vote at the earli-

est possible time.

The PRESIDING OFFICER. Does the Senator withhold his request for the yeas and nays?

Mr. SYMMS. I withhold.

Mr. HATFIELD. Mr. President, in order to expedite and try to bring this matter to a close and the others that we have yet and certainly with good notice to the authors of this amendment, I do reluctantly, but I must move now to table.

Mr. BAKER. Mr. President, will the Senator withhold for a moment?

Mr. HATFIELD. Yes.

Mr. BAKER. Mr. President, let me say I also regret that the manager of the bill, the chairman of the committee, must make this motion and all I can say to those who have supported it is that I understand their deep concern and I can assure them that this matter will go forward and will be a matter of urgent priority in the next session of Congress.

Mr. PERCY. Mr. President, I thank the majority leader for that assurance.

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Illinois?

Mr. HATFIELD. I yield to the Senator from Illinois.

Mr. PERCY. Mr. President, I express appreciation to the majority leader.

The committee did vote this out by a 12 to 4 vote, but this is not probably the right vehicle at all. It should go in the regular normal orderly process, but I do feel very strongly with the committee that this voice of truth must be eventually at the right time taken to Cuba and give the encouragement to the Hispanic-Americans that we will let that voice in truth get through.

Mr. HATFIELD. I thank the Sena-

Mr. President, I now move to table the amendment offered by the Senator from Florida.

The PRESIDING OFFICER. The question is on the motion to lay on the table the amendment of the Senator from Florida. (Putting the question.)

The motion was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. PROXMIRE. Mr. President, I move to lay that motion on the table. The motion to lay on the table was

#### ORDER OF PROCEDURE

Mr. HATFIELD. Mr. President, if I may have the leader's attention for one moment, I wish to try to outline a procedure here and then I wish to yield to the majority leader to outline the procedure for the remainder of this evening and perhaps tomorrow.

Mr. BAKER. Mr. President, earlier today the minority leader and I went over a list of amendments that he knew of on his side and I set in process the compilation of a list of amendments that we could ascertain on our side with the hope that we could get a unanimous-consent agreement for the time for final passage of this measure.

Mr. President, it is going to be a pretty good-sized job. There are 21 amendments on this side. Not many of them will require much time, but there are 21 of them.

On the Democratic side, according to the list that I have been given by the minority leader and his staff, there are either 12 or 13 amendments left.

Mr. President, I am reluctant to proceed further unless the minority leader is available to consider this matter with me, and I do not see him on the floor at this moment.

Perhaps there is some other matter the manager of the bill can take up briefly while I communicate with him.

Mr. METZENBAUM. Mr. President, if the majority leader will yield, we have a list. We do not know what some of them are. I wonder if he could help us with some of them that are unidentified.

Mr. BAKER. Yes. Mr. President, I think we will be able to identify all of them, but rather than do it twice, let me wait until the minority leader reaches the floor.

Mr. HATFIELD. Mr. President, here is the minority leader now.

Mr. BAKER. Mr. President, I wonder if the minority leader is in position to consider these items at this time.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, perhaps since he went over his list earlier I should go over my list at this time and we can see where we are.

Mr. President, the first item on my list is the amendment to be offered by the Senator from Missouri (Mr. Danforth) dealing with energy conservation on which he is willing to accept a 5-minute time limitation equally divided

The second one is a Pressler amendment dealing with Alzheimer's disease with a time limitation of 5 minutes equally divided.

Then there are four Helms amendments of 20 minutes equally divided. Those are the pay cap, IDA, IRS regulation dealing with private schools, and law of the sea.

There is a Percy amendment with 2 minutes equally divided on State Department counsel; a Schmitt amendment on White House productivity conference with 2 minutes equally divided; a Stevens amendment, the distinguished assistant majority leader, who is not on the floor, and I have not been able to identify the nature of that amendment but I shall.

A Thurmond amendment, 3 minutes equally divided, funds to convert Army, Air National Guard positions to full-time military positions; a Bradley-McClure SPRO amendment, 2 minutes equally divided; a Kasten-McClure IAEA, 5 minutes equally divided; a Quayle amendment which we have not yet identified the subject matter, but we will; a Cohen amendment-Quayle is dislocating workers, \$50 million, and I do not have a notation as to time he is willing to accept-5 minutes equally divided; next is a Cohen amendment discretion of State spending on weatherization, 2 minutes equally divided; a Cohen-Armstrong amendment social security disability, 10 minutes equally

Mr. ROBERT C. BYRD. What does he mean by social security?

Mr. BAKER. I believe it was a bill previously passed in the House.

Mr. ARMSTRONG. There is a strong likelihood that we will not offer that amendment. We will work it out—if we could leave it on the list.

Mr. DOLE. That is correct, if we can get conferees appointed we will not have the necessity for bringing it up.

have the necessity for bringing it up.
Mr. BAKER. A Tower amendment
which may or may not be offered, a
defense cut; two Dole amendments,
Mr. President, on which I do not have
a description. Can the Senator from
Kansas tell me what they are?

Mr. DOLE. There are two amendments which the Senator from Kansas is not certain he will offer. There is no opposition. One admits curios and relics, and I am not sure I will offer that one; the Gun Control Act. We are trying to clear these amendments and if there is opposition they will not be offered.

Mr. BAKER. I thank the Senator.

Mr. President, the next amendment is a Specter tax deduction of Members' living expense; next is a Gorton Pantages Theater amendment 1 minute equally divided. Mr. President, that is a lot of items but not many of them are very long items.

Mr. President, before we get into the business of trying to clear the items one at a time, could I inquire of the manager of the bill, the chairman of the committee, and the ranking member if they have some arrangement in mind as to what sequence these amendments would be offered?

Mr. HATFIELD. Mr. President, I would respond by saying it is our hope to take up these brief amendments as we have previously when they have been cleared by both sides of the aisle.

Mr. PROXMIRE. We would have to have an explanation of these before we agreed to a time limitation.

Mr. HATFIELD. I said it would be on the basis of how we have handled about 20 of them today already where they have been fully cleared on both sides of the aisle and do not require a record vote. We want to take those up first.

Then it would be our tradition to alternate sides, either side of the aisle, to alternate Republican with Democrat, Republican with Democrat, so that we do not get into any kind of a preference situation, and go right down the list as they have been given to us by both sides.

We would start at the top of the ones that will take a little more time and just go down the list as given by the minority and majority leaders.

Mr. BAKER. Mr. President, if I could go through the Democratic list for a minute to make sure I have it correct, I have here an Exon amendment dealing with the pay cap, 10 minutes equally divided; a Bumpers agricultural deficiency payments amendment.

Mr. ROBERT C. BYRD. He wanted an hour, he may have changed his mind

Mr. EXON. I would think, to expedite things, 10 minutes equally divided

Mr. BAKER. I thank the Senator.

Next, Mr. President, is a Dodd amendment dealing with Central America restrictions on certain types of operations, 20 minutes equally divided; a Boren amendment on monetary policy resolution, 20 minutes equally divided. Mr. President, I have a notation on my side that we cannot

agree to a time agreement there unless a qualified second-degree amendment to be offered by Senator GARN is permitted; a Boren amendment, 20 minutes, FHA-SBA loan deferral; a Bradley amendment, 10 minutes equally di-vided, veterans' hospitals repair and maintenance; a Bradley amendment, strategic petroleum reserve, 5 minutes equally divided; a Dixon-Percy OMB study of sole source contract awards for a German camera company, 10 minutes equally divided; a Dixon amendment, employment centers, 10 minutes equally divided; a Glenn amendment, Arms Export Control Act sales procedures, 40 minutes equally divided: a Glenn amendment, transfer of sensitive U.S. military equipment to foreign nations, 40 minutes equally divided; a Ford amendment, railroad employees unemployment compensation, 20 minutes equally divided; and then I have a question mark on a Heflin amendment dealing with land trans-

Mr. President, the reason I will not offer the list in its entirety is because a unanimous-consent request I would like to formulate would provided for these time agreements, and would provide that only these amendments would be in order, and would provide for a time certain for final passage of this bill.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. BAKER. Yes.

Mr. BUMPERS. Would the Senator also add that amendments in the second degree not be in order?

Mr. BAKER. Yes. In the formulation I would put I believe it would accomplish that. It would be that other amendments, except the amendments listed, would not be in order. I am advised by the Parliamentarian that that would include second-degree amendments or modifications. The Garn amendment, of course, which is a second-degree amendment, would be included in the list of those specified and would thus qualify.

Mr. METZENBAUM. Is the majority leader in position to tell us what the Stevens amendment is?

Mr. BAKER. As soon as I find Stevens. Can he identify the amendment? Mr. STEVENS. Not yet.

Mr. BAKER. I sense a certain tension developing, Mr. President. [Laughter.] And I observe that I am squarely in the middle of it. [Laughter.]

Mr. President, what I would like to do is to urge both my good friends on both sides of the aisle try to come together and work that out. Could I inquire if there is any other—I am now advised, Mr. President, and I believe that completes the list, and that we have identified all the amendments, at least with a few words, as has been done on the Democratic list, and this

would be a good time if Members have further questions to address them to the author of the amendments or the distinguished chairman of the committee or the ranking member.

Mr. METZENBAUM. Would the majority leader want those of us to have some reservations about a few of the measures but not all of them, indicate that and at what point.

Mr. BAKER. What I want you to do

is not to indicate objection.

Mr. METZENBAUM. Until we know more about the four Helms amendments I cannot agree to a time agreement on that, and until we know what the Stevens amendment is I cannot agree to a time agreement on that, and I understand there is an objection, if I understood, to the two Dole amendments which the Senator from Ohio would make as to a time limit agreement on behalf of Senator KENNEDY. If I understand those are two Garn amendments?

Mr. DOLE. Relics.

Mr. BAKER. I suppose that would not let us get a time agreement for final passage, and I would like to continue to work on that. But if the minority leader is prepared for me to do so, I would like to put a unanimous-consent request on others that would not be objectionable.

Mr. PROXMIRE. Mr. President, I would object to the Specter amend-

ment.

Mr. BAKER. Let me put it.

First, the request I am about to put does not signify the order in which these amendments will be offered but rather made to establish time limitations and to include a proviso that no other amendment, no second-degree amendment or substitute, will be in order. It is my hope, Mr. President, that we can get an overall request subsequently that will provide that no other amendments are in order.

Mr. President, first a Danforth amendment as previously stated on energy conservation, 5 minutes equally

divided.

Mr. LONG. Mr. President, reserving the right to object, I would have to

know more about it.

Mr. DANFORTH. This is not energy conservation; it is an additional appropriation for the low-energy assistance program.

Mr. LONG. I would not object.

Mr. PROXMIRE. How big an appropriation?

Mr. DANFORTH. \$200

The PRESIDING OFFICER. Without objection, it is so ordered. Mr. BAKER. I thank the Chair.

Next, Mr. President, the Pressler amendment dealing with Alzheimer's disease, 5 minutes equally divided. Mr. President, without repeating, I include in my request that no amendments to the amendments would be in order, whether a modification or a seconddegree amendment, and I need not repeat that for each request.

Mr. JOHNSON. Mr. President, reserving the right to object, are all of these appropriations matters or are some of these legislation on appropriations?

Mr. BAKER. I really cannot tell the Senator. I will refer that to the author of the amendment or the chairman or the ranking member of the committee.

Mr. HATFIELD. So far as the Pressler amendment is concerned, it is an

appropriation measure.

The Danforth is an appropriation measure, but I would hate to start applying that criterion at this point in the game because we can go back and really disqualify an awful lot of amendments that already have been acted on.

Mr. BAKER. Mr. President, suffice it to say that on the one that we have before us and the one we just finished, they are both appropriation measures.

Mr. HATFIELD. Yes.

Mr. BAKER. I thank the chairman. I put the request on the Pressler amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, did I understand the Senator from Ohio wishes to consider further on the

Helms amendments?

Mr. METZENBAUM. Yes: the Senator from Ohio would like to know exactly what they are. And the Senator from Ohio would also like to inquire of the majority leader if he is correct in his assumption that by agreeing to a time limit that a Senator is waiving his or her right to make a point of order that it is legislation on an appropriations bill.

Mr. BAKER. Mr. President, I put that in the form of a parliamentary inquiry. Does the unanimous-consent request limiting time on an amendment in the form put constitute a waiver of any right any Senator has to make a point of order against that amend-

ment?

The PRESIDING OFFICER. It would make the amendment in order. Mr. ROBERT C. BYRD. Mr. Presi-

dent, on time agreements usually that is the case. If that amendment is specified, then that amendment is included whether or not it is germane. But we are talking about appropriations bills. Does the mere order limiting time waive a Senator's right to raise the question of legislation on an appropriations bill?

Mr. BAKER. I think it does not. Let me clarify the situation this way. Mr. President, I ask unanimous consent that in each case a point of order that might be made against the amendment, except for a germaneness qualif-

ication, will not be waived.

The PRESIDING OFFICER. there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I will skip over the Helms amendment until I can gain more information and perhaps a consultation with the Senator from Ohio and the Senator from North Carolina.

Next is the Percy State Department counsel amendment, 2 minutes, equal-

ly divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Next is the Schmitt White House productivity conference amendment, 2 minutes, equally divid-

Mr. LONG. Mr. President, until I see the amendment, I object. I do not think I will object, but I want to see it.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Next is the Stevens amendment. I will pass over that for the time being, unless the Senator is prepared now to describe it further.

Next is a Thurmond amendment dealing with funds to convert Army and Air National Guard positions to full-time military positions, 3 minutes, equally divided.

The PRESIDING OFFICER. Is

there objection?

Mr. ROBERT C. BYRD. My list says 20 minutes.

Mr. BAKER. Yes. I should have advised the minority leader but the Senator from South Carolina advised me that 3 minutes was adequate for his purposes. I will do it either way.

Mr. ROBERT C. BYRD. I do not know what the amendment does.

Mr. BAKER. Mr. President, I will put the request at 20 minutes, if that will be helpful. Mr. President, I put the request at 20 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Next, Mr. President, is a Bradley-McClure SPR amendment, 2 minutes, equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. HATFIELD. Mr. President, that is duplicated on the Democratic list, I believe, as a Bradley amendment. It is number 2 on page 1. The Bradley amendment is the same one, is that not correct?

Mr. BRADLEY. That is correct. It is the same amendment.

Mr. BAKER. It is 5 minutes on the Democratic list. I revise my request to make it 5 minutes, equally divided.

The PRESIDING OFFICER. there objection? Without objection, it is so ordered.

Mr. LONG. Mr. President, I will reserve until I see the amendment. After I see it, I do not think I will object. I object until I have seen it.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, next is a Kasten-McClure IAEA amendment, 5 minutes, equally divided.

The PRESIDING OFFICER. Is

there objection?

Mr. METZENBAUM. Reserving the right to object, and I would object only until I know what the amendment contains. I know that it is the Atomic Energy Administration, but I do not know what it says about it.

Mr. KASTEN. Will the Senator

yield?

Mr. BAKER. Yes.

Mr. KASTEN. I am happy to give a brief description. The IAEA is the agency from which the U.S. delegate walked out. We are putting in some language to put restrictions on the money going to IAEA, as well, until it is clear that they will recognize all democracies.

It is similar to the Moynihan resolution that we passed and it is a compromise that has been reached with Senator Percy, Senator McClure, and

myself.

Mr. METZENBAUM. I have no ob-

jection.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. BAKER. Mr. President, I am advised now that the Bradley-McClure SPR amendment is not objected to. Could I ask the distinguished Senator from Louisiana if that is correct?

Mr. LONG. That is correct. Mr. BAKER. I reput the request. The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. BAKER. Next, Mr. President, is a Quayle amendment dealing with dislocated workers, 5 minutes, equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. I will object until I see what the amendment is.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Next, Mr. President, is a Cohen amendment, discretion of State spending on weatherization, 2 minutes, equally divided.

The PRESIDING OFFICER. Is

there objection?

Mr. ROBERT C. BYRD. Reserving the right to object. Does anybody

know what this is about?

Mr. DANFORTH. Mr. President, this amendment would increase the percentage that States could spend out of the low-income energy assistance program for energy conservation from 15 percent to 25 percent.

Mr. JOHNSTON. Is that legislation

on an appropriations bill?

Mr. DANFORTH. I am not the Parliamentarian, but I know that is the point of the amendment.

The PRESIDING OFFICER. Is

there objection?

Mr. JOHNSTON. Mr. President, reserving the right to object, at this hour of night, the fact that we have let a few horses out of this pen should not mean that we ought to just open up the barn door and let any matter go through.

Mr. BAKER. Mr. President, I withdraw the request.

Mr. President, next is the Tower defense cut amendment. I do not put that one at the moment. There is no time limit associated with it.

Mr. President, next would be the two Dole amendments, which I do not now

put.

Next is the Specter tax deduction/ Members living expense amendment.

Mr. PROXMIRE. Mr. President, I would have to object to that. That would be legislation on an appropriations bill. It is the jurisdiction of the Finance Committee. We have had hearings and I hope we would defer it.

The PRESIDING OFFICER. Objec-

tion is heard.

Mr. BAKER. Next, Mr. President, is the Gorton Pantages Theatre in Washington.

Mr. METZENBAUM. Could we get word as to what that is all about?

Mr. GORTON. It allows a leaseback arrangement on a theater which would benefit the city.

Mr. METZENBAUM. Which city? Mr. GORTON. It is Tacoma, Wash., not Washington, D.C., I say to the Senator.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, did the leader skip 13 or did I miss it?

leader skip 13 or did I miss it?
Mr. BAKER. Yes; I skipped it acci-

dentally.

Mr. President, No. 13 is the Cohen-Armstrong social security disability amendment, 10 minutes, equally divid-

ed.
Mr. LEVIN. That is the same as the bill we passed, the so-called Levin bill, and sent to the House. Senator Armstrong is on that, along with a number of other Senators. We may want to add that on this, but that is still in limbo.

Mr. DOLE. Mr. President, the Senator from Colorado is also here. We would hope we could have conferees appointed this evening.

The PRESIDING OFFICER. The Senator will withhold. The Senate is

not in order.

The majority leader is recognized.

Mr. BAKER. Mr. President, I understand that that amendment has been withdrawn from the list.

Mr. President, I understand that the Quayle amendment, No. 11, is cleared. I now renew the request on the Quayle amendment dealing with dislocated workers, 5 minutes, equally divided.

The PRESIDING OFFICERS. is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I understand that No. 5, the Schmitt White House productivity conference, 2 minutes, equally divided, may have been cleared. I renew that request.

Mr. ROBERT C. BYRD. Mr. President, 2 minutes on the amendment?

Mr. LONG. That has to do with the White House conference.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Reserving the right to object.

The PRESIDING OFFICER. The Senator from West Virginia reserves the right to object.

Mr. BAKER. Mr. President, I yield to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, this program for a White House conference on productivity was authorized near the end of our session which ended in September. This is to provide \$1.5 million to conduct that conference.

Mr. METZENBAUM. \$1.5 million?

Mr. SCHMITT. Yes.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Another amendment on the Democratic list, 10 minutes equally divided dealing with the pay cap.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. FORD. A point of information. If an amendment is basically legislation on an appropriation bill, you have a right to go to germaneness. If you have it in the agreement, does that leave it to be germane or leave the point of order that it is not germane because it is legislation on an appropriation bill?

Mr. BAKER. We are talking about two different kinds of germaneness. Germaneness on a House bill, I believe, is the one that the Senator is referring to. It would be my judgment that the request just made would not waive that point of order, if that point of order is made. The germaneness that is waived on the question I put for all of these amendments is whether it is germane to this bill.

Mr. ROBERT C. BYRD. What about legislation on an appropriation bill?

Mr. BAKER. I believe I included in the request previously that that point of order would not be waived.

To continue, the Bumpers amendment is next on the Democratic list, 15 minutes equally divided, agricultural deficiency payments. I have no further elaboration of that.

The PRESIDING OFFICER. (Mr. Cochran). Is there objection? Without objection, it is so ordered.

Mr. BAKER. Next to Dodd amendment, 20 minutes equally divided, restrictions on certain types of operations.

Mr. CHAFEE. We have no objection to the time limitation but we would like to have the privilege of offering a substitute.

Mr. DODD. If the majority leader will yield, I would suggest that there might be two amendments rather than making one second degree. If the Senator from Connecticut senior wants to offer an amendment, there is no reason that it could not be considered separately and not as a substitute.

Mr. CHAFEE. Do you mean if we acted on yours and then acted on ours? The vice chairman of the Intelligence Commitee is not here, Senator MOYNIHAN. At this time I will not waive our right.

Mr. BAKER. Let us pass over that one for a moment, Mr. President.

The next one is the Boren amendment, 20 minutes equally divided on monetary policy resolution, with the understanding that there would be a Garn amendment to this amendment. I will insert 15 minutes on that equally divided.

Mr. ROBERT C. BYRD. Is the Garn amendment germane to the Boren amendment?

Mr. BAKER. I must say to the minority leader that I am told that it is. I have not seen the amendment. I cannot vouch for it personally.

Mr. PROXMIRE. I have seen the amendment. I understand it is germane. It provides for an inflationary element to be attached to the resolu-

Mr. METZENBAUM. Could we have in the unanimous-consent request that it must be germane?

Mr. BAKER. The Senator from Wisconsin has seen it and I have not. I would depend on his representation.

Mr. ROBERT C. BYRD. Back to the Boren amendment, Mr. President. With 20 minutes on the Boren amendment, how much time would there be on the Garn amendment?

Mr. BAKER. Twenty minutes on the Boren amendment equally divided and I have proposed 15 minutes on the Garn amendment equally divided.

Mr. ROBERT C. BYRD. I think we better pass over that for the moment.

Mr. BAKER. Very well.

Next is another Boren amendment. FHA-SBA loan deferral.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Reserving the right to object on that one.

Mr. BAKER. Next a Bradley amendment, 10 minutes equally divided, veterans hospitals repair and maintenance.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Next, Mr. President, is another Bradley amendment, 5 minutes equally divided, strategic petroleum reserve. I believe that has been folded into the request on the prior list; is that correct?

amendment.

Mr. BAKER. Mr. President, next is a Dixon-Percy OMB study of a solesource contract award to a German camera company, 10 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. A Dixon amendment, 10 minutes equally divided, on employment centers.

Mr. PROXMIRE. Can we get an explanation on that?

Mr. BAKER. Not from me. It is on your list.

Mr. DIXON. May I inform the leaders that there may be a colloquy on that. I have given the material to Senator SCHMITT and he should let me know shortly, I hope to be able to accommodate the Senate on that.

Mr. PROXMIRE. A colloquy, not an

amendment?

Mr. DIXON. That is correct. It will be one sentence read on each side. Very short, I would like to not waive the amendment until such time as I hear from Senator SCHMITT, which will be momentarily.

Mr. BAKER. I pass over the amendment for a moment. Next a Glenn amendment, 40 minutes equally divided, Arms Support Control Act sales procedure.

Mr. LONG. I must object until I see the amendment, Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. I will pass over both Glenn amendments but I have been asked to make a notation of 20 minutes divided instead of 40 minutes.

Then, Mr. President, the Ford amendment, railroad employees unemployment compensation, 20 minutes equally divided.

Mr. DOLE. Mr. President, I believe that is a Finance Committee matter.

Mr. LONG. I believe it is an Appropriations Committee matter. It is actually a Labor Committee matter.

Mr. DOLE. I would like to look at the amendment.

Mr. BAKER. I will pass over that. I have a Heflin amendment on land transfer. There is no time suggested. Can I inquire of the minority leader if he is willing to suggest a time?

Mr. ROBERT C. BYRD. I am not in a position to suggest a time agreement. Skip over that one.

Mr. BAKER. Very well.

Mr. President, that concludes both lists.

Mr. ROBERT C. BYRD. There is an amendment by Kennedy dealing with Federal law enforcement compensation on death benefits. We have no proposal as to time as yet.

Mr. BAKER. Mr. President, we have a good number of agreements and perhaps that will expedite deliberations on this measure. We do not have all of them. Therefore, it is not possible for

Mr. BRADLEY. It is the same me to ask that no other amendments be in order and I will not make the request now, nor will I make a request for time certain for final passage.

> Mr. President, let me say that I want to do that and I hope we can complete that sequence before this evening is

> Mr. President, I am advised that we wish to add to our list, and I now propose, a request for an amendment by Hatch-McClure-Kennedy dealing with the National Endowment for the Humanities, 5 minutes equally divided.

> Mr. LONG. Mr. President, I object until I have seen it.

> The PRESIDING OFFICER. Objection is heard.

> Mr. BAKER. Mr. President, I hope we can consult with our respective officials and see if we can identify the subject matter of the other amendments.

> Mr. ROBERT C. BYRD. Could the distinguished majority leader indicate how much longer the Senate will run this evening?

Mr. BAKER. Mr. President, I had hoped we would be out by now or 10 o'clock, but the only way we can do that with any degree of safety, considering the fact that this resolution expires tonight, would be if we have a time certain for final passage. I would hope that we would continue with our efforts to get this nailed down. I am ready to go out without any other action tonight, as soon as we can get a time for final passage tomorrow and get a list of amendments nailed down so that no other amendments are in order. Maybe we cannot get that. If we cannot get that, it may be that the two managers would want to continue

Mr. HATFIELD. We would.

Mr. BAKER. I would like very much to get that and nail it down with the minority leader.

Mr. METZENBAUM. Will the majority leader yield for a question?

Mr. BAKER. Yes.

Mr. METZENBAUM. Assume that we have a time set and some amendments have not been agreed upon or called up. What will be the status of those amendments? Will they be automatically called up and debated?

Mr. BAKER. As I understand it, Mr. President, in the usual configuration, when time is reached for passage and there are amendments that have not yet been disposed of, there will be no further time for debate. They would not automatically be laid before the Senate, I believe, but Senators would be privileged to call up their amendments without debate and they would be entitled to a vote.

Mr. STEVENS. Will the majority leader yield for a question?

Mr. BAKER. Let me complete this

Mr. METZENBAUM. I would like to point out to the majority leader that a few of these amendments are extremely controversial and it makes it very difficult to agree to a time certain, particularly on one that I know of, the IRS regulation and the private schools.

Mr. BAKER. Mr. President, let me say in all fairness that I do not put the request for a time certain, simply because we do not have those agreements yet. I really hope we can get it, though, because we are really straining to keep the Senate operating and straining human endurance to finish this bill. I hope we can work this out, but I do not now put that request for a time certain for passage.

I yield now to the Senator from New

Jersey.

Mr. President, I understand the Senator from New Jersey wishes to offer an amendment. It is not my business to manage the bill. I yield the floor.

Mr. HATFIELD. Mr. President, moving on the lists that we have made on these time agreements, I would like to ask unanimous consent that we may alternate from these lists so that Members on both sides of the aisle will have an equal opportunity to present their amendments and only on those matters that we have reached a time agreement on. We have to arrive at some kind of orderly procedure and I would like to be able to have the Chair or however else it should be done appropriately, follow that on the recommendation of the two managers.

I make that in the form of a unani-

mous-consent request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I would like now to yield to the Senator from New Jersey and the Senator from Idaho, who have cosponsored an amendment.

The PRESIDING OFFICER. The Senator from New Jersey.

UP AMENDMENT NO. 1524

(Purpose: To allow the Interior Appropriations Conference Report language to control SPR funding by deleting Section 118. H.R. Res. 631)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. Brad-Ley) proposes an unprinted amendment numbered 1425: On page 36, line 24, insert the following: Delete Section 118 and renumber accordingly.

Mr. BRADLEY. Mr. President, there may be an inadvertent problem with the continuing resolution's treatment of the SPR.

While the continuing resolution references the Interior appropriations

conference report, which appropriates the President's request for the SPR off-budget account—\$2.074 billion—a later section 118 refers to the SPR off-budget account in section 167 of EPCA and implies that funds are available only to maintain the current level of operations which may mean only 182,000 barrels per day.

The fiscal year 1982 carryover—over \$2 billion—plus the President's fiscal year 1983 request for SPR are sufficient to fill the SPR at a rate well in excess of the current level of operations, about 200,000 barrels per day or less depending on the timeframe chosen.

The Energy Emergency Preparedness Act of 1982 (EEPA) mandates an SPR fill rate "at the highest practicable fill rate achievable with available funds."

Section 118 might be construed by OMB as limiting the "available funds" to that necessary to achieve the current level of operations. This would undercut the Congress effort in EEPA to require the President to spend all available funds to fill the SPR.

Because of this inconsistency, this amendment would move to delete section 118 from the continuing resolution.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BRADLEY. Yes, I yield.

Mr. McCLURE. The Senator is correct and I thank him for calling attention to the ambiguity. Section 118 was placed in the House bill. Then when we referenced in the action taken in the House legislation, we had overlapping and inconsistent provisions. The Senate provision which is referenced in is the appropriate one and section 118, carried in the House bill, is the inappropriate one.

I concur in the action, and I move that the amendment be adopted to strike section 118.

Mr. HATFIELD. Mr. President, this is one of those amendments that has been checked on both sides of the aisle and it is acceptable to the committee.

The PRESIDING OFFICER. Is all time yielded back?

Mr. BRADLEY, I yield back my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment (UP 1524) was agreed to.

Mr. BRADLEY. I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I yield to the Senator from South Dakota.

UP AMENDMENT NO. 1525

(Purpose: To require the National Institute on Aging to spend no less than \$6.5 million for research on Alzheimer's disease in 1983)

Mr. PRESSLER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from South Dakota (Mr. Pressler) for himself, Mr. D'Amato, and Mr. Levin proposes an unprinted amendment numbered 1525.

At the appropriate place in the resolution, insert the following language: "Of the amount available under this joint resolution for programs of the National Institute on Aging, no less than \$6.5 million shall be made available for research on Alzheimer's disease."

Mr. PRESSLER. Mr. President, my amendment would require the National Institute on Aging to spend no less than \$6.5 million for research on Alzheimer's disease in 1983. This amount represents an increase over the amount devoted to this type of research last year. I feel it is very important to build on the progress researchers have already made in this area against this much misunderstood disease.

This tragic illness affects between 500,000 and 1,500,000 older Americans. For its victims and their families and friends, there is very little help. Alzheimer's disease can cause memory loss, speech impairment, confusion, and personality changes. To watch a loved one suffer from these debilities is heartbreaking. In its later stages, the disease may often result in lower resistance to pneumonia and other illnesses. As a result, some estimate that as many as 50 percent of the victims of Alzheimer's disease die of pneumonia. According to the Alzheimer's Disease and Related Disorders Association, 120,000 die each year as a result of Alzheimer's disease, making it the forth leading cause of death in this country.

The National Institute on Aging has done some very promising research on Alzheimer's. The committee report acknowledges the fact that one of the main objectives of NIA is to address and resolve the devastating problem of senile dementia, especially the dementia known as Alzheimer's disease. I ask only that this body affirm its belief in the importance of finding treatment for this disease which strikes down so many of our older Americans.

My amendment would provide modest increase for important additional efforts to conquer this illness and I urge its adoption.

Mr. LEVIN. Mr. President, although Alzheimer's disease was first discovered many years ago, only in relatively recent years have we realized the extent of this incurable ailment.

For up until modern research discovered the extent of this illness it was often misdiagnosed and thought simply to be a normal occurrance afflicting the aged.

Now we know that its effects-loss of memory, inability to store new information and speech disturbances-are not symptoms of senility but of a disease of the nervous system that may begin to afflict people in their fifties adn sixties.

As the diagnosis of this ailment improves, we are finding more and more people who are sufferings from this ailment.

I commend my colleague for his initiative. It is an important and sensitive

HATFIELD. Mr. President, would the Senator from New Mexico like to be recognized on this amendment?

Mr. SCHMITT. Just very briefly, Mr. President.

Mr. HATFIELD. I yield to the Sena-

tor from New Mexico.

Mr. SCHMITT. Mr. President, the subcommittee and the full commitee have recognized for many years the critical nature of this disease as well as other diseases affecting the aged, and we have continually increased the funding for and we have also encouraged the Institute to move forward in building a base for research on Alzheimer's disease specifically. My only concern with the Senator's amendment is that when you earmark research funds, you have to spend them whether there are people out there ready to do research or not.

I guess we will give this one a shot and see what it looks like, review it again in the hearings next year. I strongly recommend to the committee to be receptive to any reprograming that might be necessary, if in fact the money can be spent usefully in this

area of research.

I come from the field of scientific research myself, and I can guarantee the Senator that at times you just cannot spend all the money given, at least cannot spend it wisely.

But I would be happy to recommend to the committe and the Senate that

they take this amendment.

Mr. HATFIELD. Mr. President, with those expressed concerns, the committee will accept the amendment of the Senator from South Dakota.

The PRESIDING OFFICER. Is all

time yielded back?

Mr. HATFIELD. All time is yielded back.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (UP No. 1525) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PRESSLER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### UP AMENDMENT NO. 1526

Mr. HATFIELD. Now, Mr. President, let me inquire if the Senator from Washington State has a 30-second amendment.

The PRESIDING OFFICER. The

Senator from Washington.

Mr. GORTON, Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Washington (Mr. GORTON) proposes an unprinted amendment numbered 1526.

Mr. GORTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert:

SEC. . Upon request of the City of Tacoma, Washington, the Secretary of Commerce shall authorize such City to sell or lease to any person the Pantages Centre for the Performing Arts building, without affecting the Federal assistance provided under the Public Works and Economic Development Act of 1965 (project number 07-11-02513), if such transfer documents provide for the operation of such facility as a performing arts center for at least twenty-five (25) years after such transfer.

Mr. GORTON. Mr. President, the people of Tacoma, Wash., with an EDA grant have refurbished the magnificent Pantages Theater which will be opened on February 15 of next year. Because it will incur considerable operating losses, they discovered that those losses can be cut significantly by a lease-back arrangement with private parties under which all of the conditions of the EDA grant will be met.

Nevertheless, it is technically illegal, and the EDA grant would be asked for in full return by EDA under the present circumstances. This will obviate that necessity while protecting the nature of the theater through its entire useful life.

The Pantages Theater is an historic building located in the heart of downtown Tacoma, Wash. The theater was constructed early in Tacoma's history but in recent years it fell into disuse and serious disrepair.

Several years ago the citizens of Tacoma launched a campaign to restore the old theater as a public performing arts center. It netted more than \$1.5 million in private contributions. Other funds were raised by Tacoma and by the State of Washington but that project was still \$1.5 million short of the \$5.6 million needed for the theater's renovation and rehabilitation.

The theater's furture seemed assured when the Economic Development Administration approved a \$1.5 million grant of the costs of renovation. Central to EDA's decision to award the grant was the theater's importance to downtown Tacoma as a central focal point and as a project essential to maintaining the city's current redevelopment momentum.

Rehabilitation of the Pantages Theater has proceeded on schedule and within budget. A formal opening is scheduled for February 15, 1983.

#### THE PROBLEM

At the time the city of Tacoma applied for the \$1.5 million EDA grant, it understood that the theater would incur modest operating deficits and that, as with nearly all public performing arts centers, some sort of municipal subsidy would be required.

Since those initial estimates were made, however, the projected gap between expenses and revenues has increased dramatically. At the same time the city of Tacoma's ability to fund theater operating deficits from its own revenues has substantially eroded. The likely result is that although renovation may be completed, the theater may not meet the city's expectations as a center available to a wide spectrum of performing arts groups.

#### A SOLUTION

As soon as the growing problem with the theater's operating deficit was identified, the city of Tacoma began to explore ways of reducing it. In this investigation, it was determined that if the theater were owned privately, its operational costs could be lower even though the theater would be utilized for the same public performing arts purposes as under city ownership.

In brief, it has been determined that after the Economic Recovery Tax Act of 1981, the Pantages Theater has real economic value to private investors that could be realized by a sale or long-term lease from the city, even though the facility would be used for the purposes specified in the EDA grant for the full length of the 25 year period required by that grant. Similar sales or leases of public buildings have already occurred in a number of States including a sale and long-term lease back of the Oakland Public Art Museum in the city of Oakland, Calif.

The proceeds of the Tacoma sale or lease, estimated to be approximately \$1.4 million, would be placed by the city in a trust fund. The income from this fund would be utilized to offset the theater's operating deficits. Without this income, the theater's longterm future is in doubt.

# THE NEED FOR THIS AMENDMENT

Under EDA regulations, its approval is required for any transfer of property funded in whole or in part by that Agency. When the city of Tacoma

sought such approval, however, EDA responded that it was unable to do so.

I understand that EDA officials are satisfied that the theater would continue to be used for the purposes specified in the grant and that EDA understands the need to obtain additional operating revenues. I also understand that EDA officials agree that under their regulations the agency appears to have the discretion to approve the transfer. The problem arises from general regulations of the Office of Management and Budget which EDA interprets as requiring Tacoma to retain ownership interests in the theater or repay the \$1.5 million to EDA. Because a sale or lease of the theater must be effected before its opening on February 15, there is insufficient time to pursue amendment of the OMB regulations or obtain a determination that they do not apply.

To solve this dilemma, a legislative solution is needed to authorize a transfer. This amendment would authorize EDA to approve the transfer without requiring repayment of the grant. Under the terms of the city's proposal to EDA, the theater's use would be restricted to exactly the same purposes for the same period of time as it would if the city retained full ownership.

It is imperative that this amendment be adopted. Without it, the city of Tacoma may well lose a cultural centerpiece for which its citizens have worked so hard. Without it, EDA, ironically, may well see the failure of a public performing arts project that it originally deemed important for funding.

This amendment does no more than remove a technicality to permit an important public project to proceed to completion and operation on a self-sustaining basis. I urge my colleagues to support this amendment.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, both sides of the aisle have approved of this and the committee will accept it.

The PRESIDING OFFICER. Is all time yielded back?

Mr. HATFIELD. All time is yielded back.

The PRESIDING OFFICER. All time having seen yielded back, the question is on agreeing to the amendment of the Senator from Washington.

The amendment (UP No. 1526) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1527

(Purpose: To provide funding for the White House Conference on Productivity)

Mr. HATFIELD. Mr. President, I wonder if the Senator from New Mexico would handle his White House Productivity Conference that has been agreed to for 2 minutes.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from New Mexico (Mr. Schmitt) proposes an unprinted amendment numbered 1526.

Mr. SCHMITT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill add the following:

For activities of the White House Conference on Productivity, including the conduct of regional and local conferences throughout the United States, as authorized by Public Law 97-367, \$1,500,000.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, this amendment, as I indicated earlier, provides the appropriations necessary to put into being previously authorized White House Conference on Productivity. This conference was authorized under Public Law 97-367 signed into law by President Reagan on October 25, 1982.

The Conference is intended to provide a national forum for the discussion of methods for improving productivity performance in the American economy. A series of local and regional conferences similar to those conducted under the White House Conference on Small Business will maximize the opportunity for widespread public participation in the solution of the productivity growth problem. This amendment is intended to provide the necessary funds for the administration of the White House Conference on Productivity.

I ask its immediate adoption.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, this has been approved on both sides of the aisle, and I urge its adoption.

The PRESIDING OFFICER. All time yielded back on the amendment?

All time is yielded back. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (UP No. 1527) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### UP AMENDMENT 1528

(Purpose: To establish the annual rate of pay for Members of Congress at the rate of pay paid for Members on September 30, 1982, until superseded by law or by action under section 225 of the Federal Salary Act of 1967)

Mr. HATFIELD. Mr. President, in alternating, the comanager of the bill has suggested that we recognize Mr. Exon for the purpose of presenting an amendment.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I thank the managers of the bill. I yield myself 3 minutes.

Mr. President, I referenced the beginning of this discussion with House Joint Resolution 631, page 43, beginning on line 9, wherein the committee has struck the pay raise matter brought up by the House of Representatives.

Mr. President, the amendment that Mr. Heflin, Mr. Zorinsky, and I will be offering is nearly the same as S. 3042 to set salaries of Members of Congress at the current level and to repeal current law which provides for automatic increases in salaries from a permanent appropriation.

My colleagues will recall it was slightly more than 1 year ago, October 1981, that the Senate agreed to the current devious way of raising congressional salaries. It was accompanied on a continuing resolution just like the one before us. It was, therefore, legislation on a continuing resolution.

The key vote was taken on September 30, 1981, at a time when the Senate was under great pressure to complete the conference agreement with the House on a continuing appropriations resolution.

I now want to afford my colleagues an opportunity to correct that error. My amendment, if adopted, will require that future pay increases be adopted in a straightforward manner to reflect the votes of each individual Member.

There has been a lot of talk these last few weeks about Members having the courage on a pay raise question to stand up and speak their piece. For those who admire Members who are willing to do this, my amendment is suited to them to a tee.

Regardless of what happens with the congressional salaries this year or any future year, let us adopt my amendment now so that were move the cloud of deviousness and suspicion which, unfortunately, hangs over our heads because of our ill-advised actions of last year. The PRESIDING OFFICER. Does the Senator have an amendment to send to the desk?

Mr. EXON. I have an amendment to send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Nebraska (Mr. Exon) proposes an unprinted amendment numbered 1528.

Mr. EXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill insert the following:

SEC. . (a) Section 601 (a) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31) is amended—

(1) in paragraph (1)—

(A) by striking out "(1)";
(B) by redesignating clauses (A), (B), and (C) as clauses (1) (2), and (3), respectively; and

(C) by striking out ", as adjusted by paragraph

(2) of this subsection": and

(2) by striking out paragraph (2).

(b) (1) For the purposes of this subsection, the term "Member" means each individual referred to in clause (1) of section 601 (a) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31 (1)) as amended by subsection (a) other than any individual described in clause (2) or (3) of such section.

(2) (A) Notwithstanding any other provision of this joint resolution or of any other law (except as provided in subparagraph (B)), the annual rate of pay payable for a Member, the Speaker of the House of Representatives, the President pro tempore of the Senate, the majority or minority leader of the Senate, or the majority or minority leader of the House of Representatives shall be the annual rate of pay actually payable for such office, respectively, on September 30, 1982, under all applicable law.

(B) Each annual rate of pay established by subparagraph (A) shall remain in effect until superseded by a law enacted after the date of enactment of this Act or by action pursuant to section 225 of the Federal Salary Act of 1967 (2 U.S.C. 351 et seq.).

(C) The first sentence of section 130 (c) of Public Law 97-51 (95 Stat. 966; 2 U.S.C. 31 note) is amended by striking out "Effective beginning with fiscal year 1983, and continuing each year thereafter," and inserting in lieu thereof "For fiscal year 1983,".

Mr. EXON. Mr. President, I agree with the statement I have frequently heard that there never is a good time to raise congressional salaries. This is true, but I submit that under the current economics most would agree that there could not be a worse time to raise salaries than now. I congratulate the committee for at least knocking out that portion of the Senate pay raise that would otherwise have gone into effect.

The amendment would keep the salaries of Members at their current level, in both the House and the Senate.

I simply say that I hope we would address this matter now and repeal the law that was passed last year that allows automatic increases.

The PRESIDING OFFICER. The

Senator from Alaska.

Mr. STEVENS. Mr. President, the amendment of the Senator from Nebraska would attempt to repeal a portion of the law that was attached to the legislative section of the continuing resolution last year. There is nothing in this bill that pertains to that matter with the exception of a provision that specifically deletes the portions inserted by the House in connection with the increase in pay for members of the executive, legislative, and judicial branches.

I believe that there is no reason to deal with this section. This section treats Members of Congress the same as the members of the judiciary or members of the military, members of

the executive branch.

If there is a pay raise, it is funded out of existing funds until there is a specific appropriation for that purpose.

Mr. EXON. May we have order, please? It is difficult for me to hear the assistant majority leader.

The PRESIDING OFFICER. The

Senate will be in order.

Mr. STEVENS. I realize that we have very little time to review this. I have just received it in my hand. The impact of the amendment, though, is as

I indicated.

Mr. President, the effect of the amendment is to do what we have already done. We have already capped the salaries of the Members of the House of Representatives, the Speaker, the President pro tempore, and the majority leader, and the remaining members. Beyond that, it is not appropriate to consider this matter on the continuing resolution. It purports to prevent the enactment of future laws by Congress.

Mr. PROXMIRE. Mr. President, will the Senator from Alaska yield?

Mr. STEVENS. I do not have much time, but I do yield to my good friend.

Mr. PROXMIRE. Mr. President, as I understand it, what the Senator is saying, and I think it is correct, what the committee already did was to simply knock out what the House did on the pay raise. As far as we are concerned, we knocked out the congressional pay raise; is that right?

Mr. STEVENS. That is right.

Mr. PROXMIRE. Eliminated it. It is out.

Mr. STEVENS. I will state here again there will be no attempt in the conference committee to return with any provision in the conference report which would attempt to raise the pay of Senators.

Now, we made that commitment, but the House of Representatives is an independent body. They do set their al-

lowances and other things independently. It is normally done in a legislative appropriations bill.

But the Senator here is attempting to say that in the event there is a further enactment after the enactment of this act that deals with the Federal Salary Act it cannot take place.

I say respectfully to my friend that there is nothing in this bill to which that should attach. We can make points of order and everything else, but at this time of night after the Senator has used his time I shall ask to table this amendment and I believe firmly that we must maintain our position that we have as much right as the other body to set what rates of compensation or allowances we will get and that they have that right for themselves. They will determine that in conference. We may have to return here with something that is a different consideration, but again I say to my friend from Nebraska we have made a pledge to the Senate that we will not return with a bill that would attempt to change the pay of Senators.

The PRESIDING OFFICER. Is there further debate?

Mr. EXON. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 2 minutes and 6 seconds remaining.

Mr. EXON. Mr. President, I yield the remainder of my time to myself.

Mr. President, I have listened with interest and I expect that my able friend from Alaska has stated the case correctly, except the fact that, as I emphasized in my opening remarks, the essence of the amendment that I have proposed, for which I ask for the yeas and nays at this time.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, when the time expires I shall move to table. The PRESIDING OFFICER. The time has not yet expired.

Mr. EXON. Mr. President, as I said in my opening statement this amendment addresses directly the fact that incorrectly, in my opinion, we through a continuing resolution just like this one last year worked a system into where we would automatically have an increase in salary each year without voting on it and, furthermore, it was nicely handled; in addition thereto, we would not have to appropriate the money for the automatic increase that we would be entitled to.

Now we always have the option, as has been indicated, to cap it, and that is essentially what the committee did in this case, to cap the pay of the

I can see that what I am attempting to do here primarily is to repeal that section of the law that we passed on a continuing resolution just like this last year that set up the scheme where we would get a raise a year unless we turned it down.

I am trying to reverse it and say that if we need a salary increase, we should not get it automatically; we should stand on the floor of the Senate and vote whether or not we get it up or down

The PRESIDING OFFICER. The time of the Senator from Nebraska has expired.

Mr. STEVENS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Alaska has 53 seconds remaining.

Mr. STEVENS. Mr. President, I believe the Senate will agree with me that the amendment should be tabled. If we put this on the bill, some people will say take the amendment and take it off in conference. We have to meet the House. That means we will have all kinds of complications in this bill.

I urge the Senate, let us just table this amendment. We have been open and above board about what we are doing. The House will determine its of compensation. We have rate pledged we will not affect the Senate rate of compensation by that decision.

Mr. President, I move to table the amendment and ask for the yeas and nays.

PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were offered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Nebraska.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SCHMITT (after he had voted in the negative). Mr. President, on this vote I have a live pair with the Senator from Arizona (Mr. GOLDWATER). If he were here and permitted to vote he would vote "yea." I have voted "nay." I therefore withdraw my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Goldwater), is necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Califorina (Mr. CRANSTON), the Senator from Hawaii (Mr. INOUYE), and the Senator from Mississippi (Mr. Stennis), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators who wish to be recorded?

The result was announced-yeas 24, nays 71, as follows:

[Rollcall Vote No. 443 Leg.]

## NOT VOTING-4

Inouye Goldwater Stennis

So the motion to lay on the table Mr. Exon's amendment was rejected.

Mr. STEVENS. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STEVENS. What is the situation with regard to time on the principal bill?

The PRESIDING OFFICER. There is no time agreement on the bill.

Mr. STEVENS. So a Senator could speak on the bill for quite some time?
The PRESIDING OFFICER. The

Senator is correct.

Mr. LEAHY. Could we have order so we could hear the Chair's ruling?

The PRESIDING OFFICER. The

Senate will please be in order. Mr. STEVENS. Has the Chair recognized the Senator from Alaska?

The PRESIDING OFFICER. The Senator from Alaska has the floor.

Mr. STEVENS. Mr. President, I am happy to speak on the bill. I think you all ought to take your seats. I want to ask you to listen to me for just a few minutes.

The effect of the amendment that you just refused to table, which amendment really can get us into real difficulty-

Mr. KENNEDY. Mr. President, may

we have order? The PRESIDING OFFICER. The point of order is well taken. Senators will please take their seats. Staff mem-

bers will be in order. Mr. METZENBAUM. Parliamentary

inquiry.
The PRESIDING OFFICER. The Senator will withhold 1 moment. The Senate will be in order.

Mr. STEVENS. I do not yield for any purpose.

The PRESIDING OFFICER. The Senate will please be in order. The Senator from Alaska.

Mr. METZENBAUM. Parliamentary inquiry. Are we not under a time limit?

Mr. STEVENS. Mr. President, I do not yield for any inquiry. There is no time limit on the bill and I am entitled to address this bill as long as the Chair and the Good Lord will let me do so.

Mr. President, the impact of what we have done is to force the House to vote for a third time on whether the House will get a pay increase. This is not proper for the Senate to force that.

Do the Members of this Senate want to go home this year? This is an important provision for the Members of the House. They have voted.

We have every right to deny ourselves a pay increase, but how about the members of the executive branch and the members of the judiciary and the members of this staff that are around here? They are affected by this

The only reason I get involved in this every time-and every 2 years I say I am not going to do it again-is I am still chairman of the subcommittee that has jurisdiction over civil service matters. I am concerned about the impact of our continual failure to give ourselves increases when the effect of that is to cap the people in the civil service, in the judiciary, our own staffs.

We have excepted this year to the decision. We took whip checks; we know what you feel. And the feeling here is the Senate should not get a pay increase.

But why should the Senate take action to force the House to vote again as to whether it should get a pay increase? What about those people out there in the executive branch? They are going to get 4 percent. We voted before. We budgeted that they are going to get a 4-percent pay increase.

Did you realize, by voting not to table the Senator's amendment, that you are reversing that decision? The impact of that decision is, as I said, going to force a vote in the House.

Now, I plead with you to return to the idea of comity. Let the other House decide what its fate will be. Let us decide what the fate of this House

will be.

If you disagree with the prior action of the Congress that these other people should get this 4-percent pay increase, let us act on that. But let us not act in a manner that forces the House to reconsider its pay increase and, in effect, when it does it will restore the pay cap that will affect all of the judiciary, all of the executive branch and all of the members of the employees of the legislative branch.

For the life of me, I do not understand this. That was not a veto on a pay increase for the Members of the Senate, and most of you thought it was. And the very fact that we have been in session for 36 hours is leading to judgments that, in my opinion, are wrong. Unless we can find some way to return to some sanity, I think probably it is time for us to return to our homes.

I say to the Members of the Senate and my good friends, I do not like to get in this position, but we have. I said categorically to the Members of the Senate Appropriations Committee that it was our intent to go to the conference and allow the House to determine whether it wanted itself to have

a pay increase.

If it did, we would lift the pay cap for the judiciary, for the members of the executive branch who are entitled to a pay increase, and the employees of the Congress. But we would deny it to ourselves. We would not return there in any way to try to embarrass a Member of the Senate. All of you decided we should not have our own pay increase.

Mr. KENNEDY. Will the Senator vield?

Mr. STEVENS. I yield.

Mr. KENNEDY. Mr. President, i agree with the Senator from Alaska on this issue. What is very much at risk here is the respect of the American people for this institution.

A few days ago, the Senate voted to remove any ceiling on outside earnings from honorariums and other activities. That represents a substantial and undeserved back-door pay increase—far more than the House of Representatives voted for itself in the form of a direct pay increase.

I have voted consistently for reasonable pay increases in the past. But I have voted against back-door increases, because I think Members of this body should have the courage to vote directly for the pay they want.

At the same time, we all know that this is a very difficult time in our Nation's history and economy. Millions of our people have lost their jobs, and millions more are suffering. I do not think we were called back into a lameduck session to vote ourselves a backdoor pay increase. But it is sheer hypocrisy for this body now, after we have only just removed the limit on our own earnings from outside speeches, to refuse to respond to the Members of the House of Representatives and other Federal employees, who do not have access to all those handsome honorariums. When the country understands the hypocrisy and the inconsistency of the Senate's position, we are going to be the laughing stock of the Nation.

Tonight's vote is not going to end this issue for any of us who are part of this institution. If we think it is, we are making a great mistake. I urge the Senate to accept the position of the Senator from Alaska.

Mr. STEVENS. Do I still have the

floor, Madam President?

The PRESIDING OFFICER (Mrs. Hawkins). The Senator has the floor. Mr. STEVENS. I ask that I can yield to the majority leader without losing my rights to the floor.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. BAKER. Madam President, I made a remark once and I may live to regret it. I said once that I thought the Congress was institutionally incapable of adjusting its own salary. That is a shame. It is irresponsible.

I do not like this arrangement that we have of changing the cap so that it applies in one House and not in the other, but that is the way it is and

that is the way it has to be.

Madam President, this is not a perfect world and it is not a perfect solution, but it is the best that can be done. In my judgment, it will be highly irresponsible for us to upset an extremely delicate set of negotiations that led to this result. Procedurally, there is not much left we can do. The tabling motion failed and that is too bad. We will have a vote now on the amendment up or down. There are certain other things that might be done, but the cleanest most straightforward way is simply to defeat the amendment. I urge all Senators to understand that we are dealing not only with our own situation and with the House of Representatives, but we are dealing with the fundamental and basic question of whether we have courage to do what the Constitution charged us with doing. That is setting our own salary, which is difficult, politically embarrassing, politically explosive, but essential and necessary and we have to do it.

SEVERAL SENATORS addressed the

Mr. STEVENS. Madam President, I know better than to think that I can hold this floor very long on an issue like this. I have had several suggestions as to what could be done. One suggestion is that this bill is still open to amendment and I could file an amendment which would, in effect, nullify the Senator's amendment when it is adopted.

If that is adopted, neither one of them becomes law unless the House votes on them, which means that there is forced in the House another vote on the question of pay raise. I state that is unfair, for us to force the Members of the other body to another vote when they have voted twice already.

We could move to reconsider the matter. A Member who has already voted could move to reconsider. It would not be debatable, as I understand that. The bill itself is a matter

still subject to debate. But as a practical matter that would depend on the will of the Senate.

I want to thank the Senator from Massachusetts for his assistance, and the distinguished majority leader for his assistance.

All I can say is this means a great deal to a great many people, not just the Members of the House. It means whether the people who are working down to about the level 14 will get their increase or whether they are capped because we cap our own salaries.

If the House cap comes off, then the cap comes off for all of these other people, too. That is their decision. The Congress has made the decision time and time again if we cap our own salaries that automatically caps the rest of civil service, the judiciary, and the legislative branch.

I do not think that is fair. That is why I tried to arrange ways that we can avoid that cap. I am honest about it.

If I had my way we would vote the pay increase to Members of the Senate. But that issue was decided. Members told us not to do that. As I said, we took whip checks on both sides and it would not be approved. But why should our decision in this body affect so many people when it is so wrong?

Madam President, I do hope that there will be a reconsideration, that someone who voted the other way will move to reconsider.

SEVERAL SENATORS. Will the Senator yield?

Mr. STEVENS. I yield to the Senator from Massachusetts without losing my right to the floor, temporarily.

Mr. TSONGAS. Madam President, we have been on this bill for 36 hours and we are all complaining, and yet we get ourselves into this situation. I served in the House for 4 years. They went down to the well and voted. We are presumptuous to tell them what to do.

There is a difference. I did not have access to outside income as a Member of the House. I do as a Senator. The hypocrisy is outrageous. If I were a House Member standing back there, I would be very upset.

I took the position back home that I was against a salary increase for the Senate because we have access to outside income. I was for the increase for the House Members. I think that is the consensus here.

The problem with the amendment, and no one was very careful about drafting it, was that that which reflects the will of the Senate cannot be expressed.

The question is, how do you fashion a vehicle, a mechanism, to allow the consensus to be expressed? I for one would be willing, if I may say to my friend from Alaska, on reconsideration to vote with the Senator on the condition explicitly stated that it is the intent of the conferees to turn down the Senate pay increase and to accept the House increase. That being stated before the vote I think would give me the justification for that move.

Otherwise, we are going to be here for a long time. My family just left for Massachusetts. I would rather be with them than with some of the people I am here with. I hope people would

follow me.

Mr. STEVENS. Madam President, I shall state to the Senate or any Members of the Senate who were not here that I made the statement the Senator from Massachusetts wanted me to make prior to that vote. Unfortunately, that agreement for a time limitation was made when I was not on the

Does the distinguished Senator from West Virginia wish me to yield to him? Mr. ROBERT C. BYRD. Madam President, I seek the floor in my own

Mr. STEVENS. Madam President, I

yield to him.

Mr. ROBERT C. BYRD. Madam President, I have been through this baptism of fire. To those of you who remember the 29-percent pay raise around here, I led the fight. I tied it to the ethics bill. If we were going to have a pay raise of 29 percent, I felt we should have an ethics bill. But I stood up for that increase right up front, and went right down the cannon barrel. Of course, in the past campaign, my opponent reminded the voters of that.

I do not find anything wrong with the Senator's amendment per se. It makes the annual salaries payable on September 30, 1982, remain in effect until affirmatively changed by law. I see nothing wrong with that. The Constitution provides that Members of the Congress shall be paid a compensation by law. Those are not the exact words, but it is provided in the Constitution that the Members of Congress shall, by law, determine their compensation.

I am on record as being against a pay raise for Members of the Senate as of right now because of the high unemployment. I find it difficult when the Members of the House have taken a stand-openly, publicly, right above board, had two rollcall votes, and voted to raise their own pay. The House is acting in accordance with the Constitution of the United States.

They can and will answer to their own constituents. If their constituents do not like it because the House Members voted to increase their pay, their constituents will take care of that. Why should the Senate deny the other body the pay increase for its Members that it voted for openly? They did not have a voice vote, as I understand it, they had a RECORD vote.

It is all right if we want to deny Senators a pay raise, but House Members have voted to increase their own pay and I do not think we ought to interfere with the decision that they made with respect to their own compensa-

It will not be any precedent. In the early days of the Republic, Members of the Senate elected to pay themselves \$3 a day and pay the House \$2 a day for its Members over there. That arrangement did not last very long, because the House was indignant.

In any event, Senators were paid more than House Members and the House Members did not like it.

I hope that we would at least let the House Members be responsible to their own constituents for their own votes, which have been made in accordance with the Constitution, and that the Senate would not vote to take away the pay increase from the House Members which they have already stood up and openly voted for themselves. Senators are not affected and will not get an increase.

We do not have to vote ourselves a pay increase, but I do not think we should deny the House a pay increase

it has twice voted for.

Those Members who have to go to conference on this bill are going to have a lot of problems. I want to tell a little story. My senior colleague and I passed a bill through the Senate the other day that would make a few changes in the northern and southern judicial districts of West Virginia. We have one-and-a-half judges in the north and four-and-a-half judges in the south. We want two judges in the north and four judges in the south. When that little bill went to the House, it was held up. Why? Because Mr. DINGELL wanted to know whose bill it was. When they said it was Senator Byrn's of West Virginia, there was an objection to it. Why? Because 2 or 3 years ago, when I was majority leader, I opposed a 5-percent pay increase for all of us-not just for House Members, but for Senators also.

They have been taking it out on me ever since. They took it out on me on that little judgeship bill. They have shafted me before. They took it out on me a year or so ago, when I had an amendment adopted here in the Senate which would have allowed for accelerated depreciation on antipollution equipment for industries converting to coal. They remembered the little 5-percent pay increase for Senators and House Members which I had blocked.

The fact that I led the Senate in approving a 29-percent pay increase for Members of both Houses in 1977 is something that a few House Members choose to forget. They only remember the subsequent 5 percent which I helped to block, as majority leader,

and, as a result, some of my West Virginia projects have suffered.

But I did not just deny the House only a pay increase. I also denied Senators an increase on that occasion. In this instance, we would be denying House Members an increase that they stood up and openly and above board voted for. As the Senator from Massachusetts has already said, we have already taken action to lift a pay cap on our honoraria. I supported a cap on our outside earned income for Senators.

Madam President, I hope that we would think in this instance of the Members of the other body. Let their constitutents make the verdict as to whether those Members voted right or wrong or are entitled to the pay increase they voted for themselves. If a Member of Congress does not think he is worth \$60,000 annually to the Nation, he can turn his money back to the Treasury. He does not have to keep the money. He can turn it back.

So I shall make a point of order. I hesitate to make the point of order that the amendment is legislation on an appropriation bill, but it is. I hesitate because it is the amendment offered by my good friend, JIM EXON. But we ought to find some way of letting the House have its own pay increase and let the people in the congressional districts vote their own judgments on the matter. I am about ready to make the point of order.

Mr. RIEGLE. I wonder if the minority leader, while he has the floor, would yield to me just long enough to pose a question to the Senator from Alaska. I will be very brief about it because I think a lot of comonsense has been expressed by the remarks of the Senator from Alaska and the others who have spoken. One of the concerns that I heard rattling around the floor before the vote was that even though the intent as it was stated here was that the Senate would not get the pay raise and the House who voted for it would get the pay raise, somehow out of the conference something would be done to end up sending a package back here that would in some way include a pay raise for the Senate-not that that would be the intent of the Senator from Alaska but that somehow or another beyond our ability to prevent it that would happen.

I would say to the Senator, if the Senator can give an assurance here, an ironclad assurance that whatever comes back out of conference would not have a pay raise in it for Senators, I think the chance for achieving his result here is much better.

Mr. STEVENS. I say, if the Senator would yield to me-

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that I may yield a moment without losing my right to the floor.

Mr. STEVENS. Madam President, I thank the Senator from West Virginia. As the chairman of the committee points out, we had a vote in the committee on the issue in reverse. I made the statement in the Appropriations Committee, that was a pledge that we were prepared to enter into, that nothing could come from the conference committee which could in any way alter the compensation of Members of the Senate, and we intend to keep that commitment.

Every member of the Appropriations Committee who is here, I am sure, would reaffirm that that statement was made in the committee, and it was understood. We had one member who disagreed with the whole concept because of the honorarium mentioned, but we all made the commitment to one another that nothing would be done. The vote was 22 to 1 in committee. In effect we committed ourselves that we would take this back to the House with the pay cap restored. We merely in this bill continue the pay cap which has been in effect from October 1 until today. We continue that to September 30. But I announced to the Appropriations Committee that it was our intention to permit the House to make its judgment as to whether it wanted the pay increase, and if it did we would lift the cap for all members of the Government other than ourselves and nothing could possibly affect our salary.

I am pleased the Senator has given me the opportunity to restate that. It is a pledge I think not only of myself but of every member of the Appropria-

tions Committee.

Mr. RIEGLE. Will the Senator yield just 1 more minute? So to make it clear you are saying it is the pledge of all the members-maybe perhaps except one-on the Appropriations Committee on our side that nothing would come back from the conference with a pay raise in it. But let me ask the second question.

Is there any way that that could happen on the insistence of the House over the objection of our appropriation conferees? I assume the answer is no, but I think it is important that if that is the case it be stated so that it is crystal clear that there will not be a bill come back here with any pay raise.

Mr. STEVENS. It is absolutely certain it could not happen. We would

not accept such amendment.

We have already told the House and I might say to the Senator before we went to the Appropriations Committee with the suggestion I made I had conferred with the Members of the House, told the Members of the House it was impossible for the Senate to vote a pay increase for itself but in my judgment it was going to be the policy of the Senate that the House could make up its own mind concerning its own salary and that was the report I

brought to the Senate Appropriations Committee, that the House under-stood that and understood why we were placing the cap back on across the board. I thank the Senator.

Mr. LEAHY addressed the Chair. Mr. STENNIS. Madam President. the minority leader has the floor.

Mr. LEAHY. Will the minority leader yield to me just for a couple moments?

Mr. ROBERT C. BYRD. Yes, I yield. Mr. LEAHY. I thank our leader. Madam President, it is amazing with all the major issues that we have covered literally life and death issues and the defense budget and the human services budgets have been covered in just a few minutes' time. Here at the end of 36 hours or so of continuous nonstop session we seem tied up in this. I hope somebody will keep in mind that there is more to this than just salaries of the Senator, the salaries of the other body. This also, make no doubt about it, will ultimately carry the day with thousands of people in the senior civil service as well as members of the senior staff in both the House and the Senate.

Let me speak for just a moment as vice chairman of the Senate Select Committee on Intelligence. Without divulging areas that are of necessity classified, I see the salary scales in there. I know of instances where we spend enormous amounts of money, enormous amounts of money to develop the bases, sometimes the cover of people within our intelligence service, and then they leave because having spent such enormous amounts of money we can still pay them only about \$57,000 a year and they still have kids in college and they still have all these other expenses and they leave.

I know of the instances where we have developed expertise in handling multimillion dollar satellite systems, collection systems and then the people who have developed the expertise over the years run it, who can utilize in some instances hundreds of millions of dollars that we have spent in taxpayers' money, the people who have the knowledge to use it, they leave because we have frozen their salaries. I know in the area of law enforcement, right within the public record, look at the number of extremely good people, dedicated people who leave with experience that goes with it. Talk about the National Institutes of Health, talk about NASA, talk about our scientists and watch them leave. Look at our foreign service, look at our language experts, look at all these people who have developed skills that are highly marketable and watch them leave after we have invested in some instances literally millions and millions of dollars in developing their expertise and their positions and they then leave because we freeze them at

\$57,000. I am not suggesting that any of us are supposed to match dollar for dollar for the private sector, but let us not make idiots out of the U.S. Government. I yield back.

Mr. ROBERT C. BYRD. Madam President, I do not intend to hold the floor very much longer. I want the distinguished Senator from Nebraska to have an opportunity to respond.

May we have order in the Senate? I quote from section 6 of article I of the Constitution:

The Senators and Representatives shall receive a compensation for their services to be ascertained by law.

Now, who passes the law? The Members of the House and Senate. The distinguished Senator from Nebraska is doing what he thinks is right. He is trying to stop any back door, indirect approach, a raise in our salaries. That is what he is trying to get at, and he is to be lauded for that. But the effect of this language is going to be to make the House Members go back and vote a third time on a matter on which they have already taken an open stand. I do not believe we intend for them to do that or want them to do that. So I would shortly make the point of order that the amendment constitutes legislation on an appropriation bill, which is obvious on its face. I hope that Members will not raise the question of germaneness or attempt to overturn the ruling which the Chair will make.

But in saying this, I say it without any criticism toward the Member from Nebraska. I have been around here quite a while, 24 years in this body and 6 years in the other body, and I look upon him as one of the most courageous and most dedicated Members I have seen in 24 years of service in this body. He works hard and he does what he thinks. He has a mind of his own, he has a very strong will. I commend him for what he is trying to do here. His amendment is a commendable one per se. I am going to yield to him and then I want to make my point of order. I yield to the able Senator from Nebraska. I ask that the Chair protect my rights to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Madam President, I thank my friend from West Virginia, I thank the Chair, and I thank my colleagues and for what it is worth I would have done just what I did a few moments ago all over again despite the fact that I know that many of my colleagues are keenly disappointed in me.

I did not come here to represent my colleagues. I came here to represent

Mr. ROBERT C. BYRD. We are not disappointed in you. We are proud of you.

Mr. EXON. I thank you. I thank my friend.

I am here representing my constituents in Nebraska, and some of the things that I heard on the this floor tonight, attacking this outcome, was quite startling to me, and sometimes I wonder how close some of the people here in Congress are back home.

It is true that the people back in Nebraska are not going to feel too bad about the Federal employees only getting a 4-percent increase. The farmers who are going broke, with the highest unemployment rate that we have ever had are not going to be crying their eyes out in Nebraska. They are also not going to be very concerned about whether the House of Representatives gets an increase over their \$60,000 salary.

Let the RECORD show that it was not this Senator from Nebraska who said, "Do we look like a laughingstock?" No, it was not me. It was not the Senator from Nebraska who said, "What do we look like to the people?" It was not me who said that. But I heard it.

I also heard about the 29-percent pay increase, and I remember that. I was not here then, but I remember reading about it, that Senator Byrd, my friend from West Virginia, referred

that he led the fight on.

If my memory does not fail me—correct me if I am wrong—one of the reasons that he was able to get that courageous act through and probably it was needed at that time was that I believe that he put a very low cap on honoraria at that time. If I am wrong I stand corrected.

Let it also be said that it was not the Senator from Nebraska who brought up honoraria for the first time on this

floor in this regard.

It just seems to me, my friends, that we may be making a fundamental mistake. We are subscribing to the fact that our counterparts over in the House of Representatives, whether they make \$60,000 or \$160,000 for the year should be paid more and differently than the base salary of those of us who serve here in this body. Maybe that has been done before. I do not disagree with the argument that has been advanced here that they got the courage to get up and vote themselves a salary increase.

But I always thought, at least from my limited study of the Constitution, I thought this was two coequal bodies. You know it is not the lower and the upper House. It is equal. And I thought we should be paid equal.

One other thing I might say in regard to the honoraria, if we are really and truly concerned about those people over there on the other side making more money and if, as I kind of read between the lines, that was said here that if we somehow give them more money then evidently they will not complain about the more money that some of us can make here through honoraria.

If we really want to be fair with them, and I have a bill—I do not suppose I will have a chance to get recognized after this—but I have a bill that would take all honoraria and rather than retained by the honoraree at the special interest group dinner, it would all be pooled and then at the end of the year we take 565, that is the Members of the Senate and Members of the House of Representatives, and we just divide it up and everyone gets the same amount.

If we are really concerned about our colleagues over there fine and dandy.

Let me just say in closing it seems to me that we are not sure what the people think. It is very courageous for those to get up and say how courageous it was for those people to vote themselves a salary increase, and I agree that it was, and I salute them.

But I do not necessarily believe, my friends, that just because they voted themselves a salary increase we should say that is their right and let us let it go at that.

Madam President, I yield the floor.

Mr. ROBERT C. BYRD. Madam President, I did upon the occasion of fighting for the 29-percent pay increase also fight for a cap on the honoraria and, as I said a few moments ago, a few days ago I voted to retain that cap.

Mr. GARN. Mr. President, will the minority leader yield for a clarification quickly?

Mr. ROBERT C. BYRD. I yield.

Mr. GARN. I appreciate it. This is just a clarification because constantly in the press and this body we talk about honoraria, and I simply wish to remind the body and the press those limitations, the \$25,000 were limitations on all outside earned income.

Mr. ROBERT C. BYRD. The Senator is correct.

Mr. GARN. That is a very big distinction for this body and it would have gone to \$9,000 on January 1, not just on speechmaking—that is a separate issue that Senator Exon and others may feel differently about—but to impose limitations on all this group where there is no limitation on unearned income let us remember that not just limitations were on honraria. There were strict limitations on all outside earned income. You could not have a Washington Post paper route, a part-time job at Dart Drug or anything else—all outside income.

I just want to once more try to get us to understand that, that it was not just honoraria but all outside earned income.

Mr. ROBERT C. BYRD. The Senator is correct, and I am glad he so stated it for the Record, even though some of us in this body fall into the practice of referring to it as only honoraria. The Senator is precisely correct.

I again say that the Senator from Nebraska has done what his conscience has directed him to do. The language that he has here conforms with the language in the Constitution. But on this particular bill I believe it is legislation offered on an appropriatons bill.

I therefore, make that point of order.

The PRESIDING OFFICER. His amendment is legislation on the appropriations bill and therefore falls.

Mr. HATFIELD. Madam President, I wish to now ask Senator Percy—is he present—and Senator McClure to offer his amendment at this time in keeping with our routine that we have been following.

Mr. McClure and Mr. Kasten will offer their amendment and that is a 5-minute amendment.

#### UP AMENDMENT NO. 1529

Mr. KASTEN. Mr. President, I have an amendment on behalf of Mr. McClure and myself and I send it to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. Kasten) for himself and Mr. McClure proposes an unprinted amendment numbered 1529.

Mr. KASTEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in title I add the following new section:

SEC. Notwithstanding any other provision of law or this joint resolution, \$10,000,000 in additional funds are made available for "International Organizations and Programs" to carry out the provisions of section 301 of the Foreign Assistance Act of 1961; Provided, That these funds are made available only for payment to the International Atomic Energy Agency; Provided further, That these funds or any other funds in this joint resolution may not be made available for payment to the International Atomic Energy Agency unless the Board of Governors of the International Atomic Energy Agency certifies to the United States Government that the State of Israel is allowed to participate fully as a member nation in the activities of that Agency, and the Secretary of State transmits such certification to the Speaker of the House of Representatives and the President of the United States Senate.

The PRESIDING OFFICER. The Senate is not in order. Those persons who wish to carry on conversations, please retire to the cloakrooms.

Mr. KASTEN. Mr. President, in an effort to try to resolve the matter of funding for the International Atomic Energy Agency, Senator, McClure and I have an amendment which I believe will satisfy the concerns of all. The committee's position as it now stands, and which was agreed to in the record-

ed vote in the foreign aid section last night, provides no funding for IAEA pending resolution of the action whereby Israel was denied its credentials at the IAEA conference last fall.

The committee recommended this action in accordance with the concurrent resolution which passed the Senate in April by unanimous vote-a concurrent resolution which had 54 cosponsors-and which passed the House of Representatives on a recorded vote of 401 to 3. This resolution stated that if Israel or any other "democratic state is illegally expelled, suspended, denied its credentials, or in any other manner denied its right to participate in the General Assembly of the United Nations or any specialized agency of the United Nations" funding would be denied until "this illegal action is reversed."

The committee felt that to do otherwise would be completely contradicto-

Because of the concern of my good friend from Idaho, we are suggesting an amendment which would be added at the end of the joint resolution making funds available for the IAEA subject to the following proviso:

That these funds or any other funds in this joint resolution may not be made available for payment to the International Atomic Energy Agency unless the Board of Governors of the International Atomic Energy Agency certifies to the United States Government that the State of Israel is allowed to participate fully as a member nation in the activities of that Agency, and the Secretary of State transmits such certification to the Speaker of the House of Representatives and the President of the United States Senate.

Therefore, with this amendment the money is there and will go forward to IAEA if Israel is otherwise a fully participating member of that organiza-

Mr. President, Senator McClure and I believe this alleviates the concerns of the committee in upholding the concurrent resolution which passed in April, and also the concerns of the De-

partment of State.

Mr. President, I have also cleared this amendment with the ranking member of the Foreign Operations Appropriations Subcommittee, the distin-

guished Senator from Hawaii.

Essentially what we have done is compromise on the original language. Madam President, and made it possible for IAEA to recognize that Israel is, in fact, participating in that Agency on a day-to-day basis.

I would like to thank the Senator from Idaho and the Senators from New York, Ohio, and Hawaii for their help and work in finding a compro-

mise on this issue.

# IAEA FUNDING

Mr. McCLURE. Mr. President, my purpose in offering this amendment is to restore money to international organizations and programs for the purpose of funding the contribution of the United States to the International Atomic Energy Agency. Adoption of the amendment would result in a total of \$230.2 million for voluntary contributions to international organizations and programs.

In its report, the Appropriations Committee recommended that the funding for the U.S. contribution to the IAEA for fiscal year 1983 be reduced to zero. The administration's budget request for fiscal year 1983 was \$14.5 million. The funding for the previous fiscal year was \$12.75 million. which is the amount approved by the House for fiscal year 1983. Thus, the amendment would restore the amount contained in the House bill, and it would continue last year's level of funding.

Mr. President, the action of the Committee on Appropriations apparently was prompted by a concurrent resolution, passed by the Congress earlier this year. The resolution expressed the sense of the Congress regarding how the United States should respond if the State of Israel were illegally denied its rights to participate in the U.N. General Assembly or any agency of the United Nations. The resolution provided that if such an action were taken by a United Nations agency, the United States should, among other things, withhold its assessed contribution to the agency involved until this illegal action is reversed. In its report on S. 3075, the Committee on Appropriations stated that under the circumstances, "the committee does not believe it has any other choice but to zero the funding for the IAEA."

Without arguing as to whether or not this conclusion is correct, let me

examine the consequences.

Mr. President, if the United States were to withdraw its financial support for the IAEA, the consequences would be extremely damaging to our national security interests. The loss of this funding would cripple our efforts to improve the IAEA safeguards program. It would also seriously undercut the firm U.S. policy of supporting and strengthening IAEA safeguards, a policy established by the Congress in the Nuclear Non-Proliferation Act of

If the level of funding were retained at last year's level, approximately \$5.3 million of the contribution would be directly applied to the IAEA safeguards program and related nonproliferation efforts. Under the program, the United States also provides costfree experts to work with IAEA in developing procedures used in the IAEA program. The United States provides training at Los Alamos for IAEA safeguards inspectors. U.S. contributions represent 25 percent of the total IAEA safeguards budget. The balance of the funds-\$7.4 million-would be used for other IAEA activities, primarily in the area of technical assistance, fellowships training, and cost-free experts.

I would also like to point out that a cutoff of our IAEA contribution would have a substantial negative impact on our nuclear-related exports. The IAEA purchases much of its equipment from U.S. suppliers. In fact, the IAEA spends more in the United States on equipment than we contribute voluntarily to IAEA. Moreover, if IAEA safeguards were ultimately judged inadequate by the U.S. Nuclear Regulatory Commission, our nuclear exports across the board would be jeopardized, most probably frozen. That result would occur because the Nuclear Non-Proliferation Act of 1978 requires an NRC finding of adequate safeguards.

Mr. President, I cannot emphasize too greatly the importance of the IAEA to this country's and indeed the world's nuclear nonproliferation programs. IAEA safeguards are the critical element of over 100 nations' adherance to the Nuclear Non-Proliferation Treaty. Even this Nation utilizes IAEA safeguards for domestic nuclear reactors under the 1980 U.S. IAEA Treaty, to which this Senate gave advice and consent in the last Congress.

What signal on nuclear nonproliferation does the Senate and the United States give to the world if we now abandon our funding and support for the IAEA? How do Iraq, Pakistan, India, and other nations with advanced nuclear power programs assess our continued commitment to U.S. nuclear nonproliferation policy if we now reject the very international agency which we helped create in the mid-1960's to foster the safeguards necessary for the civilian nuclear power programs under the Atoms for Peace program. The answer, Mr. President, is quite apparent. Neither this Nation nor the world can afford to allow such a catastrophic abandonment of our three-decade commitment to internationally safeguarded nuclear power.

For these reasons, Mr. President, a continuation of the funding would clearly be in our national interest.

I want to thank my friend, the distinguished Senator from Wisconsin for meeting me part way in making it possible to avoid these consequences. Certainly, if IAEA should expel Israel, the funds would lapse and we then would face the necessity of finding other solutions. But, Mr. President, I don't believe this will happen.

I thank Senator Kasten.

Mr. GLENN. Madam President, will the Senator yield 1 minute?

Mr. KASTEN. I would be pleased to vield.

Mr. GLENN. I rise in support of this amendment. One of the earliest amendments I put in in the Senate when I came here 8 years ago was to raise enough money to get inspectors for IAEA. We have all been critical of IAEA. However, it is the only game in town. If I had any criticism at all I believe it was in the fiscal level of funding. It was \$12.7 million, and we are only putting in \$10 million on this.

I would say the language also says "fully," that Israel should be restored fully. I would have preferred that maybe it should be "with full and unimpeded participation," so that there could not be any doubt whatsoever about their participation. But I do rise in support of the amendment. I think it is good it was put in and I compliment the cosponsors of the amendment.

Mr. KASTEN. I would like to thank

the Senator from Ohio.

Mr. MOYNIHAN. Madam President, may I join in commending the Senator from Wisconsin and the Senator from Idaho. It is a very statesmanlike resolution of a difficult matter. It happens, and not by happenstance, that the IAEA was chosen as the target of the anti-Israeli move because it is the agency which we wish all countries to be part of, and which we would most wish to support.

I think we have made our point. I think the matter is understood in Vienna, and we certainly keep very close attention to the developments. I

thank the Senator.

The PRESIDING OFFICER. All

time is yielded back.

Mr. HATFIELD. All time is yielded back. We are willing to accept the amendment.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 1529) was

agreed to.

Mr. KASTEN. I thank the Chair.

Mr. HATFIELD. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that

motion on the table.

The motion to lay on the table was

Mr. HATFIELD. I would like to yield now to the majority leader momentari-

The PRESIDING OFFICER. The majority leader.

# STATUS OF AMENDMENTS

Mr. BAKER. Madam President, I thank the distinguished chairman. I would invite the intention of Senators to the fact that we made good progress since we tried to get a unanimous-consent agreement on these amendments. According to my count, we have five amendments on which we have time agreements that we have not disposed of yet. None of them is long. We have not gotten time agreements on several others, and I would like to renew my request there, if I might.

To begin with, Madam President, I understand there may be some reason

to think we can agree on a time limitation of 20 minutes each in respect to three Helms amendments-there are four of them but this would apply only to three of them; that is, the pay cap, IDA, and law of the sea.

Mr. PELL. Mr. President, what does the law of the sea amendment do?

Mr. BAKER. I regret to say I cannot tell the Senator that.

Let me pass over the Helms amendments for the moment. I thought they were worked out, and let me go beyond those.

Madam President, there is a Cohen amendment, discretion of State spending on weatherization. I put that earlier and withdrew the request proposal the distinguished Senator from Maine, which is for a 2-minute time limitation, and I would like to repeat that request at this time.

OFFICER. The PRESIDING there any objection? Without objection, it is so ordered.

Mr. BAKER. Madam President, the

Mr. ROBERT C. BYRD. Madam President, may I say to the distinguished majority leader I believe Senator Long raised a question about that earlier.

Mr. BAKER. That is right. I ask unanimous consent that action on that be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, the two Glenn amendments, I believe, have been cleared now.

Mr. GLENN. That is correct. Senator Long looked at those amendments and we agreed to 20 minutes on both of those, on each one of them.

Mr. BAKER. Then I ask unanimous consent that on two Glenn amendments, one dealing with Arms Export Control Act sales procedures and one dealing with the transfer of sensitive U.S. military equipment to foreign nations, that there be a time limitation of 20 minutes each to be equally divid-

Mr. ROBERT C. BYRD. Madam President, reserving the right to object, will the majority leader reinstitute the language he used earlier?

Mr. BAKER. That is correct. The earlier request included the proviso that this would not include any point of order that would lie against the amendment, that no amendment would be in order to the amendment.

Mr. ROBERT C. BYRD. In each in-

Mr. BAKER. Yes, as I did previously, I ask that that condition extend to each amendment on the list.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Could I inquire if the Dodd amendment dealing with Central America has been cleared?

Mr. DODD. Mr. Majority Leader, I believe it has been. I would like to make an exception to the general unanimous-consent request in that there will be a substitute offered to that amendment that I will offer. We have an understanding to that degree and our unanimous-consent request would be the same as all the others. with that exception that in this case there would be an amendment in the second degree.

Mr. MOYNIHAN. An amendment in the nature of a substitute.

Mr. DODD. Yes.

Mr. BAKER. Madam President, I put that request under the same terms and conditions, that is, on the Dodd amendment, 20 minutes equally divided and that a second-degree amendment in the nature of a substitute will be in order but to be included within the 20 minutes.

Mr. DODD. Mr. President, will the majority leader yield? Can we make that a request for 30 minutes, given the fact there are two amendments?

Mr. BAKER. Yes, I amend the request to that extent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

I wonder if we can clear the Hatch-McClure-Kennedy amendment dealing with the arts and humanities. That was withdrawn earlier because there was not a time limitation suggested on it. Madam President, I do not see the principals involved on the floor at this time so I withdraw the request.

Madam President, I have a notation here that there was to be a Chafee amendment in the second degree to

the Dodd amendment.

Mr. CHAFEE. I have withdrawn that.

Mr. BAKER. Madam President, I see the Senator from Idaho on the floor and I ask him whether or not we can get a time agreement on Hatch-McClure-Kennedy, an amendment dealing with the National Endowment for the Arts?

Mr. McCLURE. I think that matter would be relatively simple. It would be an add-on for some money for some activity that is supported by the two other Senators involved. Senator HATCH, as you know, because of a foot injury has not been able to stay on the floor, and I am really doing this primarily for the opportunity he would have to aprovide that add-on.

Mr. PELL. Add-on.

Mr. McCLURE. Yes. To the best of my knowledge it is either something that would be worked out and accepted quickly or something that would not even be offered.

Mr. BAKER. Madam Pesident, the Senator from Idaho suggests 5 minutes equally divided, and I put that request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Madam President, there are other amendments as follows: Two Boren amendments, one dealing with monetary policy resolution and the proposal is for 20 minutes, equally divided and a qualified Garn second-degree amendment germane to the first-degree amendment on which there will be 15 minutes, equally divided. Could I inquire of the principals if that is agreeable?

Mr. BOREN. If the majority leader would yield, that would be agreeable to me.

Mr. ROBERT C. BYRD. Mr. President, could we do both of those amendments, rather than one in the second-degree, do them separately? I have a little problem with the amendments myself. I would like to have votes on the two amendments separately and Mr. Garn would probably prevail on his.

Mr. BOREN. The Senator from Utah says he would not be willing to enter into a separate vote on the two.

Mr. BAKER. Madam President, it might be better to cancel that request.

Mr. BOREN. Madam President, I have an amendment relating to the Federal Home Administration and the Small Business Administration loan deferral. Teh only objection to that was raised on this side by the Senator from Ohio who now informs me that is now cleared, as far as he is concerned. So I think we could enter into a 20minute time limitation, equally divided, on that.

Mr. BAKER. That is the notation I have. Let me put the request for the benefit of all Senators.

I ask unanimous consent that on a Boren amendment dealing with the FHA-SBA loan deferral, there be a time limitation of 20 minutes to be equally divided.

Mr. DOMENICI. Might I inquire, Mr. Leader, how much does that amendment cost?

Mr. BOREN. I was not present during some of the discussions about that. The Senator from New Mexico may have more information than I have. I think it is very difficult to say how much it would cost.

Mr. DOMENICI. If I did, I would have stood up and said that this is what it costs. I am really interested in it. When we have these loans, they run anywhere from \$100 million to \$1 billion. I would like to know if we need a little bit of time. If it is going to be too costly, I would appreciate knowing. Unless we find out, I would object.

Mr. BOREN. The policies stated are exactly the regulatory policies of the Farm Home Administration. I assume if they are following the policies, it have negligible financial would impact. But that is just my own personal opinion and I cannot cite that as an authority.

may I suggest we pass that amendment.

Mr. BAKER. I agree with the suggestion of the Senator from Mississippi. Madam President, I withdraw that request.

Madam President, I state to the distinguished chairman of the committee and the ranking member and the minority leader, it is now 5 minutes to 11. I think we have made good progress on this measure. We are within striking distance, in my opinion. There are other amendments that we could try to get agreements on tonight, but, judging by the attitude of the Senate, I think we are going to be able to resolve the remaining issues.

I had hoped not to go out tonight unless we could get a time certain for final passage, but I think it is worth the risk now. I think there is such a burden of fatigue in the Senate that I really believe we ought to go out until tomorrow.

Could I inquire of the distinguished chairman of the committee if that is agreeable to him?

Mr. HATFIELD. Madam President, I wish to suggest that we have two very brief amendments that I would like to finish tonight, one by the Senator from Missouri (Mr. Danforth), who has been patiently waiting and has been taken out of turn a number of times, which has a time limitation of 5 minutes, and the other an amendment by the Senator from Illinois (Mr. PERCY), which is about 1 minute. No record votes are anticipated on either one. These are ones that already had time agreements reached.

Mr. BAKER. Can the distinguished chairman of the committee advise me whether record votes will be required on these amendments?

Mr. HATFIELD. Not on the amendment of Senator Percy, and I do not believe on the amendment of Senator DANFORTH.

Mr. BAKER. Madam President, I wish to announce that there will be no more record votes tonight.

## ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Madam President, ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 11 a.m. tomorrow.

The PRESIDING OFFICER. With-

out objection, it is so ordered. Mr. BAKER. Madam President, may

we have order? The PRESIDING OFFICER. Order

in the Chamber, please.

Mr. BAKER. Madam President, there are three appointments of conferees that I would like to do at this time. If the minority leader can approve them, I would like to state them

Mr. COCHRAN. Madam President, now for the consideration of the Senate.

The PRESIDING OFFICER. The Senate will be in order so the conferees' names can be heard.

Mr. BAKER. I thank the Chair.

#### ORDER OF PROCEDURE

Mr. BAKER. Madam President, I ask unanimous consent that the pending measure be temporarily laid aside and recur as the pending business after the disposition of three measures that I am about to present and that the time consumed therein shall not exceed 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. And that no proposal be the subject to amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TECHNICAL CORRECTIONS TO CERTAIN TAX ACTS

Mr. BAKER. Madam President, I ask that the Chair lay before the Senate a message from the House on H.R. 6056.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representa-

Resolved, That the House agree to the amendments of the Senate numbered 2, 3, 4, 5, 6, 7, 8, 11, 12, 13, 19, 20, 21, 22, 23, 25, 28, 29, 32, and 35 to the bill (H.R. 6056) entitled "An Act to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980."

Resolved, That the House agree to amendment of the Senate numbered 1 to the aforesaid bill with amendments as follows:

(1) Page 1, line 4, after "1981)", insert: ", as amended by section 206(b)(1) of the Tax Equity and Fiscal Responsibility Act of

(2) Page 4 of the House engrossed bill, after line 14, insert:

(aa) AMENDMENT RELATED TO SECTION -Clause (ii) of section 102(b)(1)(B) of the Economic Recovery Tax Act of 1981 is amended by striking out "qualified net capital gain" and inserting in lieu thereof 'qualified net capital gain (or, if lesser, the alternative minimum taxable income within the meaning of section 55(b)(1) of such Code)".

(3) Page 8 of the House engrossed bill, line 12, strike out ["(12)"] and insert: "(13)"

(4) Page 11 of the House engrossed bill, after line 7, insert:

(aa) AMENDMENT RELATED TO SECTION 202.—Subsection (d) of section 179 (relating to election to expense certain business assets) is amended by adding at the end thereof the following new paragraph:

"(10) RECAPTURE IN CERTAIN CASES. Secretary shall, by regulations, provide for recapturing the benefit under any deduction allowable under subsection (a) with respect to any property which is not used predominantly in a trade or business at any time before the close of the second taxable

year following the taxable year in which it is placed in service by the taxpayer.

(5) Page 19 of the House engrossed bill, in the matter following line 18, strike out [1371(g)], and insert: "1361(d)".

(6) Page 40 of the House engrossed bill, strike out line 23 and all that follows over to and including line 4 on page 41, and insert:

(8) TREATMENT OF ANNUITIES.—Clause (ii) of section 2056(b)(7)(B) is amended by adding at the end thereof the following new sentence: "To the extent provided in regula-tions, an annuity shall be treated in a manner similar to an income interest in property (regardless of whether the property from which an annuity is payable can be separately identified)."

Resolved, That the House agree to the amendment of the Senate numbered 10 to the aforesaid bill with the following amend-

ment:

Page 5, strike out lines 19 and 20, and "such determination occurs or the insert: month in which the hiring date occurs".

Resolved, That the House agree to the amendment of the Senate numbered 14 to the aforesaid bill with an amendment as follows

In lieu of the matter stricken and inserted by said amendment, on page 53 of the House engrossed bill, strike out line 1 and all that follows over to and including line 2 on page 54, and insert:

(A) CASH SETTLEMENT CONTRACTS.—Subsection (b) of section 1256 (defining regulated futures contract) is amended by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2),

respectively. (B) FOREIGN CURRENCY CONTRACTS.—Subsection (b) of section 1256 (as amended by subparagraph (A)) is amended by adding at the end thereof the following new sentence: "Such term includes any foreign currency

contract."

(C) FOREIGN CURRENCY CONTRACT DEFINED. Section 1256 is amended by adding at the end thereof the following new subsection:

"(g) FOREIGN CURRENCY CONTRACT DE-FINED.

"(1) FOREIGN CURRENCY CONTRACT.-FOr purposes of this section, the term 'foreign currency contract' means a contract

"(A) which requires delivery of a foreign currency which is a currency in which positions are also traded through regulated futures contracts,

"(B) which is traded in the interbank

market, and

'(C) which is entered into at arm's length at a price determined by reference to the

price in the interbank market.

"(2) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of paragraph (1), including regulations excluding from the application of paragraph (1) any contract (or type of con-tract) if its application thereto would be inconsistent with such purposes.'

Resolved, That the House agree to the amendment of the Senate numbered 16 to the aforesaid bill with the following amend-

Page 8, strike out lines 14 through 23, and insert

(iii) ELECTION BY TAXPAYER WITH RESPECT TO POSITIONS HELD DURING TAXABLE YEARS ENDING AFTER MAY 11, 1982.—In lieu of the election under clause (ii), a taxpayer may elect to have the amendments made by subparagraphs (B) and (C) applied to all positions held in taxable years ending after May 11, 1982, except that the provisions of sec-

tion 509(a) (3) and (4) of the Economic Recovery Tax Act of 1981 shall not apply.

Resolved, That the House agree to the

amendment of the Senate numbered 17 to the aforesaid bill with the following amend-

Page 9, after line 16, insert:

(e) AMENDMENT RELATED TO SECTION 507 .-Section 1234A (relating to gains or losses from certain terminations) is amended to read as follows:

"SEC. 1234A. GAINS OR LOSSES FROM CERTAIN TER-MINATIONS

"Gain or loss attributable to the cancellation, lapse, expiration, or other termination

of—
"(1) a right or obligation with respect to personal property (as defined in section 1092(d)(1)) which is (or on acquisition would be) a capital asset in the hands of the taxpayer, or

"(2) a regulated futures contract (as defined in section 1256) not described in paragraph (1) which is a capital asset in the hands of the taxpayer,

shall be treated as gain or loss from the sale

of a capital asset." Resolved, That the House agree to the

amendment of the Senate numbered 26 to the aforesaid bill with the following amendment:

In lieu of the matter inserted by said amendment, insert:

(f) CERTAIN LONG-TERM PROJECTS .clause (I) of section 46(a)(2)(C)(iii) is amended to read as follows:

"(I) before January 1, 1983, all engineering studies in connection with the commencement of the construction of the project have been completed and all environmental and construction permits required under Federal, State, or local law in connection with the commencement of the construction of the project have been applied for, and"

Resolved, That the House agree to the amendment of the Senate numbered 30 to the aforesaid bill with the following amend-

Insert the matter inserted by said amendment; and on page 73 of the House engrossed bill, after the matter following line 3. insert:

(c) AMENDMENT RELATED TO SECTION 421 OF THE REVENUE ACT OF 1978.-The last sentence of section 55(b)(1), as in effect on the day before the date of the enactment of the Tax Equity and Fiscal Responsibility Act of 1982, is amended by striking out "subparagraph (A)" and inserting in lieu thereof "subparagraph (A) (and in determining the sum of itemized deductions for purposes of subparagraph (C)(ii))".

(d) AMENDMENTS RELATED TO SUBCHAPTER S

REVISION ACT OF 1982.

(1)(A) Section 6 of the Subchapter S Revision Act of 1982 is amended by adding at the end thereof the following new subsection:

'(f) TAXABLE YEAR OF S CORPORATIONS .-Section 1378 of the Internal Revenue Code of 1954 (as added by this Act) shall take effect on the day after the date of the enactment of this Act. For purposes of applying such section, the reference in subsection (a)(2) of such section to an election under section 1362(a) shall include a reference to an election under section 1372(a) of such Code as in effect on the day before the date of the enactment of this Act."

(i) after October 19, 1982, and on or before the date of the enactment of this Act, stock or securities were transferred to a small business corporation (as defined in section 1361(b) of the Internal Revenue Code of 1954 as amended by the Subchapter S Revision Act of 1982) in a transaction which section 351 of such Code applies, and

(ii) such corporation is liquidated under section 333 of such Code before March 1,

1983.

then such stock or securities shall not be taken into account under section 333(e)(2) of such Code.

(2) Subsection (e) of section 1368 (relating to distributions) is amended by adding at the end thereof the following new para-

"(3) ELECTION TO DISTRIBUTE EARNINGS FIRST

"(A) In general.—An S corporation may, with the consent of all of its affected shareholders, elect to have paragraph (1) of subsection (c) not apply to all distributions made during the taxable year for which the election is made.

"(B) AFFECTED SHAREHOLDERS .- For purposes of subparagraph (A), the term 'affected shareholder' means any shareholder to whom a distribution is made by the S corporation during the taxable year.

(3) Subsection (d) of section 1374 (relating to determination of taxable income) is amended by striking out "subsections (a)(2) and (b)(2)" and inserting in lieu thereof 'this section".

(4) Subparagraph (B) of section 221(b)(1) is amended by striking out "(9).".

(5) The last sentence of section 4975(d) is amended by striking out "section 1379" and inserting in lieu thereof "section 1379, as in effect on the day before the date of the enactment of the Subchapter S Revision Act

(e) AMENDMENT RELATED TO MISCELLANEOUS REVENUE ACT OF 1982.—Subsection (c) of section 105 of the Miscellaneous Revenue Act of 1982 is amended by striking out "the amendment made by subsection (a)" and inserting in lieu thereof "the amendment made by subsection (b)"

Resolved. That the House agree to the amendment of the Senate numbered 31 to the aforesaid bill with amendments as follows

(1) In lieu of the matter inserted by said amendment, insert:

SEC. 306. TECHNICAL AMENDMENTS TO THE REVE-NUE PROVISIONS OF THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982.

(a) AMENDMENTS RELATED TO TITLE II .-

(1) AMENDMENTS RELATED TO SECTION 201 .-(A) Section 201 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended-

(i) by redesignating the second subsection (c) as subsection (d), and

(ii) by striking out "subsection (c)(1)" in subsection (e)(2) and inserting in lieu thereof "subsection (d)(1)".

(B) Clause (ii) of section 55(e)(5)(B) (defining qualified investment income) amended by striking out "net capital gain" and inserting in lieu thereof "capital gain net income".

(C) Subparagraph (B) of section 55(d)(2) (relating to adjustments to net operating loss computation) is amended by striking out "subparagraph (A)" and inserting in lieu thereof "paragraph (1)".

(2) AMENDMENT RELATED TO SECTION 201. Paragraph (1) of section 291(a) (relating to 15-percent reduction for certain preference items) is amended by adding at the end thereof the following new sentence:

"Under regulations prescribed by the Secretary, the provisions of this paragraph shall not apply to the disposition of any property to the extent section 1250(a) does not apply to such disposition by reason of section 1250(d).

- (3) AMENDMENT RELATED TO SECTION 205 .-Paragraph (3) of section 48(q) (relating to basis adjustment to section 38 property) is amended by striking out "paragraphs (1) and (2)" and inserting in lieu thereof "paragraphs (1) and (2) of this subsection and paragraph (5) of subsection (d)".
- (4) AMENDMENTS RELATED TO SECTION 208 .-(A) Subsection (d) of section 208 of such Act is amended-
- (i) by striking out "described in section 1381(a)" in paragraph (3)(E)(i) and inserting in lieu thereof "engaged in the furnishing of electric energy to persons in rural areas", and

(ii) by inserting", or section 168(f)(8)(J) of such Code, as added by subsection (b)(4)" after "as added by subsection (a)(1)" in

paragraph (5) thereof.

- (B) Subsection (d) of section 208 of such Act (relating to effective dates) is amended by adding at the end thereof the following new paragraph:
- (7) COORDINATION WITH AT RISK RULES. Subparagraph (J) of section 168(f)(8) of the Internal Revenue Code of 1954 (as added by subsection (b)(4)) shall take effect as provided in such subparagraph (J)."

(C) Subparagraph (C) of section 208(d)(3) of such Act (defining transitional safe harbor lease property) is amended to read as follows:

(C) PROPERTY USED IN MANUFACTURE OF AUTOMORILES -

(i) In general.-Property is described in

this subparagraph if-

(I) such property is used by the taxpayer directly in connection with the trade or business of the taxpayer of the manufacture of automobiles or trucks,

(II) 50 percent or more of the motor vehicles produced by the taxpayer during calendar year 1981 are passenger automobiles and light-duty trucks,

"(III) such property is automobile manu-

facturing property, and

"(IV) such property would be described in subparagraph (A) if 'October 1' were substituted for 'January 1'.

"(ii) AUTOMOBILE MANUFACTURING PROPER-TY.-For purposes of this subparagraph, the term 'automobile manufacturing property means machinery, equipment, and special tools of the type included in the former asset depreciation range guideline classes 37.11 and 37.12.

"(iii) TREATMENT OF CERTAIN VENDORS .- For purposes of this subparagraph, any special tools owned by a taxpayer described in subclauses (I) and (II) of clause (i) which are used by a vendor for the production of component parts for sale to the taxpayer shall be treated as automobile manufacturing property used by such taxpayer."

(5) AMENDMENT RELATED TO SECTION 211. Paragraph (2) of section 211(e) of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to effective date for foreign tax credit for taxes on oil and gas income) is amended to read as follows:

"(2) RETENTION OF OLD SECTIONS 907(b) AND 904(f)(4) WERE TAXPAYER HAD SEPARATE BASKET FOREIGN LOSS .-

"(A) In GENERAL.-If, after applying old sections 907(b) and 904(f)(4) to a taxable year beginning before January 1, 1983, the taxpayer had a separate basket foreign loss,

such loss shall not be recaptured from income of a kind not taken into account in computing the amount of such separate basket foreign loss more rapidly than ratably over the 8-year period beginning with the first taxable year beginning after December 31, 1982.

"(B) DEFINTIONS.-For purposes of this

paragraph-

"(i) The term 'separate basket foreign loss' means any foreign loss attributable to activities taken into account (or not taken into account) in determining foreign oil related income (as defined in old section 907(c)(2)).

"(ii) An 'old' section is such section as in effect on the day before the date of the en-

actment of this Act.'

(6) AMENDMENTS RELATED TO SECTION 222.-(A) The last sentence of paragraph (2) of section 222(f) of such Act is amended by inserting ", except that in applying such section both direct and indirect ownership of stock shall be taken into account" before the period at the end thereof.

(B)(i) Paragraph (3) of section 321(j) (relating to earnings and profits of foreign investment companies) is amended by striking

out "in partial liquidation or"

(ii) The heading for paragraph (3) of section 321(j) is amended to read as follows:

'(3) REDEMPTIONS.

(7) AMENDMENT RELATED TO SECTION 223.-Subparagraph (B) of section 223(b)(2) of such Act (relating to effective date for changes in tax treatment of distributions of appreciated property in redemption of stock) is amended to read as follows:

"(B) either before October 21, 1982, or within 90 days after the date of such

ruling.

(8) AMENDMENTS RELATED TO SECTION 224 (A)(i) Subsection (h) of section 338 (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(8) SALE TREATED SEPARATELY FOR CONSOLI-DATED RETURN PURPOSES .- Except to the extent otherwise provided in regulations, the target corporation shall not be treated as a member of an affiliated group with respect to the sale described in subsection

(ii) If-

(I) any portion of a qualified stock purchase is pursuant to a binding contract entered into on or after the date of the enactment of the Tax Equity and Fiscal Responsibility Act of 1982, and on or before the date of the enactment of this Act, and

the purchasing corporation establishes to the satisfaction of the Secretary of the Treasury or his delegate that such contract was negotiated on the contemplation that, with respect to the deemed sale under section 338 of the Internal Revenue Code of 1954, the target corporation would be treated as a member of the affiliated group which includes the selling corporation.

then the amendment made by clause (i) shall not apply to such qualified stock pur-

(B)(i) Subsection (d) of section 224 of such Act is amended by adding at the end thereof the following new paragraphs:

"(4) EXTENSION OF TIME FOR MAKING ELEC-

TIONS; REVOCATION OF ELECTIONS.

'(A) Extension.-The time for making an election under section 338 of such Code shall not expire before the close of Febru-

ary 28, 1983. "(B) Reve "(B) REVOCATION.—Any election made under section 338 of such Code may be revoked by the purchasing corporation if reveked before March 1, 1983.

"(5) RULES FOR ACQUISITIONS DESCRIBED IN PARAGRAPH (2) .-

"(A) In general.—For purposes of applying section 338 of such Code with respect to any acquisition described in paragraph (2)-

"(i) the date selected under subparagraph (B) of this paragraph shall be treated as the

acquisition date.

'(ii) a rule similar to the last sentence of section 334(b)(2) of such Code (as in effect on August 31, 1982) shall apply, and

"(iii) subsections (e), (f), and (i) of such section 338, and paragraphs (4), (5), (6), and (8) of subsection (h) of such section 338. shall not apply.

"(B) SELECTION OF ACQUISITION DATE BY PURCHASING CORPORATION.-The purchasing corporation may select any date for purposes of subparagraph (A)(i) if such date-

"(i) is after the later of June 30, 1982, or the acquisition date (within the meaning of section 338 of such Code without regard to this pargraph), and

"(ii) is on or before the date on which the election described in paragraph (2)(C) is made.

(ii) Subparagraph (A) of section 224(d)(2) of such Act is amended by striking out "under paragraph (1)" and inserting in lieu thereof "(within the meaning of section 338 of such Code without regard to paragraph (5) of this subsection)".

(9) AMENDMENTS RELATED TO SECTION 231 .-(A) Clause (ii) of section 263(g)(2)(B) (defining interest and carrying charges) is amended striking by out "section 1232(a)(4)(A)" and inserting in lieu thereof 'section 1232(a)(3)(A)".

(B) Section 1232 (relating to bonds and other evidences of indebtedness) is amended by redesignating subsection (d) as subsection (c).

(C)(i) The next to the last sentence of section 1232(b)(2) (defining issue price) is amended by striking out "(other than a bond or other evidence of indebtedness or an investment unit issued pursuant to a plan of reorganization within the meaning of section 368(a)(1) or an insolvency reorganization within the meaning of section 371

(ii) Subsection (b) of section 1232 is amended by adding at the end thereof the following new paragraph:

"(4) SPECIAL RULE FOR EXCHANGE OF BONDS IN REORGANIZATIONS.-

"(A) IN GENERAL.-If-

"(i) any bond is issued pursuant to a plan of reorganization within the meaning of section 368(a)(1) for another bond (hereinafter in this paragraph referred to as the 'old bond'), and

"(ii) the fair market value of the old bond is less than its adjusted issue price,

then, for purposes of the next to the last sentence of paragraph (2), the fair market value of the old bond shall be treated as equal to its adjusted issue price.

"(B) Definitions.-For purposes of this paragraph-

"(i) BOND .- The term 'bond' includes any other evidence of indebtedness and an investment unit.

"(ii) ADJUSTED ISSUE PRICE.—The adjusted issue price of the old bond is its issue price, increased by any original issue discount previously allowed as a deduction.'

(iii) For purposes of paragraph (4) of section 1232(b) of the Internal Revenue Code of 1954 (as added by clause (ii)), any insolvency reorganization within the meaning of section 371 or 374 of such Code shall be treated as a reorganization within the meaning of section 368(a)(1) of such Code.

"(iv) The amendments made by this subparagraph shall apply to evidences of in-debtedness issued after December 13, 1982; except that such amendments shall not apply to any evidence of indebtedness issued after such date pursuant to a written commitment which was binding on such date and at all times thereafter.

(10) AMENDMENT RELATED TO SECTION 235. Section 235(g)(5) of such Act is amended by striking out "section 253" and inserting in lieu thereof "section 242".

(11) AMENDMENT RELATED TO SECTION 236. Subsection (c) of section 236 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to effective date) is amended by adding at the end thereof the following new paragraph:

"(3) TREATMENT OF CERTAIN RENEGOTI-

ATTONS -If-

"(A) the taxpayer after August 13, 1982, and before January 1, 1983, borrows money from a government plan (as defined in section 219(e)(4) of the Internal Revenue Code of 1954).

'(B) under the applicable State law, such loan requires the renegotiation of all outstanding prior loans made to the taxpayer

under such plan, and

'(C) the renegotiation described in subparagraph (B) does not extend the duration of or change the interest rate on any such outstanding prior loan,

then the renegotiation described in subparagraph (B) shall not be treated as a renegotiation, extension, renewal or revision for pur-

poses of paragraph (1)."

(12) AMENDMENT RELATED TO SECTION 237.-Paragraph (2) of section 401(d) (as redesignated by section 237 of the Tax Equity and Fiscal Responsibility Act of 1982) is amended by striking out "paragraph (9)(B)" and inserting in lieu thereof "paragraph (1)(B)".

(13) AMENDMENT RELATED TO SECTION 266. Section 266(c)(3) of such Act is amended by striking out "section 103(f)(2)(C)" and in-"section lieu thereof in

serting in 101(f)(2)(C)".

- (14) AMENDMENT RELATED TO SECTION 283.-Section 283(b)(2)(B) of such Act (relating to liability for tax and method of payment) is amended by striking out "January 18" and inserting in lieu thereof "February 17"
- (b) AMENDMENTS RELATED TO TITLE III.-(1) AMENDMENTS RELATED TO SECTION 302.-(A) Subsection (d) of section 31 (relating to year for which credit allowed) is amended

to read as follows:

'(d) YEAR FOR WHICH CREDIT ALLOWED .-"(1) Wages .- Any credit allowed-

"(A) by subsection (a) shall be allowed for the taxable year beginning in the calendar year in which the amount is withheld, or "(B) by subsection (c) shall be allowed for

the taxable year beginning in the calendar year in which the wages are received.

For purposes of this paragraph, if more than 1 taxable year begins in a calendar year, such amount shall be allowed as a credit for the last taxable year so beginning.

(2) INTEREST, DIVIDENDS, AND PATRONAGE DIVIDENDS.-Any credit allowed by subsection (b) shall be allowed for the taxable year of the recipient of the income in which the amount is received."

(B) Paragraph (4) of section 3(i) of the Subchapter S Revision Act of 1982 is hereby

repealed.

(2) AMENDMENT RELATED TO SECTION 310. Subsection (d) of section 310 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to effective date for requirement

that obligations be registered) is amended by adding at the end thereof the following new paragraph:

'(4) EFFECTIVE DATE FOR TAX-EXEMPT OBLI-GATION.-In the case of obligations the interest on which is exempt from tax (determined without regard to the amendments made by this section)-

(A) under section 103 of the Internal

Revenue Code of 1954, or

"(B) under any other provision of law (without regard to the identity of the holder).

the amendments made by this section shall apply only to obligations issued after De-

cember 31, 1983.'

(3) AMENDMENT RELATED TO SECTION 336 .-Section 7701(a) (relating to definitions) is amended by redesignating paragraph (38) added by section 336(a) of the Tax Equity and Fiscal Responsibility Act of 1982) as paragraph (39).

(4) AMENDMENT RELATED TO SECTION 339. Subparagraph (B) of section 6038A(c)(2) (defining controlled group) is amended by inserting ", (b)(2)(C)," after "(a)(4)".

(5) AMENDMENT RELATED TO SECTION 354 .-Paragraph (23) of section 501(c) (relating to exempt organizations) is amended by striking out "25 percent" and inserting in lieu thereof "75 percent".

(c) AMENDMENTS RELATED TO TITLE IV.

(1) AMENDMENTS RELATED TO SECTION 402.-(A) The second sentence 6226(g) (relating to determine of court reviewable) is amended by striking out "Only" and inserting in lieu thereof "With respect to the partnership, only".

second sentence of The 6228(a)(6) (relating to determination of court reviewable) is amended by striking out "Only" and inserting in lieu thereof "With

respect to the partnership, only".

(2) AMENDMENTS RELATED TO SECTION 405.—
(A) Subsection (b) of section 405 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended to read as follows:

(b) PENALTY.—Subsection (a) of section 6679 (relating to failure to file returns as to organization or reorganization of foreign coporations and acquisition of their stock), as amended by section 340(b)(1), is amended by striking out 'section 6035 or 6046' and inserting in lieu thereof 'section 6035, 6046, or 6046A

(B) Paragraphs (2) and (3) of section 405(c) of such Act are amended to read as

"(2) The section heading of section 6679, as amened by section 340(b)(2), is amended to read as follows:

'SEC. 6679. FAILURE TO FILE RETURNS, ETC, WITH RESPECT TO FOREIGN CORPORATION OR FOREIGN PARTNERSHIPS."

"(3) The table of sections for subchapter B of chapter 68 is amended by striking out the item relating to section 6679 and inserting in lieu thereof the following:

SEC. 6679. FAILURE TO FILE RETURNS, ETC., WITH RESPECT TO FOREIGN CORPORATIONS OR FOREIGN PARTNERSHIPS."

(2) page 26, line 5 of the House engrossed bill, after "105(d)", "165(c)(3),".
(3) Page 41, after line 8 of the House en-

grossed bill, insert:

(10) CLARIFICATION OF EFFECTIVE DATE .-Paragraph (2) of section 403(e) of the Economic Recovery Tax Act of 1981 is amended by striking out "and parapraphs (2) and (3)(B) of subsection (d)" and inserting in lieu thereof "paragraphs (2) and (3)(B) of subsection (d), and paragraph (4)(A) of subsection (d) (to the extent related to the tax imposed by chapter 12 of the Internal Revenue Code of 1954)".

Resolved, That the House agree to the amendment of the Senate numbered 33 to the aforesaid bill with an amendment as fol-

Page 28, lines 17 and 18, strike out [of the

Internal Revenue Code of 1954]

Resolved, That the House agree to the amendment of the Senate numbered 34 to the aforesaid bill with an amendment as fol-

Page 31, after line 15, insert:

(11) Section 278(d) of such Act is amended-

(A) by amending paragraph (1) to read as

"(1) In general.-For purposes of sections 226, 226A, and 1811 of the Social Security Act, in the case of any individual who performs service both during January 1983, and before January 1, 1983, which constitutes medicare qualified Federal employment (as defined in section 210(p) of such Act), the individual's medicare qualified Federal employment (as so defined) performed before January 1, 1983, for which remuneration was paid before such date, shall be considered to be "employment" (as defined for purposes of title II of such Act), but only for the purpose of providing the individual (or another person) with entitlement to hospital insurance benefits under part A of title XVIII of such Act.";

(B) by striking out paragraph (2); and

(C) by redesignating paragraph (3) as paragraph (2) and striking out "or (2)" in subparagraph (A) thereof.

Resolved, That the House agree to the amendment of the Senate numbered 36 to the aforesaid bill with an amendment as follows:

In lieu of the section number named in said amendment, insert: "311".

Resolved, That the House agree to the amendment of the Senate numbered 37 to the aforesaid bill with an amendment as fol-

(1) In lieu of the matter inserted by said amendment, insert:

(3) The amendment made by subsection (c) of section 305 shall take effect as if included in the amendments made by section 421 of the Revenue Act of 1978.

(4) The amendments made by subsection (d) of section 305 shall take effect on the date of the enactment of the Subchapter S Revision Act of 1982.

(5) The amendment made by subsection (e) of section 305 shall take effect on the date of the enactment of the Miscellaneous Revenue Act of 1982.

(d) FOR SECTION 306.—The amendments made by section 306 shall take effect as if included in the provisions of the Tax Equity and Fiscal Responsibility Act of 1982 to which such amendments relate.

(2) Amend the title so as to read: "An Act to make technical corrections in the Economic Recovery Tax Act of 1981 and certain

other recent tax legislation."

Resolved. That the House disagree to the amendments of the Senate numbered 9, 15, 18, 24, and 27 to the aforesaid bill.

Mr. BAKER. Madam President, move that the Senate insist on its amendments numbered 9, 15, 18, 24, and 27, and disagree to the House amendments numbered 1, 10, 14, 16, 17, 26, 30, 31, 33, 34, 36, and 37, and agree to the House request for a conference and the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed Mr. Dole, Mr. Packwood, Mr. Roth, Mr. Long, and Mr. Harry F. Byrd, Jr., conferees on the part of the Senate.

# TAX RATE ON VIRGIN ISLANDS SOURCE INCOME

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 7093.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate numbered 1 to the bill (H.R. 7093) entitled "An Act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income", with the following amendment:

In lieu of the matter proposed to be inserted by said amendment, strike out all after the enacting clause of the House engrossed bill and insert in lieu thereof the following:

SECTION 1. INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

(a) In GENERAL.—Subpart D of part III of subchapter N of chapter 1 of the Internal Revenue Code of 1954 (relating to possessions) is amended by inserting after section 934 the following new section:

"SEC. 934A. INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

"(a) GENERAL RULE.—For purposes of determining the tax liability incurred by citizens and resident alien individuals of the United States, and corporations organized in the United States, the Virgin Islands pursuant to this title with respect to amounts received from sources within the Virgin Islands—

"(1) the taxes imposed by sections 871(a)(1) and 881 (as made applicable to the Virgin Islands) shall apply except that '10 percent' shall be substituted for '30 percent', and

"(2) subsection (a) of section 934 shall not apply to such taxes.

"(b) Subsection (a) RATES NOT TO APPLY TO PRE-EFFECTIVE DATE EARNINGS.—

"(1) In GENERAL.—Any change under subsection (a)(1), and say reduction under section 934 pursuant to subsection (a)(2), in a rate of tax imposed by section 871(a)(1) or 881 shall not apply to dividends paid out of earnings and profits accumulated for taxable years beginning before the effective

date of the change or reduction.

"(2) Ordering Rule.—For purposes of paragraph (1), dividends shall be treated as first being paid out of earnings and profits accumulated for taxable years beginning before the effective date of the change or reduction (to the extent thereof)."

(b) WITHHOLDING.—Subchapter A of chapter 3 of such Code (relating to withholding of tax on nonresident aliens and foreign corporations) is amended by adding at the end thereof the following new section:

"SEC. 1444. WITHHOLDING ON VIRGIN ISLANDS SOURCE INCOME.

"For purposes of determining the withholding tax liability incurred in the Virgin Islands pursuant to this title (as made applicable to the Virgin Islands) with respect to amounts received from sources within the Virgin Islands by citizens and resident alien individuals of the United States, and corporations organized in the United States, the rate of withholding tax under sections 1441 and 1442 on income subject to tax under section 871(a)(1) or 881 (as modified by section 934A) shall not exceed the rate of tax on such income under section 871(a)(1) or 881, as the case may be."

(c) TECHNICAL AMENDMENT.—Subsection (a) of section 934 of such Code is amended by inserting before the period at the end there-

of "or in section 934A".

(d) CLERICAL AMENDMENT.-

(1) The table of sections for subpart D of part III of subchapter N of chapter 1 of such Code is amended by inserting after the item relating to section 934 the following new item:

"Sec. 934A. Income tax rate on Virgin Islands source income."

(2) The table of sections for subchapter A of chapter 3 of such Code is amended by adding at the end thereof the following new item:

"Sec. 1444. Withholding on Virgin Islands source income."

(e) EFFECTIVE DATES .-

(1) In GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to amounts received after the date of the enactment of this Act in taxable years ending after such date.

(2) WITHHOLDING.—The amendment made by subsection (b) shall apply to payments made after the date of the enactment of this Act.

this Act.

SEC. 2. CONTINUED PAYMENT OF DISABILITY BEN-EFITS DURING APPEAL.

Section 223 of the Social Security Act is amended by adding at the end thereof the following new subsection: "Continued Payment of Disability Benefits During Appeal

"(g)(1) In any case where-

"(A) an individual is a recipient of disability insurance benefits, or of child's, widow's, or widower's insurance benefits based on disability,

"(B) the physical or mental impairment on the basis of which such benefits are payable is found to have ceased, not to have existed, or to no longer be disabling, and as a consequence such individual is determined not to be entitled to such benefits, and

"(C) a timely request for a hearing under section 221(d), or for an administrative review prior to such hearing, is pending with respect to the determination that he is not so entitled.

such individual may elect (in such manner and form and within such time as the Secretary shall by regulations prescribe) to have the payment of such benefits, and the payment of any other benefits under this Act based on such individual's wages and selfemployment income (including benefits under title XVIII), continued for an additional period beginning with the first month beginning after the date of the enactment of this subsection for which (under such determination) such benefits are no longer otherwise payable, and ending with the earlier of (i) the month preceding the month in which a decision is made after such a hearing, (ii) the month preceding the month in which no such request for a hearing or an administrative review is pending, or (iii) June 1984.

"(2)(A) If an individual elects to have the payment of his benefits continued for an additional period under paragraph (1), and the final decision of the Secretary affirms the determination that he is not entitled to such benefits, any benefits paid under this title pursuant to such election (for months

in such additional period) shall be considered overpayments for all purposes of this title, except as otherwise provided in subparagraph (B).

"(B) If the Secretary determines that the individual's appeal of his termination of benefits was made in good faith, all of the benefits paid pursuant to such individual's election under paragraph (1) shall be subject to waiver consideration under the provisions of section 204.

"(3) The provisions of paragraphs (1) and (2) shall apply with respect to determinations (that individuals are not entitled to

benefits) which are made-

"(A) on or after the date of the enactment of this subsection, or prior to such date but only on the basis of a timely request for a hearing under section 221(d), or for an administrative review prior to such hearing, and

"(B) prior to October 1, 1983.".

SEC. 3. PERIODIC REVIEWS OF DISABILITY CASES. Section 221(i) of the Social Security Act is amended—

(1) by inserting "(1)" after "(i)";

(2) by inserting ", subject to paragraph (2)" after "at least every 3 years"; and (3) by adding at the end thereof the fol-

lowing new paragraph:

"(2) The requirement of paragraph (1) that cases be reviewed at least every 3 years shall not apply to the extent that the Secretary determines, on a State-by-State basis, that such requirement should be waived to insure that only the appropriate number of such cases are reviewed. The Secretary shall determine the appropriate number of cases to be reviewed in each State after consultation with the State agency performing such reviews, based upon the backlog of pending reviews, the projected number of new applications for disability insurance benefits, and the current and projected staffing levels of the State agency, but the Secretary shall provide for a waiver of such requirement only in the case of a State which makes a good faith effort to meet proper staffing requirements for the State agency and to process case reviews in a timely fashion. The Secretary shall report annually to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives with respect to the determinations made by the Secretary under the preceding sentence."

(b) The amendments made by subsection (a) shall become effective on the date of the

enactment of this Act.

SEC. 4. EVIDENTIARY HEARINGS IN RECONSIDERATIONS OF DISABILITY BENEFIT TERMINATIONS.

(a) In General.—Section 205(b) of the Social Security Act is amended—

(1) by inserting "(1)" after "(b)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) In any case where-

"(A) an individual is a recipient of disability insurance benefits, or of child's, widow's, or widower's insurance benefits based on disability,

"(B) the physical or mental impairment on the basis of which such benefits are payable is found to have ceased, not to have existed, or to no longer be disabling, and

"(C) as a consequence of the finding described in subparagraph (B), such individual is determined by the Secretary not to be entitled to such benefits,

any reconsideration of the finding described in subparagraph (B), in connection with a reconsideration by the Secretary (before

any hearing under paragraph (1) on the issue of such entitlement) of his determination described in subparagraph (C), shall be made only after opportunity for an evidentiary hearing, with regard to the finding described in subparagraph (B), which is reasonably accessible to such individual. Any reconsideration of a finding described in subparagraph (B) may be made either by the State agency or the Secretary where the finding was originally made by the State agency, and shall be made by the Secretary where the finding was originally made by the Secretary. In the case of a reconsideration by a State agency of a finding described in subparagraph (B) which was originally made by such State agency, the evidentiary hearing shall be held by an adjudicatory unit of the State agency other than the unit that made the finding described in subparagraph (B). In the case of a reconsideration by the Secretary of a finding described in subparagraph (B) which was originally made by the Secretary, the evidentiary hearing shall be held by a person than the person or persons who made the finding described in subparagraph (B).

(h) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with respect to reconsiderations (of findings described in section 205(b)(2)(B) of the Social Security Act) which are requested on or after such date as the Secretary of Health and Human Services may specify, but in any event such date shall not be later than January 1, 1984.

SEC. 5. CONDUCT OF FACE-TO-FACE RECONSIDER-ATIONS IN DISABILITY CASES.

The Secretary of Health and Human Services shall take such steps as may be necessary or appropriate to assure public understanding of the importance the Congress attaches to the face-to-face reconsiderations provided for in section 205(b)(2) of the Social Security Act (as added by section 4 of this Act). For this purpose the Secretary

(1) provide for the establishment and implementation of procedures for the conduct of such reconsiderations in a manner which assures that beneficiaries will receive reasonable notice and information with respect to the time and place of reconsideration and the opportunities afforded to introduce evidence and be represented by counsel; and

(2) advise beneficiaries who request or are entitled to request such reconsiderations of the procedures so established, or their opportunities to introduce evidence and be represented by counsel at such reconsiderations, and of the importance of submitting all evidence that relates to the question before the Secretary or the State agency at such reconsiderations.

SEC. 6 REPORT BY SECRETARY.

Section 221(i) of the Social Security Act (as amended by section 3 of this Act) is further amended by adding at the end thereof

the following new paragraph:

"(3) The Secretary shall report semiannually to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives with respect to the number of reviews of continuing disability carried out under paragraph (1), the number of such reviews which result in an initial termination of benefits, the number of requests for reconsideration of such initial termination or for a hearing with respect to such termination under subsection (d), or both, and the number of such initial terminations which are overturned as the result of a reconsideration or hearing.".

SEC. 7. OFFSET AGAINST SPOUSES' BENEFITS ON ACCOUNT OF PUBLIC PENSIONS.

- (a) In General.—Subsections (b)(4)(A). (c)(2)(A), (e)(8)(A), (f)(2)(A) and (g)(4)(A) of section 202 of the Social Security Act are each amended-
- (1) by striking out "by an amount equal to the amount of any monthly periodic benefit" and inserting in lieu thereof "by an amount equal to one-third of the amount of any monthly periodic benefit": and
- (2) by adding at the end thereof the following new sentence: "The amount of the reduction in any benefit under this subparagraph, if not a multiple of \$0.10, shall be rounded to the next lower multiple of \$0.10."
- (b) Effective Date.-The amendments made by subsection (a) of this section shall apply with respect to monthly insurance benefits payable for months in the 60month period beginning December 1, 1982. After the close of such 60-month period, the provisions of the Social Security Act to which such amendments relate shall read as they would if this section had not been enacted.

Resolved, That the House disagree to the amendments of the Senate numbered 2, 3, and 4 to the aforesaid bill.

Resolved. That the House agree to the amendment of the Senate to the title of the aforesaid bill.

Mr. BAKER. Madam President, I move that the Senate insist on its amendments numbered 2, 3, and 4, that the Senate disagree to the House amendment to Senate amendment 1 and request a conference with the House and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed Mr. Dole. Mr. Packwood, Mr. Armstrong, Mr. Long, and Mr. HARRY F. BYRD, JR., conferees on the part of the Senate.

## TAX TREATMENT OF CERTAIN PAYMENTS FOR DAMAGES

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5470.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the text of the bill (H.R. 5470) entitled "An Act to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness", with the following amendment:

In lieu of the matter proposed to be inserted by the said amendment, insert:

SECTION 1. AMENDMENT OF 1954 CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

TITLE I-INCOME TAX PROVISIONS

Sec. 101. TREATMENT OF RECIPIENT OF SETTLMENT PERIODIC PAYMENTS

(a) TREATMENT OF RECIPIENT.-Paragraph (2) of section 104(a) (relating to compensation for injuries or sickness) is amended by striking out "whether by suit or agreement" and inserting in lieu thereof "whether by suit or agreement and whether as lump sums or as periodic payments"

(b) TREATMENT OF ASSIGNEE-PAYOR -

(1) In general.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income) is amended by redesignating section 130 as section 131 and by inserting after section 129 the following new section:

"SEC. 130. CERTAIN PERSONAL INJURY LIABILITY ASSIGNMENTS.

"(a) In General.-Any amount received for agreeing to a qualified assignment shall not be included in gross income to the extent that such amount does not exceed the aggregate cost of any qualified funding

"(b) TREATMENT OF QUALIFIED FUNDING Asser.-In the case of any qualified funding asset-

"(1) the basis of such asset shall be reduced by the amount excluded from gross income under subsection (a) by reason of the purchase of such asset, and

(2) any gain recognized on a disposition of such asset shall be treated as ordinary

income.

"(c) QUALIFIED ASSIGNMENT.-For purposes of this section, the term 'qualified assignment' means any assignment of a liability to make periodic payments as damages (whether by suit or agreement) on account of personal injury or sickness-

"(1) if the assignee assumes such liability from a person who is a party to the suit or

agreement, and

"(A) such periodic payments are fixed and determinable as to amount and time of pay-

"(B) such periodic payments cannot be accelerated, deferred, increased, or decreased by the recipient of such payment,

(C) the assignee does not provide to the recipient of such payments rights against the assignee which are greater than those of a general creditor,

'(D) the assignee's obligation on account of the personal injuries or sickness is no greater than the obligation of the person who assigned the liability, and

"(E) such periodic payments are excludable from the gross income of the recipient under section 104(a)(2).

"(d) QUALIFIED FUNDING ASSET.-For purposes of this section, the term 'qualified funding asset' means any annuity contract issued by a company licensed to do business as an insurance company under the laws on any State, or any obligation of the United States, if-

"(1) such annuity contract or obligation is used by the assignee to fund periodic payments under any qualified assignment.

'(2) the periods of the payments under the annuity contract or obligation are reasonably related to the periodic payments under the qualified assignment and the amount of any such payment under the contract or obligation does not exceed the periodic payment to which it relates,

"(3) such annuity contract or obligation is designated by the taxpayer (in such manner as the Secretary shall by regulations prescribe) as being taken into account under this section with respect to such qualified assignment, and

"(4) such annuity contract or obligation is purchased by the taxpayer not more than 60 days before the date of the qualified assignment and not later than 60 days after the date of such assignment."

"(2) CONFORMING AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 is amended by striking out the item relating to section 130 and inserting in lieu thereof the following new items:

"Sec. 130. Certain personal injury liability assignments.

"Sec. 131. Cross references to other Acts."

(c) Effective Date.-The amendments made by this action shall apply to taxable years ending after December 31, 1982.

SEC. 102. EXCLUSION FROM GROSS INCOME FOR CERTAIN FOSTER CARE PAYMENTS.

(a) In GENERAL.-Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income), as amended by section 101(b), is amended by redesignating section 131 as section 132 and by inserting after section 130 the following new section: "SEC. 131, CERTAIN FOSTER CARE PAYMENTS.

"(a) GENERAL RULES.—Gross income shall not include amounts received by a foster parent during the taxable year as qualified foster care payments.

"(b) QUALIFIED FOSTER CARE PAYMENT DE-

FINED.—For purposes of this section—
"(1) IN GENERAL.—The term 'qualified foster care payment' means any amount-

"(A) which is paid by a State or political subdivison thereof or by a child-placing agency which is described in section 501(c)(3) and exempt from tax under section 501(a), and

'(B) which is-

"(i) paid to reimburse the foster parent for the expenses of caring for a qualified foster child in the foster parent's home, or

"(ii) a difficulty of care payment
"(2) QUALIFIED FOSTER CHILD.—The term 'qualified foster child' means any individual

who-"(A) has not attained age 19, and

"(B) is living in a foster family home in which such individual was placed by-

'(i) an agency of a State or political subdi-

vision thereof, or

"(ii) an organization which is licensed by a State (or political subdivision thereof) as a child-placing agency and which is described in section 501(c)(3) and exempt from tax under section 501(a).

(c) DIFFICULTY OF CARE PAYMENTS .- For

purposes of this section-

"(1) DIFFICULTY OF CARE PAYMENTS.—The term 'difficulty of care payments' means payments to individuals which are not described in subsection (b)(1)(B)(i),

"(A) are compensation for providing the additional care of a qualified foster child

which is-

'(i) required by reason of a physical, mental, or emotional handicap with respect to which the State has determined that there is a need for additional compensation,

"(ii) provided in the home of the foster parent, and

"(B) are designated by the payor as com-

pensation described in subparagraph (A). "(2) LIMITATION BASED ON NUMBER OF CHILDREN.-In the case of any foster home, difficulty of care payments for any period to which such payments relate shall not be ex-

cludable from gross income under subsection (a) to the extent such payments are made for more than 10 qualified foster chil-

(b) CLERICAL AMENDMENT.-The table of sections for part III of subchapter B of chapter 1 is amended by striking out the item relating to section 131 and by inserting in lieu thereof the following items:

"Sec. 131. Certain foster care payments 'Sec. 132. Cross references to other Acts."

(c) Effective Date.-The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

TITLE II-AMENDMENTS OF EMPLOY-EE RETIREMENT INCOME SECURITY **ACT OF 1974** 

SEC. 201. TREATMENT OF HAWAII PREPAID HEALTH CARE ACT UNDER EMPLOYEE RETIRE. MENT INCOME SECURITY ACT OF 1974.

EXEMPTION FROM PREEMPTION.—Section 514(b) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1144(b)) is amended by adding at the end thereof the following new paragraph:

"(5)(A) Except as provided in subparagraph (B), subsection (a) shall not apply to the Hawaii Prepaid Health Care Act (Haw. Rev. Stat. §§ 393-1 through 393-51).

"(B) Nothing in subparagraph (A) shall be

construed to exempt from subsection (a)-'(i) any State tax law relating to employ-

ee benefit plans, or

"(ii) any amendment of the Hawaii Prepaid Health Care Act enacted after September 2, 1974, to the extent it provides for more than the effective administration of such Act as in effect on such date.

"(C) Notwithstanding subparagraph (A), parts 1 and 4 of this subtitle, and the preceding sections of this part to the extent they govern matters which are governed by the provisions of such parts 1 and 4, shall supersede the Hawaii Prepaid Health Care Act (as in effect on or after the date of the enactment of this paragraph), but the Secretary may enter into cooperative arrrangements under this paragraph and section 506 with officials of the State of Hawaii to assist them in effectuating the policies of provisions of such Act which are superseded by such parts.".

(b) TREATMENT OF OTHER STATE LAWS. The amendment made by this section shall not be considered a precedent with respect to extending such amendment to any other State law.

(c) Effective Date.-The amendment made by this section shall take effect on the

date of the enactment of this Act. SEC. 202. TREATMENT OF MULTIPLE TREATMENT OF SEC. 202. PLOYER WELFARE ARRANGE-UNDER EMPLOYEE RE-MENTS TIREMENT INCOME SECURITY ACT OF 1974.

(a) DEFINITION OF MULTIPLE EMPLOYER

WELFARE ARRANGEMENT.-Section 3 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002), relating to definitions, is amended by adding at the end

thereof the following new paragraph: "(40)(A) The term 'multiple employer welfare arrangement' means an employee welfare benefit plan, or any other arrangement (other than an employee welfare benefit plan), which is established or maintained for the purpose of offering or providing any benefit described in paragraph (1) to the employees of two or more employers (including one or more self-employed individuals), or to their beneficiaries, except that such term does not include any such plan or other arrangement which is established or

"(i) under or pursuant to one or more agreements which the Secretary finds to be

collective bargaining agreements, or "(ii) by a rural electric cooperative.

"(B) For purposes of this paragraph-

"(i) two or more trades or businesses, whether or not incorporated, shall be deemed a single employer if such trades or businesses are within the same control group.

"(ii) the term 'control group' means a group of trades or businesses under common

control,

"(iii) the determination of whether a trade or business is under 'common control' with another trade or business shall be determined under regulations of the Secretary applying principles similar to the principles applied in determining whether employees of two or more trades or businesses are treated as employed by a single employer under section 4001(b), except that, for purposes of this paragraph, common control shall not be based on an interest of less than 25 percent, and

"(iv) the term 'rural electric cooperative'

means.

"(I) any organization which is exempt from tax under section 501(a) of the Internal Revenue Code of 1954 and which is engaged primarily in providing electric service on a mutal or cooperative basis, and

"(II) any organization described in paragraph (4) or (6) of section 501(c) of the Internal Revenue Code of 1954 which is exempt from tax under section 501(a) of such Code and at least 80 percent of the members of which are organizations described in subclause (I)."

(b) LIMITATION ON PREEMPTION OF STATE LAW WITH REGARD TO WELFARE PLANS WHICH ARE MULTIPLE EMPLOYER WELFARE ARRANGEMENTS.—Section 514(b) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1144(b)), as amended by section 201 of this Act, is further amended by adding at the end thereof the following new paragraph:

"(6)(A) Notwithstanding any other provi-

sion of this section-

"(i) in the case of an employee welfare benefit plan which is a multiple employer welfare arrangement and is fully insured (or which is a multiple employer welfare arrangement subject to an exemption under subparagraph (B)), any law of any State which regulates insurance may apply to such arrangement to the extent that such law provides

"(I) standards, requiring the maintenance of specified levels of reserves and specified levels of contributions, which any such plan, or any trust established under such plan, must meet in order to be considered under such law able to pay benefits in full when

due, and

"(II) provisions to enforce such standards, and

"(ii) in the case of any other employee welfare benefit plan which is a multiple employer welfare arrangement, in addition to this title, any law of any State which regulates insurance may apply to the extent not inconsistent with the preceding sections of this title.

"(B) The Secretary may, under regulations which may be prescribed by the Secretary, exempt from subparagraph (A)(ii), individually or by class, multiple employer welfare arrangements which are not fully insured. Any such exemption may be granted with respect to any arrangement or class of arrangements only if such arrangement or each arrangement which is a member of such class meets the requirements of section 3(1) and section 4 necessary to be considered an employee welfare benefit plan to which this title applies.

"(C) Nothing in subparagraph (A) shall affect the manner or extent to which the provisions of this title apply to an employee welfare benefit plan which is not a multiple employer welfare arrangement and which is a plan, fund, or program participating in, subscribing to, or otherwise using a multiple employer welfare arrangement to fund or administer benefits to such plan's participants and beneficiaries.

"(D) For purposes of this paragraph, a multiple employer welfare arrangement shall be considered fully insured only if the terms of the arrangement provide for benefits the amount of all of which the Secretary determines are guaranteed under a contract, or policy of insurance, issued by an insurance company, insurance service, or insurance organization, qualified to conduct

business in a State.".
(c) Effective Date.—The amendments made by this section shall take effect on the

date of the enactment of this Act. Resolved, That the House agree to the Senate amendment to the title of the bill.

Mr. BAKER. Madam President, I move that the Senate disagree to the House amendment to the Senate amendment and request a conference with the House, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer appointed Mr. Dole, Mr. Packwood, Mr. Wallop, Mr. Long, and Mr. HARRY F. BYRD, JR., conferees on the part of the Senate.

Mr. BAKER. Madam President, I thank the chairman for yielding to me to transact this business.

### FURTHER CONTINUING APPROPRIATIONS, 1983

The Senate continued with the consideration of the joint resolution (H.J. Res. 631)

Mr. HATFIELD. Madam President, I vield to the Senator from Illinois (Mr. PERCY) for 2 minutes.

UP AMENDMENT NO. 1530

Mr. PERCY. Madam President, send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1530.

Mr. PERCY. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of Title I, add the following new section:

## COUNSELOR

(a) The second sentence of section 2(a) of the Act of May 26, 1949 (22 U.S.C. 2653(a)) is amended by striking out "The Counselor of the Department of State and the Legal Adviser, who are" and inserting in lieu thereof "The Legal Adviser, who is'

(b)(1) Section 5315 of title 5, United States Code, is amended by striking out "Counsel of the Department of State.".

(2) Section 5314 of title 5. United States Code, is amended by inserting after the item providing for four Under Secretaries of State the following:

"Counsel of the Department of State."

Mr. PERCY. Madam President, the White House personnel office, OMB and the Department of State have all asked that the position of counselor be raised from executive level IV to executive level III.

The counselor's access to and use by the Secretary is equivalent to that of the Under Secretaries, who are level

The counselor is a principal officer of the Department, serving the Secretary as a special advisor and consulton major problems of foreign policy, and providing guidance to the appropriate bureaus with respect to such matters.

The counselor conducts special international negotiations and consultations, and also undertakes special assignments from time to time, as directed by the Secretary.

Such a change will not affect the size of the counselor's staff. The actual cost will be \$1,000, which is the salary difference.

Executive level IV now receives \$58,500. Level III receives \$59,500.

Madam President, I believe this matter has been cleared on both sides.

Mr. HATFIELD. Madam President, the Senator is correct. This has been approved on both sides. The committee is willing to accept the amendment.

The PRESIDING OFFICER (Mr. NICKLES). The question is on agreeing to the amendment.

The amendment (UP No. 1530) was agreed to.

Mr. HATFIELD. Mr. President, a while ago, when I indicated that we wanted to try to complete work on two amendments that have been cleared and had time agreements which had been reached, the Percy amendment and the Danforth amendment, I indicated then that I knew of no desire for a rollcall. The Senator from Alabama evidently was seeking recognition to make a request for a rollcall

In order to accommodate him, I would like to ask unanimous consent that we proceed to debate the area of the Danforth amendment which has been reached by agreement and, if the Senator from Alabama wishes to, call for a rollcall and that rollcall be set over until tomorrow.

The PRESIDING OFFICER. Is there objection?

Mr. DENTON. Madam President, I know of no objection. We did send a staff member to the chairman's staff to indicate that we did intend to ask for a rollcall vote. I tried to get the attention of the Chair to indicate that there was a mistake made.

If I may, I would ask that rather than having the discussion tonight, with no one here, if Senator Danforth would consent to having the debate commence on tomorrow.

Mr. DANFORTH. Madam President, since 2 o'clock this afternoon, approximately, I have been trying to get this amendment in. If we were to do that, it would be satisfactory to me. I would like to have a unanimous-consent request offered and responded to on the exact timing when this amendment would be offered and when it would be voted upon.

Mr. HATFIELD. Madam President, I would like to suggest, to resolve this, that I will ask unanimous consent that the Senator from Missouri be the first one to offer an amendment after we convene tomorrow to accommodate all parties involved.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Madam President, may I call for the yeas and nays at this time in order to have that locked

The PRESIDING OFFICER. At this point, it would take unanimous consent to do that.

Mr. HATFIELD. I ask unanimous consent to request the yeas and nays at this time on the Danforth amend-

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATFIELD. Mr. President, I am now looking for the majority leader or the assistant leader. I yield the floor at this time.

# INTERNATIONAL ATOMIC **ENERGY AGENCY**

Mr. PERCY. Mr. President, at the September meeting of the International Atomic Energy Agency's general conference, several Middle East states, acting with the support of a number of nonalined nations, illegally and unjustifiably moved to deny Israel's credentials for the general conference. In response to this deplorable act, the United States, together with a number of other responsible nations, walked out in protest at this attempt to politicize this U.N. technical body. In my view, politics has no place in this important organization which served both national and global interests through its safeguards on nuclear facilities around the world.

In walking out of this meeting and in conducting a reassessment of the American role in the IAEA and of the IAEA program of safeguards management, the administration has acted appropriately. IAEA cannot be allowed to become a political hostage and our actions have effectively delivered this message to the international community. This important signal helped to defuse similar efforts to eject Israel from the International Telecommunications Union and the U.N. General Assembly. I should note that Israel remains active in all these organizations, including the IAEA.

Mr. President, Senate Concurrent Resolution 68, passed by the Senate earlier this year, expressed the sense of the Congress that the United States should withhold its contributions from any U.N. specialized agency which illegally denied the credentials of Israel "unitl this illegal action is reversed." I will ask unanimous consent that a copy of that resolution appear in the RECORD at the conclusion of my remarks. The actions of IAEA amounted, in effect, to a denial of Israel's credentials on the last day of the session only. That was a highly offensive, illegal, and unjustified action and called for a strong response from the United States. But it is not an action that is ongoing or continuing. We have made our point by withholding funds to date. I do not think it is in Israel's interest or in our own to continue this policy and inflict serious damage on the ability of the IAEA to carry out its important work.

Mr. President, I ask that Senators act responsibly to restore U.S. funding allocated to the IAEA.

There being no objection, Senate Concurrent Resolution 68 was ordered to be printed in the RECORD, as follows:

#### S. CON. RES. 68

Whereas the United Nations was founded on the principle of universality of membership; and

Whereas the charter stipulates that United Nations members may be suspended by the General Assembly only "upon the recommendation of the Security Council";

Whereas any move by the General Assembly that would illegally deny Israel or any other democratic state its credentials in the Assembly would be a direct violation of these provisions of the charter: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That if Israel or any other democratic state is illegally expelled, suspended, denied its credentials, or in any other manner denied its right to participate in the General Assembly of the United Nations or any specialized agency of the United Nations, it is the sense of Congress that the United States should—

- (1) suspend its participation in the General Assembly or such United Nations agency; and
- (2) withhold its assessed contribution to the United Nations or to the specialized agency involved until this illegal action is reversed; and be it further

Resolved That it is the sense of the Congress that the Secretary of State should communicate to the member states of the General Assembly of the United Nations what the Congress has herein resolved.

# HARLEY-DAVIDSON MOTOR COM.

Mr. PROXMIRE. Mr. President, last month I submitted testimony to the International Trade Commission in support of Harley-Davidson Motor Co.'s petition for relief from the damage suffered by this outstanding Wisconsin firm from foreign competition

Harley-Davidson is fully prepared to compete with any motorcycle manufacturer in the world providing it can compete in a fair and equitable marketplace. That fair and equitable marketplace does not exist at the present time

Mr. President, I believe that the situation surrounding the crisis facing Harley-Davidson must be clearly understood and I ask unanimous consent that my testimony be printed in the Record.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

#### TESTIMONY SUBMITTED TO THE INTERNATIONAL TRADE COMMISSION

Members of the International Trade Commission, my name is William Proxmire, United Senator from the State of Wisconsin. Today, I would like to talk with you regarding the petition submitted by Harley-Davidson under Section 201 of the 1974 Trade Act.

Let me make clear at the outset that I strongly oppose unwarranted government intervention in the free market system. In my opinion, unwarranted intervention is not the issue here.

Harley-Davidson faces a unique situation which involves violation of one of the fundamental principles that makes our free and open market system work. That principle is fair and equitable competition.

Let's look at the facts.

Harley is a fine company that has recognized that the American people and world market demand new standards of excelence. Years ago, they began a comprehensive program to meet those new expectations and have succeeded in creating a prototype for American businesses eager to compete with foreign manufacturers both here at home and overseas.

Harley was one of the first companies in this country to implement an extensive approach to manufacturing they call "Material As Needed", or what the Japanese call kanban.

Harley also is a leader in the Quality Circles movement and has instituted a comprehensive quality management program that involves everyone from the shop floor right up through its chairman of the board.

Because of the success of those efforts—they've doubled their shipment of defect free products in the last two years, for example—Harley was the only small, closely-held manufacturer cited by the American Society for Quality Control in a recent Business Week special section (November 8, 1982.) Harley was in the company of such well regarded American companies as IBM, Westinghouse and General Dynamics. I believe they deserve that recognition.

In short, I believe that Harley now is in a position to compete with any motorcycle manufacturer in the world providing—and this is an important provision—Harley can

compete in a fair and equitable market-

That fair and equitable marketplace does not exist at the present time.

Four of Japan's major manufacturers have taken direct aim at Harley's heavy-weight motorcycle market. That attack hurt Harley, deprived the company of needed resources to complete its revitalization program on schedule and forced the company to layoff 1,600 Americans.

That situation has become increasingly ominous as Japanese motorcycle manufacturers deliberately have built up greater and greater supplies of unsold motorcycles in this country. It is reasonable to assume that they intend to wage an all out market war based on price, and aimed at driving competitors out of business.

In this case, those competitors primarily turn out to be the Japanese manufacturers themselves and Harley-Davidson, the last United States manufacturer of motorcycles. And the fact is that Harley probably would be the first casualty if the Japanese are allowed to launch an all out attack in the American market.

I want to point out that Harley, the more than 700 independent dealers who represent Harley and the company's suppliers would not be the only casualties. Many dealers who currently represent Japanese motorcycle manufacturers will find it economically impossible to accept a steady torrent of new machines they must sell at massive discounts.

I am told that many dealers are already hard pressed and that many more are going out of business. These small businesses are no more equipped to deal with an onslaught of built up Japanese inventory than is Harley-Davidson.

Members of the Commission, I believe we have to face the fact that the success of a free and open market system depends on the participating parties playing by the same rules. Our concept of an open market—a concept embodied in our law and beliefs—is that competition must be carried out by individual companies acting alone, without government subsidies nor direction, and that we will not create artificial barriers to shield competitors from the realities of the marketplace.

Harley-Davidson's individual actions to help itself provide a clear example of how an American company competes in the United States. Just as clearly, the threat they face from Japanese motorcycle imports clearly demonstrates the unfair and inequitable market pressures that the Japanese can bring to bear and the damage that can be done to American industries.

Despite the damage that Harley already had suffered because of Japanese imports, Harley-Davidson's massive efforts have put them in a potentially strong competitive position. They have achieved these results on their own. They have not asked for a government bailout, and they are not asking for a bailout today.

for a bailout today.

Harley is simply asking that the government ensure that it has a fair and equitable market in which to compete.

I urge the Commission to support Harley's

### AL QUIE STEPS DOWN AS GOVERNOR OF MINNESOTA

Mr. DURENBERGER. Mr. President, next month a person who is well known to many of my colleagues in

the U.S. Senate and especially to those in the House will be retiring from public life. Al Quie will step down as Governor of my State of Minnesota.

For the last 28 years Governor Quie has served in public office. Everyone who knows him will agree with my wish that after some well-deserved time for himself and his family, Al Quie comes back to public service for another 28 years.

In areas ranging from education to agriculture, Al Quie has made his mark. His contributions to public policy have made life better for a generation of Minnesotans and all Ameri-

Earlier this week Al Quie gave his farewell address as Governor. His comments—typical of the way he conducted himself while in office—are especially relevant to Congress today.

Governor Quie had a vital message for all officeholders:

My argument is not with firmly held beliefs, as I urge conviction, not timidity. My argument, rather, is with unorthodoxy based on pettiness.

Mr. President, the closing days of the 97th Congress and certainly the issues coming before us in the 98th Congress will test us on our conviction and our timidity.

I hope all of us will follow the example Al Quie set in his 28 years. I ask unanimous consent that two articles from the December 14, 1982, St. Paul Pioneer Press be included in today's RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

QUIE A TRUE CLASS ACT AS HE MAKES HIS EXIT

# (By John Camp)

Retiring Gov. Al Quie has shown us a class act the last few weeks.

In the face of the most bitter partisan exchanges, he's managed to patch together state finances with at least a semblance of balance and justice. We had neither catastrophic service cuts nor massive tax increases.

And after it was done—he put his name to the financing bill late Monday afternoon, the last bill he'll sign as governor of Minnesota—he admitted he was relieved.

"Getting it done will give (Gov.-elect Rudy) Perpich an opportunity to solve some pretty tough problems without the acrimony and finger-pointing there would have been if he'd had to do this." Quie said a few minutes after he signed the bill.

If Quie had chosen to be just a good Republican, rather than a good governor, he could have figured out ways to let the financial crisis drift for a couple of weeks, until DFLer Perpich was in office.

Perpich would have then been faced with an even larger problem than the state had this week—he would have had to cut the same amount of money, or raise the same amount of taxes, but over a shorter time. To do that, the tax increases would have been sharper, cuts deeper.

Why would anybody want to do that? Because if action had been delayed, the Republicans could have pointed at the DFLers as responsible for the simultaneous tax increase and service cut.

Quie didn't permit that.

"We had an opportunity to get (the financing package) in place on Jan. 1. Perpich didn't have that opportunity. Even with this bill, I have to say his problems are tremendous.

"The surtax on the income tax and the sales tax will sunset (end) in July, and he's going to come up with something to cover that. And the Legislature saw fit to remove a limitation on welfare that we put in, so he's going to have to deal with that. I expect welfare costs to mushroom unless they put some kind of a lid on it. That's going to be a serious political problem for him," Quie said.

To push the emergency financing bill through the Legislature, Quie threatened to unilaterally slash state spending. If he had done that, layoffs would have been massive and immediate.

"I told them (the legislators) that if they didn't approve the bill, I'd unallot. I told them they wouldn't make it back to their districts ahead of the news, and I wasn't bluffing. The way I read state law, I had no choice. I had (the unilateral reductions) already laid out. I had the information on my desk from Finance Commissioner (Allan) Rudell and I had written out my response.

"I was serious. If they had failed to pass a bill on Friday, they would not have gotten home before the news reached their constituents." he said.

Although his time as the state's chief executive is running out, Quie remains deeply interested in Minnesota's future. He is not optimistic about the possibilities facing the Perpich administration.

"His (Perpich's) problem, everybody's problem, is the economy, and I don't see it turning around enough to bail him out. Everything you look at is down. Agriculture is one of the most important segments of our economy, and agriculture is way down. It's going to be a long pull before the farmers can get out. Some farmers who've made it this far won't make it to the end of this

year...

"And I don't think taconite will ever be what it used to be. It might get to be 75 or 80 percent of what it was, but it'll never come all the way back, and the trend is down. The general economy should show some recovery, but a lot of that's in service jobs and these 'information society' jobs, where the pay just isn't as good as it was in the older industries. Steel workers got very good wages. When you lose that, you lose a lot." he said.

I got the impression that Quie would have preferred a different exit from office, one free of partisan snarling and manuevering.

"I know in my heart that this was the right thing to do," he said.

And I got the impression that he would have liked to keep doing it.

"But I've got no regrets for myself. I've enjoyed this last year (since he announced he wouldn't seek re-election), or most of it, anyway, and I think I know what to do as governor. But that was not to be. So, I really have no regrets for myself."

## QUIE BLASTS PARTISAN POLITICS FOR STIFLING DEBATE OF ISSUES

#### (By Bill Salisbury)

In his farewell address after 28 years in public office, Gov. Al Quie Monday night sharply criticized the growth of extreme partisanship in Minnesota politics, saying it results in shallow debate of public issues. Quie, 59, who plans to retire from politics when he leaves office Jan. 2, took a parting shot at both his own Independent-Republican Party and the DFL for fostering partisanship.

"Politics in Minnesota suffers an excess of it, and I deplore it," Quie said in a speech at the University of Minnesota, under the auspices of the Reflective Leadership Program of the Hubert H. Humphrey Institute of Public Affairs. Quie established a scholarship fund for the program.

"My argument is not with firmly held beliefs, as I urge conviction, not timidity" he said. "My argument, rather, is with orthodoxy based on pettiness."

The biggest difference in state government between now and when he first was elected to the Minnesota Senate in 1954, Quie said, is "the often unbending partisanship of politics that has developed in Minnesota"

For instance, he said, budget deliberations last December were "dreadful" because he and legislative leaders were "all drawn—some of us obliviously, some of us eagerly, none of us wisely—into dogmatic bunkers which we defended as if they were safeguarding the very honor of our parties.

"We were able to overcome this silliness only when I decided not to seek re-election, when the gravity of our problem finally took hold, and when legislators realized it was better to be any place other than St. Paul if they wanted to return to St. Paul."

Elected officials serve themselves and their responsibilities poorly when they engage in political gamesmanship, he assert-

Saying he has grown "increasingly disenchanted with the shallowness of our debate on public issues," Quie faulted state leaders for doing little to enhance public understanding of the complexity of the state's economic situation and for failing to tap the state's most imaginative thinkers.

"We do not lack in Minnesota for studies, proposals and inquisitiveness," he said. "What we do lack is participation by elected and other officials in substantial discussion of public issues. And nowhere is this shortcoming more pronounced than within our two major political parties."

Quie asserted that the parties have become "more extraneous than integral to most people. They are viewed by many of their leaders as ends in themselves when they are not, and their grasp on the issues of the day is only randomly firm."

As a result, he said, the defeat in the Sept. 14 primary of both parties' endorsed candidates for governor was not surprising.

He urged the parties to become "catalysts of policy ferment and intellectual leader-ship," adding they might better fill this role if they "borrowed some intellectual curiosity and discipline from the academic world."

Quie recently has come under fire from both parties. DFLers blamed him for the state's budget problems, and I-R party and legislative leaders criticized him for recommending tax increases to help avoid a budget deficit.

He served in the state Senate for four years, represented southeastern Minnesota in Congress for 21 years and has been governor since 1978.

Quie said he is particularly proud of twaccomplishments during his term as goven

One is indexing, which inflation-proofs income taxes. "Because indexing prevents tax revenues from rising faster than inflation, politicians have less room to hide," he

said. "Public officials should be put on the spot, not only when it comes to determining the services their constituents receive, but also when the taxes they pay are increased."

Selection of judges based on merit is the second accomplishment in which he takes great pride. He said his system of having lawyers, judges and laymen recommend candidates for judgeships "assures the selection of superior individuals, free of disproportionate partisan consideration."

Quie said he would like to have done only a few things differently during his term as

governor.

"I would have been more aggressive earlier in working for a sounder job climate," he said. "I misread how intractable a mountain needed to be moved. The big three that spell poor job climate still loom in front of us: workers' compensation, unemployment insurance and commercial-industrial property taxes."

He said he also should have advocated fundamental reforms in the way the state funds elementary and secondary schools.

"We must give school districts the tools to do more for their children if that is their wish. We must encourage their eagerness to do more, and we must provide means by which any district, not just the affluent, can exceed the norm for program and funding."

exceed the norm for program and funding."

Despite current problems, Quie said he is optimistic about the state and nation's

future.

"I've enjoyed my public career immensely," he said. "For all the criticism directed at people in politics . . . there is honor and integrity in this service. I have been honored to be part of it.

"I leave office and public life confident, strong, happy and at peace," he concluded.

## HARRY F. BYRD, JR.

Mr. WARNER. Mr. President, as the 97th Congress draws to a close, we continue to pause in doing the Nation's business to pay tribute to Senators who will not be with us when the next Congress convenes. Although I have had the privilege of placing other articles in the Record on my retiring senior colleague, I once again wish to call to the Senate's attention an interview with him, printed recently in the fall issue of a relatively new magazine, the Southern Partisan.

This interview captures much of the philosophy of Senator Harry Flood Byrd, JR., which is a philosophy long shared by the majority of Virginians—that "\* \* \* it's extremely important that we remain militarily strong \* \* \* (and) economically (strong) as well." Senator Byrd also comments, in light of the heavy population growth in the South and Southwest, that southerners can play an even greater role in government than they have in the past. He says: "I think the southern philosophy, the southern way of doing things in government, is becoming more prevalent these days and more popular nationwide." To that, I say, "Amen."

Mr. President the interview was conducted for the magazine by a native Virginian and a friend of mine as well as of Senator Byrd, Mr. Donald Bald-

win. Mr. Baldwin, who lives in Alexandria, is a consultant here in the Nation's Capital where his firm, Donald Baldwin Associates, specializes in government relations.

I ask that this article be printed in the RECORD.

The article follows:

[From the Southern Partisan, fall issue, 1982]

## BYRD OF VIRGINIA: A CLOSE LOOK (By Donald Baldwin)

Senator Harry Flood Byrd, Jr., will step down January, 1983, when the new Members of the Senate are sworn in, after eighteen years in the United States Senate and seventeen years as a member of the state senate of Virginia, combining thirty-five years service as an elected public servant.

What is so unique about this southern gentleman "of the old school," is that he has maintained consistently the philosophy of government supported by his father, Harry Byrd, Sr., and perhaps first expressed by Thomas Jefferson when he said: "That government which governs least governs

best."

The Byrds' service to the Commonwealth of Virginia began over 300 years ago in 1671 when the first Byrd, William Byrd, I, landed with the early settlers at Jamestown. For most of the years since the first Byrd came to America in 1671 there has been a Byrd active in the affairs of the state and the nation. William III helped found the city of Richmond, and many of the subsequent Byrds were active in the development of the state's government, contributing continually to the growth of the state up through the present century. Harry Byrd's grandfather was speaker of the Virginia House of Delegates, and a prominent Virginia lawyer. His uncle, Richard Evelyn Byrd, was the famous Arctic explorer, Harry Byrd, Sr., developed what was at one time called the "largest independent apple orchard in the world" while at the same time founding a publishing business in the valley of Virginia and the neighboring West Virginia counties. Harry Byrd, Sr., served as a state senator, Governor, and United States Senator.

Harry, Jr. established his own record after being elected in a special election for the unfinished term of his father, and went on to be elected to three full terms in the Senate of the United States. In each race

his margin of victory increased.

In an era of dramatic changes in lifestyles, philosophy, and morals, Harry Byrd, Jr. gives the impression of what many admiring Senate colleagues still refer to as "the proper southern gentleman."

So it goes. The end of an era. The end of a family service in the United States Senate, fifty years, father and son. A unique record

of service.

Following is transcript of a recent conversation given exclusively to The Partisan by Senator Byrn.

Partisan. Do you have any regrets about having served as an independent in the United States Senate, and do you recommend serving as an independent for other Southern politicians?

Byrd. I have no regrets. I feel comfortable as an Independent. As to recommending it to others, I guess the only thing I can say is it is a somewhat difficult way to be elected; and, as evidence of it, in the long history of the U.S. Senate, only two of us have ever been elected as an Independent. The first, was George W. Norris of Nebraska. He was

in the Senate for three terms, two terms as a Republican. In 1936 he felt that the Republicans were too conservative and he wanted FDR that year for President. So, Senator Norris ran as an Independent and was elected in 1936.

PARTISAN. How would you compare present-day members of the Senate with those of your father's and your career in

the United States Senate?

Byrd. That's awfully difficult to do. I'm looking back over a period of 50 years. First, when my father came over 50 years ago, I was of course quite young at the time and the men of that era impressed me as being very outstanding individuals. One becomes more closely associated with one's colleagues. One doesn't have the same viewpoint necessarily when looking at it from afar. So, I find it very difficult to judge. I must say I'm very well impressed with the younger members of the Senate who were elected two years ago and four years ago. I think that we have a very, very good group.

Partisan. Personally I'm not convinced that many of the elected officials today will stand on the same kind of principles that you and your father have during the 50 combined years that the two of you have served the Commonwealth of Virginia.

Byrn, My father's hallmark, and I try to follow it, was that he was very reluctant to make commitments, but once he made a commitment he always adhered to it. I've tried to follow that same philosophy. I think it's important for those of us in public life to have a consistent philosophy. That doesn't mean that one cannot change one's views from time to time as a result of a different era. But, I do think it's important that citizens, whether they be lobbyists or whether they be individual citizens, that they have some assurance that we will vote our own philosophy. Now, all senators don't take that same view and I have no criticism of them for doing that. I think it's important that individual citizens have some assurance that there is consistency in viewpoint in their elected representative.

Partisan. Those of us from Virginia were pleased that your father was the "watchdog of the Treasury." Do you think it's too late to stop or turn back what I feel is a definite

socialistic trend in recent years?

BYRD. No, I do not. I think it is going to be difficult to do but I do not think it is too late. President Reagan has made a determined start in that direction and I think that the last year has been very beneficial. It was only because of the determination of President Reagan that the Congress was willing to slow down the rate of increase in Government spending. I don't think it has been slowed down enough. But, at least the trend is in the right direction. In regard to other policies of government, government regulations, government controls, there again President Reagan has taken the leadership in attempting to reverse that-and I think progress has been made in that regard.

Partisan. Do you think that the President should give up on his position of maintaining the tax cuts for the next two years—the individual, and corporate tax cuts that are on the books now? Do you think he ought to back a Democratic proposal to cut those back?

Byrn. I think the emphasis should be on spending. Many persons feel that spending has been reduced. Well, actually spending has not been reduced. As you know, it is the rate of increase in the cost of government that has been closed down but the amount

of money being spent this year will be greater than last year. And, the upcoming year will be greater than this year. So, spending has not been reduced. If we are going to get spending under control, if we are going to balance the budget we must hold the increase in the cost of government to 4 or 5 percent for at least 3 or 4 years. You mentioned specifically the Reagan tax program. Of course part of it went into effect last October-a 5 percent reduction on personal income taxes—another 10 percent to take effect this year. I don't think that ought to be disturbed. On the second 10 percent which is due to take effect July 1, 1983, I have an open mind. I prefer that it continue as was planned, but it might be necesary to make a change in that proposed reduction in 1983. I would not rule that out. My great fear is these tremendous deficits-and I just think it is vitally important-to have those deficits substantially, not cosmetically, but substantially reduced. It may be necessary in order to do that, not only to curtail spending but also to delay or to defer temporarily those tax reductions.

PARTISAN. Do you mean we should hold the government budget to no more than 4-5 percent increase in expenditures a year?

Byrd. We need to hold the increase in expenditures to no more than 4-5 percent a year. It would still provide for an increase but a substantially reduced increase. Members of the Boilermakers Union came to see me not long ago and they insisted that Government spending had been reduced and had been very harmful to everybody. Well, the first thing people need to do is get their facts straight. Government spending has not been reduced. The spending this year will be 10 percent greater than last year. For the upcoming year, it will be substantially greater than this year. So, spending has not been reduced. What has been reduced has been the rate of increase in spending.

Partisan. Who are the 5 greatest men you have met during your political life?

Byrd. Well the one who had the greatest influence on me was my father. He was not only my father but was my closest and dearest friend and also we share the same philosophy—the same concept of Government—so I would put him at the top. I'm a bit prejudiced in that regard. I would put my father's longtime colleague, Senator Carter Glass of Virginia as one of the ablest and most outstanding public officials I have met. I'd put President Eisenhower very high on that list. Several other senators who come to mind I feel were outstanding. I think Senator Taft of Ohio was one of the Senate's all time greats. Winston Churchill I regard as the greatest man of the 20th century.

Partisan. You thought a lot of Senator Richard Russell, of Georgia, I also remember.

Byrd. Senator Richard B. Russell was my closest friend in the Senate when I first came here. I looked to him for guidance and advice. He had served 30 years with my father. I had known him through most of those years. We became very close after I came to the Senate. I put him right near the top. I am confining my comments on Senators to those who are deceased.

Partisan. I recall also that during your career in the United States Senate you never endorsed anybody for President prior to this campaign. You did endorse Ronald Reagan for President. Do you feel that he's doing a good job given the problems he has with a divided Congress and taking on this

revolutionary effort to turn the country around?

Byrn. Yes, I think he is doing a good job. I did support him for President. I'm glad I did. I think he's one of the few presidents, maybe the only president in recent years who made a determined effort, and a sustained effort, to get government spending under control.

Partisan. Did your father have as much influence on you as many have thought and some have observed, Senator Byrd?

Byrd. Yes, yes, he did. We were very close throughout his entire life. He was elected Governor when I was a little boy of about 10 years old. He would take me on almost every occasion that he would attend. As a result, by the time I was 14 years old I had been in every county and city in the State. Because of my close contact with him and because I shared his own philosophy I assume I gained basically from him. He did have a great influence on my own views. We didn't agree on everything, of course, but on hasic philosophy we did agree.

basic philosophy we did agree.

Partisan. Since 1671 when William Byrd I came to this country there has been a Byrd active in the affairs of the State of Virginia and in the affairs of the country. Your retirement at the conclusion of this term in the United States Senate will at least temporarily end the Byrd "reign," so to speak. Do you have any misgivings about the fact that there isn't anyone, at least at the present, to step in and carry on the Byrd

Byrd. After 50 years maybe it is as well that some other name come into the picture, temporarily, at least.

Partisan. The new occupant for the seat that you hold in the Senate is going to be decided in November. Will you take any position in that campaign?

BYRD. I don't know. I haven't made a decision on that. I'm certainly not going to make any statement for the time being. I don't know what I may do the latter part of the campaign.

PARTISAN. Do you have any advice for Southerners coming into public life now? I'm speaking of candidates for State legislature or for the House of Representatives, or United States Senate or Governor?

Byrd. I'm not much on giving advice. I would encourage sound-thinking individuals to take an interest in government and politics. After all, politics is the art and science and government and we need good people in political life. It's a tough life in many respects. But we need good people in political life and I would hope that more and more individuals would find it desirable to participate.

Partisan. We've talked about the need to cut the spending of the federal government and the need to balance the budget. You commented also that you didn't think it was too late to turn back the socialistic philosophy that many of us feel is influencing our government. Do you think Southerners can continue to play a prominent role as they have through the history of this country? Southerners have been strong in states rights and for more conservative handling of our fiscal responsibility. Do you think southerners can still play a role in that?

Byrd. I do. Absolutely. I think Southerners.

Byrd. I do. Absolutely. I think Southerners can play a tremendous role. In fact the South and the Southwest, because of the heavy population increases, will have even greater influence on government than it has had in the past. I think the southern philosophy, the southern way of doing things in government, is becoming more prevalent these days and more popular nationwide.

PARTISAN. Many of us believe that our country's future hinges on being militarily strong as well as fiscally strong. How would you, as a member of the Armed Services Committee, suggest that we rectify this impasse on spending?

Byrd. Well, I think it's extremely important that we remain militarily strong. Handin-hand with that is being strong economically as well. I don't see how, in the long run, we can have adequate military strength unless we have good economic strength. I do believe that the proposed increase in defense spending can be curbed to a degree without in any way jeopardizing national security.

Partisan. How much can be cut?

Byrn. That's a little difficult at this point to give a precise figure. But, if I had to do it, I would say we could reduce spending for the year 1983 by something like 10 billion dollars without jeopardizing national defense.

# SUPPORT FOR JACKSON-TOWER AMENDMENT

Mr. COHEN. Mr. President, my statement on the Jackson-Tower amendment was inadvertently omitted from yesterday's Record. I ask unanimous consent that it be included in the permanent Record.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COHEN. Mr. President, I support the Jackson-Tower amendment as one who has serious misgivings about the proposal to place the MX missile system in a closely spaced basing [CSB], or Dense Pack, basing mode.

The Dense Pack proposal only invites skepticism, and it only increases credibility problems for a system about which there is already much doubt. But that fact should not be allowed to abscure the reality that if we eliminate procurement funds for the MX today we will have done so in a peremptory fashion, denying President Reagan and his top advisers the opportunity to make their case to us in Congress and to the American people.

I feel some measure of responsibility for the vote we are casting today. It was the amendment Sam Nunn and I introduced a year ago—an amendment approved by a 90 to 4 vote of the Senate—which required the President to put forward a recommendation for basing the MX.

I have very strong doubts about the recommendation he has made, to place 100 MX missiles in 100 superhardened capsules spaced 1,800 feet apart in alternating rows of twos and threes in a 20-square-mile strip at F. E. Warren Air Force Base in Wyoming. At the same time, however, I do not deny him the chance to convince me—and all of us in Congress—that there is an MX approach which is workable and which will enhance our deterrent capability.

If we vote today to eliminate funds for the first five missiles, or if we vote to allow those funds to be eliminated by a provision which could kill the MX simply through congressional inaction, we will have fairly treated the MX issue on its merits. Such approaches are not, in my view, the proper way to conduct public policy and to make decisions on issues of this magnitude.

I have not hidden my dissatisfaction with the handling of the MX issue, both by the Carter administration and by the Reagan administration. In private conversations with administration officials, in committee hearings, and in debate on the Senate floor, I have attempted to make my concerns clear and to look for solutions for what is increasingly looking like a perhaps in-

soluable problem.

The reason Sam Nunn and I proposed our amendment a year ago was that we were frustrated with what we perceived to be an intention to move forward with an interim basing modeplacing the initial missiles in superhardened silos-that was not survivable, but was costly and probably in violation of terms of SALT I and II. We specified that the MX funds could not be used for that purpose, and we placed into our amendment the December 1 deadline which is responsible for the vote today. That deadline was selected because of our frustration over the failure of our Government to reach a final resolution on the MX basing question.

This irresolution is, I believe, at the heart of the dissatisfaction which is being expressed today. For nearly a decade, we have been hearing a range of highly inconsistent testimony from Air Force, Defense Department, and White House officials about the MX. As recently as this past March, the Armed Services Committee was told by Pentagon officials that dispersion and mobility were the keys to a successful MX program; today we are hearing

the opposite.

One of the questions which personally frustrates me is that of superhardening. Last year, officials told us that there were questions about the ability to superharden to levels adequate to withstand a Soviet attack. The levels being talked about then were in the 5,000 to 6,000 pounds per square inch range. Today, we are told that the intention is to superharden to levels fare greater than that, but I have heard no good explanation of what has happened in the past year to give us the capability to achieve those much higher levels.

What I have heard is that Charles Townes, the man who headed the commission asked to review the MX basing question, is skeptical about the ability to achieve sufficient levels of hardness. And he is not alone in his doubts. Three of the five members of the Joint Chiefs of Staff recommended against proceeding with Dense Pack at this time, we were told at the December 8 hearing. That information alone should give us pause about proceeding

immediately on MX in the absence of closer review.

Having said that, I must say that I think we need to look at some larger issues before we determine exactly what our best course is today. We cannot ignore the implications of our action in terms of the START AND INF/TNF negotiations in Europe. And we cannot ignore the reality that, in the absence of a meaningful arms control agreement, it is necessary for us to modernize our strategic forces.

The vote we are casting today is not a vote on Dense Pack. If it were, I would be voting against it. But our vote is on the question of whether we are going to give the President the opportunity to convince us, and all Americans, that the MX missile system is needed. If he cannot convince us of that by mid-April of next year, we will have the opportunity under the Tower amendment to vote against proceeding with the initial five missiles.

In weighing what I believed to be the fairest, most judicious means of dealing with this most difficult issue, I came personally to the conclusion that we needed the kind of amendment Senator Tower has put forward. The amendment strikes the appropriate balance to insure that both proponents and opponents of MX will have their day in court and that the issue can be debated in an atmosphere far better than the one we have in the rushed spirit of a pre-Christmas lameduck session.

What I like most about the Tower approach is the positive fence which it offers. Before the money can be spent, both the Senate and House will have to vote in favor of having it spent.

My feeling was that we needed more than simple resolutions of disapproval. Resolutions of approval, the positive fence, insure that before we can proceed with spending the MX funds, we will have the kind of consensus to do so that is essential if we are to prevent further fractious debate and uncertainty about the program.

At the same time, I concluded that a time limit was critical to insure that an up-and-down vote would actually be taken. It would be unfair to allow an issue of this magnitude to be filibustered away, preventing a vote. The procedure for expedited consideration will guarantee that there will, indeed, be a vote.

To those who say we are only deferring a decision, I cannot challenge their assertion. But I would only say that this makes far more sense to me—postponing that decision until we have had the opportunity to hear the case which the administration believes it can make—than does rushing to judgment and killing the MX outright, as we could do if we do not support the Tower amendment.

Let me reiterate. I do not support Dense Pack. I will not support Dense Pack. The administration seriously eroded its credibility by even putting this proposal forward.

If the Tower-Jackson amendment is approved, the President will have a responsibility to salvage that credibility—and the MX program itself. He must also use that period to prove to the American people that his administration does have a credible, cohesive arms control policy.

Over the past several months, I have received hundreds of letters from constituents concerned about our nuclear arms policy and about the possibility of nuclear conflict. With them, I have wrestled with the question of how we can "defuse the monster" which the arms race represents.

While I do not agree with those who would freeze the nuclear arsenals of the United States and the Soviet Union at present levels, I am in accord with them on the position that something must be done to reduce the level of nuclear arms and the danger they represent to stability and world peace.

This is an issue which I have devoted a lot of time to over the past few years. During the Senate Armed Services Committee's consideration for the SALT II treaty, I had an opportunity to immerse myself in the intricacies of arms control policy—as well as the more arcane matters of throw weight and megatonnage.

I was troubled then—and I am troubled now—about how easily the arms control process can be inverted. As I said in the additional views I filed with the committee report:

It has been argued that we were but two apes on a treadmill stepping relentlessly into the stratosphere of pure science where the only morality is the art of the technologically possible.

As I look for solutions, for ways to get both the United States and the Soviet Union off that treadmill, I conclude that we are stymied by the absence of an overall framework for limiting the escalation of the arms race. It is the absence of that framework which, in my views, has generated the nuclear freeze movement, while at the same time frustrating efforts to achieve a meaningful arms control agreement.

In looking for possible solutions to this problem, I find myself more and more convinced that a fresh approach is needed to deal effectively with the issue. It is my personal judgment that we have to devise a formula that will accommodate the need to modernize our systems to insure that they remain a credible deterrent, while at the same time forcing a reduction in the actual numbers of nuclear weapons being produced.

One idea which I have been giving some thought to—one which I intend

to discuss at greater length in this forum over the next several months—would require that for every new weapon added to the force by either side, two older, less stabilizing weapons must be eliminated. In other words, the price of modernization would be reductions.

This guaranteed build-down of United States and Soviet strategic forces would thus be accomplished at the same time that balance and deterrence are assured. It would insure that force levels would decrease, not increase. And, I believe, it would, more effectively than any other means, improve the prospects of lessening world tensions and raising the nuclear threshhold to a safe level.

I want to give more thought to this approach, but it is one which I intend to broach with others who are concerned about the arms race and are looking for possible solutions. There are, I recognize, no easy answers, but it strikes me that this kind of step might meet the dual goals of maintaining an effective deterrent force, while at the same time providing for smaller nuclear arsenals and, I hope, lessening world tensions.

# ARE ENVIRONMENTAL ORGANIZATIONS MINDFUL OF THEIR PUBLIC RESPONSIBILITY?

Mr. SYMMS. Mr. President, I am pleased to include in today's RECORD an article by Dr. Richard Lesher, President of the U.S. Chamber of Commerce. As a Member of the Senate who has been involved in many environmental issues. I am appreciative of Dr. Lesher's recognition of the important responsibility that environmental organizations owe their trusting readership and the general public. That public trust is a heavy obligation. one not to be taken lightly, or used manipulatively. I realize that the truth often does not make for interesting fund-raising material, and that controversy, exaggeration, and sensationalism are much more successful for sparking contributions. The distortions to which Dr. Lesher refers, however, may eventually backfire on their propagators and discredit their organizations.

The environmental movement at its onset was a just reaction to some admittedly abusive treatment of our land in the late 19th century. Heightened awareness and sensitivity about environmental considerations, particularly over the last two decades, has resulted in a plethora of environmental statutes and regulations, many of which were political "solutions" to complex issues that still mystify even the scientific community. The ultimate brainchild of that environmental sensitivity was a \$1.3 billion budget and some 10,000 permanent employees, commit-

ted to the task of insuring compliance with the Nation's environmental laws.

I am concerned however, that despite our tremendous progress with environmental problems, the environmental movement is heading in a direction that is contrary to the interests of most Americans. As Erik against Kuehnelt-Leddihn comments in a National Review article entitled. "The Greening of Germany," the environmental or "green" movement in that country has as its primary goal the prevention of the destruction of nature. That goal has been extended to rejection of not only nuclear technology, but of all technology. As Mr. Kuehnelt-Leddihn states, "Nature mustn't be violated by any means, be it nuclear radiation, smoke from steel mills, chemical fumes, or coal-burning plants \* \* \* What is really at the bottom of this trend? \* \* \* What is certain is that they (the Greens) are Edenists, naifs who would like to turn the clock back to some Eden-like, pretechnological age."

Environmental groups today are highly organized, and extremely wellfunded. In fact, Fortune magazine recently listed 14 organizations with total budgets of \$92 million under the title "Green Lobby." I sincerely hope, however, that in pursuing their objectives, they keep in mind that the public, as shown in a recent survey commissioned by the continental group, believes that maintaining a strong national economy is among their top priorities (8 out of 10), that their local communities should grow economically (60 percent, that Government regulation of business usually does more harm than good (7 of 10), and that pollution control measures have created unfair burdens on indus-

try (51 percent). All of us want clean air to breathe and clean water to drink, but we all realize that our jobs and our economy are dependent upon our continued access to the resources that lie within the Earth. Our duty for the future is to insure a reliable supply of these assets to fulfill the demands of our growing citizenry, while simultaneously protecting our environment for the safety and enjoyment of future generations. Improved technology is an integral part of that effort, and as a result, we are getting better at more efficiently using our resources and at handling the waste and by-products of our industrialized society. I commend. Dr. Lesher's fine article to the Members of this body.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HAVE ENVIRONMENTALISTS VIOLATED THEIR PUBLIC TRUST?

(By Richard L. Lesher, President, U.S. Chamber of Commerce)

Last December, the U.S. Chamber commissioned an Opinion Research poll to probe the public's attitudes on clean air legislation and other environmental issues. Among other findings, the survey revealed that next to the Environmental Protection Agency, the group or institution most trusted to make suggestions for changing the Clean Air Act is the environmentalists.

How have environmentalists handled this impressive vote of confidence from the American people? Unfortunately, the current congressional debate over reforming and renewing the Clean Air Act offers ample evidence that many are abusing their public trust. Through scare tactics and outright distortions, they have turned an already complex issue into a political football. This may be a good fund-raising strategy, but it is hardly the way to affect good environmental legislation.

Those who have been working to pass a better Clean Air law that maintains health standards without sacrificing needed construction, jobs and economic growth—including businesses, labor unions, state and local officials, the Reagan administration and a bipartisan coalition in Congress—have been vilified in a vicious letter-writing campaign.

For example, the Sierra Club asserts flatly that "the Reagan adminstration and a host of its big business allies are working to destroy the Clean Air Act... They want the Act dismantled and are pinning their hopes on a 'dirty air bill' now moving through Congress."

The Wilderness Society echoes this charge in its fund-raising letters: "Powerful special economic interests, polluting industries and the Reagan administration are working together to dismantle the Act." The Environmental Defense Fund states that if this effort succeeds, "the health of thousands of people could be affected, and parts of our environment could deteriorate beyond the point of possible future recovery."

The National Audubon Society carried this charge even further in a recent "study" and press release. It accused the Congress and the administration of proposing to weaken the Clean Air Act in a manner that could result in 2,000 excess deaths each year west of the Mississippi.

As off base as they are, it is difficult to refute such extreme charges, because they present no rational basis for constructive discussion and debate. This in itself is a disservice to a public that obviously depends on these organizations for information and insight.

Yet, these letters fare no better when they do focus on specifics. For example, the Wilderness Society asserts that the clean air reform bill sponsored by House Democrats John Dingell and Thomas Luken (and backed by the administration) would:

"Eliminate stringent protection of air quality in most of our national parks." (Not true)

"Repeat or relax 115 provisions of the Clean Air Act, involving every major part of the law." (No basis whatsoever for this claim.)

"Eliminate the requirement that states must meet national air quality standards as quickly as possible." (The basic deadlines do not change in the Luken bill.)

I realize that the leaders of these and other environmental groups may not look too kindly upon counsel from the president of the U.S. Chamber of Commerce. But as one who has had to grapple head on with the cynicism and distrust that often confront members of the business community, let me make a suggestion to our environ-

mental leaders: The public trusts you. Don't abuse that trust further by reducing the clean air debate to hysterics and unprovable charges—or by accusing those who happen to disagree with your particular proposals of wanting to destroy the environment and send people to an early grave. Your organization, your country and our environment will all be better off if you play it straight with the American people.

#### SENATOR NICK BRADY

Mr. PRYOR. Mr. President, when the 97th Congress finally comes to an end, one of our most outstanding colleagues will be leaving us to return to civilian life. In this instance, however, the decision to leave has not been prompted by the ire of the voters but by prearrangement. I am referring to Senator Nick Brady of New Jersey, who was appointed 8 months ago to fill the unexpired term which ends with this Congress.

Senator Brady cannot succeed himself and thus has been in the enviable position of not having to campaign every weekend as the rest of us do. Because of his singular situation and his extraordinarily successful business background, Senator Brady brings a special insight to the workings of the Senate. He shared his impressions of this body recently in a Wall Street Journal article and made a number of very pertinent observations which I hope my colleagues will consider very carefully.

I ask unanimous consent to insert at this point in the Record the profile of NICK BRADY by Al Hunt which appeared in the Journal on December 16.

There being no objection, the profile was ordered to be printed in the RECORD, as follows:

[From The Wall Street Journal, Dec. 16, 1982]

AN EXECUTIVE'S INSIDE LOOK AT U.S. SENATE
(By Albert R. Hunt)

Washington.—When Wall Street pals of businessman Nick Brady ask about his experience as a U.S. senator, they may be surprised by some of his answers.

"The people here are of a higher caliber than I imagined in my fondest dreams," says Sen. Brady, a New Jersey Republican. "But the place doesn't work very well. It is very frustrating."

Nicholas Brady's expertise, as he is quick to concede, is limited; he only arrived here in April to fill the eight months left in the term of Sen. Harrison Williams, who was forced to resign over his involvement in the Abscam scandal. Still Sen. Brady notes that his non-political future has been "liberating" in helping him serve in and evaluate the Senate.

Moreover, Mr. Brady's background—he was a managing director of the securities firm of Dillon, Read & Co. and chairman of Purolator Inc. before coming to the Senate—offers an unusual opportunity for a major business leader to participate first-hand in the legislative process.

In a leisurely hour-long conversation, Sen. Brady seems surprised at the intelligence and competence of some of his fellow law-makers. Many of these senators are as

bright, perhaps brighter, than anyone I've known on Wall Street," says Mr. Brady, who expects to return next month to Dillon, Read.

He cites Senate Majority Leader Howard Baker (R., Tenn.) as "one of the most capable leaders" he has encountered in any field. Of the Senate Finance Committee chairman, Robert Dole (R., Kan.), he says, "Watching Bob Dole manage legislation, it's hard to think of any job he couldn't handle." And the Senate Budget Committee chairman, Pete Domenici (R., N.M.), impresses Mr. Brady as a man of "enormous capability" and prodigious work habits.

He also has been highly impressed with several Democrats. He says he often seeks advice from Louisiana Democratic Sen. Russell Long, "who is so knowledgeable about the (legislative) process." On military matters—Sen. Brady serves on the Armed Services Committee—he admits to sometimes being dazzled by the complexities and says he often looks to Sen. Nunn (D., Ga.) for guidance. And he speaks well of the senior New Jersey senator, Democrat Bill Bradley: "I think we've really worked very well together."

#### MISUSE OF TIME CITED

Probably more out of politeness than politics, Sen. Brady is reluctant to criticize his colleagues by name. But he has little use for the tactics of the New Right, hard-core conservatives. He recalls with dismay the weeks spent debating abortion and school prayer as part of the debt-limit bill. "As important as those issues are, that was time we could have used on the economy," he declares.

But misuse of time and an inability to focus on significant matters is commonplace in the Senate, Mr. Brady believes. "I have voted over 300 times since April," he notes. "You shouldn't vote on more than 20 or 30 things in a whole year. We waste a lot of time."

The New Jersey Republican concedes that the process is so hectic that he hasn't been able to think carefully about necessary changes. But he has formed some tentative conclusions.

First, he thinks both House members and senators should be limited to 12 years of service. "I know that would lose the valuable experience of the Scoop Jacksons"—Democratic Sen. Henry Jackson, the 30-year veteran from Washington state—"but the reelection business is such a problem here."

#### FINANCING CAMPAIGNS

He thinks a panel ought to be named to study Senate Processes, including committees and workloads and allocation of time. He says Majority Leader Baker has told him that some former senators already are preparing to undertake this task.

Sen. Brady, a mainstream Republican, also thinks the system of campaign financing needs overhaul. "It's incredible how costly and time-consuming it is to finance a campaign today," he says. He would support requiring federally licensed TV stations to make time available for campaign messages and allowing the use of some public money for congressional campaigns.

Not surprisingly, the Wall Street executive is horrified by the pay here—members of Congress earn \$60,662.50 a year—and thinks salaries ought to be "significantly" increased. "We pay corporate executives and baseball and basketball players and rock stars \$1 million and don't worry about it. But we hold our national legislators to \$60,662.50. That's very shortsighted, and if it continues we'll end up with either only

millionaires or people who can't get any other job."

Sen. Brady is amazed at how little the business and political worlds seem to understand one another. "Senators will come up to me and ask, 'Why doesn't Wall Street lower interest rates,' "he says. "And people on Wall Street ask, 'Why doesn't the Senate balance the budget.' "he doesn't offer any solution to these misunderstandings, but he wishes that financial and political leaders would spend more time learning about each other.

On economic matters, he continues to support the basics of Reaganomics, though he favors more emphasis on reducing the budget-deficit than on cutting taxes. And he supports Washington's favorite new whipping boy, Federal Reserve Board Chairman Paul Volcker. "I've told anyone at the White House who will listen that Paul Volcker ought to be reappointed next year," he says. "I don't agree with everything he has done, but overall he has done a great job and his reappointment would be a good signal." Mr. Volcker's term as Fed chairman expires Aug. 1

While his Senate stint has had its share of frustrations, Sen. Brady will return to Wall Street with very favorable memories of Washington. "I'm not looking to stay," he notes, "but I wouldn't trade my eight months here for any other experience I've had in my life."

# TRIBUTE TO SENATOR S. I.

Mr. DOMENICI. Mr. President, I rise today to pay tribute to Senator S. I. HAYAKAWA, a legislator and a statesman, who has accomplished a great deal in the 6 years he has served the State of California and the Nation. I am sure my own poor words will be inadequate to describe the deeds of this internationally known semanticist, but I will do my best.

Senator Hayakawa served on three committees, the Senate Committee on Agriculture, Nutrition, and Forestry, Foreign Relations, and Small Business, and was a strong voice in fashioning legislation which rose from all three committees.

On the Agriculture Committee, he fought for reforms in the food stamp program, to help more people benefit, while cleaning up waste, fraud, and abuse. He was instrumental in working the legislation for the Reclamation Reform Act of 1982, and worked to insure that public land was utilized for the benefit of all.

On the Small Business Committee, he was one of the leading supporters and cosponsors of the Small Business Innovation Research Act of 1981, which strengthened the role of our Nation's small businesses in research and development for agencies of the Federal Government. His insight showed that we could tap this relatively unused segment of our Nation's economy for future growth.

He also was influential in getting through legislation to prevent waste, fraud, and abuse in the low-income energy assistance program. This insured that those who needed that assistance to pay their utility bills would have the money available to them.

But more than all this, Senator Ha-YAKAWA will be noted in the Senate for the new and better defined perspective he brought to this body in the area of Foreign Relations, especially in our relations with the Far East. As subcommittee chairman of East Asian and Pacific Affairs, he brought a new insight into problems as diverse as Korean military preparedness, U.S. military presence in the Far East, and the plight of the Cambodian refugees. Without his experienced voice speaking out on these matters, I am sure that the Senate would have been much less prepared to deal with these problems and to find solutions that not only were in the best interests of the United States, but senstive to the needs of our allies in the Far East.

In short, Senator Hayakawa has given us in the Senate a wealth of knowledge and has left his mark here as a legislator and a statesman. As he returns to private life with his wife, Margedant, I wish both of them the best and hope that he can continue to give us his wisdom and his experience as he has done over the past 6 years.

TRIBUTE TO SENATOR HOWARD CANNON

I rise today to pay tribute to Senator HOWARD CANNON of Nevada, whose record of service to this Nation as a legislator and a statesman is notable over the period of four decades of our Nation's history.

Senator Cannon is a veteran of World War II. His courage as a pilot in the European Theater during some of the most fierce fighting there is evidenced by the numerous awards which include Distinguished Flying Cross, European Theater Ribbon with Eight Battle Stars, and the Purple Heart.

What Senator Cannon brought to the Senate was his expertise and hands-on experience with military aircraft. Senator Cannon has flown the latest state-of-the-art aircraft from the time he became a Senator, all the way to the F-16 fighter which he flew in the Paris Air Show. This hands-on experience served him and the Senate very well as he chaired or served as ranking minority member for the Tactical Warfare Subcommittee.

Senator Cannon also made his mark on bills before the Senate on deregulation when he served as chairman of the Senate Commerce, Science, and Transportration Committee. In 1978, he authored the airline deregulation bill, and worked closely on the trucking and railroad deregulation bill, which passed during the 96th Congress. He was also instrumental as ranking minority member of the same committee in fashioning a broadcast deregulation bill which passed during the 97th Congress.

As chairman of the Rules Committee, Senator Cannon set forth the procedure by which the Vice President can be appointed following the resignation of the elected Vice President. He chaired the hearings which approved the appointment of Vice President Gerald Ford, and again, when Ford became President, to approve the appointment of Vice President Nelson Rockefeller.

These are but a few examples of the accomplishments of this great Nevada Senator over the past 24 years as a Member of this body. Men of lesser accomplishment have been lauded more, and the people of Nevada and of this Nation owe Senator Cannon a debt of gratitude for his lifetime of service. I feel proud to have served with Senator Cannon over the past 10 years and wish he and his wife, Dorothy, best wishes for their continuted happiness when they return to private life.

TRIBUTE TO SENATOR HARRY F. BYRD, JR.

It is with great admiration and respect and, I must say, a touch of sadness, that I rise today in the Senate to pay tribute to Senator Harry F. Byrd, Jr., Senator for Virginia, and statsman for the Nation.

Appointed to the Senate in 1965, and elected three times after that, Senator Byrd has been a prophet's voice crying in the wilderness. He belonged to no party, and was only the second Independent to be elected to the Senate in nearly 200 years and the only one to be elected twice.

But though he worked with both paries, his philosophy of government remained the same, set in stone, never wavering between the fickle nature of party philosophy. He believed that the Federal Government must cease living beyond its means. He believed that excessive Federal spending was eroding the purchasing power of our working men and women and mortgaging the future of our young people. He believed that excessive centralization of power in Washington threatens individual freedom. And he still believes that today.

But beliefs such as Senator Byrd's were rare in the Senate during the mid-1960's and on into the 1970's. Often Senator Byrd found himself fighting alone against an ever-growing torrent of new Federal programs and increased Government spending.

He was one of my best teachers here in the Senate when I came to the Senate in 1973 and, with other freshman Senators, we worked with him to draft and pass the most significant piece of legislation in some time. The Budget Impoundment and Control Act of 1974, which gave birth to the Budget Committees of the House and Senate that set broad targets for spending and taxation. Without this vehicle, there could not have been any chance of reining in uncontrollable

spending which threatened the very economic existence of this Nation.

Still on he fought. In 1978, he introduced and passed a statute which stated simply that starting in fiscal year 1981, the total budget outlays of the Federal Government shall not exceed its receipts.

In spite of his efforts, we have failed miserably in controlling spending and face record deficits in the years ahead.

Unfortunately, we are losing Senator Byrd at a time when this Nation needs him most. We need his voice on the floor, working the debates with the skill of his many years of legislative expertise. We need his ability to pass 65 percent of his floor amendments, many of these to restrict spending. We need his courage and foresight in calling for a strong national defense, and especially a strong navy, but yet having the good commonsense to call for reforms in military spending, so that each dollar spent for our national security is necessary and accounted for.

We need all this, and more. We have come very far in our beliefs here in Congress, to a point where we are now engaged in serious discussion to make Senator Byrn's ideals a reality. We still have a very long way to go.

I will continue to look up to Senator Byrd as a shining example of an individualist, a legislator, and a statesment as I continue my work as chairman of the Senate Budget Committee. I wish Senator Byrd, and his lovely wife, Gretchen, the best of luck and good fortune as they return to private life. May his legacy guide us in the years to come.

TRIBUTE TO SENATOR NICHOLAS BRADY

History will show that Senator Nicholas Brady was more than just a caretaker Senator, completing the unexpired term of his predecessor. Though he was a Member of this legislative body for only a short time, his advice and influence on issues before the 97th Congress were both timely and helpful.

Two words describe my good friend and colleague, Senator Brady, well. He is a "realist" and a "businessman."

As a realist, Senator Brady assumed office with no lofty goals, no plans for introducing major pieces of legislation and no aims that could not be reasonably achieved. While this meant that he was often overshadowed by the legislative initiatives of others, Senator Brady wisely placed priorities on issues he felt were most important to his constituents and to the Nation as a whole. Particularly, the recovery of our domestic economy.

This is where his experience as a businessman was quite useful. As former chairman and managing director of Dillon, Read, & Co., Inc., and chairman of the board of Purolator, Inc., he drew on his business expertise

and his grasp of marketplace realities to explain to us in the Senate what was really occurring in the Nation's marketplace toward economic recovery.

Senator Brady vigorously supported actions which would reduce deficits and move the Government toward a balanced budget. His primary goal was in helping to promote economic recovery.

He supported the 1982 tax legislation and lobbied hard with his colleagues in the New Jersey delegation of the House for its eventual passage. Even though some of these new taxes applied to business, Senator Brady, as a realist, knew that every sector of the economy must pay a fair share to insure recovery and lower deficits.

As a member of the Senate Banking, Housing, and Urban Affairs Committee, Senator Brady worked hard to get a bill out of committee to help the beleaguered savings and loan institutions. He also proved to be a reliable economic forecaster by predicting earlier this year that interest rates would fall at least four points before January 1.

There is no greater tribute I can give to my decent and humble friend and colleague, Senator Brady, that to say that we will miss him here. To be appointed for such a short time, and yet to leave his influence here, is his greatest honor. I feel privileged to have known Nicholas Brady, and his lovely wife, Katherine. I hope that when he goes back to New Jersey to return to his business, that he will continue to advise us on those issues he took to heart here in the Senate.

I salute Senator Brady as an outstanding human being and a dedicated public servant.

# TRIBUTE TO SENATOR S. I. HAYAKAWA

Mr. INOUYE. Mr. President, I would like to take this opportunity to pay tribute to one of our colleagues, Senator S. I. HAYAKAWA of California.

I know that we shall all miss the gentle presence and good humor which Senator Hayakawa brought to this body during his term here in the Senate. He has served the people of California and the Nation well in his 6 years here, but this was merely one chapter of his distinguished record of accomplishments. Senator Hayakawa came to the Senate as a renowned semanticist, author, and college president, and I am certain that after the 97th Congress draws to a close he will continue to make a valuable contribution in whatever activity he chooses.

Senator Hayakawa has demonstrated consistent interest and concern over the divisiveness of American society, and has worked diligently to forge a more unified America. Though we may have approached many issues

from a different perspective, I have always been impressed by his articulate and thoughful analyses, and the conviction and forthrightness which he has displayed thoughout his public career.

It has been a pleasure working with Senator Hayakawa, and I am certain that my colleagues will join me in wishing him continued success and happiness in the future.

#### CENTRAL AMERICA—THE NEED FOR POSITIVE CHANGE IN U.S. POLICY

Mr. PELL. Mr. President, I wish to express my concern over U.S. policy in Central America and the dangerous path on which I feel we are moving if drastic changes are not made. I am moved to speak at this time because I feel it is my duty to apprise my colleagues of the overwhelming sentiment which I have heard from the people of Rhode Island, from national church figures, and from prominent foreign leaders.

Various factors, including the statements of the President during his Latin American trip, indicate that the administration intends to go forward with military assistance to El Salvador, is about to resume a military relationship with Guatemala, and is increasing military assistance to Honduras. With regard to El Salvador, I find this very distressing given the fact that the President gave the indication of additional military assistance 2 months before he is due to make the certification to the Congress and in the light of continuing violence, disappearances, and arrest of moderate political leaders. I am becoming increasingly skeptical that the President will be able to recertify progress on human rights with any credibility. At this juncture, I am concerned at the thought of additional military assistance to El Salvador because the Salvadoran Government has failed to substantially improve the human rights situation or to bring to justice the murderers of the four American churchwomen and the two land reform specialists.

Likewise in Guatemala, the administration, specifically again the President, indicated that U.S. military assistance will soon be flowing. I have great problems with the administration's assessment of great human rights improvement in Guatemala, which is in direct contrast to reports of international observers such as Amnesty International and the Americas Watch which charge the military with a violent campaign against the Indians in the name of the war against the guerrilla left.

The situation in Honduras and on the Honduras-Nicaragua border is becoming increasingly dangerous, giving rise to the fear of an escalating regional war in Central America. I believe that we must give all support possible to the democratically elected government of President Suazo Cordoba, especially coming after years of military rule. But we are doing President Suazo no favor by increasing military assistance which increases Honduras' potential for becoming more deeply involved in the Central American turmoil. Furthermore, this was one of the reasons that I opposed the U.S. military's project to modernize the airfields in Honduras when I took to the floor against that measure this past summer. The airfield project, increased military assistance, and now increasingly credible reports that the United States is involved in covert operations to overthrow or destabilize the Government of Nicaragua by supporting forces operating from Honduras, threatens the very democracy that we want to uphold and defend in Hon-

The United States must not be involved in covert actions against the Government of Nicaragua. Our national honor and international credibility are at stake on this issue. I am a cosponsor of the measure that Senator Dodd is planning to introduce in these final days of the session, which prohibits funding in support of paramilitary groups or irregular forces operating in Central America. I will stand firm in my support of this legislation and urge my colleagues to do the same.

With regard to Nicaragua, I believe that the administration's policy of pressuring the Government of Nicaragua by one means or another will serve only to self-fulfill a prophecy that Nicaragua is a Marxist regime, firmly in the Soviet camp, and a carbon copy of Cuba. Yes there are problems in Nicaragua, but they are being exacerbated by the pressures from outside, much of it from this country. We must get our relations with Nicaragua back on track by ceasing our negative activities, by opening up a sincere and honest dialog, and by supporting the Mexican and Venezuelan peace initiatives. A turnaround in our policy toward Nicaragua could very well signal the beginning of a positive U.S. policy toward Central America.

The people of Rhode Island, and people throughout this country, are demanding that the administration redirect its policy in Central America. We, in the Congress, must respond to support this tide for positive change.

### INDIAN EDUCATION

Mr. PRESSLER. Mr. President, I rise to commend the Senate for passage of S. 2623, the Tribally Controlled Community College bill. I am

proud to have served as a cosponsor of this most important legislation.

S. 2623 amends and extends Public Law 95-471, the Tribally Controlled Community College Assistance Act of 1978. As a member of the House Committee on Education and Labor in 1978, I had the privilege of sponsoring this original legislation. Since that time, I have had the pleasure of seeing the tribally controlled community colleges assisted by the act make great progress in improving the educational opportunities available to our Indian students.

The Senate's action today will mean the continuation of a stable source of funding for 18 tribally controlled community colleges within this country which represent a unique tribally based approach to community-oriented education.

I am especially proud of my own State's tribally controlled colleges. These schools have become an integral part of South Dakota's higher education efforts and are making excellent strides in helping our Indian students gain the knowledge and skills which they need to function effectively in today's world. With the passage of this legislation, students in South Dakota's tribally controlled community colleges will be given the opportunity to continue their pursuit of the careers and vocations of their choice.

I salute the Senate for taking this action. Education is the best investment which we can make in this country's future and the Senate is to be commended for taking action today on behalf of our Indian students.

#### SURFACE TRANSPORTATION ACT OF 1982

LEVIN-SPECTER AMENDMENT ON FEDERAL SUPPLEMENTAL UNEMPLOYMENT BENEFITS

Mr. PERCY. Mr. President, I am very pleased to be a cosponsor of the Levin-Specter compromise amendment which will allow the States most heavily affected by continuing, high rates of unemployment to pay several more weeks of Federal supplemental unemployment benefits, above and beyond the extra 10 authorized in the tax bill this past summer.

To be unemployed at any time is a tragedy, but it is an especially difficult situation to face during the holiday season, particularly for those with families. My own State of Illinois is experiencing an unemployment rate of 13.2 percent with almost no apparent prospects for a recovery in the near future. Under the provisions of the pending amendment, Illinois would qualify for an additional 4 weeks of Federal supplemental benefits, thereby providing for many of my State's long-term unemployed a maximum of 53 weeks of unemployment benefits. I strongly support this additional assistance and urge my colleagues to do likewise.

UNEMPLOYMENT AMENDMENT

Mr. BRADLEY. Mr. President, I rise in support of the amendment offered by the Senator from Michigan, which will provide additional weeks of unemployment benefits to the long-term unemployed.

In September, we enacted, over the initial objections of the President, the Federal supplemental compensation program, which provides an additional 6 to 10 weeks of unemployment bene-

fits beyond the current level.

The present program is a significantly smaller program than we had in place during the past two recessions. In 1971, with a national unemployment rate of 6 percent, Congress provided a temporary program to provide up to 52 weeks of benefits. In 1976. with a national unemployment rate of 8.8 percent, Congress provided a temporary program to provide up to 65 weeks of benefits. Our unemployment rate presently stands at 10.8 percent, and the maximum number of weeks of benefits stands at only 49. And, in my home State of New Jersey, the unemployed are only eligible for up to 36 weeks of unemployment benefits.

The amendment before us would provide an extra 2 to 6 weeks of unemployment benefits; in other words, instead of 6 to 10 weeks of additional benefits, an unemployed individual would be eligible for 8 to 16 weeks of benefits. This is the least we should do for those hardest hit by the current recession. This provision would help many families get through the holiday season before their benefits run out.

Mr. President, the unemployment rate in New Jersey presently stands at 9.9 percent. Contrary to the view of some people in the administration, these unemployed people in New Jersey need no special incentive to look for work. They are looking, but the jobs simply are not there. The unemployed in my State deserve these minimal additional weeks of protection. I urge my colleagues to adopt the amendment.

Mr. PRESSLER. Mr. President, I support this amendment. This decrease in the heavy use tax, coordinated with an extended phasein period, will make this tax much easier for the small truckers to absorb. I am pleased to cosponsor the amendment.

Last night the Senate voted against delaying consideration of the truck tax portion of this bill until next year. I would prefer to delay a vote on this aspect of the bill until next year when we have a better opportunity to fully assess the impact of this legislation. But if we must move forward in this legislation, I think it is necessary to have this amendment included.

Without a gradual approach to this tax increase, thousands of truckers, es-

pecially small truckers, will be forced out of business because they will not have the time to adjust to the tremendous economic impact of these increases.

The purpose of this bill is to raise revenues to rejuvenate our Nation's highways. The truckers are being asked to bear a huge portion of this bill. If these taxes are increased in a manner that drives truckers out of business, it will do little good to impose any kind of tax increase. No one will be there to pay the taxes needed to repair our Federal highways.

My home State of South Dakota relies heavily on trucks to move goods. Without a gradual and phased implementation of these heavy user fee increases, consumer prices in States like South Dakota will skyrocket. This amendment will help lessen the blow to truckers and consumers alike, while facilitating a much more stable implementation of the tax and user fee basis for our highway improvement effort. For these reasons, I strongly urge my colleagues to support this amendment.

### PROTECTION OF THOSE WHO HAVE THE LEAST

Mr. BRADY. Mr. President, during my 7 months in the Senate I have spoken about our economic problems and the compelling need to reduce the Federal budget and the national debt. I came to Washington believing that Congress has a crucial role to play in redressing past errors and reforming our Government's fiscal policy, and my time in the Senate has only increased my sense of the tremendous responsibility Congress has in setting our economy on the way to recovery.

But it is both an arduous and painful task. We are struggling against the realization that as great as our Nation is, we face limited resources and conflicting priorities as we seek to reconcile the budget and reduce the national debt. Circumstances and commitment to this effort have necessitated that we reevaluate and make cuts in many social programs. Our economic situation leaves us no alternative. But as we do so we cannot lose sight of the importance of individuals-people. If we were to, we would be forgetting the very reason for undertaking this effort to improve our economic situation: The welfare of all Americans, not just those from the business community or those currently in the work force. A healthy economy improves the lives of our elderly and others who live on fixed incomes. A vigorous economy also means there will be the necessary funds available to maintain the social programs which make such important contributions to their recipients' lives. Today I would like to speak about a different governmental and congressional responsibility—a responsibility which is intrinsically interwoven with our efforts to do the Govenment's part to revitalize the economy and thereby improve the lives of all Americans. This duty is the obligation to protect those in society who have the least: minorities, the elderly, the young, the sick, and disabled citizens of our country.

try.
We are a nation which has grown up believing that this is a land of infinite opportunity, where any person by the dint of determination and hard work can rise to the top. As an idea and an ideal this belief has served as an inspiration to countless millions who have carved successful lives for themselves and made great contributions to our society. But this is not universally true. To think otherwise is to ignore

stark realities.

If we in Congress act without consideration of life's realities for many Americans—hunger, poverty, unemployment, inadequate medical care, and deplorable living conditions—we may condemn whole segments of our society to impoverished and hopeless lives. Our economic situation demands that we reevaluate and revise our approach to social programs. But our sense of humanity enjoins us to insure that in doing so we do not abandon those who cannot do without our help.

I would never deny that many social programs have flaws which have allowed abuses of the system. I support efforts to reform and revise entitlements. Such changes, which so closely affect people's lives, will never and should never be made without a full airing of all views. As we have already seen, in such discussions passions run high and acrimony often predominates.

I am rightly counted among those who are convinced that for the sake of our economic recovery entitlements must be controlled. But in arguing this point of view in heated debates I fear we risk losing sight of the higher purpose embodied in these programs. This

must not happen.

As someone who only recently became acquainted with the scope and complexity of Federal entitlements, I do not pretend to be qualified to speak to you with an expert's voice. Others who have worked with these programs since their inception are far better qualified to do this. But it is not necessary to possess an expert's knowledge of these programs to feel their worth.

So important are they, that these social programs have come to describe

and define us as a nation.

There is no better example of this than social security and medicare. Who can deny that these programs have been tremendously successful. But their very success, and the increasing numbers of people eligible to

draw on them, have created severe problems which threaten to collapse the system.

An important review of the system is now under way and undoubtedly some difficult adjustments in funding and payments will be necessary to restore

solvency to social security.

Those who will be charged with revising and reforming social security must look to the future and act to assure that the system remains financially sound without raising taxes beyond reasonable limits or altering payments beyond reasonable expectations.

Social security represents a great public trust which must be protected and preserved, it represents an inviolate contract between individual citizens and their Government. There are currently over 25 million Americans age 65 or older. They make up 11.3 percent of the total U.S. population. They paid into the social security system in good faith and now many of them depend on social security to maintain a decent standard of living. These retired people, our Nation's elderly, have made great contributions to our country. They fought our wars, ran our industries, and raised our generation of Americans. They deserve our respect and concern. And they deserve what they have been promised, the return on the investment they made with their Government. If we in Government do not see that the contract is kept and the moral obligation fulfilled, we will be guilty of unconscionable ingratitude toward the generation to whom we owe so much.

By reestablishing the social security system on a sound foundation, we not only provide for our elderly citizens, but we insure that our children and grandchildren will be able to look forward to the same security at the end

of their working years.

Just as social security offers critical assistance in meeting the needs of older Americans, so too do Federal programs provide infants and children with invaluable assistance in their formative years. If social security represents a debt to our past, these programs represent an investment in our Nation's future.

Since 1946 cost-effective programs such as school breakfast, summer feeding, and the special supplemental food program for women, infants, and children have contributed significantly to providing healthy diets for millions of school children. In recent decades scientific research has established that proper nourishment is essential to children's mental and emotional, as well as physical, development. Children's ability to do well in school, to achieve to the full extent of their potential has been directly linked to nutritional diet.

We should be proud that we have come so far in insuring that our Nation's youth receives a good start in life. In this time of budget cutting and delegation of authority to the States, we must see that we do not undo any of the great strides that have been made. We must never forget that as fellow citizens of the United States their future is also our own.

Though it is an unpleasant fact to face, it is not just some of the youth of this country who can not provide adequate sustenance for themselves.

The opportunity for a life free from hunger belongs to all Americans. In the early years of our Nation's existence foreign travelers remarked upon how healthy and free from hunger were Americans of all economic circumstances. Foreign visitors could not say this today about our society. We should be ashamed that in a country as rich and productive as ours any of our population should suffer from chronic hunger and malnutrition.

The food stamps program provides indispensable aid to those among us who are unable to meet their most basic need. For many, food stamps make the crucial difference to their existence. Unfortunately, the program contains flaws which have allowed for abuse and fraud. Hardly a month goes by that some new case of abuse is not uncovered, and as a result, the food stamps program has received a bad name in many quarters. Granted these abuses are intolerable, reforms to prevent them must be instituted. But the food stamps program and the vital aid it provides must not be withdrawn simply in the effort to eradicate waste and fraud in Government. As long as there are individuals who cannot exist through their own efforts and resources and parents who cannot afford to feed their children in this bountiful country, we must see that they are provided for.

No one among us wants to see dependence upon Government assistance become a way of life for generations of Americans. Compassion for the lives of individuals and dedication to the best interests of our society as a whole would never permit us to accept this.

If we are ever going to act to help the disadvantaged help themselves, clearly now is the time to begin. Evidence that we must act without delay is plainly seen in the current unemployment statistics. We all know too well the 10.8-percent figure for the work force as a whole, but the grim fact is that this figure does not begin to reflect the true depth of the problem. Blacks overall, as well as unskilled laborers, have an unemployment rate of over 20 percent. And while unemployment among white teenagers is a worrisome 21.3 percent, unemployment for black teenagers stands at an appalling 50.1 percent.

The need is too great and too pressing for us to wait and hope that a gen-

eral economic recovery will solve the problem. That is why I believe that the highway/jobs bill-the Surface Transportation Act of 1982-now before the Congress is important. I believe it is time that we create jobs for the unemployed. I do not suggest that this bill, or even this approach to curbing unemployment, will solve all our economic problems. For those things to happen it will take the best efforts of individuals in both the public and private sectors. This is how it should be, as the problem confronts our Nation as a whole. However, the Federal Government has played a crucial role in the lives of the handicapped. the elderly, and many others in our society, and its is now time for the Federal Government to address the needs of the unemployed.

It would be easy to belittle this accomplishment, easy to emphasize the all too obvious fact that these 300,000 jobs do not begin to make a dent in the unemployment of 10.8 percent of our population. But to do so would be to ignore the fact that this bill will make a great difference in the lives of 300,000 Americans. And most importantly, to belittle this endeavor would be to miss its true value: It is a beginning, nothing more, and certainly nothing less. With the passage of this bill we will have taken a crucial step in the right direction. We will have shown the country that we in Congress do understand what must be done and that we have the will to accomplish what we must for the sake of the individuals who make up our Nation and for the Nation as a whole.

I have spoken to you of the value of the social programs which we have created over the years. These programs were born of a compassion for the needs of individuals and a clear-eyed understanding of what was required for our society as a whole to flourish. We must sustain this spirit now as we endeavor to help the unemployed help themselves and to rejuvenate our economy. And ultimately this is the key to preserving individual citizens' capacity to act and to provide for themselves without dependence on Government.

Finally, in meeting this challenge, we will be fulfilling the responsibility of the Federal Government to protect the right to life, liberty, and the pursuit of happiness of all our citizens. And together we can proudly share the precious treasure we all possess: The name of American.

#### LIMITING IMPORTED LIQUEFIED NATURAL GAS

Mr. DIXON. Mr. President, I rise in support of the Imported Liquefied Natural Gas Policy Act of 1982, which my senior colleague Senator Percy introduced yesterday. Help to those with skyrocketing fuel bills is required. Why must the United States continue to import the more expensive natural gas at a time when supplies are readily available domestically? Why when the country is experiencing a drop in the inflation rate should consumers be faced with such huge price increases?

The citizens of this country should not have to choose between heating and eating

Economics tell us supply and demand should determine both the price and volume of a commodity. With regard to natural gas, a Gresham's law has occurred: higher priced gas is pushing lower price gas out of the market. The higher priced gas this country is receiving from Algeria precludes the shipment of lower priced domestic gas to consumers, our consumers. We should correct this problem

While price increases certainly are not limited to Illinois, let me cite a few figures of rate increases citizens in my State are currently experiencing: Springfield, 60 to 65 percent; Tamms, almost 100 percent; Decatur, 60 to 65 percent; Peoria, 50 to 60 percent; Chicago, 17 to 20 percent. But this is a national problem, and it becomes so when people are unable to pay their fuel bill.

The intent of this legislation is different from the amendments offered during this session regarding the takeor-pay contracts and the price freeze. The bill, as the title suggests, affects imported liquefied natural gas (LNG). Our bill would allow the Secretary of Energy to set a just and reasonable rate from which to compare imported liquefied natural gas with domestic fuel rates.

We are flexible in our approach. When a certain region of the country is without an adequate supply of natural gas, the Federal Energy Regulatory Commission (FERC) and the Secretary can allow the importation of liquefied natural gas above the ceiling rate. Where the agreement allows for greater flexibility in both the price and quantity of imports, FERC and the Secretary can allow the importation of liquefied natural gas.

I look forward to working with Senator Percy and other concerned Senators to rectify this problem in this Congress or in the next Congress, until the problem of horrendous natural gas price increases is corrected.

I believe this legislation should be viewed as a piece of the overall natural gas policy. Changes in domestic contracts are needed to relieve the burden put on gas consumers. I hope this body will again consider natural gas when the 98th Congress convenes next month.

Delays must be minimized because the end result of delay is higher prices for consumers, fewer jobs for workers, and more households without heat this winter.

#### SOVIET REPRESSION IN UKRAINE

Mr. PERCY. Mr. President, Ukrainians continue to suffer persistent violations of their human rights as the Soviet Union tries to stamp out their national identity and aspiration for freedom.

The last few years have seen systematic efforts to eliminate the Ukrainian Helsinki Monitoring Group, those brave Ukrainians who attempted to monitor Soviet noncompliance with the terms of the Helsinki Final Act which the Soviets signed in 1975. Members of this group are now in exile or in prison. There remains no organized group able to tell the world of continuing Soviet violations in Ukraine of its pledges made at Helsinki.

It is a chilling thought that Vitaliy Fedorchuk, the Ukrainian KGB chairman who directed this brutal repression in recent years, has now been "promoted" to Moscow to become Chairman of the entire KGB.

When, on January 22, free Ukrainians everywhere commemorate the anniversary of the once-independent Ukrainian national state, Congress may not be in session. I would therefore like to take this opportunity to advance to pay tribute to the enduring courage, free spirit, and national heritage of the Ukrainian people, and to those many Ukrainian Americans who have contributed so much to our own country.

#### SENATOR LARRY PRESSLER REPORT ON ARMS CONTROL SUBCOMMITTEE

Mr. PERCY. Mr. President, as 1982 draws to a close, I want to pay tribute to Senator Larry Pressler who has chaired the Arms Control Subcommittee during the past 2 years. This subcommittee contains not only arms control issues, but also matters relating to oceans, international operations and the environment.

Senator Pressler's subcommittee has been very active during the past year. In fact, it has been one of the most active years for a subcommittee in the history of the Foreign Relations Committee. In addition to many hearings on arms control, it has held careful and studious hearings on the Law of the Sea Treaty, international operations issues, the Canadian-United States acid rain problem, executive appointments, and other matters. In fact, Senator Pressler's subcommittee held the first definitive hearing on testimony from independent witnesses that the Soviets were using toxic chemicals in the warfare in Afghani-

stan and in Southeast Asia. I wish to have printed in the Record a summary of the activities of Senator Pressler's subcommittee during the 97th Congress

Mr. President, Subcommittee Chairman Pressler has in the course of the past 2 years taken a leading role in highlighting the opportunities which exist for meaningful weapons reductions and constraints. He has joined with me in supporting administration action on the signed but unratified Threshold Test Ban and Peaceful Nuclear Explosion Treaties. He has brought a greater awareness to the Senate and to the public of the opportunities that currently exist for preventing a space weapons race and the dangers that will follow a failure to bring space armaments under control.

In advising for movement on these important fronts, Senator Pressler has also sought to highlight the risks that are inherent in arms control accords that are reached in haste or that lack sufficiently strong verification provisions. This risk was highlighted in the subcommittee's hearings on yellow rain, which Senator Pressler chaired in November 1981. Recent reports indicate that despite Soviet ratification of agreements banning such inhuman weapons, the use and/or provision of such weapons by the Soviet Union continues.

Mr. President, I wish to complement Senator Pressur for this report and to thank him for his cooperation and leadership in the arms control area. He conducted the first Senate arms control field hearings outside Washington, D.C., in over 26 years when he chaired hearings in January of this year in Sioux Falls, S. Dak., and in Los Angeles and San Francisco, Calif. These hearings have helped the Committee on Foreign Relations gain a sense of the public mood on arms control issues at a time when pollsters are just beginning to survey the public's concern about nuclear weapons.

It is my view that the Senate and particularly the Committee on Foreign Relations are indebted to the efforts of Senator Larry Pressler. Senator Pressler has skilfully bridged the ideological differences through his management of the work of the Arms Control, Oceans, International Operations and Environment Subcommittee.

In closing, I would like to point out that Senator Pressler offered a successful amendment to expand the responsibilities of the Arms Control and Disarmament Agency to include examination of all antisatellite issues. This amendment is now public law. He also has contributed to public awareness of arms control issues through articles he has written for the Christian Science Monitor, the New York Times, and the Washington Post. In addition, he recently addressed the annual meeting of the Arms Control Association, and I

would like to remind my colleagues that I inserted his keynote speech in the RECORD on December 2, 1982.

Mr. President, I ask unanimous consent that Senator Pressler's subcommittee report be printed at this point in the Record.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT BY SENATOR LARRY PRESSLER

In the course of the Ninety-Seventh Congress, interest in arms control rose dramatically and was transformed from an issue that held the exclusive attention of a small circle of specialists in and close to government to one that holds the attention of every segment of the American public. According to recent opinion polls, public interest in arms control and for an aggressive American policy aimed at strategic stability and significant arms reductions is broadly based. These views are seemingly independent of political party affiliation or aggroup, and are shared from region to region in the United States.

This heightened concern for bringing the weapons of war and mass destruction under control was reflected in numerous events during the past two years. The rise of the nuclear weapons "Freeze" movement is one dimension of this phenomenon. It was also evident in the high public visibility and attention given to the United Nations Second Special Session on Disarmament in which I participated as an Advisor to the American delegation. "Ground Zero Week" held last spring and the Pastoral Letter being drafted by the nation's Roman Catholic Bishops are a further demonstration of the importance attached to the question of preventing nuclear war by Americans. In the November election, referenda calling for a freeze on the testing, production and deployment of nuclear weapons passed in eight of nine states in which they were on the ballot. A pro-freeze vote was also voiced in the District of Columbia.

Well before these concerns became a headline issue, I was of the opinion that Americans strongly favored significant and verifiable arms control agreements. The lack of attention to this public mood represented a failure of officials in Washington to listen, rather than of an inability by our citizens to express their views. It was for this reason that the subcommittee travelled beyond the confines of Washington to stage the first set of arms control field hearings in 26 years. Testimony was received last January in Sioux Falls, South Dakota, Los Angeles and San Francisco, California. Subcommittee Member Senator Alan Cranston played an important role in these hearings. That testimony has since been published by the subcommittee in a volume entitled "The Future of Arms Control." I have also summarized the findings of these proceedings in an op. ed. article published in the New York

The meaning of the growing public awareness of the nuclear dilemma and the support given to the Freeze movement is not simply an endorsement of the freeze proposal per se. Rather, support for the freeze appears to be an expression of a lack of confidence in the process of and progress in arms control negotiations to date. The absence of an Administration position for Strategic Arms Reduction Talks (START) earlier in the year was part of the problem. For this reason, I was pleased that the President announced his proposal for deep cuts in the

strategic nuclear arsenals of the U.S. and the Soviet Union at Eureka College. This announcement came in the days leading to the Committee's hearings on the nuclear arms freeze and reductions proposals held on May 11-13, 1982. The START talks have finally started and reports suggest that they are proceeding in a business-like fashion.

Still another dimension of the public's unease relates to the careless statements by a few Administration officials. The Subcommittee took note of one such incident, the statement by T. K. Jones of the Department of Defense on civil defense. According to Mr. Jones, in a Los Angeles Times interview, given enough dirt, shovels and doors, American taxpayers can learn to live with nuclear weapons and survive the holocaust. After reading this, the Subcommittee asked Jones to appear and explain his ideas on civil defense. At first he declined to appear. He finally testified after the threat of sanctions and then claimed that he had been misquoted. We have since reviewed the verbatim transcript of the Los Angeles Time interview and it appears that Mr. Jones was quoted accurately.

Clearly, more must be done to advance the goals of strategic stability, improved global relations, and providing the American taxpayer and the people of the world with security at the lowest possible risk and cost. The on-going effort to reduce the military threat in Europe through the Intermediaterange Nuclear Forces (INF) talks in Geneva and the talks on Mutual and Balanced force Reductions (MBFR) in Vienna, together with START, are important initiatives which hold promise for improving conditions in the future. Much will of course depend on the willingness of both sides to accept compromise and to seize opportunities for meaningful agreements that may arise. The Foreign Relations Committee as a whole remains in close contact with these negotiations and we have held executive sessions with the key officials involved in the process, including Chief INF Negotiator Paul Nitze and Chief START Negotiator Edward Rowny.

There are actions that can be taken to improve conditions while these talks proceed. In this vein, the Committee on Foreign Relations last spring voted out Senate Joint Resolution 212. This is an important initiative by this Committee, for it not only supports the goal of deep reductions but it calls on both sides to exercise restraint on military programs currently underway. It is important that as we proceed towards deep reductions in the longer run, we should seek to limit the growth of weaponry in the interim.

Following the same logic, we should not let our quest for the best in arms control become the enemy of the good, and, thereby, miss modest but valuable opportunities for enhancing security at reduced costs. The Threshold Test Ban (TTB) and Peaceful Nuclear Explosions (PNE) treaties, negotiated and signed between 1974 and 1976, fall into this category. These accords set important precedents in the areas of military data exchange and on-site inspection. They have a greater impact on the Soviet Union than on the U.S. because the Soviets have an active PNE program and Moscow has a greater interest in developing high yield nuclear weapons than the U.S. Over the course of the 97th Congress, I and other Members of the Foreign Relations Committee, notably our distinguished Chairman Senator Charles Percy, have repeatedly urged that the Administration support ratification of

these signed accords. Numerous witnesses have been questioned on the benefits and drawbacks of ratification. The vast majority of witnesses questioned favor ratification of these accords. Last May, four Members of this Committee, Chairman Percy, Senator Pell, the Ranking Minority Member of the Committee, and Senator Cranston, the Ranking Minority Member of the Subcommittee, joined me in writing to President Reagan on this issue. Since then, the Committee has held a series of consultations with the Administration in executive session. While the Administration claims that the TTB/PNE verification procedures need improvement, I believe that the U.S. should not lose the benefits of these accords through delay or by making unworkable demands in discussion with the Soviets.

As Chairman of this important subcommittee, it is my duty to keep the spotlight on these and other vital war and peace issues. I have, therefore, chaired nearly sixty hours of hearings during this Congress. I have met with and written to many key officials, I have made myself available to and, indeed sought out public groups for discussions. Most recently, I have addressed the annual meeting of the Arms Control Association on November 30, 1982. Writing on arms control for the press is an important way of communication with the public and the Administration on these issues. Therefore, in the course of these two years, I have published articles on arms control questions on the op. ed. pages of the New York Times, the Washington Post and the Christian Science Monitor, among others.

In writing for the Christian Science Monitor I sought to fulfill another important function of Chairman of the subcommittee with responsibility for arms control: highlighting opportunities for enhancing security that are at risk of being lost. This is clearly the case for arms control aimed at preventing the weaponization of space.

After a quarter of a century of space exploration, the U.S. and the Soviet Union are on the verge of a major space weapons competition that could compromise the peaceful uses of space for commerce, science and security. Anti-satellite weapons, that have already been deployed by the Soviet Union and are nearing the testing phase in the United States, could lead to an open-ended weapon race. Such a competition would undermine our ability to conduct important military activities in space, including early warning of strategic attack and command and control of U.S. forces worldwide. This would add greatly to our military budget and would, therefore, add to the taxpayer's already heavy defense burden. Satellite verification capabilities could also suffer. A space arms race would reduce the attractiveness of commercial space ventures. In my home of South Dakota satellites are providing the kind of information that increases farm production. Space weapons could compromise current and future ventures that aid American business and U.S. export leadership.

It is easier to stop an arms race before it gets seriously under way but halting such a contest requires negotiations. Negotiations on space weaponry were conducted in 1978-1979. Terminated in the wake of the invasion of Afghanistan by the Soviet Union, space weapons talks have not resumed. The subcommittee has, therefore, brought attention to the problem through hearings on arms control and the militarization of space.

I have also offered two separate resolutions that aim to ban the deployment of

killer satellites, Senate Resolution 129. which I offered in May, 1981 and Senate Executive Resolution 7, which I offered shortly after the hearing on arms control and the militarization of space, held in September 1982. Space arms control is an urgent problem, there is little time to lose in bringing this situation under control. I, therefore, also offered an amendment to the 1982 Arms Control and Disarmament Amendments Act which authorizes the Arms Control and Disarmament Agency to conduct research, development, and other studies in regard to all aspects of anti-satellite activities. This Act, H.R. 3467, passed the Senate and the House on October 1, 1982. I have since written to ACDA Director Rostow to learn of his Agency's plans in the anti-satellite arms control area. In the new Congress, the Subcommittee will hold further hearings on the space arms control, and I will seek to move a resolution on this area to the Senate floor for action.

Arms Control is not without its dangers. While carefully conceived and executed agreements can make for increased security at reduced costs, agreements that are produced in haste or are reached for agreement's sake can lead to decreased security and may poison the atmosphere for achieving serious accords. This is particularly true for agreements that lack sufficiently strong verification provisions.

This situation is evident in numerous incidents involving the suspected use and/or provision of inhuman chemical agents by the Soviet Union in Afghanistan and Southeast Asia. The use of such agents is outlawed in agreements to which the Soviet Union is a signatory. Unfortunately, these accords lack verification arrangements that would deter the contravention of these accords. Evidence and expert opinion on the use of deadly mycotoxins was presented to the Subcommittee in the "Yellow Rain" hearing in November, 1981. In the year since that hearing was held, the Administration has issued two compilations of evidence on the use of yellow rain, the first appeared in March 1982 and the second was published in November 1982. Incidents involving the use of chemical weapons continue to be reported. Experts who were previously skeptical have reportedly changed their opinion. The use of chemical agents presents an intolerable situation; one that deserves continued attention and investigation. In the Ninety-Eighth Congress, the Subcommittee will hold further hearings to increase awareness of this matter.

Nuclear nonproliferation is an issue that deserves the support of all nations independent of their ideologies since no nation would benefit from the prospect of nuclear weapons spread. During the course of this Congress, hearings were held on the Administration's nuclear nonproliferation in both open and closed session, in which Senator ercy took a leading role. The Committee reviewed developments in high proliferation risk countries and the Subcommittee commissioned a study on the nuclear programs of several of these states. This study was published last year. A second Subcommittee study examining the effectiveness of U.S. nuclear export controls and procedures will be completed this month.

The Subcommittee's mandate is not restricted to arms control. In the areas of oceans, international operations and the environment, I have chaired an on-going series of hearings on the Law of the Seas (LOS) negotiations. The oceans potentially hold the answer to the world's resource short-

ages, but exploiting these assets will entail substantial investments in technology by U.S. companies and free enterprise in other nations. It was my concern for protecting the interests of American taxpayers while at the same time recognizing the legitimate interests of other nations, particularly those in the developing world, that led me to maintain a constant monitoring of this process through hearings. The issue of acid rain, an environmental concern with an international scope, was the subject of still another hearing.

The U.S. Senate lacks both the manpower and facilities to conduct and oversee all aspects of U.S. international policy. Only the Administration is in this position. The subcommittee does have a major role in assuring that competent officials are in charge of the policy in its areas of responsibility through the confirmation process. During the course of this Congress over thirty nominees were the subject of hearings.

The list which follows summarizes the activities of the Committee on Foreign Relations in the areas of responsibility of the Subcommittee on Arms Control, Oceans, International Operations and Environment. For the sake of clarity, our hearings are divided among three major categories: Arms Control; Oceans, International Operations and Environment; and Nominations.

#### ARMS CONTROL HEARINGS

S. 991, Arms Control and Disarmament Agency (ACDA) authorization request. April 8, 1981.

Arms Control Issues (SALT and recent NATO decisions) (Executive Session). May 7, 1981.

Overview of Nuclear Proliferation (Executive Session). May 12, 1981.

Israeli Air Strike and Related Issues (Nuclear weapons and safeguards and non-proliferation). June 9, 11, 18, 19, 1981.

Administration's Position on Nuclear Nonproliferation (Executive Session). July 15, 1981.

S. Con. Res. 24—a proposal to improve the international non-proliferation regime (Executive Session), July 16, 1981.

Foreign Policy and Arms Control Implications of President Reagan's strategic weapons proposals. November 3, 4, 9, 13, 1981.

"Yellow Rain" and Other Forms of Chemical and Biological Warfare in Asia. November 10, 1981.

Intermediate Range Nuclear Force Negotiations (Executive Session). November 24, 1981.

International Atomic Energy Agency (IAEA) and its safeguards programs, December 2, 1981.

Future of Arms Control (field hearings, San Francisco, Los Angeles, Sioux Falls). January 20, 21, 25, 1982.

U.S. and Soviet Civil Defense Programs (Executive Session). March 16, and 31, 1982.

Progress in Intermediate Range Nuclear Force Negotiations (Executive Session). March 24, 1982.

START talks (Executive Session). March 30, 1982.

U.S. Global Strategy, April 29 and 30, 1982.

Nuclear Arms Reduction Proposals, May 11, 12, 13, 1982.

Markup of Nuclear Arms Reduction Proposals, June 9, 1982.

U.S. Capabilities to Monitor Soviet Weapons Tests (Executive Session). July 29, 1982. Arms Control and the Militarization of

Space. September 20, 1982.

START Negotiations (Executive Session).

September 21, 1982. Nuclear Proliferation Risk Nations (Executive Session). September 27, 1982.

U.S. Nuclear Non-proliferation Policy. September 29, 1982.

Export of Helium-3 to South Africa (Executive Session). September 30, 1982.

Intermediate Range Nuclear Force Negotiations (Executive Session). December 13, 1982

START Negotiations (Executive Session). December 13, 1982.

U.S. Strategic Doctrine, December 14,

#### OCEANS, INTERNATIONAL OPERATIONS AND **ENVIRONMENT HEARINGS**

Law of the Sea Negotiations. March 5, June 4, July 21, and September 30, 1981,

and September 15, 1982.
Testimony on Ex. L., 96-2, Reciprocal Fisheries Agreement with Great Britain, and Ex. X, 96-2, Conservation on Antarctic Marine Living Resources. October 27, 1981.

Protocols to International Wheat Agreement (Treaty Doc. 97-9) November 24, 1981.

Acid Rain. February 10, 1982. S. 2675, protection of foreign consular posts located in the U.S., July 29, 1982.

#### NOMINATION HEARINGS

James L. Malone to be Assistant Secretary of State for Oceans and International Environment and Scientific Affairs. March 16 and April 2, 1981.

Charles M. Lichenstein to be the Alternate Representative of the United States for Special Political Affairs in the United Nations with the Rank of Ambassador. March 16, 1981.

Thomas Pauken to be Director of ACTION. March 25, 1981.

Elliott Abrams to be Assistant Secretary of State for International Organization Affairs. April 6, 1981.

Ernest W. Lefever to be Assistant Secretary for Human Rights and Humanitarian Affairs. May 18, 19, and June 4, 1981.

Eugene Rostow to be Director, Arms Control and Disarmament Agency. June 22 and 23, 1981.

Edward L. Rowny to be U.S. Special Representative for Arms Control and Disarmament Negotiations. July 9 and 10, 1981.

Robert J. Hughes to be Assistant ICA Director for Programs. July 23, 1981. Kenneth L. Adelman to be Deputy Repre-

sentative to U.N. with Rank of Ambassador. July 23, 1981.

William Jennings Dyess to be Ambassador to the Netherlands. July 23, 1981.

John L. Loeb, Jr. to be Ambassador to Denmark. July 23, 1981. Keith F. Nyborg to be Ambassador to Fin-

land, July 23, 1981.

Richard J. Bishirjian to be Associate ICA Director for Educational and Cultural Affairs. September 30, 1981. Richard F. Staar to be U.S. Representa-

tive for Mutual and Balanced Force Reductions Negotiations. September 30, 1981. Jean Broward Gerard for Rank of Ambas-

sador as U.S. Representative to UNESCO. October 27, 1981.

Geoffrey Swaebe to be Representative to the U.N. European Office with Rank of Am-

bassador. October 27, 1981.

Mark Goode to be Member, Board of International Broadcasting. October 1981

Frank Shakespeare to be Member, Board for International Broadcasting, November 24, 1981.

Paul Nitze, Head of the U.S. Delegation to the Intermediate Range Nuclear Force Negotiations, March 24, 1982.

Manfred Eimer to be Assistant ACDA Director for Verification and Intelligence, April 30, 1982.

Maynard W. Glitman for rank of Ambassador as Department of State Representative & Deputy Head of U.S. Delegation to Intermediate Range Nuclear Force Negotiations. April 30, 1982.

James Eugene Goody for rank of Ambassador as Vice Chairman, U.S. Delegation to the Strategic Arms Reduction Talks, April 30, 1982.

Louis G. Fields, Jr. for rank of Ambassador as U.S. Representative to Committee on Disarmament. April 30, 1982.

Ronald L. Trowbridge to be Associate ICA Director for Educational and Cultural Affairs. April 30, 1982.

Gregory J. Newell to be Assistant Secretary of State for International Organization Affairs. May 3, 1982.

James L. Malone to be Ambassador at Large, Special Representative to Law of Sea Conference and Chief of Delegation. May 13, 1982.

Robert John Hughes to be Associate ICA Director for Broadcasting. June 15, 1982.

Robert H. Ellis for rank of Ambassador as U.S. Commissioner of the U.S.-USSR Standing Consultative Commission, July 29, 1982. Theodore George Kronmiller for rank of

Ambassador as Deputy Assistant Secretary of State for Oceans and Fisheries Affairs. August 17, 1982.

William Robert Graham to be Chairman, General Advisory Committee of U.S. Arms Control & Disarmament Agency. September 17, 1982.

Edwin J. Feulner, Jr. to be Member of the Advisory Commission on Public Diplomacy. September 21, 1982.

W. Scott Thompson to be Associate Director for Programs. September 21, 1982.

Richard T. Kennedy to be Ambassador-at-Large for Nuclear Nonproliferation, December 7, 1982.

# THE FISHING AGREEMENT AND WHALES

Mr. PERCY. Mr. President, I am pleased to join in support of the comments made by Senator Packwoon concerning H.R. 3942 the governing international fishery agreement with Japan. This agreement is very important to the U.S. fishing industry, and for this reason, I firmly supported its passage.

I remain strongly committed to the policy of the United States regarding whale protection. For over 11 years the U.S. Congress has been on record in support of a moratorium on commercial whaling. This summer, the International Whaling Commission voted to set a zero quota on all commercial stocks of whales to begin with the coastal season of 1985 and 1986. giving those countries engaged in commercial whaling 3 years to phase out their industry. The IWC also called for a study to be submitted to the Commission by 1990 on the ban's impact on whale stocks. Unfortunately, Japan, the Soviet Union, Chile, Norway, and Peru filed objections to the IWC decision and have given no indication that they will cease whaling after the 1985/86 deadline.

I encourage the State Department to use every diplomatic and legal means at their disposal to convey to the governments concerned that the United States will back up its commitment to whale protection. The objection from Japan was a particular disappointment to me since I have been urging the Japanese Government to accept and abide by the IWC decision. Bringing an end to the disagreement over this issue will be to the advantage of all parties and will strengthen our efforts to work for common goals in the future.

#### SERVICES THE LEGAL PRO-GRAM: BARELY ALIVE UNDER SIEGE

Mr. CRANSTON. Mr. President, as this session of Congress draws to a close, it is an appropriate time to review what has happened to the legal services program during the past 24 months and take a few moments to assess where we might be headed with respect to this program in the next Congress.

#### HISTORY

As my colleagues well know, I am deeply committed to the legal services program. I believe that it is a cornerstone in our national commitment to the principle of equal justice under the law—a truly fundamental concept in our society. The legal services program breathes life into and gives meaning to this concept and to the notion that every person, regardless of wealth, is entitled to access to the halls of justice and to the protection of the laws of this land. Without such a program, these noble principles can become hollow rhetoric, devoid of substance for those who cannot afford legal representation.

The legal services program was begun in the midsixties as part of the war on poverty. After a turbulent initial period within the OEO structure, the program as we know it today-the Legal Services Corporation-was created in 1974 as part of a concentrated effort to insulate the program for political manipulation and pressures. The Congress—and the Republican administration in the White House at that time-recognized that a program like legal services for the poor would inevitably involve conflicts with vested interest and litigation against State, local, and Federal Government agencies, and give rise to deep controversy over the outcome of efforts to protect the constitutional and statutory rights of low-income individuals.

I am proud to have been one of the principal architects of the 1974 Legal Services Corporation Act—the act which created the Legal Services Corporation as an independent entity, outside of the executive branch, to administer the program. By establishing this independent corporation, we sought to remove the legal services program from the political maelstrom which had plagued it and create a structure which would allow the program to devote its time and energies to the task of protecting the legal rights of low-income clients, free from fear of political reprisals and harassment.

In 1977, when Congress considered the reauthorization of the Legal Services Corporation Act, there was a strong feeling that those efforts had been successful. The program appeared no longer to be deeply immersed in political controversy. The Board of Directors, selected by then President Ford, and most ably led by Roger Cramton, the first chairman, had, with the excellent assistance of the Corporation's first President, Thomas Erhlich, the former dean of the Stanford Law School, guided the program through its early stages. That is not to say that the program was without problems—no program of these dimensions or responsibilities could ever realistically be expected to be totally free from controversy-but overall the new structure appeared to be working well.

Unfortunately—tragically, I believe—that is no longer the case.

#### THE PAST 2 YEARS

For the past 2 years, we have witnessed a sustained assault upon this program by the current administration, an assault which has thrust the legal services program in a major way back into the political arena and destroyed much of the progress that had been made in depoliticizing the program. President Reagan took office with the avowed intention of dismantling the legal service program. His longstanding hostility toward this program is well known, dating back to the successful lawsuits brought by legal services attorneys on behalf of lowincome clients to stop the unlaw acts of State officials during his tenure as Governor of the State of California. The administration has tenaciously adhered to its goal of abolition of this program, despite the views of the Congress to the contrary.

The administration's persistent efforts to abolish the program directly, however, were stopped by the strong, bipartisan support for the legal services program both in the Congress and throughout the country. Whatever concerns might exist about the propriety of a particular action by a particular legal service program or the correctness of the outcome of a particular case, those concerns have generally been dwarfed by the continuing commitment of the Congress of the United States to this program.

That commitment has, I am proud to say, been mirrored by public officials and private citizens throughout the Nation. I have heard, as I know my colleagues have as well, from

public officials at every level of government, expressing their support for continuation of the legal services program. Members of the judiciary, the private bar, and the general public have written in support of the program. Editorials in newspapers from all over the country have urged continuation of the program.

Mr. President, I have been particularly impressed by the flood of letters I received which began with phrases like, "I have frequently been on the other side of cases handled by legal services attorneys, but \* \* \*" These letterwriters have gone on to attest to the importance, the vital importance of continuing the legal services program. I have also been deeply impressed by the correspondence I have received from member of the judiciary who have expressed overwhelming support for the program and have described in graphic detail the contributions made by these programs to the cause of justice.

Mr. President, what controversies there have been about the legal services program have been far outweighed by the recognition of the tremendous good that is done by the legal services program and the dedicated individuals working in the local programs throughout the country. Overworked and underpaid, these legal service employees have made immeasurable contributions to making the concept of equal justice under the law a reality for low-income Americans.

#### BIPARTISAN CONGRESSIONAL SUPPORT

It is important to stress that the deep commitment to this program transcends party lines. The legal services program has always enjoyed strong bipartisan support in the Congress because the concept of equal justice under the law is not a partisan matter. Members on both sides of the aisle in the Senate and in the other body have repeatedly joined together to make sure this program continues. Presidents of both parties have supported the program in the past.

The hostility of the present administration toward this program has no precedent in either party. It is fed, however, by a small cadre of individuals and organizations who have worked persistently for years to deny low-income individuals access to effective legal representation. Their goal has been to destroy the legal services program by whatever means possible.

#### RESENT THREAT FROM BACK DOOR

Mr. President, despite the strong bipartisan upport in the Congrss for continuation of the legal services program—exemplified by the numerous votes in this body over the past 2 years rejecting proposals to emasculate the program—it is no exaggeration to say that the legal services program stands today under the most dire threat in its lifetime to its continued existence. The foes of the legal services program

within the administration, repeatedly thwarted in their frontal attack upon the program, began last year a cynical and devious effort to destroy the program from within. They have attempted to orchestrate a carefully designed plan to do indirectly what they could not achieve directly—seize control of the program and dismantle it.

Over the past year, we have witnessed a flagrant abuse of the recess appointment power by the President, having used that power to place in control of the Corporation individuals who flaunt the express congressional mandate that the Board of Directors of this program act independently, free from the control or influence of the executive branch. One of these individuals-William Olson-candidly admitted during his confirmation hearing earlier this year that plans to take control of the Corporation and halt the 1982 grants—an effort unsuccessfully undertaken by the "recess" appointees—were developed in the White House. When it appeared that the administration-selected Board was unwilling to adhere to the administration's goals on critical matters, including the selection of a Board chairman, additional "recess" appointments were made by the White House on the eve of an important Board meeting, in order to insure that the administration crafted and engineered game plan was not derailed.

Mr. President, to understand fully the abuse of the program by the administration, it is important to understand the statutory requirements relating to the qualifications for members of the Board of Directors of the legal services program.

### CRITERIA FOR LEGAL SERVICES DIRECTORS

Mr. President, the positions on the Board of Directors of the Legal Services Corporation are not ordinary, executive branch positions. Members of the Board of Directors of the Corporation do not serve as advisers or counselors to the President. Nor are they charged with the responsibility of carrying out the President's policies with respect to the administration of the legal services program. Quite to the contrary, as I have indicated, the Legal Services Corporation was established as an independent entity for the specific purpose of removing the legal services program from political control and interference.

The legislative history of the Legal Services Corporation Act sets forth specific criteria to be applied by the Senate in exercising its advise-and-consent responsibilities with respect to these nominations. These criteria are as follows: Each nominee must be committed to the Corporation's freedom from political control—the touchstone of the Legal Services Corporation Act. The Senate must also satisfy itself that each nominee understands and is

fully committed to the role of legal assistance attorneys and supports the underlying principle of the Legal Services Corporation Act that it is in the national interest that the poor have full access under law to comprehensive and effective legal services. The Senate also must assess whether the Board of Directors, taken as a whole, is representative of various specified groups concerned with the provision of legal services to the poor.

Thus, Mr. President, the specific role and responsibilities of the Senate regarding these nominations go beyond the customary advise-and-consent role where considerable deference is traditionally given to the judgment of the President in selecting men and women to fill positions in the executive branch. In judging these nominations, the Senate has a responsibility to assure that the statutory requirements and legislative intent regarding the qualifications and commitment of the nominees have been met.

Mr. President, the administration, by its utilization of the recess appointment power, has effectively subverted congressional intent that individuals serving on the Board of Directors of the Legal Services Corporation meet these requirements. The result has been to place the Legal Services Corporation under the control of individuals who have not been-and may well never be-confirmed by the Senate as meeting the qualifications set forth in the law. The issue of whether the President has the power to exercise recess appointment power with respect to these unique positions is before the courts and will ultimately be decided there. Nevertheless, it seems quite clear to me, as one of the authors of Public Law 93-355, that what has been accomplished by the Reagan administration in this instance is totally contrary to what we intended when we created an independent entity and established the special criteria for individuals to serve as directors of this new corporation. As I indicated earlier, these are not run-of-the-mill executive branch appointees who serve as advisers to the President or are responsible for carrying out his policies. To allow the use of "recess" appointments to avoid Senate confirmation is a violation of congressional intent.

Mr. President, the adverse consequences of permitting this abuse of process is readily apparent from the actions which have been taken by certain of the Reagan nominees—particularly William Olson and William Harvey—since they assumed power.

REAGAN NOMINATIONS AND APPOINTMENTS

Mr. President, let me review briefly the events of the past year with respect to these nominations. The Legal Services Corporation Act provides for staggered terms for the 11 positions on the Board of Directors. Normally, the opportunity to fill only a portion of the positions would have been available when the Reagan administration took office. However, because the previous administration had not filled the "vacanciers" which arose during 1980, the terms of all 11 members sitting on the Board had expired in 1981. Section 1004(b) of the act provides that such individuals continue to service until their successors have been appointed and qualified.

The Reagan administration took no action to fill those vacancies until late December when, in a dramatic New Year's Eve move, it made a number of recess appointments. The names of all but one of those recess appointees were subsequently submitted to the Senate subject to advice and consent for regular appointments. Nine names were submitted on March 1, and a 10th name shortly thereafter. One of the ten individuals, Marc Sandstrom, subsequently asked that his name be withdrawn. In July, the Labor and Human Resources Committee ordered the nominations of eight of the remaining nominees favorably reported to the Senate, with the committee vote divided with respect to the Olson and Harvey nominations. At the request of the White House, no action was taken with respect to the nomination of George Paras. Presumably the Whiter House's request was based upon its vote count which indicated that if the committee voted on that nomination it would not be approved.

Thus, eight nominations were placed upon the Senate calendar on July 15. There was, however, opposition in the Senate to consideration of these eight nominations until the status of the other three vacancies, in particular, the status of the Paras nomination, was clarified.

Mr. President, as I will indicate in a few moments, the unwillingness of Members of the Senate to take up a partial slate of nominations was entirely appropriate and consistent with prior Senate precedents with regard to the Corporation's Board of Directors.

The White House, however, refused to clarify its intentions with regard to the Paras nomination or the other two vacancies. There then began to develop within the Senate a desire to move ahead with the six nominations which appeared to be noncontroversial, and a time agreement to that effect was entered into shortly before the Senate recessed in October. At that point the White House indicated that it did not wish to see any nominations confirmed unless the Olson and Harvey nominations were considered at the same time. As a result, the stalemate continued until the White House, in what might fairly be characterized as a final gesture of disdain toward the confirmation process, withdrew all nine nominations.

Mr. President, since the Harvey and Olson nominations were withdrawn, I

would normally not wish to take up the Senate's time discussing these nominations. However, it is not yet clear whether the President intends to continue his efforts to place these individuals on the Legal Services Corporation Board. This week's revelations about the extent to which these individuals have profited financially from their participation on the Board of Directors would-it is hoped by this Senator-be sufficient to put an end to such a possibility. Nevertheless, I believe that the actions of Mr. Harvey and Mr. Olson have been so hostile to the legal services program and contradictory to the very reason for being of the Corporation itself that I am compelled to state my objections to these particular nominations in the strongest possible terms.

#### THE HARVEY AND OLSON NOMINATIONS

Mr. President, there have been concerns about the qualifications of Mr. Olson and Mr. Harvey since their names were first proposed. Both men have had relationships with organizations which have had adverse interests to the program. Serious questions have consistently been raised about their commitment to the legal services program. Their nominations have been opposed by a number of organizations involved with the provision of legal services to low-income individuals, and there were votes against both individuals—seven votes against Mr. Olson and three votes against Mr. Harvey-in the Labor and Human Resources Committee.

For me, however, the essential failing which operates to disqualify Mr. Olson and Mr. Harvey is the violation of the basic requirement that members of the Legal Services Corporation Board must remain independent of the administration in the discharge of their duties. That commitment to the Corporataion's freedom from political control is essential; it is the touchstone of the act.

The most serious charge against Mr. Olson relates to his actions in calling an extraordinary meeting on last New Year's Eve of those to whom the President purported to give "recess" appointments. Mr. Olson candidly admitted during his confirmation hearing that he called this meeting after consultation with White House staff and that a resolution attempting to block the award of the 1982 grants to legal services programs was developed in the office of a White House staff member.

At his confirmation hearing, Mr. Olson told the Labor and Human Resources Committee that he did not think it would be proper "in the future" for the White House to "dictate" any action taken by the Board of Directors. However, he failed entirely to acknowledge that the actions he had already taken were highly improp-

er in compromising, as the new nominees' very first act, the independence

of the Corporation.

Mr. President, I find these actions on Mr. Olson's part and his subsequent failure to understand their gross inappropriateness, disqualifying in and of themselves. Not only has he demonstrated a clear lack of understanding of the statutory independence of the Corporation and its freedom from political control, but these actions display a cynical willingness to subject the Corporation to the control of a President and a White House staff that is avowedly and persistently dedicated to the abolition of the Corporation.

Since those initial disqualifying actions, Mr. Olson has followed a stead-fast pattern of taking actions hostile to the legal services program and has consistently allied himself with Mr. Harvey in what appears to be a concerted effort to carry out the goals of the White House in destroying this program.

The recent "Harvey/Olson alternative proposals," published on November 8, for regulation virtually eliminating all possibility of programs bringing class actions and removing fair process in refunding decisions, are patent ex-

amples of this alliance.

With respect to Mr. Harvey, at the time of his confirmation hearing, there did not appear to be any evidence of a direct link between Mr. Harvey and the White House in the development of a strategy to take over the Legal Services Corporation-in contrast to the admissions of Mr. Olson regarding such ties on his part. Substantial concerns were expressed, however, by members of the Labor and Human Resources Committee regarding Mr. Harvey's prior association with the Pacific Legal Foundation, an organization with a history of opposing the interests of low-income individuals, as well as concerns regarding his refusal to provide forthright answers to questions about the legal services program. Nothing Mr. Harvey has done with respect to the legal services program since the confirmation hearings has done anything to allay these fears; indeed, precisely the opposite is true. Mr. Harvey has repeatedly and consistently taken actions indicative of a plan to alter radically the nature of the legal services program. The November 8 regulations are a ready example of this.

There are also substantial reasons to believe that when it became apparent that Mr. Harvey did not have a working majority on the Corporation's Board of Directors to carry out his program of radical change, he delayed calling Board meetings until the White House could send him support in the form of two additional "recess" appointees, neither of whom had any apparent qualification to serve on the

Legal Services Board of Directors. These two appointees provided the necessary votes to secure Mr. Harvey's election as Chairman and bestow the Presidency of the program upon Mr. Harvey's hand-picked candidate, a former law school student of his.

Although the Senate has not been afforded the opportunity of having Mr. Harvey testify about his contacts with the White House regarding these two new appointments, there is concrete evidence available to show that Mr. Harvey makes his decisions with respect to the Legal Services Corporation with a close eye toward the ad-

ministration's policies.

Specifically, Mr. President, I have received a copy of a letter dated August 30, 1982, from Mr. Harvey to Board member Harold Demoss, in which Mr. Harvey, in the context of urging that Mr. Demoss refrain from putting a resolution on the agenda of the next meeting of the Board, specifically refers to administration policies regarding the program. The resolution, in essence, would have expressed, among other things, the Board's support for an increase in funding for the Corporation, opposition to further reductions in funding, and support for the House-passed reauthorization bill, H.R. 3480. In urging that the DeMoss resolution not be placed on the agenda, Mr. Harvey stated:

Legislation is being reviewed, I am told, in the Administration. Clearly, support in some form is required from the Administration, if any or all of H.R. 3480 is to be adopted. I suggest that parts of your resolution might be offensive, or might be seen that way, to the Administration. I do not think you intend that or want it.

Mr. President, I ask unanimous consent that the full text of this letter, along with the proposed resolution that Mr. Harvey found so undesirable, be printed in the Record at the conclusion of my remarks.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. CRANSTON. Mr. President, I have also obtained a copy of a letter dated June 5, 1982, from Mr. Harvey to another Board member, Howard Dana, in which Mr. Harvey makes explicit reference to having Corporation business at the White House.

It seems fairly clear to me that what we have is a Board member—far worse, the Chairman of the Board—who has failed to comprehend his responsibility to exercise independent judgment regarding this program—his responsibility to carry out the purposes and adhere to the provisions of the Legal Service Corporation Act and not to serve as an agent of the administration.

Mr. President, there are other charges against Mr. Olson and Mr. Harvey which I have not discussed. For example, Mr. Olson's role on the Reagan administration's legal services transition team has been a source of

continuing concern. It has been alleged that Mr. Olson advocated abolition of the program. He refused to provide the Labor and Human Resources Committee with a copy of that report or to discuss its contents in detail.

Mr. Olson's contention may have been quite proper that the contents of the transition report are not his, but rather the President's, to disclose. However, given the heavy cloud of doubt over his nomination, I believe it was incumbent on him to work out some arrangement with the White House whereby he could address and seek to remove the understandable concern over this report. The burden was upon Mr. Olson to refute the allegations made regarding his role on the transition team: He failed to carry this burden satisfactorily.

Similarly, Mr. Olson made no effort to dispel concerns about his relationship with Howard Phillips, chairman of the National Committee To Defeat Legal Services. He failed to state that he did not share Mr. Phillips' dedication to the destruction of the legal services program. This is particularly disturbing when coupled with his responses to certain confirmation questions. For example, in response to a question I submitted in writing to him regarding whether he was committed to opposing the abolition of the Legal Services Corporation, Mr. Olson declined to give an affirmative response, stating only that "My only commitment is to fulfill my fiduciary duties to the Corporation as a member of the Board."

Mr. President, I believe that the record is clear that neither Mr. Olson nor Mr. Harvey has demonstrated the commitment to the continuation of the legal services program that is required by the act and neither understands or complies with the fundamental requirement that Directors of this Corporation not serve as agents of the administration.

# ADMINISTRATIVE EXPENDITURES BY THE REAGAN BOARD

Mr. President, my original opposition to these two nominations has been compounded by the facts which were revealed at the hearing held in the other body on Tuesday, where it was brought out that the Reagan "recess" appointees had taken approximately \$250,000—a quarter of a million dollars—from the legal services program for their time and expenses over the last 11 months.

I am deeply disturbed, as were the House Members, by this diversion of legal services funds into the pockets of these Board members. When legal services programs are cutting back vital assistance to low-income individuals all over the country and millions of Americans are unemployed, this type

of behavior is simply inexcusable and

a breach of public trust.

Mr. President, I find particularly distressing that Mr. Olson, in attempting to justify billing the Legal Services Corporation for some \$19,00 for "his time" over the past 11 months, claimed that he had been forced to spend substantial time in connection with protracted confirmation proceedings in the Senate. The idea that an individual has billed an agency for the time he has expended in trying to get himself confirmed is simply outrageous

The rest of the story brought out at the hearing-the lucrative contract of employment Mr. Harvey personally negotiated for his former student which included a year's severance pay, unlimited personal living expenses, free trips back home, and membership fees in a private club-appears to have embarrassed even the White House. I ask unanimous consent that the series of articles describing the degree to which these two and other of the Reagan nominees have drawn funds from a program designed to help poor people which appeared in the Washington Post on December 15 and 16, be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

INCOMPLETE BOARD OF DIRECTORS

Mr. CRANSTON. Although the withdrawal of all nine nominations has made the issue moot in this instance, I would also like to share with my colleagues my views on the impropriety of the Senate considering a partial slate of nominations.

Although I did not object to the time agreement which had been entered into with respect to Senate consideration of the other six nominations, I had indicated to the minority leader and the ranking minority member of the Labor and Human Resources Committee, my intention to vote against the so-called noncontroversial six nominations, as well as the Harvey and Olson nominations, because of the improper process being followed with respect to those nominations. I ask unanimous consent that a copy of the December 10 letter I sent to the minority leader regarding this matter be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, as I have indicated, the Legal Services Corporation Act and its legislative history make it quite clear that the Board of Directors, as a whole, is to be constituted so as to be broadly representative of the various groups concerned with the provision of legal services to poor persons.

Since the time that President Ford submitted to the Senate the first panel of Legal Services Corporation Board nominees, in 1975, the Senate has never acted upon a partial slate of nominees. Indeed, the Senate position on this issue was expressed at the opening of the 1975 confirmation hearings when the then chairman of the Labor and Public Welfare Committee observed that President Ford had accepted the committee's recommendation that all nominees be presented to the Senate together because the act obligated the Members of the Senate to "ascertain the range of interests represented by the nominees as a group, as well as to inquire into their individual qualifications." (Nomination hearings before the Committee on Labor and Public Welfare, U.S. Senate, 94th Congress, May 14, 1975, p. 15.)

It is particularly significant that in 1975, although the committee reported the individual nominations at various times between May 14 and July 9, no action was taken by the Senate until all 11 nominations had been reported by the committee to the Senate. Indeed, the situation in 1975 was quite similar to that today. Shortly before the confirmation hearings actually began, one of the original 11 nominees, former Congresswoman Edith Green, had requested that her name be withdrawn. Marc Sandstrom, one of President Reagan's original nominees, did the same thing earlier this year. A second nomination in 1975, that of William Knecht, was indefinitely postponed by the Labor and Public Welfare Committee. A similar action was taken with respect to the nomination of George Paras. In 1975, recognizing that the Knecht nomination was not going to be approved, the White House withdrew his nomination and concurrently submitted the names of the final two nominees-former Senator Marlow Cook and Melville Broughton.

It was not until these last two names had been submitted and approved by the committee that the Senate acted on July 9, 1975, on the other nominees—then taking up the full slate of nominees.

Each subsequent time—in 1978 and 1979—that legal services nominations came before the Senate, the White House submitted nominations to fill all of the vacancies and the Senate therefore acted on the nominees with knowledge of the prospective nature of the entire panel.

The practice of not acting until the President has proposed the full composition of the Board not only allows the Senate to judge the representative nature of the full panel but permits the Senate to avoid being faced with the situation of not agreeing to a particular nominee because the full Board will not meet statutory criteria of representativeness if he or she is confirmed.

Mr. President, I raised these issues on these nominations and discuss them now not merely because of the improper procedure that was being proposed to the Senate for floor consideration, but because of my substantial concerns about the composition of the slate of nominees to be considered by the Senate as it relates to the requirements of the Legal Services Corporation Act. Although the deficiencies in the slate might have been corrected by the selection of the final nominees, it would have been virtually impossible for the Senate to assess what the final Board would have looked like and whether the representation provided for by the Congress would have been achieved.

# FAILURE TO MEET STATUTORY REQUIREMENTS REGARDING REPRESENTATIVENESS

My concerns were principally in four areas: First, compliance with the statutory requirement regarding representation of eligible clients; second, compliance with the statutory requirement regarding representation of attorneys providing legal services to eligible clients; third, compliance with the statutory requirement regarding the limit on representation from one political party; and fourth, the insufficient representation of women and minorities among the administration's nominees.

The Legal Services Corporation Act explicitly requires, as a result of the 1978 amendments in Public Law 95-222, that there be more than one person on the board who is an eligible client. The Reagan administration's slate of candidates fell short of this statutory requirement. Only one of the eight nominees was a nonattorney who might even arguably be a client representative.

My concern about the failure of the administration to meet the requirement of appointing more than one eligible client to the board was heightened by the recent "recess" appointment of Dan Rathbun, a 23-year-old college student. The administration apparently has argued that Mr. Rathbun satisfies the client representation requirements, although reports have appeared in the press and not been denied that he was claimed as a dependent last year by his parents, whose income—reported to be over \$30,000-would not qualify them as eligible clients. Although Mr. Rathbun's name was not submitted for a permanent position on the board, the fact that the administration seems to view this individual as filling one of the positions intended by the Congress to be filled by someone from the low-income client community is indicative of a lack of concern for meeting the statutory requirements.

I was also not satisfied that any of the eight nominees was adequately representative of attorneys providing legal services to eligible clients. Although several nominees had described themselves as having represented eligible clients or provided pro bono services, none has anything approaching the experience of a fulltime legal services attorney. Again, although this deficiency could be corrected by the nomination to one of the remaining seats of an individual with substantial legal services experience, there has never been any indication that the administration intended to do this. Indeed, the other last-minute recess appointee, Frank Donatelli who was apponted along with Mr. Rathbun, certainly has no experience as a legal services staff attorney.

In like manner, we would not be able to tell whether the final composition of the Board would have satisfied the statutory directive in section 1004(a) of the Legal Services Corporation Act that "No more than six (members of the Board) shall be of the same political party." Five of the eight nominees are Republicans.

Fourth, Mr. President, in terms of the general representativeness of these nominations, I was deeply concerned about the lack of women and Hispanics among the eight nominations. There was only one woman among the eight individuals nominated to the Board, although women represent 68 percent of the clients served by the Legal Services Corporation and although two out of three poor adults in this Nation are women. There were no Hispanic representatives at all in this slate of nominees, although the Hispanic population represents 10 percent of the clients served by legal services programs and over one-fourth of the eligible population.

Mr. President, the first Board of Directors consisted of an 11-member, allmale, all-attorney panel. I strongly objected to that composition in 1975, and I authored a resolution unanimously adopted by the Labor and Public Welfare Committee expressing the committee's concern that "future nominations should take account of the need for the inclusion on the Board of nonlawyers, women, and members of the client community."

The nominations to this Board made by the Carter administration made dramatic and appropriate changes in the Board's composition. The Board which was in place when President Carter left office was composed of four women-one of whom served as the Chairman of the Board-two client representatives, a former legal services attorney, two Hispanics, two blacks, and one native American. Although there were two black nominees included in the recently withdrawn slate, the overall contrast is striking between the panel proposed by the Reagan administration and the diverse panel proposed to be replaced.

Mr. President, in 1975, when I did not object to the last two Ford nomiwhite, nees-also male attorneys making the entire Board all white, attorneys-the distinguished Senator from New York, Senator Javits, then the committee's ranking minority member and one of the best friends the legal services program has ever had, noted on the Senate floor that I had "swallowed hard" in concurring in the confirmation of the Ford panel because of its lack of women, non-attorneys, and clients.

I am not willing to "swallow hard"

I am not willing to "swallow hard" again. I will not vote for a panel which is not representative, and I will continue to oppose any effort to ask the Senate to confirm partial slates of nominees to the Board of Directors of the Legal Services Corporation.

#### CONCLUSION

Mr. President, the fact that the legal services program exists today, after nearly 2 years of continuous attack by the current administration, is a testament to the strength of this program and the depth of the commitment of the Congress to the program. I believe that the strong bipartisan support for the legal services program will continue in the 98th Congress and that the cause of justice exemplified by this fine program will continue to be served.

An editorial appeared in the Washington Post on December 16 describing the legal services program as a program truly worth saving. I hope that the administration sometime in the not too distant future will accept this fact.

Mr. President, I ask unanimous consent that the Post editorial, along with two Post articles which appeared on December 12, also be printed in the Record following the material I previously received unanimous consent to insert.

The PRESIDING OFFICER. Without objection, it is so ordered.

The material ordered to be printed in the Record follows:

[From the Washington Post, Dec. 15, 1982] LEGAL SERVICE APPOINTEES GET FAT FEES

# (By Mary Thornton)

President Reagan's appointees to the board of the Legal Service Corp., the program that provides free legal help to the poor, have been collecting large consulting fees for their part-time jobs, at least twice as large as those paid to any previous board in the program's history.

in the program's history.
"I must tell you that it has a bad appearance," Rep. M. Caldwell Butler (R-Va.) told a congressional oversight hearing yesterday. "I'm a Republican, and we bring in Republicans to reform [the program], and it sounds a lot like the first thing they did was put all four feet and a snout in the trough."

Rep. Harold S. Sawyer (R-Mich.) said, "It really offends me that you people are doing this." He noted that board Chairman William F. Harvey submitted consulting bills for \$25,028 in the first 11 months of this

"Here the board members are making a substantial amount of money for just a part-time thing," he said. "I know there are top-flight lawyers in the U.S. . . who would devote pro bono [free] time without taking kind of money out of the program." Sawyer added that the president of the American Bar Association serves a one-year term which is virtually full-time with no payment besides expenses.

Documents provided by Legal Services to the House Judiciary subcommittee on oversight indicate that the 11-member Reagan board collected \$156,201 in consulting fees in the first 11 months of 1982, compared to \$72,029 for the pervious board in a year.

In fact, the overall budget for the board of directors has grown from \$113,721 on Sept. 30, 1981, under the old board, to \$273,731 on the same day this year, according to Legal Services Corp. figures.

Since the program was created in 1975, directors have been entitled to reimbursement for expenses and to a consulting fee for the time they work.

But in most cases those fees have been small. Last year, for example, former board chairman William McCalpin, who was appointed by President Carter, collected \$4,704 in consulting fees.

William Olson, a Reagan board member who testified yesterday, rejected a suggestion by Butler that the \$221-a-day consulting fee be limited, suggesting that this board may be working harder than previous ones.

Olson, 33, a Washington lawyer, collected \$19,721 in consulting fees, but he said he considers his work on the board to be "pro bono work" because the \$29-an-hour consulting fee is less than he earns at his law firm.

Reagan twice has tried unsuccessfully to persuade Congress to abolish Legal Services. Last week, he withdrew all his formal nominations for the board when he received word from the Senate that neither Harvey

nor Olson would be confirmed.

The board has been serving all year in recess appointment that will expire when Congress adjourns for the year, possibly by the end of this week.

Legal Services payment records obtained by the Washington Post indicate that Harvey, who does not like to travel on airplanes, frequently billed the corporation the \$221-a-day rate for his driving time. Under Legal Services guidelines, board members are allowed to charge as consultants for the time they spend traveling.

In some cases, the 615-mile trip each way from Indianapolis to Washington was billed for two days in each direction, in addition to automobile expenses, lodging expenses and meals on the trips.

Harvey also had some substantial expenses during his trips on official business.

On a trip to Washington in late October and early November for a two-day board meeting and related business, Harvey was rembursed for \$194.22 in postal expenses and \$55.85 in taxi expenses.

He tried to charge the program for his four nights at the Watergate Hotel at \$131.80 a night, but the corporation paid only \$69.78 a night.

On another trip in May in which he spent five nights in Washington, Harvey spent \$147.05 on taxis and \$63 on long-distance phone calls. On a six-day trip in March, he collected on a long-distance phone bill of \$118.28, in addition to other travel expenses.

Harvey, who did not return telephone calls yesterday, is not the only board member with large consulting fees or ex-

Daniel Rathbun, 23, an undergraduate student who ws added to the board by Reagan in late October, collected \$1,032.07, not including his travel expenses, by working for 35 hours over six days.

Another board member, Clarence McKee,

has flown first-class several times.

he said yesterday that he needs the larger seats because he suffers from sciatica, back condition, and that he had submitted letters from his doctor tothe board to justify the expense.

A source at Legal Services said yesterday that the doctor's note was not turned in until last week, after Congress requested the travel records. McKee collected \$15,757 in consulting fees.

[From the Washington Post, Dec. 16, 1982] LEGAL SERVICES HEAD'S CONTRACT SWEET

(By Mary Thornton and Juan Williams)

The new president of the Legal Services Corp. has negotiated a contract with his former law professor, now the chairman of the board, that gives the president extensive government-financed fringe benefits, including paid membership "in a private club of This 1 choosing.'

The board of the corporation was attacked earlier this week for collecting large consulting fees. As criticism mounted yesterday President Reagan said it is "highly unfortunate" that his appointees have been billing the corporation-the federal program of legal assistance to the than twice the rate of \* \* \* board. · more

We think the expenses are high," said White House spokesman Larry Speakes.

"We'd like to know why."

Speakes said White House counselor Edwin Meese III had asked the Office of Management and Budget to review the matter.

However, Meese told NBC Tuesday night, "I think if people have been working or have special responsibilities where they donate a lot of time and the law provides consulting fees . . . then they should take consulting fees."

Meanwhile, documents obtained by The Washington Post indicate that Donald P. Bogard, who started Monday as president of the Legal Services Corp., has been given substantial benefits in addition to his \$57,500 annual salary.

The contract was negotiated by board chairman William F. Harvey, a former law professor of Bogard, without the participation of the other 10 board members, board members said.

Besides the club membership, the contract contains a severance clause that would entitle Bogard to a full year's pay, benefits and

expenses if he were fired.

In addition, since Bogard's family prefers not to move to Washington until the end of the school year, the corporation will pay an unlimited amount for his food and lodging, plus two trips a month to Indianapolis until June 15. Round-trip, tourist-class air fare to Indianapolis is \$350.

Bogard said yesterday that private club membership has been standard in the con-

tracts of previous Legal Services presidents.
Asked if he will join a club, he said, "I haven't thought about it." Bogard also said he had no comment on Reagan's statement.

Bogard, 41, is an Indianapolis lawyer who spent eight years in the Indiana attorney general's office and then moved to Stokely-Van Camp Inc., where he defended the firm against lawsuits brought by Legal Services Corp. attorneys on behalf of migrant farm-

On Oct. 29, the Legal Services Corp. board voted to authorize a three-man committee of Harvey, board member Howard Dana, and acting president Clint Lyons to negotiate Bogard's contract. Instead, Harvey negotiated it himself, board members said.

Rep. Barney Frank (D-Mass.), a member of the House Judiciary oversight subcommittee, said, "I think that was clearly a violation. . . The terms of that contract were negotiated improperly—in violation of an explicit vote of the board."

Reagan has twice tried to persuade Congress to eliminate all funding for the Legal Services Corp., saying that the private bar would handle these cases at no charge and at no cost to the government. He named the board members only after Congress rejected his efforts to eliminate the program.

Meanwhile, the corporation has been operating on a reduced budget-25 percent

below 1980.

The board is scheduled to meet today to consider changes in regulations to limit the kind of cases that Legal Services attorneys

may hring

According to Legal Services records, Reagan's board members charged consulting fees of \$29 an hour, totaling \$156,201 for their part-time work for the first 11 months of the year, more than twice the \$72,029 that the previous board charged for all of 1981.

Speakes said yesterday that the White House was not aware of the fees until Tuesday, when the matter came up in a House hearing. He said Reagan "expressed the view this morning that he believes it to be highly unfortuante that expenses for the board have apparently doubled over the past year, and it is his hope that future expenses could be reduced to an absolute minimum '

In another matter affecting the corporation, U.S. District Court Judge Norma Holloway Johnson yesterday refused to block Friday's scheduled Legal Services board meeting. A group of former board members had sought to prevent the meeting on grounds that Reagan had withdrawn the nominations of nine recess appointees to the board.

But Johnson said that if the Senate's rights to confirm the appointees "are being abridged . . . there is no reason why the Senate cannot file suit on its own behalf."

Moreover, she said, the president's withdrawal of the nominations does not affect the validity of the recess appointments, which will expire when the lame-duck session of Congress ends.

> LEGAL SERVICES CORPORATION, August 30, 1982.

Re Letter and Resolution dtd. August 23, 1982 to Chairman and Members of L.S.C. Board of Directors.

Mr. Harold R. Demoss, Jr. South Tower, Pennyoil Place, Houston, Tex. DEAR HAROLD: Thank you for your communication of the 23rd. You have requested that your Resolution be placed on the agenda of the next Board meeting, which would be in late September.

I suggest in turn that you not place it on the agenda of the next Board meeting. Because of the nature of what you want to say, I feel that you should receive and consider the comments and views of the other Board members and, eventually, reform what you have said.

I shall attempt to initiate some thoughts here, with a few short statements, and if you receive them and they are well received, then perhaps they too might develop more discussion before you present your Resolution.

My thoughts are:

(1) There is no historical connection between our appropriation of \$241,000,000. and the provisions of H.R. 3480. There is none in the Congress, and the L.S.C. establishment knows there is none. I suggest that that should not be said.

(2) Our approach, that is, mine, other Board members, President Caplan, and the Corporation's staff, on the Hill, is to get what we can get of H.R. 3480, hopefully the more the better, and especially that which deals with present Section 1011. The Resolution seems, unintended no doubt, to de

facto reject that approach.

(3) Legislation is being reviewed. I am told, in the Administration. Clearly, support in some form is required from the Administration, if any or all of H.R. 3480 is to be adopted. I suggest that parts of your Resolution might be offensive, or might be seen that way, to the Administration. I do not think you intend that or want it.

(4) My desk seems covered over with letters expressing very great concern with L.S.C. and its activities. You have received. I think, the letter from Mr. M. Gregg Smith, on the conditions in Oregon public housing. which is dated August 13, 1982. There are many like that, as well as reports from the Comptroller General and the House of Representatives.

In my judgment major changes in L.S.C. should be effected if it is to represent the best interests of persons who do have counsel. I am not certain that this is the spirit of your Resolution or that you see L.S.C. in that way. I would prefer to discuss this with you, and perhaps we can when we are together at one of our meetings.

Meanwhile, I suggest that your Resolution, in its present form might be self-defeating. Hence, I request that you hold placing it on the Agenda.

Very cordially,

WILLIAM F. HARVEY, Chairman of the Board.

#### RESOLUTION FOR BOARD OF DIRECTORS OF LEGAL SERVICES CORPORATION

Be it resolved by the Directors of the Legal Services Corporation that, in order to communicate to the President and to the Congress its views as to the various issues now facing the Corporation and to state publicly its position on such issues, the Board does hereby adopt the following statements of principle, policies and posi-

1. The program for providing civil legal representation for the poor as presently funded and administered by the Corporation is a needed and worthwhile program which serves the national interest and should be continued.

2. The Board is aware that this program, as is the case with many government pro-grams, suffers from certain flaws, abuses and irregularities. Such imperfections, however, constitute a relatively small part of the total operation; and are far outweighed by the good which the program otherwise provides. The Board pledges to the President and to the Congress that it will diligently exercise every power under existing statutes and regulations to reduce and ultimately eliminate all such abuses; and where necessary, it will request amendatory legislation by the Congress to give this Board additional authority to deal with such problems.

3. The Board urges the Congress to adopt and the President to approve an appropriation for the Corporation for Fiscal Year 1983 at the level of \$265,000,000.00 as requested by the Corporation. This request a modest increase from the constitutes \$241,000,000.00 level at which the Corporation has operated during Fiscal Year 1982; and is needed to cover the increase in costs resulting from inflation. The Board recognizes and commends the efforts of the President and the Congress to achieve a balanced budget and to reduce the federal deficit. However, the Board would point out that the Legal Services Corporation has already sustained a 25 percent reduction in its appropriation from the level of Fiscal Year 1981; and in the Board's view, this Corporation has already made its contribution toward balancing the budget.

4. Any substantial reduction in the level of appropriations for the Corporation below the level of \$241,000,000.00 at which the Corporation is presently operating will cause significant loss in the ability of the Corporation to deliver legal services to the poor on a fair and equitable basis; and will make it impossible for the Corporation to comply with the standard of "equal access" contemplated by the Legal Services Corpo-

5. The Board urges the Senate to pass and the President to sign H.R. 3480 as adopted by the House of Representatives. This bill contains many provisions which will provide the statutory framework for elimination of some of the operational problems in the program which have been the subject of

complaint and criticism.

6. The Board urges all organizations and individuals in the Legal Services Community to join the Corporation in seeking the appropriation and the passage of H.R. 3480 as referred to herein. The Board recognizes that some may desire a higher level of funding than the appropriation requested by the Corporation; but in the Board's view, and request for funds in excess \$265.000.000.00 would be unrealistic in the face of the overriding necessity for bringing the federal budget into balance. The Board recognizes that some may not favor all of the provisions of H.R. 3480; but in our view, the changes contemplated by H.R. 3480 are the price which must be paid for the continuation of the program at current levels.

7. For the foreseeable future, the goals of the Legal Services Corporation should be:

A. To maintain itself and its programs at substantially current levels as the nucleus of all programs aimed at providing civil legal representation for the poor; and

B. To encourage the development of various private and locally funded programs as supplementary means of providing civil legal representation for the poor.

Achievement of such goals will require:

(a) Concentration of the human and financial resources of the Corporation and its grantees in those areas of civil legal representation which are expressly authorized by statute and regulation;

(b) Cooperation between the Corporation and its grantees in defining those areas of civil representation which can more efficiently be provided by supplementary programs; and

(c) An attitude of mutual respect and confidence between the Corporation, its grantees and all organizations involved in the delivery of legal services to the poor.

DECEMBER 1, 1982.

Hon. ROBERT C. BYRD, Minority Leader.

U.S. Senate, Washington, D.C.

DEAR ROBERT: In the event that an effort is made to bring up the eight Legal Services Corporation (LSC) Board of Directors nominations which were reported by the Labor and Human Resources Committee last July. it is my intention to object to any time agreement with respect to the nominations of William Harvey and William Olson. My objections to Mr. Harvey and Mr. Olson are based primarily upon the actions they have taken with respect to the legal services program during the past year under their "recess" appointments to the Board. These actions have demonstrated a flagrant disregard for the Congressional mandate that the program be operated as an independent entity, free from political control and manipulation by the Administration. I thus believe they lack the basic qualification to serve on the LSC Board.

Regarding the other six nominees on the Senate calendar—Howard Dana, Robert Stubbs, Harold DeMoss, Clarence McKee, Annie Slaughter and William L. Earl—with respect to whom a time agreement has already been entered into, I will not request a roll call vote; however, I do intend to oppose these nominations on the basis of the process under which they have been brought

before the Senate.

As I will spell out in detail in a floor statement, I believe that the Legal Services Corporation Act and its history make it clear that the Senate is charged with the responsibility of assessing whether the nominations to the Board of Directors of this Corporation, taken as a whole, meet the statutory requirement of representativeness. I believe that the Senate cannot properly fulfill this responsibility unless the full 11-member slate is known. In 1975, nine nominations were held on the Senate calendar for several months until President Ford submitted the final two names.

I believe this precedent should have been followed with respect to these nominations.

With warm regards,

Cordially,

ALAN CRANSTON.

#### [From the Washington Post, Dec. 16, 1982] SABOTAGING LEGAL SERVICES

Even opponents of the administration's efforts to abolish the Legal Services Corporation must give the administration credit for ingenuity. The strategic attacks and counterattacks, the creative use of the recess appointment power and the bold regulatory assaults at the last minute illustrate the determination and resolve of the corporation's foes. But while these efforts have confused and frustrated backers of legal services for the poor, they have not succeeded in convincing Congress or the public that we can do without this program.

The courts have guaranteed free legal services to the indigent in criminal, but not civil cases. Until the creation of the corporation in 1974, attorneys to represent those who could not afford to pay were provided by volunteers, often through local legal aid societies. The corporation was created to supplement this fragile and fragmented system with a permanent corps of federally paid lawyers, based in neighborhoods, who could assist the poor. In some areas of the country, most notably California, the legal services lawyers went far beyond providing standard individual legal services and brought class action suits on behalf of the

poor against businesses and state and local governments. The man who was then governor of California—and feeling the brunt of much of this activity—is now president of the United States, and he wants to abolish the Legal Services Corporation altogether.

Because Congress will not go along, and stubbornly keeps appropriating money for the corporation's work, another lateral attack was devised: load up the corporation's board with those who can be counted on to subvert its work. That's what the president thought he had done, but last week be withdrew eight nominationsboard has 11 members-that have not yet been confirmed by the Senate and indicated some of them would be replaced by individuals who are even more zealous in opposition to the program. The president can make a new set of recess appointments as soon as Congress adjourns, and these people will continue to serve, even though unconfirmed by the Senate, until the next Congress adjourns. Thus, even a board that has not a single member who has been confirmed can continue to make decisions binding on the corporation.

This week, four proposed regulations will come before the current lame-duck board of directors. They would, if adopted, prohibit class actions, the most efficient and effective means of vindicating the rights of large numbers of citizens, and severely hamper the work of poverty lawyers in a number of other ways.

Perhaps it is asking too much of such an avowed foe of the Legal Services program, but the president could mend some fences with Congress and help the poor in a time when they need all the help they can get by putting an end to all this fooling around with the program. Accept the fact that Congress will not let it die, find some people who are conservatives but who see merit in it, and put them in charge. There is broad support in Congress for some changes that would clarify the rules for class actions and set guidelines for this important work. But there is also a determination to save the program, because it is truly worth saving. Killing it by bits and pieces, regulations and recess appointees just won't work. There's a real need for poverty lawyers out there in a country savaged by recession and unemployment, and all who are concerned abut the fate of those who suffer will not let the program die.

As a footnote to the above, we give you a quotation from Rep. Caldwell Butler, the Virginia Republican who is retiring this year: "It sounds like the first thing they did was put all four feet and a snout in the trough."

Mr. Butler was speaking of the administration's appointees to the Legal Services board and the consulting fees they have billed the government. Chairman-designate William Harvey, for example, has submitted \$25,028 in consulting bills for the first 11 months of this year. Overall, the 11-member board collected \$156,201 in consulting fees through November. Members are entitled, we should add, to reimbursement for expenses and consulting fees for the time they work. But previous members billed the government far, far less.

Do these men have to give the impression that they're getting rich in the process of cutting programs for the poor? (From the Washington Post, Dec. 12, 1982) More Needy Clients Face Less Legal Help (By Mary Thornton)

Every time she answers the phone, there is a new horror story: people crying and begging for food, cancer patients with no money for treatment and no place to turn, people who threaten to commit suicide and sometimes do.

"We're turning many of them away," said Elena Ackel, a legal services lawyer in Los Angeles. "We try to find private lawyers to refer them to, but there are so many. We've had to close half of our offices, and we're down to six lawyers covering 250,000 poor people. It's impossible. It's depressing, but there's nothing we can do."

Ackel is on the front lines in a battle that has raged over the future of the Legal Services Crop., the government-funded program that provides free legal assistance for the poor, since President Reagan took

office.

With a reduced budget, she and other poverty lawyers have tried to cope with steadily increasing volume of clients created by soaring unemployment and administration cut-

backs in social programs.

Reagan has twice tried to abolish the program and been rebuffed by Congress. But last year, Congress did agree to cut the budget by 25 percent of the 1980 level, to \$241 million, and it has stayed there for two

years.

Last week, Reagan withdrew his nominations to the Legal Services Crop. board of directors when the Senate sent word that it would not confirm two of the most conservative nominees. But the board, which still holds recess appointments, will meet this week to try to adopt regulations limiting the cases the program's attorneys can handle.

William F. Harvey, chairman of the board and one of the nominees the Senate said it would reject, said recently that he is satisfied with the board's work in the last year. "When I get 50 miles from Washington, I get substantial support for our board and what we've been doing . . . . We get commendations, congratulations and pleading that we stick with it "he said."

that we stick with it," he said.

During the first year of the Reagan budget cuts, the Legal Services Corp. lost 1,773 lawyers, nearly 28 percent and closed about 20 percent of local offices providing help to the poor. Although figures have not yet been tabulated, there have been further

reductions this year.

Legal services lawyers across the country say there have been dramatic reductions in the caseloads they can handle. In Indiana, for example, state director Norman Metzger says the progam is accepting only half of the number of clients it did last year. What happens to the others? "Who knows?" he said. "They're just faceless people out there. No one knows what happens to them."

Jonathan Stein, a Philadelphia legal services lawyer, says that because of cutbacks and the huge increase in the number of clients, his program is turning away all but life-or-death cases. "We have to help people who have their survival at stake. Those who would lose merely money or possessions, we can't put the resources into," he said. Perhaps most distressing to poverty law-

Perhaps most distressing to poverty lawyers has been the necessity to turn away eligible poor people who have been cut from Social Security disability rolls. An estimated 225,000 have been cut since March, 1981, and many are eligible for legal services. Some have become life-or-death cases.

Sen. Howard M. Metzenbaum (D-Ohio) has begun keeping a "death list" of persons who died of their disabilities after benefits were cut off and has documented 35 such cases. Last week, he asked the General Accounting Office to begin an investigation. Nearly a year ago, Sen. Carl Levin (D-Mich.) announced he had documented 11 suicides among persons whose benefits were cut off.

Ackel says she is urging private lawyers to take the disability cases. Of the 50 percent nationwide who appealed cutoff of their benefits, two-thirds were reinstated. But fees in such cases are not large, and most private lawyers have little or no experience in Social Security law.

"They're denying people with terminal cancer, people who obviously can never work again," Ackel said. "In those cases, it's not that they were not going to die eventually. It's that the government is making the last year or so of their lives the most horrible imaginable by not giving them enough

money to have anything to eat."
"The worst thing of all is that there's just

nothing we can say to them," she said.

Legal services law is not glamorous. Lawyers start at \$17,700 and spend virtually all of their time on the everyday problems of poor, often desperate people. They deal with evictions, divorces, child custody, family violence, disputes over bills and questions of eligibility for welfare, Social Security and other government payments. They deal only with civil cases. In criminal cases, the Supreme Court has ruled that courts must provide lawyers for poor people.

must provide lawyers for poor people.

The program dates to 1965 and President Johnson's war on poverty. It started in the Office of Economic Opportunity with the blessings of the American Bar Association, which recognized that the private bar could not donate enough time to handle the needs of the poor and that many of the nation's ablest lawyers had no experience in dealing

with problems of the poor.

The program, which tended to attract young, liberal lawyers, had its detractors. Some conservatives were enraged by successful class-action suits brought by poverty lawyers against government agencies in such areas as conditions in mental hospitals and prisons, rights of migrant workers and rights of the poor to welfare or food stamps.

Among those critics in the late 1960s was Ronald Reagan, then governor of California. The California Rural Legal Assistance program, funded by OEO, had successfully sued to extend the rights of farm workers, to restore Medicaid cuts and to protect rights of Spanish-speaking state residents.

In 1970, Reagan attempted to veto federal funding for the program in his state. The issue was handled for him by Edwin Meese III, then his executive assistant and now White House counselor. The OEO eventually overrode Reagan's veto, but Reagan and Meese remain foes of the program.

Because of that incident and later efforts by the Nixon administration to destroy the poverty law program, a bipartisan Senate group led by Walter F. Mondale, then a senator from Minnesota and later vice president, proposed a bill to insulate the program from politics. In 1974, Congress enacted the Legal Services Corp. as a semi-independent agency to provide free legal services to the poor.

For nearly the first year of his administration, Reagan ignored the Legal Services Corp. board. White House sources have said he believed Congress would approve his plans to dismantle the program and saw no need to make appointments.

When it became clear that Congress would not acquiesce, Reagan rushed last New Year's Eve weekend to take over the board before funding for 1982 went out to the 326 programs across the country. He was too late. Contracts had been settled more than a month earlier.

Critics have charged that Reagan is trying to do through the board what he could not

accomplish in Congress.

Dan J. Bradley, who resigned as president of the Legal Services Corp. board last March, said in a recent interview, "I don't think there's any doubt the Reagan administration would like to totally dismantle the legal services program and return responsibility . . . to the states. I think that has always been their plan. There's no question they're trying to do indirectly through the board what they cannot do directly through Congress."

Steven L. Engelberg, a member of the Legal Services Corp. board under President Carter, asks, "How many issues do they have where they can really deliver for the far right? They view legal services as the embodiment of left-wing activism—hard-core lefties running around organizing demonstrations and sit-ins—and it fries their ass that the government is paying them to do

Few of the appointees to the 11-member board have any experience in poverty law. Some are past enemies of the program, and several have been criticized as insensitive to

needs of the poor.

Last October, the board chose as its new president, Donald Bogard, 41, an Indianapolis lawyer. He spent most of his career in the Indiana attorney general's office and more recently served as head of litigation for Stokely-Van Camp, defending the company in suits brought by legal services lawyers for migrant farmworkers.

Harvey, an Indiana University law school professor who once taught Bogard, says he wants to see the program "substantially re-

formed."

Harvey blames legal services attorneys for the program's problems, and his main target is class-action suits. If lawyers were not bringing such suits, he has said, they would have time to attend to problems of the poor. Legal Services Corp. statistics, however, show that less than 0.2 percent of cases in recent years have been class-action suits.

Harvey accuses the lawyers of bringing class actions to engage in "ideological joyriding [to] reform society in their image. They're using the poor and class actions [to do that]." And he added that the days of the class-action suit are over. "It's done, over, not going to happen. . . ."

Metzger disagrees: "What's ironic in classaction suits is that we're alleging that government agencies are violating the law. It's no surprise they don't like us . . . but the problem is not that we file class actions. The problem is that we get gray-haired old men to agree with us. We don't decide class-

action suits. Judges do."

When the board holds its last meeting this week, Harvey will push for a regulation that would severely limit class actions. It would prohibit Legal Services Corp. involvement in any class-action suit requiring expenditure of tax money by a government agency and would require lawyers to identify and obtain consent of every person involved in the suit. That could prove difficult, for example, in a case to improve conditions in a mental hospital.

Bradley charges that by moving to limit class-action litigation, "they're trying to reduce the controversial nature of the lawsuits we've been involved in. They would like a program where poor people sue only other poor people and nobody else." But he is convinced that even though the program is going through a difficult time, Congress will not let Reagan dismantle it.

"The history of legal services since 1965 has been similar to a roller coaster ride. We've had our peaks and our valleys. It's bad now, but I'm convinced the pendulum will swing the other way... We will weather the storm," he said.

While politicians debate the future of legal services, the caseload grows, and attorneys continue to struggle for their clients.

In Pennsylvania, for example, Stein worried last week about a new policy to drop all able-bodied persons between ages 18 and 45 from the \$172-a-month general assistance program after three months. With a state unemployment rate of 12.1 percent and 100,000 people expected to be cut from the rolls last week, Stein was anticipating a new onslaught on his Philadelphia office.

"The cuts are coming at the time when people are in their greatest need," he said. "There's enormous homelessness, soup kitchens, emergency shelters. We all know they're inadequate. We have issues affecting hundreds of thousands of people when there's virtually no advocacy for them."

In Indiana, Metzger has been forced by budget cuts to shut down the Muncie office in an area where unemployment tops 20 percent. In rural areas throughout the country, offices have been closed. It may now take up to several hours to drive to the nearest legal services office, a major consideration for those without car and money.

Ackel, meanwhile, is trying to keep track of Kimberly Bailey, a middle-aged mentally ill woman who lost Social Security disability benefits in June, 1981. A former legal services attorney helped Bailey reapply but, because of the backlog of cases, she did not get a hearing until last summer. She won

but has received no money.

Ackel said she last heard that Balley was living without heat or electricity in an open wooden lean-to in the hills above Santa Barbara, not far from Reagan's Rancho del Cielo. But no one has heard from her since the recent severe weather that ravaged California's coast.

[From the Washington Post, Dec. 12, 1982] Recess Board Set to Hold Its Final Session

# (By Mary Thornton)

Last week, President Reagan withdrew all eight of his nominees as directors of the Legal Services Corp. when he received word from the Senate that two of his leading appointees would be rejected.

Reagan had formally nominated nine board members, and a Senate committee approved all but one. But the eight nominees had languished for months on the Senate calendar without action.

Meanwhile, a full board of 11 members has served for nearly a year as "recess appointees" under a little-used procedure in which the president can make appointments while Congress is out of session, allowing those nominees to serve in their full capacity throughout the next session of Congress without Senate confirmation.

That uncomfirmed board has chosen Indianapolis lawyer Donald Bogard, 41, to be president of the corporation and will meet this week to decide on proposals to limit severely the activities of legal services lawyers.

Then, except for two new recess appointees named in October, the board will cease

to exist as soon as Congress adjourns for the year, possibly at the end of this week. However, Reagan is expected to name new recess appointees, and there has been widespread speculation that William F. Harvey and William J. Olson will be renamed.

liam J. Olson will be renamed. The 11-member board consists of:

William F. Harvey, 50, chairman, one of the two men the Senate said it would reject. A law professor and former dean at the Indiana University School of Law, Harvey is a consultant to the conservative Pacific Legal Foundation, with which White House counselor Edwin Meese III was previously associated.

Harvey has been criticized by legal services advocates because of his positions against affirmative action and court-ordered busing for school desgregation. He represented parents fighting a busing plan in the Indianapolis area and has supported federal legislation limiting court jurisdiction in school desegregation cases.

school desegregation cases.

Howard H. Dana Jr., 42, a Portland,
Maine, lawyer, seen as one of the board's
moderates. Dana ran Reagan's 1980 presidential campaign in Maine and views himself as a staunch conservative, but he is the
only board member with actual legal services experience and one of the few to insist
that the board enforce the Legal Services

Act as approved by Congress.

William J. Olson, 33, of Falls Church, who headed the Reagan transition team on the Legal Services Corp. He is said to have favored abolishing legal services but has refused to release the transition team's report and would not answer questions about it in his Senate confirmation hearing. He was the other nominee who did not have the votes for Senate confirmation.

Currently a lawyer here, Olson was a White House intern under President Nixon. A former chairman of the Fairfax County Republican Committee, he is a member of the Virginia Republican Central Committee and was coordinator of the Fairfax County Reagan/Bush campaign.

George E. Paras, 58, of Sacramento, the only formal nominee not approved by the Senate committee and labeled a "14-carat bigot" by Sen. Thomas F. Eagleton (D-Mo.) during his confirmation hearing.

The controversy arose over a letter Paras sent last year to Cruz Reynoso, first Hispanic judge nominated to the California Supreme Court. It said: "Your problem is that you feel it your obligation to be a professional Mexican rather than a lawyer. Thus you must remain true to the ideals consistently tossed about by leaders of the so-called Mexican movement.

"You must ever champion the 'oppressed,' meaning those who so designate themselves, such as criminals, handicapped, welfare recipients, demonstrators, 'minorities' and miscellaneous other have-nots," he wrote.

Paras later clarified the letter: "There are such things as professional blacks, professional Greeks, professional Dagos, professional Jews, people who put their ethnic origin ahead of everything else. That's what I meant."

Paras, who practices business law in Sacramento, served as a judge from 1969 to 1981 in Sacramento County Superior Court and then a state appeals court. He was appointed to both positions by Reagan, then California governor.

California governor.

He resigned from the bench in 1981, angry about liberal opinions of the California Supreme Court, which he charged "rules our state like a little junta."

Annie L. Slaughter, 57, of St. Louis, who heads operations for the Annie Malone

Children's Home there and has been active in programs to aid victims of crime. Viewed as a moderate, she is the only woman on the board and one of two blacks.

Clarence V. McKee, 40, a lawyer here who specializes in communications and was finance chairman of Reagan's campaign here. He headed the Reagan transition team on the Federal Home Loan Bank Board and says he advised Attorney General William French Smith on civil rights and affirmative action issues during the transition.

McKee, the board's other black member, worked in a local legal services program one summer while he attended Howard University Law School. Asked in a questionnaire whether he favors continuation of the program, McKee said, "I will have to look at the [Legal Services] Act and see what's going on."

Robert S. Stubbs II, 60, of Waleska, Ga., executive assistant attorney general of Georgia who has directed the state's defense against many legal services lawsuits, including one on conditions in Georgia state prisons. A former law professor at Emory University in Georgia, his only involvement in legal services was in the 1965-66 school year as a faculty supervisor of the Emory Legal Services Center. He is a Democrat.

William L. Earl, 39, a Miami lawyer. Although formally nominated to the board, he was not a recess appointee and has not participated in board actions.

David E. Satterfield III, 62, who holds the recess appointment for Earl's position on the board and represented the Richmond congressional district as a Democrat for 16 years until he retired in 1980. In Congress, he opposed the establishment of the Legal Services Corp. in 1974 and voted in favor of legislation to restrict or abolish the program.

Harold R. DeMoss Jr., 51, of Houston, a practicing lawyer who worked 10 years in admiralty law and now concentrates on law involving real estate and oil and gas issues.

Asked in a questionnaire about his legal services experience, he said, "I'm registered with the Houston Legal Foundation's probono referral program but have not been referred any cases, I guess, because my areas of specialty are not ones that are often needed by poor persons."

Frank Donatelli, 33, a lawyer here and a former official of Young Americans for Freedom and the National Conservative Politicial Action Committee. Donatelli, a recess appointee not formally nominated, was a regional political director in Reagan's 1980 campaign.

Dan Rathbun, 23, also a recess appointee, is a full-time undergraduate at Christendom College, a 95-student religious college in Front Royal. Reagan named Rathbun to one of the board positions reserved for poor persons eligible for free legal assistance.

The White House justified the appointment by saying Rathbun had declared financial independence from his parents. But Rathbun's parents told the St. Louis Post Dispatch that they had claimed him as a tax deduction last year.

#### SELECTIVE SERVICE REGISTRATION

Mr. HAYAKAWA. Mr. President, the November 15 California U.S. District Court decision to throw-out the selective service draft registration law irresponsibility and needlessly questions a law essential to this Nation's security and defense. U.S. District Court Judge Terry J. Hatter Jr.'s ruling on the Wayte case has further confused America's law abiding and conscientious citizens. It is no wonder that the registration requirement is not being taken seriously. The executive and judicial branches can't seem to make up their minds whether or not they should require men to register.

That men between the ages of 18 and 21 feel no strong compulsion to comply, or simply reject registration altogether, is partly a result of arbitrary decisions such as this one. Unlawful behavior is now being endorsed by the Federal courts—a U.S. district court has given its approval to break the law! Inconsistent actions such as this encourage lawbreakers, make a mockery of the entire registration requirement and seriously jeopardize the defense readiness of this Nation.

Because this travesty of justice has already done great damage, it is essential that the appellate courts act justly and expeditiously to put an end to this new upsurge of uncertainty about the selective service registration law. It is imperative that the Government clearly shows the public that registration is

extremely important.

Thus far 13 men have been indicted for refusing to register with the Selective Service System, six have been prosecuted and four of the six convicted. The judges hearing these cases addressed the same arguments, found them deficient, and convicted these men who publicly scoffed at the law. It was ruled that the program proceeded in a proper manner.

Congress time and time again has shown its strong support for the registration law. I hope the courts will carry out their responsibility to prosecute those who consciously and willfully violate this vital law.

Unfortunately far too many young Americans need to be reminded of their obligation to register. Thus it has become this Government's responsibility to coordinate their actions and stop thwarting the primary objective—compliance with the law.

A most insightful article appeared in the November 17, edition of the Washington Post—"Selective Registration." This article rightly questions the Federal Government's wishy washy history on the registration law. It's time we all got together on this vital issue.

I ask unanimous consent that this article be printed in the Congression-

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Wednesday, Nov. 17, 1982]

SELECTIVE REGISTRATION

Sometimes statistics point straight to what is in people's minds. Such a statistic is

this: 400,000 of the 9 million young Americans required by a 1980 law to register for the draft have not done so. Consider how improbable that would have seemed 20 years ago, before Vietnam, in an America as close in time to D-Day as we are today to the Gulf of Tonkin resolution. Then, it was taken for granted that society had a legitimate right to conscript young men and that the armed forces had a legitimate use for their services. Today, apparently, these things are no longer taken for granted—at least by large numbers of the group of Americans most directly affected, young men age 18 to 21.

One reason is that our highest officials themselves have been hesitant in defining and enforcing society's interest. The draft registration law was passed at the urging of President Carter, as one response (the now defunct grain embargo was another) to the Soviet invasion of Afghanistan, Candidate Ronald Reagan in 1980 attacked the law as immoral, and President Reagan in 1981 said he would not enforce it. Only this year did the administration change its mind and announce that it would prosecute violators, beginning, appropriately, with those who proclaimed their defiance. In the circumstances, one can understand why many young men might conclude that the registration requirement was anything but urgent—a vast change from 20 years ago when it was unheard of for a young man not to register.

Another reason for the change in attitudes is, of course, Vietnam. One of the most affecting things about last week's Vietnam veterans' march was the fact that it was one of the first celebrations of those who heeded their government's call and served. For many American, the heroes of Vietnam are those who refused to serve, those who protested rather than those who complied. Many young men born between 1960 and 1964—those who are supposed to register now—must have drawn the lesson from recent history than it is honorable not to obey but to protest.

They may draw another lesson that without the existence of large conscript armies you will not have wars. This is not the only lesson that one can draw from history, but each generation inevitably draws lessons mostly from what it has seen firsthand. If Mr. Reagan and others, who remember how lack of vigilance can also lead to war, want young men to understnd that, they are going to have to take the trouble to educate them more than they have.

In the short run, that means continuing prosecutions under the draft registration law, not only of whose who have proclaimed their violations. but also, as the administration is beginning to do, going after the many others who have not. The draft registration law cannot achieve its full purpose-demonstrating resolve to potential aggressors-if it is not enforced and if hundreds of thousands continue to ignore it. The decision by a Los Angeles judge Monday that the law is invalid and that the government has used invalid selective prosecution to enforece it shold be appealed and wil likely be speedily overturned. The law is clearly constitutional and the First Amendment protects the right to protest, but not the right to violate, a

Beyond that, our leaders have a more important duty. If society is to assert a claim to young men's services—even through as unintrusive a means as a requirement to register— it needs to make plain to them why that claim is legitimate.

#### **IMMIGRATION IGNORANCE**

Mr. HAYAKAWA. Mr. President, I have spoken out repeatedly on the floor of the Senate about the need for an agricultural guest worker program. I rise again to enlighten my colleagues on this western problem of tremendous proportions. The fact that the problem of which I speak is unique to our Western States makes it extremely difficult to garner the attention of my fellow Senators. I am very frustrated, Mr. President, that this body has displayed a geographic and cultural bias which tarnishes our commitment to the Nation as a whole.

This body's fundamental indifference toward labor intensive agriculture, and particularly western agriculture, is a disgrace. The truest display of the mindset of the Senate was displayed last August when we passed the Immigration Reform and Control Act of 1982.

This bill is completely insensitive to the needs of western agriculture. It is cruel and punitive in its treatment of our neighbors to the south-the people of Mexico. I attempted to address these problems but my amendment to provide an agricultural guest worker program was defeated on a 16to-83 vote. Yes, Mr. President, I am being a sore looser. And I am still mad, damn mad, at the failure of the Senate to look beyond the rhetoric that so naively proclaims we must "get control of our borders." The Immigration Reform and Control Act of 1982 will do no such thing. It is a blind stab, an angry gesture of frustration, at a most complicated and emotional problem. If anything, I feel the bill will increase the amount of illegal immigration because of the fear outside of our borders that something might really change. As the Mexican economy teeters on collapse, the economic necessity for Mexican agricultural workers to migrate to the fields of California is increasing. We cannot turn our backs on the nation, or the people who live to the south of us.

If the proponents of "getting control" of our borders are serious, they have only one choice: militerize our borders. Build a 12 foot wall with electrified barbed wire, complete with 10,000 Marines carrying machine guns and you will "get control." Short of that, we have the option of dealing realistically with the migratory flow of workers a cross our border with Mexico. We must be generous, and we must be humane in our treatment of the Mexican people. If we wish to bring order to our immigration poli-

cies, if we wish to harmonize our relationship with the people of Mexico, then we need to legalize and regularize the flow of temporary agricultural workers into and out of our nation. We need to establish a program that is simple, free from the burdensome redtape which now stangles the H-2 temporary workers program. Obviously, agricultural employers would benefit from such a program, but I feel most strongly that we would be doing a tremendous service to the Mexican workers. We would elevate them to a legal status and be able to protest them under our fair wage, hour, and working condition laws. We could see that these migrants are protected and treated with the respect they deserve.

Many of my colleagues will argue that alien workers displace domestics and elevate our unemployment level. While this may be true in some urban labor markets it is not true in agricultural areas. It is far from the truth Mr. President. Farmers in California, Arizona, Oregon, Washington, Idaho, and Texas would go out of business in hordes if they were deprived of the 500,000 temporary alien workers they rely on annually. I use 500,000 but I think the number is very, very conservative-it could be up to 1 million. In the Central Valley of California, we have a number of rural communities with a 15 percent unemployment level, yet last summer farm jobs went begging. Domestic workers were too comfortable living off the fat of the public dole. The simple fact is that American workers will not meet the demands of labor-intensive agriculture, at the same time 50 percent of the work force was made up of so-called illegal aliens. I think this represents an interesting picture in darwinistic terms.

The Senate was told that the H-2 temporary worker program and the amnesty provisions of the bill were designed to meet the needs of agricultural employers. That is totally false. The H-2 program is a relic of the mentality which brought us the Bracero program. It is inhumane, in that it gives the worker the same freedom as a slave-none. It is a paperwork nightmare for the employer, and unnecessarily expensive. I will admit the H-2 program does have a place in the East, say in the sugarcane fields of Florida, where the work is so difficutl that a form of bondage is the only way a work force can be maintained. We in the West have progressive farming, and very competitive wages, for example the minimum wage in the vegetable fields of the Salinas Valley starts at over \$6 per hour.

If we had taken the path which I proposed, we would have achieved the objective of bringing order to our immigration policies and at the same time we would have eliminated the regrettable situation of having a huge illegal population within our borders. I

trust the Immigration Reform and Control Act of 1982 will fail and the 98th Congress will have a responsibility to address the needs of the Mexican workers and western farmers in a more humane, and sensible manner. I plead with you to take the time to understand the cultural and economic situation of the Mexican worker. To get a clearer picture of the farmers perspective, I ask unanimous consent that an outline I prepared for the Judiciary Committee be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEMORANDUM

To: Senate Judiciary Committee From: S. I. Hayakawa Re: Immigration Law Reform

I. PROBLEMS WITH S. 2222 (SIMPSON) THE WESTERN PERSPECTIVE

1. The measure fails to meet the labor market needs of Western agriculture.

A. Farmers in the West currently rely on illegal aliens to make up in excess of 50 per-

cent of their work force.

B. Western agriculture has legitimately grown to rely on the services of alien workers. At the same time they have been unable to attract domestic workers to do farm work, primarily for two reasons; (1) The work is hard and the pay relatively low, especially when compared to income from welfare, food stamps, et cetera, and; (2) The seasonal demand for large numbers of workers is highly variable, job tenure brief, and potential for advancement minimal within the realm agricultural employment.

2. S. 2222 is based on the belief that the legalization (amnesty) provision and the H-2, temporary worker program will satisfy those employers who currently rely on illegal aliens to make up their work force.

A. Legalization will only take care of urban illegals who are employed year-round and have been in the United States continually.

B. Legalization may be of temporary benefit to agriculture but:

 Once legalized, rural workers will migrate to cities where year-round employment is available.

2. Most of the illegals working in agriculture are migrants. They come to the United States for only a few months out of the year, thus, they will not qualify for permanent resident status. More significantly, they have little or no desire to stay in the United States, their hearts, their families and their allegiance remain in Mexico.

3. The H-2, temporary worker porgram has been available for several years but has been of little help to agriculture.

A. H-2 has brought in only about 13,000 agricultural workers a year, the bulk of which have gone to the sugar cane fields of Florida and the apple groves of New York.

B. Simply in terms of complying with the Department of Labor rules and regulations, the program has been very expensive to deal with . . . a red tape nightmare . . . a lawyers dream.

4. The H-2 program simply cannot be transferred to the West.

A. Western farmers demand large nubmers of workers for relatively short periods of time. The workers must have the freedom to move from employer to employer, from crop to crop, and from country to country. Problem: H-2 workers are contracted to work with a single employer (or association of employers) and transferring H-2 workers between employers is cumbersome. The lack of freedom for workers is not only impractical, it is abusive of their basic rights and of their dignity.

B. It is difficult to predict actual dates of need and numbers of workers required because of weather and market variability. The long leadtime required for the application process is onerous. And the requirement that workers be guaranteed pay for three-quarters of the contract period is a tremendous liablity for farmers.

C. The short harvest season for many of the labor intensive, highly perishable crops grown in the West results in employers demanding large numbers of workers for short periods of time (less than 1 month). Such brief employment makes the requirements that employers provide transportation from the country of origin, housing and food impossible to justify.

D. The certification process which requires a finding that there are insufficient numbers of domstic workers available and willing to work is complicated, costly and time consuming. In addition, the institutional bias of the Department of Labor is difficult to deal with.

E. The adverse wage effect considerations of the H-2 program will artifically drive up the prevailiong wages in farm communities.

5. The employer sanctions for hiring ille-

gal aliens are unacceptable.

A. Given the tremendous reliance of farmers on illegal aliens and lacking a workable program to bring alien workers into the country on a temporary basis—we must oppose sanctions. They will punish farmers for something which is beyond their control. Realistically, without an ample supply of alien workers, farmers will have no choice but to hire whomever is available. The alternative of allowing their crops to go unharvested is unthinkable.

6. The push factors which compel Mexican workers northward cannot be legislated away. The bill is based on the faulty assumption that by taking away the opportunity to work, the flow of illegals will be stopped.

A. There are major structural problems with the Mexican economy. 45 to 55 percent of the working age population is unemployed or underemployed. The recent 40-percent devaluation of the Peso makes dollar earnings more attractive than ever.

B. The population of Mexico is over 70 million and will double by the year 2000. The working age population is growing at 600,000 to 800,000 a year and, at best, only about 450,000 new jobs are likely to be created each year?

C. Given the above considerations, Mexican Nationals will have no choice but to come to the United States in search of jobs, jobs which will pay them up to ten times the amount they would earn at home for the same work.

D. S. 2222 will simply drive them further underground; false identifiers will abound and illegal aliens will continue to be a subclass within our society.

7. One of the driving assumptions of the bill is that the H-2 program is transitory and ultimately we must end our dependence on alien workers.

A. This assumption is faulty. We will rely on alien workers as long as we have such generous relief programs for those people who would most likely take the low paying, low status jobs that aliens most often take. The incentives to not work are simply too great and the alternative, hard work, is undesirable.

B. Not only will aliens do work for which it is near impossible to get domestic workers . they are harder workers and more reliable. This is simply because their motivation to work comes from their desire to earn money to support their families back home. While the motivation of many domestics is to show up for work in order to satisfy welfare requirements.

C. Demographers tell us that there will be a labor shortage in the Southwest by the year 2000. Especially in the "undesirable," physically demanding, manual occupations.

II. WHAT SHOULD BE DONE TO IMPROVE S. 2222 (SIMPSON)

1. An agricultural guest worker component

must be added to the bill. A. Western agriculture needs a relatively free flowing, flexible labor supply.

B. The current labor supply system works well, is efficient and is mutually agreeable to both employers and employees. However, the current system is illegal.

C. We need to legalize, regularize and direct, to a limited extent, the flow of temporary workers into and out of our country.

D. Farmers have adequately demonstrated that the domestic workforce is unwilling to perform, and meet the needs of the agricul-tural employers. Thus, the guest workers will not displace domestics.

The SIH proposal has a provision for excluding guest workers from a given worksite if it can be demonstrated that domestics are being displaced.

F. An agricultural guest worker proposal is comparable with the H-2 program. H-2 will continue to be of importance to the east

G. The authorization for guest workers to seek employment only in agriculture, combined with employer sanctions, should keep the temporary workers from moving into cities and competing with unemployed domestics.

# WELFARE PROGRAMS

Mr. HAYAKAWA. Mr. President, as many of my colleagues have observed, expenditures on welfare programs have spiraled over the past two decades. This increase has traditionally distressed hard-working taxpayers across the Nation. However, with the country facing a trillion dollar debt, there is no better time for us to reexamine the issues surrounding income support programs.

One of the principal causes of the unprecedented growth in such programs is the inherent work disincentive created by guaranteed incomes. Government programs which provide a living to unemployed persons tend to foster a permanent dependency on such programs. The great irony is that, although they are designed to aid the poor, welfare programs in the long run may actually lower the standard of living for many by discouraging them from entering the labor market. Only as participants in this market can persons obtain the experience and self-esteem necessary to lift themselves out of poverty.

For this reason, it is imperative that

Congress make work-and work re-

quirements, a stonger component of welfare programs. Fortunately, the approved outgoing Congress has moves in this direction, including my own legislation authorizing pilot programs designed to determine the effects of removing the long-term voluntarily unemployed for the food stamp program. Furthermore, Congress has given States the option of implementing workfare as a component of this program.

One of my regrets about leaving the Senate is that I will no longer be able to contribute to efforts aimed at making workfare a required part of the food stamp program. However, as this issue is likely to resurface in the next Congress, I would like to take this opportunity to submit for the RECORD, the following summary and analysis of workfare.

#### WHAT IS WORKFARE?

The term "workfare" is used to describe programs in which employable recipients of public assistance are required to perform public service jobs without pay. Its basic objective is to promote financial independence by allowing persons to maintain the self-respect obtained from being a productive member of society while developing the work habits necessary to appeal to private employers. Because it is a most effective way of offsetting problems associated with the work disincentive inherent in guaranteed income programs, workfare is a crucial element for insuring that programs such as food stamps do not become a trap for its employable recipients.

Although the specific criteria applied in administering workfare may vary, the basic structure is generally consistent. The number of hours a participant must work is determined by taking the grant and dividing it by a predetermined hourly wage, usually the minimum wage. The number of hours worked a week, however, is restricted by an upper limit allowing individuals time to actively engage in job search. Those failing to meet their assigned work requirements are terminated from the rolls.

State and local governments have been able to require workfare for the food stamp program for just over a month now, since November 8, 1982. The availability of this option was made possible through the Food Stamp and Commodity Distribution Amendments of 1981. Certain refinements to this law were made in the

#### Food Stamp Act Amendments of 1982. THE PILOT PROJECTS

Before Congress decided to give State and local jurisdictions the option of requiring workfare, the concept was tested in a number of pilot projects. The demonstration has been conducted in two phases, beginning in 1979. By 1981, there were 14 projects in full operation.

While the record of these projects is mixed, careful analysis indicates that workfare can and will succeed in achieving the goals for which it is designed. Numerous recommendations were made by workfare pilot project jurisdictions and the general accounting Office which monitored the demonstration projects. Many of these recommendations influenced the legislation adopted by Congress when the program was made an option in 1981 and again when changes were made in 1982.

Thus, problems which have impeded the success of workfare have been attended to. For example, the number of maximum weekly workfare hours has been increased to 30 hours while retaining the 30-hour maximum when combined with other employment. This change eliminated an inequity which gave more lenient treatment to those who were employed.

Penalties for noncompliance under the demonstration projects proved bo be too weak to serve as sufficient deterrent. Sanctions now stipulate that for rule infraction a 2-month denial of food stamps for the entire household would result, as opposed to the previous 1-month sanction for the delinquent individual.

During the projects, participating jurisdictions were required to give new referrals a 30-day search period before they would be assigned to workfare jobs. As a result, new referrals automatically avoided workfare participation for at least 30 days. To address this problem, Congress eliminated the mandatory "grace period," making it optional for the agency operating the workfare program.

Furthermore, the 1982 legislative requires the Secretary to establish the regulations which will enable a State or local government to operate a workfare program which is compatible and consistent with similar workfare programs operated by the jurisdiction. Specifically, the governments can "piggyback" their food stamp workfare into the operation of AFDC pro-

It also became apparent that local jurisdictions needed to receive some kind of Federal reimbursement for the associated administrative expenses. The 1982 legislation provides that 50 percent of the money saved-from reduced food stamp allotments of discontinued participation in the program-will be made available to the operating agency to help defray the remaining administrative costs of workfare. This will boost incentive on the part of the local and State jurisdictions to administer successful workfare programs.

#### WHY AMERICA NEEDS WORKFARE AS PART OF THE FOOD STAMP PROGRAM

Within the last 10 years, food stamp costs have skyrocketed from \$2.1 billion to \$11.3 billion annually. Nearly 1 American in 10—or 22 million people—receive food stamps each month. Compounding the problem, according to verified USDA information, is the estimate that at least 10.5 percent of all food stamp benefits are overissued. By this estimate, over \$1 billion was lost last year to fraud or error.

After serving 6 years on the Senate Agriculture Committee, I feel I have come to understand the food stamp program fairly well. During this period, I have come to believe that the program would greatly benefit from mandatory national workfare.

The concept of workfare is based on the assumption that there are people in this country who are voluntarily unemployed. There are some who have questioned this assumption, and this is understandable. We like to believe that the work ethic overrides all, that an unemployed American will take any job he or she can find. But, unfortunately, this is not the case.

A study published in the Federal Reserve Bank of Richmond's Economic Review looked at the long-term unemployed in Baltimore-people unemployed for 6 months or more. The study found that "almost half-43.4 percent—of those surveyed acknowledged that they would not accept some of the jobs av:llable to them." In fact, 35 percent of the respondents thought that they could get a job, but would not want it because it either 'paid too little, was menial, was too demanding physically, or was simply not of the respondent's liking." The study concludes that the responses "indicated that a number of unemployed workers could get some sort of job, yet chose instead to remain unemployed."

All too often people turn down lowpaying jobs because it makes more sense financially to be on assistance. I recently had the food stamp division of the California Department of Social Services conduct a study for me, and the results show that it makes more sense for the parent of a four-person household receiving public assistance to stay at home rather than work a minimum wage job full time.

In this study of an average welfare household, the unemployed parent is eligible to receive monthly, \$601 in AFDC, aid to families with dependent children, and \$90 in food stamps for a total net monthly income of \$691. And this figure does not even consider any housing assistance or medical benefits for which the family would be eligible.

However, if this parent worked a minimum wage job 40 hours a week, then his or her gross pay would be \$589 per month. The expenses a working parent would incur according to the Department of social services would result in costs of at least \$24 a month for transportation, \$54 a

lion to \$11.3 billion annually. Nearly 1 month for withholding taxes, and \$195 American in 10—or 22 million people— for day care for the children.

After these expenses are tallied, the parent is left with \$316. But then we must add his or her allotments of government assistance. AFDC would come out to be \$87 a month, and food stamps would be \$122 a month. This would leave the household of a working parent with a net income of \$525 a month, which is \$166 less than the net income for the household with an unemployed parent. Even if the working parent did not incur any child care expenses, there would still only be \$29 a month incentive for the parent to go to work.

When it makes more sense to sit at honme than work a low-paying job, it is easy for a person to become dependent on public assistance. Even more disconcerting, it encourages the unemployed person who is searching for a job to abandon the honest effort and join the ranks of the voluntarily unemployed. Restoring incentives to work for even low-paying jobs instead of welfare can begin with a workfare

program. However, some people contend that the administrative costs associated with workfare make it an inefficient addition to the food stamp program. Such persons point to the high program costs reported by some of the pilot projects. Yet, there is reason to believe that costs for an ongoing program would be less than those of such pilot projects. It is from these projects that we have learned how to make workfare more efficient, and with this in mind, a number of changes were made in the program when it was made an option in 1981, and afain when it was reviewed earlier this year. In addition, the cost problem will mitigate as administrators gain more experience in implementing the program.

There are those who say that workfare programs are simply administratively unfeasible, suggesting that State and local jurisdictions would not cooperate. This argument is based on the assumptions that localities would not be provided with sufficient Federal funds to operate workfare, would balk at taking on the additional administrative workload and would lose continuity because of high staff turnovers.

Increased Federal reimbursement will help address this by supporting the costs of operation. In addition, Congress should give States more of a financial stake in food stamps, providing them with the incentive to run a tighter program. Running a tighter food stamp program naturally leads to the implementation of an efficient workfare program.

Some opponents of workfare fault the requirement for not involving job training. The work created by the projects, such persons complain is merely "busy work" which is of no value to the recipient. However, pilot projects which have considered a recipient's educational or occupational background reported greater success with their projects, including improved receptivity by workfare participants. For example, San Diego county, which had the largest workfare pilot program, placed a librarian in the local department of human services where she updated the library, and an economist in a position with the county government utilizing his skills. A participant with a clerical background reorganized the files for the Department of General Services.

Even if recipients are placed in jobs with no relation to their educational or professional backgrounds, the work is beneficial to them. The required service to the community keeps them in the habit of working regularly, and also enables them to maintain the self-esteem gained from being a productive member of society.

And the work is especially beneficial to those who have never been employed. Through the required workfare assingnments, recipients become aquainted with a work environment. They learn how to keep regular hours, how to relate to fellow workers and how to deal with supervisors. Workfare will provide its recipients with the opportunity to improve their skills and gain self-confidence, making them more marketable. In this way workfare can open doors to opportunities which would be unavailable to those who never work and simply live off of government assistance.

Some persons fault workfare for producing work which is of no measurable benefit to the community. While it is difficult to measure the value of the services produced in assigned workfare jobs, the work does create tangible benefits in the end product. This is work that in all probability would not have been attended to in light of the fiscal constraints under which most communities find themsevles. And it does not make much sense that a community which undertakes implementing a workfare program would not want to develop work programs aimed at making their efforts worthwhile.

It appears as though we talk about food stamps every year. The reason for this, I imagine, is because the progam is one of the most unpopular of all Federal programs. Its unpopularity stems from the high visibility of the programs and its abuses. One of the things which outrages people most is seeing benefits provided to the voluntarily unemployed.

There are millions and millions of Americans out there who work hard to make their paychecks stretch through the end of the month and are outraged because we spend their money to support people who don't want to work. They are tired, simply tired of seeing their hard earned money wasted.

By implementing workfare, however, we can calm this outrage. We can put an end to the voluntarily nonworking, able-bodied food stemp recipient, thus solving a priblem which has plagued this program for years. Workfare will make the food stamp programs stronger and less susceptible to attacks from the public. It will insure the integrity of the program, and allow it to continue to deliver benefits to those who really need them.

The thing to remember about workfare, however, is that it has been proven to operate to the benefit of both recipients and the community. This can best be illustrated by my State's experience with the program. San Diego ran the largest of the original workfare pilot projects. As part of this project, over 500 able-bodied food stamp recipients worked each month for their benefits. An almost equal number were removed each month from the food stamp rolls as a result of their refusal to work. San Diego agencies participating in workfare during 1981 received the equivalent of \$349,756 in free labor. In addition, the penalties applied in San Diego for refusal to work saved the Federal Government \$253,499 in food stamp bene-

It was discovered that workfare does deter people who are able to work in return for food stamps but choose not to. The number of nonassistance food stamp households in San Diego County decreased from 20,166 in December 1980, to 17,498 in November 1981, a decrease of about 13 percent.

Mr. President, mandating workfare as a component of the food stamp program would be a most progressive move on the part of Congress. By requiring that able-bodied recipients work for their benefits, we could reduce Government expenditures. At the same time, we could help recipients to either maintain their work habits, or experience the working world for the first time. We could provide labor to fiscally strapped communities and can assure the public that we do not intend to use their money to subsidize able-bodied persons who do not want to work. Mandating workfare would indeed be a bold step, but, in effect, it would help both the program and its recipients. It is an action I hope this body takes in the next Congress.

### SPECIAL PERSONS

Mr. GLENN. Mr. President, the special plight of learning disabled children and adults is only recently receiving the widespread recognition it deserves. There are millions of bright, capable people in this Nation whose lives have been complicated by difficulties in school.

"Learning disabled" students can and do learn, but the way they learn is different from the majority.

One school for learning disabled students has done a great deal to bring about public understanding that these students have unlimited potential. That school is the Lab School of Washington, here in the Nation's capital. It has set standards of quality education for children with "the hidden handicap."

Colman McCarthy, a widely syndicated columnist, has written an admirable and sensitive article about the Lab School

I was particularly drawn to this article, Mr. President, not only because it reflects so favorably on Mrs. Ann Mathias, wife of our friend and distinguished colleague Mac Mathias, the senior Senator from Maryland, but also because her forthright and courageous approach to this problem can be an example which will encourage many others to approach their own difficulties in a similar manner. Ann deserves much credit for the leadership role she has assumed with the Lab School, as does Sally Smith, founder of the school. As Colman McCarthy says, Ann's sharing of her thoughts "is a generous Christmas gift we can all share."

Since at least 2 million American children and untold numbers of adults have learning disabilities, I ask unanimous consent that this article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Philadelphia Inquirer, Dec. 14, 1982]

#### A Special Person Tells of a Handicap (By Colman McCarthy)

Washington.—Every Christmas, the boy put in requests to his father for toys that made noise, went fast and roused parental cringes. The father—a writer, a man of reflection and content to live in the slow lane—shudders when telling about the call one year for the Zenithal in sound and speed a Honda motorcycle.

speed, a Honda motorcycle.

This Christmas is different. The son, now 18 and a junior in high school, has asked for

a typewriter, a tool of the mind.

He'll get it. For the father, the typewriter symbolizes the gifts of love, patience and confidence that he has been offering his son all along. The boy has what is called "the hidden handicap," a learning disability. His wanting a typewriter, to be used for school assignments, is being taken by his father as a message: Thanks for keeping faith in me.

This Christmas story is best understood by the families of other learning-disabled citizens. But with researchers and teachers continuing to broaden the field of study that begun only 15 years ago, the handicap still needs to be better understood by more than the specialists. The learning disabled—in numbers ranging from three million children to a possible 10 million—live among all of us, and our obligation is not to be self-disabled in learning about them.

Few are better teachers, both in her classroom and in the national forum, than Prof. Sally Smith, who runs the learning disabilities program at American University and who founded and directs the Lab School in Washington. Smith, who believes that uncounted millions of adults are also learning disabled, says that at least a few children in every classroom have the handicap. In every classroom, too, it is likely that a few well-meaning theories on "curing" the handicap are floating about.

In "No Easy Answers: the Learning Disabled Child at Home and at School" (Bantam Books), Smith writes that sudden cures shouldn't be sought. Instead, "each teacher must be a detective of sorts to determine how each child learns best, what modalities or channels of learning are a child's strongest ones, what interests can be built on, what specific disabilities are there to remediate."

In reading Smith's gripping book, and spending time with her the other afternoon, I came to feel that she is the Maria Montessori of our day. Her idea of matching the method to the child is like Montessori's call that a school be "a pleasant environment where the children felt no restraint." Also like Montessori, Smith has been successful in her theories of education. In 16 years of teaching several thousand children, all but one have graduated from high school and most have gone on to college.

The learning disabled, whose symptoms include lack of concentration, poor speech, reading problems, clumsiness, immaturity and left-right confusion, have a history of going on to higher things. Their ranks have included Einstein, Nelson Rockefeller, George Patton, Amy Lowell and Yeats. But none has succeeded without wise teachers or without parents—though pained by seeing their children pained—who refuse to become defeatists.

At a gathering last week of friends of the Lab School, one of those parents, Ann Bradford Mathias, rose to share the fact that she herself, in her mid-50's, is learning disabled. "I was one of those classrooms statistics, one of those intelligent children who could not learn—or as I prefer to put it, one of those intelligent children who learned differently. A heavy dash of New England contrariness and a little bit of luck and a lot of patience on the part of others are the ingredients I suspect that enabled me to survive in a world that then, as now, measured success by how well one did in school . . .

"I did graduate from school, eventually, though it took longer than considered normal. I did astound my parents and every teacher who had known me when I was finally accepted by one of the Seven Sisters (Vassar College) as a risk... But this success was not without its tribulations. And it is because of this tribulation that I say I wish there had been a Lab School in my life, for I would have been helped to discover sooner the giddy excitement of academic accomplishment."

Ann Mathias, chairman and president of the board of trustees at the Lab School, is married to Maryland's senior U.S. senator. She rarely speaks this personally in public about her learning disability. That she did now is a generous Christmas gift we can all share.

### ROUTINE MORNING BUSINESS

(During the day routine business was transacted and additional statements were submitted, as follows:)

#### MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

#### EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate a message from the President of the United States submitting a nomination which was referred to the Committee on the Judiciary.

(The nomination received today is printed at the end of the Senate pro-

ceedings.)

#### BUDGET RESCISSION AND DE-FERRALS—MESSAGE FROM THE PRESIDENT—PM 202

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred, pursuant to the order of January 30, 1975, jointly to the Committee on the Budget, the Committee on Appropriations, the Committee on Commerce, Science, and Transportation, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Energy and Natural Resources, and the Committee on the Judiciary:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report a proposal to rescind \$2,000,000 in budget authority previously provided by the Congress. In addition, I am reporting two new deferrals totaling \$18,464,000 and a revision to a previously reported deferral, increasing the amount deferred by \$4,408,812.

The rescission proposal is for the Department of Commerce's National Oceanic and Atmospheric Administration. The deferrals affect programs in the Departments of Agriculture and Justice and the Pennsylvania Avenue

Development Corporation.

The details of the rescission proposal and deferrals are contained in the attached reports.

RONALD REAGAN.
THE WHITE HOUSE, December 16, 1982.

REPORT ON THE 1981 OPER-ATION OF THE AUTOMOTIVE PRODUCTS TRADE ACT-MES-SAGE FROM THE PRESIDENT-PM 203

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Finance:

To the Congress of the United States:

In accordance with the Automotive Products Trade Act of 1965 (Public Law 89-283), I transmit herewith the sixteenth annual report relating to developments during 1981.

RONALD REAGAN.
THE WHITE HOUSE, December 16, 1982.

#### MESSAGES FROM THE HOUSE

At 12:52 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5133. An act to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes.

#### ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

H.R. 6758. An act to authorize the sale of defense articles to United States companies for incorporation into end items to be sold to friendly foreign countries.

The enrolled bill was subsequently signed by the President pro tempore (Mr. Thurmond).

#### ENROLLED BILL SIGNED

At 2:12 p.m., a message from the House of Representatives delivered by Ms. Goetz, announced that the Speaker has signed the following enrolled bill:

H.R. 3942. An act to amend the Commercial Fisheries Research and Development Act of 1964.

The enrolled bill was subsequently signed by the President pro tempore (Mr. Thurmond).

At 4:37 p.m., a message from the House of Representatives, delivered by Ms. Goetz, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5447) to extend the Commodity Exchange Act, and for other purposes.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5002. An act to improve fishery conservation and management.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 435. Concurrent resolution correcting the enrollment of H.R. 5447.

At 7:45 p.m., a message from the House of Representatives, delivered by Ms. Goetz, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7019) making appropriations for the Depart-

ment of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 16, 18, 28, 55, 69, 77, 91, and 92, and agrees thereto; and it recedes from its disagreement to the amendments of the Senate numbered 2, 6, 11, 15, 17, 43, 45, 46, 47, 53, 56, 59, 66, 72, 93, 96, 97, 98, and 101, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 1965. An act to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately six thousand eight hundred and eighty-eight acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area", as a component of the National Wilderness Preservation System.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3191. An act to amend the Internal Revenue Code of 1954 to exempt conventions, et cetera, held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions.

At 12:40 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to the amendment of the Senate to the bill (H.R. 6458) to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes, with an amendment, in which it requests the concurrence of the Senate.

### ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

S. 816. An act to amend the Clayton Act to modify the amount of damages payable to foreign states and instrumentalities of foreign states which sue for violations of the antitrust laws.

The enrolled bill was subsequently signed by the President pro tempore (Mr. Thurmond).

At 7:27 p.m., a message from the House of Representatives, delivered by Ms. Goetz, announced that the House has passed the bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of

1978, and for other purposes; with an amendment, it insists upon its amendment to the bill, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. Perkins, Mr. Ford of Michigan, Mr. Gaydos, Mr. Andrews, Mr. Simon, Mr. Weiss, Mr. Kildee, Mr. Peyser, Mr. Williams of Montana, Mr. Eckart, Mr. Erlenborn, Mr. Coleman, Mr. Erdahl, Mr. Denardis, Mr. Craig, and Mr. Bailey of Missouri as managers of the conference on the part of the House.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 5027. An act to designate the building known as the United States Post Office and Courthouse in Norfolk, Virginia, as the "Walter E. Hoffman United States Courthouse;"

H.R. 5029. An act to designate the Federal Building in Fresno, California, as the "B.F. Sisk Federal Building";

H.R. 6538. An act to designate the Federal Building in Lima, Ohio, as the "Tennyson Guyer Federal Building":

H.R. 7397. An act to promote economic revitalization and facilitate expansion of economic opportunity in the Caribbean Basin

H.R. 7406. An act to designate a certain Federal building in Springfield, Illinois the "Paul Findley Building"; and

H.R. 7420. An act to name the fish hatchery at the Warm Springs Dam component of the Russian River, Dry Creek, California project as the Don H. Clausen Fish Hatchery.

#### ENROLLED BILLS SIGNED

The message further announced that the Speaker has signed the following enrolled bills:

S. 823. An act to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber, and for other purposes:

H.R. 6204. An act to provide for appointment and authority of the Supreme Court

Police, and for other purposes;

H.R. 7019. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes; and

H.R. 7072. An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. Thurmond).

At 9:23 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7144) making appropriations for the government of the District of Columbia and other ac-

tivities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes; and recedes from its disagreement to the amendments of the Senate numbered 4 and 6 to the bill, and agrees thereto; and it recedes from its disagreement to the amendments of the Senate numbered 3, 7, 17, 23, 33, 34, 35, 39, 40, and 41 to the bill, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the amendments of the Senate to the amendment of the House to the amendment of the Senate numbered 4 to the bill (H.R. 1952) authorizing appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1982, 1983, and 1984, and for other purposes.

The message further announced that the House agrees to the amendment of the Senate to the amendment of the House to the bill (S. 1986) to provide for the use and distribution of funds awarded the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community, and others, in dockets numbered 250-A and 279-C by the U.S. Court of Claims, and for

The message further announced that the House has passed the following bills, without amendment:

S. 1340. An act to provide for the use and distribution of Clallam judgement funds in docket numbered 134 before the Indian Claims Commission, and for other purposes;

S. 2611. An act to amend the Peace Corps

Act; and

other purposes.

S. 3073. An act to provide for the distribution within the United States of the United States Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson".

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 131. Concurrent resolution to express the sense of the Congress concerning Americans missing and unaccounted for in Southeast Asia.

The message further announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 86. Concurrent resolution supporting an expansion of the advisory opinion jurisdiction of the International Court of Justice:

H. Con. Res. 423. Concurrent resolution expressing the full support of the Congress for the Republic of Costa Rica and its democratic institutions as that country responds to the current economic crisis, and for Costa Rica's efforts to contribute to the peaceful resolution of conflicts in Central America; and

H. Con. Res. 434. Concurrent resolution condemning all forms of religious persecution

#### HOUSE BILLS REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 3191. An act to amend the Internal Revenue Code of 1954 to exempt conventions, et cetera, held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions; to the Committee on Finance.

H.R. 5027. An act to designate the building known as the U.S. Post Office and Courthouse in Norfolk, Virginia, as the "Walter E. Hoffman U.S. Courthouse"; to the Committee on Governmental Affairs.

H.R. 5029. An act to designate the Federal Building in Fresno, Calif., as the "B. F. Sisk Federal Building"; to the Committee on Environment and Public Works.

H.R. 5133. An act to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 6538. An act to designate the Federal Building in Lima, Ohio, as the "Tennyson Guyer Federal Building"; to the Committee on Environment and Public Works.

H.R. 7397. An act to promote economic revitalization and facilitate expansion of economic opportunity in the Caribbean Basin region; to the Committee on Finance.

H.R. 7406. An act to designate a certain Federal building in Springfield, Ill., the "Paul Findley Building"; to the Committee on Environment and Public Works.

H.R. 7420. An act to name the fish hatchery at the Warm Springs Dam component of the Russian River, Dry Creek, Calif., project as the Don H. Clausen Fish Hatchery; to the Committee on Environment and Public Works.

#### HOUSE CONCURRENT RESOLUTIONS REFERRED

The following concurrent resolutions were read, and referred to the Committee on Foreign Relations:

H. Con. Res. 86. Concurrent resolution supporting an expansion of the advisory opinion jurisdiction of the International Court of Justice:

H. Con. Res. 423. Concurrent resolution expressing the full support of the Congress for the Republic of Costa Rica and its democratic institutions as that country responds to the current economic crisis, and for Costa Rica's efforts to contribute to the peaceful resolution of conflicts in Central America; and

H. Con. Res. 434. Concurrent resolution condemning all forms of religious persecution

# ENROLLED BILL PRESENTED

The Secretary reported that on today, December 17, 1982, he had presented to the President of the United States the following enrolled bill:

S. 816. An act to amend the Clayton Act to modify the amount of damages payable to foreign states and instrumentalities of foreign states which sue for violations of the antitrust laws.

#### REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on

Foreign Relations, without amendment: S. 3107. An original bill to amend the Board for International Broadcasting Act of 1973 to authorize additional appropriations for fiscal year 1983 (Rept. No. 97-685).

By Mr. STAFFORD, from the Committee on Environment and Public Works, with an amendment:

H.R. 7159. An act to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and

pH (Rept. No. 97-686).

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

S. Con. Res. 126. Concurrent resolution calling upon the U.S. Government to support the people of Afghanistan with material assistance in their struggle to be free

from foreign domination.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, with an amendment in the nature of a substitute:

S.J. 271. Joint resolution to make technical corrections in certain banking and related statutes.

By Mr. DOMENICI, from the Committee

on the Budget, without amendment: S. Res. 502: Resolution waiving section 402(a) of the Congressonal Budget Act of 1974 with respect to the consideration of S. 2941

By Mr. DOMENICI, from the Committee on the Budget, without recommendation without amendment:

S. Res. 504: Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2863.

S. Res. 505: Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 5858.

By Mr. DOMENICI, from the Commitee on the Budget, without amendment:

S. 2258: A bill to discontinue or amend certain requirements for agency reports to

By Mr. THURMOND, from the Commit-

tee on the Judiciary, without amendment: H.R. 4350, An Act for the relief of Arthur

By Mr. STAFFORD, from the Committee on Environment and Public Works:

S. 2845. A bill to amend section 202(7)(C) of title 3, United States Code (Rept. No. 97-

#### EXECUTIVE REPORTS OF COMMITTEE

The following executive reports of committees were submitted:

By Mr. WARNER, from the Committee on Armed Services:

Thomas Edward Cooper, of Virginia, to be an Assistant Secretary of the Air Force.

By Mr. TOWER, from the Committee on Armed Services:

Mr. TOWER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: In the Air Force there are 50 appointments to the grade of brigadier general (list begins with Marcus A. Anderson), Vice Adm. Kenneth M. Carr,

U.S. Navy, to be reassigned to a position of importance and responsibility designated by the President and Lt. Gen. Robert C. Kingston, U.S. Army, to be reassigned to a position of importance and responsibility designated by the President. I ask that these names be placed on the executive calendar.

In addition, in the Marine Corps there are two permanent appointments to the grade of lieutenant and below (list begins with Stephen P. Freiherr) and in the Navy there are 424 permanent appointments to the grade of chief warrant officer (list begins with Anthony P. Battaglia). Since these names have already appeared in the Congressional Record on December 10 and 15 and to save the expenses of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. THURMOND, from the Committee on the Judiciary: Sam H. Bell, of Ohio, to be U.S. district

judge for the northern district of Ohio.

By Mr. HATCH, from the Committee on-

Labor and Human Resources:

Richard B. Backley, of Virginia, to be a Member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1988, to which position he was appointed during the last recess of the Senate;

L. Clair Nelson, of Virginia, to be a Member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1988, to which position she was appointed during the last recess of the Senate;

Betty H. Brake, of Oklahoma, to be Deputy Director of the ACTION Agency;

David L. Slate, of California, to be General Counsel of the Equal Employment Op-portunity Commission for a term of 4 years; Edmund T. Dombrowski, of California, to be a Member of the Federal Council on the Aging for a term expiring June 5, 1985;

Nanette Fabray MacDougall, of California, to be a Member of the National Council on the Handicapped for a term expiring

September 17, 1984;

John E. Jurgensmeyer, of Illinois, to be a Member of the Commission on Libraries and Information Science for a term expiring July 19, 1987;

Jerald Conway Newman, of New York, to be a Member of the Commission on Libraries and Information Science for a term expiring July 19, 1987;

Julia Li Wu, of California, to be a Member of the Commission on Libraries and Information Science for a term expiring July 19,

Byron Leeds, of New Jersey, to be a Member of National Commission on Libraries and Information Science for a term expiring July 19, 1986;

Wallie Cooper Simpson, of New York, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982;

Wallie Cooper Simpson, of New York, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985;

Paul Cooperman, of California, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982;

Paul Cooperman, of California, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985;

James Harvey Harrison, Jr., of Virginia, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982;

James Harvey Harrison, Jr., of Virginia, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985.

The following-named persons to be members of the National Council on Educational Research for the terms indicated:

For the remainder of the term expiring September 30, 1982:

Donald Barr, of Connecticut, vice Helan S. Astin.

For the remainder of the term expiring September 30, 1983;

Carl W. Salser, of Oregon, vice Maria B. Codda.

For terms expiring September 30, 1983:

J. Floyd Hall, of South Carolina, vice Alonzo A. Crim, term expired.

Donna Helene Hearne, of Missouri, vice Catherine C. Stimpson, term expired.

George Charles Roche III, of Michigan, vice Harold Howe II, term expired.

For terms expiring September 30, 1984: M. Blouke Carus, of Illinois, vice Barbara

S. Uehling, term expired.
Onalee McGraw, of Virginia, vice Jon L. Harkness, term expired.

Penny Pullen, of Illinois, vice Tomas A. Arciniega, term expired.

Elaine Y. Schadler, of Pennsylvania, vice Harold L. Enarson, term expired.

For terms expiring September 30, 1985: Donald Barr, of Connecticut. (Reappointment.)

Charles E. Hess, of California, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988;

John H. Moore, of California, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988;

Norman C. Rasmussen, of Massachusetts, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988;

Roland W. Schmitt, of New York, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988;

Robert F. Gilkenson, of Pennsylvania, to be a Member of the National Science Board for a term expiring May 10, 1988;

William F. Miller, of California, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988;

Willaim A. Nierenberg, of California, to be Member of the National Science Foundation, for a term expiring May 10, 1988;

Richard J. Fitzgerald, of Illinios, to be a Member of the Board of Trustees of the Harry S. Truman Scholarship Foundation for a term expiring December 10, 1985;

Truman McGill, of Alabama, to be a Member of the Board of Trustee of the Harry S. Truman Scholarship Foundation for a term expiring December 10, 1985;

Margaret Truman Daniel, of New York, to be a Member of the Board of Directors of the Harry S. Truman Scholarship Foundation for a term expiring December 10, 1987; Gloria Ann Hay, of Alaska, to be a Member of the Board of Trustees of the

Harry S. Truman Scholarship Foundation for a term expiring December 10, 1987;

The following candidates for personnel action in the regular corps of the Public Health Service subject to qualifications therefor as provided by law and regulations, for appointment to be assistant surgeon;

David W. Anderson, James M. Erskine, Martha J. Wunsch, John S. Yao, Kevin

Manuel J. Justiz, of New Mexico, to be Director of the National Institute of Education.

The following to be Members of the National Council on the Arts for the term ex-

piring September 3, 1988:

Allen Drury, of California; Celeste Holm, of New York; Raymond J. Learsy, of New York; Samuel Lipman, of New York; George L. Shaefer, of California; Robert Stack, of California; C. Douglas Dillon, of New California; C. Douglas Dillon, of New Jersey; and William Laurens Van Alen, of Pennsylvania.

(The above nominations were reported from the Committee on Labor and Human Resources, with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. Packwoop, from the Committee on Commerce, Science, and Transportation: The following officers of the United

States Coast Guard for promotion to the next higher grade (to paygrade 0-7):

Capt. Theodore J. Wojnar, USCG. Capt. Joseph A. McDonough, Jr., USCG. Capt. Arnold M. Danielson, USCG.

#### INTRODUCTION OF BILLS AND JOINT RESOLUTION

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PACKWOOD:

S. 3106. A bill to implement the Convention for the Conservation of Salmon in the North Atlantic Ocean, signed at Reykjavik, Iceland, on March 2, 1982.

By Mr. PERCY:

S. 3107. An original bill to amend the Board for International Broadcasting Act of 1973 to authorize additional appropriations for fiscal year 1983; from the Committee on Foreign Relations; placed on the calendar.

By Mr. BENTSEN (for himself and

Mr. Tower):

S. 3108. A bill to clarify the eligibility of small agricultural cooperatives for assistance under section 7(b)(2) of the Small Business Act; to the Committee on Small Business.

By Mr. NUNN (for himself and Mr.

ARMSTRONG):

By Mr. DECONCINI:

S. 3111. A bill to amend title 5 of the United States Code to prohibit ambassadors and ministers from making political contributions and taking part in political campaigns; to the Committee on Governmental Affairs

By Mr. PELL (for himself and Mr. STAFFORD):

S. 3112. A bill to establish an Art Bank; to the Committee on Labor and Human Re-

By Mr. QUAYLE: S. 3113. A bill to make certain minor and technical amendments to the Job Training Partnership Act; considered and passed.

By Mr. ROBERT C. BYRD (for Mr.

DECONCINI):

S. 3114. A bill to amend the Act of March 3. 1869, incorporating the Masonic Mutual Relief Association of the District of Columbia, now known as Acacia Mutual Life Insurance Co., and acts amendatory thereto; considered and passed.

#### SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. TOWER: S. Res. 518. Resolution authorizing expenditures by the Committee on Armed Services for the training of professional staff;

considered and agreed to.

By Mr. PERCY: S. Res. 519. Original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 3107; from the Committee on Foreign Relations; to the Committee on the Budget

By Mr. BAKER (for himself and Mr.

ROBERT C. BYRD):

S. Res. 520. Resolution to authorize the testimony of Senator Larry Pressler and representation by the Senate Legal Counsel in the case of United States of America vs. Joseph Silvestri, Cr. No. 80-00291 (3); considered and agreed to.

By Mr. MOYNIHAN:

S. Res. 521. A bill to preserve Food Stamp benefits; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HELMS (for himself, Mr. Hub-DLESTON, Mr. COCHRAN, and Mr. ZOR-

INSKY):

S. Con. Res. 134. Concurrent resolution expressing the sense of the Congress that the National Food and Agriculture Exposition is a significant development that will contribute to expanded exports of United States agricultural products; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. STEVENS (for Mr. SIMPSON (for himself and Mr. DOMENICI)):

S. Con. Res. 135. Concurrent resolution instructing the clerk to make corrections in the enrollment of H.R. 2330; considered and agreed to.

#### STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BENTSEN (for himself, and Mr. Tower):

S. 3108. A bill to clarify the eligibility of small agricultural cooperatives for assistance under section 7(b)(2) of the Small Business Act; to the Committee on Small Business.

EQUITY FOR AGRICULTURAL COOPERATIVES

Mr. BENTSEN. Mr. President, I am pleased to be joined by my distinguished fellow Senator from Texas

(Mr. Tower), in introducing legislation to make a minor change in the Small Business Act in order to correct a discriminatory situation which has just recently arisen. It has come to my attention that under the Small Business Administration's section 7(b)(2) loan program, the economic injury disaster loan program, there are instances in which a small business cannot qualify for this loan program simply because it is organized as a cooperative rather than a corporation.

The SBA requires, as a condition for eligibility for these loans, that the small business corporation meet SBA's size standards. This requires documentation through submission of SBA's form 355. In addition the officers and directors of the corporation must also meet SBA's size standards and must submit form 355's to show that they are small businesses.

However, in the case of a cooperative, SBA requires that each member of the cooperative submit a form 355 to show that they are a small business. There is no requirement that each stockholder or customer of the corporation submit a form 355 and qualify as a small business. This is clearly discriminatory, and for no good reason.

This discrimination is not just an inconvenience. It effectively bars the cooperative from any eligibility for an SBA disaster loan. To illustrate this, consider the case of a cotton gin in the Texas Panhandle. Much of this area qualifies for 7(b)(2) disaster assistance from SBA because of the severe weather earlier this year which inflicted massive damage on the crops in the region.

This cotton gin has 25 farmers who are members and who gin their cotton there. These 25 farmers own part of their farmland and rent part of it through the crop-share leases which are standard in the area. Under a cropshare lease the landlord gets part of the crop, and of course the landlord's share is also ginned at that gin. Let us assume that a total of 50 landlords are involved. Let us also assume that the gin has three officers and two direc-

If this gin is organized as a corporation with each farmer owning an equal share, then the corporation and the five officers and directors would all have to qualify as small businesses under the SBA standards and would have to submit form 355's to prove it. If the gin is organized as a cooperative, then the cooperative, all 25 farmers, and the 50 landlords-who would also be members of the cooperativewould have to meet SBA size standards and submit form 355's to prove it. In reality it would be impossible to get all of these, especially absentee landlords, to fill out the form 355 with its detailed financial information.

I have been working with Congressman Charles Stenholm of Texas, who is a member of the House Small Business Committee, and other members of the Texas congressional delegation to try to resolve this issue. The problem has arisen because of SBA regulations, not because of legal requirements, but SBA has refused to change their interpretation and end this discrimination. Thus we must correct this inequity through legislation before it is too late for these small agricultural cooperatives.

Mr. President, I see no justification at all for this discrimination, and I urge passage of this corrective legislation. I ask unanimous consent that a copy of the bill be placed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

### S. 3108

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 3 of the Small Business Act is amended by adding at the end thereof

the following new subsection:

'(j) For the purposes of section 7(b)(2) of this Act, the term 'small agricultural cooperative' means an association (corporate or otherwise) acting pursuant to the provisions of the Agriculture Marketing Act (12 U.S.C. 1141j), whose receipts from operation do not exceed the size standard established by the Administration for other agricultural small business concerns. In determining such receipts, the Administration shall regard the association as an entity and shall not include the income of any member or shareholder of such cooperative: Provided, That such an association shall not be deemed to be a small agricultural cooperative unless each member of the board of directors of the association, or each member of the governing body of the association if it is not incorporated, also individually qualifies as a small business concern.'

SEC. 2. Section 7(b)(2) of the Small Busi-

ness Act is amended-

(1) by striking out "small business concern" and inserting in lieu thereof "small business concern or small agricultural cooperative"

(2) by striking out "small business concerns" and inserting in lieu thereof "small business concerns or small agricultural co-

operatives", and
(3) by striking out "the concern" and inserting in lieu thereof "the concern or the

cooperative"

SEC. 3. The amendments made by this Act shall apply to any disaster with respect to which a declaration has been issued after September 1, 1982, under section 7(b)(2)(A), (B), or (C) of the Small Business Act or with respect to which a certification has been made after September 1, 1982, under section 7(b)(2)(D) of such Act.

> By Mr. NUNN (for himself and Mr. ARMSTRONG):

S. 3109. A bill to improve Federal criminal sentencing by imprisoning dangerous and violent offenders and by diverting nonviolent offenders from imprisonment to restitution or community service programs; to the Committee on the Judiciary.

SENTENCING IMPROVEMENT ACT

. Mr. NUNN. Mr. President, on behalf of myself and Senator Armstrong, I am today introducing the Sentencing Improvement Act of 1982. The prison system in the United States no longer accomplishes what it is supposed to accomplish. Rather than rehabilitate the more than 394,000 prisoners in State and Federal prisons, the system merely warehouses them. While it is true that our prison systems do keep offenders off the streets and out of society, it is equally true that, as the President's Commission on Law Enforcement and the Administration of Justice reported in 1976:

A substantial percentage of offenders become recidivists; they go on to commit more, and \* \* \* often more serious crimes.

Estimates of the rate of recidivism vary widely, from a low of 33 percent to a high of 90 percent, depending on the kind of prison involved and the method used to study the problem. But however the estimates vary, there appears to be a general consensus that our prison systems rehabilitate only a very small number of the hundreds of thousands of prisoners.

At least part of the problem can be attributed to prison conditions themselves. As the 1976 President's Com-

mission reported:

[l]ife in many institutions is at least barren and futile, at worst unspeakably brutal and degrading. \* \* \* [T]he conditions in which prisoners live are the poorest possible preparation for their successful reentry into society, and often merely reinforce in them a pattern of manipulation and destructive-

Among one of the worst conditions is overcrowding. As of May 31, 1982, our total Federal prison population was over 24,000. With our Federal prisons now operating beyond capacity, the continuing yearly increase in our prison population is especially alarming. Last year the national prison population jumped by a record 12.1 percent, the largest yearly increase since the Government began keeping prison statistics in 1926. The increase in the Federal prison population was even greater, at 16 percent.

As for State prison systems, the Attorney General's task force on violent crime reported in August 1981 that a clear majority of the State prison systems were either operating under court order or involved in litigation relating to overcrowding. That same cited overcrowding as the number one problem facing corrections officers. We cannot escape the unfortunate fact that our prisons are now overcrowded and that their populations will continue to rise. A recent Justice Department study predicts that in the future our national prison population will increase by an annual rate of more than 14 percent.

It is unmistakably clear that we are marching inexorably to a crisis point.

Stronger sentencing practices more effective law enforcement have increased the number of convicts in our prison system. I applaud better law enforcement and stricter sentencing. But we must recognize that it would be impractical for us to continue to urge Federal law enforcement agencies and Federal courts to carry on with the efforts against crime and at the same time fail to perceive and remedy our growing prison problem. The Attorney General's task force estimated that some \$10 billion would be needed to fund the construction needed to adequately accommodate the prison population in 1981. even when new prisons are built, the costs continue. The Bureau of Prisons reports that it costs over \$13,000 to incarcerate just 1 person for just 1 year.

We need to seek out other answers to this problem, answers that will be less burdensome to the taxpayers and yet still protect society from dangerous, violent criminals. One answer to the problem is to reexamine our sentencing practices and to develop alternatives to incarceration for some criminals as the normal means of punishment. That very point was only recently reemphasized in a report issued by the North Carolina Citizens Commission on Alternatives to Incarceration. The report recommends that-

As North Carolina's prison population expands and the cost of incarcerating so many offenders in State prison rises sharply, the State should reassess its policies that favor incarceration as a penalty. \* \* \* Communi-ty-based penalties as an alternative to prison are feasible for many nonviolent offenders.

In support of that recommendation, North Carolina Attorney General Rufus L. Edmistein commented that-

There must be some alternatives to prison. Prison for many people is self-defeating. It makes them a nonproductive

In the November 9, 1982, issue of USA Today, an editorial on needed prison reform concluded that-

"[t]he greatest single challenge to the administration of justice is to find an intelligent means of separating those who must be imprisoned for society's safety from those who could be trusted with alternative, minimum-security sentences

The bill which Senator Armstrong and I are introducing today attempts to meet precisely that challenge. Enti-tled the "Sentencing Improvement Act of 1982," this legislation is intended to insure, in the face of severe prison overcrowding, that "scarce Federal prison resources are available to house dangerous and violent criminals." The bill accomplishes that purpose by providing for the use of restitution and community-service sentences in cases of nonviolent and nondangerous offenders. Based upon 1981 Bureau of Prisons estimates, this legislation would have created nearly 7,500 more

prison spaces for violent criminals with potential annual savings to our Federal Government of over \$97 million.

This bill affirms that dangerous, violent criminals must be locked up in prison to protect society, but that society does not necessarily need the same protection from nondangerous offenders. The bill creates a presumption that imprisonment is inappropriate for nondangerous offenders. In such cases, the bill provides that defendants shall be sentenced to pay back their victims for property damaged or lost or for medical expenses, as well as to provide free service in their communities through volunteer work.

The bill specifically states that certain offenders are ineligible for alternative sentencing, including: those who committed violent crimes; those who committed crimes endangering the national security; professional or habitual criminals; narcotics traffickers; those convicted of certain illegal firearms or explosives trafficking violations; and those convicted of misuse of public office. The bill also provides that the court may imprison any offender if it finds substantial and compelling reasons to do so.

Mr. President, there are three reasons why this bill is needed. First, we need to insure that scarce available prison space is used to lock up the dangerous criminals. This bill makes it clear that Congress wants violent dangerous offenders put in jail. It also makes it clear that Congress does not want our prisons filled with nondangerous criminals if that means the dangerous ones will walk the streets.

Second, this bill recognizes the rights of victims of crime to be reimbursed for their losses. Too often they are not only not reimbursed, but they end up as taxpayers paying to feed, clothe, and house in prison those very nondangerous offenders who have victimized them.

Third, this is a much less expensive and equally effective way of punishing nondangerous offenders. Instead of paying over \$13,000 per year to jail such a person and force him to spend his time unproductively, that person can remain in society, repay his victim and work for the community in a community-service program. The cost per person of diversion throug alternative sentencing is only about 10 percent of the cost of incarceration or about \$1,300 per year, according to the U.S. Courts Administrative Office.

Restitution and community service as alternatives to incarceration work. We have seen their proven success in several of the States that have instituted such programs. Such projects have been used with increasing frequency in some of our Federal courts. A 1979 survey conducted by the U.S. Courts Administrative Office found that 53 districts used such alternatives

on a case-by-case basis, and that 17 had formal community-service programs.

Evaluation of such alternatives have demonstrated that public safety is not harmed. In fact, the recidivism rates of persons diverted from jail to such programs are in many cases lower than persons sent to jail. Moreover, these sanctions are much less expensive than incarceration and victim response to such programs has generally been positive.

I want to point out that this bill does not in any way create new sanctions not now available to sentencing judges. Alternative sentences of restitution and community service are currently within the reach of sentencing judges. As I mentioned earlier, they have and are being used. Only this year Congress, in the Victim and Witness Protection Act, again named restitution as a sentencing possibility for criminal offenders. We have incorporated the restitution procedures set forth in that bill to apply where restitution is ordered under this legislation. What is new about this bill is an express congressional directive that the use of those alternatives be increased in cases of nonviolent offenders, in order to insure that sufficient prison space remains available for truly violent offenders.

In drafting this legislation, we have been careful to anticipate and examine in advance those legitimate questions and concerns which this approach to sentencing reform may generate. At first blush, some may suggest that this bill will unfairly and substantially increase the burden of imprisonment on economically underprivileged or minority offenders.

To answer that concern, I have closely examined the most current population statistics from the Bureau of Prisons. I have divided those statistics for white and nonwhite inmates into two categories of offenses pertinent for purposes of our bill: Violent offenses-imprisonment drug cases-and other offenses-nonimprisonment cases. In 1981, 37 percent of Federal prison inmates were classified as nonwhites. When considering only those inmates committed for violent and drug offenses, the percentage for nonwhites is 40 percent. Based on those statistics, our bill, in the year 1981, would have increased the total percent of nonwhite Federal prisoners only slightly, by approximately 3 percent.

I suggest that such a slight increase would be far outweighed by the increased fairness and objectivity in sentencing which this bill would insure for underprivileged and minority offenders. A sentence of imprisonment or nonimprisonment will turn less on economic status and the quality of legal representation. Rather, the sentencing decision will rest on the nature

of the offense itself and the real danger which the offender, regardless of race or economic wealth, poses to our society. With such objective criteria firmly in place, the bill will, in no way, undercut the rights of underprivileged and minority offenders in our criminal justice system.

Turning to another aspect of the bill, there are those who may say that alternative sentencing will eliminate the deterrent effect of imprisonment. In response to that concern, we have drafted the bill to preserve that deterrent effect even where alternative sentencing is used. Even in cases of nonviolent offenders, the bill allows a judge the discretion to impose a minimal prison sentence of up to 60 days, to be followed by restitution and community service. Second, the bill provides that a community service may include a residence requirement at a community treatment center, or halfway house. Finally, should an offender violate the conditions of the alternative sentence, he may be sentenced to any term of imprisonment permitted under law for his offense. With those provisions in place, alternative sentences can and will deter further criminal conduct by nonviolent offend-

It is time for Congress to address the overcrowded prisons. We must act now before we reach the crisis which is so clearly on the horizon. This bill provides a safe, effective, and inexpensive method of addressing the issue now. I point out that in drafting this bill we have welcomed and incorporated the suggestions of many of those at the heart of our criminal justice system, including the Department of Justice, the Bureau of Prisons, Federal judges, prosecutors, and probation officers. The bill I introduce today presents, I believe, a well-reasoned vehicle for much needed sentencing reform. I urge Congress to speak to the problem of our overcrowded and scarce prison resources by the prompt and thorough consideration of this bill.

Mr. President, I ask unanimous consent that the text of the bill as well as a section-by-section analysis of its provisions be inserted in the Record at this point.

There being no objection, the material was ordered to be printed, as follows:

#### S. 3109

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be referred to as the "Sentencing Improvement Act of 1982".

SEC. 2. Title 18, United States Code, is amended by adding immediately after Chapter 231 the following new chapter:

# CHAPTER 232—RESTITUTION AND COMMUNITY SERVICE

"Sec

"3671. Short title; Congressional declaration of purpose and policy.

"3672. Offenses for which restitution and commu-

nity service should be imposed.
"3673. Nature of sentence and restitution "3674. Nature of sentence of community service.

"3675. Modification or waiver.

"3676. Considerations in determining restitution and community service.

"SEC. 3671. SHORT TITLE: CONGRESSIONAL DECLARATION OF PURPOSE AND POLICY

"(a) This chapter may be cited as the 'Sentencing Improvement Act of 1982.'

"(b) Due to the increasing problem of rison overcrowding, available federal prison prison space must be treated as a scarce resource in the sentencing of criminal defendants. Sentencing decisions should be designed to insure that those resources are, first and foremost, reserved for those dangerous and violent criminals who pose the most serious threat to society. In cases of non-violent offenders, the interests of society as a whole as well as the individual victims of crime can continue to be served through the imposition of alternative sentences, such as restitution and community service.

"It is the purpose and policy of this chapter to insure that scarce Federal prison resources are available to house dangerous and violent criminals by the increased use of restitution, community service, and other alternative sentences in cases of non-violent and non-dangerous cirminal offenders.

"SEC. 3672. OFFENSES FOR WHICH RESTITU-TION AND COMMUNITY SERVICE SHOULD BE IMPOSED.

"(a) Imprisonment is the appropriate sanction for those offenders who, by their offense or criminal history, have demonstrated that they present an ongoing danger to society.

"(b) Imprisonment is an inappropriate sanction where the court finds that the offense does not involve the threat or use of force, endanger national security, or threaten or cause serious physical harm to others, and that none of the following circumstances is present:

"(1) the defendant has been convicted of a felony in federal or state court within the past five years. In calculating the five years period, periods of incarceration shall not be included; however, convictions for offenses committed while incarcerated shall be counted as prior convictions under this paragraph, or

"(2) the defendant committed the offense as part of a pattern of conduct which was criminal under applicable laws of any jurisdiction, which constituted a substantial source of his income, and in which he manifested special skill or expertise, or

(3) the defendant received or expected to receive compensation for committing the offense (other than when receiving compensation was, in itself, the offense), or

'(4) the offense involved the illegal manufacture, importation, exportation, distribu-tion or dispensing of, or possession with the intent to manufacture, import, export, distribute, or dispense, a controlled substance,

"(5) the defendant was convicted of an offense involving explosives in violation of Title 18, United States Code, Sections 844 (d), (e), (f), (h), or (i); an offense involving firearms of ammunition in violation of Title 18. United States Code, Sections 922 (d), (g), or (h); 924(b) or (c); or Title 18 Appendix, United States Code, Section 1202(a) or (b); or an offense involving firearms in violation of Chapter 53 of Title 26, United States

"(6) the defendant was convicted of an offense involving the misuse of public office or other violation of the public trust, or

"(7) there are specified substantial and compelling reasons for imposing a sentence of imprisonment.

(c) In cases where the presumptions for or against imprisonment in paragraphs (a) and (b) of this section do not apply, the court may, in its discretion, sentence a defendant to any sanction permitted under the law

'(d) If a defendant is convicted of conspiracy, attempt, or is punishable as a principal under 18 U.S.C. section 2, he shall be treated as a principal for purposes of this chap-

"(e) The probation service of the court shall include in each presentence investigation and report findings and recommendations as to a defendant's eligibility for sentencing pursuant to the provisions of this chapter. Prior to sentencing, both the government and the defendant shall be given notice and the opportunity to be heard regarding the merits of those findings and recommendations. Nothing in this section shall affect the confidentiality of other portions of the presentence investigation and report. as provided for under law.

(f) When imprisonment is an inappropriate sanction under the provisons of paragraph (b) of this section, and when the circumstances of the offense demonstrate that a fine and/or probation are inappropriate sanctions, the court shall suspend imposition of sentence and require a defendant to make restitution or perform community service, or both. If the court has determined that there are substantial and compelling reasons under subsection (b)(7) for imposing a sentence of imprisonment, the court may, at its discretion, impose any sentence of imprisonment permitted under law, or, in the alternative, impose any sentence of imprisonment permitted under law, suspend execution of that portion of the sentence in excess of up to sixty days, and require the defendant to make restitution or perform community service, or both. In its discretion, the court may impose a fine in addition to a sentence of restitution and/or community service.

"SEC. 3673. NATURE OF SENTENCE OF RESTITUTION. "(a) When the victim or victims of an offense are ascertainable, the court may order the defendant to make restitution payments as provided under section 3579 of this chap-

"(b) When there is no ascertainable victim of the offense, the court may order the defendant to contribute an amount not exceeding the value of the defendant's gain from the commission of the crime to the Treasurer of the United States. The Treasurer shall hold such monies in a Victim Fund, which shall be distributed quarterly to all states with victim compensation funds in amounts proportional to the population of those states.

"(c) If a sentence of restitution is imposed on an organization, it is the duty of each individual authorized to transfer property for the organization or to make disbursement of assets of the organization to return such property or to pay restitution from assets of the organization as required by such sentence.

"SEC. 3674. NATURE OF SENTENCE OF COMMUNITY SERVICE.

"(a) A defendant may be sentenced under this chapter to perform a specified number of hours of free service to a governmental, charitable, or volunteer agency.

"(b) The court may, in its discretion, require that a defendant, sentenced to perform community service under this chapter, reside at a residential community treatment center for part or all of the duration of the sentence.

"(c) The court shall require, as a condition of a sentence of community service, that the defendant perform said community service within a specified period, but such period shall not be greater than the maximum term of probation or imprisonment for the offense, whichever is greatest.

"(d) Failure of a defendant to adhere to the schedule of community service performance shall be treated as a violation of probation by that defendant. It shall be a defense that the default or failure of the defendant was not attributable to an intentional refusal to obey the sentence of the court or to a failure on his part to make a good faith effort to comply.

"SEC. 3675, MODIFICATION OR WAIVER.

"A victim or a defendant at any time may petition the sentencing court to adjust or otherwise waive payment or performance of any ordered restitution or community service or any unpaid or unperformed portion thereof. Upon a prima face showing by the petitioner of a change in circumstances or other unfairness, the court shall schedule a hearing and give the victim and the government notice of the hearing, date, place, and time and inform the victim that he will have an opportunity to be heard. The burden of proof at such hearing shall rest upon the petitioner. If the court finds that the circumstances upon which it based the imposition or amount and method of payment or performance ordered no longer exist or that it otherwise would be unjust to either party to require payment or performance as imposed, the court may adjust or waive the remaining portion thereof or modify the time or method of restitution or community service. The court may extend the restitution or community service schedule, but not beyond the maximum term provided in Section 3674 or 3579 of this chapter

"SEC. 3676. CONSIDERATIONS IN DETERMINING RESTITUTION AND COMMUNITY SERV-

"(a) In determining the amount and method of restitution payments, the court shall consider the factors specified in section 3580(a) of this chapter.

"(b) In determining the amount and method of community service performance, the court shall consider the relative seriousness of the offense, the defendant's criminal history and the defendant's employment obligations

"(c) The probation office in each district shall compile and maintain a list of all public, charitable, or volunteer agencies in the district which will accept community service placement of offenders, and shall maintain accurate and complete records of community service performed and restitution payments made by persons sentenced pursuant to this chapter. It may contract or agree with private agencies to oversee placement and supervision of offenders sentenced to community service.

"(d) On request of the court, the government, or the defendant, the presentence investigation shall also contain proposed alternative sanctions to incarceration which may include any combination of some or all of the following elements: community service; restitution; employment; psychological treatment, counseling, and therapy, etc.;

education; vocational training or rehabilitation; medical or physical treatment; residence; reporting and supervision."

SEC. 3. The table of chapters for Part II of title 18, United States Code, is amended by adding the following new item immediately after the item relating to Chapter 231: "232. Restitution and Community

#### THE SENTENCING IMPROVEMENT ACT OF 1982: SECTION-BY-SECTION ANALYSIS

The bill will improve current federal criminal sentencing procedures by providing flexible guidelines for the courts in the imprisonment or other alternative forms of punishment on offenders. The basic principle underlying the guidelines is that prison is the appropriate punishment for violent, habitual or professional offenders, but that alternative forms of punishment may be appropriate for non-violent offenders.

Section 3671(a) states the title of the statute as the Sentencing Improvement Act of 1982.

Section 3671(b) lays out the Congressional findings that there is presently a problem with overcrowding in federal prisons. It also establishes that these scarce prison resources should be used for only the violent and dangerous criminals and that the interests of society can be served through the imposition of alternative sentences, such as restitution and community services, for non-violent, non-dangerous offenders.

Section 3672(a) establishes the presumption that certain offenders should be imprisoned for the protection of society. Generally, these are persons who, either by the offense for which they were convicted, or by their criminal history, have shown themselves to be an ongoing danger to society.

Section 3672(b) establishes the converse presumption that for certain types of offenses alternative forms of punishment should be used and that imprisonment is inappropriate. This presumption does not apply to a variety of offenses, including involving national security, those causing serious physical harm to others, and those involving the use or threat of force. In addition, the court may find that the presumption against imprisonment does not apply where: the defendant is an habitual criminal, having been convicted of a felony within 5 years; the defendant engages in criminal conduct as a livelihood; the defendant expected to be or was paid for commission of the crime; the offense involves narcotics trafficking; the defendant was convicted of specified firearms or explosives offenses; the defendant was convicted of misusing his public office; or if "there are other substantial and compelling reasons for imposing a sentence of imprisonment." this last exception, a judge could, for example, sentence to imprisonment a trusted pension official who embezzles millions from the fund. In such a case no violence has been done, but the financial and economic injury done to hundreds or thousands may be enormous. Moreover, restitution of such a vast sum would be impossible. In such a case, imprisonment may well be the only appropriate punishment, given the circumstances surrounding the scope of the offense and its impact.

Section 3672(c) states that where the presumption for imprisonment in Sec. 3672(a) and the presumption against imprisonment in Sec. 3672(b) do not apply, a court is free to sentence a defendant to any sanction permitted under law.

Section 3672(d) states that a defendant convicted for conspiracy, attempt or aiding

and abetting shall, for purposes of this Act, be treated as a principal. Thus one who merely aids a Presidential assassin in his violent task will not escape imprisonment merely because he, himself, did not pull the trigger.

Section 3672(e) states that prior to sentencing, the probation department must detail findings and recommendations as to sentencing under this Act. Both the Government and the defendant are then given an opportunity to argue the merits of these findings.

Section 3672(f) states that in those cases for which imprisonment or a fine or probation alone are inappropriate, the court shall suspend the imposition of sentence and require the defendant to accept alternative punishment. The alternatives are restitution, performance of community service, a fine, or all three. If the court has previously determined that special and compelling circumstances for imprisonment exist, but it nonetheless wishes to impose a sentence of restitution and community service, it may impose a sentence of imprisonment, suspend execution of all but up to sixty days, and require the defendant on release to make restitution or perform community service, or

Section 3673(a) describes the nature of restitution as an alternative form of punishment. When the victim or victims of the offense is ascertainable then Section 3579's provisions would apply. Section 3579, in part, provides that in appropriate cases the court may, with due consideration of the defendant's resources, require him to pay the vicitm's medical expenses, repay the value of lost or damaged property, or return said property. That section of Title 18 also specifies procedures to be followed when a civil suit has arisen out of the same injury or loss.

Section 2673(b) specifies that when no victims are ascertainable, the restitution will be paid into a special fund of the Treasury. This fund will on a quarterly basis distribute said monies to state victim compensation plans on a per captia basis.

Section 3673(c) provides for restitution by organizations as opposed to individuals.

Section 3674(a) describes the nature of community service as an alternative form of punishment. The sentencing court is to order a specified number of hours of free work for a governmental, charitable or volunteer agency.

Section 3674(b) gives the court the discretion of requiring a defendant to reside at a community treatment center during his sen-

Section 3674(c) requires that the community service be made or performed on a specific schedule established by the court.

Section 3674(d) states that intentional default by the defendant shall be treated as a violation of probation. Insofar as the imposition of sentence was originally suspended, upon default the court may sentence the defendant to imprisonment for the maximum term allowable for the offense committed by the defendant.

Section 3675 allows for the modification or waiver of payment of performance of an alternative sentence upon the petition of the victim or the defendant. The petitioner, who can be either the victim or the defendant, has the burden of showing that a change in circumstances or other unfairness have rendered it unjust to continue the sentence as imposed. No modification may be made without notice to the government, the defendant and the victim and without pro-

viding them the opportunity to be heard. Restitution and community service may be extended or reduced, but in no case may it be extended beyond the maximum term of imprisonment allowable for the offense committed by the defendant.

Section 3676 establishes the considerations the sentencing court should consider in determining restitution or community service. These include the victim's loss, the defendant's ability to pay, the seriousness of the offense, the defendant's criminal history, and the defendant's employment obligations. It also requires each probation office to prepare a list of appropriate agencies for public service. It requires that the probation department supervise any public service done by a defendant. It also permits the combination of community service with counseling, therapy and vocational or medical rehabilitation.

• Mr. ARMSTRONG. Mr. President, there is a crisis coming in American prisons. Dozens of States are currently under court order because of overcrowding amounting to cruel and unusual punishment. A recent Federal study concluded that nearly two-thirds of all prisoners are housed in overcrowded facilities. The same study showed that even new prisons filled to capacity within 2 years and reach 130 percent of capacity within 5 years.

Since 1969, the U.S. prison population has increased by 68 percent. At the end of 1981, there were 369,000 prisoners in State and Federal facilities; that year witnessed a 12.1 percent increase in the American prison population-the greatest since we began keeping statistics on this subject in 1925. The prison population is growing nearly 15 times faster than the Nation as a whole. We have reached a point where more than 1 in every 600 Americans is in prison; 1 out of every 100 black males is incarcerated. If this Nation's prison population were a country, it would be more populous than 18-member countries of the United Nations. In fact, the United States has a higher incarceration rate than any nation in the world, except South Africa and the Soviet Union.

We spend a fortune every year to maintain this shameful rank. In 1980, for example, the total budget for State and Federal correction services was nearly \$5.5 billion. It costs a minimum of \$30,000 per bed to build a medium security facility, and up to \$70,000 per bed for a maximum security prison. The Attorney General's Task Force on Violent Crime has estimated that more than \$10 billion is urgently needed for new prison construction just to accommodate the current prison population. The average annual cost of maintaining an inmate of the Federal prison system has been estimated at over \$13,000-more than the cost of tuition, room, and board at our most expensive universities.

And these facilities are a far cry from academies of the liberal arts, Mr. President. Indeed, they have become the graduate schools of crime, with advanced courses in assault, theft, vandalism, forced homosexuality, gang war, racial violence, drug abuse, and insanity.

As Judge Frank Johnson said while reviewing an Alabama prison in 1976.

The physical facilities were dilapidated and filthy, the cells infested with roaches, flies, mosquitoes and other vermin. Sanitation facilities were limited and in ill-repair. emitting an overpowering odor; in one in-stance over 200 men were forced to share one toilet. Inmates were not provided with toothpaste, toothbrush, shampoo, shaving cream, razors, combs and other such necessities. Food was unappetizing and unwholesome, poorly prepared and often infested with insects, and served without reasonable utensils. There were no meaningful vocational, educational, recreational or working programs, A United States health officer described the prison as "wholly unfit for human habitation according to virtually every criterion for evaluation by public health inspectors." Perhaps worst of all was the rampant violence within the prison. Weaker inmates were repeatedly victimized by the stronger; robbery, rape, extortion, theft and assault were every day ocurrences among the general inmate population.

This is not to say that all prisons are this bad; nor would I argue that prisons should be a comfortable and interesting experience for the inmate. But it is clear that reform is desperately needed. Anthony Travisono, executive director of the American Correctional Association, has said: "There are time bombs ticking away in our prisons and jails." Unless we act decisively and soon, there seems little doubt that the American prison system is within only a few years of collapsing from its own weight.

It is notorious by now that our prisons do not reform or rehabilitatethey brutalize and harden. The fact is that we manufacture dangerous criminals in our prisons-too often from the raw material of nonviolent offenders. In recent years, however, there has developed a dramatic change in American attitudes toward imprisonment. It is widely perceived that our prisons are cruel and violent places, and outstanding failures as reformatories; but people seem generally content with the idea that at least they keep a criminal away from society. The goal of rehabilitation has given way to the expedient of separation and punishment. As a nation, we need to ask ourselves whether this policy serves the long-term interests of law and order.

As Napoleon once observed, "The contagion of crime is like that of the plague. Criminals collected together corrupt each other. They are worse than ever when, at the termination of their punishment, they return to society." Those who graduate from these advanced schools of violence do, in time, return to live among us; thousands are released every year. Norman Carlson, Director of the Bureau of Prisons, has said "Jails are tanks,

warehouses. Anyone not a criminal when he goes in, will be one when he comes out." Recidivism, the rate of rearrest of released prisoners, is already high and climbing higher; Chief Justice Warren Burger has called this "a disaster."

If we are to depart from the current policy, as I think we must, our options are somewhat limited. We could spend many billions of dollars building new facilities and, indeed, there are already bills pending in the Senate which propose to do just that. In a time of fiscal restraining, however, this approach is not realistic. Moreover, the separateand-punish school of penology can only provide our society with a temporary and limited kind of safety.

An obvious and simple alternative would be to place greater reliance on fines and probation instead of incar-Indeed, in many States ceration. where the prison systems are already under court order for overcrowding, this is a common alternative sanction. The fact is that fewer and fewer offenders-in many cases even dangerous ones-are actually going to jail. Society as a whole suffers greatly from this alternative. Victims go uncompensated, law-abiding citizens have dangerous criminals living among them and offenders learn to hold our criminal justice system in contempt. This alternative only teaches that crime actually does pay.

There is a third alternative, Mr. President, and this is my purpose in speaking today. Basically, this is a proposal that American prisons and jails should be regarded as a scarce resource with a highly specialized purpose—namely, confining only those offenders who pose a threat to society. This proposal consists of two alternatives to incarceration that, in the case of a nondangerous offender, are much more effective and just than imprisonment.

A program of restitution would require the offender to repay his victim for property loss and other damages. Many public opinion surveys indicate that a high percentage of Americans would prefer to have a nondangerous offender repay his victim directly, rather than serve time in prison at public expense. This is also clearly preferable to having the Government compensate crime victims with scarce tax dollars. Victim restitution has gone far beyond the theory stage in dozens of American communities and States; so far, the results have been very encouraging.

Earlier this year, Congress passed the Victim and Witness Protection Act and went on record as favoring restitution for victims of crime. The restitution procedures of that act will apply where restitution is ordered under our new bill, which for the first time directs judges to increase the use of these more constructive sentences for nondangerous offenders.

Community service is the second part of this proposal. A community service order would provide that, instead of being sent to prison, nondangerous offenders would be required to work in areas of great public need either for a very modest salary or for nothing. State and local jurisdictions are well ahead of the Federal Government in this area as well. Present community service programs around the country provide useful work opportunities for skilled and unskilled workers alike. California, for example, is operating dozens of community service programs for nondangerous offenders and the community service order has been widely used for years in England with tremendous success.

Evaluations of the community service and restitution projects in diverse areas and conditions around the country have demonstrated that public safety is in no way compromised. In fact, the recidivism rates of people going through these programs are generally better than those going to prison. This is partly because they are spared the brutalizing effect of prison conditions and partly because the programs provide a direct connection between an offender and his victim or community. These sanctions are also considerably less expensive than incarceration. Victims have been pleased with the restitution programs, because they allow compensation where before there was none. Finally, the social service agencies have responded very well to the community service programs and the extra help they pro-

We have the opportunity-and, because of the overcrowding crisis, an urgent need-to revise our views on crime and punishment. In my opinion, the best policy is one that protects the safety of the law-abiding citizens, punishes offenders swiftly and humanely, compensates victims and establishes an individual offender's responsibil-ities to his victim and his community. Only by putting the nondangerous offenders to work for those he has victimized can he ever "pay his debt to society." No such debt is paid, and no benefit is gained, by putting the nondangerous offender behind bars. It is a waste of tax dollars that we can illafford and is a terrible waste of human resources.

Attorney General William French Smith has told Congress that he supports the concept of restitution and community service for convicted felons placed on probation instead of being put in prison. This is an idea that is generating strong public support from all quarters of the country. Not the least of the benefits that would flow from this program would be the additional space created in Federal facili-

ties. This space could then be sold or leased at a full or subsidized rate to individual States, in order to solve their overcrowding problem and make sure that the dangerous offender goes straight to jail where he belongs.

Mr. President, for all these reasons, Senator Nunn and I today are introducing the Sentencing Improvement Act of 1982. This measure affirms that dangerous criminals must be locked in prison to protect society. It also alters the Federal criminal code and allows judges to sentence nondangerous offenders to restitution and community service programs. To assure that lawabiding citizens are adequately protected, this bill defines "nondangerous offender" very carefully and narrowly. This class of offender would not include:

Those who commit violent crimes or crimes that cause serious physical injury;

Those who misuse a public office;

Repeat offenders, drug traffickers or those who endanger national security:

Those who are paid to commit their crimes or make a living from criminal activity that requires special skill or expertise; or

Those convicted under certain fire-

arms trafficking laws.

As a further safeguard, the definition contains a catch-all clause that allows a judge to send an offender to prison if he feels there are other substantial and compelling reasons for his incarceration.

The principal benefits to be derived from this bill are that it would:

Focus Federal resources intensively on violent crime.-Imprisonment is far and away the most expensive criminal punishment. By our rough calculations, this measure will save the Federal Government over half a billion dollars in the next 3 years. Some \$244 million of this would be due to a reduction in the Federal prison population by around 25,000 inmates who would be diverted into the alternative punishment programs of restitution or community service. An additional amount of around \$284 million would be saved by avoiding otherwise necessary prison construction over that same period. Finally, something like \$14 million would be gained in the form of community service benefits. benefits Total combined would amount to around \$542 million and this does not include the value of restitution payments, since these benefits would fluctuate according to the value of damage to the victims and the capacity of an offender's ability to pay. In addition to these financial benefits, the Bureau of Prisons would be able to accept upwards of 5,000 prisoners from those States whose prisons are under court order because of overcrowding; this Federal space could be leased or sold to the States and would help insure that dangerous offenders currently going scot-free on probation would be put behind bars where they belong.

Benefit the victim and the community.-Victims will be financially compensated through direct restitution payments; they will also have the satisfaction of seeing first-hand that those who did them harm are now working to make them whole. The restitution program will put an end to the institutional alienation that has become the hallmark of our impersonal criminal justice system. The community service program will be a boon to charitable organizations and local agencies that are already facing severe fiscal problems and cannot otherwise obtain volunteer workers. Together, the two programs will demonstrate that every member of the community has moral and social responsibilities to his other members. While protecting the society, these improvements will help to foster a healthier respect for a more personalized criminal justice system; and

Appropriately punish the offender.-Studies have shown that nonincarceration sentences are as effective a deterrent as imprisonment. They are also considerably cheaper-usually costing no more to administer than a parole program. Typically, recidivism rates are lower-probably because these programs require the offender to assume responsibility for the consequences of his criminal acts. Moreover, this program will exempt the non-dangerous offender from the brutalizing circumstances found in our overcrowded prisons. Such an approach punishes cheaply, swiftly, and constructively, and without transforming nondangerous offenders into violent ex-cons.

Mr. President, this is a complex issue in which every law-abiding citizen has an enormous stake. The legislation Senator Nunn and I submit today is not intended as a finished product but as a starting point for public discussion of crime and punishment. I believe that we are no more than a few years from a law enforcement crisis in this country that is truly frightening. We must begin immediately to regard our prison facilities as scarce resources that need to be wisely and deliberately managed. I urge my colleagues to consider this proposal with great care and to join with us in this important national discussion. Along with my colleague, Senator Nunn, I am seeking suggestions for improvement of this proposal and for assistance in assuring its adoption.

> By Mr. HOLLINGS (for himself and Mr. PRYOR):

S. 3110. A bill to establish a Reconstruction Finance Corporation; to the Committee on Banking, Housing, and Urban Affairs.

RECONSTRUCTION FINANCE CORPORATION ACT OF

Mr. HOLLINGS. Mr. President, I am introducing today a bill to establish a new Reconstruction Finance Corporation (RFC).

The orginal RFC was signed into law in January of 1932 by President Herbert Hoover, and came to life under Franklin Roosevelt. It was created at a time of great economic peril in the United States, and, by the time its business was finished in 1957, it had performed veomen service in assisting the revitalization of America. It was a large force in helping commerce and industry sustain themselves through periods when necessary financial help was difficult to find.

Many of our cities and much of our industry face serious financial problems today. In the first 28 weeks of 1982, there were 12,672 business failures, compared with only 8,772 failures for the comparable 1981 period. We are looking at the highest level of business failures since the early 1930's.

As bad as things are for business, they have been scarcely any better for our cities. Last month, the National League of Cities reported the findings they reached after sampling 43 cities across the Nation. They found that the general fiscal condition of cities is poor, and many have serious problems maintaining public works. For exam-

Milwaukee suffered 180 water main breaks in January alone.

Nearly half of the 1,087 public school buildings in New York are at least 50 years old, and in various states of decay.

In Houston, it is estimated that it costs motorists \$800 a year in wasted time and gasoline because of snarled traffic.

These few examples are multiplied in various ways all across the Nation in cities in need of repair and help to maintain service, but without the resources to get the job done.

With interest rates fluctuating, but not falling dramatically, neither troubled cities, nor overburdened business can find the means to finance growth or continue basic service at top quality levels.

We simply cannot permit this situation to continue. We must not permit our basic industries—the foundation upon which we have built the world's dominant economic power-to wither and die. To abdicate the role we have established, to let it pass to the hands of other nations because we made a conscious decision to let it happen, would mark one of the sorriest episodes in our economic history.

The United States and the world are in a period of transition. The United States is challenged by new technologies from abroad. We are tested by growing commerce from around the world, and I am afraid in too many cases, we have become the passive buyer rather than a dynamic seller of goods.

So our challenge is manifold, and if we are to remain competitive abroad while strong at home, we must be aggressive in the quest to strengthen our cities and our businesses. We can take a bold step in that direction by reestablishing a Reconstruction Finance Corporation.

The purpose of this new RFC would be to provide limited, temporary, and repayable assistance to cities and businesses. It would have the advantage of being outside the mainstream of practical politics, while providing stable and professional financial planning services. Its goals would be to assist in the rebuilding of the public infrastructure, and to help restructure basic industries. By accomplishing those goals, it will promote the competitive American spirit, while fostering long-term economic growth.

The RFC is not intended as a cureall. But neither should it be mistaken as a band-aid. We need a sound and safe financial management group, able to offer both loans and capital information expertise to businesses and municipal institutions who have nowhere else to turn.

Felix Rohatyn, the chairman of the Municipal Assistance Corp. recently addressed the U.S. Conference of Mayors. In his speech, he underscored a number of themes I have noted today. It is a thoughtful speech and deserves wider circulation. I ask unanimous consent that the Rohatyn remarks and the complete text of my Reconstruction Finance Corporation bill be included at this point in the Record.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

#### S. 3110

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, SECTION 1. SHORT TITLE.

This Act may be cited as the "Reconstruction Finance Corporation Act of 1982." SEC. 2. DECLARATION OF PURPOSES.

The Congress declares that-

in order to-

(a) rebuild the national infrastructure and restructure and revitalize basic industries;

(b) promote and facilitate short-term and long-term economic growth; and

(c) ensure the ability of the United States to compete in the world economy,

It is essential to-

 provide financial assistance to business entities and municipalities in emergencies, and

(2) make available to business entities and municipalities adequate amounts of capital. SEC. 3. CREATION OF CORPORATION.

There is established on the date of enactment of this Act as an independent instrumentality of the United States the Reconstruction Finance Corporation (hereinafter referred to as the "Corporation"). The prin-

cipal office of the Corporation shall be located in the District of Columbia. There may be established agencies or branch offices in any city or cities of the United States under rules and regulations prescribed by the Board of Directors of the Corporation.

SEC. 4. BOARD OF DIRECTORS.

(a) Composition of the Board.—The management of the Corporation shall be vested in a Board of Directors (hereinafter referred to as the "Board") consisting of seven members, three of whom shall be the Secretary of the Treasury (or, in his absence, the Under Secretary of the Treasury), the Chairman of the Board of Governors of the Federal Reserve System, and the Chairman of the Council of Economic Advisers, who shall be members ex officio. Four other individuals shall be appointed by the President, by and with the advice and consent of the Senate.

(b) DIRECTORS APPOINTED BY THE PRESI-DENT .- Of the four Directors appointed by the President, one shall be a representative of labor, one shall be a representative of business, and two shall be representatives of the general public. The term of each Director shall be three years, but a Director may continue in office after the expiration of his or her term until a successor has been appointed and confirmed. Whenever a vacancy occurs among the Directors so appointed, the individual appointed to fill such vacancy shall hold office for the unexpired portion of the term of the Director he or she is selected to fill. No more than two of the Directors appointed by the President shall be members of the same political party. Each Director so appointed shall receive a salary at the rate provided for under section 5315 of title 5, United States Code, for level IV of the Executive Schedule.

(c) Conflicts of Interest.—No Director, officer, attorney, agent, or employee of the Corporation shall participate, directly or indirectly, in the deliberation upon or in the determination of any question affecting his or her personal interests, or the interests of any corporation, partnership, or in which he or she is directly or indirectly interested.

SEC. 5. GENERAL POWERS OF THE CORPORA-TION.

The Corporation shall have the power—
(1) to adopt, alter, and use a corporate seal;

(2) to make contracts:

(3) to sue and be sued, to complain and defend, in any court of competent jurisdiction, State or Federal;

(4) to appoint by its Board of Directors such officers, employees, attorneys, and agents as shall be necessary for the transaction of the business of the Corporation, without regard to the provisions of other laws applicable to the employment and compensation of officers or employees of the United States, to define their authorities and duties, to fix their compensation, to require bonds of them and fix the penalties thereof, and to dismiss at pleasure such officers, employees, attorneys, and agents;

(5) to prescribe, amend, and repeal, by its Board of Directors, bylaws, rules, and regulations governing the manner in which its general business may be conducted and the powers granted to it by law may be exercised:

(6) to make use of the United States mails in the same manner and upon the same conditions as the executive departments of the Federal Government; and

(7) to do all other acts and things which are necessary to the conduct of its business

and the exercise of all the rights and powers granted to it.

SEC. 6. SPECIAL POWERS OF THE CORPORATION.

- (a) FINANCIAL AID TO ELIGIBLE BUSINESS CONCERNS.—
- (1) The Corporation is authorized to provide assistance, in the forms and under the terms and conditions described herein and in section 7, to any eligible business concern. For the purpose of this Act, the term "business concern" means any individual, corporation, company, association, firm, partnership, society or other concern which is engaged in the manufacture or production of goods or services in the United States, or a bank, savings bank, trust company, building and loan association, insurance company, mortgage loan company, credit union, Federal land bank, Federal intermediate credit bank, agricultural credit corporation, livestock credit corporation, or other financial institution, organized under the laws of any State or of the United States

(2) A business concern is eligible for assistance under this section only if the Board has certified that the concern is likely to become insolvent without such assistance, that its closure would adversely and severely affect the economy, and that credit is not otherwise available to the concern on terms and conditions that are conducive to its survival

(3) The Corporation may make loans or guarantee the payment, in whole or in part, of interest, principal, or both on loans made by non-federal lenders to any eligible busi-

ness concern only if-

(A) the Board has obtained or developed a plan of reorganization and recovery which, in the judgment of the Board, is reasonably certain to restore such concern to profitability within the period for which credit or other assistance is extended. The plan must specify all actions to be taken, including reductions and other economies, sources of revenue and other credit, any necessary internal reorganization, and the contributions to be made by all interested parties. The Board shall review such plan periodically, and from time to time make such revisions as shall be necessary to keep the plan realistic and feasible; as

(B) where no such plan or reorganization and recovery can be obtained or developed, the Board has obtained or developed a plan of gradual liquidation which, in the judgment of the Board, will lead to the closing of the concern in as brief a period as possible without having an adverse and severe effect on the economy, but in no case longer than three years.

(4) Whenever, in the judgment of the Board, such action would reduce the risk or avert a threatened loss to the Corporation and would facilitiate a merger or consolidation of an eligible business concern with another business concern, or facilitate the sale of assets and the assumption of liabilities of an eligible business concern by another business concern, the Corporation may purchase any such assets, or lend money or guarantee the payment in whole or in part, of interest, principal, or both, on a loan by a non-Federal lender to another business concern. Any assets acquired by the Corporation under this paragraph shall be sold by the Corporation as soon as practical, but in no case less than two years after acquisition.

(b) Financial Aid to Eligible Municipalities.—

(1) The Corporation is authorized to extend aid, under the terms and conditions described herein and in section 7, to any eli-

gible municipality. For the purpose of this Act, the term "municipality" means a city, township, or any other political subdivision of a State which is a unit of general government, including the District of Columbia.

(2) A municipality is eligible for aid if the Board has certified that the municipality is making an adequate revenue effort, but is still effectively unable to bring all of its expenditures, other than capital items, into balance with its revenues and to obtain credit in the public credit markets or elsewhere in amounts and terms sufficient to meet the municipality's financing needs.

(3) The Corporation may, in the discretion of its Board, lend money or guarantee the payment, in whole or in part, of interest, principal, or both, on loans made by non-Federal lenders to any eligible municipality

only if-

(Å) the State (except in the case of the District of Columbia) has created an agency, board or other entity authorized by the law of the State to control the fiscal affairs of such municipality during the entire period for which assistance under this section will be outstanding (hereinafter referred to as the "independent fiscal monitor"):

(B) the State (except in the case of the District of Columbia) has created an agency, board or other entity authorized by the law of the State to act on behalf of or in the interest of the muncipality as its financing

agent; and

- (C) the municipality has submitted, with the approval of the independent fiscal monitor, a recovery plan which, in the judgment of the Board, will enable the municipality to bring all of its expenditures other than capital items into balance with its revenues, in a budget reported in accordance with accounting principles established under State law, and to resume borrowing for itself to the full extent required, within a reasonable period of time, but in no case more than five years.
- (4) Interest on certain guaranteed obligations to be taxed.—Section 103(f) of title 26, United States Code, is amended by inserting; "or under section 6 of the reconstruction Finance Corporation Act of 1981," Immediately after "New York City Loan Guanantee Act of 1978."
- SEC. 7. SPECIAL POWERS; LIMITATIONS AND CON-DITIONS.

(a) LIMITS ON THE AMOUNT OF AID.-

(1) The amount of assistance provided by the Corporation to an eligible business concern or municipality under section 6 shall be based on an independent determination by the Board of the need of any such concern or municipality.

(2) In no case shall the aggregate amount of assistance given under section 6 of this Act to, or in connection with, any one business concern and its subsidiary or affiliated business concerns or any one municipality—

(A) exceed at any one time 5 per centum of the sum of (i) the authorized capital stock of the Corporation, plus (ii) the aggregate amount of bonds of the Corporation authorized to be outstanding when the capital stock is fully subscribed;

(B) exceed, in the case of an eligible business concern with a plan of reorganization and recovery, 50 per centum of the amount of aid required by such plan (without regard to any subsequent revisions to it); and

(C) exceed, in the case of an eligible municipality, 50 per centum of the deficit in the operating budget of such municipality during the period covered by its recovery plan.

(3) The aggregate of the principal amount of the loans outstanding at any one time

with respect to which guarantees have been made, and of the loans that the Corporation has made directly shall not exceed 10 times the sum of the subscribed capital stock of the Corporation.

(b) TERMS AND CONDITIONS FOR LOANS AND

LOAN GUARANTEES .-

(1) Each loan or loan guarantee made under section 6 of this Act may be made for a period not exceeding 10 years, though in no case shall the period exceed the useful lives of any physical assets purchased with such loan.

(2)(A) Each direct loan shall bear interest at a rate not less than the current average market yield (as certified by the Secretary of the Treasury to the Corporation on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturity of such loan, adjusted to the nearest one-eighth of 1 per centum.

(B) Each loan to be guaranteed shall bear interest at a rate determined by the Board to be reasonable taking into account the current average yield on outstanding obligations of the United States with remaining periods to maturity comparable to the ma-

turity of such loan.

(3) Each such loan shall be fully and adequately secured, except that the requirement of this paragraph may be waived by the Board for a loan made pursuant to a plan of gradual liquidation. The Corporation, under such conditions as it shall prescribe, may take over or provide for the admininstration and liquidation of any collateral accepted by it as security for such loan. Each such loan may be made directly upon promissory notes or by way of discount or rediscount of obligations tendered for the purpose, or otherwise in such form and in such amount and at such interest or discount rates as the Corporation may approve, except that no loan or advance shall be made upon foreign securities or foreign acceptances as collateral or for the purpose of assisting in the carrying or the liquidation of such foreign securities and foreign acceptances.

(4) The Corporation may not guarantee a loan unless it determines that the terms, conditions, and security (if any), and the schedule and amount of repayments with respect to the loan, are sufficient to protect the financial interests of the Corporation and are otherwise reasonable, including a determination that the rate of interest on such loan does not exceed such rate as the Corporation determines to be reasonable, taking into account the range of interest rates prevailing in the private market for

similar loans.

(5) The Corporation shall be entitled to recover from an applicant for a loan guarantee under section 6 which is a business concern the amount of any payment made by the Corporation pursuant to such guarantee upon the failure of the applicant to pay when due the principal of and interest on the loan with respect to which the guarantee was made, unless the Corporation for good cause waives the right of recovery; and the Corporation shall be subrogated to all the rights under such loan of the recipient of such payment.

(6) Any loan guarantee by the Corporation under this Act shall be incontestable (A) in the hands of an applicant on whose behalf such guarantee is made unless the applicant engaged in fraud or misrepresentation in securing such guarantee, and (B) as to any person (or his successor in interest) engaged in fraud or misrepresentation in making or contracting to make such loan.

- (7) The Corporation may guarantee shortterm obligations incurred for the purpose of obtaining temporary funds with a view to refinancing from time to time so long as the entire term does not exceed that specified under paragraph (1) and the borrower continues to be eligible for assistance.
- (8) Loans and guarantees of loans and of municipal debt shall be subject to such further terms and conditions as the Corporation may prescribe to carry out the provisions of this Act.
- (c) Prohibition Against Fees.—No fee or commission shall be paid by any applicant for a loan or guarantee under this Act in connection with any such application or any loan or a guarantee made under this Act, and the agreement to pay or the payment of any such fee or commission shall be unlawful.
- (d) Federal Financing Bank.—Notwithstanding the provisions of section 6 of the Federal Financing Bank Act of 1973 or any other provision of law, none of the loans guaranteed under this Act shall be eligible for purchase by sale or issuance to, the Federal Financing Bank or any other Federal agency or department or entity owned in whole or in part by the United States.
- SEC. 8. CAPITALIZATION OF THE CORPORATION; OTHER FINANCIAL PROVISIONS.
  - (a) AUTHORIZED CAPITAL STOCK .-
- (1) The Corporation shall have capital stock of \$5,000,000,000, subscribed by the United States of America, payment for which shall be subject to call in whole or in part by the Board of Directors of the Corporation.
- (2) Effective October 1, 1983, there is authorized to be appropriated \$5,000,000,000 for the purpose of making payments upon such subscription when called.
- (b) Funds on Deposit With Treasury or FEDERAL RESERVE BANK .- All moneys of the Corporation not otherwise employed may be deposited with the Treasurer of the United States subject to check by authority of the Corporation or in any Federal Reserve bank, or may, by authorization of the Board of Directors of the Corporation, be used in the purchase for redemption and retirement of any notes, debentures, bonds, or other obligations issued by the Corporation, and the Corporation may reimburse such Federal Reserve banks for their services in the manner as may be agreed upon. The Federal Reserve banks shall act as depositories, custodians, and fiscal agents for the Reconstruction Finance Corporation in the general performance of its powers conferred by this Act.
- (c) Issuance of Notes, Debentures, and Bonds.—
- (1) The Corporation is authorized, with the approval of the Secretary of the Treasury (hereinafter referred to as the "Secretary") and subject to section 11 of this Act. to issue, and to have outstanding at any one time in an amount aggregating not more than the sum of ten times its subscribed capital stock, its own notes, bonds, or other such obligations (hereinafter referred to as "obligations"). Obligations of the Corporation shall mature not more than twelve years from their respective dates of issue, shall be redeemable at the option of the Corporation before maturity in such manner as may be stipulated in such obligations, and shall bear such rate or rates of interest as may be determined by the Corporation.
- (2) The Corporation, with the approval of the Secretary, may sell on a discount basis

short-term obligations payable at maturity without interest.

The obligations of the Corporation may be secured by assets of the Corporation in such manner as shall be prescribed by its Board of Directors. Obligations of the Corporation may be issued in payment of any loan authorized by this Act or may be offered for sale at such price or prices as the Corporation may determine with the approval of the Secretary.

(4) Obligations of the Corporation shall be fully and unconditionally guaranteed both as to interest and principal by the United States and such guaranty shall be expressed on the face thereof. In the event that the Corporation shall be unable to pay upon demand, when due, the principal of or interest on obligations issued by it, the Secretary shall pay the amount of such principal or interest, which amount is authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated. To the extent of the amounts so paid, the Secretary of the Treasury shall succeed to all the rights of the holders of such obligations

(d) Sales of Corporation Obligations to THE TREASURY; PUBLIC-DEBT TRANSACTIONS.

(1) The Secretary is authorized, subject to section 11 of this Act, to purchase any obligations of the Corporation to be issued under this section.

(2) The Secretary may, at any time, sell any of the obligations of the Corporation acquired by him under this section.

(3) Obligations of the Corporation shall not be eligible for discount or purchase by any Federal Reserve bank.

(e) Exemption From Taxation .-

(1) Any and all obligations issued by the Corporation shall be exempt both as to principal and interest from all taxation (except surtaxes, estate, inheritance, and gift taxes) now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing author-

(2) The Corporation, including its franchise, its capital, reserves, and surplus, and its income shall be exempt from all taxation now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority; except that any real property of the Corporation shall be subject to State, territorial. county, municipal, or local taxation to the same extent according to its value that

other real property is taxed.

(f) FORMS OF OBLIGATIONS; PREPARATION BY THE SECRETARY OF THE TREASURY.-In order that the Corporation may be supplied with such forms of obligations as it may need for issuance under this Act, the Secretary is authorized to prepare such forms as shall be suitable and approved by the Corporation to be held in the Treasury subject to delivery. upon order of the Corporation. The engraved plates, dies, bed pieces, and so forth, executed in connection therewith, shall remain in the custody of the Secretary. The Corporation shall reimburse the Secretary for any expenses incurred in the preparation, custody, and delivery of such obligations.

(g) CORPORATION AS A DEPOSITARY OF PUBLIC MONEY: OBLIGATIONS CONSIDERED PUBLIC INVESTMENTS .-

(1) When designated for that purpose by

the Secretary, the Corporation-

(A) shall be a depositary of public money, except receipts from customs, under such regulations as may be prescribed by the Secretary:

(B) may be employed as a financial agent of the Government; and

(C) shall perform all such reasonable duties, as depositary of public money and fi-nancial agent of the Government, as may be required of it.

(2) Obligations of the Corporation shall be lawful investments, and may be accepted as security for all fiduciary, trust, and public funds the investment or deposit of which shall be under the authority or control of the United States or any officer or officers thereof.

#### SEC. 9. ADMINISTRATIVE PROVISIONS.

(a) Cooperation With Other Federal Agencies.

(1) In order to enable the Corporation to carry out the provisions of this Act, the Treasury Department, the Comptroller of the Currency, the Federal Reserve Board, the Federal Reserve banks, the Interstate Commerce Commission, the Internal Revenue Service, and all other executive departments, agencies, boards, commissions, and independent establishments of the Federal Government, are hereby authorized, under such conditions as they may prescribe, to make available to the Corporation, in confidence, such reports, records, or other information as they may have available relating to the condition of business entities or municipalities with respect to which the Corporation has had or contemplates having transactions under this Act, or relating to individuals, associations, partnerships, or corporations whose obligations are offered to or held by the Corporation as security for loans to business entities or municipalities under this Act, and to make through their examiners or other employees for the confidential use of the Corporation, examinations of such business entities and munici-

(2) Every applicant for a loan or a guarantee under this Act shall, as a condition precedent thereto, consent to such examinations as the Corporation may require for the purposes of this Act and that upon request, reports of examinations by constituted authorities may be furnished by such authorities to the Corporation.

(b) REPORTS BY THE CORPORATION .- The Corporation shall make and publish a quarterly report, the first of which shall be made not later than January 1, 1984, of its operations to Congress. Each such report shall include a statement of-

(1) the aggregate loans and guarantees made to each borrower:

(2) the number of borrowers and amount borrowed segregated by States;

(3) the assets and liabilities of the Corpo-

(4) the names and compensation of all individuals employed by the Corporation compensation exceeds whose \$1.500 month.

(c) AUDIT OF FINANCIAL TRANSACTIONS; REPORT OF AUDIT.

(1) The account of the Corporation shall be audited annually in accordance with generally accepted auditing standards by independent certified public accountants or independent licensed public accountants certified or licensed by a regulatory authority of a State of other political subdivision of the United States. The audits shall be conducted at the place or places where the accounts, financial records, reports, files, and all other papers, things, or property belonging to or in use by the Corporation and necessary to facilitate the audits shall be made

available to the person or persons conducting the audits, and full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians shall be afforded to such person or persons.

(2) A report of each such independent audit shall be included in the appropriate quartely report submitted to Congress under subsection (b) of this section. The report of each such independent audit shall set forth the scope of the audit and shall in-

(A) such statements as are necessary to present fairly the Corporation's assets and liabilities and surplus or deficit;

(B) an analysis of the changes therein during the year:

(C) a statement in reasonable detail of the Corporation's income and expenses during the previous year:

(D) a statement of the sources and applications of funds; and

(E) the independent auditor's opinion of such statements.

SEC. 10. CRIMINAL PROVISIONS.

(a) WILLFUL MISREPRESENTATIONS TO THE CORPORATION.—Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for himself or for any applicant any loan, or extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the Corporation, or for the purpose of obtaining money, property, or anything of value, under this Act, shall be punished by a fine of not more than \$10,000 or by imprison-ment of not more than five years, or both.

(b) Counterfeiting and Other Mishandling

of Obligations.-Whoever-

(1) falsely makes, forges, or counterfeits any obligation or coupon in limitation of or purporting to be an obligation or coupon issued by the Corporation;

(2) passes, utters or publishes, or attempts to pass, utter, or publish, any false, forged, or counterfeited obligation or coupon purporting to have been issued by the Corporation, knowing the same to be false, forged, or counterfeited:

(3) falsely alters any obligation or coupon issued or purporting to have been issued by

the Corporation:

(4) passes, utters or publishes, or attempts to pass, utter, or publish, as true any falsely altered or spurious obligation or coupon issued or purporting to have been issued by the Corporation, knowing the same to be falsely altered or spurious; or

(5) willfully violates any other provision

of this Act:

shall be punished by a fine of not more than \$10,000 or by imprisonment for not more than five years, or both.

(c) DEFRAUDING THE CORPORATION, AUDITORS, OR THE PUBLIC.—Whoever, being connected in any capacity with the Corpora-

(1) embezzles, abstracts, purloins, or willfully misapplies any moneys, funds, securities, or other things of value, whether belonging to the Corporation or pledged or otherwise entrusted to it;

(2) with intent to defraud the Corporation or any other body politic or corporate, or any individual, or to deceive any officer, auditor, or examiner of the Corporation, makes any false entry in any book, report, or statement of or to the Corporation, or, without being duly authorized, draws any order of issues, puts forth, or assigns any obligation, or draft, bill of exchange, mortgage, judgment, or decree thereof;

(3) with intent to defraud, participates, shares, receives directly or indirectly any money profit, property or benefit through any transaction, loan, commission, contract, or any other act of the Corporation; or

(4) gives any unauthorized information concerning any future action or plan of the Corporation which might affect the value of securities, or, having such knowledge, invests or speculates, directly or indirectly, in the securities or property of any company, bank, or corporation receiving loans or other assistance from the Corporation;

shall be punished by a fine of not more than \$10,000 or by imprisonment of not more than five years, or both.

(d) USE OF WORDS "RECONSTRUCTION FINANCE CORPORATION" BY OTHERS.—No individual, association, partnership, or corporation shall use the words "Reconstruction Finance Corporation" or a combination of these three words, as the name or a part thereof under which he or it does business. Every individual, partnership, association, or corporation violating this prohibition shall be guilty of a misdemeanor and shall be punished by a fine not exceeding \$1,000 or imprisonment not exceeding one year, or both.

(e) Section 433 of title 18, United States Code, is amended by inserting "of 1981" immediately after "the Reconstruction Finance Corporation Act."

SEC. 11. AUTHORIZATION OF APPROPRIATIONS.

There are hereby authorized to be appropriated for ten fiscal years beginning on October 1, 1983, such sums as may be necessary to carry out the provisions of this Act. Not withstanding any other provision of this Act, the authority of the corporation issue notes, debentures, bonds, or other obligations under Section 8 of this Act, and the authority of the Secretary of the Treasury to purchase any such notes, debentures, bonds, or obligations, under Section 8 of this Act shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

SEC. 12. SEPARABILITY OF PROVISIONS.

The right to alter, amend, or repeal this Act is hereby expressly reserved. If any part of this Act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of the Act.

## Address Given by Felix G. Rohatyn

For more than a year now, we have both witnessed and participated in this country's most radical economic and social experiment since the New Deal. Its aims were impeccable. Lower taxes and lower government spending, reduced inflation, reduced regulations, a stronger defense. But the application of the program was incoherent and the results, so far, are rather frightening. Even though changes in direction were clearly required, in our consumption and investment patterns, in our runaway social costs, and in our dismal productivity record, the remedy, in some respects, has turned out to be worse than the disease. Interest rates have remained prohibitive while unemployment has soared, federal deficits have risen higher and higher and the financial structure of states, cities and of entire industries and regions of the country has become dangerously fragile. A dramatic lowering of the inflation rate has indeed been achieved but mostly by creating a steep recession and as a result of luck with food and energy prices. How to create growth without inflation remains as elusive as ever.

Many of our most serious chronic prob-lems will continue to deteriorate unless a different government philosophy is applied. Supply-side economics and monetarism both foster the notion that abstract and impersonal market forces can turn our economy around and resolve our many problems. But "hands-off" government is not an accepta-ble or effective policy for troubled times. For the first time since WWII, we have a world-wide economic contraction, together with real deflationary forces superimposed on fragile financial structures. Industries, financial institutions and a host of governments find themselves overburdened with debt and without sufficient cash flow to service their obligations, much less for investment in the future. The effects are being felt by millions of individuals, their families, their communities and whole regions of the country.

A "hands-off" government cannot revive the economy, keep inflation down, deal with our regional and industrial problems, our chronic poverty and education problems, or reduce interest rates. These objectives can only be achieved by governments actively involved in a process of cooperation with

businesses and labor.

Business-labor-government cooperation coupled with courageous political leadership saved New York City. I believe this can apply to the nation as well, even though the current theology is just the opposite.

## FIRST STEP: AGREEMENT TO REDUCE DEFICITS AND INTEREST RATES

Any program of national recovery must start with an accord among the President, the Congress and the Federal Reserve that will credibly balance the budget over a finite time period and result in significantly lower interest rates quickly. We need decisive leadership from the President, and cooperation in the Congress, and on the part of the Fed. I believe there will be a budget resolution, but that is not enough. The budget package must be credible and longrange. There must be a credible slow down in entitlement growth, slow down in defense growth and recurring, growing revenue measures such as energy taxes. Neither the Senate nor the House resolution have realistically addressed any of these issues. The financial markets are not illiterate; we will need better than just a set of numbers which ignore the real world.

Taking Social Security out of the budget negotiations, without concrete action, is a copout on both sides of the aisle. Both the President and the Congress have avoided the issue. Nonetheless everyone knows the system needs reform. Waiting for the election will not make it change. A real alternative might be to make the system self-sustaining by taxing some of the benefits of the better-off, and by slowing benefit growth. That is the difference between form and substance and it need not wait until No-

vember. It should be faced now.

A similar lack of candor colors the debate over defense. No one opposes an improvement in our national defense. Under the Administration's plan, the defense share of the Federal budget would increase to 34 percent in FY 1985 from 24 percent in FY 1981. This is an increase of \$300 billion over the present levels. Although the House and Senate Budget Committee versions are somewhat less generous, it is clear that we will spend substantially more for defense in

the next few years. but we must not repeat the mistake of Vietnam by having a wartime military budget without paying for it. If the country feels it needs this level of defense, it should be willing to pay for it with the equivalent of a War Tax. A 50¢ per gallon increase in the gasoline tax should be segregated and earmarked for defense; such a defense tax would raise about \$50 billion per annum and would finance almost completely the increase in the defense budget. It would also reduce the budgetary deficit over the five-year period by \$250 billion and would go a long way to restore financial stability to our markets.

I would like to make a more general statement about defense. Regardless of one's judgment about the size of the defense buildup or the call for a nuclear freeze. It is time that we recognized a fundamental truth: The world cannot afford to spend on weapons what it is spending today. The U.S. and the Soviet Union have to take the lead in deescalating these levels not only from the perspective of physical survival, but also from the perspective of economic survival.

We are witnessing the same pursuit of form over substance on a grander scale with the call for a Constitutional amendment for a balanced budget. The idea of providing Congress with a plausible excuse to do the right thing is obviously appealing. However, distracting the country over the next few years with such a proposal is too high a price to pay for an illusion. Because it is only an illusion. NYC has always had a balanced budget requirement; it never stopped anyone until the money actually stopped.

What we need first, however, is an accord among the President, the Congress and the Fed. It will not solve all of our problems, but it could avoid imminent disaster.

## NEXT STEPS: FACING BASIC PROBLEMS

Once we have stopped the current dangerous downward slide we can turn to more basic problems. We must restructure our basic industries, we must rebuild our cities, and we must dispel our current illusion that the energy crisis is over.

Some terribly destabilizing tides are running in this country, regionally, socially, industrially. The danger in relying solely on the market system to provide adjustments is that the market system does not provide the leadership to act until it is too late. The automotive industry, both management and the UAW, waited until Chrysler was effectively bankrupt, the rest of the industry on its knees, and 300,000 people laid off, before beginning—and it is only that—a new relationship.

New York City lost 500,000 manufacturing jobs, one million taxpayers, had an operating deficit of \$1½ billion annually and \$6 billion of short-term debt before we restructured the City. And New York is not alone.

During the last decade, Chicago lost 12 percent of its population, Baltimore 14 percent, Cleveland 24 percent, and St. Louis 28 percent. The proportion of taxpayers moving out was undoubtedly greater.

During the same period some of the most important American industries have been falling badly. American Motors lost \$137 million last year. Chrysler and Ford together lost a total of over \$1.5 billion. International Harvester and Kaiser Steel lost nearly a half billion dollars each.

The industrial locomotives that have driven this country for the last century are in the throes of a self-eviscerating cycle. Racked by high interest rates and continued weak demand, beset by harsh foreign competition, unable to raise the vast amounts of capital needed to modernize, they live from hand to mouth, short-changing the future in order to survive today. They are affected by deep structural shifts not only in regional prosperity, but in the basic nature of American work.

We are deluding ourselves it we believe this erosion will be limited to our older industries. From computers to microchips, from aircraft to video games, we are going to be subjected to fierce attacks from Japan and elsewhere. Even today, we might see distress in certain areas of electronics not dissimilar to our older industries, if companies like Fairchild Semiconductor and Mostek had not been acquired by giant companies such as Schlumberger and United Technologies.

Allocating blame for all these trends is easy—there is enough for everyone. Government policies and programs have been costly and ill-advised, particularly with respect to energy, especially the cowardly avoidance of taxing gasoline at much higher rates. Weak mana ments and short-sighted unions have collaborated in the development of inefficient organizations whose costs are high and productivity low.

It is no coincidence that the cities under the greatest strain are tied to the industries in the most severe difficulty, particularly in the region extending today from Baltimore to St. Louis, but elsewhere as well. The dismal performance of the economy, together with last year's tax and budget cuts, have created enormous fiscal pressures on local governments in practically all but energy-producing regions of the country. The State of Ohio, which recently passed a tax increase of \$1.3 billion together with budget cuts to close its budget gap, now faces a new additional deficit of about \$1 billion as a result of the recession; New York City, coming off a \$250 million surplus in the current fiscal year, is raising taxes and freezing employment levels to cope with a potential \$800 million gap next year. The State of New York is proposing similar actions for the same reason. Whereas four years ago, the Municipal Assistance Corporation was selling long-term bonds to finance New York City's capital budget at 71/2 percent interest, we are doing so today, with increasing difficulty, at over 14 percent free of city, State and Federal income taxes. This situation is repeated in city after city. state after state.

This is not just a "Snow Belt/Sun Belt" phenomenon. The State of California now faces a budget deficit estimated by some at \$1 billion or more. Many cities in the Sun Belt suffer fully as much from unemployment, poor housing, poverty and limited economic opportunities as the cities in the Northeast and Midwest. In an analysis published recently in The New York Times, seven of 19 sunbelt cities had worse hardship ratings than New York. The Sun Belt's golden glow cannot hide the difficulties faced by New Orleans, Miami, Birmingham, Atlanta and other cities within its midst. Their problems are national.

Existing trends are likely to aggravate rather than attenuate this situation; the

rather than attenuate this situation; the result of another decade like the last one will be to divide individual cities and the country as a whole into "have" and "havenot" regions, with unpredictable but probably highly unpleasant consequences. Other than 11 energy-producing states, every state in this country is facing budgetary difficulties. In these trends is the making of social

At the same time, with much of state and local government in terrible straits, the Administration brought forth a proposal for a new Federalism that could not be accepted; it was a plan that burdened our budgets with billions of dollars in additional programs, but without permanent new revenues. Coming on top of proposed Federal budget cuts in support for state and local government from \$15 billion in fiscal 1981 to \$41 billion in fiscal 1985, it was simply to

#### LONG-TERM GOALS

This country's goals must be twofold: First, to have a functioning economy, with stable growth and emphasis on the creation of private sector jobs; and second, to have all elements of our society, and all regions of the country participate in that growth as fully as possible.

The United States today in its basic industries needs a second industrial revolution. The notion of "backing the winners instead of the losers" is as facile as it is shallow. The thought that this nation can function while writing off basic industries—automotive, steel, glass, rubber and others—to foreign competition is nonsense. Nothing is more inhuman than unemployment, nothing is ultimately more inflationary than unemployment.

But we must be realistic about how badly our basic industries have slipped when judgements are made about such issues as protectionism, government regulations, tax relief, and management and labor agreements. Realism, however, must not bean excuse for inaction. The motto cannot be "back the losers" but rather "turn the losers into winners".

This kind of economic revitalization is obviously essential to healthy cities, but they are tasks as well for government. Government at all levels is the nursery of industry: It must provide the healthy economic environment and the economic infrastructure—the roads, the ports and harbors, and the communications and transportation networks that enable business to function.

### A FAIR FEDERALISM

First, we need a fair Federalism.

It should provide for Federal assumption for the financing of all poverty programs (welfare, medicaid, food stamps) and transfer funding and full authority to the states those programs the states already administer or are capable of managing (education, transportation, etc.). But administration and funding are different matters. Permanent revenues should be provided to the states to make up any net loss resulting from such a swap and local tax reduction should be an objective. Revenue sharing should be increased, not cut. Too many states are going through an endless cycle of service reductions and tax increases. They cannot be forced to pay for programs in which there is an important national interest-programs like economic development. education and supporting the poor-from local tax bases, some of which are ample and others not. A new and fair federalism is needed, it should be done right and it should be done soon.

A NEW RECONSTRUCTION FINANCE CORPORATION

Second, to redevelop the parts of the nation that need help, as well as to provide a safety net for any of our major financial institutions in a sudden emergency, a Reconstruction Finance Corporation should be created for the 1980's. The original RFC was created by Herbert Hoover in 1918. Under Franklin Roosevelt, it was run by the

Texas businessman, Jesse Jones. The RFC of the 1930's saved numerous banks, some cities and many businesses and prevented much larger dislocations from taking place. It financed a vast number of defense plants as well as the development of synthetic rubber during WWII. And, it made money for the taxpayer.

In order to see that an RFC is justified, we need only look at how government works without one. The case of Chrysler is an example of how not to proceed. Providing government-guaranteed loans at close to 20 percent interest to a company which has too much debt and no net worth can buy some time, but nothing else. Companies like Chrysler need permanent equity capital in the form of new common stock. Only equity capital can help make a company's survival credible, and impel other participants (the unions, the lenders, the suppliers) to make the major efforts and sacrifices that have to be made if they are going to be put back in shape.

#### THE RFC AS SAFETY NET

Chrysler is hardly an isolated case. A good many large industrial companies, airlines, savings and loan associations and possibly banks could be in serious difficulties if we cannot break out of our current economic straitjacket of high interest rates, low growth and low productivity. Instead of improvising expensive half measures in the heat of crises and politics, we should have a safety net to deal with an economic emergency affecting a number of large organizations at the same time.

We have to be realistic about the fragility of many of our larger financial institutions. They are cause for serious concern. We do not know how much of the capital of the FDIC or the FSLIC has been committed to the rescue of those savings institutions effected so far. We do know that the number of savings institutions which may have to be rescued down the road is several times in excess of what has been done so far, and the amounts required may be considerable.

The international financing situation creates other types of risk, an unexpected defualt by a large debtor like Argentina, caused by political rather than economic events, could create both liquidity and capital problems for some of our large banks. The Federal Reserve Bank could handle the liquidity problem but only an RFC-type institution could handle the capital problem by purchases of preferred stock or other similar instruments.

Those of us who have been involved in major financial problem situations know how critical it is to contain a financial crises before it spreads. We need an RFC as a financial insurance policy, which was the basis for its reactivation in 1932.

#### THE RFC AS AID TO URBAN POLICY

An RFC could also play a major part in an urban capital reconstruction policy. Throughout the country, city after city faces budgetary problems and crumbling infrastructure. The Boston Transit System was recently shut down for lack of funds; the New York MTA operates a subway system so old that it poses physical dangers, and it will need \$15 billion over ten years to provide adequate service. Across the country bridges and sewers, sanitation and mass transit, schools and firehouses have all been allowed to deteriorate. The RFC could provided low-interest, long-tern loans to enable municipalities to maintain their physical plants. By improving the quality of city life, such investments could help to retain tax-

payers while providing jobs to help the existing tax base. As in the case of industrial investments, the RFC could ask for participation by other parties: The various states, business and labor, the local unions and banks. As with industry, reform and restructuring would, in many cases, have to be the quid pro quo for receiving capital on favorable terms.

One of the unexpected effects of last year's tax legislation was to destroy one of the traditional subsidies to local governfinancing—the municipal market. By last December, the advantages of the tax exemption on interest had shrunk to the point that municipal bonds were yielding only one percentage point less than long-term treasury bonds. To balance a federal approach that already requires local governments to bear a larger burden of operating costs, there must be means to reduce the cost and increase the availability of capital. Capital is needed to reduce the cost in public services just as it is needed to reduce costs in private industry. The RFC could

But RFC assistance must be temporary. It should act as a revolving fund which can be used when necessary, and whose holdings should be sold in the marketplace when it has done its job. The RFC is not a permanent dole; it is a temporary bridge. It should self-destruct after a maximum of ten years.

The RFC, of course, will be said to interfere with the free market system. But, at present, the price of our energy is not freely set, nor is the price of our food, or the price at which we must borrow money. Free markets are clearly desirable, but we do not in fact live in a free market economy and never will; we live in a mixed economy in which prices and capital are, and will be, subject to government influence and to agreements between labor and business

The RFC could continue this tradition. Like MAC, its board would include representatives of labor, business and the public, and its decisions would reflect the same process of negotiation and consensus.

### THE ROLE OF GOVERNMENT

The United States today is a country in transition. It is in transition from being the world's dominant military power to sharing that power with the Soviet Union; it is in transition from an industrial to a service society; from being a predominantly white, northern European society based in the Northeast and Midwest to being a multiracial society with its center of gravity in the Sunbelt. A society in transition cannot be governed by a rigid dogma; on the contrary, it requires a government which is flexible, pragmatic, even sometimes deliberately ambiguous. Shared values must be clear, but the means to the end cannot be

The critical issues we face today are not simply the levels of interest rates or what kind of package finally comes out of budget negotiations. These things are important, but they must not obscure the real issues. They are, in no particular order:

(A) The rapid growth of a permanent underclass in America. The residents of innercity ghettos, black and hispanic, undereducated, underskilled, without real hope of participating in the future of the country;

(B) The regional split between Sunbelt and Frostbelt, which is accelerating and which will leave the northern half of the U.S. in serious difficulty while, simultaneously, creating major problems for the Sunbelt.

(C) The decline of our traditional manufacturing sectors and the automation which will create long-term unemployment in the hardest hit part of the country; the illusion that we have resolved our energy problems;

(D) Illegal immigration in great numbers, especially from Mexico, which will create additional social tensions unless we produce enough jobs to absorb our own unemployed along with new arrivals;
(E) The decay of our cities and the decline

in the quality of urban life;

(F) The roller-coaster of an economy which knows only inflation or recession, or both, but cannot produce stable non-inflationary growth;

(G) The mountains of debt presently

crushing every level of society;

(H) Nuclear proliferation and the need to control and reduce the level of nuclear weapons while being realistic about Soviet power;

(I) The decline of the written press and the dominance of TV in the political dia-

logue of the nation.

Today's conservative experiment will fail because it has no relevance to the world we live in, just as yesterday's liberalism failed for somewhat different reasons. The appropriate role of government remains the major unanswered question and we are soon going to run out of time for experiments.

Today, we are all looking for permanent and perfect answers to excruciatingly complicated problems. In Government and public life, there may not be any such thing as the right answer. There may, at best exist a process whereby trends can be affected and the direction of social and economic behavior temporarily influenced. This is the antithesis of the planned, central domination of government, but it means government committed to oppose destabilizing trends before they became floodtides. It is a permanent but ever changing process.

And it is a process that must include the major institutions and constituencies of our society-political, labor and business. The changes we will undergo will demand effort and sacrifice by many, a sacrifice they will not make unless they have a stake and a chance to participate.

The answers to our problems, imperfect and temporary that they may be, must come from such a process. Such a rational middleground, however, need not be wishy-

There is no reason why a hard-headed liberalism cannot live with the reality that we

cannot spend ourselves into bankruptcy. There is no reason why an economy geared mostly to private sector growth, cannot at the same time, permit limited government intervention where needed, such as a modern version of the Reconstruction Finance Corporation.

There is no reason why limited and temporary protection for our hard hit industries cannot be conditioned on restrained wage and price behavior by labor and management; this might become the model for an incomes policy where wage and price behavior could be linked to productivity.

There is no reason why savings and investment cannot be encouraged while energy use and other consumption are taxed at higher rates, to produce growth and jobs. Some of these jobs could be directed, with government assistance but under private-sector management, to inner city ghettos to provide a future where none currently

There is no reason why large savings cannot be effected in defense, and particularly in reducing nuclear delivery systems, if we are willing to pay the price of larger standing conventional forces and the distasteful possibility of a peacetime draft.

There is no reason why our tax system cannot be improved, simplified and made more equitable by a flat tax on all income at significantly lower rates or some variant thereof such as the proposal of Senator Bradley and Congressman Gephardt. The present tax system is a disgrace, both intellectually and equitably.

One must admit, however, that although there is no reason why these results cannot be achieved, we must be realisite about the political difficulty of bringing this about. Without the active support of the American people and a process which encourages the active cooperation of business/labor/and

government it cannot happen.

An active partnership between business labor and government strikes the kinds of bargains-whether on an energy policy, regional policy, or industrial policy-that an advanced western democracy requires to function, and that, in one form or another, have been made for years in Europe or Japan. This partnership will have to be as indigenous to our culture and traditions as those of Germans and Japanese have been to theirs, and it will have to be competitive. Much is at stake in making such a partnership work: Our ability to protect ourselves, and to deter our enemies; depends on maintaining a stable, solid economic, industrial and social base at home. Our national security, our industrial power, the strength of our social system itself, are all tied to one another and to their need for a new pattern of cooperation to emerge.

### By Mr. DECONCINI:

S. 3111. A bill to amend title 5 of the United States Code to prohibit ambassadors and ministers from making political contributions and taking part in political campaigns; to the Committee on Governmental Affairs.

PROHIBITING MINISTERS AND AMBASSADORS FROM MAKING POLITICAL CONTRIBUTIONS AND TAKING PART IN POLITICAL CAMPAIGNS

 Mr. DECONCINI. Mr. President, I introducing today legislation which would amend the Hatch Act to prohibit ambassadors from making political contributions and taking part in political campaigns.

Currently, ambassadors and Cabinet members are exempt from the limitations on political activity which the Hatch Act applies to the vast majority of Government employees. I am not a supporter of the Hatch Act in terms of its broad implications—in my view, Federal workers—except in the case of sensitive Justice Department, intelligence agency, and Internal Revenue Service positions-should have the same political rights as other citizens. However, if the intent of the Hatch Act is to prevent partisan politics from interfering in the way Federal workers do their jobs, it seems particularly important that this proviso be applied to the position of ambassador. Our ambassadors' main function is to convey a certain image of the United States-an image that is as consistent and clear as possible. Professionalism is a highly

prized attribute of an ambassador. Unfortunately, when an ambassador engages in partisan politics, campaign rhetoric combined with the expediency of the moment, tends to lead to the distortion of American foreign policy.

The State Department's official policy frowns upon such partisan activity by ambassadors, but this does not seem to deter some ambassadors who are willing to sacrifice professionalism for the sake of grinding a particular political axe or for the sake of pleasing political superiors. An ambassador to a foreign country serves as a vital link between our Government and the government of the country to which he or she is accredited. Statements the ambassador may make are carefully scrutinized by the government of the host country as reflections of the policies of the government the ambassador represents. An ambassador becomes an almost totally public personna who cannot afford to make offhand comments or to engage in partisan politics.

During my recent reelection campaign, one particular individual accredited as an American ambassador to a Latin American country came to Arizona and interjected himself in the campaign. He made commercials endorsing my opponent on the basis of a series of statements about Central America that ran counter to official American policy. Frankly, I found the behavior startling and terribly damaging to our Central American policy.

I was equally amazed to discover that while a lowly clerk in the bureaucracy whose participation in politics carries with it absolutely no implications about Government policy is forbidden to do so by the Hatch Act, an ambassador whose every word and action conveys to foreigners the views and attitudes of the American Government is under no such structure. Surely, this must be an oversight resulting from the simple fact that the situation has never arisen. I believe most of us, Mr. President, assume that ambassadors would have better sense than to embroil themselves in a political campaign. It certainly requires an incredible lack of judgment to do so.

The legislation I am introducing will eliminate the loophole which presently allows ambassadors to engage in overt political activity. I urge my colleagues on the Governmental Affairs Committee to give this matter their attention as soon as possible. I also ask unanimous consent that the text of the bill be printed in the Record at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

#### S. 3111

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 7323 of title 5, United States Code, is

amended by inserting "(other than an ambassador or minister)" after "Senate".

(b) Paragraph (3) of section 7324(d) of such title is amended by striking out "in its relations with foreign powers or".

By Mr. PELL (for himself and Mr. Stafford):

S. 3112. A bill to establish an art bank; to the Committee on Labor and Human Resources.

#### ART BANK

• Mr. PELL. Mr. President, today I am introducing legislation that would establish a national art bank. I ask unanimous consent that the text of the bill be printed in the RECORD

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

#### S. 3112

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Art Bank Act of 1983".

#### PURPOSE

SEC. 2. It is the purpose of this Act to assist and encourage artistic creation through the purchase and display of works of art, to beautify public places by increasing the availability of works of art for exhibition, and to foster appreciation and understanding of art by making it more accessible to the public.

SEC. 3. (a) The National Foundation on the Arts and the Humanities Act of 1965 is amended by adding after section 11 the following new section:

#### "ART BANK

"Sec. 12. (a) There is established, within the National Endowment for the Arts, an Art Bank, which shall be headed by a Direc-

"(b)(1) The Director of the Art Bank shall be appointed by the Chairman of the National Endowment for the Arts and report to the Chairman with respect to the activities of the Art Bank.

"(C) The Director of the Art Bank is authorized to-

"(1) appoint periodically ad hoc juries of artists and art experts for the purpose of assisting in the selection of visual works of art:

"(2) select visual works of art for the Art Bank with the assistance of juries and enter into agreements to purchase at fair market value:

"(3) provide for the safe and secure storage, transportation, and insurance of such

"(4) make such works available on loan to Federal supervisory authorities, including the Administrator of the General Services Administration, the Architect of the Capitol, and the Director of the Administrative Office of the United States Courts, who shall supervise the loan of such works to the Federal facilities and activities under their respective jurisdictions for display;

"(5) make such works available on loan to museums;

"(6) require those who receive fellowships in the visual arts from the National Endowment for the Arts to donate one of their own works to the Art Bank, which work can be of the artist's own choosing:

"(7) sponsor exhibitions of works from the Art Bank:

"(8) select periodically works from the Art Bank for sale by public auction or otherwise;

"(9) encourage and provide technical assistance to State and local governments and nonprofit institutions for the establishment of art banks; and

"(10) promulgate such rules and regulations as may be necessary to carry out the provisions of this section.

"(d) Members of juries appointed pursuant to subsection (c)(1) of this section who are not regular full-time employees of the United States shall receive, while serving on such juries, compensation at a rate equal to an amount fixed by the Chairman of the National Endowment for the Arts but not to exceed \$125 a day including traveltime, and, while so serving away from their homes or regular places of business, they may be allowed travel expenses including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed expenses under section 5103(b) of title 5, United States Code.

"(e)(1) In selecting works of art for purchase under subsection (c)(2) of this section, the Director shall consider—

"(A) the quality of such works;

"(B) the need to encourage artists who are not well known to the public; and

"(C) the need to encourage artists from all sections of the United States.

"(2) Not more than \$15,000 may be expended for the work of any one artist in any one fiscal year.

"(f) Notwithstanding any other provision of law, amounts received by the National Endowment for the Arts from the sale or lease of works from the Art Bank under subsection (c) of this section may be used in the fiscal year in which such amounts are received and for succeeding fiscal years to carry out the provisions of this section.

"(g) For the purpose of carrying out the provisions of this section, there are authorized to be appropriated \$1,500,000 for fiscal year 1984, \$2,000,000 for fiscal year 1985, and \$3,000,000 for fiscal year 1986. Not more than \$200,000 of the amounts appropriated in any fiscal year may be used for administrative costs."

(b) Section 5316 of title 5, United States Code, is amended by adding at the and thereof the following new section:

"Director, Art Bank, National Endowment for the Arts.".

#### ADDITIONAL COSPONSORS

#### S. 1256

At the request of Mr. Exon, the name of the Senator from Kentucky (Mr. Huddleston) was added as a cosponsor of S. 1256, a bill to regulate interstate commerce by protecting the rights of consumers, dealers, and endusers.

#### S. 3043

At the request of Mr. Stafford, the name of the Senator from Alaska (Mr. Murkowski) was added as a cosponsor of S. 3043, a bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes.

S. 3048

At the request of Mr. Thurmond, the name of the Senator from Louisiana (Mr. Johnston) was added as a cosponsor of S. 3048, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

S. 3053

At the request of Mr. D'AMATO, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 3053, a bill to amend the Agriculture Act of 1949 to modify the dairy price support program.

S. 3065

At the request of Mr. PRYOR, the name of the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 3065, a bill to establish in the Department of State the position of Under Secretary of State for Agricultural Affairs.

SENATE JOINT RESOLUTION 215

At the request of Mr. HATCH, the name of the Senator from Maine (Mr. COHEN) was added as a cosponsor of Senate Joint Resolution 215, a joint resolution to provide that the week beginning March 6, 1983 shall be designated as "Women's History Week."

SENATE JOINT RESOLUTION 263

At the request of Mr. Thurmond, the name of the Senator from Arkansas (Mr. Bumpers) was added as a cosponsor of Senate Joint Resolution 263, a joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week."

SENATE CONCURRENT RESOLUTION 132

At the request of Mr. CRANSTON, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of Senate Concurrent Resolution 132. a concurrent resolution expressing the sense of the Congress that the United States should maintain effective programs to assist in providing disabled persons with opportunities for full, productive lives and to protect such persons from unfair discrimination in Federal and Federal-assisted programs and activities and that disabled persons should receive fair treatment in the administration of disability benefits.

SENATE RESOLUTION 406

At the request of Mr. Kennedy, the names of the Senator from Kentucky (Mr. Huddleston), and the Senator from Maine (Mr. Cohen) were added as cosponsors of Senate Resolution 406, a resolution to assure Israel's security, to oppose advanced arms sales to Jordan, and to further peace in the Middle East.

SENATE RESOLUTION 516

At the request of Mr. Grassley, the names of the Senator from Pennsylvania (Mr. Heinz), the Senator from

Florida (Mrs. Hawkins), the Senator from Utah (Mr. Garn), the Senator from South Carolina (Mr. Hollings), the Senator from Illinois (Mr. PERCY), the Senator from Massachusetts (Mr. Tsongas), the Senator from Wisconsin (Mr. Kasten), and the Senator from Missouri (Mr. Danforth), were added as cosponsors of Senate Resolution 516, a resolution expressing the sense of the Senate on urging Presidential action pursuant to section 103 of the Act of 1971-section Revenue 48(a)(7)(D) of title 26, United States Code, to disqualify certain Japanese manufactured, numerically controlled machine tools from the U.S. investment tax credit.

#### AMENDMENT NO. 4978

At the request of Mr. Cranston, the name of the Senator from Connecticut (Mr. Weicker) was added as a cosponsor of amendment No. 4978 proposed to H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

#### AMENDMENT NO. 4995

At the request of Mr. Cranston, the names of the Senator from Maryland (Mr. Mathias), the Senator from Arkansas (Mr. Pryor), and the Senator from Wisconsin (Mr. Proxmire) were added as cosponsors of amendment No. 4995 intended to be proposed to H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

#### AMENDMENT NO. 5011

At the request of Mr. Cranston, the name of the Senator from Connecticut (Mr. Dodd) was added as a cosponsor of amendment No. 5011 intended to be proposed to H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

SENATE CONCURRENT RESOLU-TION 134-RELATING TO THE NATIONAL FOOD AND AGRI-CULTURE EXPOSITION

Mr. HELMS (for himself, Mr. Huddleston, Mr. Cochran, and Mr. Zorinsky) submitted the following concurrent resolution; which was referred to the Committee on Agriculture, Nutrition, and Forestry:

S. CON. RES. 134

Whereas, the substantial growth in United States agricultural exports during the past decade has been highly beneficial to the entire economy of the United States in

terms of jobs, better income, and improved balance of trade; and

Whereas, further increases in the volume and value of United States agricultural exports is an essential factor in assuring the future profitability of American agriculture, the existence of jobs in agriculture and related industries, and the economic wellbeing of many related businesses that depend on a healthy agricultural sector; and

Whereas, there is great potential for dramatic growth in the volume of processed or value-added food products exported from the United States, which, if realized, is capable of generating thousands of new jobs and stimulating all sectors of our economy; and

Whereas, the National Association of State Departments of Agriculture and the United States Department of Agriculture are sponsoring the first nationwide agricultural export exposition in the United States, to be held on May 17-19, 1983, in Atlanta, Georgia, and this exposition has the potential of generating increased export sales of United States value-added agricultural products; and

Whereas, the commissioners, secretaries, and directors of agricultural agencies in the fifty States and four United States territories are working diligently to promote the participation of United States firms—including many small and medium-sized firms which have never before engaged in export marketing; and

Whereas, Secretary of State George Schultz and Secretary of Agriculture John Block have requested United States diplomatic and trade posts throughout the world to encourage and recruit participation by potential foreign buyers in the export exposition: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that the National Association of State Departments of Agriculture National Food and Agricultural Exposition—

(1) is a significant development in the area of international trade that is consistent with the efforts of both government and private industry to expand United States exports of value-added agricultural products;

(2) presents a timely opportunity to promote the exportation of United States agricultural products and to develop new markets for these products;

(3) will make a valuable contribution to the future prosperity of United States agriculture and related industries; and

(4) deserves the full support and encouragement of the American people, Congress, and the Federal Govenment.

• Mr. HELMS. Mr. President, on behalf of Senators Huddleston, Cochran, Zorinsky, and myself, I introduce a concurrent resolution expressing the sense of the Senate that the National Association of State Departments of Agriculture National Food and Agriculture Exposition deserves the support of this body and the agricultural community.

The world trading system is seriously threatened unless we can increase our agricultural trade with other countries. This effort by producers and related firms will provide momentum toward increased agricultural trade at a time when the development of new markets is essential to the future of American agriculture.

The exposition will feature over 600 food exhibits from all 50 States and between 1,500 and 2,000 foreign buyers from all over the world. The exposition could create over \$100 million in additional food sales abroad next year.

The National Food and Agriculture Exposition will provide an opportunity for the promotion of U.S. agricultural products and the developments of new markets for value-added exports.

#### SENATE RESOLUTION 519— BUDGET WAIVER

Mr. PERCY, from the Committee on Foreign Relations, reported the following original resolution; which was referred to the Committee on the Budget:

#### S. RES. 519

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 3107, a bill to amend the Board for International Broadcasting Act of 1973 to authorize an amended appropriation for fiscal year 1983. Such waiver is necesary to allow the authorization of \$13,283,000 to enable Radio Free Europe/Radio Liberty, Inc. (RFE/RL) to enhance programming, improve audio quality, and renovate broadcast facilities, in accordance with the President's announcement of July 19, 1982 "to move forward . . . with a program to modernize our primary means of international communication, our international radio system

Compliance with section 402(a) of the Congressional Budget Act of 1974 was not possible by the May 28, 1982 deadline because the Administration failed to submit this request until November 23, 1982.

#### SENATE RESOLUTION 520—RE-LATING TO THE TESTIMONY OF SENATOR LARRY PRES-SLER

Mr. BAKER (for himself and Mr. ROBERT C. BYRD) submitted the following resolution, which was considered and agreed to:

## S. RES. 520

Whereas, is the case of *United States of America* v. *Joseph Silvestri*, Cr. No. 80-00291(S), pending in the United States District Court for the Eastern District of New York, the defendant has issued a subpoena for the attendance and testimony of Senator Larry Pressler,

Whereas, by Rule VI of the Standing Rules of the Senate, no Senator shall absent himself from the service of the Senate without leave.

Whereas, Title VII of the Ethics in Government Act of 1978, Public Law 95-521 establishes the Office of Senate Legal Counsel and provides that the Senate may direct its Counsel to represent the Senate, its committees, Members, officers, or employees: Now, therefore, be it

Resolved, That Senator Larry Pressler is authorized to testify in the case of United States of America v. Joseph Silvestri, Cr. No. 80-00291(S), except when the Senate is in session.

SEC. 2. That the Senate Legal Counsel is directed to represent Senator Larry Pressler

in connection with the subpoena for his testimony in the case of *United States of America v. Joseph Silvestri*, Cr. No. 80-00291(S).

#### SENATE RESOLUTION 521—RESO-LUTION RELATING TO FOOD STAMP BENEFITS

Mr. MOYNIHAN submitted the following resolution; which was referred to the Committee on Agriculture, Nutrition, and Forestry:

#### S. RES. 521

Whereas the United States Congress established the Food Stamp program in 1964 to provide a minimally nutritious diet for low-income households; and

Whereas appalling examples of malnutrition and hunger were once common in America; and

Whereas the Congress has significantly reduced instances of hunger and malnutrition in this country through a national plan; and

Whereas the 97th Congress has enacted legislation reducing Food Stamp costs by about \$2.5 billion a year; and

Whereas increases in energy, housing and health care costs have left the elderly with fewer resources with which to feed themselves; and

Whereas changing the definition of "elderly" under the Food Stamp program, from those over 60 years of age to those over 65, would reduce benefits for 400,000 now needing and receiving food stamps; and

now needing and receiving food stamps; and Whereas the Congress has already acceded to the President's request to limit this program to the truly needy; and

Whereas such a reduction would take away the very resources the elderly need to

survive: Now, therefore, be it

Resolved, That it is the sense of the
Senate that the Congress should reject any
proposal to reduce food stamp benefits for
those now eligible between the ages of 60
and 64 years old.

• Mr. MOYNIHAN. Mr. President, in early October, a report published by the New York Times revealed that the Food and Nutrition Service, through budget documents, was recommending that food stamp eligibility for the elderly be severely curtailed. Today, I am introducing a resolution to put the Senate on record as rejecting any such change in eligibility.

The administration proposal is to reduce benefits for those people between 60 and 64 years old. This group would no longer be considered elderly, and would have their benefits reduced from the current monthly average of \$46 by \$14.40, or 31 percent. This would affect 400,000 elderly persons now needing and receiving food stamps. When questioned on this proposal, Samuel J. Cornelius, Administrator of the Food and Nutrition Service, said that he was sure the change would be viewed as antielderly:

. . . Nobody in their right mind is antielderly. The question is what we can pay for. There are some people between 60 and 65 who are millionaires.

This may be so, but they are not the ones receiving food stamps. The people in this country who reached the age of 60 have worked most of

their lives and have likely collected some assets. For those now eligible for food stamps between the ages of 60 and 64, these assets amount to very little. For households with elderly or disabled members, eligibility requires that liquid assets not exceed \$1,500, or \$3,000 in the case of households of two or more with an elderly member. This liquid assets limit excludes the value of a residence, a portion of the value of motor vehicles, business assets, household belongings and certain other resources. Households with elderly or disabled members can be eligible with gross incomes ranging from roughly 120 percent to 200 percent of poverty income, even though their countable incomes must be below poverty. How much should the elderly be expected to sell or give up of these few things so that they can eat?

Finally, the 97th Congress has already passed legislation reducing food stamp costs by about \$2.5 billion a year. The Congress has acceded to the President's request to limit this program. To cut this program further is to threaten the means by which some of the elderly survive. For all of the reasons I have stated, I urge the adoption of this resolution.

## AMENDMENTS SUBMITTED FOR PRINTING

## SURFACE TRANSPORTATION ACT OF 1982

AMENDMENT NO. 5601

(Ordered to be printed and to lie on the table.)

Mr. BOSCHWITZ submitted an amendment intended to be proposed by him to his pending amendment No. 5600 to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

AMENDMENT NOS. 5602 THROUGH 5605 (Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted four amendments intended to be proposed by him to amendment No. 5386 to the bill H.R. 6211, supra.

AMENDMENT NOS. 5606 THROUGH 5609
(Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted four amendments intended to be proposed by him to amendment No. 5388 to the bill H.R. 6211, supra.

## AMENDMENT NO. 5610

(Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted an amendment intended to be proposed by him to amendment No. 5389 to the bill H.R. 6211, supra.

AMENDMENT NO. 5611

(Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted an amendment intended to be proposed by him to amendment No. 5391 to the bill H.R. 6211, supra.

#### AMENDMENT NO. 5612

(Ordered to be printed and to lie on the table.)

Mr. MELCHER submitted amendment intended to be proposed by him to the pending amendment No. 5600 to the bill H.R. 6211, supra.

#### AMENDMENT NO. 5613

(Ordered to be printed and to lie on the table.)

Mr. RIEGLE (for himself and Mr. BRADLEY) submitted an amendment intended to be proposed by them to an amendment to the bill H.R. 6211,

#### AMENDMENT NO. 5614

(Ordered to be printed and referred to the Committee on Finance.)

Mr. COHEN submitted an amendment intended to be proposed by him to the bill (S. 2051) to amend the Internal Revenue Code of 1954 to deny the deduction for amounts paid or incurred for certain advertisements carried by certain foreign broadcast undertakings.

Mr. COHEN. Mr. President, as an original cosponsor of S. 2051, legislation to retaliate against a discriminatory Canadian tax policy, I fully support the efforts of the broadcast industry in seeking redress through this bill. The Canadian tax law, which denies Canadian businesses a tax deduction for advertisements placed with U.S. stations is designed to reduce the dominance of American culture in Canada. The result of this policy, however, has been devasting losses in revenue for U.S. broadcasters estimated at \$20 million per year. Indeed, stations operating in my own State of Maine have been severely hurt.

The purpose of S. 2051, to mirror this provision of Canadian law, is laudable. I feel, however, that my colleagues should be aware of an inequity in the legislation as it is currently structured. While the Canadian law. C-58, includes the newspaper media in its scope, our bill is restricted to the broadcasting industry only. amendment I am introducing today would correct that inequity by including the newspaper media under the

provisions of S. 2051.

The plight of the border broadcasters is well known and has been widely reported in the press. Few are aware, however, of the no less damaging revenue losses suffered by the newsprint industry all along our border with Canada. In Maine, for example, the Calais Advertiser, a weekly newspaper serving a border region with Canada. was forced to discontinue a special section of the newspaper designed for the

needs of neighboring St. Stephen, New Brunswick. In past years, advertising revenue from Canadian customers was sufficient to finance the section, but since the passage of C-58, the paper could no longer support this enter-

The amendment I am introducing today would improve the provisions of S. 2051 in significant ways. First of all, my amendment would result in a more effective response to the Canadian law. Although the Canadian policy has been estimated to cost border broadcasters \$20 million annually in lost revenues, S. 2051 would only mean a loss of \$5 million for the Canadians. By including the newspaper media in the bill, the Canadians would be faced with more severe sales losses. Threatened with an even more serious retaliatory U.S. policy, Canada might concede to repeal the law, which is out ultimate goal.

Second, the administration has given a high priority to eradicating barriers to U.S. trade in services, I believe that we should take advantage of every opportunity to help reduce these barriers. Including the newspaper industry under the terms of S. 2051 would give a stronger signal to Canada that we are serious about this goal by providing an incentive for removal of their barriers.

In sum, our own Government has acknowledged the discriminatory nature of C-58. The State Department has tried repeatedly-without success-to negotiate with Canada for the removal of this law. The Presidential finding sent to Congress recommending S. 2051 as a remedy found the Canadian law to be a burden to U.S. commerce. S. 2051-known as the mirror bill-implies that our goal is to copy the provisions of the Canadian law. I fail to see how S. 2051 can be truly called the mirror bill unless the newspaper media is included in its coverage.

I urge my colleagues to support this important amendment.

#### AMENDMENT NO. 5615

(Ordered to be printed and lie on the

Mr. BOREN (for himself and Mr. Matsunaga) submitted an amendment intended to be proposed by them to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211 supra.

## AMENDMENT NO. 5616

(Ordered to be printed and lie on the table.)

Mr. McCLURE (for himself, Mr. KENNEDY, and Mr. DECONCINI) submitted an amendment intended to be proposed by them to the bill H.R. 6211

## CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1983

AMENDMENT NO. 5617

(Ordered to be printed and lie on the table.)

Mr. HART submitted an amendment intended to be proposed by him to the joint resolution (H.J. Res. 631) making further continuing appropriations for the fiscal year 1983.

ENERGY CONSERVATION AND EMPLOYMENT

Mr. HART. Mr. President, this amendment I intend to offer to the continuing resolution would appropriate an additional \$2.45 billion for a combination energy conservation/employment program. The amendment would fund the Department of Energy's low-income residential weatherization program at \$1.5 billion for the remainder of fiscal year 1983-compared to the fiscal year 1982 appropriation of \$144 million-and would fund the Solar Energy and Energy Conservation Bank at \$1.12 billion for the remainder of fiscal year 1983—compared to \$20 million for the Bank by the HUD-Independent Agencies Appropriations Act.

There are three reasons why these programs should be expanded in the

continuing resolution.

First, increasing these programs is a highly effective way to create desperately needed additional jobs. Making houses more energy efficient is exlabor-intensive. tremely Spending \$2.45 billion on these two programs would create 212,200 new jobs-half again as many jobs per Federal dollar as the expanded highway construction program now before the Senate.

These new jobs would be well-suited to meet our current economic needs. The new energy jobs would be for both low-skilled and highly trained workers in the construction trades, one of the most depressed of the Nation's industries. The jobs would be created primarily in urban areas, espelow-income neighborhoods where they are most needed. These would not be make-work jobs; they would fulfill a pressing national need, while providing training in transferable job skills.

These energy programs will also produce an additional multiplier effect on employment, an effect not achieved by any other jobs programs. Reduced home fuel bills will make possible increases in other consumer spending. Since providing other goods and services is more labor-intensive than providing energy supplies, this shift in consumer spending will create additional jobs-41,520 more jobs per year, according to projections using Bureau of Labor statistics employment factors. Since the energy savings will occur every year, this indirect increase in employment will be cumulative. Over a 20-year period representing the average lifetime of the energy conservation investments, 830,400 additional work-years of employment would be created by this multiplier effect. (Assuming fuel costs remain at 1981 levels; at the higher prices we will actually experience, the consumer savings and the resulting multiplier effect will be substantially greater.)

This energy conservation and employment program therefore produce over 1 million work-years of additional employment-more than seven times as many jobs per Federal dollar as under the highway/jobs program.

The second compelling reason for making this energy conservation and employment appropriation is to provide relief to consumers facing high fuel bills. Rather than responding to constituent anger over rising energy costs with such measures as emergency, piecemeal amendments to the Natural Gas Pricing Act or sense-of-the-Senate resolutions on energy costs, we should take effective action to help consumers keep down their energy costs. The quickest and easiest way to do that is to improve residential energy efficiency; experts tell us we can cut in half the energy consumed in our homes through investments with half the lifetime costs of continuing current levels of consumption.

The low-income weatherization program and the Solar Energy and Energy Conservation Bank are designed to help consumers overcome the primary obstacle to improved energy efficiency-the initial costs of

energy conservation investments. The weatherization program fully funds the costs of insulating the homes of Americans with incomes below the official poverty line. Homes which have been weatherized under the program reduce their energy consumption by 27 percent, saving \$250 per household each year. The Solar and Conservation Bank subsidizes energy loans from private institutions at below-market rates for families not qualifying for the weatherization program. Funding the Bank at \$1.12 billion in 1983 would finance energy conservation or renewable energy retrofits of 2.8 million homes, with savings of more than \$200 per household each year. Together, the two programs would reduce home heating bills by more than \$18 billion over 20 years (at 1981 fuel prices).

The third reason for the amendment is to help reduce our dangerous dependence on foreign oil. Residential energy use accounts for more than 20 percent of our total national energy consumption. Much of this energy is wasted, and can be saved if we make our houses more energy efficient. The measure which would be funded by the amendment would save the equivalent of about 400 million barrels of oil. Achieving these energy savings is a far more rational and cost-effective way of increasing our energy security than expanding the Rapid Deployment Force for a possible (and inevitably foolish) military mission to keep our oil flowing from the Middle East.

I realize some will criticize amendment for exceeding the budget resolution. Although the amendment does not include any offsetting provisions, this expenditure of \$2.45 billion makes far more sense than a wide variety of other elements of the budgetwhether viewed in terms of its positive effects on economic recovery, consumer well-being, or national security. The expenditure represents only a fraction of the revenue which would be lost by leaving in place the July 1983, tax cut. The \$2.45 billion represents two-thirds of the cost of a new Nimitz-class aircraft carrier or onethird of the cost of the Clinch River breeder reactor. Further, by creating more than 1 million work-years of new employment, the amendment will increase Federal revenues by about \$5 billion over the next 20 years.

I urge my colleagues to join me in supporting the energy conservation/ employment amendment. Let us put Americans to work insulating our homes, as well as pouring concrete.

Any Senators wishing to cosponsor the amendment, or having questions about it, should contact me, or have his or her staff contact Stephen Saunders in my office at 224-5852.

Mr. President, I ask unanimous consent to include in the RECORD at this point a chart showing the effects of the energy conservation/employment program.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	Projected savings cumulative: 1983- 2003 <sup>1</sup>		Projected job creation 4						
			1983			Cumulative: 1983-2003			
	Energy (million BOE) <sup>3</sup>	Consumer spending (billions) <sup>2</sup>	Primary impact s	Multiplier effect s	Total	Primary impact s	Multiplier effect a	Total	
Fiscal 1983 appropriation of \$1.5 billion for DOE's low-income weatherization program.	135	\$6.1	61,600	7,000	68,600	61,600	280.000	341.600	
Fiscal year 1983 Appropriation of \$1.12 billion for Solar Energy and Energy Conservation Bank.	266	12	150,600	13,760	164,360	150,600	550,400	701,000

#### SURFACE TRANSPORTATION ACT

AMENDMENT NOS. 5618 AND 5619

(Ordered to be printed and to lie on the table.)

Mr. BOREN submitted two amendments intended to be proposed by him to the bill H.R. 6211, to authorize appropriations for construction of certain highways in accordance with title 23 of the United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

AMENDMENT NO. 5620

(Ordered to be printed and to lie on the table.

Mr. BOREN (for himself, Mr. Hup-DLESTON, Mr. BAUCUS, Mr. Exon, Mr. DECONCINI, Mr. PRYOR, and Mr. KEN-NEDY) submitted an amendment intended to be proposed by them to the bill H.R. 6211, supra.

#### AMENDMENT NO. 5621

(Ordered to be printed and to lie on the table.)

Mr. BOREN (for himself and Mr. ROBERT C. BYRD) submitted an amendment intended to be proposed by them to the bill H.R. 6211, supra.

#### **AUTHORITY FOR COMMITTEES** TO MEET

SUBCOMMITTEE ON BUDGET AUTHORIZATION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on budget Authorization of the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, December 16, at 9:30 a.m., to meet in closed session for the purpose of receiving a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

The average/life-time of the energy investments.

Assumes 1981 average home heating cost of \$7.78/million Btu, the weighted average of end-user costs of petroleum products, natural gas, and electricity used to heat houses in the United States.

Parrels of oil equivalent.
In work-years; I work-year is one full-time job for 1 year.

Uses Bureau of Labor Statistics employment factors.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Oversight of Government Management of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, December 16, at 9:30 a.m. to conduct a hearing on oversight of computer matching programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON SMALL BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Small Business be authorized to meet during the session of the Senate on Thursday, December 16, at 9:30 a.m., to hold an oversight hearing on the Small Business Investment Company program.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### ADDITIONAL STATEMENTS

#### CLEAN AIR DEADLINE **EXTENSIONS UNNECESSARY**

• Mr. STAFFORD. Mr. President, I know there are concerns over the possible effect of not extending the Clean Air Act's December 31, 1982, deadline for certain areas which have not attained the national ambient air quality standards. I would like to share with other Members my view of what this deadline means and what the law

The Clean Air Act was amended in 1977 to extend the law's deadlines for achieving the primary-health-protective-air quality standards. A new deadline of December 31, 1982, was established, although extensions to 1987 can be granted for pollutants originating from automobiles.

The Congress also amended the law to establish sanctions, including a Federal funding cutoff and a construction moratorium, but these sanctions are not for failing to achieve the standards on time. Instead, they are for areas which fail to develop, implement or enforce plans for cleaning up their air

This is an important distinction, but one which is very clear after a careful reading of the law. The Clean Air Act specifically refers to a failure of the 'plan" to meet the law's requirements and to those cases where "the Governor has not submitted an implementation plan" or is not "implementing any requirements." It is admittedly easy for a person unfamiliar with the law's intricacies to leap to the erroneous conclusion that sanctions come into effect when a deadline is reached with an area still in nonattainment. But as a matter of fact and law, the Clean Air Act sanctions attach only to failure to submit and implement adequate plans. Thus, in January 1983, and even well into mid-1983, there should not be a dramatically different state of affairs than prior to December 31, 1982.

This is all discussed in much greater detail in a memorandum of law prepared at my request by the legal staff of the Committee on Environment and Public Works.

If there is no objection I ask that this memorandum be printed in the RECORD. I also ask that a letter from the distinguished Senator from West Virginia (Mr. RANDOLPH), and myself be printed as well.

The memorandum and letter referred to follow:

#### MEMORANDUM OF LAW

To: Senators Stafford and Randolph From: Committee Staff

Re: Nonattainment Area Sanctions: Effect of the December 31, 1982 Deadline

The purpose of this memorandum is to review the legal and practical consequences of the arrival of the Clean Air Act's December 31, 1982, attainment deadline.

Background: The 1970 amendments to the Clean Air Act 1 established the requirement that the primary (health-related) national ambient air quality standards (NAAQSs) be attained throughout the United States not later than mid-1975, or in some cases, mid-1977. However, by mid-1975 it became apparent that many areas could not attain the standards on time. Accordingly, Congress, in the 1977 amendments to the Clean Air Act,2 set out to achieve two things:

First, the deadline for attainment of the primary NAAQS was pushed back to December 31, 1982.3 However, extensions to December 31, 1987, were allowed for two autorelated pollutants (ozone and carbon monoxide) if a State satisfied the Administrator of the Environmental Protection Agency that attainment of the standards for these pollutants was not possible by December 31,

Second, Congress sought to assure that the new deadlines would be met by requiring implementation of all "reasonably available control measures" in nonattainment areas as expeditiously as practicable, and "reasonable further progress" in the interim.5 For areas granted an extension to 1987, still other measures-including the motor vehicle inspection/maintenance programsare required.6

Third, to assure that these attainment deadlines were met, Congress included in the 1977 amendments a carefully prescribed series of other deadlines: States were to submit SIP revisions required by Part D (the nonattainment provisions of the Act) no later than January 1, 1979.7 States seek-

some persons assert that arrival of December 31, 1982, brings the sanctions automatically into place in areas which continue to be nonattainment. A more detailed discus-

of air pollution.

sion of the Act's language and its implementation follows.

ing an extension to 1987 were to make the

required impossibility showing in their Jan-

uary 1979 submission (imposing all reason-

Finally, the law was amended to authorize

certain sanctions. These sanctions were of

two sorts: one consisted of cutting off funds for certain activities; the other consisted of

a limited ban on construction of new sources

The language authorizing these sanctions

links them to the submission and enforcement of plans, not the deadlines which the

plans are designed to achieve. However,

ably available control measures).8

Permit Restrictions: Section 110(a)(2)(I) requires that State implementation plans "provide that after June 30, 1979, no major stationary source shall be constructed or modified in any nonattainment area. the emissions from such facility will cause or contribute to concentrations of any pollutant for which a national ambient air quality standard is exceeded in such area, unless such plan meets the requirements of Part D (relating to nonattainment areas).

Thus, section 110(a)(2)(I) provides on its face several constraints on the Agency's ability to prohibit or restrict permitting:

First, the authority to impose sanctions is not triggered at all unless "such plan" fails to meet the requirements of Part D.

Second, the proposed new source must be one which is "major"

Third, the emissions from the proposed source must be of the same "pollutant for which a national ambient air quality standard is exceeded".

Fourth, the sanctions may apply only within "such (nonattainment) area", not the state as a whole.

The statutory language does not completely dispose of the question as to whether arrival of the attainment date automatically causes this sanction to apply. Those asserting that it does insist that since the purpose of the SIPs is to achieve the standards by December 31, 1982, the existence of an area which is nonattainment is a per se violation of 110(a)(2)(I): that is, the plan by definition "fails to meet the requirements of Part D" since one of those requirements is "attainment of each such national ambient air quality standard . . . not later than December 31, 1982" 9

The contrary position is that the language must be taken at its clear meaning. If the Act were intended to sanction nonattainment per se, it would say exactly that, and not refer to "such plan".10

<sup>1</sup> Public Law 91-601.

<sup>&</sup>lt;sup>2</sup> Public Law 95-95. Public Law 95-190 makes various technical amendments to 95-95.

<sup>3</sup> CAA § 172(a)(1).

<sup>\*</sup> CAA § 172(a)(2). Thirty States included in their 1979 plan revisions requests that the deadline for meeting one or both of the auto-related standards be extended to 1987 for all or portions of the State.

<sup>\*</sup> CAA § 172(b) (2) and (3).

<sup>\*</sup>CAA § 172(b)(11). \*Public Law 95–95, § 129(c) (uncodified).

<sup>\*</sup>Id., CAA § 172(b)(2). Section 172(b)(11) lists other requirements for January 1979 submissions in extension areas.

<sup>&</sup>lt;sup>9</sup>CAA § 172(a)(1). <sup>10</sup> Indeed, section 117 of the recently reported Senate amendments to the Clean Air Act (S. 3041), propose changes to the law to specify that sanc-tions apply at the attainment date. In order to implement this policy change, the Committee found it necessary to change the law's language. This is a persuasive indication of the Committee's view of what the current language means and which it does not: what it does mean is that the sanctions were triggered only by a late or unacceptable plan, hence, the law had to be amended to cause the sanctions to come into play because of nonattainment on or after a date certain.

This reading of section 110(a)(2)(I) is affirmed by an examination of the Act's other provisions and of the legislative intent shown by the context in which these sanctions were adopted. In Brown v. EPA and other cases, the Federal courts had said the Agency would not order States to implement control strategies such as vehicle inspection and maintenance programs. The Congress chose instead to establish sanctions if a State refused to adopt or to carry out necessary control strategies. The sanctions are all intended to relate to the process of considering and implementing desirable control strategies, not to the actual attainment of the ambient air quality standards.

It seems probable that when the Congress extended the deadlines in 1977, it anticipated attainment by either 1982 or 1987. Thus, there is little discussion of what action should be taken with regard to new source growth in nonattainment areas after December 31, 1982. However, the Senate Committee's report does shed some light. In explaining the Committee's bill, the report said

If application for a permit is made after July 1, 1979, approval may be granted if the State meets either of the two following conditions, (A) the state is enforcing all requirements of a revised implementation plan which was approved by July 1, 1979, and which provides for attainment of the standard within three years; or (B) the State has demonstrated in a revised plan submitted by January 1, 1979, that it cannot attain the standard in three years, but is complying with other applicable requirements of law.<sup>11</sup>

This language still fails to explain whether "provides for" requires actual attainment or not. However, other language indicates that the Committee had no intention of shutting down new source permitting altogether.

When a region exceeds a national air quality standard after the deadline for attainment, a question arises as to what new sources of that polllutant, if any, are permitted, by law, in the region. The Environmental Protection Agency attempted to deal with this question in its Interpretative Ruling of December 21, 1976. Believing that a statutory clarification of the question is needed, the Committee has developed a comprehensive scheme which extends some deadlines for attainment of national air quality standards, sets out requirements for approval of implementation plan revisions, and imposes stringent requirements as conditions for growth in areas not meeting national standards. These provisions supercede the EPA administrative approach. (Emphasis Added).

A major weakness in implementation of the 1970 Act has been the failure to assess the impact of emissions from new sources of pollution on State plans to attain air quality standards by statutory deadlines. States have permitted growth on the assumption that a deadline was sufficiently distant so that future emissions reductions could be made to compensate for the initial increases. It can now be seen that these assumptions were wrong. Some mechanism is needed to assure that before new or expanded facilities are permitted, a State demonstrate that these facilities can be accommodated within its overall plan to provide for

attainment of air quality standards. 12 (Emphasis added)

Other provisions of the Act would clearly allow for and support such an alternative interpretation.

Section 110(a)(2)(H) requires that every State implementation plan provide for its revision "whenever the Administrator finds on the basis of information available to him that the plan is substantially inadequate to achieve the national ambient air which it implequality . . standard which it imple-." Section 110(c)(1) requires the ments Administrator to "prepare and publish proposed regulations setting forth an implementation plan" if the State fails to do so.

Thus, section 110 provides at least one alternative to a broadscale prohibition on permitting: a finding by the Administrator that State implementation plans are "substantially inadequate", coupled with a concurrent requirement that each such plan be revised to achieve the ambient standard as soon as practicable. This alternative could lead to both a dramatically different course of events and outcome than an outright ban on new source permitting.

First, States would be required to prepare, based on the procedures contained in the law, SIP revisions which had as their objective the attainment of the ambient standards. These revisions would be subject to the public comment, judicial review and other provisions of the Clean Air Act. They would be prepared individually, thus taking into account varying State and local circumstances. Finally, they would maintain as the objective of attaining the respective standards in air where the quality of the air is, by definition, unhealthful.

In contrast, the prohibition on new source permitting would serve only the narrow and perhaps self-defeating purpose of halting the construction of new sources. As the Assistant Administrator for Air, Noise and Radiation commented.

This (a construction ban) means that you cannot put in new, efficient, relatively less polluting plans in place of the old, dirty polluting ones which are producing air pollution problems.<sup>13</sup>

Thus, one alternative would serve the purpose of Part D and the Clean Air Act as a whole—the attainment of healthful air quality—through the use of procedures and methods required by the Clean Air Act, while the other alternative would do neither. Given the fact that the alternative interpretations of the Act's language are equally plausible, the sensible approach would be to choose an alternative which is consistent with the goals of the Act, not inconsistent.

Finally, should the Agency nevertheless choose to impose a blanket prohibition of new source permitting, aggrieved parties could assert estoppel in actions by the United States Government to enforce the ban. Each State implementation plan in question has been reviewed and approved by the Administrator as one which "meets the requirement of Part D."

Clearly, some of these disagreements amount to lawyers' arguments which can be settled ultimately only by a judge. Hence, the secondary and perhaps more important issue is whether the permitting sanctions can be imposed in a flexible and realistic

12 Legislative History of the Clean Air Act

fashion even if the "trigger" itself is inflexi-

Administration of the Permitting Sanctions: That the permitting sanctions need not lead to economic catastrophe is confirmed by the fact that during July 1979 they were in place throughout virtually the entire United States. States had failed to submit their SIP revisions on time (or the proposals had not been approved by EPA) and only one of the 50 was not subject to the permitting sanctions. There were few if any untoward effects. This was due in large part because the Agency officials interpreted the law in a way which allowed State, local, and Federal flexibility in dealing with difficult and diverse problems. Presumably, this same flexibility still exists in the following areas.

First, since the permitting restrictions apply only to proposed "major" sources, a large number of new plants would be exempted from a ban. Only those sources with emissions exceeding 1000 tons per year for carbon monoxide and 100 tons per year for other pollutants would be covered.

Second, the restrictions apply only to sources of the specific pollutant for which the area is in violation of Federal standards. For example, if an area is in violation of the standard for sulfur dioxide, major sources of sulfur dioxide may be restricted. But sources of other pollutants (e.g., hydrocarbons or carbon monoxide) cannot be restricted.

Third, many nonattainment areas are quite small in their official designations, covering as small an area as a few city blocks. Only sources which increase pollution levels within the official nonattainment area may be restricted. Thus, even though the particulate standard is violated in one area of a city, construction could proceed elsewhere in the same city.

Fourth, and most importantly, the permit restrictions do not apply to sources applying for a permit prior to the restriction being imposed. This means that even in those areas where EPA lawfully imposed permit restrictions the impact should not be felt for many months because the Agency must go through a lengthy administrative process.

This Administrative process is as follows: First, EPA must notify each Governor by letter that it is considering imposition of a permit restriction. Second, EPA must publish a notice of proposed rulemaking in the Federal Register for each area. Third, EPA must invite and accept public comment on its proposals. Finally, having considered public comment the Agency may take final action.

The elapsed time from proposal of rules to final action at EPA is normally a minimum of several months and often twelve to eighteen months. Thus, even if the Agency were to act as hastily as possible, the permit restrictions realistically could not be in effect before the summer of 1983, at the very earliest.

Funding Restrictions: In addition to its permitting restrictions, the Clean Air Act contains three funding sanctions. Some of the issues raised by these sanctions are similar to those raised by the language in section 110(a)(2)(1). The funding sanction provisions are as follows:

Highway Aid: Section 176(a) prohibits the approval of any projects or the award of any grants for highway construction in any air quality control region where—

<sup>&</sup>lt;sup>11</sup>Legislative History of the Clean Air Act Amendments of 1977, v. 3, p. 1428 (or, Report 95-127, p. 54).

Amendments of 1977, v. 3, p. 1429.

13 "Congress likely to Ignore Reagan's Request for Clean Air Act Passage," National Journal, November 27, 1982, p. 2028.

(1) any primary standard has not been at-

(2) transportation control measures are required to achieve this standard 15 and,

(3) the Administrator determines that either (a) the Governor has not submitted "an implementation plan which considers each of the elements required by Section 172) or (b) that "reasonable efforts" toward submitting such a plan are not being made.16

Section 172 requires a SIP to "provide for attainment . . . as expeditiously as practicable, but . . . not later than December 31,

Since this language is similar to that contained in section 110 it raises many of the same difficulties. However, the sanction contains two important qualifications:

First, it explicitly exempts grants or awards for "safety, mass transit, or transportation improvement projects related to air quality improvement or maintenance";18 and,

Second, it requires the Administrator to find that the State is not making "reasonable efforts" toward submitting a qualifying plan. 19 In the past the "reasonable efforts" test has been construed generously, so funding restrictions have been imposed in only parts of two States.

The latitude available to the Administrator in imposing this sanction was graphically and dramatically described in a Senate floor colloquy between Senator Gravel and others. Senator Gravel had just offered the language which was ultimately to become the current law and described it as follows:

Mr. STEVENS. I just wanted to ask a question, to make sure I understand this.

I have an amendment which would go partially in this direction. Do I correctly understand my colleague's amendment means that if you have an implementation plan, whether you implement it or not, there will be no loss of highway funds?

Mr. GRAVEL. That is right. Not even that, but if you are making an effort to arrive at an implementation plan, there will be no loss of highway funds.

There is a terminal effect: If you do not make any effort at all by 1979 to come up with a plan, if there are no best efforts, then we stick it to you in a very surgical

Mr. STEVENS. I am sure the Senator knows that Fairbanks has a problem, and it is a naturally caused problem. I do not know of any solution to it yet.

Mr. GRAVEL. The fact that we are thinking of a solution and working on one will give it coverage under this amendment.

Mr. STEVENS. But if we cannot find a way by 1979 to solve it-

Mr. GRAVEL. If we cannot find a way by the year 2000, we still will not get hurt.

Mr. STEVENS. This means that the State of Alaska will not lose those funds if we cannot solve the ice-fog problem?

Mr. GRAVEL. If that happens, I will come to the floor of the Senate and slash my wrists.

Mr. STEVENS. I do not want the Senator to slash his wrists. I just want to make sure that he will not slash my wrists.20

Air Pollution Control Grants: Section 176(b) prohibits grants under the Clean Air Act to State or local governments which are not "implementing any requirement of an approved or promulgated plan." 21 By definition, the issue here is arrival of the attainment date, not implementation of a SIP. Thus, imposing this sanction is discretion-

ary.
Sewage Treatment Grants: Finally, section 316 allows the Administrator to restrict sewage treatment grants if a State fails to adopt a plan which will accommodate the growth in pollution that might be stimulated by a plant's construction. This sanction is

wholly discretionary.
Summary: Some argue that the Clean Air Act requires an immediate and massive imposition of harsh penalties after December 31, 1982, But this position is not supported analysis of the law. This is not to say that it could not happen. Courts often pay great deference to the legal interpretations and actions of administrative agencies. Thus, the Environmental Protection Agency could choose to construe the Act in a narrow fashion and, if so, this apporach might be upheld by a Federal court. Clearly, however, this is a strained interpretation of the Clean Air Act. The law supports other interpretations which make a good deal more sense. Indeed, if the rigid view of the law is adopted and then sustained by a court, it will be because of deference paid to Agency interpretations, not because the Clean Air Act compels an automatic and inflexible imposition of sanctions.

Most importantly, even if the law is read to require the funding and permitting bans to take effect on or soon after January 1, 1983, the Agency indisputably has the latitude to implement such a requirement in a flexible and realistic fashion. There is absolutely no need to force an immediate and unyielding freeze on growth or construction.

> U.S. SENATE. COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS.

Washington, D.C., December 10, 1982. Hon. ANNE M. GORSUCH. Administrator. Environmental Protection Agency, Washington, D.C.

DEAR MRS. GORSUCH: We are deeply concerned over recurrent reports in the press and elsewhere that you interpret the Clean Air Act as requiring you to impose an automatic prohibition on new source permitting and on highway and State air pollution control program funding in nonattainment areas for failure to attain standards by December 31, 1982. A State which is now properly carrying out an approved implementation plan, and which, when notified by EPA, proceeds within a reasonable time to revise and then implement its plan to attain the standards as expeditiously as practicable, should not be subject to restrictions on new source permits or funding.

With respect to restrictions on funding for highways and air pollution control programs, the Act very clearly does not contemplate immediate imposition of those sanctions in areas that are implementing approved implementation plans but that are found, after December 31, 1982, to exceed one or more of the ambient standards. The highway funding sanctions are, of course, applicable only to those areas that are nonattainment for motor vehicle-related pollutants. Withholding of highway funds is to take place only where a State implementa-

tion plan did not consider those elements prescribed for such a plan by the Act. If a plan was approved by EPA, it presumably did include all the required elements.

Grants for a State's air pollution control program must be withheld either under the same circumstances that require withholding of highway funds or where an area is failing to implement the requirements of an approved plan. Where an area that is implementing all the requirements of an approved plan is found to exceed an ambient standard, imposition of the funding sanction is not appropriate unless the State fails to revise its implementation plan within a reasonable time and include in the revised plan all the elements specified in the Act.

With respect to new source permits, we agree with those who say that the Act is not explicit as to the requirement for a prohibition in areas that have received approval of a State implementation plan, that are carrying out the provisions of such a plan, but that nevertheless fail to attain a national ambient air quality standard by December 31, 1982,

While the several provisions of the Act that relate to this question do not provide a clear and incontestable guide, the purposes for which Congress adopted the prohibition on new source permits in 1977, together with the very clear fact that the objective of the Clean Air Act is to improve air quality, compel us to conclude that the immediate and automatic imposition of the prohibition on new source permits is contrary to the requirements of the Act.

The moratorium on new construction was adopted to ensure that those areas not meeting national primary ambient air quality standards and not operating a program in accordance with an approved implementation plan, could not allow additional emissions from new major sources of the pollutant for which the area was nonattainment. Once an area began operating under an approved plan-which must require continued reductions in total emissions, taking new source growth into account—the prohibition on new sources was to be lifted.

Those areas that have been operating under plans approved by the Environmental Protection Agency, that is, plans that, among other requirements, were found at the time of approval to provide for attainment of the ambient air quality standards by the statutory deadline, have been complying with the law. If such an area is determined to exceed one or more of the ambient standards after December 31, 1982, you, as Administrator, are charged with notifying the State that the plan is inadequate to achieve the standard or standards, and the State must, within a reasonable time, revise its plan to provide for attainment as expeditiously as practicable, using all reasonably available control measures. If a State follows this course, it is, we believe, complying with the requirements of the Act and is not subject to the prohibition on issuance of new source permits.

From the foregoing discussion, we hope it is clear that we do not believe the law compels immediate or automatic restrictions on permitting and funding for areas that, in spite of implementing the requirements of approved State plan, do not achieve ambient standards by the statutory deadline. We urge you to adopt an approach for such areas that achieves the Act's objective of

JENNINGS RANDOLPH. Ranking Minority Member. ROBERT T. STAFFORD,

Chairman.

#### LOSING GROUND

. Mr. ARMSTRONG. Mr. President, the October issue of Rural Electrification contains a very thoughtful article on soil erosion that every Senator should read. This piece, written by Sharon O'Malley, is a good explanation of the various ways farmers are using to combat severe erosion problems in different parts of the country.

But it is also a very compelling account of the severity of the problem. We simply cannot continue to stand idly by while millions of acres of our best crop-producing soil washes and blows away. Part of the problem is that Government continues to pay financial incentives for crops grown on newly plowed fragile grasslands-lands that are not suitable to sustained cultivation and are very vulnerable to erosion.

My bill to stop such payments on newly plowed lands passed the Senate by an overwhelming vote-69 to 29-on September 28 as an amendment to the agriculture appropriation bill, H.R. 7072, but it was eliminated by the House conferees. It is essential that Congress recognize the importance of this provision if we are to stop making such payments before another full year of plowing can take place.

In order to continue the vital discussion on this matter, I commend this article to the attention of my colleagues and ask that it be printed in

the RECORD.

The article referred to follows:

[From Rural Electrification, October 1982] LOSING GROUND: NEW FARMING METHODS COULD HELP SOLVE OUR NATIONAL EROSION PROBLEM

## (By Sharon O'Malley)

Bob Cerven alway worried about soil erosion, even 33 years ago when he and his new wife took over his parent's farm in Montgomery County, Iowa. From his first days in farming. he constructed terraces and watched his neighbors' rich black soil wash away while his stayed put.

Then about four years ago, unusually heavy rains began to wash away the earth between the neatly cultivated rows of corn and soybeans on his 700-acre crop and livestock farm, leaving ugly stripes of rill erosion and silt and debris at the bottom of slopes

That's when Cerven stopped tilling his soil and invested in a planting machine that slips seeds into the soil through the stalks roots remaining from the privious year's crop. Traditionally, after the harvest,

the earth is turned over with a moldboard plow, which buries this residue.

No-till, or conservation tillage, is a relatively new practice that insures the soil on a farm will be constantly covered, lessening the chances that it will wash away during a heavy rain. A no-till farmer plows only 10 percent or less of his cropland before plan-ing. Practicing other variations of conservation tillage, a farmer would plow a field only once instead of two or three times, or would cultivate only if extra dousings of herbicides failed to kill weeds in the field.

The practice is being promoted by the U.S. Department of Agriculture's Soil Conservation Service and some state governments. But farmers have been slow to adopt it either because of the costs involved in changing over their operations or for reasons of pride: No-till farms look unkempt, suggesting a lazy farmer. Cerven has felt this criticism: "There's been a lot of coffee shop talk about me."

Iowa farmers have become the country's leaders in soil conservation. The efforts of Cerven and his neighbors are much needed in a state that 100 years ago had 16 inches of rich, productive topsoil and has allowed all but eight inches of that to wash or blow away. At the same rate of erosion, estimates Ernest Hintz, the U.S. Department of Agriculture's agronomist in Iowa, the state will be left with no productive topsoil in about 120 years—unless conservation practices become commonplace. General practice of no-till farming could reduce the state's annual soil loss of 260 million tons aby 75 percent, Hintz says.

In the meantime, the soil on Iowa's 26 million acres of farmland is washing away at a rate of 9.9 tons per acrea per year, almost double the USDA-approved "tolerance value" of five tons per acre per year, the "tolerance amount which agronomists say can be re-

placed by natural processes.

Nationally, cropland losses average-between five and nine tons of soil per acre, or 6.4 billion tons annually, according to various studies. But in areas such as the Palouse, where Washington, Oregon and Idaho come together and where some of the highest yields of wheat in the country are grown on steep slopes, the erosion rate runs as high as 50 to 100 tons per acre. The average on the Palouse's million acres of cropland is a frightening 17 million tons a year. Most of this erosion occurs in the spring when melting snow and heavy rains carve rivulets and gullies into hillsides and send great chunks of soil sliding down the slopes, reducing the fertility of the upper slopes and burying new crops below.

Perhaps half of the eroded soil ends up in streams and rivers, filling channels, causing flooding and then more erosion. The cycle goes on, year after year, varying only in in-

During 1977, sheet erosion, a uniform sweeping of surface soil caused by water runoff, and rill erosion, channels carved in hilly land by runoff, claimed 2 billion tons of cropland. The USDA estimates that gully erosion, defined as rills deeper than one foot, took another 450 million tons. About 1.4 million acres were damaged by wind erosion alone in 1979. During the winter of 1980-81, 12.5 million acres of Great Plains farmland were damaged by wind.

USDA's national agronomist, Gerald Darby, estimates that without serious conservation, erosion will rob this country of all its productive farmland within 100 to 200 years, washing so much topsoil from farms that bedrock or heavy clay will be all that

remains

With the country's richest farm regions losing as much as an inch of topsoil every 15 years, the topsoil layer in some places has thinned to six inches, the minimum needed for commercial farming.

Agriculture Secretary John Block has pre dicted that during the next 50 years, soil damage on 141 million acres of cropland could reduce yields to less than half and perhaps to as little as one-fifth of what that acreage would produce today. Despite his apparent concern, however, Block, in keeping with the Reagan Administration's New Federalism program, is aiming at having more conservation programs taken over by the states. Block so far has given the expansion of farm exports a higher priority than soil conservation, a policy his critics say is an indication of his real feelings about erosion control.

Some soil conservationists claim that our national erosion problem is worse than during the Dust Bowl days of the 1930s. Then, 282 million acres of Great Plains farmland were ruined by wind erosion in just a few years. The problem ws so severe in 1935 that the two-year-old Soil Erosion Service, which had been formed as a temporary agency of the Department of the Interior, was renamed the Soil Conservation Service and made a permanent part of the Department of Agriculture. In 1937, the SCS, which today has branch offices throughout the country, established a system of conservaton districts which now govern, through local boards, soil and water conservation policies in most U.S. countries. More than 40 years later, \$15 billion has been spent on soil and water conservation.

Despite SCS's efforts, however, during the 1970s soil loss increased dramatically as world demand for U.S.-produced grains skyrocketed. Anticipating hefty profits from booming exports, American farmers began to overwork their land, planting crops on hills and on river banks and turning pastures and forestlands into neat rows of soybeans, corn and wheat. As their incomes rose, their land slid into streams and rivers.

Concern over the worsening problem led in 1977 to passage by Congress of the Soil and Water Resources Conservation Act, which required the Department of Agriculture to come up with a plan directing the government's money and manpower to specific areas where erosion is most threatening. A draft of the USDA study, which will be released in its final form this fall, shows that 54 percent of the country's rill and sheet erosion is concentrated on only 10 percent of the land.

Soil scientists pinpointed critical problems in the Corn Belt; the Palouse; southeastern Idaho, where intense summer rainstorms have caused erosion as severe as 16 tons per acre per year; the southern Mississippi Valley, including parts of five states, where annual soil losses on much of the land, which is steep, sloping and highly erodible, reaches 20 tons an acre or more; and hilly Aroostook Country, Me., whose potatoes are famous but declining in quality because of bad soil conditions resulting from the loss of two feet of topsoil since cultivation began in the mid-19th century.
Five decades after the Dust Bowl, wind

erosion remains a problem in another critical area: the Great Plains states. There, the climate is erratic, creating near-desert conditions in some areas, some years, Land, usually planted with corn, sorghum, cotton, soybeans and wheat, is left barren during especially dry years when crop production isn't possible. The dry, uncovered soil becomes an easy target for the wind.

Texas, where cotton is the prominent crop, claims almost half of all wind erosion in the 10-state Great Plains area, with wind erosion damaging soil on more than 13,000 acres a year. "The only practical way to reduce erosion [in the Great Plains] to an acceptable level," according to a USDA study, "... is to establish a permanent plant cover." But cotton farmers in the Texas Blackland Prairie, plagued by boll weevils that infest their plants, shred or burn the crop residue after harvest in order to kill off the pest. Plant cover, which would hold the dry soil in place so the wind couldn't blow it away, would provide the small beetle with hidden living quarters.

While new research shows promise that chemicals and genetic engineering may help limit erosion in the future, farmers and scientists agree that for now, age-old conservation methods such as crop rotation, contouring, terracing and setting aside acreage are the most reliable ways to prevent erosion.

On Bob Cerven's farm, corn is never planted on the same acreage two years in a row, as he rotates soybeans to those fields every other year. All his sloping fields are terraced and the terraces are underlain with tiles (drain pipes) that carry away excess surface water. "I had the first bench terraces in Montgomery County," Cerven hoasts

But even with 28 miles of terraces and 20 miles of tile on his land, four years ago Cerven's corn and soybean crops were damaged by rilling. "A lot of people have the concept that when you have terraces, you've got your erosion under control," says agronomist Hintz. That's not true, he explains, but adds that rilling between terraces can be controlled with conservation tillage.

Perhaps the second Montgomery County farmer who dated to experiment with terracing was Deane McCunn. He built his first terrace 23 years ago. Even so his corn and soybean fields began washing away between terraces during heavy rains in the spring of 1979. That's when he realized that "if you've got your ground torn lose and you get that kind of rain, you're going to have excessive erosion." So he stopped tearing up the soil.

From a distance, the fields on McCunn's 450 acres look neatly cropped, with tall, green stalks of corn and lush fields of soybean plants. A closer look, however, reveals small pieces of stubble between the corn and a few dried-out corn cobs from last year's crop on the ground beneath the soybeans.

McCunn has tilled that soil only one time in three years. His yields are as high as they were when plowed and disked in the traditional way. And he found that no-till has benefits he never knew about before he began experimenting: It saves time and

Despite the added expense of \$5.50 an acre (some no-till farmers pay up to \$30 an acre) for extra herbicides to kill weeds that grow when fields are not tilled, McCunn says no-till can "save you time, save you from working as hard, save you diesel fuel and best of all it'll save you soil. The technology's there, the machinery's there and just think of the soil erosion we could prevent if everybody would do it," he says.

McCunn says that during the 1978 season he used between 1,700 and 1,800 gallons of fuel for cultivating, planting and harvesting his crops. But in 1980, with no-till, he used only between 800 and 900 gallons, because he didn't have to make as many trips across his fields on his tractor.

McCunn and Cerven, by their enthusiasm, have converted other farmers to conservation tillage. They give talks to groups of farmers and have made an educational slide

show about no-till. Both farmers practice conservation tillage even on flat land, where erosion generally does not occur, because this saves them money.

But a tour of Montgomery County makes it clear that most farmers do not practice soil conservation, despite the obvious and severe soil erosion that is stealing their land. One explanation given for this is that 57.2 percent of Iowa's cropland is rented and renters have less incentive to conserve soil than owners. Another explanation that many farmers give is that they can't afford to change the way they farm; they can't afford not to plant on steep slopes and they can't afford to invest in terracing and other erosion controls. Hintz is sympathetic to these farmers. "There's just not enough cash flow for them to use conservation practices," he says.

Prevalent, too, is the attitude that soil is like money—you can't take it with you. So you're better off spending while you're alive and enjoying any prosperity it brings you and letting future generations take care of themselves.

Cerven, on the other hand, believes the age-old notion that "we don't inherit our land from our ancestors, we borrow it from our children." He says it "burns him up" to see farmers destroying what might have been rich, productive soil for their grand-children's use. And McCunn, who discovered the financial benefits of conservation tillage after being forced into saving his own soil, says he can't understand why everybody doesn't do it. "It looks to me like if anybody would take a good hard look at the economics of it in these times when we need to save what we can, they would do it." He adds, "I think it's coming, but it's going to be slow coming, just like it's been slow coming to this point."

A good look at the economics was all it took for Ben Kern to realize that he couldn't afford to begin farming if he didn't practice no-till. After earning a degree in agriculture from the University of Iowa in 1979, Kern returned to Warren County, Iowa, to take over operation of his family's 450-acre corn and soybean farm.

By the farming no-till, Kern was able to arrest the erosion problem that was eating up the farm's profits and not "be stuck with a lot of machinery that would be technologically outdated in a few years." Kern has saved enough money on fuel and expensive cultivators to install at least one terrace next year. And he harvests 188 bushels of corn per acre on the average, while his neighbors are only getting about 140 bushels using conventional methods.

Still, many farmers remain unconvinced. When terracing can cost as much as \$300 to \$500 an acre—many times the average profit at today's corn prices, even with a 50 percent subsidy from USDA's Agriculture Stabilization and Conservation Service—and setting aside acreage for conservation purposes can reduce revenue, there is little incentive to stop practicing proven farming methods that always produce good crops.

methods that always produce good crops.

Conservation "is a whole new concept," says Bill Brune, USDA's conservationist in Iowa. "You have to convince people and that takes time." Until recently, Brune says, even the Department of Agriculture sponsored plowing contests, which rewarded farmers for what is now considered a threat to conservation. Now the Government offers money to farmers who are willing to experiment with conservation.

But the Government has limited funds, and soil programs haven't escaped the Federal budget-cutting ax. In fiscal year 1982, the ASCS was appropriated \$220.1 million for four conservation programs. The Administration's proposal for fiscal year 1983 is to combine all four functions and fund the new Agriculture Conservation Program at \$56 million, a 75 percent reduction.

Likewise, the Administration hopes to trim the Soil Conservation Service's budget by \$58.7 million to \$515.8 million, reducing funding for watershed and flood control, resource and conservation development and the special Great Plains Conservation Program.

Any cutting should slow the progress being made in soil conservation. Iowa's Hintz doesn't think "any of the government units are doing enough" now. And Gerald Darby of the SCS says the Federal soil conservation budget is only "a drop in the bucket compared to what's needed."

Since the early 1970s, state governments have assumed some of the financial responsibility for erosion control; a number of states, including Iowa, now pay farmers to take conservation measures. At least 10 states are encouraging or requiring farmers to develop conservation plans for their land. The goal of Iowa's legislation, adopted last year, is to have a conservation plan for every Iowa farm by 1958.

Iowa has another new law that makes a farmer liable for damages if sediment from the farmer's eroding land carries to a neighbor's property. And justices of the state Supreme Court have discussed the need for some kind of malpractice law that would discourage farmers from using their land carelessly.

Fear that state and Federal governments will move to adopt laws requiring erosion control practices is one reason farmers have turned to conservation tillage in recent years. Even farmers who have already given up their moldboard plows would rather see erosion control worked out locally and voluntarily through soil conservation districts.

Private groups, such as the Washington, D.C.-based National Association of Conservation Districts, promote programs and provide assistance to encourage farmers to take care of deteriorating land. "Who we look to to put soil conservation on the line are the private people," not the government, says R. Neil Sampson, the association's executive vice president and author of "Farmland or Wasteland: A Time to Choose."

The government, says Sampson, should provide more money to encourage soil conservation and fewer funds to support abusive practices, such as erosion-producing plowing of grassland in Colorado that enables landowners to cash in on government-endorsed tax breaks.

The government, Sampson says, should "quit underwriting the abuse of land," fund more research and "sort out the policy situation for American agriculture." Although the 1981 farm bill for the first time mentions the problem of soil erosion, Sampson says current farm policy and the faltering agricultural economy often prevent farmers from investing in terraces or tractors modified for conservation tillage.

The National Association of Conservation Districts plans to organize by December a national information center for conservation tillage, which would serve as a clearing-house and telephone hotline for soil conservation information. The Iowa National Heritage Foundation in Des Moines is encouraging the agriculture industry to refrain from showing potentially erosive farming practices in farm equipment advertisements.

And the newly formed National Endowment for Soil and Water Conservation is attempting to raise \$500,000 to spend on putting into practice innovative ideas in the areas of soil and water conservation. "There's a lot of innovation out there that really has never been recognized and disseminated," according to Clifford Ouse, NRECA's legislative representative for agriculture issues, who is the group's vice president.

Even as those projects are in the works, farmers like Cerven, McCunn and Kern are spreading the word about conservation through community meetings and visits to schools. "Study it, listen to other farmers, take their advice and give it a try," suggests Kern. "A lot of farmers have made it work." McCunn agrees: "I know one thing. I'm not going back to the other system."

#### NATIONAL CONFERENCE OF STATE LEGISLATURES EN-DORSES MORTGAGE REVENUE BOND PROGRAM

 Mr. SASSER. Mr. President, passage of the Mortgage Subsidy Bond Tax Act of 1980, intended to clarify regulations affecting the mortgage revenue bond program, virtually ground it to a halt with vague and con-

flicting provisions.

Within the past 2 years, many of the technical problems associated with the mortgage bond program have been cleared up, both by regulation and by legislation. The Internal Revenue Service's increasing responsiveness to the program, coupled with provisions of the Tax Equity and Fiscal Responsibility Act of 1982 making further corrections, have helped to create a productive and smooth-functioning program for providing housing assistance to low and moderate income first time home buyers. State and local bond issues have increased, monitoring has improved, and hundreds of families across the country are improving the quality of life for themselves-and improving the quality of State and local economies-by moving into their first

The irony is that, after years of debate and multiple refinements, the mortgage bond program is scheduled to be sunsetted on December 31, 1983. Just at the point where the real value of the program is being realized, there is a possibility that it may be halted.

The National Conference of State Legislatures has echoed my own view that this very effective program should be extended beyond next year's cutoff date, and I am looking forward to working with them to see that the extension is made a reality during the next session of Congress. I ask that the NCSL statement be printed in the Record.

The statement follows:

MORTGAGE REVENUE BOND EXTENSION

The Mortgage Subsidy Bond Tax Act of 1980 passed by the Congress placed significant restrictions on the use of single-family mortgage revenue bonds and additional restrictions on the use of multi-family bonds. As a result, the targeting of these mortgages

has been enhanced and the volume of these bonds significantly lowered. Although issuances of these bonds have slightly increased following technical amendments by Congress as part of the Tax Equity and Fiscal Responsibility Act, the loss to the federal treasury has not significantly risen in recent years.

Use of single-family mortgage revenue bonds is scheduled under the Mortgage Subsidy Bond Tax Act to sunset December 31, 1983. NCSL believes that first-time home-buyers and other low- and moderate-income families as defined by individual state laws remain unable to purchase homes at reasonable financing rates and calls for the permanent extension of the ability to use these bonds.

NCSL also wishes to support the continued ability of states and localities to provide multi-family housing for low- and moderate-income families using tax-exempt bonds and calls upon Congress to place no further restrictions on these bonds.

#### GOVERNOR ROBERT D. RAY

• Mr. GRASSLEY. Mr. President, a great man and an outstanding leader is stepping down as Governor of Iowa in January 1983. Gov. Robert D. Ray has been a rare leader, one who is recognized for both pubic achievement

and personal integrity.

While many public officials struggle to maintain pubic trust and acceptance, Governor Ray has earned the confidence of Iowa's citizens and national respect by heading an administration that achieved its goal withut corruption. He realized, as Cicero did over 2,000 years ago, that "the administration of the government, like the office of a trustee, must be conducted for the benefit of those entrusted to one's care, not of those to whom it is entrusted."

First and foremost Governor Ray has honored the responsibility of maintaining the public trust. According to Washington Post columnist David Broder, Ray and severa colleagues also retiring this year have political ambitions second behind their responsibility to build government instruments of which they are a part." Broder added, "In a time when many view politicians with deep suspicion, the integrity, ability and durability of these men are a powerful rebuttal to cynicism." These words exemplify Iowan's perception of their Governor.

It is no wonder then that Governor Ray's popularity actually increased with each term. Iowans first expressed their confidence in Bob Ray by selecting him as Iowa's 38th chief executive in 1968, and went on to reelect him to 2-year terms in 1970 and 1972, and to 4-year terms in 1974 and 1978. He earned an average of 59 percent in the latter three elections. The Iowa poll conducted by the Des Moines Register shows that 62 percent of Iowans approved of Governor Ray's job performance after 1 year in office, and almost

80 percent approved of his work during his most recent term.

Perhaps the greatest legacy left by Governor Ray is the stability maintained by the State. Through his effectual leadership, Iowa became highly regarded across the country as a prudently managed, clean, moderate and stable government. This was achieved not only because of Governor Ray's excellent leadership style, but because he cared about Iowans.

This concern for the people of his State allowed Iowa to weather the Nation's turbulent economic times of the latter 1970's and early 1980's. Money was spent wisely to maintain the State's excellent educational system, preserve valuable natural resources and continue many critical human services programs—all without going into debt.

Governor Ray also managed to run a stable, consistent government while avoiding large tax increases. He blocked several attempts to increase Iowa's major taxes and was cited by Time magazine for his work in limiting property taxes. The Governor introduced and expanded the elderly tax credit and successfully pushed for repeal of the sales tax on food and drugs—a real help to all Iowans.

Constantly working to promote Iowa and its products, Robert Ray recognized that new markets for agricultural and manufactured goods meant jobs for Iowans. Governor Ray led several trade missions of Iowa businessmen, including visits to the People's Republic of China in 1980 and to China, Japan and other Asian nations in 1982.

The Governor established Governor's economy committees in 1969 and again in 1979. Management experts from Iowa companies recommended ways to further streamline State government. Many of their proposale have since been implemented saving tens of millions of tax dollars.

One Governor's economy committee item was a merged Department of Transportation. Iowa's DOT is now a national model, and our States's railroad branchline program has upgraded more miles of track then all other States combined.

Governor Ray pushed for adoption of the bottle and can deposit law to save energy and clean up the environment. He encouraged thousands of Iowans to volunteer for the "Great Iowan Cleanup" in May 1979, and thousands more to plant trees as part of the popular "plant Iowa program."

A strong advocate for Iowan agriculture, Governor Ray has testified before congressional committees and traveled on "fine Iowa meats" promotions. In 1979, he received the Honorary Master Pork Producer Award from the Iowa Pork Producers Association. In January 1980, Ray announced traditional increases in funding for Iowa's

first inthe nation" soil conservation cost-share program.

In the late 1970's, Governor Ray proposed and signed into law a sweeping urban revitalization plan for Iowa cities and towns. Earlier, the Governor initiated State revenue sharing with communities, propoed an Iowa tuition grant program for private college students, appointed the innovative iowa 2000 futures committee, reformed Iowa's outdated judicial system, and began the Iowa Citizen's Aid Office.

Governor Ray's leadership ability has been demonstrated well beyond Iowa's borders. He has aerved as chairman of the National Governor's Association, the Republican Governors Association, and the Midwear Governors Conference. Governor Ray has served as chairman of the Education Commission of the States and as president of the Council of State Governments. The Governor also chaired the platform committee at the Republican National Convention in 1976.

Thanks to Governor Ray, Iowa is considered to be a pacesetter among the States in coping with the energy crisis. Good example of Iowa's efforts include the fule set aside, coal and solar research, and energy conservation and weatherization programs. Governor Ray's promotion of gasohol has helped made Iowa the No. 1 State in American in consumption of the energy alternative.

Governor Ray has represented the United States on several key diplomatic and goodwill missions, including independence ceremonies for the new nation of Papua, New Guinea in 1975, and the inauguration of the President

of the Philippines in 1981.

The Governor was appointed a member of the American delegation to the Special United Nations Conference on Refugees in Geneva, Switzerland in 1979. Later that year, he led a Christmas season appeal that raised \$500,000 to help feed starving people in Cambodia and Thailand.

During his 14 years as Governor, Bob Ray has established a record of dedication and service that reaches from Des Moines to points around the globe. Our State will, indeed, be losing a great Governor, yet gaining an honest and caring citizen. The love, concern, and sensitivity for all people projected over the past 13 years exhibits the special place Iowa holds in his heart. And for this, we the citizens of Iowa are grateful.

## PROJECT ORBIS

• Mr. MATHIAS. Mr. President, Project Orbis, a flying ophthalmological teaching hospital, will land in Colombo, Sri Lanka on December 23, 1982. In the succeeding days, it will introduce Sri Lankan physicians to the latest techniques in preventing and curing blindness and then fly on to repeat the process in the United Arab Emirates. We in Government can take pride in the fact that the Agency for International Development (American schools and hospitals abroad program) has supplemented Orbis's mostly private funding. This small investment will save the sight of thousands, and eventually millions, worldwide.

Project Orbis exemplifies charity in the best sense of the word. The ophthalmological community, led by Dr. David Paton of Baylor College of Medicine, has organized an effective international volunteer program to share medical advances. The Federal Government with a relatively small infusion of funds, has helped the project over initial obstacles. Orbis has quickly proved its ability to bring sight to the blind of the world.

Forty-two million people in the world are blind. Another half a billion have eye diseases and disorders which can lead to blindness. Recent technological breakthroughs which can be copied anywhere make possible the prevention of two-thirds of all blindness. The sight of millions would be restored if these medical advances were shared with all ophthalmologists.

Dr. Paton realized that improving ophthalmological skills around the globe would require personal instruction by teaching physicians. Textbooks, manuals, and standard training films are not adequate substitutes. To accomplish this miracle, Dr. Paton founded Project Orbis, a DC-8 jet airliner refitted to contain a classroom and fully equipped opthalmological operating room and treatment facilities. An audio-visual system allows doctors to observe operations in detail as well as to participate themselves. The plane is ready to begin its work within a few hours of arrival at an airport.

Orbis began operations early in 1982, first in Houston and then in extraordinarily successful missions to Colombia, Ecuador, Jamaica, Panama, Peru, Germany, England, Turkey, the Philippines, Malaysia, Thailand, Indonesia, Pakistan, and the People's Republic of China. Future plans call for visits to the Middle East, and Africa. So far, more than 75 physicians, including such world-renowned specialists as Drs. A. Edward Maumenee and Ali Khodadoust from John Hopkins, have served on Orbis' staff as volunteers, training, and often learning from, over 1,000 doctors of host countries. After each visit, the local doctors may take edited tapes home to instruct others, multiplying the benefits. The best measure of the success of Orbis is that it has been invited back to every country visited. It hopes to return eventually to all of them.

Everywhere Project Orbis goes, its accomplishments in teaching and performing the latest treatments of eye diseases win lavish praise. Newpapers throughout Latin America gave extensive coverage to Orbis' inaugural visits, with headlines such as "A Project Which Seeks to Save the Eyes of the World" and "From the U.S.' The Flying School, a Helping Hand for the Vision-Impaired." President Belaunde of Peru was so impressed by a visit to the plane that he immediately pushed for legislation to establish Peru's first eye bank. Chancellor Helmut Schmidt of West Germany declared:

The Orbis project . . . shows that idealism andf private initiative continue to play a valuable and indispensable role in the field of medicine.

Orbis is simultaneously assisting thousands of blind people worldwide and acting as an ambassador of goodwill from the United States.

The citizens of other nations see in Orbis the generosity for which the United States and the people of the United States have long been known. John Youle, Charge D'Affaires at the American Embassy in Ecuador, wrote this spring:

I cannot overemphasize the tremendous impact which Orbis has had in projecting the best of the United States: its concern for the peoples of the world and the dynamism and philanthropy of its private enterprise.

Amidst all the bad news these days, it is a joy to have something pleasant to comtemplate. I am sure my colleagues join me in wishing continued success to Project Orbis.

## JOHN H. FANNING

• Mr. PELL. Mr. President, it is with a deep sense of gratitude and pride that I wish to recognize Mr. John Fanning, an old friend and fellow Rhode Islander, for his outstanding service as a member and Chairman of the National Labor Relations Board.

It is also with some sense of sadness that I must report to the Senate that Mr. Fanning is today retiring after a quarter-century of service on this Board. As a member of the Senate Labor and Human Resources Committee, I will miss the insight he has presented at nominations hearings on matters of mediation between labor and management. I am sure that his experience and expertise will be missed not only by the other members of the Board, but by the labor-management community as a whole.

Mr. Fanning was the first person to be named to the NLRB by Presidents of both political parties. He was first appointed to the NLRB in 1957 by President Eisenhower, and reappointed by President Kennedy in 1962, President Johnson in 1967, and President Nixon in 1972. He served as Acting Chairman for a short period under President Ford, and in 1977 President Carter designated him as Chairman.

In his tenure with the NLRB, John Fanning has been involved in deciding approximately 25,000 cases on unfair labor practices and employee representation. Throughout these decisions, John Fanning has evidenced his outstanding personal commitment to the principle of collective bargaining and employee-management relations. He has filed roughly 2,000 dissents, and his dissenting position was upheld four times by the Supreme Court, in: Brown Food Store, 137 NLRB 73 (1962); Fibreboard Paper Products Corp., 130 NLRB 1558 (1961); I.B.E.W. and its Local, 134 (Illinois Bell Tel. Co.), 192 NLRB 85; and NLRB v. Drivers Local 639, (Curtis Bros., Inc.), 362 U.S. 274 Sup. Ct.

During hearings before the Senate Human Resources Committee on his nomination to the Chairman of the NLRB, Mr. Fanning cited expeditious review of cases as one of the most pressing problems he would tackle as Chairman of the Board. He worked vigorously to attack this problem, and during his first 2 years as Chairman, more decisions on cases were made than during any other comparable period in history. Furthermore, the Board was able to return unspent money to the Treasury in each year that he was Chairman, ranging from \$2.4 million in 1978 to \$0.9 million in 1981.

In recognition of his outstanding public service contribution to labormanagement relations, the John F. Fanning Conference on Labor-Management Relations was established in 1974 by the Quirk Institute of Industrial Relations of Providence College. This conference was established to provide an opportunity for an open exchange of ideas regarding issues which affect the collective-bargaining process, and is tremendous testament to Mr. Fanning's wisdom and justice.

Mr. Fanning is a graduate of Providence College in Providence, R.I. He received his law degree at Catholic University of America, Washington, D.C., and is past national president of the Catholic University Law School Alumni Association. He is a member of the Rhode Island and Supreme Court bars. He practiced law in the city of Pawtucket, R.I., before entering Federal Government service in 1942. In 1956 the National Civil Service League selected him as 1 of the 10 outstanding civilian employees in the Federal Government.

In his remarks of the June 11 conference sponsored by the Industrial Research Unit and the Labor Relations Council of the Wharton School of the University of Pennsylvania, Edward B. Miller, former Chairman of the NLRB, said of John Fanning:

He deserves the respect of all of us, whether or not we agree with his views and philosophy with respect to a proper interpretation of the NLRB. He is a dedicated, hardworking man with a very long history of putting up with the barrage of criticism, internal and external, that goes with the job of being a member, and particularly Chairman, of the NLRB.

Rhode Island is indeed proud of its hard-working son who has made such a tremendous contribution to labormanagement relations. I wish both him and his family the best of luck in the years ahead.

SELECT COMMITTEE TO STUDY LAW ENFORCEMENT UNDER-COVER ACTIVITIES OF THE DE-PARTMENT OF JUSTICE

MATHIAS. Mr. President. today the Select Committee to Study Law Enforcement Undercover Operations of Components of the Department of Justice released its final report. This report is the result of more than 8 months of intensive study of numerous operations of the FBI and other law enforcement agencies. The focus of our investigation was, of course, the undercover operation codenamed Abscam. The report contains detailed factual findings about many of the controversies which this operation has provoked. It also contains specific recommendations for legislative and administrative action to improve the effectiveness of undercover operations while safeguarding the rights of the citizenry.

The select committee's report will provide food for thought for all of my colleagues. The full report will take some time to digest. However, I think it is important that the Senate be made aware of the basic findings and recommendations of the report as soon as possible. Therefore, I ask that my statement, and that of Senator HUDDLESTON, the vice chairman of the select committee, regarding the release of this report, be printed at the conclusion of these remarks, along with a summary of the highlights of the final report.

Mr. President, I commend this report to my colleagues. I hope that it will receive their close attention. The issues which it discusses will be before us again in the near future. Senator HUDDLESTON and I will be working with our colleagues on the select committee in order to lay the groundwork for the introduction of legislation embodying our recommendations as early as possible in the 98th Congress.

The remarks and summary follow:

STATEMENT OF SENATOR CHARLES MCC. MATHIAS, JR.

Today the Select Committee to Study Undercover Law Enforcement Operations of Components of the Department of Justice releases its final report. This report is the product of more than eight months of intensive investigation into undercover operations of the Federal Bureau of Investigation and other Justice Department agencies.

The Select Committee was established, pursuant to Senate Resolution 350, on

March 25, 1982, in the wake of the most highly publicized undercover operation in the history of the FBI: Abscam. The Senate had just finished wrestling with the uncomfortable responsibility of judging the conduct of one of its members who had been convicted in an Abscam prosecution. It was now determined to investigate the serious allegations of governmental misconduct which had been aired throughout the debate on the motion to expel Senator Williams.

During those difficult days, the picture of Abscam that emerged was one in which reality was distorted by wisps of mist and fog generated by the stagehands. As a result of the investigation conducted by the Select Committee, much of the fog has lifted. We now know more about Abscam that we ever did before.

In this instance, as in so many others, sunshine has proved to be a good disinfectant. The worst fears about Abscam-the chilling vision of an Executive Branch conspiracy against the legislature, with overtones of manipulation and cover-up-have proved to be evanescent. But the light of day has brought into focus some disturbing mistakes which must not be allowed to recur.

The Select Committee has compiled an extensive factual record on this controversial operation. Dozens of key witnesses have been interviewed, or have testified under oath. Tens of thousands of pages of documentary evidence have been perused, including many confidential FBI files never before made available to any investigative body or tribunal. Numerous audio and video tapes have been studied and re-studied. The proceedings in more than a dozen courts have been exhaustively reviewed.

The findings which we have carved out from this mountain of factual detail amount to a mixed review for the performance of the FBI and the Justice Department in the conduct of Abscam.

We found that the men who came before the video cameras to engage in corrupt transactions had not been targeted by the FBI. But we also found that the FBI did far less than it should have done to insure that innocent parties were not also ensnared in the net and brought before the hidden lenses, and that, in a few cases, the undercover operatives did steer the investigation toward a described class of targets.

We found little evidence that the Abscam defendants had been so extensively coached by the chief informant, Mel Weinberg, that their on-camera performances were mere play-acting. But we also found such lax supervision of the informant, and such sloppy management of the whole operation, that other double-dealing by Weinberg could

have gone on undetected.

We found that Weinberg himself was probably not guilty of some of the misdeeds of which he has been accused by Abscam critics. But we also found ample evidence that he did engage in other misconduct, including taking kickbacks from bribes and giving false testimony.

We found no evidence that the Justice Department timed the prosecution or leaked information for political purposes. But we also found serious shortcomings in Justice Department coordination of this complex,

multi-state operation.

Each of these findings is backed up by extensive factual documentation. We know that our findings will not put to rest the controversies which rage around Abscam. The most important questions-those of guilt and innocence-will be finally determined by the courts. But we are confident that the American people have never before had a more detailed and exhaustive factual account of the Abscam operation than the one contained in the pages of our report.

But the dispelling of the fogs of Abscam was not the Select Committee's only mission. Nor, in my view, was it the most important charge we were given. The Senate instructed the Select Committee to look into a broad range of policy questions arising from undercover operations. As I stated at the opening hearing of the Select Committee on July 12, 1982:

is to study in depth the 'Our goal safeguards that the FBI and other components of the Department of Justice have formally placed on themselves, to determine how those safeguards compare to past policies and practices, and to ascertain whether any action by the Congress in this area is necessary or desirable."

I am pleased to report that we have accomplished the goal which we set for our-selves last July. The various Justice Department guidelines on undercover operations, informants, and criminal investigations have been subjected to the closest scrutiny. We have found that the standards embodied in these guidelines represent a marked improvement over the looser past practice as exemplified by Abscam and some other contemporaneous operations. But we have concluded that further action by Congress is needed. And we have recommended legislative and administrative steps which, in our view, will enhance the effectiveness of undercover operations while assuring greater protection for privacy and constitutional

Our legislative recommendations, if enacted, would provide the FBI and other law enforcement agencies with explicit authority to engage in undercover operations. They would help insure that the Congress is more fully advised concerning undercover activities. They would articulate clear standards to which such operations would be held, and would prohibit the initiation of undercover investigations, or the targeting of particular suspects, absent a reasonable suspicion of criminal activity. Where the undercover operation would threaten the exercise of First Amendment rights or privileged relationships, a probable cause standard would have to be met. Finally, we recommend that the law of entrapment be clarified and placed on the statute books.

Justice Department law enforcement agencies, particularly the FBI, have made great progress in recent years in bringing undercover operations under consistent and responsible internal control, through the promulgation of investigative guidelines. The Select Committee encourages the continuation of this process, and its expansion to other agencies, and recommends the clarification of some problem areas in the cur-

rent guidelines.

These recommendations, we believe, address serious problems which today limit the effectiveness of undercover operations, and which leave this powerful investigative technique open to abuse. The legislative recommendations, in particular, should receive thorough consideration by the appropriate committees, beginning early in the 98th Congress.

Congress has another role to play in the regulation of law enforcement undercover activities. The FBI and other agencies have rapidly expanded their use of undercover operations; they are now fully incorporated into the Federal crimefighting arsenal. As

discussed in our report, the undercover technique is potentially a powerful weapon against crime; but it is also one which, through carelessness or abuse, can blow up in the faces of the investigators. Congress needs to exercise its oversight function vigorously and intelligently if the undercover technique is to reach its maximum poten-

The accomplishments of the Select Committee would not have been possible without the hard work and careful thought of many people. The contributions of many of them are acknowledged in the report itself.

Here I will mention only a few.

The labors of the Select Committee staff have been Herculean. In the space of barely seven months, Chief Counsel Malcolm E. Wheeler and former Chief Counsel James F. Neal assembled an exceptionally capable staff, immersed themselves in the minutiae of Abscam and several other complex operations, and articulated both the factual detail and the policy considerations in lucid prose. Without the unflagging efforts of this staff, today's report would never have seen the light of day.

The cooperation of FBI Director William Webster and other FBI and Justice Department officials also aided the Select Committee in the performance of its tasks. As I have already noted, the FBI agreed to make available volumes of documents about Abscam and other underground operations. While we were not always able to agree with the FBI about access to other documents, in general the atmosphere of confrontation between the Executive and Legislative branches which sometimes pervades these endeavors was conspicuously absent in these proceedings.

Finally, the dedication and thoroughness exhibited by Senator Huddleston, our Vice Chairman, and by my other distinguished colleagues on the Select Committee, have contributed immeasurably to the value of our inquiry. The members of this committee took an active and informed interest in this investigation from the very beginning. The fruit of our labors reflects the unique per-

spective of each of them.

All the members of this Select Committee share a very important understanding about the proper role of the Congress in our constitutional system. All of us approached this assignment with a deep concern about the threats to the constitutional Separation of Powers which inhere in an operation such as the Abscam investigation. But all of us have rejected the idea of any form of special dispensation for members of the legislative branch. We agree that the paramount concern of the Congress must be to devise a system for the control of undercover operations which will safeguard the constitutional rights of all the people. Such a system, we believe, will also provide adequate protection for the constitutional prerogatives of the Congress.

To build, in statute and regulation, the framework for such a system is now the task before us. The Justice Department's inter-nal reforms of the past few years, notably the promulgation of guidelines for undercover operations, are a good start. But the essential next step is up to the Congress. If the work of this Select Committee helps us to take that step thoughtfully, but with dispatch, then we will have made a lasting contribution of which we can all be proud.

#### STATEMENT OF SENATOR WALTER D. HUDDLESTON

Over the past ten years, the Federal Bureau of Investigation has enormously ex-

panded its use of undercover operations. Other agencies are planning to increase their use of these methods.

Until now, Congress and the American people did not have a full picture of what was going on. The Justice Department and the FBI acted mostly on their own, with very little policy guidance from Congress.

The report issued today by the Select Committee To Study Law Enforcement Undercover Operations of the Department of Justice changes all of that. Congress now has before it a thorough and detailed examination of one of the most controversial criminal investigations in American history-the Abscam case.

First of all, I want to stress that we do not recommend special safeguards solely for Members of Congress. The system we recommend is designed to prevent abuses of the rights of any law-abiding citizen.

The public must know that Members of Congress are not above the law and that the law will fairly and even-handedly investigate and prosecute wrongdoing at the highest levels.

The report documents both the points and the problems with Abscam. The select committee did not try to make a final judgment on Abscam, but I have no hesitation in stating my own opinion. Looking at the overall record of the FBI and the Justice Department in Abscam, I believe the good points outweigh the bad.

At the same time, however, I am troubled by some of the problems in Abscam. The select committee found that individuals who attended video-taped meetings with FBI undercover agents were not targeted by the FBI. They were named first as being possibly corrupt by middlemen who were not working for the FBI.

On the other hand, at least one individual who did not attend a meeting was targeted by the FBI's informant, without having been named by a middleman as a possible criminal. This happened to Congressman

William Hughes, for example.

It is also clear to me that the FBI and the Justice Department relied too much on the unsupported word of corrupt middlemen as a basis for bringing law abiding citizens like Senator Pressler to these meetings.

Cases like this demonstrate the need for Congress, by law, to provide that no individual may be targeted without reasonable suspicion of possible criminal conduct.

Legislation is also needed to compensate innocent people who are injured as a result of unlawful or negligent government con-

The select committee looked at other operations besides ABSCAM. The report describes four other FBI operations, as well as the use of undercover techniques by the drug enforcement administration and the immigration and naturalization service. The committee also examined current FBI programs and heard from expert witnesses

This record documented the importance of undercover operations for effective law enforcement. Yet, Congress has failed to give the FBI the tools to do the job. On February 1, 1982, legislation designed to clarify FBI undercover authority expired. Since then, the FBI has had to cut back its operations and tailor them to unrealistic legal restrictions on the use of proprietaries, bank accounts, leases, and contracts.

From 1978 to 1982, the authority to waive these restrictions was included in annual Justice Department authorization bill. Since February 1, the Justice Department has operated without an authorization act. The select committee's first recommendation is to give the FBI permanent authority for its undercover operations within a framework of standards and guidelines, so the FBI can act more effectively against serious crimes.

I believe the select committee report makes an overwhelming case that Congress should enact legislation to strengthen FBI law enforcement operations, while protect-

ing the rights of all the people.

The task for Congress is to declare the standards for Federal law enforcement, provide the resources to do the job, and determine how well law enforcement lives up to those standards.

In closing, I want to thank the Chairman, Senator Mathias, for his outstanding leadership of the committee. And I want to thank all the members for their help in struggling with these issues. The two chief councils-Jim Neal and Malcolm Wheeler-and their staff have done a superb job. The entire Senate is greatly in their debt, and we wish

HIGHLIGHTS-FINAL REPORT OF THE SENATE SELECT COMMITTEE TO STUDY LAW EN-FORCEMENT UNDERCOVER OPERATIONS OF THE DEPARTMENT OF JUSTICE

them well as they go on from here.

#### FINDINGS

Undercover operations are "indispensable to the achievement of effective law enforce-' but they create "serious risks to citizens' property, privacy, and civil liberties, and may compromise law enforcement itself." A better system of statutes, guidelines, and rules is needed to avoid "both the tyranny of unchecked crime and the tyranny of unchecked governmental intrusion.

Abscam demonstrates both the benefits and costs of undercover operations. Some of the problems in Abscam "would be less likely to occur under the system now in place." The Committee did not attempt to adjudicate the guilt or innocence of criminal

defendants.

Several allegations of illegality or impropriety in Abscam "are not supported by a preponderance of the evidence.

Individuals who attended meetings with FBI undercover agents were not "targeted by the FBI.

The FBI did not improperly fail to investi-

gate any lead.

None of the defendants was "merely playacting." Several allegations about informant Wein-

berg are unsupported.

There is no evidence of politically moti-

vated "leaks." There were "mistakes and deficencies" in

Abscam that show the need for additional controls on undercover operations.

Mistakes were made in selection and supervision of Weinberg, and the weight of the evidence indicates misconduct by Wein-

Controls over the initial approval of Abscam were insufficient, shifts in investigative focus were not adequately reviewed. and overall management and record-keeping were deficient.

There was undue reliance on corrupt middlemen to bring "at least one (and apparently more) clearly innocent public official . . . before the hidden cameras."

Justice Department supervision was inadequate in several respects, and senior offi-cials made certain "unjustifiable" and "injudicious" statements.

#### RECOMMENDATIONS

New legislation should expressly authorize undercover operations and exempt the FBI from certain legal restrictions that inhibit those operations. The statute should require Attorney General guidelines and annual reports to Congress. It should provide compensation for persons injured as a result of unlawful or negligent conduct. It should prohibit undercover operations conducted without "reasonable suspicion" of a crime and require "probable cause" for techniques threatening First Amendment rights.

Congress should consider providing an entrapment defense when an undercover agent has "induced the defendant to commit an offense, using methods that more likely than not would have caused a normally law-abiding citizen to commit a similar offense.

The Attorney General's guidelines and FBI administrative rules should be revised to clarify current procedures. If the FBI is permitted to conduct as many operations as now underway, Congress should appropriate more funds to ensure sufficient equipment and support for full record-keeping and con-

The Select Committee does not recommend special safeguards solely for members of Congress.

FEDERAL GOVERNMENT SPONSIBILITY FOR CHILD NU-TRITION PROGRAMS-SENATE CONCURRENT RESOLUTION 121

. Mr. HUDDLESTON. Mr. President, would like to commend Senators Dole and Leany for their introduction of Senate Concurrent Resolution 121. This resolution, of which I am a cosponsor, expresses the sense of Congress that the Federal Government should retain primary responsibility for the child nutrition programs.

As they have done throughout the 97th Congress, the chairman and ranking minority member of the Nutrition Subcommittee once again are providing balanced, bipartisan leadership in the vital area of nutrition programs. They have introduced Senate Concurrent Resolution 121 as a simple statement that this is not the time for a major revision of the Federal role in child nutrition programs. Various tentative plans for a reorganization of Government roles currently contemplate a turnback of these programs to States and localities.

In 1981, Federal aid for child nutrition programs was reduced by \$1.5 billion or 30 percent. Since that time, over 2,000 schools have dropped out of the national school lunch program and daily participation has dropped by over 3 million children, including 1 million from low-income families. Major reductions have also occurred in the other programs as well-school breakfast, summer feeding, child care food, special milk, and nutrition edu-

cation. Given the extent of last year's reductions, it hardly seems appropriate to move forward now with sweeping

plans to remove Federal support from these programs. I, for one, cannot imagine voting for a plan that would put the national school lunch program

out of business.

I am pleased to note that the House has already approved a resolution, Concurrent Resolution 384, House which is very similar in content to Senate Concurrent Resolution 121. Senate Concurrent Resolution 121 presently has 56 cosponsors.

Given the widespread bipartisan support for Senate Concurrent Resolution 121, I hope that the Senate will be able to take action on the resolution prior to the adjournment of the 97th Congress.

I ask unanimous consent that the names of the 56 cosponsors of Senate Concurrent Resolution 121 be printed in the RECORD:

Mr. Dole; Mr. Leahy; Mr. Andrews; Mr. Baucus; Mr. Biden; Mr. Boren; Mr. Boschwitz; Mr. Bradley; Mr. Burdick; Mr. Cannon; Mr. Chafee; Mr. Danforth; Mr. Dixon; Mr. Ford; Mr. Gorton; Mr. Hatfield; Mr. Heinz; Mr. Huddleston; Mr. Inouye; Mr. Jackson; Mr. Jepsen; Mr. Johnston; Mr. Kennedy; Mr. Melcher; Mr. Metzenbaum; Mr. Mitchell; Mr. Moynihan; Mr. Riegle; Mr. Roth; Mr. Stafford; Mr. Tsongas; Mr. Weicker; Mr. Zorinsky; Mr. Hollings; Mr. Sarbanes; Mr. Cranston; Mr. Chiles; Mr. Eagleton; Mr. Bumpers; Mr. D'Amato; Mr. DeConcini; Mr. Nunn; Mr. Stennis; Mr. Pell; Mr. Dodd; Mr. Percy; Mr. Sasser; Mr. Levin; Mr. Randolph; Mr. Hart; Mr. Pressler; Mr. Pryor; Mr. Grassley; Mr. Bentsen; Mr. Specter; and Mr. Glenn.

#### REAUTHORIZATION OF THE GENERAL REVENUE SHARING PROGRAM

. Mr. HEINZ. Mr. President, on December 1, the distinguished Senator from Minnesota, Mr. DURENBERGER, announced that on the first day of the 98th Congress he would introduce legislation to reauthorize the general revenue sharing program. This program, which we all know is vital to the Nation's cities, towns, and counties, is scheduled to expire on September 30. 1983, unless reauthorized by the Congress.

As chairman of the Finance Committee's Subcommittee on Economic Growth, Employment, and Revenue Sharing, which has jurisdiction over the general revenue sharing program, wish to announce today that I plan to convene hearings on the program early in the 98th Congress. I commend the Senator from Minnesota making his intentions known at this early stage. Further, I am pleased that the President indicated his support for the program in a recent speech to the National League of Cities.

A simple reauthorization is the minimum that the Senate should expect on general revenue sharing. In fact, I believe that ideally the Senate would consider a substantial strengthening of this program, rightly called the single most important program by our local governments.

I would like to consider, for example, such issues as the adequacy of the program's funding level, \$4.6 billion each year since fiscal year 1977; the distribution formula; and whether additional aid should be provided to the Nation's highly distressed cities, to help them over the severe financial difficulties resulting from Federal budget cuts, unemployment, and the recession.

Mr. President, I look forward to working with my distinguished colleague from Minnesota who has long studied the problems of intergovernmental relationships in our Republic and who has a longstanding interest in the general revenue sharing program. This is a program which deserves the full support of leadership in all branches of Government.

DR. DOUGLAS FENDERSON, DI-RECTOR OF THE NATIONAL IN-STITUTE OF HANDICAPPED RE-SEARCH

 Mr. BOSCHWITZ. Mr. President, I rise today to express my support for Dr. Douglas Fenderson from Shoreview, Minn., who has been nominated to be Director of the National Institute of Handicapped Research. Dr. Fenderson is a native of Minnesota, trained at the University of Minnesota in industrial education, vocational counseling, psychology, and educational psychology. He currently is the director of the Office of Continuing Medical Education at the University of Minnesota Medical School. He also is a scientist in the Center for Health Services Research at the University of Minnesota.

The National Institute for Handicapped Research is charged with researching the many broad problems of rehabilitation of the handicapped. Dr. Fenderson has the qualifications and background necessary to lead this agency. Throughout his career, he has had continual contact with rehabilitation of the handicapped and training of personnel in the health professions. He is well-qualified in that he understands the scope of the problems of the disabled, the problems of training and utilization of personnel, the methods by which resources can be focused for solutions of problems in rehabilitation, and the need for interdisciplinary participation in the attack on these social problems.

I am proud to recommend to my colleagues that they confirm Dr. Fenderson's nomination as Director of the National Institute of Handicapped Research.

#### UNICEF REPORT ON SAVING CHILDREN'S LIVES

 Mr. KENNEDY. Mr. President, yesterday the United Nations Children's Fund (UNICEF) issued a report that reminds us once again how easy it would be for the international community to save the lives each year—I repeat, each year—of at least 20,000 children around the globe.

The UNICEF report echoes the findings of many others, but it suggests that four simple steps—four simple and very inexpensive programs—could save the lives of tens of thousands of infants and children every year, if they were properly funded by governments.

These progams relate to the leading cause of death and to stunted development among the poor children of the world; they involve: Oral rehyration therapy for children suffering from diarrhea; promotion of breast-feeding of infants; the use of child growth charts to detect malnutrition; and immunization against childhood diseases.

Mr. President, as I noted in the speech I was privileged to deliver at the World Health Organization's Conference on Primary Care, held in Alma Ata in 1978—it is clearly within our grasp ot eradicate childhood diseases that claim the lives of millions of children every year.

Look what can be controlled with already proven techniques that do not cost a great deal. With simple and relatively inexpensive immunization programs the interantional community could control:

Some 72 million cases of measles each year, in which 1.2 million children will die; 800,000 cases of tetanus each year, killing at least 600,000 people, most of them children; the death of 200,000 children by polio; and 8 million children stricken with whooping cough, of which 300,00 will die.

Again, Mr. President, yesterday's UNICEF report confirms, these are all diseases which we can control now with available and proven techniques. It is a crime that we do not adequately fund them.

Mr. President, I commend the UNICEF report to my colleagues, and ask that press reports on it and the text of my 1978 statement to the World Health Organizaiton be printed at this point in the RECORD.

The material follows:

[From the New York Times, Dec. 17, 1982] UNICEF URGES 4 STEPS TO SAVE CHILDREN'S LIVES

## (By Jane E. Brody)

The lives of 20,000 children could be saved each day by adoption of four simple, low-cost health measures that have already proved successful in limited trials in several developing countries, the United Nations Children's Fund said in a report yesterday.

Although health problems among the world's poor children remain enormous and may never be eliminated, fund officials said a significant impact could now be made with existing techniques that could be easily used even by illiterate people who have few hygienic amenities.

Dr. Richard Jolly, deputy director for programs, said at a news conference that if the four measures were "seriously implemented,

half the young children who now die each year would live." He added, "Doubts and skepticism need to be overcome, rather than vested interests."

The fund, known as Unicef, said the measures were designed to reduce deaths and retardation caused by chronic malnutrition and repeated infections. They are oral rehydration therapy for children with diarrhea; breast-feeding of infants; the use of child growth charts to detect hidden malnutrition, and universal immunization to prevent childhood measles, diphtheria, tetanus, whooping cough, polio and tuberculosis.

Without requiring any addition to food supplies, the fund said, the measures would make major inroads against childhood malnutrition, currently the leading cause of death and stunted development among the poor children of the world. These effects of malnutrition are held largely responsible for continued high birth rates and limited opportunities for self-improvement among the poor in developing countries.

Improved mass communications in many areas—principally television sets and transitor radios—was cited as a reason for optimism that the measures would be adopted in areas until now difficult to reach with health improvements.

In a statement issued yesterday, the United Nations Secretary General, Javier Pérez de Cuéllar, appealed to national leaders to support the recommended actions, which he said would demonstrate that even in times of great financial strain "it is possible for the world to take imaginative steps tg heal some of the most tragic wounds of underdevelopment and poverty."

According to James P. Grant, executive director of Unicef, the main obstacles to wide applacation of the proposals are lack of political awareness and commitment, the need to organize community workers and, in some cases, resistance of medical care systems to the use of paraprofessionals to administer vaccines and the use of at-home remedies like the diarrhea treatment.

In its annual report on "the State of the World's Children," Unicef estimated that the total cost of the proposed measures to counter hunger and malnutrition would be \$6 billion a year. It said that no new technological advances were required and that the social mechanisms for applying the techniques—such as doctors, community development workers and transistor radios—already existed in most countries.

While noting the need for long-term changes such as land redistribution and job development to conquer worldwide malnutrition, the children's fund said that its specific short-term proposals could produce significant improvements almost immediately and help to interrupt the cycle of poverty, malnutrition, retarded development and continued poverty.

The cornerstone of the Unicef plan is oral rehydration therapy, the replacement of salts and water lost during extended bouts of diarrhea. The average child in a poor community of a developing country suffers between 6 and 16 bouts of diarrheal infection each year. Diarrheal infections are the single largest killer of children in the developing world, causing one death every six seconds, and a total of five million childhood deaths a year.

Though most diarrheal infections are selfcuring, children die because the rapid loss of water and salts in the stool disrupts the function of vital organs, including the heart and kidneys. Traditionally, these losses are reversed through intravenous feeding, which requires the services of a health professional in a hospital or clinic. At-home attempts to replace water and salt orally failed because most of the salt solution

cannot be absorbed by the gut.
But a decade ago it was shown that adding the sugar glucose to the oral salt solution increased the rate of absorption by 2,500 percent. The Lancet, a leading British medical journal, called this discovery "potentially the most important medical advance this

century. Thus was born oral rehydration therapy, using a mixture of sugar and salt dissolved in a liter of boiled water, which is then drunk by a child with diarrhea. Although boiling water is ideal, ordinary "unclean" water can be used if necessary, since the lifesaving measure is getting needed fluids and salt into the child, officials said.

In Peru, where 26,000 children die each year from diarrheal illnesses, a countrywide campaign to introduce oral rehydration therapy may have cut deaths in half in "just one summer," according to a former Health Minister, Dr. Uriel Garcia Caceres.

[From The Washington Post, Friday, Dec. 17, 1982]

HEALTHTALK: CHILDREN'S PROGRESS (By Sandy Rovner)

The adults in this world who worry about children are more worried than ever.

That, of course, should be no surprise: In hard times when resources are limited and social programs in general are at risk, those for children are even more so. "The payoff," says James R. Grant, executive director of the United Nations Children's Fund, which today celebrates its 36th birthday, much slower."

'Although we're at the end of 35 years of unprecedented progress for children, for the first time in the post World War II era, that

progress is now under challenge.

In response to that challenge, representatives of UNICEF, other U.N. agencies, the World Health Organization, World Bank, World Food Council, among others, have been brainstorming for some months to find a way to continue the progress that has seen "a greater reduction of child mortality, . in the greater improvement of health . last 35 years than in the preceding 500 to 1,000 years."

They think they have found a way even, as Grant puts it, "in these dark times.

Based on a series of medical break-throughs, along with 3½ decades of intense field work and educational programs, UNICEF and its fellow agencies are today unveiling-internationally-a "State of the World's Children" program they optimistically expect to create as great a revolution in worldwide child care as the so-called "green revolution" of the 1960s and '70s did for worldwide agriculture.

The four-pronged program (aimed mainly at developing nations, but also useful in rural and urban areas of the so-called developed) is dependent on a delivery system that has been burgeoning over the past decades: ranging from the training and placement of village health workers-100,000 in India alone—to the proliferation of communication devices as simple as the battery-op-

erated transistor radio.

The program is called GOBI, an acronym for its concerns: growth charts, oral rehydration therapy, breast-feeding and immunization. It is the oral rehydration therapy (ORT) and the immunization that contain the potential for dramatic and immediate medical impact on the most children.

Oral rehydration is a medical term for the restoration of vital fluids lost by infants and young children with diarrhea: the direct cause of about 5 million children's deaths a year, and indirect cause of millions more because of lowered resistance and malnutri-

Within the past decade—borrowing in part from a Southeast Asian folk remedy-medical science has discovered that fluids administered by mouth can be absorbed by the diarrhea-ridden small bodies only when a formulation of salts and sugar accompanies the liquid, restoring both fluid and electrolyte balance. A pre-mixed packet of six parts sugar to one-half part salt, is now available, inexpensive and ready for international distribution. It need only be mixed with water to perform its livesaving function.

Along with the development of the ORT packets come vaccines that no longer require constant refrigeration-until now major deterrent to providing the world's children with immunities to polio, diphtheria, tetanus, whooping cough, measles . .

Those are the contributions of science.

But so simple a thing as a return to breast-feeding—disastrously undermined in the past decade or so by misleading and incomplete information touting the virtues of prepared formulas-can be part of the children's health revolution. An even simpler concept—the individualized growth chart for each baby—can be a tool for modifying the habits of a village mother. It is a lure to bring her into regional clinics where inadevertent malnutrition can be spotted on the

third immunization shots when needed, where the mother can learn about such things as family spacing and proper nutrition. could be, says Grant, "a virtuous

chart, where a baby can receive second and

For reasons only partially understood, as child mortality rates drop, so do birth rates, usually at an even greater rate. Part of this may be attributed to the statistically significant, although only partially effective, contraceptive effect of breast-

In any case, the program is ready to start. You could," says Grant, "cut the death rate of children in low-income countries in half in the next 10 to 15 years for a very low cost-financial or political."

SPEECH AT THE WORLD HEALTH ORGANIZATION CONFERENCE ON PRIMARY CARE ALMA ATA, SOVIET UNION

"Health for all by the year 2000." That is the truly noble goal set for all nations by

the World Health Organization.

I believe that this conference will bring that goal closer to the people of the world. For this is a unique event-nations have been brought together not to discuss high technology, not to discuss bricks and mortar, not to discuss technical ideas-but rather to discuss a basic human right—the right of every man, woman and child to health care. The struggle to achieve that right is one that all nations, developed and developing, are engaged in, and all have a common interest in achieving.

the first special international health conference that W.H.O. has sponsored. Together with the United Nations Childrens Fund they have chosen wisely. For this conference symbolizes in a very important way, a new and common under-standing that primary care is the vehicle to achieve health as a matter of right for every person in the world.

Here in Alma Ata governments of every philosophy are united by the common purpose of realizing that right for all people. This concern and cooperation among na tions is a model of what is best in us and is an example we can be proud to follow in all our interactions with one another.

I particularly want to express my gratitude to Dr. Halfdan Mahler, Director General of the World Health Organization, and Henry R. Labouisse, the Executive Director of the United Nations Childrens Fund, for taking the leadership in organizing this conference. I also want to acknowledge the exceptional work done by Dr. Tejada and Dr. Tarimo of the World Health Organization in putting the details of this conference to-

It is 15 months since I had the honor of addressing the medical society of the World Health Organization in Geneva. At that time I spoke of the shadow cast over all nations by our global inability to deal with the serious challenge of caring for the poor and the sick, the destitute, the downtrodden of the world, the helpless victims whose cries fall on deaf ears. Since that time I have asked myself countless times why it has been so difficult to arouse the people of America to action. Surely they are moved by the magnitude of the problem. No mother can see what is happening to children in many parts of the world without feeling the injustice of it, the inhumanity of it, the outrage of it. 15.6 million children under five years of age will die this year. 15.1 million of these children will be in developing nations. What parent does not understand the horror of that fact?

There are statistics describing the plight of every age group in developing nations. But what is a statistic to some is a face to others. And behind these statistics are the faces of millions of people suffering from symptoms we can alleviate, dying from diseases we can treat, developing diseases we

can prevent entirely.

We would not tolerate wars that take the toll that preventable diseases take each year in developing nations. We would not stand by if nations slaughtered a fraction of the people who are killed each year by treatable diseases. We would call it a moral outrage and at least engage in a vigorous national debate over what to do. Is it not equally immoral to stand by while treatable and preventable diseases continue to take millions of lives, year after year after year.

Why do we tolerate this enormous trage-dy-and allow ¼ of the people on this earth-1 billion men, women and childrento continue to have no access to any health care whatever; and continue to allow millions and millions of these people to die terrible deaths each year from diseases that hold no mystery for modern medicine?

Why have the news media, so ready to report wars and individual tragedies, allowed this crisis to remain a silent one? It seldom intrudes into our living rooms or on our television screens.

I think the answer lies in the very enormity of the problem and the seemingless nature of it. The statistics are too overwhelming to grasp. One can't relate to them unless one can see a glimmer of hope, a way to really make progress, a way to reduce the suffering in measurable terms. I believe what we have been lacking is a vision-a vision that the problem is divisible into actionable parts; a vision that simple approaches, uncomplicated solutions can in fact work and impact on people's lives; a vision that the means exist to win the struggle at some definable point, no matter how far in the future. In short we need a vision that will make our people believe that individual people and individual companies and individual nations can make a difference. If we can dispel the sense of hopelessness; if we can dispel the sense of despair, we can arouse our people, our industries and our nations to action. Without the vision that it can be done there will never be the will to do it.

So the real test is one of leadership—leadership that not only challenges but shows the way to meet the challenge; leadership that not only describes the problem, but shows that it is possible to solve it.

I believe that the World Health Organization has that vision. Conferences like this one can help refine it and serve as a forum to communicate it to the nations of the world. I hope that the message that goes out from this conference is that "it can be done": we can get health for all by the year 2000; we can reach out to the children of the world and offer them better, longer, happier lives. As the Bengali poet Tagore wrote, "Life is given to us, we earn it by helping to give".

Why do I have this confidence?—In part because of what has already been accomplished; in part because the answer lies not in new technology or new research breakthroughs but in the application and delivery of what is already known. This is, in and of itself, a difficult task. But whether we succeed or fail now depends on our ability to organize people in each country to develop their own structure to meet their own needs.

In 1966, 41 countries reported smallpox cases. It was endemic in 32 countries and as many as 4 million people contracted the disease each year. I million of these men, women and children died. Others became blind. Yet today smallpox is virtually eliminated from the face of the earth. A seemingly hopeless problem has been solved. A dreaded disease is eliminated. The control and virtual eradication of smallpox is one of the greatest achievements of the World Health Organization-it had the vision that it could be done; it communicated that vision; and sensing that it was within their grasp, the nations of the world responded with the will to get the job done. Thousands of people participated in the special health networks centered around the world for this purpose.

The techniques used to eradicate smallpox are known: they are simple: they can be applied to other diseases. They include surveillance and vaccination. Look what other diseases we can control with these and other already proven techniques:

There are 72 million cases of measles each year in the world and 1.2 million children will die of the disease this year.

There are 800,000 cases of tetanus each year. 600,000 people, most of them children, will die from it this year.

200,000 children will die of polio, and 1.5 million people suffer from this dread disease.

8 million children will be stricken with whooping cough this year and 300,000 of them will die.

Measles, tetanus, whopping cough, polio we have vaccines for all of them. The smallpox success story can be repeated through immunization programs.

The Center for Disease Control estimates that 2.6 million children die each year from immunizable diseases. It is an enormous human tragedy. But it does not call for despair. It calls for action. Next year is the International Year of the Child. There can

be no more meaningful accomplishment on behalf of the children of the world than to realize the World Health Organization's goal of immunizing all the children of every nation by 1990. It is a goal we can and must achieve. Today, in 42 developing nations, the immunization rate for pollo is 8%, DPT 7% and measles 7%. So there is a long way to go. But we know the way.

There are other, simple technologies that can have enormous impact. Gastroenteritis kills as many as 18 million people each year. Fully half of these deaths could be prevented by improving the water supply. Cholera research has already shown that the use of proper rehydration fluids in treating gastroenteritis can save millions and millions of lives. There is no mystery here. We have an answer. It works. It lends itself to the most elementary primary care structure. It is a matter of developing the structure, getting the packaged fluids to every village. We reached every village in the smallpox drive. We can reach them with the rehydration fluids as well. But the challenge is to build the primary care network.

There are some who say we are overselling the idea of simple solutions for overwhelming problems. I say we haven't given the solutions a chance to work. If communicable diseases, malnutrition and overpopulation are the three major elements contributing to the health crisis in developing nations, then a strategy based on surveillance, immunization, oral rehydration, antibiotic therapy, improved water supplies, child spacing and protein and vitamin supplements make sense. By any modern medical standards these are simple technologies. That is not to say that the task of bringing them to every small village will be easy. It is not. But it does give us a realistic vision that the problem is soluble. It challenges us to have the will to make it happen—to develop primary care structures suited to the needs of each individual country, through which these solutions can be applied.

Is it worth the effort? The Center For Disease Control, extrapolating from data developed in Bangladesh, estimates that half of the deaths of children under five years of age—that is 7.5 million child deaths each year—could be prevented by these very simple techniques. It would be a moral outrage not to make the effort. My brother Robert Kennedy liked to quote these lines written by Albert Camus: "Perhaps we cannot prevent this world from being a world in which children are tortured. But we can reduce the number of tortured children and if you don't help us, who else in the world can help us do this?"

There are 40 million blind people in the world. In some developing nations 4% of the population is blinded by diseases that are largely preventable or easily curable. Simple techniques of administering vitamin A tablets, improving personal hygiene, making antibiotic eye ointments available—can prevent or cure as many as 25 million of these cases each year. Is it worth the effort to restore sight to children, or to prevent them from going blind? We can do it through primary health care networks. It is complicated. It is difficult. But it is doable. Do we have the will?

Sometimes it is hard to sustain the will. Sometimes the problems seem insurmountable. There is an eastern Mediterranean country with 17 million people where there are 23,000 separate villages—some not accessible by roads—; 2.5 million nomads; % of the children dying before age 5; an adult literacy rate of less than 12%; and a per capita

annual income of \$100. To some the goal of delivering primary health care to these people seems hopeless. But that country has just begun a major effort to build a primary care structure on what they have. They are training village health workers, birth attendants, female health workers, nomad health workers. It is a new effort. It is not an effort to import someone else's way of doing business. And that country, and all of us, can take heart from the fact that this type of approach is working elsewhere—that it does make a difference. The people of three tropical countries, which once had overwhelming problems—Sri Lanka, Costa Rica, and Jamaica-now have longer life expectancies than the people of Washington, D.C. Haiti has dramatically reduced the incidence of tetanus. A model primary care center outside of Bombay, India has significantly reduced infant mortality from 67 per 1000 in 1974 to 23 per 1000 in 1977. Neonatal mortality has been reduced from 42 per 1000 in 1974 to 21 per 1000 in 1977. This primary care project has employed the solutions we have already discussed-Rehydration, Immunization, Vitamin A supplementation, Use of local personnel, Health Edu-School Health Programs, Disease surveillance and Family Planning.

There are many individual success stories. They show us what can be done. They show us that to be successful each nation must build on its own strengths. Simple technologies may be transferable from one country to another. But the primary care network for delivering them to the people are not—they must be tailored to the individual country.

What then is the role of developed nations in helping this process? When we met at Geneva I outlined what I thought the United States could do. I'd like to give you a progress report on what has been accomplished since May 1977.

1. We are in the process of increasing our basic research effort into the special health care problems of developing nations. N.I.H. will receive additional research funds in the area of tropical diseases. The Congress is considering legislation to assure a targeted pharmaceutical research effort for diseases of developing nations. The Congress has already completed action on a foreign assistance law which mandates, for the first time, a specific effort in health and disease prevention. The language of the law itself states. "This assistance shall emphasize selfsustaining, community based health programs." In all, the health programs of AID will be authorized to spend \$148.5 million-a sum that remains too small but will at least allow a new beginning under the mandate of this new law.

2. The same new foreign assistance law implements the second suggestion I made in Geneva—that more extensive research efforts be based in developing nations themselves. Support for such research is specifically mandated in the new law.

3. I called for new efforts to develop training programs for health personnel and scientists from developing nations. Next year the Congress will rewrite the health manpower laws. I will propose legislation to help developing nations train health personnel in their own countries. In addition, where necessary, the legislation would make it possible for the training to take place in the United States. I will meet with the deans of the American medical schools to enlist their aid in developing this program.

4. I suggested that a new effort be made to involve the private sector both in solving

the health problems of developing nations and in adapting available knowledge and technology to the special circumstances in them. I would like to expand on this point. The developing nations represent an enormous potential market for the private sector. The interests of the corporations and the health concerns of the local government often coincide. If plants are to be built then the health of the workers is of vital importance to the corporation. There are many examples of significant corporate contributions to the health of the people in developing nations:

In Ghana, Kaiser Aluminum has developed a primary health care program for the area surrounding its operations.

In the Dominican Republic, Alcoa has, in cooperation with the government, developed an integrated primary care program.

In Indonesia, the Weyerhauser Company

In Indonesia, the Weyerhauser Company established a 50 bed hospital and has worked with the local community to control malaria, conduct immunization campaigns and deliver other preventive services.

The Xerox Corporation and the Children's Television Workshop have developed mass media preventive health messages for presentation throughout Latin America.

There is a long list of private industry cooperation with local community efforts to establish primary health care. I would urge all developing nations to involve the private sector—to require their involvement as a price for removing precious resources or developing the expanding markets that they seek.

As I promised to do in Geneva I met with leaders of the United States pharmaceutical industry to see if more resources could be devoted to developing drugs for the special problems in developing nations. As a result a major conference will be held this winter on this problem under the auspices of the Institute of Medicine of the National Academy of Sciences.

5. The Peace Corps has expanded its health component, as I requested. In 1977 only 10% of the volunteer years were spent on health and nutrition. Now that commitment is being increased to 33%.

6. Finally, I am delighted to report that my suggestion of creating an international health service corps has been adopted by President Carter and plans are well in progress to implement the concept. Professional and non-professional volunteers will make up the corps. I am told there is already a significant interest in serving the corps being expressed by young people across the country.

across the country.

I hope that other nations will consider developing parallel efforts. Ideally the International Health Service Corps should transcend national boundaries. It should be composed of people with different skills—physicians, nurses, engineers, community workers. It should tie the young people of different nations together by their common commitment to the people they are serving.

commitment to the people they are serving. Much has happened in the world since May 1977. In many respects there has been more confrontation than cooperation. The one persistent ray of hope has been the continuation of the joint effort to relieve the plight of the 2 billion people who languish in poverty, hunger, and disease.

I said in 1977 that a world that spends 300 billion dollars a year for arms can spend a little more for health. The arms race is a measure of man's inhumanity. The effort to alleviate human suffering is a measure of our humanity.

It is no longer unthinkable to give every child in every nation a fair start in life; it is

no longer unthinkable to promise longer, happier lives to people in developing nations: it is no longer unthinkable to realize every human being's right to health care. We have the vision. We know that the unbelievable human suffering will not be easily or immediately relieved. But we know it can be relieved. We know how to do it. I believe we all join in the prayer written by Stephen Vincent Benet:

"Grant us a common faith that man shall know bread and peace—that he shall know justice and righteousness—not only in our own land, but throughout the world. And in that faith, let us march toward the clean world our hands can make."

#### TRICENTENNIAL ANNIVERSARY YEAR OF GERMAN SETTLEMENT IN AMERICA

• Mr. HEINZ. Mr. President, on October 1, 1982, the Senate passed Senate Joint Resolution 260, a joint resolution to designate the period commencing October 7, 1982, and ending October 6, 1983, as the "Tricentennial Anniversary Year of German Settlement in America." This resolution was then referred to the House Committee on Post Office and Civil Service.

The House of Representatives has passed Senate Joint Resolution 260 with an additional proposal. By the request of the administration, a Presidential Commission for the German-American Tricentennial is to be established. The purpose of the Commission is to plan, encourage, and coordinate the commemoration of the German-American Tricentennial.

The President may appoint members of the public and private sector to serve on the Commission and shall designate a member from the private sector as Chairman. Other members of the Commission shall be appointed by the recommendations of the President of the Senate, Speaker of the House, and the Chief Justice. Members of the Commission shall receive no compensation for their services. However, they may be allowed necessary travel expenses, as authorized by law, to carry out Commission activities.

The Commission is authorized to receive donations of money, property, and personal services from public and private organizations and individuals to assist the Commission in carrying out its responsibilities. All expenditures of the Commission shall be made from donated funds only.

Furthermore, the Director of the U.S. Information Agency (USIA) is authorized to provide administrative services and staff support to the Commission. Reimbursement shall be made from funds of the Commission under the Economy Act (31 U.S.C. 686) in such amounts as may be agreed upon by the Chairman of the Commission and the Director of the USIA. The heads of other executive agencies and departments are also authorized and requested to cooperate with and assist the Commission in fulfilling its responsibilities.

By acting as a clearinghouse for information, a coordinator of activities and as a source of support, the Presidental Commission will make these observances broadly visible. This Commission will insure a successful celebration of the Tricentennial Year.

Our alliance with the Federal Republic of Germany is an important, indeed, an essential one. At a time when many are focusing on the differences between friends, it is important to remind people that our two countries are united in our joint faith in the democratic process and in our mutual commitment to the defense of our freedoms and common values.

President Reagan has extended an invitation to President Karl Carstens of the Federal Republic of Germany to visit our country during the Tricentennial Year. President Carstens has accepted that invitation. Both Presidents of these two great democracies will be taking part in local celebrations planned throughout the United States to honor the important contributions of German Americans to the progress of America.

This resolution will demonstrate our appreciation of the contributions of German Americans to our society, as well as underscore the historic friendship which has existed between our two nations. I believe that this resolution will be an important symbol of the underlying and enduring goodwill between the United States and Federal Republic.

# THE U.S., TRADE, AND THE INTERNATIONAL ECONOMY

• Mr. PELL. Mr. President, less than 1 month ago a highly infrequent meeting of more than 90 of the world's trade ministers convened in Geneva, under the auspices of the General Agreement on Tariffs and Trade (GATT) only the third such meeting in the last 20 years. They met, at the behest of the United States, in order to confer on the ever-growing list of acrimonious trade disputes among the world's trading partners which seriously threatens the stability of the international trading system. They also hoped to agree upon a work program for the 1980's in order to further progress on the expansion of international trade. That meeting concluded on November 29, however the verdict is still out as to whether it was a success or failure. I, for one, hope that at the very least this meeting served to highlight the critical threat to the international economy that mounting protectionism once again poses.

As you know, GATT was constructed out of the ashes of World War II and the fresh memories of destructive "beggar-thy-neighbor" trade policies of the 1930's which had exacerbated and prolonged the devastation of the

Great Depression. For the last 35 years GATT has stood as the central institutional pillar of the postwar international trading system, providing a framework of liberalized and nondiscriminatory trade rules within which, at least until recently, nations participating in the international economy have prospered. In fact, it was the mutual agreement to adhere to these "free trade rules" by all principle trading nations which acted as an important catalyst if not the sole engine for the burst in world trade which resulted in the ensuing years.

The United States has naturally been an important beneficiary of this burgeoning economic activity worldwide, both in terms of expanding job opportunites for Americans, increases in personal incomes, and general wellbeing. But we have not been the sole beneficiary of this 35-fold increase in world trade over the past 30 years, for as President Kennedy noted two decades ago, "a rising tide lifts all the boats." Unfortunately, that tide has ebbed recently and left most "boats" marooned on the shoals of worldwide economic recession and mounting pro-

tectionist pressures. We sometimes forget in the United States that trade plays an integral part in the health and vitality in our economy. Although exports as a percentage of gross national product (GNT) are small relative to many of our allies-slightly less than 8 percent of our GNP-for selected industries and regions jobs related to the production and sale of exports have become the life's blood of many communities. In my State of Rhode Island, for example, some 7.5 percent of total civilian employment comes from jobs related to manufactured exports-this is the highest ratio of any State in the Union. With over 12 million Americans currently unemployed, and some 30 million unemployed in the 24 industrialized countries which make up the Organization for Economic Cooperation and Development (OECD) it has become very difficult for so called internationalists to continue to advocate

an open trading system. The U.S. trade deficit for 1982 is expected to reach \$44 billion, more than 11/2 times greater than our 1981 deficit. European steel and Japanese auto imports appear to be displacing American workers in those industries at the same time that these countries cling to their own protectionist policies thereby inhibiting the sale of U.S. agricultural and manufactured exports. The principles of free trade, which served us so well for over three decades have now been seriously eroded with almost 50 percent of world trade currently transacted outside of the GATT framework, usually through bilateral arrangements which limit exports. Such events seriously test the political will of U.S. policymakers to continue

to be advocates of and adherents to principles of free and nondiscriminatory trade rules.

What is the root of these problems? Some charge that the Government of Japan has acted to explicitly hold down the value of its currency-the ven-in order to maintain a competitive edge for its exports on world markets, while at the same time making U.S. exports prohibitively expensive for its own citizens. It is true that the Japanese economy is not as completely open to the free flow of foreign currencies as the U.S. economy. This is an important determinant of the yen's value on world markets. However, the fact is that Japanese monetary officials have taken a number of steps to liberalize their so called capital markets as is evidenced by an outpouring of yen from Japan of over \$20 billion during the first 10 months of 1982. Nor does it explain why the dollar has risen in value over the past year against almost every major currency.

I believe that we should look a little closer to home to find the roots of our current problems. Much of the economic distress we currently feel is rooted in what I view are the misguided monetary policies which this administration has pursued. A severely constrained money supply, purportedly in order to stem the rise in domestic inflation, has created prohibitively high real rates of interest. This policy has inflicted a deadly blow to our housing industry, the hope of the average American family to own their own home, and the willingness of U.S. companies to make badly needed investments if the economy is to return to health. I fear that our monetary authorities are like surgeons who rave about the success of the operation, failing to mention that the patient has nevertheless died.

In addition, we should not be surprised that foreign investors have sought to purchase U.S. dollars and place those dollars in U.S. money markets since they can receive almost double the interest rates offered on similar deposits in their own countries. This flight to dollars increases the demand for dollars, and like any other commodity, its price goes up. Thus, our own monetary policy is also a primary cause for our overvalued dollar internationally, which has taken otherwise superior U.S. exports "out of the running" in price competitive terms.

This wide interest rate differential between the United States and our other trading partners has required European and Japanese monetary authorities to pursue restrictive monetary policies to keep that differential from widening further and to prevent the flow of their currencies into dollars from becoming a flood. Therefore, they are unable to pursue expansionary monetary policies which they

might otherwise do—policies which would foster increased growth domestically and encourage demand for U.S. exports. This further erodes the purchasing power of foreign consumers who might otherwise still prefer to purchase American goods, even at somewhat higher prices.

I do not naively believe that all of the problems of the world will be solved if U.S. authorities reverse the course of our monetary policy, but I do believe it will set the stage for handling a number of our trade disputes that now seem to be so unmanageable. Our efforts to convince our allies to do away with many of that restrictive trade practices are more likely to succeed in such an atmosphere. So too will it be possible to take temporary steps to assist our domestic industries in distress from imports in accordance with the GATT which provides universally understood and agreed to rules for diverging from nondiscriminatory and open trading practices.

Only in an atmosphere of optimism and economic growth can we begin to repair the damage done to the free trade principles which have served us so well. I believe that with the adaptation of those free trade rules to the realities of the current world economy, trade can once again serve as a catalyst for economic prosperity. As Ralph Waldo Emerson observed in 1844, "the philosopher and lover of man have much harm to say about trade, but historians will see that trade was the principle of liberty, that trade planted America and destroyed feudalism, (and) that it makes peace and keeps peace."

#### REVENUE SHARING

• Mr. PRYOR. Mr. President, I am very pleased to announce my support and cosponsorship of legislation that will be introduced early next year by Senators Durenburger, Sasser, and others to reauthorize the general revenue sharing program.

General revenue sharing was created by the State and Local Fiscal Assistance Act of 1972—Public Law 92-512—and was subsequently extended for 4 years in 1976 by the State and Local Fiscal Assistance Amendments, Public Law 94-488. Once again, in 1980, with the enactment of the State and Local Fiscal Assistance Act Amendments of 1980—Public Law 96-604—the general revenue sharing program was reauthorized for 3 more years. However, authorization of this program will expire on September 30, 1983, unless it is reauthorized.

I believe the general revenue sharing program has been a tremendously important program, providing State and local governments with valuable general purpose fiscal assistance. In fact, passage of revenue sharing marked a fundamental change in intergovernmental relations.

Continuation of the general revenue sharing program is extremely important both in terms of fiscal impact and budgetary planning stability to State and local governments. As the program has withstood the test of time and been reauthorized, many local governments have increased their use of the programs. In fact, according to a recent National League of Cities survey, over 40 percent of all small cities now receive no other Federal aid, and 80 percent of cities surveyed said they would be forced to cut services next year if the program were reduced or eliminated. In addition, 50 percent of such small cities said they felt they would be forced to raise taxes if revenue sharing is not continued.

The success of the revenue sharing program in the State of Arkansas is widely acclaimed. The total amount of general revenue sharing program funds received by all municipalities in the State of Arkansas was \$43,441,575 in fiscal year 1981, \$48,184,041 in fiscal year 1982, and will be approximately \$46,413,653 in fiscal year 1983 if the program is reauthorized. I just recently received a very persuasive letter from Mr. John Frazer, the mayor of Warren, Ark., in support of reauthorization of revenue sharing. I ask unanimous consent that a copy of this letter be printed in the RECORD following my remarks.

Mr. President, I have been a consistent supporter of the revenue sharing program and I strongly support continuation of the program. The legislation, which I have agreed to cosponsor, will be introduced on the first day of the 98th Congress to reauthorize the general revenue sharing program. It will be a simple reauthorization for 3 years at the current level of funding of \$4.6 billion and will employ the same allocation formulas as the present program. I urge my colleagues to join me in calling for early hearings in the 98th Congress on this issue and in supporting the continuation of this vital program.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

> THE CITY OF WARREN. Warren, Ark., December 10, 1982.

Hon. DAVID PRYOR, U.S. Senate, Russell Building, Washington, D.C.

Dear Senator: As the end of 1982 draws near, the attention of local governments turn to 1983 and annual budgets. The City of Warren is no exception. Realizing the many difficult problems to be faced by the Congress in 1983, it is the desire of the City of Warren to go on record early in favor of the continuation of the General Revenue Sharing Program.

You need not be informed that Revenue Sharing, as currently authorized, will expire at the conclusion of this federal fiscal year and with the tough decisions required to

solve our economic problems, many will spot an easy target in Revenue Sharing to eliminate.

To demonstrate the essence of the Revenue Sharing question as it affects the City of Warren and I know most other municipalities, Revenue Sharing covers a full 15% of Warren's operating budget. In past years, the City of Warren utilized RS to make capital expenditures. Now RS is essential to maintain basic City services like police and fire protection. Rising costs have created this situation.

I realize that all levels of government must be more efficient and stick to basics. Most communities are doing just that. We're not broke but remove RS and a drastic financial condition will exist. Frills to be maintained are not the question, protection of life and property is.

Please support the continuation of General Revenue Sharing to local governments for the benefit of all our citizens. If you have questions concerning RS and the City of Warren, feel free to contact me.

Sincerely.

JOHN B. FRAZER, Mayor.

#### REVENUE SHARING

Mr. SASSER. Mr. President, reauthorization of the general revenue sharing program should, in my view, be the first order of priority for the 98th Congress. Otherwise, this valuable fiscal assistance to local governments will expire next September.

Programs run by local governments have already taken a disproportionate share of the budget reductions made in the 97th Congress. That is why general revenue sharing, with its flexible character, is so important to retain as a supplement to Federal assistance programs which cities and counties must now run with reduced funding.

Since the inception of the general revenue sharing program in 1972, Tennessee local governments have received more than \$700 million in local general revenue sharing funds. Local officials have used these funds to provide for a wide variety of essential public services including police and fire protection, highway maintenance and education.

Mayor William N. Morris, Jr., of Shelby County wrote me the following letter concerning the important role that revenue sharing funds play in the budget of the government he administers. Mayor Morris' letter will be printed at this point in the RECORD.

> SHELBY COUNTY GOVERNMENT, October 27, 1982.

Senator James Sasser. Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR SASSER: Shelby County urges you to support reenactment of General Revenue Sharing at least at current funding levels in the fiscal year 1984 budget.

As you know, the General Revenue Sharing program has been the least costly to administer and the most effective in solving local problems than any other intergovernmental partnership program of the national government.

Shelby County believes the track record of General Revenue Sharing deserves reenactment commitments from national officals prior to the elections on November 2, 1982. In addition, we believe this commitment should include a continuation of General Revenue Sharing as a part of a potential New Federalism program or as a free standing program should a New Federalism program not be enacted.

Your continuing support for the General Revenues Sharing program, as the best example of what a real intergovernmental arrangement should be, is deeply appreciated.

Best wishes for the future.

Sincerely,
WILLIAM N. MORRIS, Jr.,
Shellm Cou Mayor of Shelby County.

Mayor Richard Fulton of Nashville, Tenn., also wrote me regarding the renewal of general revenue sharing. Mayor Fulton speaks on behalf of city governments across the Nation since he is the president-elect of the U.S. Conference of Mayors. Excerpts from Richard Fulton's letter is printed in the RECORD at this point.

METROPOLITAN GOVERNMENT OF NASHVILLE AND DAVIDSON COUNTY. August 24, 1982.

Hon. JAMES R. SASSER, Russell Senate Office Building, Washington, D.C.

DEAR JIM: One of the most important issues facing the Congress next year will be the renewal of the General Revenue Shar-Program. General Revenue Sharing (GRS) is the only federal program that helps all communities, large and small, under a distribution formula that is widely regarded as fair to all. It is the most important form of federal assistance to cities for it provides assured funding which enables local officials to plan ahead; there is a minimum of red tape and burdensome regulations; and, most important, it permits discretion to use the funds to meet high-priority local needs.

This year the Metropolitan Government will receive \$9.4 million in GRS funds. While only comprising 2.5 percent of the total operating budget, the use of these funds has ranged from supporting countywide fire protection to supplementing police and emergency ambulance personnel salaries to providing direct relief to the indigent and handicapped.

Although important to all cities, GRS is particularly important to small cities, generally those of less than 25,000 population. According to a National League of Cities' survey, GRS payments comprise about 14 percent of small cities' budgets. Moreover, for many of these cities, GRS is their only source of federal assistance.

I appreciate your time and attention to this matter, and look forward to working with you in the future.

Sincerely,

RICHARD H. FULTON, Mayor of Nashville.

Finally, the National League of Cities recently asked member cities to respond to a questionnaire on the im portance of revenue sharing to them The article from the Nation's Cities Weekly of November 22, 1982, highlighting the responses NLC received from this survey will be printed fol-lowing my remarks in the RECORD. The title of the article is "Cities response to NLC Survey Shows Dramatic Need

for Revenue Sharing."

In sum, general revenue sharing is vital to cities and towns across the Nation. Despite the reliance that so many local governments place on these funds to supplement their operating budgets, the program remains vulnerable due to lack of full-scale administration support. Senator Durenberger is to be commended for preparing this legislation, which I am pleased to cosponsor, to reauthorize funding of the revenue sharing program for another 3 years at its present funding level of \$4.6 billion annually.

This is a program with a 10-year track record which proves its usefulness. The price tag is not high considering that, due to general revenue sharing's low overhead costs, nearly every dollar actually goes into local

services.

Senator Durenberger is today announcing that a large bipartisan group of Senators join him as original cosponsors of this bill to renew general revenue sharing. We will be introducing this bill on January 3, 1983, the first day of the 98th Congress. We know that this will send a strong message to President Reagan that we will oppose any effort to abolish or dismantle this most effective Federal aid program.

[From the Nation's Cities Weekly, Nov. 22, 1982]

CITIES' RESPONSE TO NLC SURVEY SHOWS DRAMATIC NEED FOR REVENUE SHARING (By Francis Viscount)

A vivid picture of the essential need for the continuation of general revenue sharing is emerging from NLC's survey of its direct member cities on the importance of general revenue sharing to their fiscal condition.

An analysis of data collected from 494 cities, provided the following picture of the impact on cities of the \$4.6 billion-a-year

federal aid program:

GRS receipts provide an average of 6.26 percent of the total of locally raised revenues, but as much as 10 percent or more in

some small cities.

To replace a loss of GRS funds, property taxes would have to increase about 25 percent in most cities, but as much as 45 percent in cities under 10,000 population. In the largest cities, over 100,000 population, property taxes would have to go up about 15 percent.

If cities were faced with a loss of revenue sharing funds, few would try to make it up by increasing taxes. The most likely repercussions would be a combination of cuts in capital and operating budgets along with some effort to raise a portion of the lost revenue, but a substantial percentage of larger cities would respond strictly through budget cuts.

Layoffs, ranging from several to several hundred, appeared likely in city work forces if revenue sharing funds were lost.

"This kind of information paints a vivid image of the crucial importance of general revenue sharing for cities," said Alan Beals, NLC executive director.

"While we feel there is a strong reservoir of support in Congress to continue this program, the dismal consequences of losing revenue sharing are useful in driving home the fact that its future cannot be dealt with

lightly," Beals said.

Cities are already experiencing extraordinary fiscal stress due to the compounding factors of a prolonged recession, substantial reductions in federal aid to local governments and the variety of tax and expenditure limitations imposed by both the voters and state legislators.

This combination of factors has caused local government to begin making real reductions in spending, after taking into account inflation, and absolute reductions in

the number of employees.

For the first time in over three decades local government, and state government, are behaving pro-cyclically and contributing to the length and severity of the recession. The spector of the loss of general revenue

sharing magnify all these trends.

Local governments have had the variety of responses to fiscal distress greatly reduced in the recent past. Because of the recession local revenues are down. Because of the cutbacks in state and federal governments, grants from them have been reduced. Because of the continuing deterioration of infrastructure, capital budgets can no longer be reduced.

Therefore, the continued fiscal stress of

Therefore, the continued fiscal stress of cities, and the possible loss of revenue sharing, will force even more severe cuts in the public services which cities provide.

NLC has sent surveys to its more than 1,000 direct member cities and currently has received back approximately one-half. In the initial analysis of the returns, these cities reporting were broken down into population groups. These groups were under 10,000, 10,000 to 50,000, 50,000 to 250,000, 250,000 to 500,000 and over 500,000.

Three major questions were put to the cities. How important is general revenue sharing to you; what do you use general revenue sharing for; and what will you do if

general revenue sharing were ended?

To determine how important general revenue sharing was to cities three different questions were asked, what share of locally raised revenues is general revenue sharing, how much would your property tax have to be increased to compensate for the loss of general revenue sharing; and is general revenue sharing; and is general revenue sharing your only federal grant.

General revenue sharing represents approximately 6.26% of locally raised revenues, exclusive of other federal grants and intergovernmental aid from the states. For the majority of cities, it represented between 1 and 10 percent of the locally raised revenue.

Significantly, however, for smaller cities, general revenue sharing for many of them represented over 10 percent of their locally raised revenue. For the smallest cities, one quarter of them had general revenue sharing equal over 10 percent of their locally raised revenue.

Often it has been asserted that cities would be able to tap property tax to make up for the loss of general revenue sharing. However, the answers to our survey indicate clearly that property tax rates could not be raised at any where near the amounts necessary to compensate.

For the small cities the average rate increase would be 45 percent.

General revenue sharing is particularly

important for smaller cities.

For cities under 10,000, 63 percent indicated it was the only grant they received. For cities under 50,000, 41 percent indicated it was the only grant received.

The significance of general revenue sharing dropped off rapidly as the populations increased to 250,000, and only 6 percent of the cities reporting indicated that it was their only federal grant. For cities over 250,000 none reported GRS as their only grant.

As city size increased, fewer cities used revenue sharing for capital projects only. Also, as city size increased, more cities

Also, as city size increased, more cities used general revenue sharing exclusively for operating programs.

Other than for the very largest cities, approximately 40 percent of cities reporting indicated that they split general revenue sharing between operating and capital activities. This is a clear indication of the value of the flexibility built into general revenue sharing.

The major capital uses for general revenue sharing show, although there were some unique applications, economic development, street repairs, mass transit, most of the spending was for basic public infrastructure. Under this category would come land acquisitions, public building construction and renovation and the purchase of major equipment.

Under the major operations funded with general revenue sharing, the flexibility of use is more evident. A number of cities funded dial-a-ride and alternative local tran-

sit programs.

Many cities supplemented their public health and emergency medical services with general revenue sharing. Recreation programs, surprisingly, were mentioned by a fair number of cities but were not the dominant factor that some critics of the program have suspected.

Senior citizen programs and various social services programs, including funding public service agencies, were an important use of

revenue sharing funds.

However, the fiscal stress that dominate local public finance has forced the cities to allocate the funds to the core municipal functions of public safety, administration, planning, sanitation, and transportation.

The consequences of terminating GRS are

unpleasant.

In many ways they should not shock the reader of the survey report, because these are consequences cities face because of the severity of fiscal stress they are experiencing.

Under the range of broad options which are available to cities, increasing revenues as a sole option was indicated by only 11 percent of the cities reporting.

Most of the smaller cities indicated increasing taxes, while in some of the large cities they would increase fees.

By far the most significant response would be to cut capital and operating expenditures.

Twenty-eight percent of the cities indicated they would reduce capital to compensate for the loss of GRS and 13 percent would compensate solely with reducing operating expenditures.

Forty-three percent of the cities reporting indicated they would do a combination of increasing revenue and cutting spending. However, a few cities indicated they would try to use reserves and increase debt, however, these cannot be permanent solutions to the reductions in GRS.

When pressed further, 28 percent of cities reporting indicated they would have to lay off employees, with almost half of the cities between 250,000 and 500,000 indicating that would have to be the course they would have to take.

The average number of layoffs indicated grows rapidly with city size, and reflects the fact that larger cities receive substantially larger dollar amounts of general revenue sharing.

The results of the survey indicates the importance of revenue sharing and very difficult actions cities would have to take to compensate for the loss of these funds.

Revenue sharing has become in many ways the glue that holds the precarious fiscal situation in many cities together.

Existing resistance to higher taxes would insure that important services would have to be reduced, capital spending for infrastructure postponed and municipal employees laid off.

These initial findings further dramatize how GRS is important to all cities and the need for NLC and its direct member cities to redouble their efforts to insure enactment of the program.

THE 175TH ANNIVERSARY OF THE BIRTH OF JOHN GREEN-LEAF WHITTIER

KENNEDY. Mr. President, today is the 175th anniversary of the birth of a giant of American letters and a famous son of Haverhill, Mass., the poet John Greenleaf Whittier.
When Whittier was 18, his older

sister sent one of his early poems to the Newburyport Free Press where it was printed. Soon thereafter, his poetry was published weekly in the Haverhill Gazette, and Whittier became widely known, first throughout New England, and then throughout the Nation.

Whittier is famed today as a perceptive chronicler of New England farm life and an eloquent poet of our new and growing Nation in the 19 century. His works are filled with brilliant images of the changing seasons of New England. As much as any poet in our history, he captured the essence of a region and a way of life. In the century and three-quarters since his birth, millions of American school-children have memorized his verses and learned about their country.

Whittier was also active on the public causes of the day. He helped to found the abolitionist movement in the 1830's, and was one of the great public crusaders of the century for equality and an end to slavery. He once said that the happiest moment of his life was the day President Lincoln issued the Emancipation Proclamation.

John Greenleaf Whittier is not only one of America's greatest poets, but a man who shared the action and the passion of his time. He is an important part of our priceless national heritage, and I am proud to bring the attention of the Senate to this anniversary of his birth.

ARNOLD THE AND MARIE SCHWARTZ COLLEGE OF PHAR-MACY AND HEALTH SCIENCES

• Mr. D'AMATO. Mr. President, on Friday, November 19, Food and Drug Commissioner Arthur Hull Hayes, Jr., delivered an address at the Third Annual Arnold Schwartz Memorial Program. This program marked the beginning of Long Island University's

centennial celebration which will culminate in 1986.

Dr. Hayes' remarks were very pertinent to the issues which face this Congress and this Nation: tamper-resistant packaging, orphan drug developments, and FDA procedures for insuring safe and effective products for the American consumer.

The Arnold and Marie Schwartz College of Pharmacy and Health Sciences is to be commended for sponsoring this most impressive program and I ask that the text of Dr. Hayes' remarks be printed in the Congression-

AL RECORD.

The remarks follow:

REMARKS BY ARTHUR HULL HAYES, JR., M.D., COMMISSIONER OF FOOD AND DRUGS

Mrs. Schwartz, Dr. Yalow, Dr. Axelrod, Dr. Blumberg, and distinguished guests, good afternoon. It is a real pleasure for me to join you today in this program celebrating the memory of Arnold Schwartz. All too often as Commissioner of Food and Drugs, I am called upon to speak during a crisis or to a mixed audience, whose members do not always greet my remarks with joyous unanimity. Today's occasion, however, is mark-edly different. I believe that we can all agree on the great achievements that Mr. Schwartz has made possible. And so this is a special occasion for me, to be with you as we honor a man of vision and dedication.

Mr. Schwartz was a rare man; he was both generous and wise. His seemingly boundless generosity is obvious in his sponsorship of such schools as the Arnold and Marie Schwartz College of Pharmacy and Health Sciences which we are visiting today. The numerous drug research programs and drug information projects which he endowed are many. His unsurpassed willingness to give explains, in part, why we are gathered here

in his honor.

Wisdom is the second virtue I attribute to Mr. Schwartz. Surely this was the guiding force in directing his attention to the fields of health sciences and health sciences education. Because of his farsighted vision and concentrated donations much excellent work has been done, and it will doubtless continue in his memory. He would be proud of what has been accomplished in the last three years, but he would challenge us to do even more. It is appropriate, therefore, for us to meet together in his honor, to talk about common challenges, and to explore how we can work together to improve the public health.

The presence of the three preceding speakers, and the distinguished scientists in the audience, reminds me of a White House dinner several years ago to honor Nobel Prize winners. After an elegant meal, the President reflected upon the guests and commented, "I think this is the most extraordinary collection of talent, of human knowledge, that has ever been gathered at the White House-with the possible excepwhen Thomas Jefferson dined tion of

Obviously, the world of scientific knowledge is far more complex than in Jefferson's time or even when the President compli-

<sup>&</sup>lt;sup>1</sup> Dr. Rosalyn S. Yalow, 1977 Nobel Laureate in Physiology or Medicine; Dr. Baruch S. Blumberg, 1976 Nobel Laureate in Physiology or Medicine; Dr. Julius Axelrod, 1970 Nobel Laureate in Physiology or Medicine.

mented his audience. But the mere presence of Drs. Axelrod, Blumberg, and Yalow attests at one to the vitality and complexity of our scientific endeavor, and I am honored to share the podium with them today.

The theme of this year's program, "Medication: Its Key Role in Today's Health Care," is most appropriate. The discoveries of Nobel Laureates and the great generosity of people such as Arnold Schwartz can achieve their full flowering only when they result in better products and improved health care. In these brief remarks today, I would like to survey FDA's role in this process—what we do to bring promising products to market promptly and to assure their safety and efficacy. In doing so, I want to focus on three specific areas—the packaging of over-the-counter medications, the new drug approval process, and orphan products.

There is no denying the importance of medication. During 1981, Americans spent well over ten billion dollars on prescription drugs in the Nation's pharmacies alone. This figure does not include prescriptions filled in hospitals. And the most recent retail figures for over-the-counter medications show that we buy six billion dollars worth of over-the-counter packaged medications annually—exclusive of vitamin products.

Moreover, consumers are continuously exposed to advertisements on television, radio, and in magazines heralding the miraculous benefits of Products A through Z, and the various brands of similar products. Numerous books now advise people how to monitor their health and, in some cases, prescribe medications for themselves. It comes as no surprise, then, to any of us, that we have become a culture that relies upon drugs and expects a health care system that responds to any problem.

The recent incidents of tampering, in Chicago and elsewhere, with over the counter products only reinforce the concept that medications do play a key role in our lives. The American people expected—and they received—a prompt response to the tragedy.

Over 1200 FDA personnel were mobilized from all levels of the Agency to deal with the ever-changing situation. With the help of state officials, we analyzed over 1.7 million Tylenol capsules and investigated over 280 reports of Tylenol related illnesses or death. Twenty-four hour emergency coverage was provided by FDA staff. I created a formal emergency Task Force which met at least twice daily to review, discuss, and direct the activities of headquarters and field personnel.

After deliberations with Secretary Schweiker, I conferred with The Proprietary Association and suggested the organization of an industry task force to address the problem of package integrity and product security. The Joint Committee on Product Security was formed. A special expert technical committee was appointed to develop standards for tamper-resistant packaging, and various technologies and packaging types were identified.

The need for the development of a Federal standard was recognized immediately, and FDA began the task of drafting just such a rule. We were concerned about the development of conflicting state and local laws or proposals to require tamper-resistant packaging. So we quickly prepared a final rule and published it in the Federal Register on November 5. This final regulation requires tamper-resistant packaging for all OTC drugs except dermatologics, dentifrices, and insulin. Cosmetic products subject to the

rule are liquids used orally, such as mouthwashes, gargles, breath fresheners, and a few other cosmetic products. Ophthalmic device adjuncts, such as contact lens solutions and lubricants are covered by a separate regulation published the same day.

Consumers will be alerted to the specific tamper-resistant feature by a statement on the product container. The tamper-resistant packaging regulation will apply uniformly to all manufacturers of OTC drug products in all geographic areas. It will provide the public health protection the American people need and deserve. At the same time, the national drug distribution system will not be unduly burdened, and health costs will not be raised unnecessarily.

It will take time for these initiatives of government and industry to have their most visible effect. It will take time for industry to get the equipment in place to begin new packaging procedures. And, I must emphasize, these measures will not—they cannot—guarantee the safety of all products. We must recognize that a tamperproof package is not possible.

For these reasons activities by health professionals, industry, FDA, and various civic groups are underway to inform and educate consumers on observing the condition of the products we buy. FDA is building on its existing programs to disseminate information and to impress upon consumers that they have a personal responsibility to be more aware of what they buy and consume. On October 27, I filmed a public service announcement providing advice to consumers for recognizing the signs of tampering, and reminding consumers that no container is tamperproof.

I believe the tragic events of last month have made us all wiser. And the events provide a unique occasion to learn. We must be careful, though, to draw the correct conclusions from what happened. Mark Twain once observed that "We should be careful to get out of an experience only the wisdom that is in it—and stop there, lest we be like the cat that sits down on a hot stove lid. She will never again sit on a hot stove lid—and that is well, but neither will she ever sit down on a cold one."

Our response to the tampering incidents was prompt, yet prudent and reasonable. We have found a way to increase public awareness about the dangers of tampering, and we have done so without undermining public confidence in the Nation's supply of medications. I think Mr. Twain would be satisfied

One cannot consider the role of medications in health care without considering the process through which every drug must go to reach the marketplace. I am referring, of course, to the drug review process; one of FDA's most fundamental responsibilities is to review and evaluate new drug applications. I said in an interview last year that during the 1980's FDA must be sure it has implemented a new drug approval system that permits flexibility in research and fosters innovation. I am happy to report today that we have taken the first major step in making this goal a reality.

making this goal a reality.

On October 19 FDA published, in the Federal Register, its proposed revisions to the new drug regulations. The proposal represents the most significant reform of the new drug approval process since the 1960's. It also represents the culmination of efforts begun in 1979, when FDA's Bureau of Drugs initiated an internal review of the IND-NDA regulations.

This is the project that has become known as the "IND-NDA Rewrite." The improve-

ments announced in our proposal will streamline the drug review process without diminishing the safety and efficacy requirements that drugs must meet before they are approved in the United States.

Please note that I said "Drug Review" and not "Drug Approval" process. I assure you that protection for consumers will not be compromised. Consumers will in fact benefit from an explicit new procedure for periodically updating safety information in new drug applications under review. New requirements for more complete reporting of adverse effects of marketed drugs will also have a beneficial effect.

Let me take a couple of minutes to review, from my perspective, the most important reforms we have proposed:

First, a streamlined format for applications which will facilitate their review. This format would require a summary of the entire application and separate detailed sections to permit concurrent review by each of FDA's reviewing disciplines—clinical, pharmacological, chemical, statistical, and biopharmaceutical.

Secondly, an explicit procedure whereby sponsors would update their new drug applications periodically with safety information learned from on-going investigational use of the drug.

Thirdly, elimination of the submission of copies of routine case report forms on each patient on whom the drug was tested. These records now often total many thousands of pages. In their place, sponsors will submit tabulations of the pertinent data contained in the report forms, a process we believe will facilitate review. The original patient records would, of course, remain available to FDA if a question arose. Case reports of patients who die or drop out of studies becasue of adverse drug effects would, however, still be submitted on a routine basis.

Fourthly, a special appeals process would be instituted to provide sponsors with an opportunity to resolve quickly disputes with FDA without prejudicing their applications. The entire appeal would be handled in less than 60 days.

Next, we propose modifications of FDA's policy on acceptance of foreign data. Under this provision, approval of a new drug may be based solely on foreign clinical studies that are scientifically valid, well-conducted, and meet U.S. testing criteria applicable to the U.S. population.

Finally, we expect to strengthen adverse drug effect surveillance with an "alert report" required within 15 days on the most serious adverse reactions, and with 30-day reporting for the remaining reactions.

We anticipate that these proposed changes should reduce processing time for most applications by an average of six months. Currently, our review averages about two years after testing is complete and a new drug application is submitted.

We do not expect the review time for significant new therapies to decrease appreciably, but management initiatives within FDA will ensure them an expedited review.

I have given this initiative the highest priority as Commissioner, and I am heartened by the progress we have made so far. But no discussion of current medications, or current health care needs, is complete without mentioning orphan products—a subject that I want to review in some detail with you in the time that remains.

Much attention has been directed in recent years to the patient with an uncommon disease for whom a drug or device with demonstrated or potential effectiveness remains unavailable. While the industry has had a very good record in developing these "public service items," it has been generally agreed that additional efforts were needed.

I am pleased to tell you that there is a great deal of interest and activity today, on the part of government and industry alike, in making important orphan products avail-

able.

Before describing in detail the current initiatives, let me define what we mean by orphan products. They are products-drugs, devices, bilogicals, and foods for special diepurposes-that remain inadequately tested or unavailable because of limited commercial interest. They can be useful in uncommon conditions or they may be applicable to common diseases. They can be marketed products with newly discovered potential use in serious uncommon diseases. Whatever else they have in common, they share the unfortunate fate of not being developed or distributed because they are unpatentable or because impending patent expiration discourages research investment or small return on the investment is expected because of a small number of patients.

In the last twenty months or so, the efforts involving orphan products have begun to pay dividends. Four important groups have been established to focus attention to

orphan product development:

The Orphan Products Board, chaired by Assistant Secretary for Health, Dr. Edward Brandt;

The Office of Orphan Products Development, I recently established in my office at FDA:

The Commission on Drugs for Rare Diseases, sponsored by the Pharmaceutical Manufacturers Association;

The Institute for Orphan Drugs, sponsored by the Generic Pharmaceutical Indus-

try Association.

FDA's complete program has a full-time staff in the Orphan Products Development office. This unit is supplemented by additional scientific expertise within FDA. Its primary functions include the following activities:

It identifies and monitors the adequacy of available data for new orphan product candidates. It reviews investigational applications sponsored by independent investigators and firm. It surveys published literature, and it requests nominations of orphan products from professional associations, foreign regulatory agencies, and foreign drug manufacturers.

It reviews published literature for unlabeled uses of approved drugs which may highlight orphan uses for marketed drugs.

It provides appropriate help with protocol development and the compilation of data for evaluation.

The Office also specifies what needs to be

done to obtain FDA approval.

It tailors requirements, as appropriate, for orphan products, and it works with the Public Health Service to obtain limited studies from PHS labs when necessary for approval of high priority orphan products.

Finally, it provides technical assistance in compiling and preparing NDAs, and it assures priority review of orphan product applications.

We have accomplished much this year, including the location of sponsors for 14 drugs useful in rare diseases. One example is Pentamidine Isethionate for pneumocystic carinii, a disease that has recently reached almost epidemic proportions in presumed immuno-compromised individuals.

To aid this cause, FDA's National Center for Toxicological Research will perform

pharmacologic and animal toxicologic studies for orphan products when other sources cannot be found to support such studies. NCTR is also conducting a subacute and reproductive study for a new drug for treatment of patients with Wilson's disease.

There is plenty of work to be done, and the three other groups I mentioned earlier are also busy. The Department's Orphan Products Board was established on the recommendation of the Department's Task Force on Significant Drugs of Limited Commercial Value. The Board is composed of representatives of the research and drug regulatory agencies in the Department as well as the Veterans Administration and the Department of Defense. The Board develops policy initiatives, considers ways to provide incentives for developing and marketing orphan products, and reviews scientific evidence for products presented by FDA. Studies of those chosen for development will be supported by an agency on the board, or referred to an appropriate public or private organization for consideration.

The PMA's Commission on Drugs for Rare Diseases meets every two months to consider proposals for further development of orphan products. It reviews proposals submitted by independent investigators, institutions, and FDA. It does not provide research support, but it will recommend to drug companies that further development be undertaken. The Commission has considered the merits of several drugs and has recommended some for further development. The Commission provides its recommendations, and FDA's requirements, to PMA members and nonmembers.

Finally, the Generic Pharmaceutical Industry Association's Institute for Orphan Drugs provides research and manufacturing support to investigators. Two drugs will be the subject of new drug applications, and grant support and a supply of the drug have

been pledged for a third.

The initiatives I have described do not stop here. The National Institutes of Health can now consider proposals from drug and device companies for orphan product development because of a recently promulgated regulation which permits "for profit" organizations to receive grants. FDA also has its own grants program for orphan product development. The Congress of the United States is considering two orphan drug bills. The bills under review now include a seven-year exclusive license for firms that market nonpatentable orphan drugs, and one of them also provides tax incentives for developers of drugs for rare diseases.

Despite all this activity, there is much left to accomplish in the field of orphan products. What we have done so far is to make a beginning. And when I ponder any project in its infancy, I often recall an encounter between Michael Faraday, who invented the Dynamo, and Benjamin Disraeli. When Faraday showed his Prime Minister the Dynamo, Disraeli looked at the foreunner of all generators and said, "What good is this?" Faraday replied, "What good is a baby, Mr. Disraeli?"

The initiative to make orphan products more available may still be in its infancy, but the pharmaceutical industry as a whole is mature. In fact, many observers are saying that we are standing on the brink of a second pharmaceutical revolution. Unlike the first, which largely depended upon work at the intercellular level, this second revolution is based on intracellular chemistry.

A recent pharmaceutical publication has provided a preview of drugs of the future and theorized that the 21st century will be the Age of Engineered Drugs, the Age of New Dosage Forms, the Age for Commercial Manufacturing of Drugs in Space, the Age of Computer Assisted Drug Design, and the Age of Recombinant DNA Technology. This article, like many of late, describes us today as being on the threshold of a new world of discoveries.

And only two months ago, I spoke before a symposium held in London to examine the scientific, political, economic, and social implications of this second pharmaceutical revolution. I discussed the great significance of the new technologies that are sweeping through the pharmaceutical world, I observed that its nations are becoming increasingly interdependent, and I emphasized the importance of good science in regulatory agencies that will be called upon to reach decisions about the many new products now being developed.

Our meeting today is precisely the sort of gathering we must hold if we to respond to the coming challenges. I am certain that Arnold Schwartz would approve of our assembling here today. To him, and to Mrs. Schwartz, we owe a continuing debt of gratitude. They recognized the importance of pharmaceuticals and health education, and they acted on that recognition. May we hold many more meetings in their honor.

Thank you.

#### HUNGER IN EAST TIMOR CONTINUES

Mr. TSONGAS. Mr. President, for some time I have been deeply concerned over the tragic state of affairs in the former Portuguese colony of East Timor, a predominantly Roman Catholic island territory which was invaded by Indonesia in late 1975 and continues to be occupied by military force in violation of international law. On April 28 of this year, after examining a good many recent accounts of serious human rights violations in East Timor, I introduced a resolution which was subsequently cosponsored by 16 of our colleagues. The resolution called upon President Reagan to encourage the Indonesian Government to allow greater access to East Timor by journalists and international relief. It called for steps to relieve the problems of many East Timorese who have not been permitted to leave the island to join relatives abroad. It also called for moves to bring about a political settlement that would restore peace to East Timor.

One month after I introduced this resolution, there appeared a detailed firsthand account by Philadelphia Inquier journalist Rod Nordland, who spent 11 days in East Timor in May and appears to have travelled widely in the territory. Mr. Nordland's account, which has since received national attention, reported the existence of serious food shortages resulting from Indonesian military operations against timorese resistance. He reported at least some cases in which Indonesian military officials attempted to coerce villagers in an effort to

hide the reality of these food shortages and corroborated previous accounts of serious human rights violations.

Since then, I have seen no convincing account that would contradict the major elements of Mr. Nordland's report. The precise extent of the problems is unclear but there seems to be little doubt that serious problems do exist.

In recognition of these conditions, and together with 17 of my Senate colleagues and 66 Members of the House of Representatives, I sent a letter to President Reagan on the October visit to Washington of Indonesian President Suharto. The reply from the Department of State was singularly uninformative, and did not even attempt to address several of the questions raised.

However, our distinguished colleague from Illinois, Foreign Relations Committee Chairman Charles Percy, has recently announced that hearings would be held on the East Timor situation early in the new Congress. This will provide an excellent opportunity to address all pertinent issues. I commend Senator Percy for his decision.

In the interim, however, I would like to bring to the attention of my colleagues disturbing new information that indicates a turn for the worse in East Timor. An October 28 report from Agence France Presse (AFP) reprinted by the Foreign Broadcast Information Service, for example, speaks of food shortages "from which children were the principal sufferers." Before I continue, it must be emphasized that the East Timorese already suffered a large-scale famine from 1978-80, the overall consequences of which are still unclear. The impact of new food shortages, then, must be seen in light of what these people have endured to date.

The AFP articles go on to report that:

Forcible populations movements in various parts of Timor and those suspected of connections with the FRETILIN independence movement are not allowed to move about freely or cultivate the land.

AFP concludes that these "regroupments" have caused food problems.

On another important matter, the AFP article once again draws our attention to the plight of thousands of Timorese political prisoners being held on the offshore island of Atauro, including "450 children under 5 years of age." The report adds that:

The prisoners live in crowded, unhygienic shanties and suffer from malnutrition and such diseases as gastro-enteritis, cholera and tuberculosis. Some of the internees were said to be reduced to eating roots.

But the December 4 edition of Australia's most respected daily, the Melbourne Age, goes further, stating that the eastern districts of East Timor are facing drastic food shortages. In one location cited, the Baguia area, the

people are said to be "just waiting to die."

The Indonesian Government denies that these conditions exists, while it also denies reports of human rights violations. Amnesty International had its own response to some of these denials in a November 8 letter to the New York Times. I would only say that the fact that both the New York Times and the Washington Post attempted to visit East Timor but were denied entry by the Indonesian Government leads one to believe that Jakarta may have something to hide.

These recent reports portray a state of affairs that we cannot ignore. The means must be found to confince the Indonesian Government to provide full access to East Timor to a wide variety of international agencies, journalists and other investigative bodies. But in the end, it is more clear than ever that a political settlement guaranteeing the rights of all parties is the only way this conflict can come to a humane end.

For the benefit of my colleagues, I would like to include for the Record my letter of October 5 to President Reagan; the State Department response, the account from Agence France Presse and the Melbourne Age, and Amnesty International's letter to the New York Times.

The material follows:

U.S. DEPARTMENT OF STATE,
Washington, D.C., November 4, 1982.
Hon. Paul E. Tsongas,
U.S. Senate.

DEAR SENATOR TSONGAS: The White House has asked me to respond to the letter of October 5 which you and your colleagues wrote to the President on the situation in East Timor.

I understand and appreciate the serious concerns which you have regarding this important issue. I can assure you that the Department of State and our mission in Indonesia share your interest in this matter, and we are doing everything which can practically be done to monitor the situation in East Timor and improve the conditions of the Timorese people.

I would like to take this opportunity to comment on several of the specific points

raised in your letter.

We have been concerned, as you are, about the adequacy of food supplies in East Timor. We have examined this matter, both through firsthand visits to East Timor by officials of our mission and through discussions with others who have visited Timor recently, including other diplomats, journalists and representatives of international organizations. Based on this continued monitoring, we believe that there are adequate food supplies in East Timor, though there are isolated areas where distribution and other problems have led to temporary shortages. It appears that the Indonesian Government has moved swiftly and effectively to meet those shortages which existed or threatened, through the shipment of large stocks of corn from its own food stocks to East Timor.

In regard to the activities of international agencies, as you may know, three such organizations are currently active in East Timor, with the full cooperation of the Indonesian

Government: the International Committee of the Red Cross (ICRC), the United Nations International Children's Emergency Fund (UNICEF) and the Catholic Relief Services (CRS). Each of these organizations, which enjoy routine access to East Timor, are conducting important programs aimed at meeting pressing human needs (including health and nutrition needs) and fostering the economic development of the region. We have recently received Congressional approval to provide \$500,000 to ICRC in response to their special appeal for support of their operations in Timor. We have also always stood ready to support these organizations in any way we usefully could, here or in Jakarta, in planning and obtaining Indonesian approval for their programs.

Concerning the question of outside access to East Timor, the record shows that the Indonesian Government has permitted greatly increased access by outside observers in the past year, including representatives of a number of Western media (including reporters of the Philadelphia Inquirer, the Wall Street Journal and Reuters); the international organization officials already mentioned; and a growing number of Jakartabased foreign diplomats. It is our understanding that the Indonesian Government intends to continue this policy of permitting outside observers to visit the territory.

Regarding the political question which you have raised, it has been the consistent policy of this Administration (and indeed of each of the last three Administrations) to accept the incorporation of East Timor into Indonesia, without acknowledging that an act of self-determination has taken place there. We believe this is the only policy which will permit us to pursue effectively those important humanitarian goals which you and your colleagues have enunciated and which we so strongly share. Our ultimate concern, like yours, is the welfare of the people of East Timor; we are convinced that the policy we have chosen is the best way to meet that concern.

As you are aware, we maintain an ongoing dialogue with the Indonesian Government on this matter. It was discussed at a high level during the recent state visit of Indonesian President Soeharto. Officials of our mission have visited East Timor four separate times this year, and there will be a State Department official visiting there this month, in company with a mission officer.

As we continue our consideration of this matter, you can be assured that we will keep in mind the concerns which you and your colleagues have expressed.

Sincerely,

POWELL A. MOORE, Assistant Secretary for Congressional Relations.

FRETILIN GUERRILLAS STEP UP ATTACKS IN E. TIMOR

(By Gilles Bertin)

JAKARTA, Oct. 28.—Nationalist guerrillas in East Timor have stepped up their attacks on police posts, vehicles and other targets in a campaign of violence linked to next month's United Nations debate on the Indonesian annexation of the former Portuguese colony.

At least 15 people have been killed during the past three months by the guerrillas of the Revolutionary Front for the Independence of East Timor (FRETILIN), informed sources said here. About 40 houses were set on fire during the month of August as well as two schools where the teachers were not from East Timor. A group of 20 FRETILIN guerrillas carried out these attacks in the Viqueque District, killing a policeman. On August 21 several people were killed in an attack on a police post. A few days later the occupants of a jeep were killed in an ambush.

Reliable sources said that during August and September guerrillas mounted raids to procure food and weapons in the mountains between Baguia and Los Palos in the east-

ern part of the island.

A Roman Catholic priest familiar with East Timor said that a flare-up of guerrilla attacks was an annual occurrence before the U.N. vote. Informed sources said that during clashes with the guerrillas Indonesian troops seized American weapons dating from the Vietnam war. For the past two months no ship was allowed to dock in Timor until after it had been carefully searched, the sources said.

FRETILIN forces, estimated to be a few hundred strong, have been resisting the Indonesians since they took over East Timor seven years ago. They are mostly armed with weapons left behind by the Portu-

guese

Reliable sources said that the number of internees on the island of Atauro, a few miles off the East Timor capital of Dili, has in the past six months increased from 3,500 to about 4,800. The prisoners are generally FRETILIN sympathisers and their families, including 450 children under five years of age. They live in crowded, unhygienic shanties and suffer from malnutrition and such diseases as gastro-enteritis, cholera and tuberculosis. Some of the internees were said to be reduced to eating roots. The sources said there was considerable tension between the internees and the original inhabitants of Atauro, who number about 4,000.

Experts from international organisations, who have worked in Timor, said that there was no famine there but that there were food shortages, from which children were the principal sufferers. The Indonesian Army has carried out forcible population movements in various parts of Timor and suspects are not allowed to move about freely or cultivate the land. These forcible "regroupments" have caused food problems and a part of the population of East Timor has become dependent on external aid.

Meanwhile, the Roman Catholic Church in East Timor appears to be extending its influence with 60,000 people being baptised in less than one year. Many animists, who account for about half the East Timor population, have chosen Catholicism in preference to the Moslem faith since the Indonesian authorities started putting pressure on them to choose a religion with a single god in line with the Indonesian official ideology,

known as Pancasila.

Indonesian diplomatic efforts at the United Nations before the vote on East Timor, probably on November 9, have been concentrated particularly on West Africa, the Caribbean and Central America to ensure the maximum possible number of favourable votes. The Indonesian Government has sent one of its most distinguished diplomats, Ali Alatas, to New York to plead Jakarta's case. Informed sources here believe that Venezuela, Ecuador and the Gabon, which abstained in 1981, would this year back Indonesia. Three countries which voted against Indonesia last time-Haiti, Iran and Iceland-may abstain. Some other countries like Ruanda, Niger, Kenya, Santa Lucia and Costa Rica are still uncommitted.

In 1981, 54 countries voted for a Portuguese resolution condemning Indonesia, 42 against, and there were 46 abstentions.

[From the Melbourne (Australia) Age, December 4, 1982]

EAST TIMOR CLERICS CLAIM FOOD SHORT (From Ian Davis)

CANBERRA.-People in the eastern provinces of East Timor are suffering drastic food shortages and widespread malnutrition, say four confidential reports from East Timor obtained by "The Age"

According to one report, from a Catholic priest, who has lived in East Timor for more than 10 years, "the food situation is so critical it is the worst I have ever seen."

Three of the reports say the main reason for the food shortages is the continued Indonesian security operations against the East Timor independence movement, Freti-

According to three of the reports, Fretilin, as recently as July, was conducting guerrilla operations involving up to 200 troops in one battle. The information about food shortages, security in East Timor and continued Fretilin operations conflicts with Indonesian Government claims about the East Timor situation.

Two of the reports say the conscription of East Timorese into the Indonesian armed forces in East Timor is preventing people from planting and harvesting crops, causing grain shortages

As well, the Indonesians have forced East Timorese in the eastern half of the province out of the villages and into the larger towns in the area, to isolate them from Fretilin. The towns are so far from the villagers fields that they can not continue farming," one report claims.

The four reports were prepared between April and August this year by Catholic and Protestant church officials. Three of the reports were made by Timorese, Indonesian and Portuguese churchmen, all of whom have spent more than 10 years in East Timor. These reports were sent to relief and aid organizations associated with the Catholic church in Australia and the United States.

The other report was compiled by a sevenmember delegation from the Protestant World Council of Churches which visted East Timor for four days in June. This report has not been released.

The World Council of Churches was given permission by the Indonesian Government in June, 1982, to send a delegation to East Timor. In its report, the delegation says it was accompanied throughout the trip by Indonesian officials. The members of the delegation were Dr. P. D. Lathuihamallo, who co-ordinated the visit, Mrs. Jenny Borden (Christian Aid), Dr. Helmut Gundert (Brot fur die welt), Rev. R. L. Turnipseed (Church World Service), Ms. Nancy Robinson (Church World Service), Dr. K. Y. SeoPark (CICARWS-WCC), and Dr. B. Ables (Interchurch Co-ordination Committee for Development Projects).

"The Age" was given the reports on condition that identities of those making the reports remain confidential because of fears for the safety of those involved.

The reports made independently, paint a consistent picture of food shortages, malnutrition and ill treatment of the Timorese. This contrasts with recent claims about conditions in East Timor made by the Australian and Indonesian Governments and by the former Prime Minister Mr. Whitlam, after a visit to East Timor in February and March.

One report from a churchman living in East Timor says: "There are certain areas that are still, up till August 1982, critically short of food."

A report from another churchman claims: "The kelaparan' (Indonesian for food shortage) truly is a fact. The worst food shortage area is in the eastern districts of East Timor. In the month of April, Baguia had no food at all. Since then they have had nothing at all."

The report says six other regional centres in the east-Laga, Lakluta, Viqueque, Quelicai, Uatulari and Uatucerbau-are suffering food shortages. "All these areas are experiencing real famine, but specially Baguia, where the people are just waiting to die. In the western districts there is a reasonable supply of food and with the exception of some areas there is no crisis.'

According to another of the local churchmen's reports, Mr. Whitlam did not see the real situation in the areas he visited. "Mr. Whitlam during his short visit, in order to please the Indonesians, he travelled with helicopter, he could not see the real situation. Instead of visiting the regions, he has to obey the Indonesian Government, visiting only the localities which the Government wants him to visit."

Mr. Whitlam told the United Nations last

month that he followed an itinerary set by the delegate of the International Committee of the Red Cross. He said he flew in helicopters chartered by the committee to the offshore island of Atauro, three villages in the western region and four villages in the

The reports obtained by "The Age" contrast with the picture of East Timor painted by recent Western diplomatic reports. A report from Jakarta earlier this week, quoting Western diplomats said "fears that famine might be imminent in the area, were exaggerated".

The latest assessment of East Timor prepared by the Australian Department of Foreign Affairs says: "Information to the Government does not support claims of famine or impending famine. There is always a possibility of localised food shortage and distribution problems. However, available infor-mation indicates food stocks held in the province should be sufficient to cope with any emergency."

The Indonesian Government has been keen to paint a picture of East Timor returning to "normalcy" as its incorporation in Indonesia is accepted by the population. This was the basis of Indonesia's argument for removing East Timor from the UN

agenda.

Reports of food shortages and continued large scale security operations in East Timor conflict with the Indonesian Government's claims.

[From the New York Times, Nov. 8, 1982] "EXTRAORDINARY BRUTALITY" IN EAST TIMOR (By Larry Cox)

To the Editor:

In an Oct. 14 news article, "Indonesia Defends Role in East Timor," Foreign Minister Kusumaatmadja is cited as saying that reports of human-rights abuses against residents of East Timor are "untrue."

Amnesty International has followed the human-rights situation in East Timor since the territory was invaded by Indonesian forces in December 1975, and we find the Foreign Minister's comment disturbing.

It has been evident to Amnesty International in investigating the situation in East Timor that human-rights violations occur there within the context of an occupation of extraordinary brutality in which a whole range of fundamental human rights have been denied the population.

We believe that the population of East Timor has been systematically denied the rights to freedom of expression, association, assembly and movement. Persons exercising their right to petition the government for redress of grievances have been arbitrarily detained. Movement and communication within and beyond East Timor has been tightly controlled.

We are also disturbed by the Indonesians' failure to investigate a number of cases of human-rights violations in East Timor.

One case involved "Operation Fence of Legs." Undertaken by Indonesian forces from July to September of 1981 with the aim of eliminating Fretilin forces (the movement for an independent East Timor which resisted the Indonesian invasion), its strategy was to deploy tens of thousands of Timorese to form human fences that converged on and flushed out remaining Fretilin forces.

Reports indicated that civilians enlisted for this operation were required to advance in front of Indonesian forces and were unarmed or armed only with primitive weapons. While it is not possible to gauge the number killed in the operation, it is clear that many did not return to their homes.

We also received extensive reports of torture of detainees during interrogation. Forms of torture described in those accounts include burning with red-hot irons and cigarettes, electric shocks to the genitals and other parts of the body, extraction of finger and toe nails with pliers and slashing with knives.

We have raised these concerns with the Indonesian Government. So far there has been no response.

U.S. SENATE,

Washington, D.C., October 5, 1982. President Ronald Reagan, The White House

Washington, D.C.

Dear Mr. President: We are deeply concerned over the tragic situation in the former Portuguese colony of East Timor, which was invaded by Indonesia in late 1975 and continues to be the scene of tremendous human suffering. As you know, Indonesian President Suharto will be making a State Visit to Washington on October 12 and 13. We believe that it is imperative that the Timor tragedy be accorded priority attention in meetings conducted by you and other United States officials with the Indonesian Presidential Party.

First, let us state that we recognize the strategic importance of Indonesia and United States concerns in this regard are understandable. Indonesia is a strong and close friend of the United States. We commend the Government of Indonesia for its expeditious assistance to many thousands of Indochinese "boat people" who have landed on Indonesian shores in recent years.

However, these important considerations cannot erase the situation in East Timor. Although events in East Timor have received comparatively little attention, that does not make past or present conditions there any less severe. It is widely acknowledged that there has been great loss of life since the Indonesian invasion. In more general terms, Amnesty International stated in

a September 14 report to Congress that "it has become evident in the course of investigation into the situation in East Timor that those violations of human rights which Amnesty International seeks to expose occur within the context of an occupation of extraordinary brutality in which a whole range of fundamental human rights have been denied the population."

A first-hand approach appearing in the Philadelphia Inquirer on May 28 underscored the existence of serious food shortages, in good measure the result of 1981 Indonesian military operations against Timorese resistance. This is an especially important point, we believe, in light of past and possible present use by Indonesian forces of U.S. origin materiel.

Indonesian authorities are clearly reluctant to concede that such problems exist. But food shortages in at least some parts of the territory threaten the well-being of a sizable portion of the Timorese population—people barely recovered from the disastrous famine of 1978-80.

Mr. President, we believe that appropriate international relief agencies should be allowed to effectively address East Timor's current food and medical problems, while Timorese villagers should be allowed to resume normal farming activities and leave the "resettlement centers" set up by the Indonesian military.

We believe that the International Committee of the Red Cross (ICRC), which began to conduct prison visits in East Timor earlier this year and participated in an emergency relief program from October 1979 through April 1981, should receive staunch United States support as the organization seeks to diversify its activities in the territory. In general, international access to East Timor should be expanded. Those waiting to reunite with family members in Australia and Portugal should be helped to leave East Timor without further delay. A list of those in need of special assistance, and about whom we are particularly concerned, is attached.

It is our belief that the means should be found to convince Jakarta to agree to an internationally-negotiated settlement that would guarantee Indonesia's legitimate security interests while providing the people of East Timor with the political rights to which they are entitled, both morally and under international law. The evidence suggests that in the absence of such a solution, this tragic state of affairs will continue indefinitely.

Mr. President, we believe that it is of vital importance that your concern and that of your Administration be transmitted to President Suharto on these issues as well as on the broad question of human rights in East Timor.

Sincerely,

#### TURKEY MOVES TOWARD DEMOCRACY

Mr. HEINZ. Mr. President, I recently received a copy of Turkish Ambas-sador Elekdag's article that appeared in the Wall Street Journal presenting an optimistic forecast of greater democracy in Turkey in the days ahead. Ambassador Elekdag has responded to some of the criticisms of the new constitution in this article, a constitution that was recently passed by the Turkish electorate. He also points to a number of reforms that we can expect to see enacted in Turkey in the coming years. Although I do not fully share his analysis, I think it is worthy of Senators' attention, and I ask that it be printed at this point in the RECORD.

The article follows:

[From the Wall Street Journal, Wednesday, Nov. 3, 1982]

TURKEY MOVES TOWARD DEMOCRACY
(By Sukru Elekdag)

On Sunday, Turkey will take a step in restoring a pluralistic parliamentary democracy. The people will vote on the draft constitution that has been prepared by the consultative assembly and recently approved with some revisions by the five-member national security council.

According to the announced timetable, political-party life will be reactivated after the referendum. A new law on the electoral system and political parties will be enacted, and general elections will be held in either the fall of 1983 or the spring of 1984.

The constitution is expected to open a new era of stability, prosperity and workable parliamentary democracy.

Many Turks believe that the constitution of 1961 and the proportional representation system were largely responsible for the political instability of the late 1970s; that system did not give adequate powers to the executive branch and the president, did not clearly define the duties and the powers of the state organs, failed to balance the rights of the individual with those of society and encouraged the proliferation of political

parties. The result was ambiguous election

The resulting weak coalition governments were ineffective in dealing with economic and social problems. The executive was powerless to maintain law and order, counter subversive activities and stem the rising tide of terrorist killing. A constantly deadlocked parliament could not enact badly needed legislation and could not even elect a president in six months and after 136 ballots.

Turkey's political paralysis was also caused by the stalemate between the two major political parties, the Republican People's Party (RPP) under Bulent Ecevit and the Justice Party (JP) under Suleyman Demirel. The two parties refused to cooperate in forming a strong coalition government and they couldn't govern effectively when they formed coalitions with small, extremist parties.

By all accounts, Turkey by 1980 was on the verge of chaos. The increased polarization of left and right was accompanied by a wave of terrorist killings, reaching more than 25 a day by late 1980. Schools and universities almost ceased to function as they became the focal point of terrorist activities. Journalists, politicians, businessmen and judges, together with their families, were under constant threat from either left- or right-wing terrorists. Inflation reached 130%. Ideologically motivated strikes paralyzed industries already beset with great problems due to the severe balance-of-payments bottleneck and the resulting difficulties in importing raw materials and spare

#### TOTAL MARTIAL LAW

On Sept. 12, 1980, the armed forced assumed control of the government; martial law, already imposed in some parts of the country by the civilian administration, was extended to the remainder. A newly formed national security council, composed of the commanders of the four services and headed by Chief of Staff Gen. Kenan Evran, took the reins of government and suspended all political party activities.

The military council declared its resolve to restore a viable and efficient parliamentary democracy and to eradicate the causes of instability. A schedule for return to civilian rule was established, a civilian interim government was formed and a consultative assembly of 160 members was created to prepare a constitution and act as the tempo-

rary legislative body.

During the past two years dramatic progress has been achieved. Law and order have been restored, terrorism has been stamped out and there has been economic progress.

The referendum this Sunday on the draft constitution indicates that the present rulers abide strictly and honorably by the

timetable that they set.

The draft constitution fully safeguards human rights and fundamental freedoms; insures equality before the law, free elections, separation of powers and an independent judiciary; incorporates freedom of the press and labor rights, and guarantees pluralism of political parties.

The free-wheeling debates in the consultative assembly on the draft constitution have been widely echoed in the mass media, and independent personalities, political groups, former politicians, professional associations and labor unions have expressed their views

extensively.

Some criticism focused on the increased powers accorded to the executive branch and the president. Under the proposed con-

stitution, the president has the right to ask for a referendum, dissolve the parliament and call new elections under well-defined rules to prevent the sort of paralysis that has occurred in the past. He can chair the council of ministers for the proclamation of state emergencies, and he can nominate the judges of the highest courts, as well as individuals to fill several other high civil posts.

These increased powers of the executive reflect the paralysis of the past. Scholars note that the powers of the Turkish president under the new constitution are not as sweeping as those of an American president and are comparable to those of French president.

Certain provisional articles of the new constitution have drawn some fire from the Turkish and foreign press.

The first article provides that if the constitution is approved in the referendum, Gen. Evren, the current head of state, will automatically become president. Critics argue that a presidential election should be held separately following the referendum. These views seem reasonable, but they discount the fact that Gen. Evren is extremely popular in Turkey. Objective non-Turkish observers are virtually unanimous in their assessment that if a separate vote were taken on the presidency, Gen. Evren would be elected overwhelmingly.

The link between the election of this demonstrably popular statesman to the presidency and the approval of the new constitution will, it is believed, give citizens greater motivation to accord the constitution full and careful consideration.

#### INTO THE HANDS OF ANARCHISTS

A second provision that has prompted some controversy effectively prohibits political activity by the past leaders of all the former main parties for 10 years and prohibits all other members of the last parliament from forming new parties or holding any executive office in any new parties. Gen. Evren recently outlined the thinking that underlies this provision:

"I have no doubt that the temporary ban on political activities imposed on former party leaders and members of central executive committees of the parties will be deemed a reasonable measure. Some of these persons are currently on trial in regular courts for common crimes and of-

"Moreover these former politicians who formerly held high political offices not only failed even to think of the necessary measures to prevent the situation that prompted the armed forces' intervention . . . but also failed for months to elect a president. These politicians paralyzed the parliament and allowed the country to fall into the hands of anarchists. They are, therefore, living under weight of guilt that cannot be removed. We are striving to establish a healthy democratic regime in Turkey.

"It is absolutely necessary to keep these politicans, who managed to derail our de-mocracy twice, in 1971 and in 1980, out of active political life to insure the laying of foundations for the new era. It goes without saying that such persons determined their own fate, through their own irresponsible attitudes, which cannot be condoned.'

Modernizing reforms have dramatically altered the political, social and economic landscape. What Turkey has accomplished during the six decades since the republic was established amid the ruins of the Ottoman monarchy augurs well for the republic's stability and future prosperity.

The progress of Turkey toward simultaneous attainment of democratic development and economic advancement has not always been smooth. But Turkey's record of maintaining a democratic form of government for the last three decades can be matched by very few developing and semi-industrial nations. The foundations have been laid for a thriving, intelligently progressive society that can serve as a model for othr nations attempting to realize their aspirations for a better life.

But rapid progress necessitates adjustments. The effort under way in Turkey is to nurture the emergence of a viable, efficient system of governance resting on genuinely democratic principles so that our people may fulfill the inherent potentialities of their country. The new constitution is nothing but a vehicle to achieve these aspira-

#### PROTECTING OUR PROTECTORS

• Mr. GRASSLEY. Mr. President, I call the attention of this Chamber to yet another example of this country's disastrous sentencing guidelines.

I am referring to the murder of Robert K. Best, a D.C. policeman killed early yesterday morning apparently by Vincent Dark, a man whose criminal arrest record should have had him behind bars where he would have no access to you or me or Robert Best. His criminal record includes a drug charge in 1977 for which he served no sentence; conviction of a robbery in 1978, for which he was given a suspended sentence and placed on 4 years' probation; and another conviction of armed robbery for which he served 16 months out of a potential 10vear term.

So, 3 months ago Vincent Dark was paroled after serving 16 months of a potential 10-year term. Today, both he and the courageous police officer whom he allegedly slayed, in what has been referred to as an execution style of murder, are dead.

Mr. President, how much longer can we let men like Dark serve partial or no sentences at all? When are we going to finally do something about a sentencing process that allows the convicted armed robber to go back to the streets when he hasn't even served one-fifth of a potential sentence? Do each and every one of us have to suffer the slaying of a loved one before we understand that our sentencing guidelines are little more than no sentencing at all?

In one of the more comprehensive studies of recidivism, the FBI explored the arrest histories of persons arrested for Federal offenses during the period of 1970-75. Of 255,936 offenders arrested during that period, 164,295 or 64 percent, had been arrested two or more times. A followup study was conducted in which the records of offenders who were released from the Federal criminal justice system during 1972 were followed for new arrests through 1975. Seventy-four percent of the offenders released after serving prison time were rearrested within 4 years.

So often it is our first line of protection, our police, who suffer the consequences of an impotent sentencing scheme. When law enforcement personnel, such as Officer Best, fall dead at the hands of criminals repeatedly brought to justice by their colleagues in blue, only to be released again, and again, Congress must recognize what our policemen already know-our revolving door system of justice is not protecting our innocent citizens from violent crime: and it certainly is not protecting our policemen who are charged with the duty of protecting our citizenry.

A mandatory sentencing system will not be without its problems. We will have to accommodate a greater number of prisoners within our already bulging prisons than ever before. Indeed, no one would be happier than I if we experienced a process of rapid rehabilitation. But rarely does it follow that any measure of rehabilitation is rapid. Those of us who are aware that there must be some type of rehabilitative programing in our prisons know that rehabilitation takes time.

From the twofold perspective of protecting the public from dangerous offenders and doing more with those offenders than having them stay a fraction of their designated sentence and allowing them back on the streets unchanged, I support mandatory sentencing periods. I urge my colleagues to join me in actively implementing mandatory sentencing guidelines.

## FRANK CARLUCCI

. Mr. NUNN. Mr. President, the Department of Defense is losing an effective and skilled Administrator with the retirement of Frank Carlucci, and the country is losing an outstanding public

Mr. Carlucci's tenure as Deputy Secretary of Defense culminates a distinguished and remarkable career of Government service in both Republican and Demoncratic administrations. He joined the U.S. Foreign Service in 1956, and over the next decade he was posted to some of the most volatile and crisis-ridden areas of the world, including South Africa, the Congo, and Zanzibar. He quickly earned a reputation as an energetic, thoughtful, and courageous Foreign Service Officer.

In 1969, Mr. Carlucci left the State Department and during the next 6 years moved through a progression of key administration posts: Assistant, then Director of the Office of Economic Opportunity; Associate, then Deputy Director of the Office of Management and Budget; and Under Secretary of Health, Education, and Welfare. In each of these positions, he displayed versatility, innovation, and foresight in managing, directing, and streamlining complex programs and bureaucracies.

Frank Carlucci returned to the foreign policy arena in 1975 when he was appointed Ambassador to Portugal. He presided over a difficult and sensitive period in United States-Portuguese relations, when the Portuguese Government was making the transition from a right-wing dictatorship to a parliamentary democracy. As Ambassador, Mr. Carlucci played a key role in insuring that Portugal remained a member of NATO. The alliance is stronger today for his work during

that crucial period.

Frank Carlucci came to the Department of Defense in 1981 after serving for 3 years as Deputy Director of the Central Intelligence Agency. Deputy Secretary of Defense, he has continued the high standards of public service he has exhibited throughout his career. During the past 2 years, he has had the difficult task of the dayto-day management of the Pentagon and all that position implies. He has made use of his previous experience in streamlining bureaucratic procedures to improve control over unnecessary expenditures. In particular, I believe Frank Carlucci's 30-plus initiatives to improve procurement procedures marks the beginning of a comprehensive and much-needed overhaul of this complex area. His efforts are already paying dividends. The real testament to Frank Carlucci will come in the years ahead, as his initiatives should save this Nation millions of dollars while increasing our defense capabil-

Frank Carlucci has earned the respect and admiration of many Members of the Senate for his honesty, his thorough preparation, and his dedication to meeting our national security requirements effectively and efficiently. He is a trusted and valued administrator whose experience will be sorely missed. I hope that Frank Carlucci will continue to provide the country with the benefit of his knowledge. Every young person interested in a career in Government should study his long record of accomplishments, for he has set a very high example for all those dedicated to serving the public good.

U.S. ATTORNEY SETS EXAMPLE FOR FOOD STAMP FRAUD PROSECUTIONS

• Mr. HELMS. Mr. President, the U.S. attorney in Raleigh is setting a fine example in cracking down on individuals charged with defrauding the food stamp program.

Samuel T. Currin, the U.S. attorney in Raleigh and J. Randolph Riley, the Wake County district attorney, recently announced that their offices will prosecute 574 Wake County food stamp applicants believed to have understated their incomes when applying for food stamps.

The Wake County prosecutions are the result of a recently completed audit by the Office of the Inspector General of the Department of Agricul-

Of the 6,674 households participating in the food stamp program in Wake County, the OIG found 574 cases of suspected food stamp fraud due to inaccurate reporting income-that is, underreporting. I might add that it is not likely that most such recipients simply forgot about the income they did not report. Over half of the individuals identified by the Inspector General's audit, 302, each owed more than \$400.

According to the OIG audit, "unreported wages have caused overis-suances estimated at \$300,000 in the food stamp program" in Wake County

One example cited by the OIG was of a recipient who was certified for food stamp benefits three times during the period between March 1, 1980, and June 30, 1982, without reporting all household employment income. The recipient received overissuances of \$3,157 in food stamps during this period.

All 574 recipients are being prosecuted by the U.S. attorney or the Wake County district attorney. Samuel T. Currin, U.S. attorney, pointed out the importance of the across-the-board prosecutions:

If we're going to impress on people we're serious about this, we need to go ahead and prosecute every single case. We feel it's the only way to make an impact and get the message across.

In addition to the 574 recipient cases, an additional 14 individuals were indicted for discounting and other illegal food stamp transactions as part of an undercover operation aimed at another aspect of food stamp fraud, commonly known as "trafficking." These individuals will also be prosecuted.

Bear in mind, Mr. President, that this fraud is for just one county-my home county of Wake in North Carolina. Multiply that by all the counties of all 50 States, and the cost of this rip-off of the taxpayers soars into the stratosphere. Indeed, the most recent statistics from the Department of Agriculture indicate that overissuancesmost caused by underreporting of income such as that identified in Wake County—cost taxpayers over \$1 billion in the food stamp program each year.

Would that more U.S. attorneys, State attorneys general, and local prosecutors would take the same degree of initiative that is being shown in these Wake County prosecutions. As Mr. Currin notes, such diligent

prosecution may be the only way to impress on people we are serious about this."

I commend to my colleagues an editorial and a news story from the Raleigh (N.C.) Times concerning the prosecutions and subsequent editorials praising this worthy effort, and I ask that they be printed in the RECORD at the conclusion of my remarks.

The material follows:

(From the Raleigh (N.C.) Times, Oct. 14, 19821

#### FOOD STAMP CRIMINALS

When a state and federal undercover operation turns up 574 Wake County food stamp recipients suspected of lying about their income, it lends considerable credibility to welfare criticis' claims of widespread fraud. These 574 represent 10 percent of all those receiving the stamps, and the investigation is far from over.

Perhaps the arrest, speedy trial and punishment of the guilty will serve as a dramatic deterrent to not only food stamp but other suspected welfare fraud in the county. Meanwhile, the high percentage of fraud should cause Wake commissioners to turn their attention to beefing up the county's own fraud investigation squad.

We suspect that few of the suspects are living on easy street. And undoubtedly many have lied to supplement limited incomes. Still there is no excuse for fraud.

For not only will the guilty suffer the loss of food stamps, and be punished. They, and other honest, deserving recipients, stand to suffer from an already skeptical public's reluctance to support social programs for the poor. Fraud in welfare feeds the anti-welfare propaganda mills.

We support efforts to clean up such social programs before their abuse further shrinks the dwindling flow of compassion from

Washington.

Still more cheering is the news that the undercover operation will be extended to an even more despicable kind of criminal. Agents will concentrate on snaring those unconscionable store owners who give cash instead of food for the food stamps. Under this illegal practice, which investigators call widespread, the grocer buys the stamps at perhaps half their actual value and then collects full value from the government.

These more affluent, educated and supposedly responsible members of the community should feel the full anger of the law and the disgust of the taxpayers. A simple wrist-slapping is too little for those arrested

and convicted.

The clampdown on food stamp fraud is long-awaited and welcome. As it proceeds, the courts must guard against punishing the poor and the ignorant for lying about limited incomes more severely than they punish the bigger, more scheming criminals who know better and have only greed, not need, to blame for their crime.

[From the Raleigh (N.C.) Times, Oct. 10, 1982]

574 FACE CHARGE OF FOOD STAMP FRAUD IN WAKE

### (By Bill Bystrynski)

More than 570 Wake residents will be charged and prosecuted for food stamp fraud in a joint effort by state and federal prosecutors to recover about \$300,000.

U.S. Attorney Samuel T. Currin and Wake Dist. Atty. J. Randolph Riley today announced that their offices will prosecute 574 Wake food stamp applicants who may have lied about their incomes when applying for stamps. As a result, those recipients were paid about \$300,000 too much, Riley and Currin said.

A sampling of 24 Wake residents were charged today with misdemeanor federal offenses of lying about their income to obtain

food stamps.

An additional 14 people in counties other than Wake were indicted for discounting and illegal food stamp transactions as a part of an undercover operation aimed at a different aspect of food stamp fraud.

"If we're going to impress on people we're serious about this, we need to go ahead and prosecute every single case," Currin said. "We feel it's the only way to make an

impact and get the message across

I would expect the lobby of Social Services to be jammed tommorrow" with people trying to correct wrong information they gave about their income, Currin said. Riley and Currin said they will split the number of cases to try to prosecute them faster, but said it might take a year to prosecute all

Those charge with felonies face a maximum prison term of five years and a \$10,000 fine for each count, if convicted. Misdemeanors are punishable by one year in jail and a \$1,000 fine.

Most of the 574 people will be charged

with misdemeanors.

Currin said the fraud was uncovered by checking social security numbers against Employment Security Commission records to show if the recipients were earning more income than they had claimed on food stamp applications.

The computer check showed about 10 percent of those receiving food stamps in Wake had lied about their income, Currin said.

No such sustained effort has ever before been put into uncovering food stamp fraud

in Wake, Currin said.

Currently, the Wake Department of Social Services has a five-member unit that investigates welfare fraud. The unit often turns over its information to the county or U.S. district attorneys' offices for prosecu-

Currin said undercover operations will begin in several areas, including Wake, to tackle other areas of food stamp fraud. Currin said discounting-the practice of exchanging food stamps for cash instead of for food-has become extremely widespread.

For example, a storekeeper might take \$100 worth of food stamps and pay the recipient \$50 in cash. He would then turn the food stamps in for \$100 from the government, making a \$50 profit, Currin said.

"The discounting problem is just completely out of control and we'll be sending in more and more undercover agents and be more aggressive in these types of cases," Currin said.

The Wake residents who will be charged could be charged with either felonies or misdemeanors, Currin said, depending on how much money they have taken from the program. Judges also will be asked to order the defendants to pay restitution to the food stamp program.

Another advantage of the joint prosecution is that the federal grand jury has the power to compel testimony, while the state does not.

Currin said he has a list of about 50 employers who refused to verify the amount of income paid to employees suspected of food stamp fraud. Now those employers can be subpoenaed and forced to testify.

"To my knowledge, we are the only county in the country trying to do something like this. We hope it turns out success fully so we can be a model for the nation,' Currin said.

#### IN MEMORY OF MARY PRESTON COURTNEY

Mr. WARNER. Mr. President, on Tuesday, December 13, 1982, Mary Preston Courtney, a truly dedicated and faithful public servant passed away. She fell victim to a brain tumor. Mary Preston, as she was known to all, had served as the manager of my district office in Richmond since I was sworn into office on January 2, 1979.

She was a "Virginia lady," indeed a true lady, exemplifying all the qualities of the word. Mary Preston was gentle, compassionate, polite, and considerate. She was never known to utter an unkind word about anyone. Patience was a virtue of hers for she never was too busy to take the time to listen to the concerns of my constituents.

A native of South Boston, Va., she was educated in the public school system. Mary Preston attended James Madison University and was graduated from the Richmond Professional Institute. After a brief modeling career in New York, she returned to South Boston to join the family business, Heddderly Printing Co.

Soon after her return to Virginia, Mary Preston became involved in politics. She was among those who played a role in the revitalization of the Republican Party in her hometown.

In 1966, she became the bride of Fredric Courtney and the couple moved to Richmond. Among her many charitable and civic involvements was the Virginia Lung Association. Though she began as a volunteer at the asso-ciation, her many hours of dedicated service soon earned her a staff posi-

Mary Preston joined my campaign staff in 1978 after the tragic death of Richard Obenshain, then the Virgina Republican candidate for U.S. Senate. As in all campaigns, but this perhaps more than most, time was short, the hours long and frustrations were many, yet one could always count on Mary Preston to be the tranquil voice during the tough times.

She will be sorely missed by all who knew and loved her, most especially by her husband, Fred. My staff and I were privileged to have shared in this beautiful person's life.

#### ALLEGED JUDICIAL AND GOVERNMENTAL MISCONDUCT

Mr. EAST. Mr. President, my office has received petitions from all parts of the country alleging extremely serious irregularities and misconduct by the Federal judges and attorneys in the

cases of Green against Miller and Wright against Regan. While I am not prepared to make final judgment on the validity of these allegations, confidence in the Government is undermined when people lose respect for the judiciary. I think we ought to study this problem, and to that end I am inserting in the RECORD both a copy of the petition I have been receiving and an article on the problem entitled "Private Schools, Tax Exemption, and the IRS" from the January/ February issue of Regulation magazine. I urge my colleagues to consider this matter.

Mr. President, I ask that a copy of the petition and of the article be placed in the RECORD at the conclusion of my remarks.

The material follows:

A PETITION TO THE CONGRESS OF THE UNITED STATES

Whereas, Collusive litigation, known as a "sweetheart suit" has been used for usurpation of Congressional legislative power and for violation of the civil rights of religious minorities, churches and Christian schools.

Whereas, All religious schools and churches that operate them are in imminent danger of a nationwide federal court order in Wright v. Regan that will result in massive government harassment of religious institutions by the Internal Revenue Service.

Whereas, Judge Ruth Bader Ginsburg and Judge Skelly Wright of the U.S. Court of Appeals for the District of Columbia have ordered Judge George Hart to ignore the Ashbrook and Dornan Amendments which prohibit funds for the IRS attack on religious and private schools that will be required by such a nationwide court order. The defiance of these strict spending limitations by Judges Ginsburg and Wright constitutes extreme judicial misconduct making them unfit for office.

Whereas, Judge George Hart of the U.S. District Court has already issued an unlawful order in *Green v. Miller* requiring the IRS to attack church schools in Mississippi, and the same requirements of this order will be made to apply to the entire nation in *Wright v. Regan* because of the unconstitutional order of Judges Ginsburg and

Wright.

Whereas, Judges Ginsburg and Wright have issued court orders directed at religious schools that were not a party in the litigation in Wright v. Regan nevertheless, absolutely no objection was raised by the

government.

Whereas, In the thirteen years since the beginning of litigation in Green v. Regan and six year since the beginning of Wright v. Regan, the history of both cases has been replete with collusive litigation, misconduct by federal judges and attorneys, illegal use of government funds, abuse of Christian churches and Christian schools, violation of religious civil rights, secret meetings, favoritism shown to the "sweetheart" parties, abuse of third party intervenors affected by the cases, and violation of the Ashbrook and Dornan Amendments.

Whereas, Not a single shred of statutory authority exists for these actions by the federal courts, an unconstitutional judicial fabrication called "public policy" is unlawfully asserted as the basis for the rule of law. If a federal judge can make major changes in the law merely by announcing that "public

policy" requires it, we no longer live under a

free, representative government.

Whereas, James Madison warned in his famous "Memorial and Remonstrance" that, "It is proper to take alarm at the first experiment with our liberties."

Whereas, Both houses of Congress have held hearings on this matter this year, and not a single witness from private or religious schools was permitted to testify!

We the undersigned do hereby petition the Senate Subcommittee on Separation of Powers to immediately hold hearings on the use of collusive litigation that is used for usurpation of Congressional legislative

We do further petition the Congress to enact legislation that will prohibit "sweetheart suits." Furthermore, we ask that members of Congress demand the resignation of Judges Ruth Bader Ginsburg and Skelly Wright because of their outrageous misconduct in the cases of Wright v. Regan, and the resignation of Judge George Hart because of his misconduct in Green v. Miller.

We do further petition the Congress that it vigorously oppose judicial usurpation of Congressional legislative and appropriative powers delegated in Article I, Section 1 and Article I, Section 9 of the Constitution. We plead that Congress limit the power of the federal courts in accordance with Article III. Section 2 of the Constitution which directs Congress to make exceptions and regulations for federal court jurisdiction. Furthermore, we petition the Congress to restore a republican form of government as guaranteed in Article IV, Section 4 of the Constitution, and demand that the federal courts cease and desist from judicial tyranny which now deprives citizens of life, liberty, property, and civil rights without due process of law.

PERSPECTIVES ON CURRENT DEVELOPMENTS
PRIVATE SCHOOLS, TAX EXEMPTION, AND THE
IRS

In the cloud of dust produced by the heavy feet of executive and legislative officials running for cover, some of the facts in the controversy over tax exemptions for private schools have been obscured. Regardless of its outcome, it is an interesting case study in the development of law through the interplay among Congress, the executive, and the courts. And if you think the problems will be settled by Congress's mere failure to enact any new legislation and the Internal Revenue Service's return to its prior interpretation of the law—then you prob-

ably have dust in your eyes.

The story begins in 1969, when a group of lawyers filed a class action suit in the United States District Court for the District of Columbia on behalf of black parents and students from Mississippi to enjoin the Internal Revenue Service from granting tax exemptions to private schools in that state suspected of racial discrimination. suit, Green v. Connally, was initially contested by the IRS-not least of all because established law denied the plaintiffs' standing. In 1970, however, the service changed its position and took the plaintiffs' side on the general point at issue. It announced that henceforth it would require schools to certify that they did not discriminate on racial grounds; beyond that, it promised no specific procedures for enforcing its new policy. The plaintiffs, however, were not content with such generalities and pressed for a more sweeping remedy. A three-judge district court in the District of Columbia agreed with them. It enjoined the service from granting exemptions to the Mississippi schools unless they not only certified that their operations were not discriminatory, but also conducted publicity and recruitment campaigns aimed at black students and reported to the IRS on the results. The IRS acquiesced in these strictures in Mississippi but continued to follow a self-certification policy elsewhere in the nation.

The district court in Green based its decision not on the Constitution or federal civil rights laws, but on the Internal Revenue Code, Section 501(c)(3) of the code provides exemptions for organizations "operated exclusively for religious, charitable, scientific, testing for public safety, literary, or educa-tional purposes." No one denied that the Mississippi schools were "educational," but the court took the novel position that they had to be "charitable" as well. After that leap, it was only a few skips to the proposition (drawing on the common law of charitable trusts) that no organization violating public policy could be considered charitable, to the proposition that racial discrimination violates public policy, and to the conclusion that private educational institutions that discriminate by race cannot claim the benefit of section 501(c)(3).

Although the IRS was perfectly happy with its new powers, the district court's decision did not go unchallenged. A group of white intervenors appealed to the Supreme Court, which affirmed it in 1971. Since, however, the affirmance was not accompanied by an opinion, the basis for the Court's action was unclear. The effect of the affirmance was further diminished by the Court's gratuitous observation in a later case that since the IRS had "reversed its position while the case was on appeal . . . the Court's affirmance in Green lacks the precedential weight of a case involving a truly adversary controversy." Since then, the D.C. circuit has affirmed the holding of Green (without opinion), as has the Fourth Circuit in the two cases now on appeal before the

Supreme Court. The issue of the meaning of section 501(c)(3) is further confused by later congressional action. In 1976, for example, Congress enacted a provision denying tax ex-emptions to social clubs that discriminate by race. On the face of things, this would suggest a congressional belief that racial discrimination will not destroy an otherwise available exemption unless the law is amended to that effect. The legislative history, however, indicates that Congress assumed the Green decision to be law with respect to private schools. Or perhaps it indicates only that Congress accepted the permissibility, though not the inevitability, of the IRS's applying the statute in that fashion. Or that Congress accepted the fact, but not the correctness, of the Green decisions. Leaving such doubts aside for the moment, on with the story:

In 1975 the IRS took the next step. It moved to replace its process of self-certification with a nationwide system of required affirmative action and reporting similar to that imposed in Mississippi. These rules were put into effect without incident. Three years later, the service decided, under legal pressure from civil rights groups, that it needed to shift the burden of proof to the schools themselves. It proposed to supplement its 1975 procedures with a special set of rules for "reviewable schools," which it defined as schools "formed or substantially expanded about the time of desegregation of public schools" and having "an insignificant number of minority students." That definition would include almost all private

schools in the South, both religious and secular; the schools set up by refugees from forced busing in the North; and many miscellaneous schools with the misfortune to be founded or expanded at the "wrong" time. If a "reviewable" school did not meet a specified quota of minority students, it would be required to prove its innocence by clear and convincing evidence of extensive minority recruitment and scholarship programs.

With its 1978 proposals, the IRS for the first time encountered significant opposition. The expense of mandated scholarship programs would have bankrupted many of the new schools, especially those run by poorer fundamentalist congregations. Parents condemned what they perceived as interference with their First Amendment rights, and objected to the presumption of guilt attached to their schools. The IRS received 150,000 letters on the proposal, the most in history on any subject.

Congress received a few letters as well. The next year, it curbed the authority of the IRS in the area by attaching two different amendments to the Treasury appropriation bill: one barring the use of funds to implement the 1978 proposals, and a second barring the use of funds "to formulate or carry out any rules, policy, procedure, guideline, regulation, standard, or measure" leading to the loss of tax exemption "unless in effect prior to August 22, 1978." Together, the two amendments seemed to lay the

1978 proposal to rest.

The District of Columbia courts, however, were still open. Two suits were at hand. One was the familiar *Green v. Connally* case. This time the plaintiffs had reopened it in order to ask the court to impose the 1978 rules in Mississippi. In the other case, entitled *Wright v. Miller*, the plaintiffs were asking the court to impose the 1978 rules everywhere else in the country. It was in fact during the settlement negotiations in these two suits—from which the IRS, incidentally, excluded the representatives of private schools—that the IRS agreed to adopt the 1978 rules. When Congress intervened and the settlement became impossible, the suits naturally proceeded.

The IRS once again proved a cooperative defendant on the issue of substantive law (though it continued to challenge the plaintiffs' standing). Its *Green* brief argued:

"... the restrictions in the Appropriations Act place the Service in a serious dilemma. On the one hand, the Service has now concluded that its current procedures and guidelines are inadequate to implement fully the Service's obligation to deny tax exemption to discriminatory private schools. On the other hand, the Service is prevented from implementing new rules in this area because of the congressional action. Thus, defendants believe that the Congressional action conflicts with Code Section 501(c)(3) as interpreted by the *Green* court and other courts.

It is unclear why later congressional action cannot conflict with earlier congressional action. One would suppose that is what distinguishes preexisting statutes from preexisting constitutions. Nonetheless, the service asked the court to resolve its "dilemma" by "declaring the riders unconstitutional" or by at least interpreting the riders to bar only the implementation of new rules by administrative fiat, and not the execution of new court orders to the same effect.

Ultimately, the District of Columbia Circuit Court of Appeals agreed with the second argument. On June 18, 1982, a panel of that court held by a 2-1 vote that "the

riders . . . do not purport to control judicial dispositions," and remanded the case to the district court so that it could decide whether to impose the 1978 rules. (The case is now on appeal.)

Congress could see a nationwide court order coming, and acted immediately to head it off. On July 30 the House, by a vote of 337-83, added a new rider to the old ones, forbidding the enforcement of court orders entered after August 22, 1978. The new rider was approved by the Senate Appropriations Committee, and was made part of the continuing resolution passed at the end of the session. Thus, in a constitutional impasse perhaps unique in American history, the legislative branch has barred the executive branch from carrying out the orders of the judicial branch.

So the regulation of private schools had proceeded through three stages: the 1970 settlement in which the IRS first asserted its power; the 1975 rules in which it imposed affirmative action and reporting requirements on private schools; and the 1978 initiative in which it established racial quota requirements-which, if not met, would shift the burden of proof and impose even greater affirmative action obligations. While the third stage was being thrashed out between the courts and Congress, the first two stages were under challenge too. Bob Jones University and Goldsboro Christian Schools had sued to save their tax exemptions, and had lost in the Fourth Circuit on the basis of Green. These cases were decided under the 1975 procedures, and thus did not raise the issue of the 1978 rules and the resulting congressional riders. (On the other hand, they raise some additional issues-such as whether First Amendment religious liberties prevent denial of the exemption and what constitutes "prohibited" discriminationthat will not be pursued here. The issue of First Amendment religious liberty was important enough to provoke amicus briefs on behalf of Bob Jones before the Supreme Court from the National Council of Churches and the National Jewish Commission on Law and Public Affairs.)

In the appeal of those cases to the Supreme Court, the government once again changed its position to agree with the plaintiffs—but this time all hell broke loose. And that is where the reader came in.

There is plenty of room for valid criticism of the administration's handling of this matter-perhaps on policy grounds (if total elimination of the ban on tax exemptions for "segregation academies" was really its original intent); and then perhaps on tehnical grounds (if the IRS's originally announced intention of reversing the regulations was meant to apply even to Mississipwhere there was still an outstanding court order in Green); and surely on the grounds that legislation to plug the discrimination loophole left by the abandonment of Green should have been part of the orignial package. But what has been lost in the dust is the fact that the administration's determination to get rid of Green is eminently sound, and should have the support of a Congress that purports to be an implacable foe of excessive agency and judicial power.

It seems clear that Congress would vote against tax-exempt status for private schools that discriminate on the basis of race. It also seems clear that the *Green* court, and the IRS, were engaging in an audacious bit of activism when they said Congress had already done so. It was, moreover, a seminal sort of activism, since it opened the tax-exemption section of the Internal

Revenue Code to continuing policymaking by the IRS and the courts. For if, in order to qualify for the "educational" exemption. an institution must also be "charitable (and thus comply with all important public policies), then presumably the same condition attaches to all the other exemptions as well, notably the "religious" exemption. And if the public policy against racial discrimination is thus imported into the Internal Revenue Code, then so, presumably, are other public policies that can be identified by the service or the courts. Since, for example, there is a clear public policy against discrimination on the basis of sex, it follows very nicely that private boys' schools or schools cannot be tax-exempt-or even, for that matter, religions that refuse to ordain women.

It is doubtful that the present IRS, or even the present D.C. circuit, is about to abopt such a position. But the point is that a staute which permits them to adopt such a position places entirely too much power in their hands. So also does a statute which permits them to convert a ban on racial discrimination to a requirement for quotas or minority scholarships.

The administration is correct that the neat way to solve the former difficulty is to amend the statute to make clear that it does deny tax-exempt status to institutions that discriminate by race, but does not confer a public-policy hunting license upon the IRS and the courts. Events have shown, however, that it is not a politically feasible approach. It would take a long time to explain the *Green* case on the evening news; but it takes only a moment to note that the administration is asserting the current availability of tax exemptions for schools that discriminate.

The only way out is the way we came inthrough the courts. The Supreme Court's 1974 disclaimer of having adopted the Green theory suggests an awareness of the problem. Our prediction is that the Court will preserve the ban on racial discrimination by tax-exempt institutions through reliance on congressional acceptance of that IRS policy displayed in port-Green legislative enactments; but will consign Green itself to the (one would hope) bygone era of runaway judicial activism to which it properly belongs. administration could accommodate itself to that approach—and make the road easier for the Court-by interpreting what now seems to be the almost certain congressional refusal to pass its proposed statute as an affirmation of that legal state of affairs, and by adjusting its legal position accordingly.

Thus the future harm that might be wrought by past judicial activism will be avoided. It should be noted, however, that the past effects will not be undone. By reason of this interplay among the administrative, judicial, and legislative process, Congress will have "voted" to deny the tax exemptions without ever having to face down a filibuster on the issue.

The remaining problem of what the IRS is permitted to demand—or may be required by the courts to demand—as proof of non-discrimination is perhaps more difficult. Its solution will require the continued involvement of our reluctant legislators when the IRS is unduly demanding (as it was in 1978) or, for that matter, unduly lenient. But the courts, we predict, will take themselves out of the action, by returning to the traditional doctrine of standing, which denies citizen A the right to sue to increase citizen B's taxes. Which is to say that the function of the

courts is not to make sure that the laws are faithfully executed, but only to come to the aid of particular individuals whom the law or its execution has harmed. We may be wrong in this prediction—but if so, the constitutional confrontation presented by the 1981 rider to the Treasury appropriations is merely the first of many.

#### AFGHAN FREEDOM FIGHTERS

• Mr. D'AMATO. Mr. President, I rise today in order to express my concern and outrage over events in Afghanistan as well as my support of the Afghan freedom fighters who have sought to repel the Soviet occupation force which has attempted to crush the independent and nationalistic spirit of the Afghan people.

Three years ago this month, an invading army made up of thousands of Soviet combat troops marched into Afghanistan. At the time of the invasion more than 4,000 Soviet military "advisers" were located in the capitol city of Kabul. In addition, scores of Soviet "civilian technicians" were providing assistance to the regime of Hafizullah Amin. Shortly after the airlift of 5, 000 members of a Soviet airborne division to the capitol on December 27, 1979 a bloody coup took place at the Durulaman Palace. In the aftermath, both President Amin and members of his family were killed. Following the coup, the Soviets were instrumental in returning Babrak Karmal to Afghanistan from exile in Eastern Europe. Since the establishment of the puppet government under Karmal, Soviet presence in Afghanistan has increased significantly. Today, nearly 3 years later, 100,000 Soviet troops and advisers remain in this foreign land. Despite the Soviet commitment, of both men and sophisticated arms, the Communist forces have been unsuccessful in breaking the determination of the Afghan people. In light of this standoff, the Soviets have engaged in a most brutal offensive aimed at eliminating the resistance of the freedom fighters who, despite a lack of resources have succeeded in maintaining control over 80 percent of the countryside. While there has been considerable speculation with respect to the use of lethal chemicals by the Soviets and its allies in Afghanistan, Laos, and Kampuchea, a recently released report by the Secretary of State presents compelling evidence to substantiate these claims. The use of such diabolical devices stands in clear violation of both the 1925 Geneva Protocol and the 1972 Biological and Toxic Weapons Convention.

Mr. President, I request that Secretary Shultz' report be included in the RECORD.

The tragic events which have occurred in Afghanistan since the Soviet invasion demand a clear and firm response by the United States in support of the brave men and women who have sacrificed so much in defense of their country. With this in mind, I cosponsored Senate Congressional Resolution 126, expressing the concern of the Congress over the current situation in Afghanistan and the need for U.S. material as well as moral support. While the Afghan freedom fighters have displayed great resilience in the battle to maintain their freedom, it is unreasonable to expect that the resistance movement can continue indefinitely without our support. As we approach the third anniversary of the Soviet invasion of Afghanistan, it is important that we raise our voice in solidarity with the struggling people of Afghanistan.

Mr. President, I request that a series of articles written by Aernout Van Lynden for the Washington Post appear in the Record. Mr. Van Lynden has recently left Afghanistan after 2 months during which he accompanied a group of Afghan freedom fighters.

THE SECRETARY OF STATE,

Washington.
To the Congress of the United States

And Member States of the United Nations: Chemical and toxin weapons are of special concern to mankind. Used against civilian populations, or even against soldiers with protective equipment, they can cause protracted and indiscriminate physical and psychological suffering and, as we witnessed in World War I, widespread death as well. For such reasons, the international community has outlawed the use of these weapons. The 1925 Geneva Protocol, one of the oldest arms control agreements still in force, forbids the use of chemical and biological weapons in war. The 1972 Biological and Toxin Weapons Convention prohibits the mere possession of toxin weapons. In an effort to extend such legal constraints still further, the United States-together with other countries in the Committee on Disarmament at Geneva-is seeking an outright ban on the development, production and stockpiling of chemical weapons.

I regret, then, to report that chemical and toxin weapons are nevertheless being used today in Laos, Kampuchea and Afghanistan by the Soviet Union and its allies. In March of this year, we reported on this subject to the Congress, the United Nations, and to the members of the international community. Our report, which contained a comprehensive and detailed compilation of the evidence available to the United States Government, was designed to bring the issue to the attention of the world community. In presenting it, we invited others to join us in examining the evidence and in confirming

the truth.

These efforts have not led the Soviets and their allies to halt their illegal use of chemical and toxin weapons. Instead, they continue to deny the truth about their illegal activities. The world cannot be silent in the face of such human suffering and such cynical disregard for international law and agreements. The use of chemical and toxin weapons must be stopped. Respect for existing agreements must be restored and the agreements themselves strengthened. Respect for the dignity of humanity must be restored. Failure to achieve these goals can only have serious implications for the security of the world community, particularly for the security of smaller nations, like

those whose people are being attacked. If such basic elements of human rights can be so fundamentally ignored, how can we believe any pledges to respect human rights?

All who would seek to promote human rights, and all who would seek to maintain the credibility of international agreements, have a duty to call world attention to the continuing use of chemical and toxin weapons, and to seek a halt to their use. It is for this purpose that the United States provides the following report.

Sincerely,

GEORGE P. SHULTZ.

CHEMICAL WARFARE IN SOUTHEAST ASIA AND AFGHANISTAN: AN UPDATE

(Report from Secretary of State George P. Shultz, November 1982)

#### UPDATED PINDINGS

Based on a thorough analysis of this new information, we are able to conclude the following:

Reports of chemical attacks from February through October 1982 indicate that Soviet forces continue their selective use of chemicals and toxins against the resistance in Afghanistan. Moreover, new evidence collected in 1982 on Soviet and Afghan Government forces' use of chemical weapons from 1979 through 1981 reinforces the previous judgment that lethal chemical agents were used on the Afghan resistance. Physical samples from Afghanistan also provide new evidence of mycotoxin use.

Vietnamese and Laos troops, under direct Soviet supervision, have continued to use lethal and incapacitating chemical agents and toxins against the H'Mong resistance in

Laos through at least June 1982.

Vietnamese forces have continued to use lethal and incapacitating chemical agents and toxins against resistance forces in Kampuchea through at least June 1982.

Trichothecene toxins were found in the urine, blood, and tissue of victims of "yellow rain" attacks in Laos and Kampuchea and in samples of residue collected after attacks.

We continue to find that a common factor in the evidence is Soviet involvement in the use of these weapons in all three countries. Continued analysis of prior data and newly acquired information about Soviet mycotox in research and development, chemical warfare training in Vietnam, the presence of Soviet chemical warfare advisers in Laos and Vietnam, and the presence of the same unusual trichothecene toxins in samples collected from all three countries reinforce our earlier conclusion about the complicity of the Soviet Union and about its extent.

#### INTRODUCTION

Our March study showed that casualties and deaths resulted from chemical attacks in Southeast Asia and Afghanistan and that trichothecene toxins were used in both Laos and Kampuchea. The new evidence shows that these attacks are continuing in all three countries and that trichothecene toxins have been used in Afghanistan as well.

The same rigorous analytical processes employed in our March study, and outlined in detail there, were followed to arrive at the judgments contained in this update. In light of the widespread publicity given the March report, special efforts were made by U.S. Government analysts to preclude being led astray by any possible false reports that might be generated for propaganda or other purposes and to eliminate the possibility of making erroneous judgments about the

chemical or toxin agents involved because of tampering or improper handling. Every

report has been carefully checked.

The evidence in the March study was based on a broad range of data, including testimony by physicians, refugee workers, journalists, and others. Although some of the new reports are anecdotal, we have been able to corroborate most of them by other sources and sample analysis. Moreover, personal testimony tends to add credence to other accounts which, taken together, form a coherent picture. The material presented in this report represents only a relatively small amount of the total accumulated evidence. This additional information is examined in greater detail in the annexes. Improved sample collection procedures, better quality of medical histories and physical examinations, documentation including photographs of lesions and hospital charts from Southeast Asia, and interviews by trained personnel have reinforced our earlier conclusion and led to new discoveries

As international concern about this subject has increased, based on the development of evidence from many countries, independent analyses have been initiated by foreign chemical warfare experts, physicians, journalists, and independent nongovernmental scientists and laboratories. Analysis in the United States have found this research very helpful both in supporting their own conclusions and, more importantly, in

expanding on them.

## SUMMARY OF EVIDENCE Afghanistan

Evidence indicates that the Soviets have continued the selective use of toxic agents in Afghanistan as late as October 1982. For the first time we have obtained convincing evidence of the use of mycotoxins by Soviet forces through analyses of two contaminated Soviet gas masks acquired from Afghanistan. Analysis and quantification of material taken from the outside surface of one mask have shown the presence of trichothecene mycotoxin. Analysis of a hose from a second Soviet mask showed the presence of several mycotoxins. In addition, a vegetation sample from Afghanistan shows preliminary evidence of the presence of mycotoxins. (See Annex A.)

Our suspicions that mycotoxins have been used in Afghanistan have now been confirmed. Reports during 1980 and 1981 described a yellow-brown mist being delivered in attacks which caused blistering, nausea, vomiting, and other symptoms similar to those described by "yellow rain" victims in Southeast Asia. Because of limited access to survivors who still exhibited symptoms, as well as great difficulties in collecting environmental and other physical samples from attack sites, we were unable to conclude with certainty in the March 22 report that mycotoxins were being used in Afghanistan. We have now concluded that trichothecene mycotoxins have been used by Soviet forces in Afghanistan since at least 1980.

A number of reports indicate that chemical attacks are continuing in 1982. While we cannot substantiate every detail, the pieces of evidence in these reports add up to a consistent picture. For example, a physician in a facility treating casualties among the mujahidin (resistance fighters) has reported that he treated 15 mujahidin red skin lesions that he said were caused by Soviet chemical attacks in Qandahar Province in May-June 1982. Three mujahidin died within 12 hours of one attack in the general area of Maharijat south of Qandahar. The mujahidin claimed that Soviet helicopters

fired rockets that emitted black, yellow, and white gases on impact. The physician said that the surviving victims failed to respond to conventional medical treatment.

We have received reports that on September 20, 1982, Soviet soldiers poisoned underground waterways in Lowgar Province south of Kabul where the mujahidin were hiding. According to a mujahidin commander in Pakistan, a similar event occurred in the same province on September 13, 1982, resulting in the deaths of 60 adults and 13 children. These two independent accounts described a Soviet armored vehicle pumping a yellow gas through a hose into the waterways. 1

According to the accounts of the September 1982 attacks, the victims' bodies decomposed rapidly, and the flesh peeled away when attempts were made to move the bodies. Since 1979, mujahidin resistance leaders, refugees, journalists, and Afghan defectors have described chemical attacks causing almost indentical symptoms. Most reports have described the skin as being blue-black after death. Although such symptoms seem bizarre, the large number of reports from a variety of sources since 1979 suggests that they cannot be dismissed (see our March 22 report, p. 16).

In 1982, a Soviet soldier who defected to the mujahidin said in an interview with a British journalist that a Soviet toxic agent, termed "100 percent lethal," causes the flesh to become very soft. The Soviet defector stated that the Soviets maintained stores of "picric acid" (probably chloropicrin, a potentially lethal tear gas), the "100 percent lethal" agent, and an incapacitating agent near the cities of Qonduz and Kabul. The defector also reported that:

Unidentified toxic agents had been used in June 1982 on the highway between Termez and the Salang Pass north of Kabul;

The "100 percent lethal" agent was delivered by rockets; and

"Picric acid" and an incapacitating agent were delivered by air-dropped canisters.

The defector stated that the Soviets have been preoccupied with protecting the roads and that chemicals were sprayed by planes along the areas adjacent to highways. Chemical grenades reportedly have been used, but the data are inadequate to allow us to hypothesize about the contents, although some symptoms are indicative of mycotoxins.

The reports of rapid skin decomposition as quickly as 1-3 hours after death continue concern us. There is no recognized class of chemical or biological toxin agents we know of that could affect bodies in such a way. If we assume occasional inaccuracies in reporting by journalists and survivors of attacks, it is possible that phosgene or phosgene oxime could cause such effects after 3-6 hours but with much less softening of tissues than is consistent with stories of "fingers being punched through the skin and limbs falling off." The reported medical effects of other toxic agent attacks are consistent with use of the nerve agent tabun. We have information that both phosgene oxime and tabun are stored by the Soviets in Afghanistan.

The British journalist, who interviewed the Soviet defector, also reported on two attacks described to him by the *mujahidin*, which have not yet been confirmed. One was an attack in the spring of 1982 on Kaiba, where Soviet soldiers reportedly shot victims already rendered unconscious by a gas; the other was in the summer of 1982 near Herat where Soviet troops reportedly loaded the bodies from a gas attack onto a truck and removed them. Reliable information indicates that the Soviets used chemical bombs against mujahidin forces in late September 1982 and in early October 1982 in Baghlan Province.

Our earlier findings are reinforced by several reports received this year about earlier attacks not covered in our March report:

According to a former Afghan Army officer, in September 1981 a Soviet helicopter sprayed a yellow mist in Paktia Province (Sheikn Amir) causing 16 deaths. The survivors had bloody noses and tears; extensive bleeding was reported in those who died. The Afghan officer described a similar attack in Nangarhar Province during the same month in which four persons were killed.

In early December 1981, according to interviews with survivors, 15 refugees attempting to escape to Pakistan were attacked by a helicopter using gas; four or five people were killed (the youngest and the eldest), while the rest became unconscious for 5-6 hours. The attack occurred about 60 kilometers northwest of Jalalabad.

According to a Soviet soldier who served in Afghanistan in 1980 and personally observed the use of chemical weapons, the Soviets dispersed chemicals from fighter-bombers and assault helicopters. He said that an aircraft or helicopter first would drop a container and then, on a second run, drop a bomb, resulting in a mixture of two different chemicals that killed everything within the contaminated area. We believe that the soldier may have been describing the delivery of two separate chemical agents, an occurrence described by other eyewitnesses.

An Afghan veterinarian recently has described an incident in May 1979 in which 20 people and a number of sheep were killed near Qandahar. Soviet lab technicians explained that the incident resulted from anthrax, but the doctor knew that the explanation did not fit the effects observed. Local Afghans told the veterinarian that Soviet vehicles had been in the area spraying a yellow/white powder before the incident.

In June 1980, an airport official described seeing 200-300 gas containers painted in greens and browns at Qandahar Airport. The containers averaged 35-40 inches high and 26-30 inches in diameter. A subordinate reported three types of gases in the containers: one causing burning in the throat as well as suffocation; one causing what looked smallpox and blistering; and one making victims tired and sleepy and unable to run or fight. Further, the subordinate stated that the containers were placed in special casings that were dropped from aircraft and exploded on impact, emitting a large cloud of smoke, usually yellow but sometimes other colors. He said he had heard mujahidin describe these gas attacks and had himself seen animals that had been killed by the gases. We lend credence to this report because we know from other evidence that chemicals are stored at Qandahar Airport, which is an important staging area for Soviet military operations.

Finally, information received this year revealed that a Soviet adviser inspecting sites for housing Soviet troops before the Afghan invasion indicated that Soviet chemical de-

We know from other sources that Soviet chemical agent delivery methods include this technique, as reported, for example, by a Cuban emigre trained by the Soviets in the use of chemical weap-

fense forces entering Afghanistan would bring in extensive stores of toxic materials. The adviser indicated that a proposed garrison in Kabul would be inappropriate for the Soviet chemical defense unit because the materials it transported could devastate the city if an accident occurred.

#### Laos

H'Mong refugees, recounting details of toxic agent attacks and exhibiting severe medical symptoms from exposure to the agents, fled to Thailand every month from January through June 1982. They brought out more samples contaminated by a yellow, sticky substance described as a "vellow rain dropped by aircraft and helicopters on their villages and crops. We have preliminary reports on attacks as recent as October 1982. We now know that the yellow rain contains trichothecene toxins and other substances that cause victims to experience vomiting, bleeding, blistering, severe skin lesions, and other lingering signs and symptoms ob-served by qualified physicians. Experts agree that these people were exposed to a toxic agent and that no indigenous natural disease, plant, or chemical caused these unique physical effects.2

Laboratory analyses of blood samples from these victims and studies on experimental animals have shown that trichothecene toxins are retained in the body for much longer periods of time than previously thought. Scientific research has shown that the multiple-phase distribution pattern in animals includes a secondary half-life of up to 30 days. We believe that the severe skin lesions observed on victims by doctors are also relevant. Victims whose blood proved on analysis to have high levels of trichothere.

cene mycotoxins exhibit such skin lessions.

Descriptions of the 1982 attacks have not changed significantly from descriptions of earlier attacks. Usually the H'Mong state that aircraft or helicopters spray a yellow rain-like material on their villages and crops. In some reports the symptoms are similar to those described in our March 22 study, and we attribute them to the use of trichothecene toxins. However, in many cases there was no bleeding, only abdominal pains and prolonged illness. These symptoms, described in previous years, suggest that another agent or combination of agents is still being used. The explanation is complicated because different symptoms are ascribed to men, women, children, and animals. It is possible that different agents, lower concentrations of the same agents, or climatic conditions have affected the efficacy of the agents.

Medical personnel in Laos refugee camps in Thailand were much better organized in 1982 to screen victims than in past years. Doctors now routinely use extensive questionnaires and conduct comprehensive medical examinations, including some onsite, preliminary blood analysis. Skilled paramedical personnel oversee preparation of blood and serum samples for proper transport and shipment to the United States or other countries for chemical analysis. Some patients with active symptoms are now being monitored extensively over time.

A number of blood samples have been collected from Laos for analysis in the United States. All biological specimens were drawn by qualified medical personnel, and samples were refrigerated until analyzed in the United States. Analysis of these samples shows that trichothecene mycotoxins continue to be used against H'Mong villages. In addition to blood and urine specimens from victims exposed to chemical warfare, we have collected additional physical samples this year. These physical samples consist of more residue of yellow rain containing mycotoxins from the same attacks that yielded human biological specimens positive for these same toxins. (See Annex A.)

The number of reported attacks in Laos in 1982 did not differ significantly from the frequencies reported for comparable periods in the years 1977 through 1981. Reported fatalities per attack during 1981 and 1983 showed an apparent decrease, suggesting the possibility that less lethal toxic agents, or lower concentrations of the same agents, are now being used. This apparent decrease, however, was not statistically significant and could have been caused by a number of other factors, including the following:

Due to emigration and the high number of fatalities since at least 1976, the H'Mong were living in smaller, more scattered communities.

H'Mong survivors still in Laos were warier and quicker to take cover and to use redimentary protective measures at the first sign of attack.

The H'Mong were not taking time to count victims—this is supported by the existence of very few reports that indicate the precise number of people affected by a toxic agent attack.

As stated in the March report, the Soviet Union maintains in Laos significant numbers of advisers who provide maintenance assistance, technical support, and training in both conventional and chemical warfare. A former Laos transport pilot who defected early this summer has described the aerial movement, under Soviet supervision, of toxic agents within Laos.

#### Kampuchea

Most reports of toxic attacks in Kampuchea for the period 1978-June 1982 come from Democratic Kampuchean (DK) sources, including interviews with DK military personnel. Evidence from other sources confirmed most of these reports. In 1982, most reported attacks occurred near the

Thai border, making it easier to obtain samples and other direct evidence of toxic agent

In the first 6 months of 1982, the number of reported toxic agent attacks in Kampuchea was about half the number reported during the same periods in 1980 and 1981. The number of reported deaths per attack also decreased, but data were insufficient to determine if this decrease was statistically significant. We also have preliminary reports on attacks through early November 1982.

In February and March 1982, several attacks occurred just across the Kampuchean border in Thailand, Analysis of samples collected from the attacks was performed in Canada, Thailand, and the United States. Although differing sampling techniques give rise to significant sampling error and lead to slightly different analytical results, both the U.S. and Thai analysts, using dif-ferent analytical techniques, found trichothecene mycotoxins in their samples.3 The Canadian team investigating these attacks has published a detailed medical as-sessment of the victims' symptoms; it concluded that illness had in fact occurred and was caused by a toxic agent, although preliminary tests for trichothecenes proved inconclusive in the Canadian sample.

Blood and urine samples from Kampuchean victims of a toxic agent artillery attack on February 13, 1982, contained trichothecene toxins (Annex A). In addition, post-mortem tissue from a victim of this same attack confirmed the presence of trichothecene toxins (Annex B). Analysis of additional samples showing the presence of trichothecenes taken from other attacks is also found in Annex A.

The Vietnamese conducted toxic agent attacks this year against another resistance group, the Kampuchean People's National Liberation Forces. On several occasions in March-May 1982, the resistance camp at Sokh Sann was hit with toxic artillery shells and bombs. Samples of contaminated vegetation and yellow residue from these attacks are now being analyzed. Attacks occurred in Kampuchea through June 1982, providing new samples; qualitative tests indicate that the presence of trichothecenes is probable. The results of confirmatory analyses are pending.

Several Vietnamese military defectors from Kampuchea have provided valuable information in 1981 and 1982 on chemical weapons use and on the Vietnamese chemical warfare program and have reported that some types of agents are supplied by the Soviet Union. Information from other sources also confirms our earlier view that the Vietnamese possess toxic agent munitions and are equipping their own troops with additional protective equipment.

#### ANNEX A

#### ANALYSIS OF SAMPLES FOR CHEMICAL WARFARE AGENTS AND TOXINS

The identity of the agents and toxins being used in Laos, Kampuchea, and Afghanistan cannot be determined without collection and analysis of at least one of the following: environmental or physical samples contaminated with agent, the munitions used to deliver agents, or biological specimens from attack victims.

The likelihood of detection of chemical agents and toxins in contaminated samples depends on a number of factors. These include the persistency of the agent; the ambient temperature; rainfall; wind conditions; the media on which the toxic agent was deposited; and the time, care, and packaging of the sample from collection to laboratory analysis. Many standard chemical warfare agents and toxins disappear from the environment within a few minutes to several hours after being dispersed. These include, for example, the nerve agents sarin and tabun, the blood agents hydrogen cyanide and cyanogen chloride, the choking agents phosgene and diphosgene, and the urticant phosgene oxime. Other standard agentssuch as the nerve agents XV and thickened soman and the blistering agents sulfur mustard, nitrogen mustard, and lewisite-may persist for several days to weeks depending on weather conditions. The trichothecene toxins are stable under laboratory conditions but degrade in field samples due to metabolism by micro-organisms contained in the sample. To maximize the chances of detection, sample collections should be made as rapidly as possible after a toxic agent assault; with many agents this means minutes to hours. Given the situation in Southeast Asia and Afghanistan, this usually has not been possible. Although numerous samples were collected, few held any realistic prospects for yielding results. However, when immediately collected and properly handled and using the advanced technology now available, trichothecenes may be detected in both physical and biological materials up to several months after the attack.

Samples have been collected from Southeast Asia since mid-1979 and from Afghanistan since May 1980. To date, more than 350 individual samples—of greatly varying types and utility for analytical purposes—have been collected and analyzed for the presence of traditional chemical agents. About 100 additional samples are pending completion of analysis. All environmental and nonmedical samples were submitted to the U.S. Army Chemical Systems Laboratory for analysis for traditionally recognized chemical warfare agents and other toxic materials. Tissue specimens and body fluids from attack victims were submitted to the Armed Forces Medical Intelligence Center. Under the sponsorship of that organization, the biomedical specimens were analyzed for the presence of trichothecene mycotoxins and

<sup>—</sup> Undermined.

Phou Bia refers to mountain area where H'Mong villages are located

Samples from this attack contained mycotoxin (see Annex A).

attack contained mycotoxin (see Annex A) etailed analysis of autopsy results of the vi

other toxins by Dr. Chester Mirocha, University of Minnesota; Dr. Joseph Rosen, Rutgers University; and Dr. Tim Phillips,

Texas A&M University.

To date, biomedical samples (blood, urine, and/or tissue) from 33 alleged victims have been screened. Specimens from 16 of these individuals show the presence of trichothecene mycotoxins. In addition, six environmental samples from alleged attack sites have been analyzed by Dr. Mirocha. Five show the presence of unusually high concentrations and combinations of trichothecene mycotoxins.

#### EVIDENCE OF CHEMICAL AND TOXIN AGENT USE IN SOUTHEAST ASIA AND AFGHANISTAN, 1982

	mulabathasana taula
	Trichothecene toxin.
Vegetation	Trichothecene toxin.

Details concerning samples analyzed since the March report—including the circumstances of their collection, analysis, and the results—are provided in this annex. Results of analysis of earlier samples were included in our March 22, 1982 report.

### POSITIVE SAMPLE RESULTS

#### Afghanistan

One-quarter of the external surface of a Soviet gas mask, obtained near Kabul in September 1981, was recently processed for analysis, employing techniques not previously used, and showed the presence of T-2 toxin. This analysis has been verified by two other laboratories. Similar analysis of material from the hose connections of another Soviet gas mask removed from a dead Soviet soldier in December 1981 in Afghanistan is indicative of the presence of the trichothecene toxins, T-2, DAS, verricarol, and another type of mycotoxin-zearalenone. It is believed that these protective masks were worn during operations in which a toxin agent was used.

Preliminary analysis of a third sample acquired in February 1982 also indicates the presence of trichothecenes.

#### Laos

(1) Blood samples were drawn from an ill H'Mong couple on March 21, 1982, by a physician in the Ban Vinai refugee camp. The victims were exposed to toxin agent attacks on November 11, 1981, and January 4, 1982. They remained ill and under treatment on March 21, 1982, when blood samples were obtained. During the November 1981 attack, an aircraft sprayed a yellowish agent. Although no one died in the village, symptoms such as bloody diarrhea were experienced by most of those exposed. In the January 1982 attack, a greenish chemical was

sprayed from an airplane. Vomiting with blood, bloody diarrhea, blurred vision, chest pain, eye irritation, and skin rash were reported. Lingering effects included rash, pain in the joints, and fatigue. The blood samples were analyzed for three trichothecene toxins: DAS, T-2 and HT-2. The blood sample from the male was found to contain 13.5 ppb T-2 toxin. The female was negative for all toxins analyzed.

CONGRESSIONAL RECORD—SENATE

(2) Three blood samples were drawn by a U.S. physician on April 17, 1982, from three H'Mong refugees: Bloc Her, an 8-year-old boy; Tong Her, a 6-year-old boy; And Xia Sue Xiong, a young girl. They were among a group exposed to a toxic agent attack in late March 1982 in Laos. The agent used was described as being yellow to reddish brown. It was sticky and dried to a powder. Bloc Her had been severely ill with bloody diarrhea and coughing of blood. Xia Sue Xiong was suffering from bloody diarrhea and abdominal pain. The blood samples were analyzed for three trichothecene toxins: DAS, T-2, and HT-2.

#### TRICHOTHECENE TOXIN ANALYSIS

Victim	DAS	T-2	HT-2
Bloc Her Tong Her Xia Sue Xiong	Negative Negative	Negative	Negative 296 ppb. Negative.

ppb=parts per billion.

(3) Post-mortem blood samples were taken from a 25-year-old H'Mong refugee who had been admitted earlier to a refugee hospital at Ban Vinai, Thailand. Just before death he had suffered from a massive gastrointestinal hemorrhage. He had claimed exposure to a toxic agent attack sometime earlier in Laos. The blood was drawn in the hospital on April 17, 1982, and analyzed for three trichothecene toxins: DAS, T-2, and HT-2.

#### TRICHOTHECENE TOXIN ANALYSIS

Specimen	type	DAS	T-2	HT-2
Heoarinized	blood	Negative	15ppb	19 ppb.

(4) Blood was drawn on April 6, 1982, from Neng Xiong, a H'Mong refugee in Thailand. She was suffering from the effects from a toxic agent attack that occurred in Phou Bia, Laos, on March 25, 1982. The entire population of the village (40 families) suffered from vomiting, fever, backaches, headaches, and chest pain after a helicopter dropped a yellowish agent. Many villagers also developed swollen eyes. It was reported that one woman and several animals died. Neng Xiong's blood was analyzed for three trichothecene toxins: DAS, T-2, and HT-2.

#### TRICHOTHECENE TOXIN ANALYSIS

Specimen type	DAS	T-2	HT-2
Heparinized blood Nonheparinized blood.	Negative	100 pob	8 ppb. 34 ppb.

(5) A H'Mong refugee reported being subjected to a toxic agent attack on March 17, 1982, in Phou Bia, Laos. The agent, which "looked like yellow rain," was sprayed by a helicopter at low altitude. The sticky yellow spots dried to a powder in 3-4 hours. Immediately after the attack, the victim developed stomach and chest pains and vomited. Vomiting with blood began later and continued over the next 24 hours. Other symp-

toms included headache, shortness of breath, dizziness, eye irritation, and vision disturbances. The refugee also developed a rash and blisters. Blood samples were drawn by a physician at Ban Vinai refugee hospital in Thailand on March 31, 1982. The samples were analyzed for three trichothecene toxins: DAS, T-2, and HT-2.

#### TRICHOTHECENE TOXIN ANALYSIS

Specimen types	DAS	T-2	HT-2
Heparinized blood Non-Heparinized blood.	Negative	19 ppb	Negative. 2 ppb.

(6) Results of analysis of two environmental samples from attack sites in Laos were reported in our March 22 report and are not repeated here. An additional set of environmental samples taken from an allegedly contaminated area in Laos near Phu He was obtained for analysis. Although symptoms were manifested in individuals collecting and handling the sample, no trichothecenes were detected upon analysis.

#### Kampuchea/Thailand

(1) On February 13, 1982, at least 100 Kampuchean soldiers were subjected to an artillery-delivered toxic attack by Vietnamese forces and became ill. The attack took place near the village of Tuol Chrey in an area north of Khao Din, about 300 meters from the Thai-Kampuchean border. One individual subsequently died (see autopsy results, Annex B). Reported symptoms included burning eyes, blurred vision, shortness of breath, chest pains, vomiting, and vertigo. Some victims also trembled and generally felt weak. Blood and urine samples were taken from a number of victims at various times after the attack as well as from a control group of individuals living under similar conditions but not subject to the toxic agent attack. Blood and urine samples from the control group were negative for all analyzed toxic agents, including trichothecene toxins.

On February 14, 1982, 1 day after the attack, blood samples were taken from two victims: Pen Nom and Prek Reth. On February 15, a urine sample was taken from Pen Nom, while on February 16, a urine sample was taken from Prek Reth. Both blood and urine samples were analyzed for the presence of the trichothecene mycotoxins T-2 and HT-2.

#### TRICHOTHECENE TOXIN ANALYSIS

Victim	Specimen	T-2	HT-2
Prek Reth	Blood	18 ppbnegative	22 ppb negative.
Pen Nom	Bloodurine	11 ppbtrace	10 ppb 18 ppb.

On March 4, 1982, 19 days after the incident, some victims still showed effects of the attack and were being treated in Nong Pru hospital in Kampuchea. Further blood samples were drawn at that time from Prek Reth and five additional victims.

#### Trichothecene toxin analysis

Victim	T-2 Toxin
Prek Reth	Negative.
Kin Ving	7 ppb.
Mau Sereth	Negative.
Seng Nem	Negative.

Victim T-2 Toxin Ching Soeum ...... Negative. Chem Ron ...... 3 ppb.

Analysis of tissue samples from a victim of the February 13 attack is described in

(2) On March 5, 1982, a small Vietnamese aircraft sprayed a white powder in an area near Pailin, Kampuchea. On March 6, 1982, 10 of a group of 15 Kampucheans were unable to continue walking due to illness after passing through the area. Symptoms included nausea, vomiting, shortness of breath, blurred vision, diarrhea, bloody discharge from the nose, and burning sensa-tion in the chest and abdomen. A second attack occurred on March 7, 1982, when some of the same Kampucheans were subjected to Vietnamese toxic artillery shelling. The agent produced nausea, dry mouth, and blurred vision and also caused loss of consciousness and muscle twitching. Despite medical treatment, a number of the victims

Samples were taken from three survivors exposed to the contaminated area on March 6 and 7. Blood and urine were taken on March 13, 1982.

#### TRICHOTHECENE TOXIN ANALYSIS

Victim	Specimen 1	DAS	T-2	HT-2
Neung Hon	Urine	Negative	5 ppb	2 ppb. Negative.
Chan Saran	Urine	Negative	4 ppb Negative	1 ppb. 8 ppb.
Bun Thoeum	Urine	Negative	22 ppb Negative	7 ppb. Negative.

<sup>&</sup>lt;sup>1</sup> Blood samples was heparinized.

(3) A sample of contaminated vegetation was obtained following spraying by a Vietnamese aircraft in Pong Nam Ron District near the Thai-Kampuchean border on February 19, 1982. Analysis of this sample for known chemical agents was negative. However, the trichothecene toxin T-2 was present at a level of 86 ppb. DAS was also present at 30 ppb. The sample was of insufficient size to analyze accurately for the toxins nivalenol and deoxynivalenol.

#### ANNEX B

#### AUTOPSY RESULTS OF A CHEMICAL WARFARE ATTACK VICTIM IN KAMPUCHEA

Chan Mann was one of several victims of a February 13, 1982, toxic agent attack in the area of Khao Din. The victim, being treated at Nong Pru Hospital, reportedly made a brief recovery on March 12 and 13, followed by a relapse when he became anuric, fever-ish, restless, and slightly jaundiced. On March 17, he lapsed into a coma and died. A urinary catheter was inserted approximately 4 hours before death, but only minimal blood-tinged urine was obtained. Shortly before death the victim vomited blood. Kampuchean physicians performed a necropsy. Tissue sections of heart, esophagus/ stomach, liver, kidney, and lung were taken and fixed in formaldehyde. Tissue samples were given to both U.S. and Canadian officials for analysis.

The samples delivered to the United States were submitted to several U.S. laboratories for gross, microscopic, histopathological, and chemical-toxicological analysis.

RESULTS OF ANALYSIS OF TISSUE SAMPLES FOR DAS, T-2, AND HT-2TH 1

Material	Amount (g)	Toxins detected		
		DAS 2	T-2	HT-2
Heart Stomach	7.9 13.5 9.5		(a)	1 ppm. 4 ppm.
Kidney Lung	10.4 4.5 5.3	3 ppm 4	7 ppb	10 ppb.

DAS (Diacetoxyscirpenol), a trichothecene toxin; T-2, a trichothecene toxin; HI-2, a metabolic product of T-2.
 DAS was used as internal standard—i.e., DAS was added to each tissue sample as a standard to check accuracy of analysis. Only the kidney had a concentration of DAS greater than the amount added.
 Toxins were not detected. Concentration of DAS was no greater than the

dogenous DAS in sample detected in concentration greater than the

Note: Tissues were analyzed for trichothecene toxins by Dr. C.J. Mirocha, University of Minnesota. A parallel analysis performed by Dr. J. Rosen, Rutgers University, also revealed the presence of high levels of trichothecene toxins.

A high incidence of natural aflatoxin contamination of food in Southeast Asia has been well documented. Linderfelser and coworkers (1974) have shown that aflatoxin and T-2 toxin in combination have a synergistic effect and, therefore, it was of interest to determine the extent of aflatoxin in tissue of this individual

#### RESULTS OF ANALYSIS OF SAMPLES FOR AFLATOXIN

	Weight of sample (g)	Sample	
Material		Actual (ng/ g) I	Adjusted <sup>2</sup> (ng/g)
Stomach Liver	3.04 3.00 7.50 3.02	19.8 20.2 15.3 11.2	22.5 23.2 17.4 12.7

<sup>1</sup> Nanograms per gram, <sup>2</sup> Values adjusted on basis of 88 percent recovery—that portion of aflatoxin found when a known amount is added to the sample.

Note: Aflatoxin analyses were conducted by Dr. Phillips, Texas A&M niversity.

Levels of aflatoxin detected in the tissues were so high that it seemed prudent to investigate the possibility that this individual exposure to aflatoxin was not due to a natural contamination but may have been related to the chemical attack. To this end, portions of the sample of yellow rain from Laos previously shown to contain 143 ppm of T-2 toxin and 27 ppm of DAS were submitted to Dr. Mirocha and Dr. Phillips for analysis for aflatoxin B1. Independent thin-layer chromatography and high-performance liquid chromatography analyses were negative for aflatoxin, supporting a hypothesis that this toxin is not always a component of a yellow rain sample and that the victim's exposure to aflatoxin may have been due to contamination of the food source. It does not, however, rule out the possibility that aflatoxin is a component of some yellow rain attacks. Preliminary analysis of some more recent yellow rain samples indicates the presence of aflatoxin in these tissues is important since the high incidence of exposure to natural outbreaks of aflatoxin contamination in Southeast Asia may induce a greater susceptibility to trichothecenes in this population.

Portions of each tissue sample were submitted to Dr. Charles Stahl, University of Tennessee Medical School. histopathological examination. A summary of the pathology found included: hemorrhage into the heart tissue with evidence of cell destruction and inflammation, cirrhosis of the liver, hemorrhage and cellular de-struction of kidney tubules, hemorrhage in the bronchi, and congestion and destruction of the lung. The details of these results and similar findings by other pathologists are consistent with results and similar findings by other pathologists are consistent with results of analysis of animals exposed to trichothecenes.

No single post-mortem finding proves cause and effect of toxin exposure and death, but these data taken together provide objective evidence that:

Reports from witnesses of vellow rain attacks are valid and that bleeding sometimes occurs in the lung, stomach, intestine, and kidney or bladder.

Persons already debilitated by disease or exposure to other toxins have a greater risk of death from trichothecene toxicosis.

Microscopic examination shows tissue damage occurs in humans after moderate-to-heavy exposure to trichothecenes. The damage is similar to that found in experimental animals.

Microscopic damage persists for 1 month or longer.

Trichothecenes are known to cause longterm damage to rapidly dividing tissue. These toxins accumulate and persist at least in the organs that were examined.

Aflatoxin found in the tissues may be foodborne and is not necessarily a component of the yellow rain substance. However, aflatoxins and trichothecene toxins act synergistically, and they could be components of a toxic crude extract mixture. Emerging data from several sources lend credibility to such a hypothesis; therefore, investigation seems warranted.

#### ANNEX C

#### DISCUSSION OF ANALYTICAL FINDINGS 4

The finding of T-2 toxin and HT-2 toxin in blood, urine, and tissue samples from yellow rain victims is highly significant in view of the fact that no trichothecenes could be detected in similar samples from the control population who were not exposed to yellow rain. The finding of such high levels of trichothecenes weeks after exposure is surprising and raises questions concerning the distribution, metabolism, and excretion of these toxins as well as their long-term effects.

limited research concerned with elimination rates of the trichothecenes has been conducted. Ueno, et al., 1971, reported that orally administered fusarenon-x was rapidly distributed to the tissues and reached peak levels by 3 hours after dosing. The kidney was believed to be the major organ of excretion. Matsumoto, et al., 1978. conducted studies with T-2 toxin which led him to conclude that the liver and biliary system were the major organs of T-2 excretion. Chi, et al., 1978, administered oral doses of T-2 to broiler chickens. Peak tissue levels were reached by 4 hours after dosing, and the liver contained the greatest amount of toxin. By 12 hours after dosing, however, the muscle, skin, and bile contained the highest amounts of detectable toxin. By 48 hours, 82% of the administered dose had been excreted. Robinson, et al., 1979, showed that T-2 toxin was excreted into cow milk at levels up to 160 ppb after daily administration of 0.6 mg/kg doses

Studies concerned with metabolism of the trichothecenes have also been limited in

<sup>\*</sup>Based on excerpts from a paper by Dr. C. J. Mirocha and Dr. S. Watson, presented at an international symposium on mycotoxins in Vienna on Sept.

number. Yoshizawa, et al., 1980, reported that in rat liver in vitro studies with the S-9 fraction of rat liver homogenates, HT-2 made up 50% of the metabolic products. Other metabolites included TMR-2 (19%), TMR-2 (2%), and T-2 tetraol (4%). In in vivo studies, HT-2 was one of the major products eliminated in the excreta of chickens (Yoshizawa, et al., 1980) as well as urine, feces, milk, and blood of dairy cattle (Yoshizawa, et al., 1981).

The finding of T-2 toxin and HT-2 in the blood and tissue of humans weeks after their exposure to the toxins would seem to indicate that enough toxin remains bound in body tissues to allow detection by sensitive instrumentation. Trichothecenes have been shown to bind to ribosomal proteins (Ueno, 1975) and to react with sulfhydryl containing compounds such as glutahione (Foster, et al., 1975) and with proteins such as albumin (Chu, et al., 1979). It would appear that although most of the toxin would normally be expected to be excreted within 48 hours after exposure, small amounts of the toxin and its metabolites remain bound to body tissues for much longer periods. The size of the dose administered and the route of exposure may have a significant effect on the proportion bound, since a sudden, rapidly absorbed, massive dose may overload normal excretion and detoxification mechanisms, resulting in greater tissue binding of the toxin. Similar apparent long-term storage of mycotoxins has been reported previously for aflatoxin B. Although most of the administered dose of aflatoxin is rapidly metabolized, Shank, et al., 1971, demonstrated in studies of monkeys that unmetabolized aflatoxin B could be detected up to 6 days after administration of a sublethal dose.

Additional significant findings lie in the trichothecenes found in the leaf samples (T-2, DON, nivalenol) and yellow powder (T-2, DAS). The concentrations found and their combination are not normally found in nature and it would appear that these mycotoxins found their way into the environ-ment by the intervention of man. The most compelling evidence is the presence of T-2 and DAS in the yellow powder. Both toxins are infrequently found in nature and rarely occur together. In our experience copious producers of T-2 toxin (F. Tricinctum) do not produce DAS and, conversely, good producers of DAS (F. reoseum 'Gibbosum') do not produce T-2. This is also supported by our experience that a good producer of DON does not produce T-2 or DAS but could produce nivalenol. Thus, we have more than just the quantity of toxins produced to explain, but also the kinds that respective species and their isolates produce. Theoretically, it is possible to genetically manipulate or select an isolate that would produce copious amounts of two or more of these toxicants, but this would require a sophisticated research effort and sophisticated technology based on experience.

It is difficult to explain the presence of trichothecenes on leaf surfaces. Fusarium is not a leaf pathogen, and so we would not expect it to colonize leaves indiscriminately. Fusarium does colonize the roots and vascular tissue (causes wilt diseases) of some plants, and it would have to produce the toxins in situ and translocate them to the leaves. This has never been demonstrated in the pathogenesis of Fusarium-infected plants. If a pathogen like F. caysporum f. lycopersici, pathogenic to tomatoes, were to produce trichothecenes and translocate them to the leaves, one would not expect

such high concentrations and combinations of toxins. Moreover, we are not certain that pathogenic isolates of the latter produce trichothecenes during pathogenesis. It is a well known plant pathological principle that production of toxins by pathogens in laboratory culture does not signify that these toxins also are produced in the host.

Apart from the controversy of the trichothecenes occurring on the leaves, it is difficult to imagine a reasonable explanation for the appearance of T-2 and DAS in the yellow powder. To those who claim that they dropped onto the soil and rocks from overhanging leaves, this is contrary to any known facts about trichothecene occurrence or distribution. The burden of proof remains with those alleging such an unlikely

hypothesis.

The finding of T-2 toxin, diacetoxyscirpenol, deoxynivalenol, zearalenone, and Fusarium pigments in leaves, water, yellow powder, and fragments originating at sites of yellow rain attacks in Southeast Asia and their absence in background samples (leaves, corn, rice, water, soil) from areas not exposed to yellow rain strongly implicates their use as warfare agents. Moreover, the finding of T-2 toxin and HT-2 toxin (a metabolite of T-2 toxin in animals) in the blood, urine, and tissue of victims of these attacks provides unequivocal evidence of their use as weapons.

Details of the experimental procedures used in these analyses were presented at the Society of Toxicology meeting in Louisville, Kentucky, on August 16, 1982; at an international mycotoxin symposium in Vienna, on September 1, 1982; and at the Association of Analytical Chemistry meeting in Washington D.C. on October 28, 1982.

Washington, D.C., on October 28, 1982.

Two scientific manuscripts describing those analyses have been submitted for publication in referred journals and other studies pertaining to nongovernmental analyses are in press.

[From the Washington Post, Dec. 10, 1982] REBELS CHALLENGE SOVIET DOMINION EVEN IN KABUL

#### (By Aernout Van Lynden)

SOUTH OF KABUL, AFGHANISTAN.—An 80-foot brick tower, built by the British during the few years that they managed to subjugate the tenaciously independent Afghan tribesmen, sits on the mountain range separating Kabul from the southern part of the county. It serves as a giant signpost for travelers making their way on foot toward the capital.

After four hard days of marching from the Pakistani border, the small group of anti-Soviet insurgents that I was accompanying finally reached this monument to 19th century imperial imagination.

There we could see, far below, the sprawling metropolis of Kabul, encircled by a patchwork of green and golden yellow

Like the British before them, the Soviet troops stationed in Kabul are discovering the difficulties of imposing their authority on Afghanistan. Long frustrated by guerrila dominance of the countryside, the Soviets' control increasingly is hampered in the capital as well, where they have based the

bulk of their forces.

The insurgents, or mujaheddin, have stepped up their activities around Kabul and have begun this year to stage attacks at night in the heart of the city. The capital's population has doubled because of an influx of refugees, leading to massive overcrowding and soaring rents. The Moscow-backed gov-

ernment of Babrak Karmal apparently has failed to win popular support through political means and is relying instead on a major security clampdown.

This assessment is based on conversations with dozens of Kabul residents who sympathize with the guerrillas and on firsthand observation of the countryside between the Pakistani border and the capital. I spoke with the Afghans in homes on the outskirts of the city, often over supper. During a visit last year, I was able to go into the city itself, but this time I entered it only on two night-time raids with the guerrillas.

The Soviet Union sent about 80,000 troops across the border into Afghanistan three years ago to install and prop up the Babrak regime, and since then Kabul has played a central role in Soviet strategy. After securing the capital, the Soviets hoped to whittle down opposition in the countryside.

The plan is not suited to Afghanistan, however, where Kabul throughout its history has played a relatively peripheral role. The nation's mountain ranges restrict communications and the ethnic kaleidoscope of tribal and religious sects limits central government authority.

Virtually no Soviet presence is noticeable in Afghanistan south of the capital, In valley after valley in Paktia, Lowgar and Kabul provinces, local religious authorities or mujaeddin leaders manage civic affairs. They settle disputes among families over land or grazing rights, and the guerrillas in some cases have set up schools.

Nevertheless, the Soviets have made their presence known in other ways. Virtually all of the villages that I visited bore scars of rocket attacks by helicopter gunships. Gaping holes were seen in mud houses, where splintered beams stuck through the walls like broken ribs through a shattered chest

The Soviet attacks have driven away residents from many areas. The Tezin Valley 30 miles east of Kabul, which teemed with more than 400 families last year, was deserted apart from about 100 mujaheddin. Only a few of the previous residents were killed in an eight-hour raid. The rest packed as many belongings as they could and left.

The exodus of Afghan refugees to Pakistan has been fully reported, but many inhabitants of Tezin opted for the shorter, if less publicized journey up the road to Kabul. Thousands have sought sanctuary in the capital, and Kabul is estimated now to shelter well over 1 million people, compared to about 600,000 three years ago.

New suburbs have sprung up, with many people living in canvas tents, and the streets have become more crowded. When asked about changes in the capital, inhabitants nearly always mention the increase in population first, and many spoke of it as though a major disaster had befallen them.

One house that cost 3,000 afghanis to rent for a year in 1980 today fetches 15,000 afghanis, or about \$250.

Such a change seriously reduces the standard of living in a city where the average yearly income is about \$600. In addition, some residents observed that the crowding has made people more tense and less forthcoming toward each other.

Prices for food and other goods also have risen sharply. For some items, they have doubled or trebled in the past year.

The mujaheddin are proud of their hospitality and do not allow correspondents traveling with them to pay for anything. At the end of the trip, however, the visitor is expected to offer the group something sub-

stantial, like a sheep or a goat, and the full extent of inflation became clear to me at that time. Last year a sheep had cost 700 afghanis, but one now sells for 1,500 afghanis or about \$25.

anis, or about \$25.
"People are openly questioning how they can survive," said one Kabul resident.

As economic difficulties grow, the war itself draws ever closer to the capital. The street demonstrations, distribution of resistance leaflets and chanting of Allah-u-akbar, "God is great," from thousands of rooftops at night have subsided. But, the resistance has used the steady influx from the provinces to infiltrate insurgents into the city, and the urban guerilla attacks first waged by leftwing and Maoist opponents of the regime steadily have grown in scale.

Senior members of the ruling party, Afghan Army officers or sympathizers are assassinated every week. Movie theaters and restaurants known to be frequented by government officials are bombed, and Soviet offices, particularly the embassy, regularly are targets of gunfire from passing cars.

The insurgents simultaneously have built up their forces operating at bases around the capital, which has become one of the focal points of the resistance. Arms have poured into the resistance. Arms have poured into the area, and experienced commanders like Abdul Haq were sent from the eastern provinces to organize and lead the insurgents.

The buildup has been so effective that, as I witnessed on two occasions this year, the insurgents are able to launch night attacks on military posts and government installations inside the built-up urban metropolis.

The escalation has elicited a strong response from the Soviets. Roadblocks are set up all over the city, and house-to-house searches are staged almost daily. Special efforts have been made to build up a more effective and widespread internal security service, according to Afghan sources, causing a widespread feeling of insecurity and fear among the city's population.

fear among the city's population.

"My papers are in order, but I have been picked up on three occasions this year," said a student completing his last year in high

Police and security forces also use pressgang tactics to round up new conscripts for the badly depleted Afghan armed forces. Under regulations issued this summer, any man between the ages of 15 and 45 is eligible to be called up, recalled or simply picked up on the street to do military service, which now lasts four years. It is not a prospect that many have relished, and it has prompted many young men either to leave the city or to go into hiding.

"Despite my exemption papers, I have been picked up on two occasions now," said a 40-year old factory worker living just outside Kabul. He added that he had been freed after contacting a friend in the police

service.

A first-year university student said, "When the course started in August, there were 35 of us. Some have been picked up or arrested, but most just don't dare to come anymore. There are only 12 of us left."

The tightened security appears to be the government's response to the failure of two years of political initiatives after the Soviet invasion to broaden support for Babrak's regime. During that period, security was kept at a minimum in Kabul, belief in Islam was encouraged and special efforts were made to expand industry and welfare in and around the capital. Lavish offers of regional autonomy and financial aid were proposed to tribal leaders.

The vast population influx, growing unemployment and soaring inflation appear to have helped to prevent any upsurge of popularity for the government, however, and support for Babrak remains limited to the ruling People's Democratic Party.

## REBEL COMMANDER IS KILLED IN ATTACK ON AFGHAN ARMY BASE

ISLAMABAD, PAKISTAN, December 9.—A rebel commander was killed while leading 250 men in an attack on an army base in northeastern Afghanistan, the fifth guerrilla leader to die in recent months, a rebel news agency said today.

The Pakistan-based Afghan Islamic Press said Turan Abdur Rehman, 25, was killed Tuesday in an attack on the Afghan Army's headquarters in Ningarhar Province, bor-

dering Pakistan.

Rehmam was a commander in the Hezbi Islami rebel group. The report, which could not be independently confirmed, said 11 government troops died in the battle.

The Islamic rebels are fighting to topple Afghanistan's government, installed after the Soviet invasion three years ago.

The Ningarhar Province headquarters, 45 miles west of the provincial capital of Jalalabad, has been a frequent rebel target and was reported by the agency to have been under siege for the past two months.

In an earlier battle, the rebels lost commander Zabit Halim Khaihaw of the Yunis Khalis faction of Hezbi Islami during an attack on a mililary base in Kabul.

[From the Washington Post, Dec. 13, 1982] Afghan Rebels Try to Unite, Suffer From Lack of Money

#### (By Aernout van Lynden)

Chaqari, Afghanistan.—The mullah, his imposing white beard grazing the ground, knelt and prostrated himself in the direction of Mecca. The 80 men lined up behind him in the large, bright mosque followed him down to the ground in unison. He shifted to half-face the congregation and intoned:

"Let us pray to Allah that we, his warriors, his mujaheddin, may join hands in unity under his guidance, so that we may rid our country of those that have no [religious] book, the godless usurpers from the north, and bring about the freedom of our country."

The men, again in unison, mumbled amin, the Afghan equivalent of "amen." The early-afternoon prayer was over, and the meeting of Islamic insurgent leaders continued in this village fewer than 20 miles from the base of their Soviet enemy in the capital of Kabul.

The conference Oct. 24 was the first to bring together leaders of all the guerrilla groups operating in southern Afghanistan. In a country where fierce factional disputes have bedeviled the resistance, it illustrated a growing awareness of the need for greater unity. While this meeting ended without taking concrete steps, two broad alliances of the insurgents were formed earlier this year, one of fundamentalist Moslem groups and the other of more moderate ones.

The signs of cooperation offer hope for a strengthening of the resistance, but to some extent they also reflect an underlying weakness. The groups are pulling together after three years of war in part to counteract the sapping of resources of the villages from which they draw support, and the organized resistance groups across the Pakistani border in Peshawar are unable to provide

enough money to pay the guerrillas. Meanwhile, Soviet and Afghan government security services are believed to have launched a major campaign to infiltrate the resistance.

The disunity among the mujahedin has been caused not so much by ideological disagreements as by long-standing ethnic and tribal differences, the competing personal ambitions of various leaders and quests for regional dominance. All of the groups seek some kind of Islamic state, although members of the more fundamentalist groups tend to view Islam more is an ideology than as a faith.

The most virulent antipathy always has been between the two most extreme fundamentalist parties, reflecting the rivalry between the nation's two principal ethnic groups. One of these mujaheddin groups is led by a Tajik, Burhannudin Rabbani, and the other by a Pathan, Gulbuddin Hekmatyar.

Some observers had expected the December 1979 Soviet invasion to have a unifying influence, but little changed during the first two years that followed it.

The fratricidal attitude was particularly common among the party leaders vying for dominance in Peshawar, the insurgents' effective capital-in-exile. Guerrilla leaders inside Afghanistan often found it necessary to cooperate to fight off Soviet attacks.

Even in the field, however, commanders have been unwilling to accept a unified command structure out of fear that they then would lose personal authority. Different guerrilla groups also have competed for food or other support from local villages and occasionally even fought among themselves.

The two broad alliances were formed after slow and painful deliberation because of the awareness that the *mujaheddin* might find it difficult otherwise to sustain the resistance at its current level. Regular meetings of "alliance committees" now are held, and membership cards of the approximately seven former parties have been abolished.

Even the party leaders in Peshawar have begun putting aside their differences. They sent the mullah who led the prayers at the meeting here as part of a three-man commission with the express task of convening the special conference in hope of promoting cooperation or even integration among the guerrilla factions.

Present were the two major commanders in the area, Haji Siddiq and Zabit Abdul Halim, who later was killed. There also were representatives of every resistance party, fundamentalist or moderate.

Unity cannot come about overnight, however. The meeting lasted seven hours, full of powerful and flowery rhetoric, but it ended with only a broad agreement to hold further talks.

Cooperation both within the two principal alliances and between them remains superficial and uneasy. Weapons still are distributed along old party lines, and finances are regulated separately.

One major factor in the push for unity has been the need to contain factional rivalries that were alienating local villages already suffering from the consequences of the war. Halim, the commander whom I accompanied during a stay of almost two months in the area south of Kabul, was aware of it. The topic was raised at every meeting that he had with village elders in the outskirts of the capital, where men under his command were deployed, and the villagers appeared to feel increasing bitter-

ness about some of the demands made on them by the insurgents.

"Due to the war, a lot of land is now left idle, and the people in the villages are less well off. This would not be so serious if they only had to aid one party, but three or four different groups have to be helped here, given food, maybe cigarettes, clothes," he said in an interview before he was killed.

The resulting bitterness and growing weariness with the war form an important

threat to the resistance.

"The village forms the real base of our struggle. It gives it life, manpower, food, support. Without the village, our struggle is lost," Halim said.

Another problem facing the commanders in the field is the lack of money to pay their guerrillas. The parties in Peshawar have been able to provide the insurgents with greater supplies of weapons, but they have not provided substantial quantities of cash.

"We cannot pay the men. Just now and again buy them some sandals or clothes, maybe. But we cannot actually pay them, and this is an enormous problem because again and again I have seen a man come to join our group, be given a weapon, be trained and then, after one or two years, one day he will simply go, return to his home." Halim said.

There usually are good reasons for such a decision. The men return to care for their families and work, which they are unable to

do as guerrillas.

For most mujaheddin, an arrangement is made within the tight Afghan family structure to free a man to fight. For example, one brother will work on the land and be present to feed and watch over women relatives, whom they guard jealously from sight, while the other brother goes off to battle.

But the family does not always have the resources to spare a man, and it poses field commanders with the problem of having to train and otherwise deal with a constantly

changing group of men.

The inability to pay the guerrillas also lessens the authority of the commander. Every man is a volunteer, and the consequence is generally a lack of discipline. As I witnessed during one night attack in Kabul, an insurgent raid can cause panic and chaos if things do not go right for them.

In addition to economic problems, the insurgents face a new threat from the Afghan internal secutrity service, called Khad. During my first three weeks in Afghanistan, I encountered four cases of informers who had been caught by the mujaheddin.

Western diplomatic sources say that Moscow has given the Khad—which reportedly is led by the Soviet KGB secret police—\$100 million to expand its intelligence network to infiltrate the resistance both inside Afghanistan and at the parties headquarters in Peshawar. In a country where government authority is limited to the major cities and the general situation can be described as anarchic, it presumably was not difficult to arrange for the infiltration under various guises of new informers lured with the monetary aid offered by Moscow.

Some of the informers apparently were sent to make contact with the resistance as defectors, which ordinarily would not be suspicious because more than 60 percent of Army conscripts are estimated to have defected. Other infiltrators seem to have joined the stream of refugees to Pakistan.

The traditionally self-confident and easygoing attitude of Afghans by no means has disappeared as a result of the infiltration, but security at every base has been tightened. Most commanders now admit the informers are an important threat after scoffing at the danger last year. Forced as they are to depend on the trust and support of the general population, the insurgents may find such infiltration particularly hard to counteract.

#### CONGRESSIONAL REFORM

• Mr. BOREN. Mr. President, it must be painfully clear to anyone who has followed the torturous proceedings of Congress during the past 3 weeks that this session is definitely a turkey instead of a lameduck. If there was ever a doubt of the need to take a long, hard look at ourselves, this postelection session eloquently makes the case in favor of such scrutiny. Mr. President, there is an urgent need to tackle the reform and streamlining of Congress.

There recently appeared in the Washington Post an excellent article on the subject, written by Gregg Easterbrook who covers the Washington scene for the Atlantic Monthly. I ask that the complete text of Mr. Easterbrook's column appear at the conclu-

sion of my remarks.

It is clear to me that it is time for the introduction of legislation establishing an emergency joint committee for congressional reform. The late Senator Mike Monroney of Oklahoma played a leading role as a House Member chairing a special committee in the last major overhaul of Congress. That was over 30 years ago.

Mr. President, while the Nation cries out for solutions to basic problems, Congress seems almost paralyzed and unable to act. It is fragmented and slowed by antiquated rules and procedures. It is like a telephone switchboard designed for 10 telephones which now has 10,000 plugged into it.

The entire country must be shocked to see Congress wait until the last minute to pass a stopgap budget, working through most of the night with the average Member trying to make critical decisions with an average of 6 hours total sleep in 72 hours.

Members of Congress individually are for the most part sincere, and willing to work hard, but they are hampered in their efforts by a spreading

institutional failure.

Mr. President, I urge the creation of a joint House-Senate committee which would have a maximum of 6 months to present suggestions for a major overhaul of Congress. After making its report, the committee itself would then cease to exist. Mr. President, the problem is not with the leaders. Senators Baker and Byrn in the Senate are both able leaders, but they are constantly prevented from leading by antiquated and chaotic procedures.

The signs of trouble are evident for anyone to see. Let me list a few of the problem areas. First, the Senate fili-

buster rule must be questioned in this modern period when a speedy response to a problem is often needed. A handful of Senators can bring the business of the Nation to a halt. Even if 60 percent of the Senate votes to end the filibuster, it can still be continued for over 100 hours of floor time under Senate rules.

Second, the number of subcommittees has been growing, fragmenting the time of Members and creating confusing and overlapping jurisdiction over important issues. There are now over 242 subcommittees in the House and Senate, not counting other special committees. They held 852 hearings in 1982, up from 453 in 1972. In 1947, there were 400 committee staff aides. Now there are over 2,000. With jurisdiction fragmented, it involves more and more people to iron out differences, reach a compromise and act.

Third, a recent study undertaken for Senator David Pryor of Arkansas indicated that in the first 6 months of this year, fully one-third of the time the Senate was in session was taken up with nonworking hours, including quorum calls and recesses.

Fourth, the budget process clearly needs streamlining. Congress worked over 8 months on budget resolutions containing instructions to itself and then was able to actually pass only 3 of the 13 bills for permanent appropriations. In only 3 of the past 6 years has Congress been able to adopt a budget.

Fifth, Congress lacks rules which are strict enough in the area of germaneness or making sure that amendments are on the subject matter of the bill. Nor are there sufficient rules to prevent the same proposal from being brought up time and time again. Once it has been acted upon, it should not be considered again in the same Congress. Issues like busing or abortion can be voted on series of times in the same session. Every proposal should be entitled to "its day in court," and an up and down vote. But, Congress should not spend its time repeating a vote on the same subject 100 times the same session. Nor should one be able to propose a national defense amendment to the agriculture bill, or vice versa. Rules about sticking with the same subject matter in a bill are ignored more than they are observed.

Mr. President, we must act before it is too late. Those who want to preserve Congress as a major force in our democratic form of government should be in the forefront of reform. To preserve Congress, we must reform it. Its future will be imperiled if it continues to be placed out of commission much of the time by its own procedures. Internal problems alone are not the sole cause of fragmentation in Congress. To some degree, Congress reflects the division and fragmentation of the

people. While reforming Congress may not be the sole answer to the Nation's problems, it is still an urgent need.

It will be my intention when Congress reconvenes to introduce legislation to deal with this need. I hope my colleagues will reflect on our experiences here in the last several weeks and will be prepared to join me in what may be the most important effort we will undertake in the new Congress.

The material follows:

[From the Washington Post, Dec. 12, 1982] How Congress Collapsed: A Depressing GUIDE TO GOVERNMENTAL PARALYSIS

(By Gregg Easterbrook)

With all the drama and tension, last Tuesday's anti-MX vote in the House seemed to suggest that Congress had finally made up its mind about the missile issue. How long did that bold consensus last? Until Wednesday.

That was when the same House voted overwhelmingly to continue funding MX development. In fact, for all the hoopla over cutting \$1 billion from MX on Tuesday, the House added \$2.5 billion on Wednesday. Hey, who's in charge here? Are they fer it

The fact is that Congress, which has a time-honored tradition of confusion and ineptitude, has been outdoing itself of late. Consider the scene in the Senate only a few months before, when that body went into a long but ultimately pointless filibuster over conservative social issues. For five straight weeks, as the economy languished, the nuclear arms race continued and unemployment worsened, it was clear what the greatest deliberative body in the world was ac-

complishing: zero. When the conservatives finally gave up, the senators went immediately into allnight session over the budget. They already had given up hope of completing the budget by the Oct. 1 deadline, and were trying instead to pound out a stop-gap resolution to keep the government going when Congress recessed, so members could campaign with promises of firm, visionary leadership. But as Majority Leader Howard Baker pleaded for some semblance of adult behavior, no fewer than 50 amendments for special-interest favors or single-issue constituencies were introduced, further obstructing the machin-

Finally they passed a patchwork resolution that resolved nothing, setting the stage for the current lame-duck session-in which, it is expected, last year's budget still won't be finished. Baker lamented, "We simply cannot do our country's business this way."

What's happening to Congress? It seems inept to a degree that's difficult to believeparalyzed by personal bickering and interest-group favoritism, incapable of cohesive action, living like a spoiled child from one

tantrum to the next.

This would be bad enough in normal times, but it takes on special importance as leadership from the Oval Office erodes. Congress is, of course, very good at preventing things from happening, and it now seems likely that much of what Ronald Reagan proposes in 1983 and 1984 will go nowhere

While this prospect may delight Reagan's enemies, it should not be entirely comforting to those of the left or right concerned about helping the country get through the next two years. If Congress cannot address the nation's problems, what can we exect from the nation?

Congress does devote a great deal of time to transparent publicity stunts, such as the toothless "balanced budget" amendment that tied up the House and Senate for most of last summer, then vanished like the Comet Kahoutek. It does freely engage in hypocrisy (most "balanced budget" amendment backers also supported Reagan's \$749 billion tax cut, source of the deficits they were piously decrying). It does indulge in wild, MX-like inconsistency (shortly after voting overwhelmingly for a Reagan defense budget that called for doubling U.S. nuclear warheads, the House came within two votes last August of endorsing a nuclear freeze).

But seldom does it produce serious purposeful measures-except, of course, handouts to the special interests that whine the loudest or wave the largest fistsful of

Granted, Congress has always been a helter-skelter institution to some extent. Granted too that the current congress reflects a fragmented America. But as Henry Reuss (D-Wis.), a House member since 1954, "The handicaps of Congress have become much greater in recent years. The institution has become much more rickety.

What are the reasons for all this? Start with the chaos created in the last decade by the proliferation of subcommittees

In the House, for instance, who has jurisdiction over an energy issue like hydroelectric power dams? The Energy Committee's Subcommittee on Energy Conservation and Power? Or the Science Committee's Subcommittee on Energy Development and Application, or maybe its Subcommittee on Energy Research and Applications? Perhaps jurisdiction should go to the Interior Committee's Subcommittee on Energy and the Environment, or maybe its Subcommittee on Water Power and Resources.
Then again, why not the Public Works

Committee's Subcommittee on Water Resources? Or the Agriculture Committee's Subcommittee on Forests, Family Farms and Energy (a natural combination if ever

there was one)?

Or the Energy and Water Subcommittee of Appropriations, or the Energy and the Environment "task force" (equivalent of a subcommittee) of the Budget Committee, or the Energy, Environment and Natural Resources Subcommittee of the Government Operations Committee, or the Energy Environment and Safety Issues Affecting Small Business Subcommittee (that's a real name) of the Small Business Committee.

And let's not forget the Senate, where we find the Energy Committee with its separate subcommittees on Energy Research and Development; Energy Conservation and Supply; Energy Regulation; Energy and Mineral Resources; Water and Power, and Public Lands and Reserved Water. Or the Water Resources Subcommittee of Senate Environment and Public Works Committee; the Forestry, Water Resources and the Environment Subcommittee of the Agriculture Committee; the Energy, Nuclear Proliferation and Government Processes Subcommittee of the Government Affairs Committee; or the Energy and Water Development Subcommittee of the Appropriations Committee

So which of these 21 subcommittees has jurisdiction over a power dam? The answer is that potentially all of them do—which does not augur well for getting much busi-

ness done. During the 1979 Iranian oil crisis it seemed that some kind of energy hearing was being held in some subcommittee room at all hours of the day and night-but no meaningful legislation every emerged. In the wake of the Three Mile Island accident, the jockeying for "primacy" among subcommittees was shameless, with every one of those blessed with the word "nuclear" competing to get its chairman's face on "Good Morning, America."

At the moment there are 141 subcommittees and "task forces" in the House, 101 in the Senate, and eight for the various special, select and joint committees. (The House has 21 full committees, the Senate 16; there are four joint committees, seven special or select committees.) As Reuss notes, "We've set up so many centers of power in the subcommittees that become nearly impossible to get anything

coherent done.

The subcommittees are now "centers of power" because of a little-noticed aspect of the 1975 seniority reform—a package called, at the time, the "subcommittee bill of rights." Central to this "bill of rights" was granting subcommittee chairman what amounts to authority to hold hearings whenever they wish, on any bill. The effect was immediate-a dramatic increase in subcommittee hearings.

In March 1972-a month chosen at random-there were 453 subcommittee hearings in the House and Senate, a staggering number in itself, averaging out to 19.7 hearings per working day. Ten years later, in March 1982, there were 852 hearings, almost twice as many, a mind-melting average of 37 per working day.

It is true, perhaps, (as is said on the Hill in defense of the many new hearings), that "life has become more complex" in the past decade. But it hasn't become twice as complex. What has become twice as complex is getting anything done in Congress.

Most congressmen are aware that subcommittee proliferation works against the national interest. But it does work in favor of other interests—their own.

The key words here are "Mr. Chairman." Congressmen long to be not just The Honorable, but Mr Chairman. It may not seem like much in the larger scheme of things to be Mr. Chairman of the Office Systems Subcommittee of the House Administration Committee, but it sure sounds good back

Among all the committees, subcommit-tees, task forces, joint, special and select committees, there are 298 chairmanships. Some members hold more than one chairmanship, but roughly, nearly half of Congress' 535 members are Mr. Chairman of something.

Besides what it does for the ego, a subcommittee chairmanship has practical ad-The ambitious congressman vantages. knows the value of having his own hearing room, with the TV cameras rolling. Since the hearing-not the final legislation-is most likely to make the evening news, he has every incentive to place the perservation of his tiny fiefdom above the national interest. Ergo, 37 hearings a day.

Another part of the 1975 "subcommittee bill of rights" increased subcommittee staffing. In the House, each subcommittee chairman and ranking minority member got one new staffer; in the Senate, each junior senator was given three. In 1947, Congress had 400 committee staff aids. By 1970, the number had quadrupled, to 1,600. Today it

stands at 2,000.

As with subcommittees, the more staffers, the harder to get anything done. "The larger the staffs get, the more people are involved in a decision," says an aide to one senator. "Everybody wants to have his say and leave his little stamp on the legislation. Pretty soon the weight of people wanting attention is greater than the force moving the legislation, and the whole thing grinds to a halt."

Last spring, for instance, Sen. Daniel Patrick Moynihan (D-N.Y.), an early Player in the fashionable game of "infrastructure" rebuilding, introduced a bill to require a simple accounting of which roads and bridges in the country were in the worst shape—so Congress could figure out how much pressing work had to be done and what it might cost.

By the time this bill emerged from the warrens of the various subcommittees of the House Public Works and Government Operations committees, it required not just a list of collapsing roads and bridges but an "inventory and assessment" of all the nation's highways plus all firehalls, parks, landfills, schools, hospitals, public libraries, garbage trucks, courthouses, pipelines, mass transit facilities, airports, reservoirs, federal offices buildings, power generating plants, playgrounds, sewers and—believe it or not—television stations.

In short, the amended Moynihan bill required a cataloging of nearly every object in the United States larger than a delivery van. The subcommittees had run wild, producing a special interest appeaser of no value to anyone, and it consequently went nowhere. (The "jobs bill" now before Congress is based largely on guesswork about how many roads and bridges are really in serious disrepair.)

Next, consider the result of the Budget Act of 1974, which created the Congressional Budget Office, the House and Senate Budget Committees—and an elaborate budget "process" that drains most of Congress' energies but produces few budgets.

gress' energies but produces few budgets.
In brief, this "process" requires b requires both budget committees to set ceilings for overall national spending; then all "authorizing" committees (every standing committee except Budget and Appropriations) to chose some specific numbers; then the appropriations committees to actually award funds; then the budget committees to "reconcile" the inevitable differences; then the House and Senate to vote on the appropriations bills on their floors; then a House and Senate conference committee to reconcile the inevitable differences between the two chambers-while, during the entire process, administration is pushing its own budget and regularly shifting gears.

The process is so streamlined and efficient that the 1982 session of Congress, which (officially) ended in such comic disarray before the elections was able to pass only three of 13 appropriations bills, and it is not expected to pass all of the rest during this special session. Indeed, in three of the last six years, Congress has failed to adopt the nation's central financial document.

This process forces members to spend so much effort on the budget that little energy is left for anything else. As Rep. Morris K. Udall (D-Ariz.) has said, "We don't have time to legislate." Or as Sen. Patrick Leahy (D-Vt.) puts it, "We've become elected lineitem bureaucrats," fussing over the details and oblivious to the larger picture.

Not all congressmen object to this development, of course, because relief from responsibility for the larger picture is exactly what they seek. Says a senior congressional aide. "The budget is a welcome excuse to

put everything else off." Which is what Congress is most proficient at doing.

If expanding subcommittees, mischiefmaking staffs and a tortuous budget process were not bad enough, the modest time and energy left to members get eaten up quickly by the special-interest and single-issue crowds.

The role of money from Political Action Committees (PACs) in special-interest causes is now fairly well understood (the key thing to remember is that PACs don't buy elections, they buy votes). What seems less well understood is the influence PACs have on Congress as an institution.

As traditional party structures have faded, congressmen come to do most of their fundraising individually. (Oil and gas PACs gave more money in the last election than the whole Democratic National Committee.) This encourages them to fix their loyalties on interests groups rather than on the national interest, which has no PAC.

Obviously, in a day when hundreds of thousands or millions are casually spent on campaigns, no single \$5,000 PAC contribution means much; it's spare change compared to the total required. Thus a congressman who was once beholden to only a few interests (maybe oil, or banking or paper) now ends up beholden to many more, and each one is usually concerned about maintaining its privileges, avoiding change, embracing the status quo. This means that PACs tend to be lobbies for foot-dragging—lobbies that do well in a fragmented and ineffectual Congress.

Most of the special-interest ploys that characterized the 97th Congress have been well covered, but one that escaped general attention indicates the degree to which PAC money makes Congress allergic to common-

In July a House-Senate conference committee approved a bill to give airline pilots and other top-level airline union employes huge special benefit payments if their airlines were merged or shrunk by declining business. The deal would have guaranteed pilots up to 60 percent of their salaries for five years, and granted similar deals to other workers; a special severance payment would have given "average" pilots \$190,000 each plus other special benefits.

This bill, in other words, would have channeled money into the hands of one of the most favored, best-paid (average income: \$69,000 a year) elites in America. How could airline pilots possibly deserve such special breaks?

There was, of course, no reasonable explanation. But there was interest-group armtwisting. As The Post's Carole Shifrin reported, the Air Line Pilots Association and the International Association of Machinists and Aerospace Workers were behind the proposal. (Since 1979, Shifrin reported, the two unions had given \$1.5 million to 225 congressmen.) The proposal was eventually beaten on the Senate floor by Sen. Nancy Kassebaum (R-Ka.), but she had to resort to procedural argument to do it; she told fellow senators the conference committee had violated their unwritten code by introducing a new matter to an otherwise uncontroversial bill. Apparently, the fact that the pilot's bonanza was wrong didn't carry enough weight.

Next, consider the influence of singleissue extremists like Sen. Jesse Helms (the cause of the Senate's fall fillbuster). As in the cases of subcommittee expansion, the endless budget "process" and PAC proliferation, the main effect of single-issue politics is to throw a monkey wrench into the machine. Helms knew at the start of the filibuster, for example, that he had only a slight chance of winning, but that didn't matter; the filibuster allowed him to go down in very bright, well-publicized flames. It will doubtless aid his direct-mail fundraising.

Extremists, because they seldom can win, generally satisfy themselves by ruining it for everybody else, and don't seem to care if this means accelerating the general decline. Their mailing computers and simplistic ratings systems (used by extremists of the left and right alike) are slanted entirely toward the negative; they rail against what should not be done, but leave scant room in their checkoffs and scorecards for any measure of progress. Like public opinion polls, they are excellent vehicles for noconfidence votes but little use in charting a course for the country. Their message to congressmen, in measured and uniform tones, is unendingly repeated: Give in. And many congressmen listen.

Because of all these factors, at present the Hill can only be moved to actually act on a bill when political panic and pressure have risen to such a level that congressmen forget themselves entirely and begin voting in mad spasms.

The only meaningful products of the 97th Congress have been Reagan's budget cuts and his tax bill. Important roll calls for the first took place in an atmosphere of unrestrained frenzy, sections being rewritten and voted on without most congressmen having a clue as to their significance. There were so many competing proposals going through at once that no one, not even David Stockman, could keep them all straight.

Besides not knowing "what's going on with all the members," as Stockman said, no one even knew what some of the numbers were; you may recall that one budget proposal, when formally printed, contained a woman's name and phone number, scribbled during a late-night rewrite session. Apparently the measure had been passed into law unread.

This was not an isolated incident. The pattern was repeated in July 1981 when Reagan's tax cuts raced through in an amusement-park atmosphere. At the time, few congressmen knew (to cite one example) of the presence of the "tax leasing" provisions, and scarcely a handful had any idea what these provisions meant. And the pattern continued this year. In May 1982, frustrated by his inability to find any consensus on which of the many rival budgets was most likely to pass, House Rules Committee Chairman Richard Bolling issued an unusual rule that effectively opened the House floor to unlimited debate on any subject. His purpose was to let those congressmen in thrall to single-issue lobbies and special interests blow off steam and make the grandiose gestures that would appease their constituents. The result? A marathon, 39-hour House session with countless rant-and-rave monologues and some 30 roll-call votes. All the budgets up for consideration were amended so many times they ceased to be distinguishable. Then all collapsed. When it was finally over, Congress had accomplished what, these days, it usually accomplishesnothing.

It goes without saying that not all congressmen are sellouts or windbags, yet the conscientious and the public-spirited seldom prevail. Here is their dilemma:

Even for the sincere congressman, the ideal course is far from clear. What is the

right thing? Who should come first? Which path will lead us out? The questions are not unanswerable but they require time, reflection and calm logic; sincere congressmen need a sane atmosphere in which to piece

the puzzle together.

Poised against them are the armies of sellouts and windbags, people who do not suffer from the slightest hesitancy. They want specific, tangible handouts, and they want them now; their agendas are highly itemized, their desires keenly felt and vigorously expressed. The sellouts and windbags force Congress to revolve around them, just as all attention centers on the wailing child, drowning out the possibility of conversa-

If there is a cause for optimism, it is that Congress, unique among American institutions, has the power to reform itself. Many Congress' problems are of its own making, and so Congress can undo them. It won't be easy, the interest groups that dominate the current system will resist any congressional revival, any change. But it is

#### SIMPLE REAUTHORIZATION OF GENERAL REVENUE SHARING

• Mr. DURENBERGER. Mr. President, on November 29, 1982, Senators SASSER, BAKER, DOMENICI, ROTH, BRAD-LEY and I circulated a "Dear Colleague" letter stating our intention to introduce a simple reauthorization of general revenue sharing as soon as possible in the 98th Congress. The letter explained that we hoped to garner a substantial number of cosponsors to the bill as a demonstration of strong Senate backing for the concept of revenue sharing and to encourage expeditious consideration of the issue in the new Congress.

The response to that call for a show of support has been most gratifying. Today I can announce that 39 Senators have agreed to cosponsor a simple reauthorization, and I fully expect this number to increase by the time

the bill is actually introduced.

Looking down the list of names, there is no discernible partisan or ideological pattern. The support is truly broad based and bipartisan in nature. Given this wide and diverse support, I am determined to move ahead quickly on this matter and not permit general revenue sharing to languish through the early months of the next Congress without Senate action. I urge the Finance Committee to hold early hearings on revenue sharing-both this simple reauthorization and any proposed changes to the program that may come forth in the next few months. Local officials across the country deserve our consideration in this matter so that they can have as long as possible to plan their next budgets.

Of the many billions in Federal assistance to State and local governments, general revenue sharing is the most flexible in terms of allowing officials to put the money where the needs are greatest; the most efficient in terms of administrative overhead; and it is the one program that most embodies the spirit of President Reagan's New Federalism.

At this time I submit for the record the list of Senators who have agreed to cosponsor a reauthorization of general revenue sharing be printed in the RECORD.

The list of Senators follows:

Durenberger, Sasser, Baker, Domenici, Roth, Bradley, Pryor, Percy, Stafford, Tsongas, Dixon, Ford, Andrews, D'Amato, Mattingly, Specter, Huddleston, Grassley, Sar-banes, McClure, Boschwitz, Gorton, Garn, Pell, Wilson, Weicker, Stevens, Nunn, Cochran, Riegle, Baucus, Symms, Long, Rudman, Abdnor, Mitchell, Danforth, Cohen, and Kassebaum.

#### C-17 AIRCRAFT

• Mr. PRYOR. Mr. President, I rise today to say a few words about our Nation's military airlift capability and the Military Airlift Command, com-

monly referred to as "MAC."

At times during the Vietnam era the men who flew the support and logistical missions for our Air Force were sometimes referred to as "cargo haulers" or "trash haulers." There always is a constant battle within the Pentagon and even on the floor of the Senate, between the forces of exotic weaponry and the forces of less-exotic weaponry. I want to speak in support of the equipment haulers, the lessthan-exotic types, and their very important role in our expanding military airlift needs, and the future of the C-17 program.

The C-17 is not a sexy weapon. But it provides necessary support for all those other sexy weapons. Why should we be paying more attention to our military airlift capabilities? Because the nature of the conventional threat is growing. In any kind of conventional military encounter, time will be of the essence. The mobility of our conventional combat forces has become an ever-increasing factor in the policy equation of the United States. This is particularly true as relative nuclear parity between the United States and the Soviet Union has become a reality.

We have to be able to respond in a

timely manner.

And we have to be able to move the kinds of equipment that our conventional forces might need in and out of some very short and narrow runways.

We have what is referred to as "outsized cargo"; tanks and trucks and helicopters. We have got to be able to get it in and out of some tight situations.

The airlift air force that we have today is growing old. In fact, our current operational airlift technology is now 20 years old. It is vitally important that we start planning for the future.

Mobility will be the key to our future safety. Why is the C-17 such a special aircraft? Because:

First. It is an integral part of our overall airlift program.

Second. It is the key system to meet needed airlift capabilities.

Third. It will provide intratheater outsize capability not presently available in the present airlift force.

Fourth. It will provide as a replacement aircraft for the C-130's and C-141's, which will be leaving the airlift

force in the 1990's.

Fifth. It will provide the remaining intertheater airlift capability recommended by the congressionally mandated mobility study after near and midterm programs are completed. A C-17 force could provide around 8 million ton-miles per day.

Is the technology involved with the C-17 program unproven? Absolutely

not.

In fact, a great deal of money has been spent by the Pentagon to bring the C-17 technology to where it is today.

At David Monthan AFB in Arizona are actual aircraft that have flown and proved that their concepts and the concept of the C-17 are indeed workable realities.

I would like to quote from an article that appeared in the November 1982 issue of Armed Forces Journal. It was written by Everett Chambers and was entitled: "Airlift: Finding the Plane to Fit the Mission"

The C-17 meets or exceeds the requirements defined by the uniformed services after more than 10 years' experience with the current airlift force. It is a direct-delivery airplane, capable of moving combat forces from military origins directly to the objective destination and provides tactical flexibility through the use of additional airfields. The enemy's interdiction plan becomes complicated, and combat forces are delivered where they are needed. The C-17 satisfies the entire airlift mission spectrum that now requires many types of airplanes to complete.'

I urge my colleagues to take a long and hard look at our future mobility needs and the role of the C-17.

#### CHANGES IN THE KREMLIN: CASTRO'S GODFATHER IS DEAD

• Mr. SYMMS. Mr. President, I ask that the following article be printed in the RECORD, because it illustrates Soviet domination of Cuba:

When Cuban dictator Fidel Castro received the news about the death of his colleague Leonid Brezhnev, he must have thought that his godfather had died and that his regime had bad times coming.

After the enmity created between the Cuban dictator and Nikita Khrushchev because of the worldwide humiliation that the latter endured in the 1962 "missile crisis" Castro tried for years to maneuver in order to get closer to the new Soviet dictator, Leonidas Brezhnev, until he personally convinced Brezhnev about the convenience for the Kremlin to use Cuban troops in Angola to carry into power then-Moscow-protegé, Agostinho Neto.

Riding the wave of victory in Angola, Fidel Castro got Brezhnev to adopt his (Castro's) option to help Ethiopia in the Horn of Africa, countering the opinion of them. Soviet Prime Minister, Nikolai Podgorny, who seemed to support Somalia. Castro prevailed, support went to Ethiopia and the Ogaden war was unleased, in which Cuban units participated actively and left hundreds of Cuban bodies and wounded troops as a result of that conflict.

Castro also got Brezhnev to struggle within the Soviet Politburo to postpone payment of the huge debt obligation contracted by Cuba with the Soviet Union in 1976, that was due in 1985, despite opposition from Podgorny and other Kremlin technocrats, who argued that if Castro was allowed to delay payments, other communist bloc nations would also request preferential treatment, which eventually happened with Poland, Romania and Viet-Nam, among others

Brezhnev also ruled, against the opinions of all Kremlin technocrats, that Castro handled the Cuban economy in an independent manner, and that resources sent by the Soviet Union to "little Cuba" would not be overseen as other resources given to Eastern nations were.

It is said in the intelligence and diplomatic circles that, approximately two and a half years ago, during the final months of the Carter Administration, some members of the Soviet Politburo launched the thesis of exchanging Cuba, Angola & Ethiopia for the "green light" from the West for Moscow to keep a free hand in Afghanistan, Iran and Turkey, all of which have borders with the Soviet Union and are vital for the internal stability of the USSR.

Although that idea would have been accepted in principle by some people in Washington, dictator Brezhnev energetically opposed it, even when the "deal" would have included as well technological assistance to Moscow from Western nations.

Everybody knew that Brezhnev's death or retirement were imminent; Castro knew it too. Days earlier, the Cuban dictator and his brother, Raul, had been absent from the celebrations of the Red October Revolution at La Habana. These were held at the present Carlos Marx theatre (previously "Blanquita"), where the speeches were delivered by Ramiro Valdes and the Soviet Pro-Consul Konstantin Katushev. The following day, however, both brothers attended the reception offered by Katushev in the Empire's Embassy.

Did Castro wish to demonstrate, through his absence, his displeasure towards the Kremlin leadership, that has notified La Habana that assistance will be sharply curtailed, or was he ordered to attend the reception?

Later on, there was an absolute silence about Brezhnev's death on the part of the Cuban government, which in the first hours after the decease only referred to news releases from TASS, the Soviet official press agency.

Then came the quick appointment of Yuri Andropov and Castro, immediately, sent a lengthy message with his condolences, together with another of congratulation. In the latter, he mentioned "his assurance that Andropov would continue the line followed by Brezhnev."

Afterwards, the Cuban dictator travelled to Moscow, accompanied by Carlos Rafael Rodriguez and Ramiro Valdes, both members of the Cuban Politiburo. They were greeted at the Moscow airport by Konstan-

tin Chernenko, with whom Castro was better acquainted than with Andropov, but who had been displaced by Andropov in the struggle for power.

In Moscow, Castro met extensively with Mengistu Haile Mariam of Ethiopia; Hafez Assad of Syria and Yasser Arafat of the PLO, but he was only briefly received by Yuri Andropov and his assistant, Viktor Sharapov. However, the press at La Habana reported that "Castro had held a cordial interview (with Andropov) to deepen relations between both governments."

tions between both governments."
On the other hand, Carlos Rafael Rodriguez was received by Ivan Argipov, First Vice President of the Council of Ministers of the Soviet Union, to discuss bilateral trade relations, but no additional details were offered about this interview.

All signals point out to the fact that, together with the secret policemen, technocrats have taken over, and that in the case of Cuba a greater control will be enforced as to resources sent by the Soviet Union to the Caribbean island; that these resources will be reduced even more, due to the austerity plans that will be implemented, and that the importance of Cuban technocrats, such as Humberto Perez and others, will be on the rise.

Wounded and humiliated, Castro returned to La Habana, but he could not quit being himself and thus, upon a stopover at Shannon, Ireland, he called the Ulster hunger strikers "patriots" and said that, although he did not wish to interfere in the Irish internal affairs, he wanted to express his pain and sympathy for the Irish patriots that had offered their lives through a hunger strike.

"From the human point of view", Castro affirmed, "our people suffered very much when those men were dying and they, undoubtedly, showed their conviction and bravery", he added, alluding the Irish hunger strikers who died in Ulster.

While the Cuban dictator uttered these words, tens of Cuban political prisoners were continuing a hunger strike at the Boniato Prison, Oriente Province. They complained that the communist regime had violated its own laws, retaining them in prison after they had served their respective sentences, and re-sentencing them through the peculiar form of crime called "dangerousness".

Castro himself is guilty of the hungerstrike-deaths suffered by Pedro Luis Boitel, Roberto Alvarez Chavez, Luis Alvarez Rios, Carmelo Cuadra, Olegario Charlot Espileta, Enrique Garcia Cuevas, Reinaldo Cordero and Jose Barrios, among many others.

Thus, in the middle of the humiliation of not being greeted in the same manner as George Bush, Vice-President of the United States, or Karl Karsten, of West Germany, and involved in the infamy of praising persons who had done the same as many others whom he himself had sentenced and allowed to die, Castro returned to La Habana with a negative balance from his trip to Moscow, and also having learned that his godfather had died.

### PICTURE—THE USSR WITH ANDROPOV; WHAT CAN BE EXPECTED?

Dr. Leon Gure is one of the most renowned American experts on the Soviets. From his offices, in the State of Virginia, he gave us his opinion about what can be expected of the new Soviet leadership:

"I believe that there is no reason to expect any drastic changes, at least for the time being, because it will take time to create a structure within the Politburo. Should any changes take place in the military cadres, since these gain a greater degree of power anywhere during a transition period, we should expect Marshal Dimitri Ustinov to be replaced, probably by Marshal Nikolai Ogarkov.

"The situation, in general, will continue about the same . . . tense between East and West, while the new Soviet leadership gets consolidated and the Politburo experiences any changes. We should expect, at least in the field of foreign policy, many statements in favor of peace, coupled with strenuous efforts to arm themselves. Yuri Andropov certainly has experience in the field of foreign policy and repression. He lacks, however, any experience in the field of domestic economics, which is presently the most important one for the Soviet Union. What can be expected, most certainly, is a larger degree of repression."

Yuri Andropov is an expert in secret police matters. He was the one who attained the extermination of the fledgling dissident movements, taking them to trial and eliminating them, not in the style of Yussef Vissarionovitch Stalin, but, in a subtle manner, although effectively.

# THE BIRTHDAY OF NATHANIEL MACON (1758-1837)—STATESMAN FROM NORTH CAROLINA

• Mr. HELMS. Mr. President, on December 17, 1758, a distinguished American statesman was born in Edgecombe County, later Bute County and today Warren County, N.C. Nathaniel Macon served in the Congress of these United States for 37 years. His colleagues, recognizing his abilities, elected him Speaker of the House and as President pro tempore of the Senate.

Senator Macon entered the College of New Jersey, today Princeton University, in 1774 and studied classics for 2 years. With the outbreak of our War of Independence he did not hesitate to enlist in the military service of his Nation. He joined the New Jersey Militia and fought in a number of battles. He then returned to North Carolina to study law at the Bute County Courthouse before again serving in our military forces. He was elected to the North Carolina Senate, where he served for several years before being elected to the Federal House of Representatives in 1791.

Mr. President, Nathaniel Macon served continuously in the House of Representatives until December 1815. As a close and devoted friend of Thomas Jefferson, he was an outstanding leader of the Jeffersonian Republicans in the House. For his distinguished service and leadership abilities, he was elected Speaker of the House and served in that capacity from 1801 to 1807.

While in the House, Nathaniel Macon vigorously opposed the financial schemes of the Hamiltonian Federalists. He supported the purchase from France of the Louisiana Territory, and also urged President Jefferson to purchase Florida from Spain.

He strongly supported the foreign policy of the Jefferson and Madison administrations and served as the chairman of the House Foreign Relations Committee in 1809. He opposed the recharter of the Bank of the United States in 1811 and in 1816. In matters of commerce, he uniformly opposed any form of protective tariff.

On December 5, 1815, Nathaniel Macon was elected to fill the vacancy left by the resignation of Senator Francis Locke. He was reelected to the Senate in 1819 and again in 1825, and was three times elected by his colleagues as President pro tempore of the Senate. Senator Macon retired to private life in 1828 and spent most of his remaining days at his home, "Buck Spring," in Warren County.

His fellow citizens greatly respected his wide experience and wisdom in matters of state. He was elected a delegate to the convention called to revise the North Carolina State Constitution in 1835 and when the delegates convened the convention, he was unanimously elected its president. The following year, Senator Macon served as one of the Presidential electors supporting Van Buren and Johnson. This was to be his last public service.

Senator Macon was a sincere advocate of simplicity in both public and private life. His life exemplified this principle. His speeches were famous for their forceful and straightforward manner. They embodied the commonsense of the people. His unfailing efforts in behalf of frugality of public expenditure should be an inspiration to us all. The Weekly Raleigh Register wrote of Senator Macon on September 26. 1845.

His economy of the public money was the severest, sharpest, most stringent and constant refusal of almost any grant that could be proposed.

Indeed, said the Weekly Raleigh Register, with him, "not only was \* \* \* parsimony the best subsidy—but \* \* \* the only one."

Senator Macon prepared for this death by purchasing a coffin of plain pine boards. He selected a barren ridge for his gravesite, and directed that it be unmarked except for a simple pile of rough stones. On June 29, 1837, Senator Macon died suddenly at his home in Warren County.

John Randolph of Roanoke said of Senator Macon, "He is the wisest, the purest, and the best man that I ever knew." His friend Thomas Jefferson called him, "the last of the Romans."

All North Carolinians should be proud of Nathaniel Macon, and revere his memory in honor of his significant contributions to our State and Nation.

#### THE INVULNERABILITY OF FUTURE MILITARY TARGETS

• Mr. PRYOR. Mr. President, I shall enter into the Record an article from the December 7 Washington Post. It deals with some of the illusions of the window of vulnerability and the relationship that concept may have to our present and future strategic nuclear forces.

First of all, it points out that only 25 percent of our nuclear warheads are being put at risk by improved Soviet weaponry.

Second, it causes us to ask ourselves if the window of invulnerability is something that is even capable of being restored. Can we really make all military targets invulnerable?

Third, because of increasing technological ingenuity the future conditions of strategic deterrence may rest in an area in which we see the dawning of an increasing vulnerability of all military targets. A day in which all targets will be at risk, not just our population centers.

The nature of nuclear weapons and the doctrines of nuclear defense are in the process of a broad and far-reaching review by this administration. We should all remember that there are certain basic elements of strategic deterrence that will never change, and as much as we would like technology to answer our problems, the dangers of such technological breakthroughs could put the world on an ever more precarious tightrope.

The article follows:

MAYBE AMERICA CANNOT CLOSE THE WINDOW OF VULNERABILITY

(By Christoph Bertram)

Hamburg—When a man has knocked his head against the wall several times and still has failed to get through, it is perhaps time to stand back and think again.

The MX missile program was first given the go-ahead in 1974. Since then, it is has swallowed dollars, human ingenuity and the political energy of at least two adminstrations, in the so-far vain attempt to come up with a concept of how to deploy the missiles in such a way that they would be largely immune to Soviet attack. The strategic analytical community provided the intellectual justification for these efforts by inventing that intriguing, persuasive term, "the window of vulnerability."

One can understand why it has been so difficult for political leaders to resist the lure of this slogan. For it implies not only that the vulnerability of U.S. missiles to Soviet attack is strategically intolerable, but also that there is hope that the window can be closed, that vulnerability is, at worst, a temporary problem.

Both these implications have, however, become increasingly questionable. There is no doubt that it would be highly desirable if U.S. strategic missiles on land could not be destroyed by a preemptive enemy attack. But do strategic deterrence and stability really disappear if only part of the U.S. strategic arsenal, carrying less than 25 percent of the total of nuclear warheads, could be destroyed by a Soviet strike? Those who maintain this view have to argue that to

attack U.S. ground missiles alone would confer on the Soviet Union a concrete, sizable strategic advantage; it is more likely, however, to entail such enormous risks for the Soviets—in execution and in consequence—as to be meaningless once the threat of nuclear war has concentrated minds.

second assumption behind the "window of vulnerability" is even more questionable: that somehow there are ways to restore invulnerability to fixed landbased missiles forces. The president's pro-posal for the "Dense Pack" basing is only the latest and probably not the last in a series of schemes as ambitious as they are uncertain and unaffordable. Perhaps tomorrow there will be "Air Pack"-the MX on giant aircraft-or even "Space Pack," and the more each of these proposals reveals its shortcomings, the more it seems to spur the search for even more complicated technological fixes. So much is clear by now: if there really is a window of vulnerability, its shutters have very rusty hinges, and they have proved, to date, extremely resistant to being closed.

This is probably not for any lack of technological ingenuity. More likely, the vulnerability of all military installations that cannot be moved about to evade detection has come to stay. Indeed, the image that the supporters of the MX program have created may be more apt than they thought the window, rather than being closed, may offer a view to the future conditions of strategic deterrence, the end of the age of invulnerability and the dawning of that of vulnerability.

To date, the United States relies for over 75 percent of its strategic capacity on weapons systems that are still relatively immune to attack—the submarines and the bomber planes. They are likely to remain so for some time, but not indefinitely. There is time, therefore, to contemplate what it will mean for strategic deterrence if the weapons of last resort that serve it are no longer immune to destruction, what new requirements this will raise for defining stability, and what new tasks it will pose for arms procurement and arms control.

The dogged pursuit of ways to provide protection for fixed weapons on the ground is not only likely to fail, it also leaves us less time to tackle this more important, conceptual task. As military technology moves increasingly ahead in making available the means of detection and precise delivery, the vulnerability of all military targets will become the rule, invulnerability the exception.

Analysts and politicians alike should use the time to ask if they have not tended to over-sophisticate what is, after all, the rather primitive notion of nuclear deterrence: that an enemy will be prevented from attack by the credible threat of devastating nuclear retaliation. Practitioners and experts alike have perhaps fallen victim to the temptation of over-refining the essentially unrefinable.

It is said that each leg of the "Triad"—submarines, bomber planes and land-based missiles—would have to be invulnerable; but why could deterrence not rest adequately on two legs and a half (as it does in the Soviet Union)? Why should it be necessary to be able to respond to every strategic option that the Soviets have, if discrete nuclear options are a contradiction in terms? Why not undercut Soviet programs aimed at hitting fixed U.S. targets by reducing the number of those targets?

The problems raised by the MX are a forceful reminder that, rather than blame the technologists for their inability to come up with convincing remedies to our conceptual problems, we have to consider the concepts themselves. If that lesson is learned from the present MX predicament, the millions of dollars so far invested in the program will not have been entirely wasted.

#### CUBA

 Mr. SYMMS. Mr. President, I ask that the following article from the Mexican journal Replica be printed in the Record.

The article follows:

[From Replica, September 1982]
U.S. MUST NEGOTIATE CUBAN STATUS WITH
U.S.S.R.

#### (By Jorge Vazque)

The history of the verbal dispute between Cuba and the United States lies in a geopolitical context whose principal protagonists are the USSR and the United States, contrary to what off-the-track analysts and observers might think.

Since the establishment of communism in Cuba in 1959, thanks to the complicity of the U.S. State Department, the Cuban affair has been dealt with by Washington and Moscow at the margin of the Castro regime itself.

This was shown in 1962. Kennedy and Krushev acted out a great farce which allowed, on the one hand, the survival of the recently established communist regime in Cuba, and handcuffed the United States and the Cuban patriots who were fighting for the reconquest of the island.

From then on, the Cuban case was dealt with as a package, along with others, in U.S.-Soviet discussions.

Up until the Soviet invasion of Afghanistan, in December of 1979, the U.S. administrations had closed their eyes to the growing interventionism of Cuba in Latin America and Africa, training, supplying, and directing the activities of guerrilla and terrorist organizations in America, and sending scores of thousands of mercenaries to the black continent to fight, in aid of the communist regimes placed in jeopardy by patriotic and anticommunist forces.

After Afghanistan, which broke the agreement made at the summit by the Soviet leaders and the power groups which control the United States, inconsistency and indecision have characterized the U.S. stand with regard to Cuba.

While a sector of the Reagan administration advocates the imposition of drastic sanctions against Havana, to chastise its interventionism, there are those who consider infructuous all measures which are taken if they do not fall within the general context of the new political stand of contention assumed before the USSR.

"The United States should increase its military and economic pressure on Cuba, bringing down Cuban aircraft and blockading the island, if necessary, to combat the Soviet presence", said Republican Senator Steve Symms last June 13.

Symms called Cuba "a threat to peace and security on this continent and in other parts of the world".

"There can be no agreement between the United States and Cuba", stated former Costa Rican President Jose Figueres, after conversing with Castro for 7 hours last July q

Jose Figueres, member of the infamous "Caribbean Legion" which favored the communization of Cuba and the subversive activities on the continent, stated that Cuba would follow the same ideological line and that it does not fear U.S. reprisals.

In spite of the fact that he has played, for the last three years, the part of "anticommunist", Figueres did not let the opportunity go by to shower new eulogies on the Cuban tyrant, whom he found mature, "holding fast to the communist ideas, but with respect for democratic thought".

#### NEW EVIDENCES

There have been numerous occasions on which, from the pages of Replica, we have denounced, with unrefutable proofs, the interference of Cuba in the revolutionary processes which are taking place in Latin America.

Likewise, we have put in evidence the fact that Cuban interventionism—training, arming, and directing—make up part of the plan outlined by the high Soviet command in order to subvert order in the Latin American nations, as a prior step to their takeover.

Once again we summarize a report which

sheds new light on the subject.

"With the aid of the Soviet Union, Cuba possesses the best equipped military apparatus of Latin America, with a significant of ensive capacity", stated a report entitled, "The Cuban armed forces and the Soviet military presence", made known last August 6 by the International Communication Agency, dependent on the U.S. State Department.

"The armed forces of Cuba, says the report, total more than 225 thousand men (200 thousand in the army, 15 thousand in the air force, and 10 thousand in the navy)". To these men in service must be added 500 thousand militia (with additional arms) which Cuba hopes to increase to one million

"On the island there are between 6 thousand and 8 thousand Soviet civilian advisors and 2 thousand military advisors", indicates the report, stating that "the land brigade forces (Soviet) located near Havana, have approximately 2,600 men and include a batallion of tanks and three motorized machine-gun batallions, in addition to several backup and service units".

The Cuban air force, according to the report which we are quoting, is perhaps the best equipped of Latin America, and possesses some 200 MIG reaction hunters, provided by the Soviets.

So much for the report.

The aggression which El Salvador is suffering, on the part of the communist guerrilla, armed and backed by Cuba and Nicaragua, was denounced last August 11, by the Salvadoran chancellor Fidel Chavez Mena.

Chavez Mena accused Cuba and Nicaragua "of providing arms to the Salvadoran guerrillas", during his interview with U.S. Secretary of State, George Shultz, on August 11.

After that interview, he affirmed that it is indispensable that the United States continue to provide military and economic aid to El Salvador in order to continue the fight against the guerrillas.

"With the backing of the United States, we will contain the activities of the terrorists who are destroying the economy of the country", Chavez Mena ended.

#### NEW NORTH AMERICAN STANCE

To the seriousness of the situation which El Salvador is facing, as the principal stage, and Central America, as the threatened region, and with the Washington-Moscow entente broken, the U.S. Senate approved a resolution (by 69 votes in favor and 27 against) whose central part establishes that the United States is ready to:

(a) "Prevent by any means necessary, including the use of weapons, the Marxist-Leninist regime of Cuba from extending by force of threat its aggressive or subversive activities to any part of this continent".

(b) "To prevent in Cuba the creation or use of a military capacity backed from abroad, which would put in danger the security of the United States".

(c) "To work with the Organization of American States (OAS) and Cuban lovers of freedom to seek the self-determination for the people of Cuba".

This resolution had the opposition of influential Senator Charles Percy, Chairman of the Senate Foreign Relations Committee, who attempted unsuccessfully to keep the resolution from debate or vote.

#### RADIO MARTI DIVIDES THE ADMINISTRATION

Reagan's project of establishing Radio Marti, whose objective is, according to spokesmen of his administration, to offer the Cubans the means to know what kind of society has been imposed upon them, what the State does with the riches of the Cuban people, why so many have to leave on military missions abroad, never to return, and a source of news and entertainment which is not manipulated by the State, has divided the administration.

Last July 23, Democrat and Republican congressmen, among them Jim Leach, of Iowa, and Timothy Wirth, of Colorado, criticized this project.

For its part, the "Washington Post" shot down the project, which it described as "superfluous objectionable, and extravagant".

Finally, last August 11, the House of Representatives approved the Radio Marti project, which now has a budget of seven and a half million dollars, and which will be administered by the Committee for International Broadcasting, which also controls "Radio Free Europe" and "Radio Liberty", created years back to broadcast programs to the countries of East Europe.

The approval of the senatorial resolution and of the establishment of Radio Marti is indicative of the change of the U.S. administration's stance with regard to Cuba. Nevertheless, and according to what we indicated a few lines back, the United States will have no other alternative but to negotiate the Cuban status with the Soviet Union within the framework of the present world problems.

It should not be forgotten that Fidel Castro is just a puppet of the Soviets and that any affair which involves Cuba should be dealt with in the Kremlin. Anything else will be just verbage, demagoguery and a lack of political pragmatism.

#### ORDER OF PROCEDURE

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, these items have been cleared on the consent calendar by the distinguished minority leader. I have been asked to handle them.

Mr. PROXMIRE. Will the distinguished Senator yield me 30 seconds?

Mr. STEVENS. I am happy to yield.

AUTHORIZING PRODUCTION OF DOCUMENTS BY THE SENATE SUBCOMMITTEE PERMANENT ON INVESTIGATIONS

Mr. STEVENS. Mr. President, is the Senator prepared for me to submit a resolution in behalf of Senator BAKER and the Senator from West Virginia dealing with the production of documents requested by the Permanent Subcommittee on Investigations? May we proceed with that item at this time?

Mr. ROBERT C. BYRD. Yes, Mr. President.

Mr. STEVENS. Mr. President, I send to the desk a resolution on behalf of the majority leader and the distinguished Senator from West Virginia and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows: A resolution (S. Res. 522) authorizing production of documents by the Senate Permanent Subcommittee on Investigations.

The PRESIDING OFFICER. there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 522) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

#### S. RES. 522

Whereas, the United States Attorney for Connecticut has requested copies of records of the Senate Permanent Subcommittee on Investigations relating to the Subcommittee's investigation of fraud in federal workers' compensation, and certain memoranda of interviews, subpoenaed records, and related documents of that Subcommittee investigation may be useful to the United States

Attorney; Whereas, by the privileges of the the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by administrative or judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that documents, papers, and records under the control of or in the possession of the Senate are needful for use in an investigation for the promotion of justice, the Senate will take such action thereon as will promote the ends of justice consistently with the privileges and rights of the Senate: now, therefore, be it

Resolved, That the Chairman and Ranking Minority Member of the Senate Permanent Subcommittee on Investigations, acting jointly, are authorized to produce to the United States Attorney for Connecticut memoranda of interviews, subpoenaed records, and other documents relating to the Subcommittee's investigation of fraud in federal workers' compensation.

Mr. STEVENS. Mr. President, move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the

The motion to lay on the table was agreed to.

AUTHORIZING APPROPRIATIONS FOR ATMOSPHERIC, CLIMATIC, AND OCEAN POLLUTION TIVITIES OF THE NATIONAL OCEANIC AND ATMOSPHERIC THE NATIONAL ADMINISTRATION, 1983 AND

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar No. 770, H.R. 6324

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6324) to authorize appropriations for atmospheric, climatic, and ocean pollution activities of the National Oceanic and Atmospheric Administration for the fiscal years 1983 and 1984, and for other purposes.

The PRESIDING OFFICER. Is there objection to its immediate consideration?

There being no objection, the Senate proceeded to consider the bill.

#### UP AMENDMENT NO. 1531

(Purpose: To authorize certain programs within the National Oceanic and Atmospheric Administration, and for other purposes)

Mr. STEVENS. Mr. President, I send an amendment to the desk in behalf of Senator Schmitt and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), on behalf of Mr. SCHMITT, proposes an unprinted amendment numbered 1531.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

#### TITLE I-NATIONAL WEATHER SERVICE

SEC. 101. No Weather Service Office or Weather Service Forecast Office of the National Weather Service shall be closed or consolidated unless such closure or consolidation is in accordance with appropriate criteria and procedures established by the Secretary of Commerce and published in the Federal Register. Such procedures shall include: hearings, comment periods, public notice, and other appropriate means of presenting evidence, views, and opinions.

#### TITLE II—NATIONAL CLIMATE PROGRAM

SEC. 201. this title may be cited as the "National climate Program Amendments of

SEC. 202. Section 4 of the National Climate Program Act (15 U.S.C. 2903) is amended-

(1) by redesignating paragraphs (1) through (3) as paragraphs (2) through (5), respectively; and

(2) by inserting before paragraph (2), as so redesignated, the following new paragraph:

"(1) The term 'Board' means the Climate Program Policy Board.".

SEC. 203. (a) Subsection (c) of section 5 of the National Climate Program Act (15 U.S.C. 2904 (c)) is amended—

(1) by inserting "(1)" immediately before The Secretary"

(2) by designating the third sentence as paragraph (4); and

(3) by striking the second sentence and inserting in lieu thereof the following new paragraphs: "(2) The Office shall-

"(A) serve as the lead entity responsible

for adminstering the program;

"(B) be headed by a Director who shall represent the Climate Program Policy Board and shall be the spokesman for the program;

"(C) serve as the staff for the Board and its supporting committees and working groups;

"(D) review each agency budget request transmitting under subsection (g)(1) and submit an analysis of the requests to the Board for its review:

"(E) be responsible for coordinating interagency participation in international climate-related activities; and

"(F) work with the National Academy of Sciences and other private, academic, State, and local groups in preparing and menting the climate plan (described in subsection (d)(g)) and the program.

The analysis described in subparagraph (D) shall include an analysis of how each agency's budget request relates to the priorities and goals of the program established pursuant to this Act.

"(3) The Secretary may provide, through the Office, financial assistance, in the form of contracts to the extent provided or approved in advance in appropriation Acts, or grant or cooperative agreements, for climate-related activities which are needed to meet the goals and priorities of the program set forth in the climate plan pursuant to subsection (d)(9), if such goals and priorities are not being adequately addressed by any Federal department, agency, or instrumentality.

(b) Subsection (d) of such section is amended-

(1) by striking the semicolon at the end of paragraph (7) and inserting in lieu thereof a period and the following: "Such mechanisms may provide, among others, for the following State and regional services and functions: (A) studies relating to and analyses of climatic effects on agricultural production, water resources, energy needs, and other critical aspects of the economy, (B) atmospheric data collection and monitoring on a statewide and regional basis, (C) advice to regional, State, and local government agencies regarding climate-related issues, (D) information to users within the State regarding climate and climatic effects, and (E) information to the Secretary regarding the needs of persons within the State for climate-related services, information, and data. The Secretary may make annual grants to any State or group of States, such grants to be made available to public or private educational institutions, to State agencies, and to other persons or institutions qualified to conduct climate-related studies or provide climate-related services:".

or provide climate-related services;",
(2) by striking "biennially" in paragraph
(9) and inserting in lieu thereof "at a frequency (not more often than biennially or less often than quadrennially) determined by the Board"; and

(3) by striking "the intergovernmental program under section 6" in paragraph (9) and inserting in lieu thereof "the intergovernmental program described in paragraph

(7)".

(c) Subsection (e) of such section is

amended to read as follows:

"(e) CLIMATE PROGRAM POLICY BOARD,—(1) The Secretary shall establish and maintain an interagency Climate Program Policy Board, consisting of representatives of the Federal agencies specified in subsection (b)(2) and any other agency which the Secretary believes should participate in the program.

"(2) The Board shall-

 (A) be responsible for coordinated planning and progress review for the program;

"(B) review all agency and department budget requests related to climate transmitted under subsection (g)(1) and submit a report to the Office of Management and Budget concerning such budget requests;

"(C) establish and maintain such interagency groups as the board determines to be necessary to carry out its activities; and

"(D) consult with and seek the advice of users and producers of climate data, information, and services to guide the Board's efforts, keeping the Director and the Congress advised of such contacts.

"(3) The Board biennially shall select a Chairperson from among its members. A Board member who is a representative of an agency may not serve as the Chairperson for a term if an individual who represented that same agency on the Board served as the Board's Chairperson for the previous term."

(d) Subsection (f)(2) of such section is amended by inserting "with the Office" im-

mediately after "shall cooperate".

(e) The first sentence of subsection (g)(1) of such section is amended by inserting before the period at the end thereof the following: "and shall transmit a copy of such request to the National Climate Program Office".

SEC. 204. Section 6 of the National Climate Program Act (15 U.S.C. 2905) is re-

pealed.

SEC. 205. Section 7 of the National Climate Program Act (15 U.S.C. 2906) is amended by striking "January 30" and inserting in lieu thereof "March 31".

SEC. 206. For the purpose of enabling the Secretary of Commerce to carry out his functions, duties, and responsibilities relating to the National Climate Program Office under the National Climate Program Act (15 U.S.C. 2901 et seq.) there is authorized to be appropriated, for each of the fiscal years 1983 and 1984, the sum of \$1,800,000.

TITLE III—WEATHER MODIFICATION REPORTING

SEC. 301. \$100.000 is authorized to be appropriated in each of the fiscal years 1983 and 1984 to carry out the provisions of the Act entitled "An Act to provide for the reporting of weather modification activities to the Federal Government" (15 U.S.C. 330 et seq.).

 Mr. SCHMITT. Mr. President, the amendment to H.R. 6324 which I have offered includes two needed reauthorizations and one amendment to existing law. As amended, title I of H.R. 6324 will provide guidance to the Department of Commerce regarding the closing of National Weather Service offices. The Department will establish certain standards, principles and procedures to be met and followed in future closures of weather stations.

In recent years, the Congress has rejected proposals by the Department of Commerce to close selected weather stations. This title establishes principles which the Congress expects will be met before any closures are proposed. This process should help resolve the impasse which the Congress and the administration have reached.

Title II provides a number of amendments to the National Climate Program Act. These amendments provide some necessary technical corrections to the existing law and authorizations for fiscal year 1983 and fiscal year 1984. The amendments establish the Climate Program Policy Board along with its relationship to the National Climate Program Office within the National Oceanic and Atmospheric Administration (NOAA).

Title III authorizes \$100,000 under the Weather Modification Reporting Act for fiscal years 1983 and 1984.

Titles I, II, and III are also contained in S. 2605, the NOAA authorization bill for fiscal year 1983, which is also on the calendar awaiting action.

I urge the Senate to act favorably on

H.R. 6324 as amended.

Mr. STEVENS. Mr. President, I move the adoption of the amendment. The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1531) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a

third time.

The bill was read the third time.
The PRESIDING OFFICER. The
bill having been read the third time,
the question is, Shall it pass?

So the bill (H.R. 6324) was passed. Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table

The motion to lay on the table was agreed to.

### EXCHANGE OF CERTAIN INDIAN LAND

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar 875, H.R. 4001.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4001) to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs with amendments, as follows:

On page 1, line 9, strike "Vanderwagon", and insert "Vanderwagen"; and

On page 2, line 1, strike "Vanderwagon", and insert "Vanderwagen".

Mr. STEVENS. MR. President, I ask that the committee amendments be agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments were agreed to en bloc.

#### UP AMENDMENT NO. 1532

(Purpose: To make a technical amendment to Public Law 97-344 and to provide for the availability of Indian programs and services to members of the Houlton Band of Malisect Indians)

Mr. STEVENS. Mr. President, I send an amendment to the desk on behalf of Senator Cohen and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. Stevens) on behalf of Mr. Cohen, proposes unprinted amendment numbered 1532.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, after line 4, add the following sections:

SEC. 2. The Act entitled "An Act to provide for the partitioning of certain restricted Indian land in the State of Kansas", approved October 15, 1982 (Public Law 97-344), is amended by striking out "township 11" in paragraph (1) and inserting in lieu thereof "township 12".

SEC. 3. Section 6(i) of the Maine Indian Claims Settlement Act of 1980 (Public Law 96-420) is amended by adding at the end

thereof the following:

"Notwithstanding any other provision of law authorizing the provision of special programs and services by the United States to Indians because of their status as Indians, any member of the Houlton Band of Maliseet Indians in or near the Town of Houlton, Maine, shall be eligible for such programs and services without regard to the existence of a reservation or of the residence of such member on or near a reservation."

 Mr. COHEN. Mr. President, H.R. 4001 is a bill to provide for an exchange of lands between the Navajo Indian Tribe and certain private citizens in the State of New Mexico. This

bill will provide the necessary legal authority to allow the Navajo Tribe to transfer to Mr. Bernard J. Vanderwagen and his daughter, Linda Vander-wagen Ortega, a small parcel of land of approximately 540 acres in exchange for the transfer by these persons of privately owned fee land of approximately 640 acres. The value of the lands being exchanged is essentially equal. A number of Navajo Indians are presently residing on the Vanderwagen lands and this exchange will eliminate any possible need for relocation. Companion legislation was introduced in the Senate by Senator SCHMITT (S. 1779) which was reported out of the Select Committee on Indian Affairs before the House acted on H.R. 4001.

Mr. President, the amendment to this bill will add two new sections to this bill. Section 2 will amend Public Law 97-344, an act to provide for the partitioning of certain restricted lands in the State of Kansas. There is an error in the land description contained in that act and the purpose of this new section in H.R. 4001 is simply to correct that error.

The new section 3 which I propose to add to H.R. 4001 is to correct an oversight in the Maine Indian Claims Settlement Act (Public Law 96-420, 94 Stat. 1785) which was enacted into law more than 2 years ago. With the passage of that act, the Houlton Band of Maliseet Indians were granted Federal recognition and a trust fund of \$900,000 was established to provide for the acquisition of 5,000 acres of land for the band.

The extension of Federal recognition to the band was expected to make them eligible for Federal Indian services. As it turned out, however, the band members were not eligible for such services because they do not live "on or near a reservation." Both the Bureau of Indian Affairs and the Indian Health Service hold that they are legally restricted from delivering such services to Indians who do not live "on or near a reservation." Since the band has not yet acquired land as contemplated by the Maine Indian Claims Settlement Act, they remain ineligible for these services. The amendment I am proposing today would make the band eligible for such services notwithstanding the fact that they have not yet obtained their land. This amendment would bring the act inot conformity with the intent of the Select Committee on Indian Affairs when it reported the bill and with the intent of the Congress when the law was enacted.

I ask that this amendment be agreed to.

• Mr. MITCHELL. Mr. President, I rise in support of an amendment offered by my colleague from Maine, Senator Cohen, to H.R. 3731.

The proposal would amend the Maine Indian Claims Settlement Act of 1980. That statute gave Federal recognition to the Houlton Band of Maliseet Indians of Maine and established in its behalf a \$900,000 trust fund for the acquisition of 5.000 acres of land.

Federal recognition was to make the Houlton Band eligible for all Federal Indian services. However, because the band does not live "on or near a reservation" at the present time, it has found that neither the Bureau of Indian Affairs nor the Indian Health Service can legally provide available services.

Senator Cohen's amendment would make the Houlton Band eligible for all Federal services, despite the fact that it has not yet acquired all of the land contemplated by the Maine Indian Claims Settlement Act. This would in effect carry out the true intent of Congress in resolving the Maine tribal land claims and permit members of the Houlton Band to receive the full range of Indian services to which they are entitled and for which a great need exists.

Mr. President, I hope the amendment will be adopted.

Mr. STEVENS. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1532) was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 4001) was read the third time, and passed.

#### FURTHER CONTINUING APPROPRIATIONS, 1983

Mr. STEVENS. Mr. President, I yield to the distinguished Senator from Oklahoma.

BOREN AMENDMENT ON MONETARY POLICY

Mr. BOREN. Mr. President, I would like to ask, while the Senator from Utah (Mr. Garn) is still on the floor, if we might enter at this time into a unanimous-consent agreement concerning my amendment on monetary policy. Previously it was 20 minutes equally divided. The text of this amendment has now been cleared with the Senator from Utah who had raised an objection previously.

Mr. STEVENS. I would say to my good friend it was my understanding there was perhaps some objection—I say to my good friend that it is my understanding there is perhaps some action by the Senator from New Mexico, the chairman of the Budget Committee. I have no objection. I merely add to the unanimous-consent

request that that time agreement be subject to the approval of the distinguished Senator from New Hampshire tomorrow.

Mr. BOREN. That is fine with me, Mr. President. I think the objection was to another amendment I offered.

Mr. STEVENS. He raised another objection also, unless I am confused with another amendment. I have no objection.

The Senator from Utah advises me that is a time agreement, but just to protect the chairman of the Budget Committee, I merely ask unanimous consent that this be subject to his approval tomorrow.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

#### BUDGET ACT WAIVER-S. 2941

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 502.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 502) waiving section 402(a) of the Congressional Budget Act of 1947 with respect to the consideration of S. 2941

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution? There being no objection, the resolution (S. Res. 502) was considered and agreed to, as follows:

#### S. RES. 502

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such act are waived with respect to the consideration of S. 2941. Such waiver is neccessary because S. 2941 authorizes the enactment of new budget authority which would first become available in fiscal year 1983 and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations. S. 2941 would authorize \$3.873,000 for fiscal year 1983 to permit the National Oceanic and Atmospheric Administration to continue ocean pollution research under the National Ocean Pollution Planning Act of 1978. An identical authorization is contained in S. 2605, the National Oceanic and Atmospheric Administration Authorization Act, which was reported out of Committee on May 11, 1982. Unfortunately no action has been taken on S. 2605 on the Senate floor for reasons totally unrelated to the authorization for ocean pollution research. Therefore the Committee on Commerce, Science, and Transportation has decided to report this authorization as a separate bill so that this vital work may continue. The amount of the authorization is the same as the request for this program in the President's budget.

#### NATIONAL OCEAN POLLUTION PLANNING ACT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 973, the National Ocean Pollution Planning Act.

The PRESIDING OFFICER. The

bill will be stated.

The assistant legislative clerk read as follows:

A bill (S. 2941) to authorize funds for the National Oceanic and Atomospheric Administration for fiscal year 1983 to carry out the provisions of the National Ocean Pollution Planning Act of 1978.

#### UP AMENDMENT NO. 1533

(Purpose: To authorize appropriations for the National Advisory Committee Oceans and Atmosphere Act of 1977)

Mr. STEVENS. I sent to the desk an amendment in behalf of Senator

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for the Senator from New Mexico (Mr. SCHMITT), purposes an unprinted amendment numbered 1533.

At the end of the bill, add the following new section:

SEC. 2. Section 8 of the National Advisory Committee on Oceans and Atmosphere Act of 1977 (33 U.S.C. 857-18) is amended—
(1) by striking "and" immediately after

"1981,"; and
(2) by striking "1982." and inserting in lieu thereof "1982, and \$680,000 for the fiscal year ending September 30, 1983".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1533) was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

#### S. 2941

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 10 of the National Ocean Pollution Planning Act of 1978 (33 U.S.C. 1709) is amended by striking out "and" each time it appears therein, and by inserting the following immediately before the period at the end thereof: ", and not to exceed \$3,873,000 for the fiscal year ending September 30,

#### AUTHORIZATION OF PRODUC-TION OF DOCUMENTS BY THE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. STEVENS. Mr. President, I send to the desk a resolution in behalf of the distinguished minority and majority leaders and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the consideration of the resolution?

The clerk will state the resolution. The legislative clerk read as follows:

A Senate resolution (S. Res. 523) authorizing production of documents by the Senate Permanent Subcommittee on Investigations.

The PRESIDING OFFICER. there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and passed.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

#### S. RES. 523

Whereas, the Department of Labor has requested copies of records of the Senate Permanent Subcommittee on Investigations relating to the Subcommittee's investigation of Local 5 of the Hotel Employees and Restaurant Employees International Union, and certain subpoenaed records and related documents that may be useful to that Department;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by administrative or judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that documents, papers, and records under the control of or in the possession of the Senate are needful for use in an investigation for the promotion of justice, the Senate will take such action thereon as will promote the ends of justice consistently with the privileges and rights of the Senate: Now, therefore, be it Resolved, That the Chairman and Rank-

ing Minority Members of the Senate Permanent Subcommittee on Investigations, acting jointly, are authorized to produce to the Department of Labor subpoenaed records and other documents relating to the Subcommittee's investigation of Local 5 of the Hotel Employees and Restaurant Employees International Union.

#### BUDGET ACT WAIVER-S. 2719

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 484.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 484) waiving section 402(a) of the Congressional Budget Act with respect to the consideration of S. 2719,

The PRESIDING OFFICER. there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 484) was considered, and agreed to, as follows:

#### S. RES. 484

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 2719. Such waiver is necessary because S. 2719, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983. Such Act was introduced on July 1, 1982, and was the subject of hearing before the Select Committee on Indian Affairs on July

14. Such waiver is necessary because, due to the lateness of the introduction of the Act, the Select Committee on Indian Affairs was unable to complete action and report on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such fiscal year 1983 authorizations

S. 2719 embodies a negotiated settlement of claim to land and consequential damages raised by the Mashantucket Pequot Tribe of Connecticut. The timely action of Congress is necessary to ensure that the settlement is effected and the claims are forever extinguished. The Act would provide \$900,000 in new budget authority.

#### MASHANTUCKET PEQUOT IN-SETTLEMENT DIAN CLAIMS ACT

Mr. STEVENS. Mr. President, I ask that the Senate turn to the immediate consideration of S. 2719.

The PRESIDING OFFICER. The bill will be stated.

The legislative clerk read as follows: A bill (S. 2719) entitled the Mashantucket Pequot Indian Claims Settlement Act.

The Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Mashantucket Pequot Indian Claims Settlement Act".

#### CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that-

(a) there is pending before the United States District Court for the District of Connecticut a civil action entitled Western Pequot Tribe of Indians against Holdridge Enterprises Incorporated, et al., Civil Action Numbered H76-193 (D. Conn.), which involves Indian claims to certain public and private lands within the town of Ledyard, Connecticut:

(b) the pendency of this lawsuit has placed a cloud on the titles to much of the land in the town of Ledyard, including lands not involved in the lawsuit, which has resulted in severe economic hardships for the residents of the town;

(c) the Congress shares with the State of Connecticut and the parties to the lawsuit a desire to remove all clouds on titles resulting from such Indian land claims;

(d) the parties to the lawsuit and others interested in the settlement of Indian land claims within the State of Connecticut have reached an agreement which requires implementing legislation by the Congress of the United States and the Legislature of the State of Connecticut;

(e) the Western Pequot Tribe, as represented as of the time of the passage of this Act by the Mashantucket Pequot Tribal Council, is the sole successor in interest to the aboriginal entity generally known as the Western Pequot Tribe which years ago claimed aboriginal title to certain lands in the State of Connecticut; and

(f) The State of Connecticut is contributing twenty acres of land owned by the State of Connecticut to fulfill this Act. The State of Connecticut has provided special services to the members of the Western Pequot Tribe residing within its borders.

United States has provided few, if any, special services to the Western Pequot Tribe and has denied that it has jurisdiction over or responsibility for said Tribe. In view of the provision of land by the State of Connecticut and the provision of special services by the State of Connecticut without being required to do so by Federal law, it is the intent of Congress that the State of Connecticut not be required to further contribute directly to this claims settlement.

#### DEFINITIONS

SEC. 3. For the purposes of this Act-

(a) the term "Tribe" means the Mashantucket Pequot Tribe (also known as the Western Pequot Tribe) as identified by chapter 832 of the Connecticut General Statutes and all its predecessors and successors in interest. The Mashantucket Pequot Tribe is represented, as of the date of the enactment of this Act, by the Mashantucket Pequot Tribal Council;

(b) the term "land or natural resources" means any real property or natural resources, or any interest in or right involving any real property or natural resources, including without limitation minerals and mineral rights, timber and timber rights, water and water rights, and hunting and

fishing rights;
(c) the term "private settlement lands" means (1) the eight hundred acres, more or less, of privately held land which are identified by a red outline on a map filed with the Secretary of the State of Connecticut in accordance with the agreement referred to in section 2(d) of this Act, and (2) the lands known as the Cedar Swamp which are adjacent to the Mashantucket Pequot Reservation as it exists on the date of the enactment of this Act. Within thirty days of the enactment of this Act, the Secretary of the State of Connecticut shall transmit to the Secretary a certified copy of said map;

(d) the term "settlement lands" means

(1) the lands described in sections 2(a) and 3 of the Act to Implement the Settlement of the Mashantucket Pequot Indian Land Claims as enacted by the State of Connecticut and approved on June 9, 1982, and (2) the private settlement lands.

(e) the term "Secretary" means the Secre-

tary of the Interior;

(f) the term "transfer" means any transaction involving, or any transaction the purpose of which was to effect, a change in title to or control of any land or natural resources, and any act, event, or circumstance that resulted in a change in title to, possession of, dominion over, or control of land or natural resources, including any sale, grant, lease, allotment, partition, or conveyance, whether pursuant to a treaty, compact or statute of a State or otherwise; and

(g) the term "reservation" means the existing reservation of the Tribe as defined by chapter 824 of the Connecticut General Statutes and any settlement lands taken in trust by the United States for the Tribe.

APPROVAL OF PRIOR TRANSFERS; EXTINGUISH-MENT OF ABORIGINAL TITLES AND INDIAN

SEC. 4. (a) Any transfer before the date of enactment of this Act from, by, or on behalf of the Tribe or any of its members of land or natural resources located anywhere within the United States, and any transfer before the date of enactment of this Act from, by, or on behalf of any Indian, Indian nation, or tribe or band of Indians of land or natural resources located anywhere within the town of Ledyard, Connecticut, shall be deemed to have been made in accordance

with the Constitution and all laws of the United States, including without limitation the Trade and Intercourse Act of 1790, Act of July 22, 1790 (ch. 33, Sec. 4, 1 Stat. 137, 138), and all amendments thereto and all subsequent reenactments and versions thereof, and Congress hereby does approve and ratify any such transfer effective as of the date of said transfer: Provided, however, That nothing in this section shall be construed to affect or eliminate the personal claim of any individual Indian (except for federal common law fraud claim) which is pursued under any law of general applicability that protects non-Indians as well as Indians

(b) By virtue of the approval and ratification of a transfer of land or natural resources effected by subsection (a), any aboriginal title held by the Tribe or any member of the Tribe, or any other Indian, Indian nation, or tribe or band of Indians, to any land or natural resources the transfer of which was approved and ratified by subsection (a) shall be regarded as extinguished as of the date of such transfer.

(c) By virtue of the approval and ratification of a transfer of land or natural resources effected by this section, or the extinguishment of aboriginal title effected thereby, any claim (including any claim for damages for trespass or for use and occupancy) by, or on behalf of, the Tribe or any member of the Tribe or by any other Indian, Indian nation, or tribe or band of Indians, against the United States, any State of subdivision thereof or any other person which is based on—

(1) any interest in or right involving any land or natural resources the transfer of which was approved and ratified by subsec-

tion (a), or

(2) any aboriginal title to land or natural resources the extinguishment of which was effected by subsection (b), shall be regarded as extinguished as of the date of any such transfer.

(d)(1) This section shall take effect upon the appropriation of \$900,000 as authorized under subsection 5(e) of this Act.

(2) The Secretary shall publish notice of such appropriation in the Federal Register when the funds are deposited in the fund established under subsection 5(a) of this Act.

#### MASHANTUCKET PEQUOT SETTLEMENT FUND

SEC. 5. (a) There is hereby established in the United States Treasury a fund to be known as the Mashantucket Pequot Settlement Fund. This fund shall be held in trust by the Secretary for the benefit of the Tribe and administered in accordance with this Act.

(b)(1) The Secretary is authorized and directed to expend, at the request of the Tribe, the fund together with any and all income accruing to such fund in accordance

with this subsection.

(2) Not less than \$600,000 of the fund shall be available until January 1, 1985, for the acquisition by the Secretary of private settlement lands. Subsequent to January 1, 1985, the Secretary shall determine whether and to what extent an amount less than \$600,000 has been expended to acquire private settlement lands and shall make that amount available to the Tribe to be used in accordance with the economic development plan approved pursuant to subsection 5(b)(3).

(3) The Secretary shall disburse all or part of the fund together with any and all income accruing to such fund excepting the amount reserved in subsection 5(b)(2) ac-

cording to a plan to promote the economic development of the Tribe. (A) The Tribe shall submit an economic development plan to the Secretary and the Secretary shall approve such plan within sixty days of its submission if he finds that it is reasonably related to the economic development of the Tribe. If the Secretary does not approve such plan, he shall, at the time of his decision, set forth in writing and with particularity, the reasons for his disapproval. (B) The Secretary may not agree to terms which provide for the investment of the fund in a manner not in accordance with section 1 of the Act of June 24, 1938 (52 Stat. 1037), unless the Tribe first submits a specific waiver of liability on the part of the United States for any loss which may result from such an investment. (C) The Tribe may, with the approval of the Secretary, alter the economic development plan subject to the conditions set forth in subsection 5(b)(3)(A).

(4) Under no circumstances shall any part of the fund be distributed to any member of the Tribe unless pursuant to the economic development plan approved by the Secre-

tary under subsection 5(b)(3).

(5) As the fund or any portion thereof is disbursed by the Secretary in accordance with this section, the United States shall have no further trust responsibility to the Tribe or its members with respect to the sums paid, any subsequent expenditures of these sums, or any property other than private settlement lands or services purchased with these sums.

(6) Until the Tribe has submitted and the Secretary has approved the terms of the use of the fund, the Secretary shall fix the terms for the administration of the portion of the fund as to which there is no agree-

ment.

(7) Lands or natural resources acquired under subsection (5)(b) which are located within the settlement lands shall be held in trust by the United States for the benefit of the Tribe.

(8) Land or natural resources acquired under subsection (b) which are located outside of the settlement lands shall be held in fee by the Mashantucket Pequot Tribe, and the United States shall have no further trust responsibility with respect to such land and natural resources. Such lands or natural resources shall not be subject to any restriction against alienation under the laws of the United States.

(9) Notwithstanding the provisions of section 1 of the Act of August 1, 1888 (25 Stat. 357), as amended, and section 1 of the Act of February 26, 1931 (46 Stat. 1421), the Secretary may acquire land or natural resources under this section from the ostensible owner of the land or natural resources only if the Secretary and the ostensible owner of the land or natural resources have agreed upon the identity of the land or natural resources to be sold and upon purchase price and other terms of sale. Subject to the agreement required by the preceding sen-tence, the Secretary may institute condemnation proceedings in order to perfect title, satisfactory to the Attorney General, in the United States and condemn interests adverse to the ostensible owner.

(c) For the purpose of substitle A of the Internal Revenue Code of 1954, any transfer of private settlement lands to which subsection (b) applies shall be deemed to be an involuntary conversion within the meaning of

section 1033 of such Code.

(d) The Secretary may not expend on behalf of the Tribe any sums deposited in the fund established pursuant to subsection (a) of this section unless and until he finds that authorized officials of the Tribe have executed appropriate documents relinquishing all claims to the extent provided by sections 4 and 10 of this Act, including stipulations to the final judicial dismissal with prejudice of its claims.

(e) There is authorized to be appropriated \$900,000 to be deposited in the fund.

#### JURISDICTION OVER RESERVATION

Sec. 6. Notwithstanding the provision relating to a special election in section 406 of the Act of April 11, 1968 (25 U.S.C. 1326), the reservation of the Tribe is declared to be Indian country subject to State jurisdiction to the maximum extent provided in title IV of such Act.

### LIMITATION OF ACTIONS: FEDERAL COURT JURISDICTION

SEC. 7. (a) Notwithstanding any other provision of law, the constitutionality of this Act may not be drawn into question in any action unless such question has been raised in...

(1) a pleading contained in a complaint filed before the end of the one-hundred-and-eighty-day period beginning on the date of the enactment of this Act. or

(2) an answer contained in a reply to a complaint before the end of such period.

(b) Notwithstanding any other provision of law, exclusive jurisdiction of any action in which the constitutionality of this Act is drawn into question is vested in the United States District Court for the District of Connecticut.

(c) Any action to which subsection (a) applies and which is brought in the court of any State may be removed by the defendant to the United States District Court for the

District of Connecticut.

(d) Except as provided in this Act, no provision of this Act shall be construed to constitute a jurisdictional act, to confer jurisdiction to sue, or to grant implied consent to any Indian, Indian nation, or tribe or band of Indians to sue the United States or any of its officers with respect to the claims extinguished by the operation of this Act.

#### RESTRICTION AGAINST ALIENATION

SEC. 8. (a) Subject to subsection (b), lands within the reservation which are held in trust by the Secretary for the benefit of the Tribe or which are subject to a Federal restraint against alienation at any time after the date of the enactment of this Act shall be subject to the laws of the United States relating to Indian lands, including section 2116 of the Revised Statutes (25 U.S.C. 177).

(b) Notwithstanding subsection (a), the Tribe may lease lands for any term of years to the Mashantucket Pequot Housing Authority, or any successor in interest to such

Authority.

### EXTENSION OF FEDERAL RECOGNITION AND PRIVILEGES

SEC. 9. (a) Notwithstanding any other provision of law, Federal recognition is extended to the Tribe. Except as otherwise provided in this Act, all laws and regulations of the United States of general application to Indians or Indian nations, tribes or bands of Indians which are not inconsistent with any specific provision of this Act shall be applicable to the Tribe.

(b) The Tribe shall file with the Secretary a copy of its organic governing document and any amendment thereto. Such instrument must be consistent with the terms of this Act and the Act to Implement the Settlement of the Mashantucket Pequot Indian

Land Claim as enacted by the State of Connecticut and approved June 9, 1982.

(c) Notwithstanding any other provision

(c) Notwithstanding any other provision of law, the Tribe and members of the Tribe shall be eligible for all Federal services and benefits furnished to federally recognized Indian tribes as of the date of enactment of this Act.

#### OTHER CLAIMS DISCHARGED BY THIS ACT

SEC. 10. Except as expressly provided herein, this Act shall constitute a general discharge and release of all obligations of the State of Connecticut and all of its political subdivisions, agencies, departments, and all of the officers or employeess thereof arising from any treaty or agreement with, or on behalf of the Tribe or the United States as trustee therefor.

#### INSEPARABILITY

SEC. 11. In the event that any provision of section 4 of this Act is held invalid, it is the intent of Congress that the entire Act be invalidated. In the event that any other section or provision of this Act is held invalid, it is the intent of Congress that the remaining sections of this Act shall continue in full force and effect.

Mr. COHEN. Mr. President, the Mashantucket Pequot Indian Claims Settlement Act was the subject of hearings before the Senate Select Committee on Indian Affairs earlier this year.

It came to the committee with the approval of all the affected parties and the amendment in the nature of a substitute that was reported from the committee was agreed to by all the af-

fected parties.

Having participated in the settlement of a much larger land claim in the State of Maine which was based on the legal theory asserted in the Mashantucket case, I know how difficult it can be at times for the various parties to such negotiations to reach agreement on the range of issues these cases present.

I wish to commend my colleagues from the State of Connecticut for their involvement in and support of this legislative solution to this claim. I commend the parties to the suit for their efforts to resolve this dispute.

Mr. WEICKER. Mr. President, the Senate now has before it S. 2719, which would provide settlement of certain claims of the Mashantucket Pequot Indian Tribe of Connecticut, and which would establish Federal recognition of the tribe.

It is with pleasure that I bring this measure to the Senate floor. As my colleagues are aware, the Senate has spent a great deal of time this session considering the essential concept of this bill, which is the guarantee that the rights of minorities must be protected under the Constitution. The majority often rules in the democratic process, but our constitution guarantees minorities access to due process and the right to fair and equal consideration in any legal claims.

This bill addresses that issue for the Mashantucket Pequots. It is a bill motivated by the wish to provide a fair settlement to all involved parties, and

I believe that it accomplishes that aim. S. 2719 has the unanimous support of the Connecticut delegation, the Connecticut State government, the Pequot Tribe and the affected property owners.

The Connecticut delegation is proud of this bill which represents the state-of-the-art in Indian land claims settlement legislation. We believe that it could be a precedent for Connecticut in future cases of this nature. I urge my colleagues to support S. 2719.

Mr. DODD. Mr. President, I support S. 2719, the Mashantucket Pequot Indian Claims Settlement Act of 1982. which I first introduced with my colleague (Mr. WEICKER) on June 30, 1982. This bill settles the first outstanding Indian land claim in the State of Connecticut and serves as a reaffirmation of Connecticut's policy which upholds the constitutional rights of our State's native Americans. Representative Gejdenson has pushed along identical legislation on the House side that together with our legislation carries the support of the entire Connecticut delegation.

I would also like this opportunity to express my appreciation to Chairman COHEN, Senator MELCHER, and the Select Committee on Indian Affairs for holding hearings and for their careful consideration of this legisla-

tion.

This bill is the culmination of years of negotiations between the Mashantucket Pequot Tribal Council and the private landowners in Ledyard, Conn. Specifically, the Ledyard property owners have agreed to transfer 800 acres of undeveloped land to the tribe. Let me make it clear that this legislation would not displace a single homeowner and that all the property owners have agreed to this settlement and still reserve the right to not sell their property if they so choose.

In addition, the bill establishes a Federal trust of \$900,000 for the purpose of land acquisition by the tribe as agreed to in the negotiated settlement and makes the Pequots a federally recognized tribe, giving the tribe all the rights and privileges which accompany such recognition. The bill also extinguishes all aboriginal title to land and subjects the tribe to the laws of the United States.

It must be made clear that in order for this well-thoughtout agreement, which is the product of several years of negotiations, to be legal and valid, Congress will have to ratify the settlement.

I would also like to point out that this legislation reverses a trend in Indian land claim settlements by increasing the State's involvement. Connecticut has provided monetary and special in kind assistance to the tribe totaling \$250,000. Recently, the State contributed 20 acres of land to the Pequots as part of the negotiated settlement. This land was their ancient burial ground. Again, the State legislation granting this land is contingent upon the passage of this bill in Congress.

Last, let me say that this legislation circumvents the need for uncertain and time-consuming litigation. The only viable alternative to litigation is to negotiate, and that is exactly what I am asking the Senate to affirm by passing this bill.

The committee amendment was

agreed to.

The bill was ordered to be engrossed for a third reading, and was read the third time.

# MASHANTUCKET PEQUOT INDIAN LAND CLAIMS SETTLE-MENT ACT

The PRESIDING OFFICER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 6612, Calendar No. 953.

eration of H.R. 6612, Calendar No. 953. The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6612) to provide for the settlement of land claims of the Mashantucket Pequot Indian Tribe of Connecticut, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the bill.

Mr. STEVENS. Mr. President, I move to strike all after the enacting clause and insert in lieu thereof the text of S. 2719 as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The bill (H.R. 6612) was considered, ordered to a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to indefinitely postpone the consideration of S. 2719.

The motion was agreed to.

#### PURCHASE OF CALENDARS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 990, Senate Resolution 508.

The PRESIDING OFFICER. Without objection, the clerk will state it.

The assistant legislative clerk read as follows:

A Senate resolution (S. Res. 508) relating to the purchase of calendars.

The resolution was considered and agreed to, as follows:

#### S. RES. 508

Resolved, That the Committee on Rules and Administration is authorized to expend

from the contingent fund of the Senate, upon vouchers approved by the chairman of that committee, not to exceed \$60,320 for the purchase of one hundred and four thousand calendars. The calendars shall be distributed as prescribed by the committee.

## PROHIBITION OF SALE OF U.S. CUSTOMS HOUSE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1011, Senate Resolution 498.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will state the resolution.

The assistant legislative clerk read as follows:

A Senate resolution (S. Res. 498) prohibiting the sale of the U.S. Customs House at Bolling Green, New York City.

• Mr. STAFFORD. Mr. President, on December 14, the Committee on Environment and Public Works reported Senate Resolution 489, prohibiting the sale of the U.S. Custom House at Bowling Green in New York City. This resolution had been introduced by Senator MOYNIHAN on December 1, 1982.

In 1979, Congress authorized renovation of the building to house Federal agencies and alleviate expensive leasing requirements in the city. The Public Buildings Service of the General Services Administration has procrastinated and failed to date to begin renovation. Because of this inaction, the Federal Property Review Board is considering declaring the Custom House "surplus" and offering it for sale.

The resolution would also require the General Services Administration to submit periodic progress reports on the renovation of the Custom House

until the work in completed.

Finally, Senate Resolution 498 directs the General Services Administration to seek approval from the Committee on Environment and Public Works prior to disposal of any building in its inventory. The Public Buildings Act of 1959 fails to require the GSA to notify the committee, though disposal decisions often bear directly on expenditures for construction, leasing, alteration, and repair-which are the responsibility and jurisdiction of the Environment and Public Works Committee. For example, GSA decided it did not want the existing courthouse in Youngstown, Ohio, and it was subsequently sold to the city. Since 1979, however, GSA has rented the court space from the city. Now the city has notified GSA that they do not wish to renew the lease. Therefore, GSA proposes to spend \$10 million to build a new courthouse, to replace the one that they sold for \$190,000.

Mr. President, I urge my colleagues to support this resolution and hope that it will be agreed to.

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

#### S. RES. 498

Whereas, the U.S. Custom House at Bowling Green in Lower Manhattan in New York City, completed in 1907 to the plans of the noted American architect Cass Gilbert, is one of the most beautiful and significant Beaux-Arts public buildings in the Nation, and

Whereas, in 1979, the Senate Committee on Environment and Public Works and the House Committee on Public Works and Transportation approved, pursuant to the Public Buildings Act of 1959, the renovation by the United States General Services Administration of the Custom House at a cost of \$29,274,000, and

Whereas, the renovation of the Custom House is to provide office space for 800 Federal employees currently housed in more expensive leased office space, and

Whereas, the United States General Services Administration has procrastinated and failed to date to begin actual renovation work on the project, and

Whereas, because of this inaction, some Federal officials have proposed declaring the Custom House "surplus" to the needs of the Government and offering it for sale to private interests, and

Whereas, to acquiesce in this or any similar action by the executive branch would vitiate congressional authority under the Public Buildings Act to manage the inventory of the public buildings: Now, therefore be it

Resolved, That it is the sense of the Senate that the U.S. Custom House at Bowling Green in New York City and every other public building managed by the General Services Administration shall remain the property of the United States, unless and until such time as the Committee on Environment and Public Works by majority vote, should accede to its transfer or sale; and be it further

Resolved, That until such time as the renovation of the U.S. Custom House at Bowling Green is completed, the General Services Administration shall submit a progress report on the renovation to the Committee on Environment and Public Works every thirty days.

# SPACE NEEDS STUDY OF SOCIAL SECURITY DATA PROCESSING CENTER

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 1012, Senate Resolution 514.

The PRESIDING OFFICER. The clerk will state the resolution.

The assistant legislative clerk read as follows:

A resolution (S. Res. 514) ordering a space needs study of Social Security Data Processing Center in Wilkes-Barre, Pa., including a site survey for proposed relocation thereof, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

The Senate proceeded to consider the resolution. • Mr. STAFFORD. Mr. President, on Tuesday, December 14, the Senate Committee on Environment and Public Works reported an original Senate resolution—Senate Resolution 514—ordering a space needs study of Social Security Data Processing Center, including a site survey for the relocation of the center. The resolution also states that it is the sense of the Senate that the Army Corps of Engineers shall, from time to time, study and report to the Committee on Environment and Public Works on other public building matters as requested by that committee.

Mr. President, this data processing center is the largest of only three such centers of the Social Security Administration. The Wilkes-Barre facility processes income data for about 40 percent of the work force under social security. It issues social security number cards, responds to citizens' requests for earnings information, processes an estimated 100 tons of paper a year, including W-2 forms for the Internal Revenue Service, among other important tasks. This facility is crucial to the proper and efficient functions of social security.

The Wilkes-Barre Center is currently housed in three locations, including converted warehouse space. The agency needs more productive, consolidated space. The Social Security Administration has sought assistance to resolve their space problems from the General Services Administration for

almost 8 years—since 1975.

GSA proposes that a private developer-owner build and lease to the Government a new facility to meet SSA's needs. It requests a contract obligation of up to \$120 million to pay for this "lease construction" project. In contrast, Federal construction of a comparable facility would cost only \$35.5 million. A contract with a developer owner typically includes an "escalation clause" to permit annual rental increases if costs go up. Such clauses have the effect of significantly reducing the entrepreneurial risks associated with most private capital investments. Further, this lucrative contract-with a guaranteed flow of income and protection from rising costs—would be negotiated behind closed doors between a developer and a GSA leasing officer. Given the high stakes, closed negotiations instead of open, competitive bidding could invite pressure, influence, favoritism, and im-

tee efforts to reform this procedure.

There is a precedent for asking the Corps of Engineers to study needs and alternative means to meet them. Earlier this year the Department of Energy requested authority for GSA to "lease construct" a facility in Nevada. The

proper inducement in the selection of

the winning developer. Competitive

bidding would not be utilized. GSA has

been stolid in its opposition to commit-

committee asked the corps to study the proposal. Within about 30 days the corps submitted its review to the committee and the Department indicating that construction for Federal ownership would take only 10 months longer than private development and would be almost half as costly to the Government as GSA's proposal.

After reviewing the figures, the Department of Energy withdrew the prospectus

Mr. President, I commend the resolution to my colleagues and ask that it be agreed to.

Mr. President, on a related matter, at the time the Committee on Environment and Public Works reported this resolution it also adopted a committee resolution disapproving prospectus projects submitted to the Congress by the General Services Administration which were not included as line items in S. 2451, the Public Buildings Authorizations Act of 1982. The Public Buildings Act of 1959 vests authority and responsibility for authorization of specific building projects of GSA-when the cost of a project ex-\$500,000—solely within the Senate Committee on Environment and Public Works and the House Committee on Public Works and Transportation. The intent of the disapproval action taken by the Senate committee is to prohibit the agency from proceeding with work in connection with any projects included in the commitresolution. The Administrator shall not obligate or expend any funds on any projects specified in the resolution.

The prospectuses are, in effect, returned to the General Services Administration and are no longer considered valid documents before the Senate.

Early next year, the Committee on Environment and Public Works will begin work on an authorization bill to provide an annual program for GSA in fiscal year 1984. I anticipate that bill will be reported well in advance of the next fiscal year and the next appropriations cycle. GSA will be expected to submit to the Congress its recommendations for the 1984 program early next year. That, together with the President's budget, will be the basis for committee action. Any projects in the committee resolution of disapproval which the administration and the agency wish to carry out in fiscal year 1984 may, of course, be resubmitted then as a part of that annual program request.

Mr. President, I ask that the text of the committee resolution be included at this point in the RECORD.

The committee resolution referred to follows:

#### COMMITTEE RESOLUTION

Whereas the Senate of the United States has adopted legislation to provide longrange planning and an annual buildings program for the Public Buildings Service of the General Services Administration in lieu of piecemeal authorizations of the specific buildings so that the Congress and the Executive Branch can better oversee program management and establish priorities, and

Whereas on May 12, 1982, the Senate Committee on Environment and Public Works unanimously reported to the Senate the "Public Buildings Authorizations Act of 1982", S. 2451, providing authorizations for appropriations totaling \$1,992,275,000 for the public buildings program and activities of the General Services Administration for the fiscal year beginning October 1, 1982, and

Whereas on June 6, 1982, the full Senate unanimously passed S. 2451; Now, therefore, be it

Resolved, That the Committee on Environment and Public Works of the United States Senate hereby disapproves the following prospectuses for construction, alteration or repair, submitted to the U.S. Senate by the General Services Administration, pursuant to the Public Buildings Act of 1959, as amended which are not included in the fiscal year 1983 program contained in S. 2451, the "Public Buildings Authorizations Act of 1982.":

. Mr. SIMPSON, Mr. President, As my good friend and colleague, the patient and distinguished chairman of the Senate Environment and Public Works Committee, Mr. STAFFORD, has just stated, our committee recently took moves to eliminate some of the most obvious and gross expenditures of Federal funds which were to be allocated for certain public buildings

The closing days of the legislative session are ripe with opportunities to fatten the pork barrel-and the current lameduck session is proving no exception. So, here we are-againwith the usual capers-a duck and pork dish of odious content. However, an unprecedented action taken by the Environment and Public Works Committee has buried some of the most offensive projects-and I am pleased to have been part of that action.

In the past I have voiced my opposition to what I call the proposed Bizz Johnson Memorial Courthouse in Redding, Calif. Like Jacob Marley, this unnecessary and ghoulish apparition rises every year about this time-and it is more grotesque and blueish-green each time it returns to graze at the Federal trough. There is no Federal judge in Redding, Calif., and so it would seem there is no need for a new courthouse. An interesting perception. eh?

The Redding courthouse is not the only hunk of pork a Congressman tried to roll home at the expense of the taxpayer. There were also proposals for a Federal building in Chicago and another in San Francisco-both unneeded million dollar monuments to certain members of the House of Representatives. I have gone a few rounds righting these kind of things during my time here.

And then there was the proposal for a Youngstown, Ohio, courthouse. This is one I had not dug up until recently. yet this request is just as absurd as the others-perhaps even more so. There is no district judge in Youngstown, but the House of Representatives and the General Services Administration wanted to build a a \$10 million district courthouse-Federal building to replace

another building which the Federal Government had sold a few years back for \$190,000. Even Ohio's chief judge representing the Sixth Circuit Court of Appeals, which has jurisdiction in Youngstown, opposed the construction of a courthouse in that city-but it was in the package.

Let me share one more example of extraordinary waste-this one the plan for a new Social Security Building in Wilkes-Barre, Pa. This boobish proposal asked that the Federal Government lease the space after we pay the private contractor to construct the building. Egad. That one strains every ounce of my senses-I hunch that would be the same with most of this country's taxpayers.

These are but a few of the inanities we get into when we discuss the issue of public buildings. These particular proposals were passed by the House of Specific Representatives. Senate action was required because an archaic rule states that public works building projects approved by one House but not rejected by the other are auto-matically funded in the continuing resolution. So, whether needed or not, other public buildings have sprung up about the country-because if nobody objects, then the funding is approved.

During recent Environment and Public Works Committee hearings I stated that Congress must come to cast a vote to either reject or approve projects of this type. The chairman heartily agrees as does the ranking minority member, my friend Jennings RANDOLPH and the entire committee. We must no longer stand to see a public building funded simply because it was not singled out for rejection.

In clear recognition of the public interest—and aside from the distractions of a Congress trying desperately to get home in time for Christmas-the Senate has killed the proposed buildings in Chicago, San Francisco, Redding, Youngstown, and Wilkes-Barre. Bravo. An action I certainly hope will be continued in years to come.

The PRESIDING OFFICER. The

question is on agreeing to the resolu-

The resolution (S. Res. 514) was agreed to.

The preamble was agreed to.

The resolution, with its preamble is as follows:

#### S. RES. 514

Whereas the Data Processing Center of the Social Security Administration-located in Wilkes-Barre, Pennsylvania-has responsibility for processing and storing earnings information on millions of people in the American work force, issuing social security number cards to the public, and responding to the public's requests for earnings information, as well as various other tasks, and

Whereas this crucial activity is housed in inadequate space and scattered in three locations which diminish efficiency and pro-

ductivity, and

Whereas over the past eight years the Social Security Administration has unsuccessfully sought assistance for improved facilities from the general Services Administration, and

Whereas the General Services Administration's proposed solution is very expensive, not in the best interest of the Government. and recommended without adequate study of alternatives and options: Now, therefore, be it

Resolved, that it is the sense of the Senate that the United States Army Corps of Engineers shall, in consultation with the Social Security Administration, study the space needs of the Data Processing Center in Wilkes-Barre, Pennsylvania, together with comparison of alternative means of meeting such needs. Such study shall also include a survey of available sites and identification of any such sites that are unfortunately located on a flood plain. The Army Corps of Engineers shall report to the senate its findings and recommendations as soon as practicable early in the first session of the Ninetyeighth Congress; and be it further

Resolved, That it is the sense of the Senate that the United States Army Corps of Engineers shall, from time to time, study and report to the Committee on Environment and Public Works of the United States Senate on other public building matters as requested by said committee.

AUTHORIZATION OF APPRO-UNDER PRIATIONS EARTH-QUAKE HAZARDS REDUCTION ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2273.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representa-

Resolved, That the House agree to the amendments of the Senate numbered 1 and 3-8 to the amendment of the House to the bill (S. 2273) entitled "An Act to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes.'

Resolved, That the House agree to the amendment of the Senate numbered 2 to the aforesaid bill with the following amend-

At the end of the aforesaid amendment, insert:

: and on page 1, line 13 of the House engrossed amendment, strike out "\$33,843,000" and insert in lieu thereof "\$31,843,000

Mr. STEVENS. I move that the Senate concur in the House amend-

The motion was agreed to.

#### CONVEYANCE OF CERTAIN FEDERAL LANDS

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 187.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representa-

Resolved, That the bill from the Senate (S. 187) entitled "An Act to authorize the Secretary of the Interior to convey certain lands near Miles City, Montana, and to remove certain reservations from prior convevances". do pass with the following amendment:

Strike out all after the enacting clause

and insert:

That (a) the Secretary of the Interior (hereafter in this Act referred to as the "Secretary") shall convey by patent to the city of Miles City, Montana (hereafter, referred to as the "city"), all right, title, and interest, except for those interests described in subsection (b) of this section, of the United States in and to the following lands in Custer County, Montana, in range 47 east of the principal meridian, Montana: In township 8 north, lots 9, 17, 21, 28, 31, and 32 in section 32 and in townships 7 and 8 north tract Q and tract S.

(b) Any patent issued pursuant to subsection (a) of this section shall contain a reservation to the United States of all gas, oil, coal, and other minerals that may be found in such lands, and the right to prospect for, mine, and remove such minerals, and that patents shall also contain any other reserva-

tions required by law.

(c) Any patent issued pursuant to subsection (a) of this section shall provide that if the land is transferred or conveyed by the city, the proceeds of such sale shall be paid to the United States, to be distributed in ac-

cordance with section 4 of this Act. SEC. 2. (a) The Secretary shall take such actions as are necessary to convey to the city the reversionary interests of the United States contained in the patents which conveyed to the city of Miles City, Montana, the lands decribed in subsection (b) of this section. Such reversionary interest arise when the patentee/grantee violates provisions which (1) require that such lands be used for specified purposes, or (2) prohibit transfer of such lands by the patentee/ grantee. All documents of conveyance issued under this subsection shall provide that if the land is conveyed by the city, the proceeds of sale shall be paid to the United States, to be distributed in accordance with

section 4 of this Act. (b) The land referred to in subsection (a) of this section are the following tracts in range 47 east of the principal meridian, Montana: In townships 7 and 8 north, tracts A and B (conveyed by patent numbered 1,021,511), tracts E and F (conveyed by patent numbered 1,122,295), tract G (conveyed by patent numbered 1,173,770), tract K (conveyed by patent numbered 1,173,768), tract L (conveyed by patent numbered 1,173,769), tract M (conveyed by patent numbered 1,178,764), tract P (conveyed by patent numbered 1,219,817), and tract D (conveyed by the grant made by the Act of July 30, 1890 (26 Stat. 292), lots 16 and 17. section 33 (conveyed by patent numbered 25-81-0094).

SEC. 3. (a) The Secretary shall take such actions as are necessary to convey to the holder of the patent the reversionary interests of the United States contained in the patents which conveyed to the county of Custer, Montana, the lands described in subsection (b) of this section. Such reversionary interests arise when the patentee violates provisions which (1) require that such lands be used for specified purposes, or (2) prohibit transfer of such lands by the patentee. All documents of conveyance issued under this subsection shall provide that if the land is conveyed by the patentee, the proceeds of

such sale shall be paid to the United States, to be distributed in accordance with section 4 of this Act.

(b) The lands referred to in subsection (a) are the following parcels in range 47 east of the principal meridian, Montana: In townships 7 and 8 north, tract C (conveyed by patent numbered 1,023,689) and tract T (conveyed by patent numbered 25-76-0099), and in township 8 north, lot 20 in section 33 (conveyed by patent numbered 25-76-0100).

SEC. 4. (a) Notwithstanding any other provision of law, if the city or any other patentee or grantee transfers any lands described in this Act, such transfer shall be at fair market value for the land and improve-

ments thereon.

(b) Proceeds from the sale of the land, excluding the value of any improvements on the land and less any sums paid to the United States at the time of original conveyance out of Federal ownership, shall be deposited in the general fund of the Treasury of the United States, to be distributed as follows: At the end of each Federal fiscal year, the United States shall return 5 per centum of the net receipts collected in that fiscal year from the sale of lands described in this Act to the State of Montana, and 10 per centum of such receipts to the county or the city in which the lands are located in amounts proportional to the receipts generated from the sale of such land in each county or city during the fiscal year.

SEC. 5. All documents of conveyance issued pursuant to this Act shall be subject to valid

existing rights.

Mr. STEVENS. I yield to the Senator from Montana.

Mr. MELCHER. I thank the distinguished majority whip for yielding to

Mr. President, I am pleased and relieved that S. 187 has been finally approved. The bill causes Federal land long used by the city of Miles City-as a part of the city used for the good purposes of the citizens of Miles City and Custer County.

Representative MARLENEE and I have sought a resolution of this matter for some time. This bill developed by both of us clears up the transfer of the land from the Bureau of Land Management to the city and the county without a reverter clause.

Mr. STEVENS. I move that the Senate concur in the House amend-

The motion was agreed to.

#### ORPHAN DRUG ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5238.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 5238) entitled "An Act to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare diseases and conditions, and for other purposes", with the following amendment:

In lieu of the matter inserted by said amendment, insert:

SHORT TITLE: FINDINGS

Section 1. (a) This Act may be cited as the "Orphan Drug Act"

(b) The Congress finds that-

(1) there are many diseases and conditions, such as Huntington's disease, myoclonus ALS (Lou Gehrig's disease), Tourette syndrome, and muscular dystrophy which affect such small numbers of individuals residing in the United States that the diseases and conditions are considered rare in the United States:

(2) adequate drugs for many of such diseases and conditions have not been devel-

oped:

(3) drugs for these diseases and conditions are commonly referred to as "orphan

drugs":

(4) because so few individuals are affected by any one rare disease or condition, a pharmaceutical company which develops an orphan drug may reasonably expect the drug to generate relatively small sales in comparison to the cost of developing the drug and consequently to incur a financial

(5) there is reason to believe that some promising orphan drugs will not be developed unless changes are made in the applicable Federal laws to reduce the costs of developing such drugs and to provide financial incentives to develop such drug; and

(6) it is in the public interest to provide such changes and incentives for the devel-

opment of orphan drugs.

AMENDMENTS TO THE FEDERAL FOOD, DRUG, AND COSMETIC ACT

SEC. 2. (a) Chapter V of the Federal Food, Drug, and Cosmetic Act is amended by adding at the end the following:

"RECOMMENDATIONS FOR INVESTIGATIONS OF DRUGS FOR RARE DISEASES OR CONDITIONS

"Sec. 525. (a) The sponsor of a drug for a disease or condition which is rare in the States may request the Secretary to provide written recommendations for the non-clinical and clinical investigations which must be conducted with the drug before-

'(1) it may be approved for such disease

or condition under section 505, or

"(2) if the drug is a biological product, before it may be licensed for such disease or condition under section 351 of the Public Health Service Act.

If the Secretary has reason to believe that a drug for which a request is made under this section is a drug for a disease or condition which is rare in the States, the Secretary shall provide the person making the request written recommendations for the non-clinical and clinical investigations which the Secretary believes, on the basis of information available to the Secretary at the time of the request under this section, would be necessary for approval of such drug for such disease or condition under section 505 or licensing under section 351 of the Public Health Service Act for such disease or condition.

"(b) The Secretary shall by regulation promulgate procedures for the implementation of subsection (a).

"DESIGNATION OF DRUGS FOR RARE DISEASES OR CONDITIONS

"SEC. 526. (a)(1) The manufacturer or the sponsor of a drug may request the Secretary to designate the drug as a drug for a rare disease or condition. If the Secretary finds that a drug for which a request is submitted under this subsection is being or will be investigated for a rare disease or condition '(A) if an application for such drug is ap-

proved under section 505, or "(B) if the drug is a biological product, a license is issued under section 351 of the Public Health Service Act,

the approval or license would be for use for such disease or condition, the Secretary shall designate the drug as a drug for such disease or condition. A request for a designation of a drug under this subsection shall contain the consent of the applicant to notice being given by the Secretary under subsection (b) respecting the designation of the drug.

(2) For purposes of paragraph (1), the term 'rare disease or condition' means any disease or condition which occurs so infre quently in the United States that there is no reasonable expectation that the cost of developing and making available in the United States a drug for such disease or condition will be recovered from sales in the United States of such drug. Determinations under the preceding sentence with respect to any drug shall be made on the basis of the facts and circumstances as of the date the request for designation of the drug under this subsection is made.

(b) Notice respecting the designation of a drug under subsection (a) shall be made

available to the public.

"(c) The Secretary shall by regulation promulgate procedures for the implementation of subsection (a).

"PROTECTION FOR UNPATENTED DRUGS FOR RARE DISEASES OR CONDITIONS

"SEC. 527. (a) Except as provided in subsection (b), if the Secretary

"(1) approves an application filed pursuant to section 505(b), or

'(2) issues a license under section 351 of the Public Health Service Act.

for a drug designated under section 526 for a rare disease or condition and for which a United States Letter of Patent may not be issued, the Secretary may not approve another application under section 505(b) or issue another license under section 351 of the Public Health Service Act for such drug for such disease or condition for a person who is not the holder of such approved application or of such license until the expiration of seven years from the date of the approval of the approved application or the issuance of the license. Section 505(c)(2) does not apply to the refusal to approve an appli-

cation under the preceding sentence.
"(b) If an application filed pursuant to section 505(b) is approved for a drug designated under section 526 for a rare disease or condition or a license is issued under section 351 of the Public Health Service Act for such a drug and if a United States Letter of Patent may not be issued for the drug, the Secretary may, during the seven-year period beginning on the date of the application approval or of the issuance of the license, approve another application under section 505(b), or, if the drug is a biological product, issue a license under section 351 of the Public Health Service Act, for such drug for such disease or condition for a person who is not the holder of such approved application or of such license if-

'(1) the Secretary finds, after providing the holder notice and opportunity for the submission of views, that in such period the holder of the approved application or of the license cannot assure the availability of sufficient quantities of the drug to meet the needs of persons with the disease or condi-

tion for which the drug was designated; or "(2) such holder provides the Secretary in writing the consent of such holder for the approval of other applications or the issuance of other licenses before the expiration of such seven-year period.

"OPEN PROTOCOLS FOR INVESTIGATIONS OF DRUGS FOR RARE DISEASES OR CONDITIONS

"Sec. 528. If a drug is designated under section 526 as a drug for a rare disease or condition and if notice of a claimed exemption under section 505(i) or regulations issued thereunder is filed for such drug, the Secretary shall encourage the sponsor of such drug to design protocols for clinical investigations of the drug which may be conducted under the exemption to permit the addition to the investigations of persons with the disease or condition who need the drug to treat the disease or condition and who cannot be satisfactorily treated by available alternative drugs."

(b) Chapter V of the Federal Food, Drug, and Cosmetic Act is amended by inserting before section 501 the following:

"SUBCHAPTER A-DRUGS AND DEVICES.".

#### ORPHAN PRODUCTS BOARD

SEC. 3. Title II of the Public Health Service Act is amended by adding at the end the following:

#### "ORPHAN PRODUCTS BOARD

"SEC. 227. (a) There is established in the Department of Health and Human Services a board for the development of drugs (including biologics) and devices (including diagnostic products) for rare diseases or conditions to be known as the Orphan Products Board. The Board shall be comprised of the Assistant Secretary for Health of the Department of Health and Human Services and representatives, selected by the Secretary, of the Food and Drug Administration, the National Institutes of Health, the Centers for Disease Control, and any other Federal department or agency which the Secretary determines has activities relating to drugs and devices for rare diseases or conditions. The Assistant Secretary for Health shall chair the Board.

"(b) The function of the Board shall be to promote the development of drugs and devices for rare diseases or conditions and the coordination among Federal, other public, and private agencies in carrying out their respective functions relating to the development of such articles for such diseases or conditions.

"(c) In the case of drugs for rare diseases or conditions the Board shall-

"(1) evaluate-

"(A) the effect of subchapter B of the Federal Food, Drug, and Cosmetic Act on the development of such drugs, and

"(B) the implementation of such subchapter:

"(2) evaluate the activities of the National Institutes of Health and the Alcohol, Drug Abuse, and Mental Health Administration for the development of drugs for such diseases or conditions,

"(3) assure appropriate coordination among the Food and Drug Administration, the National Institutes of Health, the Alcohol, Drug Abuse, and Mental Health Administration, and the Centers for Disease Control in the carrying out of their respective functions relating to the development of drugs for such diseases or conditions to assure that the activities of each agency are complementary,

"(4) assure appropriate coordination among all interested Federal agencies, manufacturers, and organizations representing patients, in their activities relating to such

"(5) with the consent of the sponsor of a drug for a rare disease or condition exempt under section 505(i) of the Federal Food, Drug, and Cosmetic Act or regulations issued under such section, inform physicians and the public respecting the availability of such drug for such disease or condition and inform physicians and the public respecting the availability of drugs approved under section 505(c) of such Act or licensed under section 351 of this Act for rare diseases or conditions,

"(6) seek business entities and others to undertake the sponsorship of drugs for rare diseases or conditions, seek investigators to facilitate the development of such drugs. and seek business entities to participate in the distribution of such drugs, and

"(7) recognize the efforts of public and private entities and individuals in seeking the development of drugs for rare diseases or conditions and in developing such drugs.

"(d) The Board shall consult with interested persons respecting the activities of the Board under this section and as part of such consultation shall provide the opportunity for the submission of oral views.

(e) The Board shall submit to the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives an annual report-

"(1) identifying the drugs which have been designated under section 526 of the Federal Food, Drug, and Cosmetic Act for a rare disease or condition.

'(2) describing the activities of the Board,

The Director of the National Institutes of

"(3) containing the results of the evaluations carried out by the Board.

Health and the Administrator of the Alcohol, Drug Abuse, and Mental Health Administration shall submit to the Board for inclusion in the annual report a report on the rare disease and condition research activities of the Institutes of the National Institutes of Health and the Alcohol, Drug Abuse, and Mental Health Administration; the Secretary of the Treasury shall submit to the Board for inclusion in the annual report a report on the use of the credit against tax provided by section 44H of the Internal Revenue Code of 1954; and the Secretary of Health and Human Services shall submit to the Board for inclusion in the annual report a report on the program of assistance under section 5 of the Orphan

#### TAX CREDIT FOR TESTING EXPENSES FOR DRUGS FOR RARE DISEASES OR CONDITIONS

Drug Act for the development of drugs for

rare diseases and conditions. Each annual

report shall be submitted by June 1 of each

year for the preceding calendar year."

SEC. 4. (a) Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting after section 44G the following new section:

"SEC. 44H. CLINICAL TESTING EXPENSES FOR CER-TAIN DRUGS FOR RARE DISEASES OR CONDITIONS.

"(a) GENERAL RULE.-There shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 50 percent of the qualified clinical testing expenses for the taxable year.

"(b) QUALIFIED CLINICAL TESTING PENSES.-For purposes of this section-

"(1) QUALIFIED CLINICAL TESTING PENSES.

"(A) In general.-Except as otherwise provided in this paragraph, the term 'qualified

testing expenses' amounts which are paid or incurred by the taxpayer during the taxable year which would be described in subsection (b) of section 44F if such subsection were applied with the modifications set forth in subparagraph (B).

'(B) Modifications.-For purposes of subparagraph (A), subsection (b) of section 44F

shall be applied-

"(i) by substituting 'clinical testing' for 'qualified research' each place it appears in paragraphs (2) and (3) of such subsection, and

"(ii) by substituting '100 percent' for '65 percent' in paragraph (3)(A) of such subsection.

"(C) Exclusion for amounts funded by grants, et.—The term 'qualified clinical testing expenses' shall not include any amount to the extent such amount is funded by any grant, contract, or otherwise by another person (or any governmental entity).

"(D) SPECIAL RULE.—For purposes of this paragraph, section 44F shall be deemed to remain in effect for periods after December

"(2) CLINICAL TESTING.

"(A) In general.-The term 'clinical testing' means any human clinical testing-

'(i) which is carried out under an exemption for a drug being tested for a rare disease or condition under section 505(i) of the Federal Food, Drug, and Cosmetic Act (or regulations issued under such section),

(ii) which occurs-

"(I) after the date such drug is designated under section 526 of such Act, and

"(II) before the date on which an application with respect to such drug is approved under section 505(b) of such Act, and

'(iii) which is conducted by or on behalf of the taxpayer to whom the designation

under such section 526 applies.

"(B) TESTING MUST BE RELATED TO USE FOR RARE DISEASE OR CONDITION.—Human clinical testing shall be taken into account under subparagraph (A) only to the extent such testing is related to the use of a drug for the rare disease or condition for which it was designated under section 526 of the Federal Food, Drug, and Cosmetic Act.

"(c) COORDINATION WITH CREDIT FOR IN-

CREASING RESEARCH EXPENDITURES.-

"(1) In general.-Except as provided in paragraph (2), any qualified clinical testing expenses for a taxable year to which an election under this section applies shall not be taken into account for purposes of determining the credit allowable under section 44F for such taxable year.

"(2) EXPENSES INCLUDED IN DETERMINING BASE PERIOD RESEARCH EXPENSES .- Any qualified clinical testing expenses for any taxable year which are qualified research expenses (within the meaning of section 44F(b)) shall be taken into account in determining base period research expenses for purposes of applying section 44F to subsequent taxable

years

"(d) DEFINITION AND SPECIAL RULES.

"(1) RARE DISEASE OR CONDITION.-For purposes of this section, the term 'rare disease or condition' means any disease or condition which occurs so infrequently in the United States that there is no reasonable expectation that the cost of developing and making available in the United States a drug for such disease or condition will be recovered from sales in the United States of such drug. Determinations under the preceding sentence with respect to any drug shall be made on the basis of the facts and circumstances as of the date such drug is designated under section 526 of the Federal Food,

Drug, and Cosmetic Act.

(2) LIMITATION BASED ON AMOUNT OF TAX.-The credit allowed by this section for any taxable year shall not exceed the amount of the tax imposed by this chapter for the taxable year reduced by the sum of the credits allowable under a section of this subparagraph having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43. For purposes of the preceding sentence, the term 'tax imposed by this chapter' shall not include any tax treated as not imposed by this chapter under the last sentence of section 53(a).

"(3) Special limitations on foreign test-

"(A) In general.-No credit shall be allowed under this section with respect to any clinical testing conducted outside United States unless

"(i) such testing is conducted outside the United States because there is an insufficient testing population in the United

States, and

"(ii) such testing is conducted by a United States person or by any other person who is not related to the taxpayer to whom the designation under section 526 of the Federal Food, Drug, and Cosmetic Act applies.

"(B) SPECIAL LIMITATION FOR CORPORATIONS TO WHICH SECTION 934(b) OR 936 APPLIES. No credit shall be allowed under this section with respect to any clinical testing conducted by a corporation to which section 934(b) applies or to which an election under section 936 applies.

"(4) CERTAIN RULES MADE APPLICABLE. Rules similar to the rules of paragraphs (1) and (2) of section 44F(f) shall apply for pur-

poses of this section.

"(5) Election.—This section shall apply to any taxpayer for any taxable year only if such taxpayer elects (at such time and in such manner as the Secretary may by regulations prescribe) to have this section apply for such taxable year.

"(e) TERMINATION.-This section shall not apply to any amount paid or incurred after

December 31, 1987."

(b)(1) Section 280C of such Code (relating to denial of deduction for portion of wages for which credit is claimed under section 40 or 44B) is amended by adding at the end thereof the following new subsection:

(c) CREDIT FOR QUALIFIED CLINICAL TEST-

ING EXPENSES FOR CERTAIN DRUGS.

"(1) In general.-No deduction shall be allowed for that portion of the qualified clinitesting expenses (as defined in section 44H(b)) otherwise allowable as a deduction for the taxable year which is equal to the amount of the credit allowable for the taxable year under section 44H (determined without regard to subsection (d)(2) thereof).

"(2) SIMILAR RULE WHERE TAXPAYER CAP-ITALIZES RATHER THAN DEDUCTS EXPENSES.-

"(A) the amount of the credit allowable for the taxable year under section 44H (determined without regard to subsection (d)(2) thereof), exceeds

"(B) the amount allowable as a deduction for the taxable year for qualified clinical testing expenses (determined without regard to paragraph (1)),

the amount chargeable to capital account for the taxable year for such expenses shall be reduced by the amount of such excess.

"(3) CONTROLLED GROUPS.—In the case of a corporation which is a member of a controlled group of corporations (within the

meaning of section 44F(f)(5)) or a trade or business which is treated as being under common control with other trades or business (within the meaning of section 44F(f)(1)(B)), this subsection shall be applied under rules prescribed by the Secretary similar to the rules applicable under subparagraphs (A) and (B) of section 44F(f)(1).

(2)(A) The section heading of section 280C of such Code is amended to read as follows: "SEC. 280C. CERTAIN EXPENSES FOR WHICH CRED-ITS ARE ALLOWABLE."

(B) The table of sections for part IX of subchapter B of chapter 1 of such Code is amended by striking out the item relating to section 280C and inserting in lieu thereof the following:

"Sec. 280C. Certain expenses for which credits are allowable."

(c)(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 44G the following new item:

"Sec. 44H. Clinical testing expenses for certain drugs for rare diseases or conditions."

- (2) Subsection (b) of section 6096 of such Code is amended by striking out "and 44G' and inserting in lieu thereof "44G, and
- (d) The amendments made by this section shall apply to amounts paid or incurred after December 31, 1982, in taxable years ending after such date.

GRANTS AND CONTRACTS FOR DEVELOPMENT OF DRUGS FOR RARE DISEASES AND CONDITIONS

SEC. 5. (a) The Secretary may make grants to and enter into contracts with public and private entities and individuals to assist in defraying the costs of qualified clinical testing expenses incurred in connection with the development of drugs for rare diseases and conditions.

(b) For purposes of subsection (a):

(1) The term "qualified clinical testing" means any human clinical testing-

(A) which is carried out under an exemption for a drug for a rare disease or condition under section 505(i) of the Federal Food, Drug, and Cosmetic Act (or regulations issued under such section),

(B) which occurs-

(i) after the date such drug is designated under section 526 of such Act, and

(ii) before the date on which an application with respect to such drug is submitted under section 505(b) of such Act.

(2) The term "rare disease or condition" means any disease or condition which occurs so infrequently in the United States that there is no reasonable expectation that the cost of developing and making available in the United States a drug for such disease or condition will be recovered from sales in the United States of such drug, Determinations under the preceding sentence with respect to any drug shall be made on the basis of the facts and circumstances as of the date the request for designation of the drug under this subsection is made.

(c) For grants and contracts under subsection (a) there are authorized to be appropriated \$4,000,000 for fiscal year 1983 and for each of the next two fiscal years.

SEC. 6. (a) Part D of title III of the Public Health Service Act is amended by inserting after subpart II the following new subpart:

#### "Subpart III-Home Health Services "HOME HEALTH SERVICES

"SEC. 339. (a)(1) For the purpose of encouraging the establishment and initial operation of home health programs to provide home health services in areas in which such services are inadequate or not readily accessible, the Secretary may, in accordance with the provisions of this section, make grants to public and nonprofit private entities and loans to proprietary entities to meet the initial costs of establishing and operating such home health programs. Such grants and loans may include funds to provide training for paraprofessionals (including homemaker home health aides) to provide home health services

"(2) In making grants and loans under this subsection, the Secretary shall—
"(A) consider the relative needs of the sev-

eral States for home health services;

"(B) give preference to areas in which a high percentage of the population proposed to be served is composed of individuals who are elderly, medically indigent, or disabled;

"(C) give special consideration to areas with inadequate means of transportation to

obtain necessary health services.

"(3)(A) No loan may be made to a proprietary entity under this section unless the application of such entity for such loan contains assurances satisfactory to the Secretary that-

(i) at the time the application is made

the entity is fiscally sound;

"(ii) the entity is unable to secure a loan for the project for which the application is submitted from non-Federal lenders at the rate of interest prevailing in the area in which the entity is located; and

"(iii) during the period of the loan, such

entity will remain fiscally sound.
"(B) Loans under this section shall be made at an interest rate comparable to the rate of interest prevailing on the date the loan is made with respect to the marketable obligations of the United States of comparable maturities, adjusted to provide for administrative costs.

"(4) Applications for grants and loans under this subsection shall be in such form and contain such information as the Secre-

tary shall prescribe.

"(5) There are authorized to be appropriated for grants and loans under this subsection \$5,000,000 for each of the fiscal years ending on September 30, 1983, and September 30, 1984.

"(b)(1) The Secretary may make grants to and enter into contracts with public and private entities to assist them in developing appropriate training programs for paraprofessionals (including homemaker home health aides) to provide home health services.

"(2) Any program established with a grant or contract under this subsection to training homemaker home health aides shall

"(A) extend for at least forty hours, and consist of classroom instruction and at least twenty hours (in the aggregate) of supervised clinical instruction directed toward preparing students to deliver home health services;

"(B) be carried out under appropriate professional supervision and be designed to train students to maintain or enhance the personal care of an individual in his home in a manner which promotes the functional independence of the individual; and

(C) include training in-

"(i) personal care services designed to ssist an individual in the activities of daily living such as bathing, exercising, personal grooming, and getting in and out of bed; and

'(ii) household care services such as maintaining a safe living environment, light housekeeping, and assisting in providing good nutrition (by the purchasing and prep aration of food).

'(3) In making grants and entering into contracts under this subsection, special consideration shall be given to entities which establish or will establish programs to provide training for persons fifty years of age and older who wish to become paraprofessionals (including homemaker home health aides) to provide home health services

"(4) Applications for grants and contracts under this subsection shall be in such form and contain such information as the Secre-

tary shall prescribe.

"(5) There are authorized to be appropriated for grants and contracts under this subsection \$2,000,000 for each of the fiscal years ending September 30, 1983, and September 30, 1984.

"(c) The Secretary shall report to the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives on or before January 1, 1984, with re-

"(1) the impact of grants made and contracts entered into under subsections (a) and (b) (as such subsections were in effect

prior to October 1, 1981);

"(2) the need to continue grants and loans under subsections (a) and (b) (as such subsections are in effect on the day after the date of enactment of the orphan Drug Act); and

"(3) the extent to which standards have been applied to the training of personnel who provide home health services

"(d) For purposes of this section, the term 'home health services' has the meaning prescribed for the term by section 1861(m) of

- the Social Security Act.".

  (b) The Secretary shall report the results of studies currently evaluating home and community based health services, and any recommendations for legislative which might improve the provision of such services, to the Congress prior to January 1, 1985
- (c) The Secretary of Health and Human Services shall compile and analyze the results of significant studies carried out by any public or private entity, group, or individual, relating to current and alternative reimbursement methodologies for home health services. The Secretary shall make recommendations with respect to such reimbursement methodologies as they might be applied in health care programs funded in whole or in part by Federal funds, and report such recommendations to the Congress within 180 days after the date of the enactment of this Act.
- (d) The Secretary of Health and Human Services, acting through the Inspector General of the Department of Health and Human Services, shall undertake a thorough investigation of-

(1) the methods available to stem fraud and abuse in the provision of home health services under medicare and medicaid; and

(2) the extent to which such methods are applied in stemming such fraud and abuse. The Secretary shall report the results of the investigation to the Congress within 18 months after the date of the enactment of this Act.

(e)(1) The Secretary of Health and Human Services shall develop and carry out demonstration projects commencing no

later than January 1, 1984, to test—
(A) methods for identifying patients at risk of institutionalization who could be treated more cost-effectively with home health services and other non-institutional health services; and

(B) alternative reimbursement methodologies for home health agencies in order to determine the most cost-effective and efficient way of providing home health services.

- (2) Methods of identifying patients at risk of institutionalization to be tested by the Secretary under paragraph (1)(A) may include, but not be limited to, the identification of hospitalized medicare patients who are candidates for early discharge due to availability of home health services and individuals in the community who could avoid institutionalization with the availability of home health services.
- (3) Reimbursement methodologies to be tested by the Secretary under paragraph (1)(B) may include but not be limited to fee schedules, prospective reimbursement, and capitation payments.
- (4) The Secretary shall report to Congress his findings with regard to the demonstrations carried out under paragraph (1) no later than January 1, 1985.
- (f) For purposes of this section, the term "home health services" has the meaning prescribed for the term by section 1861(m) of the Social Security Act.

#### ANALYSIS OF THYROID CANCER; ACTIONS BY SECRETARY

SEC. 7. (a) In carrying out section 301 of the Public Health Service Act, the Secretary of Health and Human Services shall-

- (1) conduct scientific research and prepare analyses necessary to develop valid and credible assessments of the risks of thyroid cancer that are associated with thyroid doses of Iodine 131;
- (2) conduct scientific research and prepare analyses necessary to develop valid and credible methods to estimate the thyroid doses of Iodine 131 that are received by individuals from nuclear bomb fallout;
- (3) conduct scientific research and prepare analyses necessary to develop valid and credible assessments of the exposure to Iodine 131 that the American people received from the Nevada atmospheric nuclear bomb tests; and
- (4) prepare and transmit to the Congress within one year after the date of enactment of this Act a report with respect to the activities conducted in carrying out paragraphs (1), (2), and (3).
- (b)(1) Within one year after the date of enactment of this Act, the Secretary of Health and Human Services shall devise and publish radioepidemiological tables that estimate the likelihood that persons who have or have had any of the radiation related cancers and who have received specific doses prior to the onset of such disease developed cancer as a result of these doses. These tables shall show a probability of causation of developing each radiation related cancer associated with receipt of doses ranging from 1 millirad to 1,000 rads in terms of sex, age at time of exposure, time from exposure to the onset of the cancer in question, and such other categories as the Secretary, after consulting with appropriate scientific experts, determines to be relevant. Each probability of causation shall be calculated and displayed as a single percentage figure.
- (2) At the time the Secretary of Health and Human Services publishes the tables pursuant to paragraph (1), such Secretary shall also publish-
- (A) for the tables of each radiation related cancer, an evaluation which will assess

the credibility, validity, and degree of certainty associated with such tables; and

(B) a compilation of the formulas that yielded the probabilities of causation listed in such tables. Such formulas shall be published in such a manner and together with information necessary to determine the probability of causation of any individual who has or has had a radiation related cancer and has received any given dose.

(3) The tables specified in paragraph (1) and the formulas specified in paragraph (2) shall be devised from the best available data that are most applicable to the United States, and shall be devised in accordance with the best available scientific procedures and expertise. The Secretary of Health and Human Services shall update these tables and formulas every four years, or whenever he deems it necessary to insure that they continue to represent the best available scientific data and expertise.

#### TECHNICAL AMENDMENTS TO THE PUBLIC HEALTH SERVICE ACT

SEC. 8. (a) Section 207(a)(1) of such Act (42 U.S.C. 209(a)(1)) is amended by inserting

"psychology," after "pharmacy,".
(b) Section 306(1)(2) of such Act U.S.C. 242k(1)(2)) is amended by striking out subparagraph (D) and redesignating subparagraphs (E), (F), and (G) as subparagraphs (D), (E), and (F), respectively.

(c) Section 308(d) of such Act (42 U.S.C. 242m(d)) is amended (1) by inserting ", if an establishment or person supplying the in-formation or described in it is identifiable," after "No information", and (2) by striking out "authorized by guidelines in effect under section 306(1)(2) or under regulations of the Secretary" and inserting in lieu thereof "such establishment or person has consented (as determined under regulations of the Secretary) to its use for such other purpose"

(d) The first sentence of section 311(c)(2) of such Act (42 U.S.C. 243(c)(2)) is amended by striking out "forty-five days" and insert-

ing instead "six months".

(e) Section 330(d)(2) of such Act (42) U.S.C. 254c(d)(2)) is amended by inserting before "and the costs" the following: ", the costs of repaying loans made by the Farmers Home Administration for buildings,

(f) Section 337(a) of such Act (42 U.S.C. 254j(a)) is amended by striking out "carrying out this subpart" and inserting in lieu thereof "carrying out this subpart (other than section 338G)".

(g)(1) Section 338B(e) of the Public Health Service Act (42 U.S.C. 254m-(e)) is amended by inserting before the period the following: "or under section 225 as in effect on September 30, 1977".

(2) Section 338D(b) of such Act (42 U.S.C. 294w(b)) is amended by striking out "section and inserting in lieu thereof "sec-

(3) Section 338E(d)(1) of such Act (42 U.S.C. 294X(d)(1)) is amended by striking out "section 338D(c)" and inserting in lieu

thereof "section 338D(b)"

(h) Section 340(g) of the Public Health Service Act (42 U.S.C. 256(g)) is amended (1) by striking out "and" after "1980," in paragraph (1) and by inserting before the period in that paragraph a comma and "and \$3,000,000 for the fiscal year ending Sep-"and tember 30, 1982", and (2) by inserting "and" after "1980," in paragraph (2) and by striking out in that paragraph ", and \$3,000,000 for the fiscal year ending September 30, 1982"

(i) Section 737(2) of such Act (42 U.S.C. 294j(2)) is amended by inserting "in a State

after "means a school".

(j) Section 781(a)(2) of such Act (42 U.S.C. 295g-1(a)(2)) is amended by striking out "under area health education center programs'

(k)(1) Section 791A(b)(3)(A) of such Act (42 U.S.C. 295h-1a(b)(3)(A)) is amended by striking out "postbaccalaureate" and inserting in lieu thereof "baccalaureate"

(2) Section 791(c)(2)(A) of such Act (42 U.S.C. 295h(c)(2)(A)) is amended to read as

follows:

"(A) such application contains assurances satisfactory to the Secretary that in the school year (as defined in regulations of the Secretary) beginning in the fiscal year for which the applicant receives a grant under subsection (a) that-

"(i) at least 25 individuals will complete the graduate educational programs of the entity for which such application is submit-

ted: and

'(ii) such entity shall expend or obligate at least \$100,000 in funds from non-Federal sources to conduct such programs; and".

(1) section 831(b) of such act (42 U.S.C. 297-1(b)) is amended by inserting before the period a comma and the following: \$400,000 for the fiscal year ending September 30, 1983, and \$800,000 for the fiscal year ending September 30, 1984"

(m) Title VIII of such Act is amended by adding at the end thereof the following:

#### "TECHNICAL ASSISTANCE

"Sec. 857. Funds appropriated under this title may be used by the Secretary to provide technical assistance in relation to any of the authorities under this title.'

(n) Section 1001(c), 1003(b), and 1005(b) of such Act (42 U.S.C. 300(c), 300a-1(b), 300a-3(b)) are each amended by striking out the comma after "2981" and inserting in lieu thereof a semicolon.

(o) Section 1101(b) of such Act (42 U.S.C. 300b(b)) (as in effect before its repeal by section 2193(b)(1) of the Omnibus Budget Reconciliation Act of 1981 is amended by inserting a comma after "1981".

(p) Section 1536 of such Act (42 U.S.C.

300n-5) (as amended by section 935 of the Omnibus Budget Reconciliation Act of 1981) is amended by striking out "this title and" and inserting in lieu thereof "this title

(q) Section 1602(f)(2) of such Act (42 U.S.C. 300g-2(f)(2)) is amended by inserting after "including" the following: "selling real property pledged as security for such a loan

or loan guarantee and".
(r)(1) The matter in section 1706(a) (42) U.S.C. 300u-5(a)) of the Public Health Service Act preceding paragraph (1) is amended by striking out "Health Information, Health Promotion and Physical Fitness and Sports Medicine" and inserting instead "Health Promotion".

(2) The section heading for section 1706 of such Act (42 U.S.C. 300u-5) is amended to read as follows:

#### "OFFICE OF HEALTH PROMOTION"

(s) The second sentence of section 1904(a)(1)(F) of such Act (42 U.S.C. 300w-3(a)(1)(F)) is amended by striking out "equipment for the systems" and inserting in lieu thereof "equipment for the systems (other than systems with repsect to which grants were made as prescribed by section 1905(c)(2))".

(t) Effective October 1, 1982, section 1912(b) of such Act (42 U.S.C. 300x-1(b)) is amended to read as follows:

'(b)(1) From the remainder of the amount appropriated under section 1911 for any fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to such remainder for that fiscal year as the amounts-

"(A) which would have been provided by the Secretary to the State and entities in the State under section 301 of this Act for mental health services demonstrations and under the Community Mental Health Centers Act and the Mental Health Systems Act mental health services for fiscal year 1981 if the Secretary had obligated all the funds for such purposes available for such Acts under Public Law 96-536, and

'(B) provided by the Secretary to the State and entities in the State under the laws referred to in subparagraphs (D) and (E) of paragraph (2) for fiscal year 1980,

bore to the total amount appropriated for mental health services demonstrations and mental health services for fiscal year 1981 under Public Law 96-536 for section 301 of this Act, the Community Mental Health Centers Act and the Mental Health Systems Act and the total amount appropriated for fiscal year 1980 for the provisions of law referred to in subparagraphs (D) and (E) of paragraph (2).

"(2) The provisions of law referred to in paragraph (1) are the following provisions of law as in effect on the day before the date of the enactment of the Omnibus Budget Reconciliation Act of 1981:

"(A) The Community Mental Health Cen-

ters Act.

"(B) The Mental Health Systems Act.

"(C) Section 301 of this Act.

"(D) Sections 301 and 312 of the Comprehensive Alcohol Abuse and Alcoholism, Prevention, Treatment, and Rehabilitation Act

"(E) Sections 409 and 410 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act.

"(3) For purposes of paragraph (1), the total amount appropriated under Public Law 96-536 for mental health services demonstrations under section 301 of this Act shall be deemed not to exceed \$20,000,000; and if such total amount did exceed \$20,000,000, the amount that would have been provided to each State and entities in each State shall be ratably reduced for purposes of paragraph (1)(A) to conform to the limit prescribed by this paragraph.

"(4) To the extent that all the funds appropriated under section 1911 for a fiscal year and available for allotment in such fiscal year are not otherwise allotted to

States because-

"(A) one or more States have not submitted an application or description of activities in accordance with section 1915 for the fiscal year:

"(B) one or more States have notified the Secretary that they do not intend to use the full amount of their allotment; or

"(C) some State allotments are offset or repaid under section 1916(b)(3);

such excess shall be allotted among each of the remaining States in proportion to the amount otherwise allotted to such States for the fiscal year without regard to this paragraph.".

(u)(1) Section 1915(c)(5) of such Act (42 U.S.C. 300x-4(c)(5)) is amended (1) by inserting "procedures for" before "procedural", and (2) by striking out "review procedures" and inserting in lieu thereof "review".

(2)(A) Section 1915(c)(6)(A)(i) of such Act. (42 U.S.C. 300x-4(c)(6)(A)(i)) is amended-

(i) by striking out "for mental health serv-

(ii) by inserting "for mental health services" after "fiscal year 1981";

(iii) by inserting "for mental health services demonstrations under section 301 of this Act" before "if the Secretary"; and
(iv) by striking out "such Acts" each place

it occurs and inserting in lieu thereof "such provisions of law'

(B) Section 1915(c)(6)(A)(ii) of such Act

(42 U.S.C. 300x-4(c)(6)(A)(ii)) is amended— (i) by striking out "for mental health services

(ii) by inserting "for mental health serv-

ices" after "fiscal year 1981";

(iii) by inserting "and for mental health services demonstrations under section 301 of this Act" before "if the Secretary"; and (iv) by striking out "such Acts" and insert-

ing in lieu thereof "such provisions of law (v) Section 1932 of such Act is amended

(1) inserting "(a)" after "1932.", and (2) adding a new subsection (b) as follows:

"(b) The Secretary shall promulgate separate regulations governing the administration of this part. Such regulations shall take into account the distinctive features of the grant program authorized under this part.".

(w) From the funds appropriated under section 419B of such Act or under any other applicable provision of law, the Secretary of Health and Human Services shall provide for the development and support of not less than ten comprehensive centers for sickle cell disease.

#### MISCELLANEOUS TECHNICAL AMENDMENTS

Sec. 9. (a) Section 931(a) of the Omnibus Budget Reconciliation Act of 1981 is amend-ed by striking out "1980." in paragraphs (1), (2), and (3) and inserting in lieu thereof "1980;".

(b) Section 936(b)(1) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "300m(d)(1)(B)(ii)" inserting in lieu thereof "300m(d)(1)(B)".

(c) Section 942(i) of the Omnibus Budget

Reconciliation Act of 1981 is amended by striking out "'feasible (1)'" and inserting in lieu thereof "'feasible (i)' ".

(d)(1) Section 963(b)(4) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "clause (2)" and inserting

in lieu thereof "clause (3)".

(2) Section 311(a)(3) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (42 U.S.C. 4577(b)(3)) is amended by striking out the period at the end and inserting in lieu thereof a comma.

(e) Section 965(a) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out paragraph (A) and by redesignating paragraphs (B), (C), and (D) as paragraphs (1), (2), and (3), respectively.

(f) Section 2741(a)(3) of the Omnibus

Budget Reconciliation Act of 1981 is amend-

ed by striking out "and 'and'". (g)(1) Section 709 of the Controlled Substances Act (21 U.S.C. 904) is amended (1) by striking out subsections (a) and (b), (2) by striking out "(c)", and (3) by amending the section heading to read as follows:

#### "PAYMENT OF TORT CLAIMS"

(2) The item relating to section 709 in the table of contents of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by striking out "Authorizations of Appropriations" and inserting in lieu thereof "Payment of Tort Claims".

(h) Section 302 of the Health Planning and Resources Development Amendments of 1979 (Public Law 96-79) is repealed.

(i) The paragraph beginning with "Service and supply fund:" under the heading

"PUBLIC HEALTH SERVICE" in the Federal Security Agency Appropriation Act, 1946 (42 U.S.C. 231) is amended by inserting , or in advance," after "stock furnished"

(j)(1) Section 6(b)(1) of the Consumer Product Safety Act (15 U.S.C. 2055(b)(1)) is amended by striking out "paragraph (2)" and inserting in lieu thereof "paragraph

(2) Section 11(c) of such Act (15 U.S.C. 2060(c)) is amended by striking out "section 10(e)(4)" and inserting in lieu thereof "subsection (f)"

(3) Section 15(g)(1) of such Act (15 U.S.C. 2064(g)(1)) is amended by striking out "section 12(c)(1)" and inserting in lieu thereof 12(d)(1)"

(4)(A) Section 19(a)(7) of such Act (15 U.S.C. 2068(a)(7)) is amended by striking out "section 9(d)(2)" and inserting in lieu thereof "section 9(g)(2)".

(B) Paragraph (8) of section 19(a) of such Act is repealed and paragraph (9) and the first of the two paragraphs (10) are redesig-

nated as paragraphs (8) and (9), respective-

(5) Section 31(b)(1) of such Act (15 U.S.C. 2080(b)(1)) is amended by striking out "The Commission" and all that follows through 'Substances Act," and inserting in lieu thereof the following:

"(b)(1) The Commission may not issue "(A) an advance notice of propsed rulemaking for a consumer product safety rule, "(B) a notice of proposed rulemaking for a

rule under section 27(e), or

"(C) an advance notice of proposed rulemaking for regulations under section 2(g)(1) of the Federal Hazardous Substances Act,"

(k) Section 3(a) of the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1472(a)) is amended by striking out ", after consultation with the Technical Advisory Committee provided for in section 6 of this Act".

(1) Section 15 of the Federal Hazardous Substances Act (15 U.S.C. 1274) (as amended by section 1211(f)(1) of the Omnibus Budget Reconciliation Act of 1982) is amended by adding at the end thereof the following:

"(e) For purposes of this section (1) the term 'manufacturer' includes an importer for resale, and (2) a dealer who sells at wholesale an article or substance shall with respect to that sale be considered the distributor of that article or substance

(m) Section 1211(h)(4) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking cut "by inserting ', Science and Transportation' immediately after 'on Commerce', and".

SEC. 10. Of the funds available under section 706 of the Energy Security Act, there shall be made available \$800,000 of the costs of a grant or contract for a study of the water quality of the Quabbin Reservoir in Massachusetts.

#### PATENT TERM EXTENSION

SEC. 11. (a) Title 35, United States Code, is amended by adding the following new section:

'§ 155. Patent term extension

"Notwithstanding the provisions of section 154, the term of a patent which encompasses within its scope a composition of matter or a process for using such composi-tion shall be extended if such composition or process has been subjected to a regulatory review by the Federal Food and Drug Administration pursuant to the Federal Food, Drug, and Cosmetic Act leading to the publication of regulation permitting the

interstate distribution and sale of such composition or process and for which there has thereafter been a stay of regulation of approval imposed pursuant to section 409 of the Federal Food, Drug, and Cosmetic Act which stay was in effect on January 1, 1981, by a length of time to be measured from the date such stay of regulation of approval was imposed until such proceedings are finally resolved and commercial marketing permitted. The patentee, his heirs, successors or assigns shall notify the Commissioner of Patents and Trademarks within ninety days of the date of enactment of this section or the date the stay of regulation of approval has been removed, whichever is later, of the number of the patent to be extended and the date the stay was imposed and the date commercial marketing was permitted. On receipt of such notice, the Commissioner shall promptly issue to the owner of record of the patent a certificate of extension, under seal, stating the fact and length of the extension and identifying the composition of matter or process for using such composition to which such extension is applicable. Such certificate shall be recorded in the official file of each patent extended and such certificate shall be considered as part of the original patent, and an appropriate notice shall be published in the Official Gazette of the Patent and Trademark Office.'

(b) The analysis for chapter 14 of such title 35 is amended by adding at the end the following:

155. Patent term extension.".

• Mr. HATCH. This bill (H.R. 5238) passed both the House and Senate in September and the House has now revised the bill to reflect the agreement reached among interested Senate and House Members. The major difference between this latest version and the Senate-passed version is the inclusion of a modified tax credit provision for orphan drugs and a modified version of the Senate's grant and contract provision for orphan drugs. I want to thank my colleagues, Senators Dole and Long for their cooperation in making a compromise on the tax credit possible. Further, I want to express my gratitude to Senator Nancy Kassebaum, who with me has championed the cause of orphan drugs in the Senate.

This bill addresses a national problem: The need to develop drugs to treat relatively rare diseases. The fact that these afflictions affect only a small portion of our population does not diminish the tragedy involved, or our national responsibility for these Americans. Special consideration is necessary because the prospect of small markets has discouraged necessary research which is usually expensive.

Over the last 2 years an increasing amount of attention has focused on this problem. FDA and the pharmaceutical industry are the key players and they are starting to respond.

As my colleagues may know, the Department of Health and Human Services recently established an Orphan Products Board, whose mission is to coordinate, both in the public sectors, research and development of therapies for rare diseases. Further, I have been encouraged by the efforts of FDA to streamline the drug approval procedures process, particularly to promote the early utilization of promising drugs under a program known as the compassionate IND process.

In addition, the Pharmaceutical Manufacturers Association has created a Commission on Drugs for Rare Diseases, chaired by former Assistant Secretary for Health Theodore Cooper, M.D., Ph. D. The Commission has as its charge identifying drug products for rare diseases and assuring that a company will produce it. A recent result was Abbott Laboratory's willingness to produce and distribute hematin, a drug to treat rare disturbance of the hemoglobin metabolism known as hepatic porphyrias.

I strongly support these and other efforts which are designed to accomplish the goals of the Orphan Drug

Act.

Nonetheless it has become clear to me that Congress must also contribute to these efforts. The Orphan Drug Act is properly supportive of what is being done. It also pushes those involved toward greater effort. In addition, perhaps most importantly, the bill is a powerful and needed symbol of national concern for those afflicted with rare diseases.

The bill before us, H.R. 5238, amends the Federal Food. Drug and Cosmetic Act, the Public Health Services Act, and the Internal Revenue Code so that the development of 'orphan drugs" is encouraged.

The Food and Cosmetic Act will be amended to facilitate the development of drugs for rare diseases and conditions. The legislation directs the Secretary of Health and Human Services to promulgate regulations to designate drugs intended solely for "drug treatment investigation." Under this category the sponsor of a drug may apply to the Secretary for the designation of a drug for a rare disease or condition found in the United States. Also they will learn of the necessary steps needed to be taken in order to gain drug approval. It will allow drugs to be approved on a less costly basis. If the Secretary determines that the drug falls under either of these categories, he is required to designate it as such. This designation will facilitate drug treatment investigations to include human participation with a rare disease or condition.

The Public Health Service Act will be amended to establish in the Department of Health and Human Services an interagency committee known as the Committee on Orphan Drugs Development. As I noted, a similar board already exists. The sole function of this committee will be to promote the development of drugs for rare diseases or conditions. In addition, the Director of the National Institutes of Health is required to submit to the Committee an annual report on the rare disease and condition research activities of NIH. The committee is required to report by June 1 of each year to appropriate congressional committees on activities and the results of its evaluation, including the report submitted by NIH.

The Internal Revenue Code will be amended to include a tax credit for part of the costs of the human clinical trial portion of developing an orphan drug. While these drugs are still likely to be unprofitable, this will hopefully provide a strong stimulus to drug companies to develop orphan products. A parallel provision provides FDA with a modest amount of grant and contract money to help support orphan drug human clinical trials by organizations and individuals not in a position to utilize the tax credit.

The lives of millions of Americans are touched by a double tragedy. First, these individuals are victims of rare, debilitating conditions such as Wilson's Disease and ALS (amyotrophic lateral sclerosis). Second, they sometimes find it impossible to obtain treatment for these conditions even in cases where such treatment may be available. H.R. 5238 could be instrumental in improving and saving the lives of Americans afflicted by serious

but rare disease.

At my insistence, H.R. 5238, as it passed the Senate in September, includes important home health provisions. There is strong consensus among health policy experts and our elderly that improved home health services are essential. A new report published in December 1982 by the General Accounting Office states that the provision of home health services will be one of the most important health issues of the 1980's. As chairman of the Labor and Human Resources Committee, I asked the GAO to study the impact of expanded home services in assisting: First, hospitalized medicare patients to be discharged to their homes sooner than is currently possible; second, the impact home services may have on reducing hospital admissions and length of stay. The GAO report recommended that more research be done in these areas as they felt cost savings could be achieved by developing better methods of identifying the patient at risk of institutionalization, and decreasing the length and frequency of their hospital stays if there were expanded home health services. Among other things the report found when expanded home services were made available to the chronically ill elderly, longevity and client-reported satisfaction were improved.

If, as the GAO report indicates, the demand for home health services is going to increase in the 1980's, then we need to develop services to meet the health needs of our elderly at a cost we, that is the Federal Government and the individual, can all afford.

The purpose of the home health provisions included in the orphan drugs legislation is to direct loans and grants to rural and urban areas for expansion of home health services to areas where these services are inaccessible or inadequate to meet the population needs. The Secretary will also be expected to consider the relative need for these services and give preference to areas where there is a high percentage of elderly, medically needy, or disabled citizens. It is also critical to the success of this program that the entities given these grants and loans actually serve the populations most in need of home health services.

Several studies have been required in these home health provisions to assist us in collecting and building a data base from which future policy decisions regarding home health services can be formed. These include: First, the impact of the grants and contracts made under this act; second, the extent to which standards have been applied to the training of personnel who provide home health services; third, efforts by the Department of Health and Human Services to stem fraud and abuse in the medicare and medicaid home health programs; fourth, report the results of studies and activities currently evaluating home and community-based services as defined in the Omnibus Reconciliation Act of 1981, and report any recommendations for legislative action which might improve the provision of those services and fifth, a compilation and analysis of studies relating to alternative reimbursement methodologies. All of these reports are critical to future policy decisions regarding home health services.

The final and most important provision is in accordance with the GAO recommendations to the Labor and Human Resources Committee. Secretary is directed to carry out demonstration projects to identify patients at risk of institutionalization who could be more cost effectively treated at home and alternative reimbursement methodologies for home health agencies to determine the most cost-effective and efficient way of providing home health services.

H.R. 4238, at my request and as it passed the Senate initially, also includes provisions directing the Department of Health and Human Services to conduct two activities important to gaining a better understanding of the health effects of radioactive fallout from above-ground testing of nuclear weapons. The first requirement is to develop "radioepidemiological tables"

which will catalog for each radiogenic cancer the probability that a given dose of ionizing radiation caused the cancer of a victim who has received such a dose. The second requirement is to investigate the relationship between iodine-131 and thyroid cancer in light of the distribution in the environment of iodine-131 as a product of nuclear testing.

Neither aspect of this amendment requires an appropriation. Both are proper functions under section 301 of the Public Health Service Act. The construction of the radioepidemiological tables has been recommended by representatives of the scientific community and the Department of Defense, Energy, and Health and Human Services, all of whom stressed that the only practicable method of linking radiation exposure to the later development of cancer is through the science of radioepidemiology. During a March Assistant Secretary hearing, Edward Brandt promise that development of these tables would begin, but I believe a legislative mandate is essential for the work to be accomplished.

Also, the Bureau of Radiological Health is currently focusing on two important iodine-131 thyroid studies. But during the March 12 hearing, we also learned that the greatest uncertainty regarding the health effects of the atomic testing involves the relationship between bomb-produced iodine-131 and the incidence of thyroid cancer. Legislative language requiring these studies be accomplished is essential to provide a proper mandate for this work.

H.R. 5238 also includes a large number of minor and technical provisions which passed the Senate before. All have been cleared by both sides as noncontroversial.

In sum, I ask my colleagues to adopt

this important legislation.

• Mr. KASTEN. Mr. President, on May 11, 1981, I introduced S. 1155, the Consumer Product Safety Act Amendments of 1981. These amendments were referred to and reported from the Senate Commerce Committee, chaired by Senator Packwood. This legislation made important changes to the Consumer Product Safety Act, Public Law 92-573. Since its passage as part of the Omnibus Budget Reconciliation Act of 1981, Public Law 97-37, however, we have found that a few technical corrections are needed.

Section 9(j) of the Orphan Drug Act, H.R. 5238, amends the Consumer Product Safety Act, correcting these

minor technical matters.

I take this opportunity to thank the distinguished Labor Committee chairman (Mr. Hatch) for his willingness to permit us to include this section in the legislation now before the Senate. Senator Packwood and I support the amendment and appreciate Senator Hatch's efforts.

Mr. HATCH. Mr. President, I welcome the opportunity to assist Senator Kasten, the Consumer Subcommittee chairman. The Consumer Product Safety Act is, of course, within the jurisdiction of the Senate Commerce Committee and section 9(j) amends that act. The inclusion of these amendments in the legislation now before the Senate should in no way be construed to infringe on the jurisdiction of the Commerce Committee. I am pleased to be able to provide the Senator from Wisconsin (Mr. Kasten) the opportunity to enact these technical amendments as part of the Orphan Drug Act.

• Mrs. HAWKINS. Mr. President, both the House and the Senate passed versions of the Orphan Drug Act this September. I am pleased that we have resolved the differences between the two versions and will send this legislation to President Reagan. There were many important differences to be resolved including the essential issue of tax credits versus grants, but I now feel we have a piece of legislation that will greatly benefit the millions of Americans who suffer from rare debili-

tating diseases.

I believe the time has come for America to make a serious commitment to developing orphan drugs, drugs used to treat those whose need is very great but whose number is relatively small. Although the diseases in question are rare, they touch the lives of millions of Americans-both victims and their families. Some names are familiar: muscular dystrophy, multiple sclerosis, cystic fibrosis, cerebral palsy, hemophilia. Others go by the names of their most famous victims: amyotrophic lateral sclerosis-Lou Gehrig's disease-Huntington's chorea-Woody Guthrie-neurofibromatosis-the Elephant Man. Some are known best by the groups that are hit hardest: sickle cell anemia, the painful blood disorder that kills blacks; thalassemia, a related disease that affects Mediterranean peoples; Tay-Sachs disease, the progressive retardation and paralysis that kills the children of East European Jews. Still others are virtually un-known, except to their sufferers: Wilson's disease, Fabry's disease, cystinosis, Freidreich's ataxia, Paget's disease. Each of these disorders affects only a tiny portion of the world's population, in some cases as few as 400 to 500 people. But all are devastating to their victims.

The growth in biomedical technology will surely allow us to produce increasing numbers of new chemical entities, including orphan compounds such progress is presently being curtailed, however, by the lack of incentives for mass production.

Pharmaceutical companies are presently manufacturing orphan drugs only as a generous public service to treat the relatively few people afflict-

ed by these rare diseases. It is a very expensive process. It is also very difficult for a pharmaceutical company to recoup the money it invests in research and development, often \$80 million or more for a new drug is required. Only if 100,000 or more people need the product can a pharmaceutical company's investment be regained. And only special incentives will persuade these companies to make orphan drugs commercially available to victims of rare diseases.

The Orphan Drug Act offers these special incentives. It proposes four of them: First, a more flexible review procedure for the approval of orphan drug products, second, financial assistance to defray the cost of researching these drugs, third, exclusive marketing rights on nonpatentable orphan drugs for 7 years, and fourth, establishment of an Orphan Products Board to coordinate the activities of all Federal agencies involved in drug research and development.

Mr. President, this country is far behind many other nations in our treatment of rare diseases and our productions of orphan drugs. As Congressman James H. Scheuer has pointed out:

America was not first—but 31st—to make available to our people Adriamycin, an advanced anti-cancer drug. America was not first—but 41st—in approving a generic mineral, lithium, for manic depressive reactions. . . . Two million American children and adults with epilepsy had to wait 11 years longer than the French for a better new medicine.

Mr. President, we cannot afford to fall behind and lose the momentum we have gained through public support of this issue. The Orphan Drug Act holds great promise of providing important incentives to health care. I am delighted to support this legislation and I look forward to its enactment.

• Mr. KENNEDY. Mr. President, thousands of Americans are victims of rare and debilitating diseases and conditions-100,000 Americans have tourette syndrome, 200,000 are muscular dystrophy vicitims, 14,000 are afflicted with Huntington's chorea. Because of the relatively limited market for pharmaceutical products to treat these rare diseases and conditions, drug companies have been unwilling to devote the considerable resources needed to develop safe and effective drug therapies. They argue that the cost of developing these drugs would far exceed the small return on sales.

H.R. 5238, the Orphan Drug Act, holds out a promise to those who suffer from rare diseases and conditions—both the victims and their families. It facilitates the approval process for orphan drugs. It offers exclusive marketing rights on nonpatentable orphan drugs for 7 years after the date of FDA approval. It establishes an Orphan Products Board to coordi-

nate the activities of all Federal agencies involved in drug research and regulation.

Finally, and most importantly, it provides for a tax credit to pharmaceutical companies to offset the cost of human clincal testing of orphan drugs. I appreciate the active role played by our colleagues on the Finance Committee in developing this compromise.

H.R. 5238 also contains several other important provisions that warrant mention.

First, it reauthorizes the categorical program of funding for home health services and training programs.

Second, it requires the Department of Health and Human Services to conduct studies of the health effects of iodine 131 and low-level ionizing radiation.

Third, it requires HHS to continue support for at least 10 comprehensive sickle cell centers located in medical centers across the country.

Fourth, it requires HHS to promulgate separate regulations for the primary care bloc grant program.

Fifth, the bill provides that of the funds available under section 706 of the Energy Security Act, \$800,000 shall be made available for a study of the water quality of the Quabbin Reservoir in Massachusetts. This provision is virtually identical to an amendment that I offered and that was adopted during the Senate's consideration of the orphan drug bill. The Quabbin Reservoir is the principal source of drinking water for 2 million residents of the Metropolitan Boston area. These funds will permit the Commonwealth of Massachusetts to assess critical water quality management problems relating to the acidification of the reservoir, and develop a rational and cost-effective program to mitigate the deterioration of the water quality in the reservoir.

Mr. President, the Orphan Drug Act deserves the wholehearted support of the Senate. I urge its adoption.

• Mrs. KASSEBAUM. Mr. President, I am delighted to have the opportunity today to speak on behalf of final passage of the Orphan Drug Act. This measure represents the culmination of efforts begun in the 95th Congress to devise a legislative response to the severe problems faced by individuals suffering from rare diseases and conditions. These individuals are touched by a double tragedy. Not only are they afflicted with rare, debilitating conditions, but they also find it virtually impossible to obtain treatments for these aliments. Drugs for the treatment of these diseases are commonly known as orphan drugs due to the fact that high development and drug approval costs coupled with a small market for their use give these drugs limited commercial value.

I first became involved with this issue in 1981 when constituents visited my office to discuss the orphan drug problem as it relates to Huntington's disease. At that time, I introduced S. 1498 as an effort to facilitate the development of drugs for rare diseases. Based on suggestions which resulted from discussion of this measure, new orphan drug legislation was developed. I introduced this revised measure, S. 2130, earlier this year as a companion to H.R. 5238 sponsored by Representative Henry Waxman.

Over the last 2 years, I have come in contact with countless individuals who have been working tirelessly on behalf of a solution. My attention has been directed to a wide number of diseases previously unknown to me, many of which afflict only a few thousand people. It is my belief that the legislation now before us is an important step toward alleviating some of the difficulties facing these individuals and their families. It addresses these problems in a number of ways:

First, it provides for the designation of a drug as being one for a rare disease or condition and establishes a process by which sponsors of designated drugs may receive written recommendations from the Department of Health and Human Services with respect to the clinical and nonclinical investigations required for approval. This provision is made sufficiently flexible to permit revisions in the original recommendations should conditions warrant. At the same time, it will provide valuable information permitting drug sponsors to make a better assessment of the resources they will need to commit to the development of a drug for a rare disease.

Second, it attempts to address the problems created when a promising drug treatment is not patentable by providing a 7-year exclusive marketing right for the sponsor of the drug.

Third, it makes provision for the encouragement of sponsors of designated drugs to design open protocols for the addition to drug tests of individuals requiring a drug for treatment purposes. This provision would permit easier access to drugs under investigation by individuals who have no other form of treatment available to them.

Fourth, it provides a statutory basis for the operation of the Orphan Products Board within the Department of Health and Human Services to promote the development of orphan drugs and devices and to coordinate orphan drug activities. This measure also authorizes \$4 million in funding in each of the next 3 years for use by HHS in awarding grants related to work with rare diseases and conditions.

Finally, it provides financial incentives for the development of drugs for rare diseases by providing a 50-percent tax credit to sponsors of designated

drugs for expenses involved in the human clinical testing phase of the drug development process. This tax credit, which will expire at the end of 5 years, will partially offset the financial loss entailed in developing and producing orphan drugs.

This legislation will complement current public and private efforts to address the orphan drug problem. The Department of Health and Human Services, for example, is to be commended for its initiative in establishing earlier this year an Orphan Products Board under the leadership of Assistant Secretary for Health Edward Brandt. The Food and Drug Administration, which has long played an important role in identifying problems associated with rare diseases and conditions, has substantially broadened its efforts in this area by establishing an office of orphan products development under the direction of Dr. Marion Finkel. In addition, the Pharmaceutical Manufacturers Association has created a commission on drugs for rare diseases. This commission is designed to bring together the promising ideas of investigators and the resources of the pharmaceutical industry. Finally, countless individualsmany of whom have firsthand knowledge of the personal tragedies associated with rare diseases and conditions-have played a crucial role in focusing attention on the orphan drug issue and in promoting solutions to it. The continued interest and cooperation of these groups are critical to the success of efforts to expand the availability of treatments for rare diseases and conditions. The flexibility and incentives provided by the Orphan Drug Act should give added force to these efforts.

I greatly appreciate the work of all who have been involved with this issue. I offer a special thanks to Senator Long and to the senior Senator from my own State of Kansas, Senator Dole, for the role they played in devising the compromises necessary to bring this bill before us today.

Mr. President, I urge the adoption of this measure.

Mr. STEVENS. I move that the Senate concur in the House amendment.

The motion was agreed to.

### VOYAGEURS NATIONAL PARK

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 625.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendments of the Senate numbered 2 and 3 to the amendment of the House to the bill (S. 625) entitled "An Act to revise the

boundary of Voyageurs National Park in the State of Minnesota, and for other purposes."

Resolved, That the House agree to the amendment of the Senate numbered 1 to the amendment of the House to the aforesaid bill with the following amendment:

In lieu of the matter inserted by said amendment, insert:

"(A) tenders a conveyance of the lands described in paragraph 1 (C) and (D) to the United States by such instrument and in such manner as are satisfactory to the Secretary, including but not limited to lease or easement: Provided, That if the interest conveyed is a lease or easement, the State of Minnesota shall substitute therefore a transfer of all right, title and interest in the land by June 30, 1987: Provided further, That if the State does not transfer all right, title and interest in such lands by June 30, 1987, the land described in paragraph 1(E) shall revert to the United States for administration by the Secretary as part of the park; and

• Mr. DURENBERGER. Mr. President, passage by the Senate of S. 625, a bill to revise the boundary of Voyageurs National Park in the State of Minnesota and for other purposes, culminates long and often difficult efforts to form a national park along the United States/Canadian border.

Legislation authorizing the establishment of Voyageurs National Park was passed in January 1972. It was not until April 1975 that the park was officially established by the Secretary of Interior. Since that time, much has been accomplished. The Voyageurs Park master plan has been adopted, all but 4 percent of the 133,622 land acres in the park have been acquired.

The identical bills that Congressman Oberstar and I introduced in 1980 and again in 1981, carried out the recommendations arrived at in the master plan for the park; but more significantly it will resolve the points of controversy between northern Minnesota residents, the State of Minnesota and the Department of Interior which have arisen during the planning process.

Hearings were held by Senator Wallop's Subcommittee on Public Lands and Reserve Water and a bill reported by the Energy and Natural Resources Committee passed the Senate by unanimous vote on June 10, 1982. The House also held hearings and passed the bill. When Congress recessed in October 2 only one, somewhat technical, difference existed between the two versions.

The point under consideration was the transfer of State lands along the Ash River Trail and the State Kabetogama Ranger Station to the National Park Service. An amendment to the Senate passed bill was agreed upon; this accommodated both the concerns of the House and Senate committees. The House passed the bill on December 14, and I am pleased and gratified to see the Senate take final action today.

S. 625 is the result of consensus achieved through extensive discussions involving the Minnesota congressional delegation, the committee leadership, environmental groups in Washington and in Minnesota, the Minnesota Department of Natural Resources and the people of northern Minnesota in the area where the park is located, as well as through congressional hearings.

The bill passed today provides for the transfer of 1,000 acres, primarily water, of Black Bay to the State of Minnesota. This establishes this section as a State wildlife management area; increases authorization for land acquisition in the pack by \$12.3 million; includes in the park the area needed for the visitor's center; and authorizes a tourism project and road study of access to the park.

Passage of S. 625 marks the end of the beginning of Voyageur's National Park. With the action taken by the Senate today, we move into the period in which the full potential of this magnificant national park will be realized.

I want to express my sincere thanks to Senator Wallop for his unfailing support and leadership; to Senator Boschwitz my distinguished colleague from Minnesota; to Congressman Oberstar and the entire Minnesota delegation for their efforts on behalf of the bill.

Finally, this statement would not be complete without recognizing the unfailing efforts of both the Voyageurs National Park Association and the Citizens Advisory Committee for Voyageurs. The leadership of Elmer L. Anderson, Martin Kellogg, William Holes, Irv Anderson, State Senator Robert Lessard, Sam Morgan, Lloyd Brandt, Rick Mollin, Jack Koch, Clarence Hart, and many others is essential.

There would not be a Voyageurs Park without their vision and leadership. The bill we enact today is a better bill because of their involvement in its development and passage. Their continued work is essential to the future of Voyageurs which we in Minnesota consider the finest national park in the country.

Mr. STEVENS. I move that the Senate concur in the House amendment to the Senate amendment.

The motion was agreed to.

## APPOINTMENT OF SPECIAL PROSECUTORS

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2059.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives: Resolved, That the bill from the Senate (S. 2059) entitled "An Act to change the coverage of officials and the standards for the appointment of a special prosecutor in the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes", do pass with the following amendments:

(1) Page 4, line 4, strike out "five" and insert: "two".

(2) Page 4, line 15, strike out "President; and" and insert: "President.".

(3) Page 4, strike out lines 16 through 19, inclusive.

(4) Page 5, line 14, strike out ", or the appearance thereof".

Mr. STEVENS. I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

## NUCLEAR REGULATORY COMMISSION AUTHORIZATION

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 2330.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House recede from its disagreement to the amendment of the Senate to the bill (H.R. 2330) entitled "An Act to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes", and concur therein with the following amendment: In lieu of the matter inserted by said amendment, insert:

## AUTHORIZATION OF APPROPRIATIONS

SECTION 1. (a) There are hereby authorized to be appropriated to the Nuclear Regulatory Commission in accordance with the provisions of section 261 of the Atomic Energy Act of 1954 (42 U.S.C. 2017) and section 305 of the Energy Reorganization Act of 1974 (42 U.S.C. 5875), for the fiscal years 1982 and 1983 to remain available until expended, \$485,200,000 for fiscal year 1982 and \$513,100,000 for fiscal year 1983 to be allocated as follows:

(1) Not more than \$80,700,000 for fiscal year 1982 and \$77,000,000 for fiscal year 1983 may be used for "Nuclear Reactor Regulation", of which an amount not to exceed \$1,000,000 is authorized each such fiscal year to be used to accelerate the effort in gas-cooled thermal reactor preapplication review, and an amount not to exceed \$6,000,000 is authorized each such fiscal year to be used for licensing review work for a fast breeder reactor plant project. In the event of a termination of such breeder reactor project, any unused amount appropriated pursuant to this paragraph for licensing review work for such project may be used only for safety technology activities.

(2) Not more than \$62,900,000 for fiscal year 1982 and \$69,850,000 for fiscal year 1983 may be used for "Inspection and Enforcement".

(3) Not more than \$42,000,000 for fiscal year 1982 and \$47,059,600 for fiscal year 1983 may be used for "Nuclear Material Safety and Safeguards".

(4) Not more than \$240,300,000 for fiscal year 1982 and \$257,195,600 for fiscal year 1983 may be used for "Nuclear Regulatory Research", of which—

(A) an amount not to exceed \$3,500,000 for fiscal year 1982 and \$4,500,000 for fiscal year 1983 is authorized to be used to accelerate the effort in gas-cooled thermal reactor safety research:

(B) an amount not to exceed \$18,000,000 is authorized each such fiscal year to be used for fast breeder reactor safety research; and

(C) an amount not to exceed \$57,000,000 is authorized for such two fiscal year period to be used for the Loss-of-Fluid Test Facility research program.

In the event of a termination of the fast breeder reactor plant project, any unused amount appropriated pursuant to this paragraph for fast breeder reactor safety research may be used generally for "Nuclear Regulatory Research".

(5) Not more than \$21,900,000 for fiscal year 1982 and \$20,197,800 for fiscal year 1983 may be used for "Program Technical

Support".

(6) Not more than \$37,400,000 for fiscal year 1982 and \$41,797,000 for fiscal year 1983 may be used for "Program Direction and Administration".

(b) The Nuclear Regulatory Commission may use not more than 1 percent of the amounts authorized to be appropriated under subsection (a)(4) to exercise its authority under section 31 a. of the Atomic Energy Act of 1954 (42 U.S.C. 2051(a)) to enter into grants and cooperative agree-ments with universities pursuant to such section. Grants made by the Commission shall be made in accordance with the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.) and other applicable law. In making such grants and entering into such cooperative agreements, the Commission shall endeavor to provide appropriate opportunities for universities in which the student body has historically been predominately comprised of minority groups.

(c) Any amount appropriated for a fiscal year to the Nuclear Regulatory Commission pursuant to any paragraph of subsection (a) for purposes of the program office referred to in such paragraph, or any activity that is within such program office and is specified in such paragraph, may be reallocated by the Commission for use in a program office referred to in any other paragraph of such subsection, or for use in any other activity within a program office, except that the amount available from appropriations for such fiscal year for use in any program office or specified activity may not, as a result of reallocations made under this subsection, be increased or reduced by more than \$500,000 unless-

(1) a period of 30 calendar days (excluding any day in which either House of Congress is not in session because of an adjournment of more than 3 calendar days to a day certain or an adjournment sine die) passes after the receipt, by the Committee on Energy and Commerce and the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Environment and Public Works of the Senate, of notice submitted by the Commission containing a full and complete statement of the reallocation proposed to be made and the facts and circumstances relied upon in support of such proposed reallocation; or

(2) each such committee, before the expiration of such period, transmits to the Commission a written notification that such committee does not object to such proposed reallocation.

## AUTHORITY TO RETAIN CERTAIN AMOUNTS RECEIVED

SEC. 2. Moneys received by the Nuclear Regulatory Commission for the cooperative nuclear research program and the material access authorization program may be retained and used for salaries and expenses associated with such programs, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), and shall remain available until expended.

#### AUTHORITY TO TRANSFER CERTAIN AMOUNTS TO OTHER AGENCIES

SEC. 3. From amounts appropriated to the Nuclear Regulatory Commission pursuant to section 1(a), the Commission may transfer to other agencies of the Federal Government sums for salaries and expenses for the performance by such agencies of activities for which such appropriations of the Commission are made. Any sums so transferred may be merged with the appropriation of the agency to which such sums are transferred.

## LIMITATION ON SPENDING AUTHORITY

SEC. 4. Notwithstanding any other provision of this Act, no authority to make payments under this Act shall be effective except to such extent or in such amounts as are provided in advance in appropriation Acts.

#### AUTHORITY TO ISSUE LICENSES IN ABSENCE OF EMERGENCY PREPAREDNESS PLANS

SEC. 5. Of the amounts authorized to be appropriated under section 1, the Nuclear Regulatory Commission may use such sums as may be necessary, in the absence of a State or local emergency preparedness plan which has been approved by the Federal Emergency Management Agency, to issue an operating license (including a temporary operating license under section 192 of the Atomic Energy Act of 1954, as amended by section 11 of this Act) for a nuclear power reactor, if it determines that there exists a State, local, or utility plan which provides reasonable assurance that public health and safety is not endangered by operation of the facility concerned.

## NUCLEAR SAFETY GOALS

SEC. 6. Funds authorized to be appropriated under this Act shall be used by the Nuclear Regulatory Commission to expedite the establishment of safety goals for nuclear reactor regulation. The development of such safety goals, and any accompanying methodologies for the application of such safety goals, should be expedited to the maximum extent practicable to permit establishment of a safety goal by the Commission not later than December 31, 1982.

## LOSS-OF-FLUID TEST FACILITY

SEC. 7. Of the amounts authorized to be used for the Loss-of-Fluid Test Facility in accordance with section 1(a)(4) for fiscal years 1982 and 1983, the Commission shall provide funding through contract with the organization responsible for the Loss-of-Fluid Test operations for a detailed technical review and analysis of research results obtained from the Loss-of-Fluid Test Facility research program. The contract shall provide funding for not more than twenty manyears in each of fiscal years 1982 and 1983 to conduct the technical review and analysis

## NUCLEAR DATA LINK

SEC. 8. (a) Of the amounts authorized to be appropriated under this Act for the fiscal

years 1982 and 1983, not more than \$200,000 is authorized to be used by the Nuclear Regulatory Commission for—

(1) the acquisition (by purchase, lease, or otherwise) and installation of equipment to be used for the "small test prototype nuclear data link" program or for any other program for the collection and transmission to the Commission of data from licensed nuclear reactors during abnormal conditions at such reactors; and

(2) the conduct of a full and complete study and analysis of—

(A) the appropriate role of the Commission during abnormal conditions at a nuclear reactor licensed by the Commission;

(B) the information which should be available to the Commission to enable the Commission to fulfill such role and to carry out other related functions;

(C) various alternative means of assuring that such information is available to the Commission in a timely manner; and (D) any changes in existing Commission

authority necessary to enhance the Commission response to abnormal conditions at a nuclear reactor licensed by the Commission. The small test prototype referred to in paragraph (1) may be used by the Commission in carrying out the study and analysis under paragraph (2). Such analysis shall include a cost-benefit analysis of each alternative ex-

amined under subparagraph (C).
(b)(1) Upon completion of the study and analysis required under subsection (a)(2), the Commission shall submit to Congress a detailed report setting forth the results of

such study and analysis.

(2) The Commission may not take any action with respect to any alternative described in subsection (a/(2)/C), unless a period of 60 calendar days (excluding any day in which either House of Congress is not in session because of an adjournment of more than 3 calendar days to a day certain or an adjournment sine die) passes after the receipt, by the Committee on Energy and Commerce and the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Environment and Public Works of the Senate, of notice submitted by the Commission containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action.

## INTERIM CONSOLIDATION OF OFFICES

SEC. 9. (a) Of the amounts authorized to be appropriated pursuant to paragraph 6 of section 1(a), such sums as may be necessary shall be available for interim consolidation of Nuclear Regulatory Commission headquarters staff offices.

(b) No amount authorized to be appropriated under this Act may be used, in connection with the interim consolidation of Nuclear Regulatory Commission offices, to relocate the offices of members of the Commission outside the District of Columbia.

## THREE MILE ISLAND

SEC. 10. (a) No part of the funds authorized to be appropriated under this Act may be used to provide assistance to the General Public Utilities Corporation for purposes of the decontamination, cleanup, repair, or rehabilitation of facilities at Three Mile Island Unit 2.

(b) The prohibition contained in subsection (a) shall not relate to the responsibilities of the Nuclear Regulatory Commission for monitoring or inspection of the decontamination, cleanup, repair, or rehabilita-

tion activities at Three Mile Island and such prohibition shall not apply to the use of funds by the Nuclear Regulatory Commission to carry out regulatory functions of the Commission under the Atomic Energy Act of 1954 with respect to the facilities at Three Mile Island

(c) The Nuclear Regulatory Commission shall include in its annual report to the Congress under section 307(c) of the Energy Reorganization Act of 1974 (42 U.S.C. 5877(c)) as a separate chapter a description of the collaborative efforts undertaken, or proposed to be undertaken, by the Commission and the Department of Energy with respect to the decontamination, cleanup, repair, or rehabilitation of facilities at Three Mile Island Unit 2.

(d) No funds authorized to be appropriated under this Act may be used by the Commission to approve any willful release of "accident-generated water", as defined by the Commission in NUREG-0683 ("Final Programmatic Environmental Impact Statement" p. 1-23), from Three Mile Island Unit 2 into the Susquehanna River or its watershed.

#### TEMPORARY OPERATING LICENSES

SEC. 11. Section 192 of the Atomic Energy Act of 1954 (42 U.S.C. 2242) is amended to read as follows:

"SEC. 192. TEMPORARY OPERATING LI-

'a. In any proceeding upon an application for an operating license for a utiliza-tion facility required to be licensed under section 103 or 104 b. of this Act, in which a hearing is otherwise required pursuant to section 189 a., the applicant may petition the Commission for a temporary operating license for such facility authorizing fuel loading, testing, and operation at a specific power level to be determined by the Commission, pending final action by the Commission on the application. The initial petition for a temporary operating license for each such facility, and any temporary operating license issued for such facility based upon the initial petition, shall be limited to power levels not to exceed 5 percent of rated full thermal power. Following issuance by the Commission of the temporary operating license for each such facility, the licensee may file petitions with the Commission to amend the license to allow facility operation in staged increases at specific power levels, to be determined by the Commission, exceeding percent of rated full thermal power. The initial petition for a temporary operating license for each such facility may be filed at any time after the filing of: (1) the report of the Advisory Committee on Reactor Safeguards required by section 182 b.: (2) the filing of the initial Safety Evaluation Report by the Nuclear Regulatory Commission staff and the Nuclear Regulatory Commission staff's first supplement to the report prepared in response to the report of the Advisory Committee on Reactor Safeguards for the facility; (3) the Nuclear Regulatory Commission staff's final detailed statement on the environmental impact of the facility prepared pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)); and (4) a State, local, or utility emergency preparedness plan for the facility. Petitions for the issuance of a temporary operating license, or for an amendment to such a license allowing operation at a specific power level greater than that authorized in the initial temporary operating license, shall be accompanied by an affidavit or affidavits setting forth the specific facts upon which the petitioner relies

to justify issuance of the temporary operating license or the amendment thereto. The Commission shall publish notice of each such petition in the Federal Register and in such trade or news publications as the Commission deems appropriate to give reasonable notice to persons who might have a potential interest in the grant of such temporary operating license or amendment thereto. Any person may file affidavits or statements in support of, or in opposition to, the petition within thirty days after the publication of such notice in the Federal Register.

b. With respect to any petition filed pursuant to subsection a of this section, the Commission may issue a temporary operating license, or amend the license to authorize temporary operation at each specific power level greater than that authorized in the initial temporary operating license, as determined by the Commission, upon find-

ing that—
"(1) in all respects other than the conduct or completion of any required hearing, the requirements of law are met;

"(2) in accordance with such requirements, there is reasonable assurance that operation of the facility during the period of the temporary operating license in accordance with its terms and conditions will provide adequate protection to the public health and safety and the environment during the period of temporary operation; and

"(3) denial of such temporary operating license will result in delay between the date on which construction of the facility is sufficiently completed, in the judgment of the Commission, to permit issuance of the temporary operating license, and the date when such facility would otherwise receive a final operating license pursuant to this Act.

The temporary operating license shall become effective upon issuance and shall contain such terms and conditions as the Commission may deem necessary, including the duration of the license and any provision for the extension thereof. Any final order authorizing the issuance or amendment of any temporary operating license pursuant to this section shall recite with specificity the facts and reasons justifying the findings under this subsection, and shall be transmitted upon such issuance to the Committees on Interior and Insular Affairs and Energy and Commerce of the House of Representatives and the Committee on Environment and Public Works of the Senate. The final order of the Commission with respect to the issuance or amendment of a temporary operating license shall be subject to judicial review pursuant to chapter 158 of title 28, United States Code. The requirements of section 189 a. of this Act with respect to the issuance or amendment of facility licenses shall not apply to the issuance or amendment of a temporary operating license under this section.

"c. Any hearing on the application for the final operating license for a facility required pursuant to section 189 a. shall be concluded as promptly as practicable. The Commission shall suspend the temporary operating license if it finds that the applicant is not prosecuting the application for the final operating license with due diligence. Issuance of a temporary operating license under subsection b. of this section shall be without prejudice to the right of any party to raise any issue in a hearing required pursuant to section 189 a.; and failure to assert any ground for denial or limitation of a temporary operating license shall not bar the assertion of such ground in connection with

the issuance of a subsequent final operating license. Any party to a hearing required pursuant to section 189 a. on the final operating license for a facility for which a temporary operating license has been issued under subsection b., and any member of the Atomic Safety and Licensing Board conducting such hearing, shall promptly notify the Commission of any information indicating that the terms and conditions of the temporary operating license are not being met, or that such terms and conditions are not sufficient to comply with the provisions of paragraph (2) of subsection b.

"d. The Commission is authorized and directed to adopt such administrative remedies as the Commission deems appropriate to minimize the need for issuance of temporary operating licenses pursuant to this section

"e. The authority to issue new temporary operating licenses under this section shall expire on December 31, 1983.".

#### OPERATING LICENSE AMENDMENT HEARINGS

SEC. 12. (a) Section 189 a. of the Atomic Energy Act of 1954 (42 U.S.C. 2239(a)) is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end thereof the following new paragraph:

"(2)(A) The Commission may issue and make immediately effective any amendment to an operating license, upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person. Such amendment may be issued and made immediately effective in advance of the holding and completion of any required hearing. In determining under this section whether such amendment involves no significant hazards consideration, the Commission shall consult with the State in which the facility involved is located. In all other respects such amendment shall meet the requirements of this Act.

"(B) The Commission shall periodically (but not less frequently than once every thirty days) publish notice of any amendments issued, or proposed to be issued, as provided in subparagraph (A). Each such notice shall include all amendments issued, or proposed to be issued, since the date of publication of the last such periodic notice. Such notice shall, with respect to each amendment or proposed amendment (i) identify the facility involved; and (ii) provide a brief description of such amendment. Nothing in this subsection shall be construed to delay the effective date of any amendment.

"(C) The Commission shall, during the ninety-day period following the effective date of this paragraph, promulgate regulations establishing (i) standards for determining whether any amendment to an operating license involves no significant hazards consideration, (ii) criteria for providing or, in emergency situations, dispensing with prior notice and reasonable opportunity for public comment on any such determination, which criteria shall take into account the exigency of the need for the amendment involved; and (iii) procedures for consultation on any such determination with the State in which the facility involved is located."

(b) The authority of the Nuclear Regulatory Commission, under the provisions of the amendment made by subsection (a), to issue and to make immediately effective any amendment to an operating license shall take effect upon the promulgation by the Commission of the regulations required in such provisions.

#### QUALITY ASSURANCE

SEC. 13. (a) The Nuclear Regulatory Commission is authorized and directed to implement and accelerate the resident inspector program so as to assure the assignment of at least one resident inspector by the end of fiscal year 1982 at each site at which a commercial nuclear powerplant is under construction and construction is more than 15 percent complete. At each such site at which construction is not more than 15 percent complete, the Commission shall provide that such inspection personnel as the Commissions deems appropriate shall be physically present at the site at such times following issuance of the construction permit as may be necessary in the judgment of the Commis-

(b) The Commission shall conduct a study of existing and alternative programs for improving quality assurance and quality control in the construction of commercial nuclear powerplants. In conducting the study, the Commission shall obtain the comments of the public, licensees of nuclear powerplants, the Advisory Committee on Reactor Safeguards, and organizations comprised of professionals having expertise in appropriate fields. The study shall include an analysis of the following:

(1) providing a basis for quality assurance and quality control, inspection, and enforcement actions through the adoption of an approach which is more prescriptive than that currently in practice for defining principal architectural and engineering criteria for the construction of commercial nuclear

powerplants; (2) conditioning the issuance of construction permits for commercial nuclear powerplants on a demonstration by the licensee that the licensee is capable of independently managing the effective performance of all quality assurance and quality control re-

sponsibilities for the powerplant;
(3) evaluations, inspections, or audits of commercial nuclear powerplant construction by organizations comprised of professionals having expertise in appropriate fields which evaluations, inspections, or audits are more effective than those under current practice;

(4) improvement of the Commission's organization, methods, and programs for quality assurance development, review, and inspection; and

(5) conditioning the issuance of construction permits for commercial nuclear powerplants on the permittee entering into contracts or other arrangements with an independent inspector to audit the quality assurance program to verify quality assurance performance.

For purposes of paragraph (5), the term "independent inspector" means a person or other entity having no responsibility for the design or construction of the plant involved. The study shall also include an analysis of quality assurance and quality control programs at representative sites at which such programs are operating satisfactorily and an assessment of the reasons therefor.

(c) For purposes of-(1) determining the best means of assuring that commercial nuclear powerplants are constructed in accordance with the applicable safety requirements in effect pursuant to the Atomic Energy Act of 1954; and (2) assessing the feasibility and benefits of

the various means listed in subsection (b);

the Commission shall undertake a pilot program to review and evaluate programs that include one or more of the alternative concepts identified in subsection (b) for the purposes of assessing the feasibility and benefits of their implementation. The pilot program shall include programs that use inde-pendent inspectors for auditing quality assurance responsibilities of the licensee for the construction of commercial nuclear powerplants, as described in paragraph (5) of subsection (b). The pilot program shall include at least three sites at which commercial nuclear powerplants are under construction. The Commission shall select at least one site at which quality assurance and quality control programs have operated satisfactorily, and at least two sites with remedial programs underway at which major construction, quality assurance, or quality control deficiencies (or any combination thereof) have been identified in the past. The Commission may require any changes in existing quality assurance and quality control organizations and relationships that may be necessary at the selected sites to implement the pilot program.

(d) Not later than fifteen months after the date of the enactment of this Act, the Commission shall complete the study required under subsection (b) and submit to the United States Senate and House of Representatives a report setting forth the results of the study. The report shall include a brief summary of the information received from the public and from other persons referred to in subsection (b) and a statement of the Commission's response to the significant comments received. The report shall also set forth an analysis of the results of the pilot program required under subsection (c). The report shall be accompanied by the recommendations of the Commission, including any legislative recommendations, and a description of any administrative actions that the Commission has undertaken or intends to undertake, for improving quality assurance and quality control programs that are applicable during the construction of nuclear powerplants.

### LIMITATION ON USE OF SPECIAL NUCLEAR MATERIAL

SEC. 14. Section 57 of the Atomic Energy Act of 1954 (42 U.S.C. 2077) is amended by adding at the end thereof the following new

"e. Special nuclear material, as defined in section 11, produced in facilities licensed under section 103 or 104 may not be transferred, reprocessed, used, or otherwise made available by any instrumentality of the United States or any other person for nuclear explosive purposes.".

## RESIDENT INSPECTORS

SEC. 15. Of the amounts authorized to be appropriated under section 1, the Nuclear Regulatory Commission shall use such sums as may be necessary to conduct a study of the financial hardships incurred by resident inspectors as a result of (1) regulations of the Commission requiring resident inspectors to relocate periodically from one duty station to another; and (2) the requirements of the Commission respecting the domicile of resident inspectors and respecting travel between their domicile and duty station in such manner as to avoid the appearance of a conflict of interest. Not later than 90 days after the date of the enactment of this Act, the Commission shall submit to the Congress a report setting forth the findings of the Commission as a result of such study, together with a legislative proposal (including

any supporting data or information) relating to any assistance for resident inspectors determined by the Commission to be appropriate.

SABOTAGE OF NUCLEAR FACILITIES OR FUEL

SEC. 16. Section 236 of the Atomic Energy Act of 1954 (42 U.S.C. 2284) is amended to read as follows:

"SEC. 236. SABOTAGE OF NUCLEAR FACILITIES OR FIREL

"a. Any person who intentionally and willfully destroys or causes physical damage to, or who intentionally and willfully attempts to destroy or cause physical damage to-

"(1) any production facility or utilization facility licensed under this Act;

"(2) any nuclear waste storage facility licensed under this Act; or

"(3) any nuclear fuel for such a utilization facility, or any spent nuclear fuel from such a facility:

shall be fined not more than \$10,000 or imprisoned for not more than ten years, or

'b. Any person who intentionally and willfully causes or attempts to cause an interruption of normal operation of any such facility through the unauthorized use of or tampering with the machinery, components, or controls of any such facility, shall be fined not more than \$10,000 or imprisoned for not more than ten years, or both.".

## DEPARTMENT OF ENERGY INFORMATION

SEC. 17. (a) Section 148 a. (1) of the Atomic Energy Act of 1954 (42 U.S.C. 2168(a)(1)) is amended by inserting after "'Secretary')" the following: ", with respect to atomic energy defense programs,".

(b) Section 148 of the Atomic Energy Act of 1954 (42 U.S.C. 2168) is amended by adding at the end thereof the following new subsec-

"d. Any determination by the Secretary concerning the applicability of this section shall be subject to judicial review pursuant to section 552(a)(4)(B) of title 5, United States Code.

"e. The Secretary shall prepare on a quarterly basis a report to be made available upon the request of any interested person, detailing the Secretary's application during that period of each regulation or order prescribed or issued under this section. In particular, such report shall-

"(1) identify any information protected from disclosure pursuant to such regulation

or order;

"(2) specifically state the Secretary's justification for determining that unauthorized dissemination of the information protected from disclosure under such regulation or order could reasonably be expected to have a significant adverse effect on the health and safety of the public or the common defense and security by significantly increasing the likelihood of illegal production of nuclear weapons, or theft, diversion, or sabotage of nuclear materials, equipment, or facilities, as specified under subsection a.; and

"(3) provide justification that the Secretary has applied such regulation or order so as to protect from disclosure only the minimum amount of information necessary to protect the health and safety of the public or the common defense and security.'

STANDARDS AND REQUIREMENTS UNDER SECTION 275

SEC. 18. (a) Section 275 of the Atomic

Energy Act of 1954 is amended-

(1) by striking in subsection a. "one year after the date of enactment of this section" and substituting "October 1, 1982" and by adding the following at the end thereof: "After October 1, 1982, if the Administrator has not promulgated standards in final form under this subsection, any action of the Secretary of Energy under title I of the Uranium Mill Tailings Radiation Control Act of 1978 which is required to comply with, or be taken in accordance with, standards of the Administrator shall comply with, or be taken in accordance with, the standards proposed by the Administrator under this subsection until such time as the Administrator promulgates such standards in final form."

(2) by striking in subsection b. (1) "eighteen months after the enactment of this section, the Administrator shall, by rule, promulgate" and inserting in lieu thereof the following: "October 31, 1982, the Administrator shall, by rule, propose, and within 11 months thereafter promulgate in final

form,"

(3) by adding the following at the end of subsection b. (1): "If the Administrator fails to promulgate standards in final form under this subsection by October 1, 1983, the authority of the Administrator to promulgate such standards shall terminate, and the Commission may take actions under this Act without regard to any provision of this Act requiring such actions to comply with, or be taken in accordance with standards promulaated by the Administrator. In any such case, the Commission shall promulgate, and from time to time revise, any such standards of general application which the Commission deems necessary to carry out its responsibilities in the conduct of its licensing activities under this Act. Require-ments established by the Commission under this Act with respect to byproduct material as defined in section 11 e. (2) shall conform to such standards. Any requirements adopted by the Commission respecting such byproduct material before promulgation by the Commission of such standards shall be amended as the Commission deems necessary to conform to such standards in the same manner as provided in subsection f. (3). Nothing in this subsection shall be construed to prohibit or suspend the implementation or enforcement by the Commission of any requirement of the Commission respecting buproduct material as defined in section 11 e. (2) pending promulgation by the Commission of any such standard of general ap-

(4) by adding the following new subsection

at the end thereof:

"f. (1) Prior to January 1, 1983, the Commission shall not implement or enforce the provisions of the Uranium Mill Licensing Requirements published as final rules at 45 Federal Register 65521 to 65538 on October 3, 1980 (hereinafter in this subsection referred to as the 'October 3 regulations'). After December 31, 1982, the Commission is authorized to implement and enforce the provisions of such October 3 regulations (and any subsequent modifications or additions to such regulations which may be adopted by the Commission), except as otherwise provided in paragraphs (2) and (3) of this subsection.

"(2) Following the proposal by the Administrator of standards under subsection b., the Commission shall review the October 3 regulations, and, not later than 90 days after the date of such proposal, suspend implementation and enforcement of any provision of such regulations which the Commission determines after notice and opportunity for public comment to require a major action or major commitment by licensees

which would be unnecessary if—

"(A) the standards proposed by the Administrator are promulgated in final form without modification, and

"(B) the Commission's requirements are modified to conform to such standards.

Such suspension shall terminate on the earlier of April 1, 1984 or the date on which the Commission amends the October 3 regulations to conform to final standards promulgated by the Administrator under subsection b. During the period of such suspension, the Commission shall continue to regulate by product material (as defined in section 11 e. (2)) under this Act on a licensee-by-licensee basis as the Commission deems necessary to protect public health, safety, and the environment.

"(3) Not later than 6 months after the date on which the Administrator promulgates final standards pursuant to subsection b. of this section, the Commission shall, after notice and opportunity for public comment, amend the October 3 regulations, and adopt such modifications, as the Commission deems necessary to conform to such final standards of the Administrator.

"(4) Nothing in this subsection may be construed as affecting the authority or responsibility of the Commission under section 84 to promulgate regulations to protect the public health and safety and the envi-

ronment.".

(b)(1) Section 108(a) of the Uranium Mill Tailings Radiation Control Act of 1978 is amended by adding the following new para-

graph at the end thereof:

"(3) Notwithstanding paragraphs (1) and (2) of this subsection, after October 31, 1982, if the Administrator has not promulgated standards under section 275 a. of the Atomic Energy Act of 1954 in final form by such date, remedial action taken by the Secretary under this title shall comply with the standards proposed by the Administrator under such section 275 a. until such time as the Administrator promulgates the standards in final form."

(2) The second sentence of section 108(a)(2) of the Uranium Mill Tailings Radiation Control Act of 1978 is repealed.

## AGREEMENT STATES

SEC. 19. (a) Section 274 o. of the Atomic Energy Act of 1954 is amended by adding the following at the end thereof: "In adopting requirements pursuant to paragraph (2) of this subsection with respect to sites at which ores are processed primarily for their source material content or which are used for the disposal of byproduct material as defined in section 11 e. (2), the State may adopt alternatives (including, where appropriate, sitespecific alternatives) to the requirements adopted and enforced by the Commission for the same purpose if, after notice and opportunity for public hearing, the Commission determines that such alternatives will achieve a level of stabilization and containment of the sites concerned, and a level of protection for public health, safety, and the environment from radiological and nonradiological hazards associated with such sites, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by standards and requirements adopted and enforced by the Commission for the same purpose and any final standards promulgated by the Administrator of the Environmental Protection Agency in accordance with section 275. Such alternative State requirements may take into account local or regional conditions, including geology, topography, hydrology and meteorology.".

(b) Section 204(h)(3) of the Uranium Mill Tailings Radiation Control Act of 1978 is amended by inserting the following before the period at the end thereof: "Provided, however, That, in the case of a State which has exercised any authority under State law pursuant to an agreement entered into under section 274 of the Atomic Energy Act of 1954, the State authority over such by product material may be terminated, and the Commission authority over such material may be exercised, only after compliance by the Commission with the same procedures as are applicable in the case of termination of agreements under section 274 j. of the Atomic Energy Act of 1954."

#### AMENDMENT TO SECTION 84

SEC. 20. Section 84 of the Atomic Energy Act of 1954 is amended by adding the following at the end thereof:

"c. In the case of sites at which ores are processed primarily for their source material content or which are used for the disposal of byproduct material as defined in section 11 e. (2), a licensee may propose alternatives to specific requirements adopted and enforced by the Commission under this Act. Such alternative proposals may take into account local or regional conditions including geology, topography, hydrology and meteorology. The Commission may treat such alternatives as satisfying Commission requirements if the Commission determines that such alternatives will achieve a level of stabilization and containment of the sites concerned, and a level of protection for public health, safety, and the environment from radiological and nonradiological hazards associated with such sites, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by standards and requirements adopted and enforced by the Commission for the same purpose and any final standards promulgated by the Administrator of the Environmental Protection Agency in accordance with section 275.".

## **EDGEMONT**

SEC. 21. Section 102(e) of the Uranium Mill Tailings Radiation Control Act of 1978 is amended by adding the following at the end thereof:

"(3) The Secretary shall designate as a processing site within the meaning of section 101(6) any real property, or improvements thereon, in Edgemont, South Dakota, that...

"(A) is in the vicinity of the Tennessee Valley Authority uranium mill site at Edgemont (but not including such site), and

"(B) is determined by the Secretary to be contaminated with residual radioactive materials

In making the designation under this paragraph, the Secretary shall consult with the Administrator, the Commission and the State of South Dakota. The provisions of this title shall apply to the site so designated in the same manner and to the same extent as to the sites designated under subsection (a) except that, in applying such provisions to such site, any reference in this title to the date of the enactment of this Act shall be treated as a reference to the date of the enactment of this paragraph and in determining the State share under section 107 of the costs of remedial action, there shall be credited to the State, expenditures made by the State prior to the date of the enactment of this paragraph which the Secretary determines would have been made by the State or

the United States in carrying out the requirements of this title.".

ADDITIONAL AMENDMENTS TO SECTIONS 84 AND

SEC. 22. (a) Section 84 a. (1) of the Atomic Energy Act of 1954 is amended by inserting before the comma at the end thereof the following: ", taking into account the risk to the public health, safety, and the environment, with due consideration of the economic costs and such other factors as the Commission determines to be appropriate,

(b) Section 275 of the Atomic Energy Act of

1954 is amended-

(1) in subsection a., by inserting after the second sentence thereof the following new sentence: "In establishing such standards, the Administrator shall consider the risk to the public health, safety, and the environthe environmental and economic costs of applying such standards, and such other factors as the Administrator determines to be appropriate."; and

(2) by adding at the end of subsection b. (1) the following new sentence: "In establishing such standards, the Administrator shall consider the risk to the public health, safety, and the environment, the environmental and economic costs of applying such standards, and such other factors as the Administrator determines to be appropriate."

Mr. SIMPSON. Mr. President, the measure now before the Senate-the NRC authorization bill for fiscal years 1982 and 1983-is the product of long and difficult negotiations between the House and Senate conferees over the past 7 months in order to reconcile the two bills that were committed to the conferees last May. There have been numerous differences of opinion as to how each of the issues in the Houseand Senate-passed bills might be resolved and we have been quite deliberate in our discussions in order to insure that the views of all conferees were fully and carefully considered.

We fashioned a compromise that was set forth in the Conference Report 97-884, which the Senate adopted on October 1 and forwarded to the House. Included in the compromise agreed upon in conference was a provision pertaining to the importation of uranium for use in domestic commercial nuclear power reactors. This particular issue was perhaps the most nettlesome of all committed to the conferees, and it was only after extended discussion of this issue that we were able to fashion an agreement that enjoyed broad support among the conferees. Unfortunately, following adoption of the conference report by the Senate, with this provision included, and upon return of the conference report to the House for final action. the uranium import provision was successfully challenged on the House floor and deleted from the conference report.

I would like to make just a few remarks about this particular provision. After extensive hearings in the Senate on the condition of the domestic uranium industry, I was firmly convinced of the need to insure that the domestic mining and milling industry remain

strong and healthy, not only for reasons related to the commercial nuclear power industry, but for national security reasons as well. The provision supported by me and passed by the Senate was an attempt to address what I viewed as an increasingly serious problem-and do it in a responsible and forthright fashion. Moreover, we were successful in bringing to the attention of others in the Senate, as well as our very distinguished House colleagues, the gravity of the situation facing this absolutely essential domestic industry. The compromise fash-ioned by the conferees, in my judg-ment, served to address these critical

However, this provision was deleted from the conference report when it was taken up on the House floor, much to my disappointment. I now urge the Senate to concur in the action taken by the House, not because of any change in feeling that there still remain very serious problems that must be addressed in the domestic uranium industry-problems that I intend to devote continuing attention to-but rather because I think we have in the remaining provisions of this bill a very significant piece of legislation that will greatly benefit the country upon enactment. To mention but a few of the important provisions in this bill: this bill sets forth the first authorization for the Nuclear Regulatory Commission since 1980, and provides much-needed budgetary guid-ance for the agency. The uranium mill tailings provision in this bill restores the mill tailings regulatory program under the Uranium Mill Tailings Radiation Control Act of 1978 to the course originally intended by Congress, significantly expands the flexibility of States to apply Federal requirements, directs both NRC and EPA to consider costs in imposing regulatory requirements, and establishes new deadlines for the EPA and NRC regulations.

The Sholly provision corrects what most all of us have viewed as an erroneous judicial interpretation of the hearing requirement for "no signifiamendcant hazards consideration" ments by providing that no hearings in advance of these types of determi-

nations are required.

The temporary operating license provision confers upon the NRC a much-needed authority arising out of the Post-TMI licensing delays, authorizing the NRC to isue operating licenses to applicants prior to the completion of that certain public hearing required under the Atomic Energy Act, if all other statutory requirements are met.

And finally, the nuclear safety goal provision directs the NRC to establish by December 31, 1982, a safety goal for nuclear reactor regulation. Promulgation of such a safety goal, I trust, will restore some degree of reasoned, orderly regulation of nuclear plants by the NRC.

Because of these, and other, significant provisions in this bill, I am now urging my colleagues to concur in the action taken by the House.

I should like to make one final point, Mr. President, regarding the issue of legislative history. As you know, now that the House has stricken a provision in the conference report adopted by the Senate and sent to the House for action, we no longer have a conference report, but rather are now being asked to concur in the House message on the measure H.R. 2330. For all purposes, however, it is our intention that the joint explanatory statement of the committee of conference serve as the legislative history for this legislation, and the explanation of the intent of the conferees, as set forth in the document House Report 97-884, shall serve this purpose. Finally, Mr. President, on the issue of the uranium mill tailings amendment, I would like to include in the RECORD an exchange of communications between the chairman of the conference committee, Congressman UDALL, and Senator Do-MENICI and myself on precisely what is intended by the language adopted.

There being no objection, the material was ordered to be printed in the

RECORD, as follows:

U.S. SENATE. Washington, D.C., December 15, 1982.

Hon. Morris Udall,

Chairman, Committee on Interior and Insular Affairs, U.S. House of Representatives, Washington, D.C.

DEAR Mo: In great part due to your efforts, the conference committee on the Nuclear Regulatory Commission authorization bill agreed to amendments to the Uranium Mill Tailings Radiation Control Act. The amendments, as agreed to by the conference committee, represent a reasoned attempt to address certain problems in the administration of the Mill Tailings Act by the Environmental Protection Agency and the Nuclear Regulatory Commission that have arisen since the passage of that Act in 1978.

As the bill has now passed the House, the mill tailings amendments remain as agreed to by the conference committee. However, in the House debate on the bill, several statements were made with respect to the mill tailings amendments that could be misconstrued, which we believe it would be helpful to clarify. As the Senate will be reconsidering the bill in the near future, it would be most helpful if you could clarify the statements that are addressed below.

Section 22 of the bill provides expressly that EPA and NRC must consider risks to public health and safety and economic and environmental costs is issuing standards and regulations, respectively, governing stabilization and cleanup of uranium mill tailings. The intention of this provision is clearly stated in the conference report. The intent is to assure that standards and regulations for mill tailings be reasonably related both to the risks addressed and to the economic and environmental costs of compliance. We do not believe the conferees ever intended to suggest that the duties of these agencies to protect public health should be subordinated to economic considerations or that a strict one-to-one cost-benefit analysis was appropriate. In short, we intended that these considerations were to be seriously weighted and taken into account in the decisional processes of these agencies.

As is also clearly reflected in the conference report, we had no intention through this provision to affect, either favorably or unfavorably, any pending litigation challenging the existing NRC mill licensing regulations or to specifically ratify or reject those regulations as they are presently constituted.

Our concerns for potential conflict with the conference report arise in context of three statements made by you in a colloquy with Congressman Ottinger. First, in response to a question you state: "If such regulations are feasible, nothing in this provision would require either agency to reformulate or reconsider regulations which have been issued." Second, you concur in the statement that the conference agreement was not intended to "... undermine the recent judicial determination of sufficiency of prior agency consideration of cost in pro mulgation of mill tailings regulations." Third, you agree with the statement ' that the Commission's existing uranium mill tailings licensing requirements would then automatically go into effect," if EPA failed to timely promulgate final active site

The term "feasible" has been interpreted to authorize agencies to adopt regulations without regard to the magnitude of the costs of compliance, so long as the regulations would not force out of business a sizable segment of the regulated community. Such an interpretation in the context of section 22 would be in direct conflict with the language of the conference report, which states that we intended to adopt a reasonable relationship approach to the regulation of mill tailings.

For this reason, we believe your use of the term was casual and not intended to alter the previously stated intent of the conference committee. That is, if the cost of compliance with their regulations is reasonably related to the risks and benefits, an agency would not have to reformulate or reconsider previously issued regulations. If they have not in fact done so, the agencies would have to reconsider and, if necessary, reformulate their regulations.

The statements that the conference committee had no intent to "undermine" the decision of the court and that NRC's regulations could "automatically" go into effect without further proceedings could be misinterpreted to affirm the panel decision in the litigation challenging NRC's regulations or possibly to constitute a Congress ratification of NRC's existing regulations. We believe such interpretations would be contrary to the conference report.

As discussed above, the conferees adopted a position of neutrality on the litigation and the underlying regulations. When we took that position, a panel of the court had affirmed the regulations and that decision was subject to a petition for rehearing. Since that time, the full court has vacated the panel's judgment and set the case for rehearing. Nothwithstanding this changed circumstance, the suit should be decided by the court on the merits: If NRC has complied with the intent of Congress then the regulations should be affirmed; if not, they should be returned to NRC for further proceedings.

If your understanding of the conference report is different, we would appreciate your views.

Sincerely,

PETE V. DOMENICI, U.S. Senator.

COMMITTEE ON INTERIOR
AND INSULAR AFFAIRS,

Washington, D.C., December 15, 1982. Hon. Alan K. Simpson,

Chairman, Subcommittee on Nuclear Regulation Committee on Environment and Public Works, U.S. Senate, Washington, D.C.

DEAR ALAN: This pertains to your December 15, 1982 letter concerning the intent of the conferees with respect to Section 22 of the Conference Report on the Nuclear Regulatory Commission Authorization bill for fiscal years 1982 and 1983 (House Report 97-884).

First, let me say it is my clear understanding that the conference agreement was not intended to affect the outcome of any past or ongoing litigation involving the Uranium Mill Tailings Radiation Control Act.

Second, I believe the conferees intend that the statement of managers in the conference report, read together with the statutory language in Section 22, be controlling for purposes of interpreting this provision.

Thanks for the opportunity to make these

Sincerely,

MORRIS K. UDALL Chairman.

Mr. DOMENICI. Mr. President, I wonder if I might obtain a clarification from the distinguished Senator from Wyoming regarding section 12 of this bill, the so-called Sholly amendment, which authorizes NRC to issue amendments to operating licenses for nuclear powerplants in advance of any requested hearing if the NRC determines that the amendment involves "no significant hazards" consideration. The amendment directs the NRC to issue regulations establishing standards for such determinations.

NRC has already published proposed standards for making such determinations. The proposed standards would permit such a determination only upon a three-part finding that the proposed amendment: First, would not involve a significant increase in the probability or consequences of an accident previously evaluated, second, would not create the possibility of an accident of a type different from any previously evaluated accident, third, would not involve a significant reduction in a margin of safety. If the amendment failed to meet any of these tests, NRC would afford an opportunity for hearing in advance of issuance of the amendment.

As you know, the Sholly amendment is intended to restore to NRC an authority which it had long exercised under the Atomic Energy Act, until the courts intervened. Indeed, prior to the court decision NRC had already proposed regulations to which I have referred. NRC's approach is a tough one which appears responsible to the expressed intention of the conference

report that its standards should to the extent practicable draw a distinction between those amendments which do or do not involve a "significant hazards" determination. Accordingly, I would like the gentleman's assurance that nothing in the bill or conference report is intended to relax or in any way restrict the stringent standards which NRC has in the past and now proposes to continue to apply in making such determinations.

Mr. SIMPSON. You have my assurance. My friend from New Mexico is indeed correct.

Mr. SCHMITT. Mr. President, the NRC authorization bill contains some welcome clarifications concerning the regulation or uranium and thorium mill tailings. Under the Atomic Energy Act, States lack authority to regulate their mill tailings unless they have a discontinuance agreement with NRC providing for State assumption of regulatory responsibility. My State, New Mexico, has such an agreement. The NRC authorization bill before us contains a number of important features designed to assure that New Mexico and similarly situated agreement States have the necessary flexibility to take local conditions into account in formulating State standards and requirements and in devising State regulations for mill tailings stabilization. The bill underscores the fact that New Mexico and other States may diverge from impracticable or unreasonable Federal proscriptions. In addition, the bill clarifies that the Commission cannot revoke an agreement State's authority without according the State notice and a hearing before the five commissioners.

Mr. President, the legislation also clarifies our intent that the various agencies independently assess the significance of particular risks and devise regulations tailored to address those risks. I certainly want the public health and safety and the environment to be fully protected. However, it is contrary to the public interest, potentially counterproductive, and certainly a waste of money to impose requirements which are totally unnecessary or which are out of line with the risks involved. Regulation of mill tailings, like other regulations under the Atomic Energy Act, should be reasonable and balanced. NRC and EPA, and the courts, should take appropriate action to assure that this is accomplished.

The Department of Energy detailed many objections to the approach which EPA and NRC have thus far taken in a report entitled "Plan for Stabilization and Management of Commingled Uranium Mill Tailings," issued June 30, 1982. The Department noted that radon from tailings constitutes a tiny fraction (about 0.02 percent) of the radon lung dose to the

U.S. population, even assuming that all residents within 50 miles of tailings are exposed. However, the Department notes that the total radon release from tailings is so slight that "[r]adon from mill tailings \* \* \* dissipates to normal background levels within one-quarter to one-half mile from the site and becomes indistinguishable from natural radon."

DOE questioned whether the insignificant hazards associated with tailings justified expensive remedial action efforts, particularly since the remedial action efforts themselves would pose risks and since these risks might well exceed the risk averted. I am attaching below DOE's recommendations, which under the circumstances should be given very serious weight:

#### RECOMMENDATIONS

The responsibility for Federal regulations rests with the EPA and the NRC. The DOE has communicated its concerns to these agencies for consideration.

Practical working standards and regulations for will tailings should contain the following general provisions:

#### HEALTH EFFECTS ASSESSMENTS

Health effects assessments using representative parameters for the site should be performed on a site-by-site basis considering the unique aspects of each site, its specific environmental parameters, and its off-site population density and distribution. The assessment should be a prerequisite to remedial action and bear heavily upon the selection of alternatives and their effectiveness in reducing public risk.

## REMEDIAL ACTION

Remedial actions, such as stabilization, should also include prevention of public entry and occupancy by physical and institutional means. Maintenance and controlled self-insurance requirements should be permitted to assure that stabilization designs remain intact in the future.

## NUMERICAL VALUES

If numerical values are to be used, a range of values should be utilized as opposed to single values. The range approach recognizes the practical uncertainties of field measurements, and the natural variation of background radiation and environmental pathway parameters from site to site.

## PUBLIC DOSE

Reducing the dose to the public to acceptable levels is a goal of remedial action programs. The application of accepted standards, such as 10 CFR Part 20, which are developed in terms of the external and internal doses to the off-site public, should be considered in place of specific design requirements such as radon flux and radium concentration in soil. Basing remedial actions on accepted standards for dose to the public permits recognition of site-specific features.

Based on this discussion, specific revisions to the proposed EPA tailings stabilization standards and NRC regulations should be considered to permit a more cost-effective program of implementation. These include:

Replacing the radon flux standard with 10 CFR Part 20 concentration limits, since tailings are under some Government control and access is restricted.

Raising the radium concentration limit for decontaminated surface soil (a range of 15 pCi/g has been recommended\*).

Shortening the longevity requirements from 1000 (100 years has been recommended\*) and relying on active maintenance under institutional controls.

Eliminating the uniform cover thickness requirement since it restricts stabilization design alternatives. The standard should instead set realistic performance objectives for radon concentration at the site boundary and for tailings migration due to wind, water, and human activities.

\*UMTRA/DOE-167, "Project Plan-Uranium Mill Tailings Remedial Actions Project," p. 4.

Mr. SCHMITT. Mr. President. DOE's evaluation has recently been confirmed in a decision issued in a consolidated proceeding before NRC's Atomic Safety and Licensing Appeals Boards.1 The ASLAB's declared that radon from mill tailings and uranium mines, even if totally uncontrolled, is an insignificant contribution to the radon emitted from natural sources. "It is manifest to us," the Boards said, "that the [uranium] fuel cycle contribution to the radon already in the environment \* \* \* is so slight as to be beyond detection (let alone measurement). \* \* \*" The ASLAB's indicated that the incremental exposure is de minimis, and that "any incremental health risk occasioned by the releases attributable to the fuel cycle is negligible" and that "that speculative and conjuctural risk estimate, to the extent it need by considered under NEPA at all, is acceptable. \* \* \*"

Mr. President, I wish to compliment the Senator from Wyoming, my fellow Senator from New Mexico, and the gentleman from Arizona who chaired the conference committee for recognizing the need for perspective and balance in dealing with mill tailings issues and for clarifying the law to indicate that EPA and NRC must weigh risks and costs in the regulatory process.

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendment to the Senate amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CORRECTIONS IN ENROLLMENT OF H.R. 2330

Mr. STEVENS. Mr. President, I send to the desk a concurrent resolution making corrections in the enrollment of H.R. 2330.

The PRESIDING OFFICER. The concurrent resolution will be stated.

The legislative clerk read as follows: A concurrent resolution (S. Con. Res. 135) instructing the clerk to make corrections in the enrollment of H.R. 2330.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

Mr. STEVENS. This concurrent resolution instructs the Clerk of the House of Representatives to correct the enrollment of the bill H.R. 2330 by adding a new section at the end thereof entitled "Uranium Supply" in conjunction with the Senate action on this concurrent resolution.

I ask unanimous consent to insert in the Record a letter from the Secretary of Energy, Donald Paul Hodel to Senator Pete Domenici.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF ENERGY,
Washington, D.C., December 16, 1982.
Hon. Pete V. Domenici,
U.S. Senate,
Washington, D.C.

Dear Senator Domenici: This responds to your request for views on your proposed amendment to the House amendments to H.R. 2330, a bill to authorize appropriations to the Nuclear Regulatory Commission for fiscal years 1982 and 1983. Your amendment would provide for studies on the status and health of the domestic uranium mining and milling industry and the potential impact of uranium imports on national security if certain determinations are made.

The Administration believes that your amendment represents an acceptable compromise on this complex and difficult issue and does not object to its enactment.

The Office of Management and Budget advises that from the standpoint of the President's program there is no objection to submission of this report.

Sincerely,

DONALD PAUL HODEL.

Mr. STEVENS. Mr. President, I ask for the immediate consideration of the resolution.

The concurrent resolution (S. Con. Res. 135) was considered and agreed to.

The concurrent resolution reads as follows:

## S. CON. RES. 135

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the bill H.R. 2330, the Clerk of the House of Representatives shall make the following correction:

At the end of the bill insert the following new section:

## URANIUM SUPPLY

SEC. 23. (a)(1) Not later than 12 months after the date of enactment of this section, the President shall prepare and submit to the Congress a comprehensive review of the status of the domestic uranium mining and milling industry. This review shall be made available to the appropriate committees of the United States Senate and the House of Representatives.

(2) The comprehensive review prepared for submission under paragraph (1) shall include.

 (A) projections of uranium requirements and inventories of domestic utilities;

 (B) present and future projected uranium production by the domestic mining and milling industry;

(C) the present and future probable penetration of the domestic market by foreign imports;

<sup>&</sup>lt;sup>1</sup> In re Philadelphia Electric Company, et al., Dkt. Nos. 50-277, et al. (Nov. 19, 1982).

(D) the size of domestic and foreign ore reserves;

(E) present and projected domestic uranium exploration expenditures and plans;

 (F) present and projected employment and capital investment in the uranium industry;

(G) an estimate of the level of domestic uranium production necessary to ensure the viable existence of domestic uranium industry and protection of national security interests:

(H) an estimate of the percentage of domestic uranium demand which must be met by domestic uranium production through the year 2000 in order to ensure the level of domestic production estimated to be neces-

sary under subparagraph (G):

(I) a projection of domestic uranium production and uranium price levels which will be in effect both under current policy and in the event that foreign import restrictions were enacted by Congress in order to guarantee domestic production at the level estimated to be necessary under subparagraph (G):

(J) the anticipated effect of spent nuclear fuel reprocessing on the demand for uranium; and

(K) other information relevant to the consideration of restrictions on the importation of source material and special nuclear meterial from foreign sources.

(b)(1) Chapter 14 of the Atomic Energy Act of 1954 is amended by adding the following new section at the end thereof:

"SEC. 170B. URANIUM SUPPLY.-

"(a) The Secretary of Energy shall monitor and for the years 1983 to 1992 report annually to the Congress and to the President a determination of the viability of the domestic uranium mining and milling industry and shall establish by rule, after public notice and in accordance with the requirements of section 181 of this Act, within 9 months of enactment of this section, specific criteria which shall be assessed in the annual reports on the domestic uranium industry's viability. The Secretary of Energy is authorized to issue regulations providing for the collection of such information as the Secretary of Energy deems necessary to carry out the monitoring and reporting requirements of this section.

"(b) Upon a satisfactory showing to the Secretary of Energy by any person that any information, or portion thereof obtained under this section, would, if made public, divulge proprietary information of such person, the Secretary shall not disclose such information and disclosure thereof shall be punishable under section 1905 of title 18,

United States Code.

"(c) The criteria referred to in subsection a. shall also include, but not be limited to—

"(1) an assessment of whether executed contracts or options for source material or special nuclear material will result in greater than thirty-seven and one-half percent of actual or projected domestic uranium requirements for any two consecutive year periods being supplied by source material or special nuclear material from foreign sources:

"(2) projections of uranium requirements and inventories of domestic utilities for a 10 year period:

"(3) present and probable future use of the domestic market by foreign imports;

"(4) whether domestic economic reserves can supply all future needs for a future ten year period;

"(5) present and projected domestic uranium exploration expenditures and plans; "(6) present and projected employment and capital investment in the uranium in-

dustry;

"(7) the level of domestic uranium production capacity sufficient to meet projected domestic nuclear power needs for a ten year period; and

"(8) a projection of domestic uranium production and uranium price levels which will be in effect under various assumptions with

respect to imports.

"(d) The Secretary of Energy, at any time, may determine on the basis of the monitoring and annual reports required under this section that source material or special nuclear material from foreign sources is being imported in such increased quantities as to be a substantial cause of serious injury, or threat thereof, to the United States uranium mining and milling industry. Based on that determination, the United States Trade Representative shall request that the United States International Trade Commission initiate an investigation under section 201 of the Trade Act of 1974 (19 U.S.C. 2251).

"(e)(1) If, during the period 1982 to 1992, the Secretary of Energy determines that executed contracts or options for source material or special nuclear material from foreign sources for use in utilization facilities within under the jurisdiction of the United States represent greater than thirty-seven and one-half percent of actual or projected domestic uranium requirements for any two consecutive year period, or if the Secretary of Energy determines the level of contracts or options involving source material and special nuclear material from foreign sources may threaten to impair the national security, the Secretary of Energy shall request the Secretary of Commerce to initiate under section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862) an investigation to determine the effects on the national security of imports of source material and special nuclear material. The Secretary of Energy shall cooperate fully with the Secretary of Commerce in carrying out such an investigation and shall make available to the Secretary of Commerce the findings that lead to this request and such other information that will assist the Secretary of Commerce in the conduct of the investiga-

"(2) The Secretary of Commerce shall, in the conduct of any investigation requested by the Secretary of Energy pursuant to this section, take into account any information made available by the Secretary of Energy, including information regarding the impact on national security of projected or executed contracts or options for source material or special nuclear material from foreign sources or whether domestic production capacity is sufficient to supply projected national security requirements.

"(3) No sooner than 3 years following completion of any investigation by the Secretary of Commerce under paragraph (1), if no recommendation has been made pursuant to such study for trade adjustments to assist or protect domestic uranium production, the Secretary of Energy may initiate a request for another such investigation by

the Secretary of Commerce".

## TELECOMMUNICATIONS FOR THE DISABLED ACT OF 1982

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2355. The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2355) entitled "An Act to amend the Communications Act of 1934 to provide that persons with impaired hearing are ensured reasonable access to telephone service", do pass with the following amendments:

Strike out all after the enacting clause,

and insert:

That this act may be cited as the "Telecommunications for the Disabled Act of 1982".

SEC. 2. The Congress finds that-

(1) all persons should have available the best telephone service which is technologically and economically feasible;

(2) currently available technology is capable of providing telephone service to some individuals who, because of hearing impairments, require telephone reception by means of hearing aids with induction coils, or other inductive receptors;

(3) the lack of technical standards ensuring compatibility between hearing aids and telephones has prevented receipt of the best telephone service which is technologically

and economically feasible; and

(4) adoption of technical standards is required in order to ensure compatibility between telephones and hearing aids, thereby accommodating the needs of individuals with hearing impairments.

SEC. 3. Title VI of the Communications Act of 1934 (47 U.S.C. 601 et seq.) is amended by adding at the end thereof the follow-

ing new section:

## "TELEPHONE SERVICE FOR THE DISABLED

"Sec. 610. (a) The Commission shall establish such regulations as are necessary to ensure reasonable access to telephone service by persons with impaired hearing.

"(b) The Commission shall require that essential telephones provide internal means for effective use with hearing aids that are specially designed for telephone use. For purposes of this subsection, the term 'essential telephones' means only coin-operated telephones, telephones provided for emergency use, and other telephones frequently needed for use by persons using such hearing aids.

"(c) The Commission shall establish or approve such technical standards as are re-

quired to enforce this section.

"(d) The Commission shall establish such requirements for the labeling of packaging materials for equipment as are needed to provide adequate information to consumers on the compatibility between telephones and hearing aids.

"(e) In any rulemaking to implement the provisions of this section, the Commission shall specifically consider the costs and benefits to all telephone users, including persons with and without hearing impairments. The Commission shall ensure that regulations adopted to implement this section encourage the use of currently available technology and do not discourage or impair the development of improved technology.

"(f) The Commission shall complete rulemaking actions required by this section and issue specific and detailed rules and regulations resulting therefrom within one year after the date of enactment the Telecommunications for the Disabled Act of 1982. Thereafter the Commission shall periodically review such rules and regulations. Except for coin-operated telephones and telephones provided for emergency use, the Commission may not require the retrofitting of equipment to achieve the purposes of this section.

"(g) Any common carrier or connecting carrier may provide specialized terminal equipment needed by persons whose hearing, speech, vision, or mobility is impaired. The State commission may allow the carrier to recover in its tariffs for regulated service reasonable and prudent costs not charged directly to users of such equipment.

"(h) The Commission shall delegate to each State commission the authority to enforce within such State compliance with the specific regulations that the Commission issues under subsections (a) and (b), conditioned upon the adoption and enforcement of such regulations by the State commission"

Amend the title so as to read: "A bill to amend the Communications Act of 1934 to provide reasonable access to telephone service for persons with impaired hearing and to enable telephone companies to accommodate persons with other physical disabilities."

 Mr. GOLDWATER. Mr. President, I am pleased that the Senate and House have agreed to enact S. 2355, a bill to amend the Communications Act of 1934 to provide that persons with impaired hearing are insured reasonable access to telephone service.

The bill recognizes that the benefits of this access should not exceed the costs to all telephone users, and provides that new technology may not be impeded by the Commission's regulations

Under the bill, the FCC is directed to implement regulation that will insure reasonable access to telephone service for the hearing impaired. To insure such access, the FCC would require that all coin-operated public telephones provide internal means of coupling with hearing aids. The FCC would also require that other telephones-those frequently needed for use by persons using such hearing aids, and emergency phones-provide such internal means of coupling with hearing aids. The FCC would have to establish technical standards that will insure coupling compatability between telephone and hearing aids. The FCC is directed to establish regulations for the labeling of equipment packaging materials that will provide consumers with information on compatability between telephones and hearing aids.

The FCC must consider costs and benefits to all telephone users. FCC rules must encourage the use of currently available technology, and may not impair the development of new technology. Rulemaking required by this section must be completed within 1 year of enactment, and the FCC must periodically review such rules and regulations. Finally, the FCC may not require the replacement of any existing equipment, other than coinoperated public telephones and emergency telephones.

Subsection (B) of S. 2355 provides

"The Commission shall require that essential telephones provide internal means for effective use with hearing aids that are specially designed for telephone use. For purposes of this subsection, the term "essential telephones" means only coin-operated telephones, telephones provided for emergency use, and other telephones frequently needed for use by persons using such hearing aids."

Mr. President, this language does not expand the Commission's jurisdiction over the telephone services provided by hotels and motels. In any event, the Congress has taken steps to insure that the Commission does not impose unwarranted or unnecessary rules upon hotels and motels or upon any other industry or individual. In subsection (E), the Commission is directed to specifically consider costs and benefits to all telephone users before it implements any rules under this act.

CORPORATION FOR PUBLIC BROADCASTING

Mr. President, this bill contains an amendment that insures that the Board of Directors of the Corporation for Public Broadcasting (CPB) retains its political balance during its reduction in size from 15 to 10 members.

Public Law 97-35 requires that the members appointed by the President to the Board of Directors at CPB be reduced from 15 to 10, and that after reduction, no political party should be represented by more than 6 members. If the reduction takes place as anticipated in Public Law 97-35, then it is possible that the Board will have eight members of the same party; thus violating the political balance requirement.

Thus, this amendment would simply cut short, by 3 years, the terms of office of two of the persons expected to take one of the existing vacancies on the Board. The terms of these two persons would expire March 1, 1984, and not March 1, 1987. This gives the President an opportunity to appoint two additional members of the minority party on March 1, 1984—leaving a 6 to 4 ratio, as required by Public Law 97-35, and not a ratio of 8 to 2.

THE COMMUNICATIONS SATELLITE ACT OF 1962
In order for the Communications

Satellite Corporation (Comsat) to meet its continuing financing requirements effectively, this amendment eliminates an outmoded provision of the Communications Satellite Act of 1962.

The second sentence of section 304(b)(2) of the act, requires that 50 percent of any new issuance of Comsat stock be reserved for purchase by other communications common carriers. This requirement was enacted when Comsat stock was not yet available on the open market. Its purpose was to insure that authorized carriers have the opportunity to purchase shares. The carriers did, in fact, purchase 50 percent of the original issue, but have since disposed of almost all

of their shares. They now own only about 7,000 shares-less than 0.1 percent—of about 8 million shares outstanding. The repeal of this provision would not prevent carriers from purchasing or owning Comsat shares; the reservation for them would simply not be there as a cloud on alienability. Authorized carriers could purchase new offerings of shares, and could purchase shares on the open market.

Comsat has now entered a period requiring additional financing for further development of its satellite programs. In the current volatile financial markets, it must be in a similar position to other companies for obtaining financing when conditions are most favorable. However, the provision in section 304(b)(2) is still in force and requires the company to set up extraordinary and cumbersome procedures for compliance.

The committee considered this matter in conjunction with hearings on S. 2469, the International Telecommunications Act of 1982—Senate Calendar No. 967—and included repeal of the provision in the bill as reported by the Commerce Committee on October 1. To my knowledge, no one has questioned the merits of repealing the provision.

Mr. CANNON. Mr. President, last spring I introduced, along with Senators Goldwater and Riegle, S. 2355, dealing with telephone service for the hearing impaired. In August, this bill was unanimously passed by the Senate.

Yesterday, the House of Representatives passed this bill by a vote of 365 to 14. The House version of this bill differs from the version the Senate passed in August in three ways:

First, the bill has been given a title: the "Telecommunications for the Disabled Act of 1982." Second, the House version includes an amendment that makes State public utility Commissions, rather than the FCC, the primary enforcement mechanism. Third, and much more importantly, the House has added a provision which states that a regulated carrier, that is, a telephone company, "may provide specialized terminal equipment needed by persons whose hearing, speech, vision, or mobility is impaired" and that State commissions "may allow the carrier to recover in its tariffs for regulated service reasonable and prudent costs not charged directly to users of such equipment." This would correct one of the unforseen consequences of the FCC's "Computer II" decision where the FCC generally told telephone companies to get out of the terminal equipment business and directed that, in the future, terminal equipment would be supplied by competitive manufacturers. If telephone companies no longer provide any terminal equipment, the question arises as to who will supply teletypewriters and other specialized equipment that telephone companies traditionally provided to handicapped individuals on a below-cost basis.

I am, of course, delighted by the House action since this legislation is supported by the administration, by the telephone and electronics industries, by State regulatory commissions, and by a wide variety of organizations representing the handicapped.

The majority proposes to use this bill as a vehicle to enact two very technical amendments of a noncontroversial nature. I have reviewed those amendments. They are purely technical and noncontroversial and I certainly have no objection.

Mr. President, I ask unanimous consent that these letters of support from the National Easter Seal Society, the American Council of the Blind, the Paralyzed Veterans of America, the American Association of Retired Persons, the National Association of the Deaf, and the Centel Corp. be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL EASTER SEAL SOCIETY, Washington, D.C., October 18, 1982. Hon. Howard W. Cannon,

U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR CANNON: I am writing to express our organization's support for S. 2355, the legislation that you have introduced which would insure access to telephone service for persons with hearing impairments. We believe that your bill, as amended by the House, will result in greater access to our communications system for all citi-

The National Easter Seal Society has had a longstanding interest in the problems of with hearing impairments. During 1982, state and local Easter Seal societies will serve over 40,000 individuals with impaired hearing. As you know, one of the most frustrating aspects of hearing impairment and deafness is the inability to use the telecommunications media on which our society has become so dependent. We believe that your bill will guarantee effective use of the telephone by this group of people. Furthermore, we believe that it will provide greater access, but will not discourage the development of new technology in this area. Our organization shares your view that making the benefits of the technological revolution in telecommunications available to all Americans, including those with disabilities, should be a priority in communications policy for the Congress

We appreciate your efforts on this issue and hope that S. 2355 (as amended by the House) will be approved expeditiously by the Senate.

Sincerely,

JOSEPH D. ROMER, Director of Governmental Affairs.

AMERICAN COUNCIL OF THE BLIND. Washington, D.C., September 27, 1982. Re telecommunication for the disabled act S. 2355.

Hon, HOWARD CANNON. U.S. Senate. Washington, D.C.

DEAR SENATOR CANNON: The American Council of the Blind, the largest consumer organization of blind and visually impaired people in the United States, joins the many national and community organizations supporting S. 2355: the Telecommunications for the Disabled Act. In addition to benefiting the hearing impaired, we believe that this legislation would benefit other handicapped persons such as deaf-blind individuals who must rely on expensive specialized telephone equipment. We believe that local telephone companies should be able to subsidize the cost of this equipment and installation from the general rate base so that such individuals can more affordably use telephone equipment.

We commend your leadership in connection with this legislation and hope that the Senate will pass the bill at the earliest possible date.

Sincerely.

J. SCOTT MARSHALL Director of Governmental Affairs.

PARALYZED VETERANS OF AMERICA, Bethesda, Md., September 24, 1982. Hon. HOWARD H. CANNON, Senate Committee on Commerce, Science, and Transportation, U.S. Senate, Wash-

ington, D.C.

DEAR SENATOR CANNON: On behalf of the 11,000 members of Paralyzed Veterans of America, I want to express appreciation for your efforts and those of Senator Barry Goldwater to promote access to the tele phone communications system for individuals with physical impairments. Your recognition of the importance of improved and available communications for disabled citizens and the essential role modern communications play in assisting disabled people to achieve maximum independence is gratify-

Your legislative proposal, S. 2355, clearly addresses many problems presently facing disabled citizens regarding the acquistion and payment for specialized communications equipment. The recent Federal Communications Commission decision, Computer II, would preclude many individuals from obtaining this necessary, and ofter only means of contact with other people including vital medical and emergency personnel. Additionally, this FCC decision serves to retard technological innovations which benefit disabled people by drastically restricting their use and potential market.

Under the Computer II decision telephone companies would be prevented from subsidizing special and unique equipment which meet the needs of handicapped individuals. This not only will sever their primary means of communications but will also, in certain cases, prevent their gainful employment. This decision is unduly harsh and restrictive as it applies to devices for disabled people and presents a great hardship and peril to many of the most catastrophically disabled citizens.

Again, thank you for your recognition of this issue. If I or any member of my staff can further assist you in securing passage of this legislation, please contact us.

Sincerely yours,

R. JACK POWELL Executive Director.

AMERICAN ASSOCIATION OF RETIRED PERSONS. Washington, D.C., September 27, 1982. Hon. HOWARD W. CANNON,

U.S. Senate, Washington, D.C.

DEAR SENATOR CANNON: The American Association of Retired Persons is writing in support of S. 2355, the Telecommunications for the Disabled Act of 1982, as amended by the House which is designed to promote access to the telephone network for persons with physical impairments.

We are pleased that this legislation recognizes and begins to address the problem of telephone receiver incompatibility with hearing aid telephone pickups. The Association is concerned that incompatible telephone equipment is restricting certain individuals' access to the use of the telephonean integral part of everyday life.

Hearing impairment among the elderly is widespread disability which threatens the quality of life of our elderly by inhibiting their communication with others. The hearing aid, although not a panacea, is a rehabilitative device which provides assistance to many hearing impaired elderly. Hearing aids should serve the hearing impaired elderly in as many different situations as possible; using the telephone is one method of communication which should not be denied this population.

Nor should access to the telephone be denied to those individuals with other physical impairments who need different types of specialized telephone equipment. Therefore, as contained in section (g) of S. 2355, it is important that telephone companies be allowed and encouraged to provide that specialized telephone equipment in a manner which is affordable to those who need access to the telephone most.

The lack of access to telephone has farreaching implications in such problem areas as freedom from isolation, emergency protection, equal employment opportunities, and freedom of mobility. For example, there are elderly individuals who suffer from severe chronic conditions which restrict their mobility and cause them to be confined to their homes. For them, the telephone is an essential tool for communication. It may be the only or major means for them to have contact with others and thereby provide protection from social isolation. In an emergency situation, the telephone may be their only resource for obtaining assistance.

Again AARP supports S. 2355, the Telecommunications for the Disabled Act of 1982, as amended and urges that this legislation be acted upon favorably during this session of Congress

Sincerely.

PETER W. HUGHES. Legislatine Counsel

NATIONAL ASSOCIATION OF THE DEAF, Washington, D.C., September 27, 1982. Senator Howard W. Cannon, U.S. Senate, Washington, D.C.
DEAR SENATOR CANNON: We write to thank

you for your efforts in obtaining Senate passage of S. 2355, the Telecommunications for the Disabled Act of 1982.

This bill, which you introduced along with Senator Goldwater, was passed by the Senate on August 18, 1982. A similar version has now been approved unanimously by the House Committee on Energy and Commerce, with an amendment relating to enforcement authority, and we understand that House action is imminent.

In the form passed by the House Committee, this bill will be of great benefit to millions of hearing-impaired Americans who depend on access to our telecommunications system. Although it does not require universal compatibility of all telephone equipment with hearing aids, its provisions will allow hearing-impaired and other disabled telephone consumers to have access to essential telephone service. The bill appears to balance the needs of disabled consumers with the competing demands of the telephone industry

We thank you for your support and interest in this legislation, and we urge you to support its immediate passage by the Senate.

Very truly yours,

SARAH GEER, Staff Attorney.

CENTEL CORP.

Washington, D.C., October 14, 1982. Hon. Howard W. Cannon,

Russell Senate Office Building, Washington, D.C.

DEAR SENATOR CANNON: This letter concerns S. 2355, the Telecommunications for the Disabled Act of 1982.

As you know, Centel Corporation operates the fourth largest independent telephone system in the United States, serving 1.1 million telephones in ten states. We are also a major CATV operator and are moving into other emerging telecommunications fields to augment our business systems, communications products and related activities.

We support this legislation, which was first addressed by the Senate Commerce Committee on a bipartisan basis. We appreciated the opportunity to work with your staff in reviewing the technical problems and regulatory implications of this bill.
